Pages: 9

This instruction implements Air Force Policy Directive 46-1, *Nursing Services*, and 4N0X1/B/C/F *Career Field Education and Training Plans (CFETP)*. The prevailing goal of the assignment and rotation process is to ensure all assigned Aerospace Medical Service Specialist (4N0) personnel are provided an opportunity for positive and deliberate career development through a variety of rotational work assignments. At the same time, we must also ensure mission requirements are met equitably by placing the right number of personnel in the right job at the right time. This medical wing instruction (MDWI) outlines guidance for movement of personnel assigned to the 59th Medical Wing (MDW) to meet these goals. This instruction applies to all personnel assigned or attached to the 59 MDW. This instruction does not apply to the Air National Guard or Air Force Reserve. Refer recommended changes and questions about this publication to the Office of Primary Responsibility using the AF Form 847, *Recommendation for Change of Publication*. Requests for waivers must be submitted to the OPR listed above for consideration and approval. Ensure that all records generated as a result of processes prescribed in this publication adhere to Air Force Instruction 33-322, *Records Management and Information Governance Program*, and are disposed of in accordance with the Air Force Records Disposition Schedule which is located in the Air Force Records Information Management System.

SUMMARY OF CHANGES

This publication has been revised. This rewrite of 59 MDWI 46-103 includes updated assignment policies and procedures**.**

1. Responsibilities.

1.1. The 59 MDW Vice Commander (59 MDW/CV) is the final authority on issues that cannot be resolved at lower levels.

1.2. Wing 4N Functional Manager will:

1.2.1. Provide guidance and assistance to the 59 MDW Chief Nurse (SGN), Group Commanders, Senior Enlisted Leaders (SEL), Functional Managers (FM), and/or senior 4N0 regarding career development programs and utilization of personnel within the 4N0X1X Air Force Specialty Code (AFSC).

1.2.2. Provide 59 MDW manning/skill level updates as required/requested to identify any significant issues, skill imbalances, overages, etc. to respective group leadership [CC, SEL, SGN, Group 4N FM, senior 4N0].

1.2.3. Conduct monthly 4N meetings with group 4N0 FMs and/or senior 4N0 group representatives to review and discuss 4N0-related issues including but not limited to: current skill mixes and staffing levels in squadrons, groups and wing staff; projected gains and losses; length of assignments; deployments; training requirements; and varying mission requirements.

1.2.4. Develop and maintain guidance for managing personnel rotations.

1.2.5. Systematically and periodically review the overall 59 MDW 4N0 manning, various duty positions and rotation schedules to determine if moves are in the best interest of the organization, mission, and, to the greatest extent possible, the individuals' professional development and growth.

1.2.6. Coordinate on applicable authorization change requests and/or no-cost, fully-funded permanent change of station (PCS) electronic staff summary sheet, prior to groups' submission to the wing manpower office.

1.3. Squadron commanders, in consultation with group SGN, SEL, and 4N FM will:

1.3.1. Be responsible for the career development for all assigned 4N personnel.

1.4. Group SGN, in consultation with group CC and SEL will:

1.4.1. Appoint primary and alternate group 4N0 FM or senior 4N0 leaders, in writing, to expertly advise and represent them on 4N0 issues (i.e., utilization, training, special duty applicants, etc.). Exception: Position for 4N000 FM in the 959th Medical Group is designated on the unit manpower document.

1.5. Group Functional Managers and/or senior 4N0 will:

1.5.1. Attend all scheduled meetings or send designee.

1.5.2. Track placement of personnel, rotation due dates, and unit type code assignments, and facilitate personnel integrations within their respective units.

1.5.3. Review 4N0 duty history, individual skills and abilities when collaborating with SGN, CC, and SEL in determining work center assignments.

1.5.4. Ensure all 4N0 Air Expeditionary Force band assignments are balanced, in close coordination with the 59 MDW Readiness Office, against in-garrison requirements and individual skill level/Special Experience Identifiers (SEI)/abilities.

1.5.5. Meet individually with each newly assigned 4N0 during in-processing.

1.5.6. Monitor unit manpower document and unit personnel management roster.

1.5.7. Assist with completion of sponsor allocation notices.

1.5.8. In/Outprocess personnel with permanent change of assignments utilizing each group's permanent change of assignment checklist.

1.5.9. Review individual preference worksheets of personnel due to rotate. If an inter-group rotation is desired, forward the completed worksheets to the gaining group FM or senior 4N0 for consideration.

2. Assignment Policies and Procedures.

2.1. General Information.

2.1.1. Due to the diverse nature of the 4N0 career field, an effective rotation plan for assigned personnel is critical in meeting dynamic health care delivery and training requirements. Importance will be placed on ensuring deliberate force development at both tactical and operational levels to better manage capability.

2.1.2. The standard tour length recommendation for 4N0X1 personnel is 36 months; this is to allow for member and duty section stability. Squadron commanders, in collaboration with Group FM, reserve the authority to shorten or extend tour length to meet mission requirements, i.e., 4Ns assigned to Primary Care/Air Force Medical Home teams.

2.1.3. Personnel assigned to the 59 MDW staffed in AFSC-neutral positions, or any other position outside of the 4N0 career path/duties (i.e., matrix positions, MDG Unit Training Manager, additional duty First Sergeants, etc), should rotate after 15 months unless mission needs dictate otherwise.

2.1.4. All tour length extension reviews should include consideration of the overall staffing (i.e., authorizations versus assigned) as well as skill level mix (3/5/7), mission needs, duty location, and any other special circumstances (SEI, extensive training, etc.).

2.2. Initial Assignment of Personnel.

2.2.1. Group FM or senior 4N0, with group SGN and group/squadron SEL coordination, will recommend inbound personnel allocation to work centers based on mission requirements, individual career-broadening opportunities, and when possible, individual desires. When making assignments, the number of personnel authorized/assigned, projected losses/gains, workload, and skill level mix should be considered. The final authority for personnel assignment resides with the Squadron/Group Commander.

2.2.2. Prior to arrival, the group FM or senior 4N0 should provide inbound personnel with an individual preference worksheet (**Attachment 2**) and the 4N0 Duty Position Matrix (**Attachment 3**) to solicit their assignment preference via email.

2.3. Longevity moves, intra-group, and inter-group transfer of personnel.

2.3.1. Personnel will be selected for longevity moves based on their date of assignment to their duty section. All moves/transfers are based on mission continuity, retainability, merit, and when possible, individual desires.

2.3.1.1. Personnel should complete an individual preference worksheet to indicate their assignment preferences. Group FM and/or senior 4N0 should consider desired location to meet career development and mission requirements for placement.

2.3.2. Intra-group: Group FM and/or senior 4N0 may recommend intra-group transfer to the group/squadron SELs in order to accommodate mission requirements and member's developmental needs. Group FM and/or senior 4N0 may exercise intra-group transfers with coordination/approval of losing & gaining Squadron Commander or designee. 959 MDG FM will also collaborate with Department/Section Leadership.

2.3.3. Inter-group: Group FM and/or senior 4N0, in collaboration with their group/squadron SELs, will coordinate possible move with gaining group FM and/or senior 4N0 and group/squadron SELs. If decision to move is approved by the Squadron CC, the losing squadron SEL/group FM and/or senior 4N0 will coordinate with the group Administrator (SGA) and Air Force Personnel Center (AFPC). The group SGA and AFPC will only complete action after receiving the no-cost or fully-funded PCS paperwork that has been completed and approved by the losing and gaining groups.

2.3.3.1. If the inter-group move is between 959 MDG and Lackland and approved by AFPC, a no-cost PCS will be loaded by AFPC IAW AFI 36-2110, *Total Force Assignments*. Losing unit will initiate an AF Form 2096, *Classification On the Job Training Action*. Member will not receive orders.

2.3.3.2. If the inter-group move is to or from 559 MDS and approved by AFPC, a low-cost or fully-funded PCS will be loaded by AFPC IAW AFI 36-2110. Member will receive official orders.

2.3.3.3. If the inter-group move is within JBSA-Lackland, a 2096 worksheet is required.

2.3.4. Senior noncommissioned officers (SNCOs) may request to rotate prior to completing longevity norms in their current duty location. SNCOs are encouraged to seek the versatility required at the senior levels of enlisted leadership. All requests must be approved by gaining and losing Group/Squadron commanders and SELs.

2.3.5. Reasons that may prevent an individual from participating in a longevity move include, but are not limited to, the following: unfavorable information files, control roster action and/or documented poor performance, etc. Group SELs from the losing and gaining organizations, in consultation with group FM and or senior 4N0 and first sergeants [for Quality Force Indicators (QFI)], should carefully review these moves and seek input/advice from the wing 4N FM. Ultimately, the gaining Squadron commander will decide whether or not to accept individuals with negative quality force indicators. In cases where it is determined the individual will not be considered for an inter-group move, the individual will remain within his/her current unit of assignment until the member's QFI issues are resolved.

2.3.6. Other circumstances that may preclude a move include individuals with less than 12 months retainability on station due to permanent change of station orders, approved retraining, separation, or retirement date. Individuals falling in these categories will not be considered for rotation unless the gaining Group commander and SEL agree to accept them.

2.3.7. Deployed individuals who are due to rotate may rotate within 90 days of return from deployment using the same approval process as other longevity moves.

2.3.8. The wing FM will address any extenuating circumstances that necessitate unscheduled reassignment (i.e., change in mission requirements, promotions to ensure duties are commensurate with skill-level progression, removal in the case of poor performance, etc).

2.3.9. Personnel may submit an application for a corps-neutral position; however, prior coordination with the group/wing FM is required.

JEANNINE M. RYDER, Brig Gen, USAF, NC
Commander, 59th Medical Wing
