BY ORDER OF THE SECRETARY OF THE AIR FORCE

AIR FORCE MANUAL 10-3500 Volume 2

3 JUNE 2025

Operations

AFSPECWAR STANDARDIZATION AND EVALUATION

COMPLIANCE WITH THIS PUBLICATION IS MANDATORY

ACCESSIBILITY: This publication is available for downloading or ordering on the e-Publishing website at www.e-Publishing.af.mil

RELEASABILITY: There are no releasability restrictions on this publication.

OPR: AF/A3S | Certified by: AF/A3S

Supersedes: AFMAN 10-3500V2, 1 June 2022 | Pages: 99

This manual implements Department of the Air Force Policy Directive (DAFPD) 10-35, *Air Force Special Warfare*. It establishes the Air Force Special Warfare (AFSPECWAR) standardization and evaluation (Stan/Eval) program. This publication applies to individuals at all levels with a 19ZXX, 1ZXXX, or 1T0XX Air Force Specialty Code (AFSC), including the Air Force Reserve and Air National Guard, except where noted otherwise. This publication applies to all AFSPECWAR assigned civilian employees. 1T0 personnel are subject to this publication only when assigned to an AFSPECWAR organization, to include Rescue Squadrons, Special Tactics Squadrons, and Air Support Operations Squadrons. The Air Reserve Components are the reserve forces of the United States Air Force (USAF), consisting of the Air Force Reserve and the Air National Guard. This publication does not apply to the United States Space Force. It consolidates Air Force Specialties (AFSs) 1Z1 (Pararescue (PJ)), 1Z2 (Combat Control (CCT)), 1Z3 (Tactical Air Control Party (TACP)), 1Z4 (Special Reconnaissance (SR)), 1T0 (SERE Specialist (SERE)), 19ZXA (Special Tactics Officer (STO)), 19ZXB (TACP Officer), and 19ZXC (Combat Rescue Officer (CRO)) evaluation and qualification programs into a single document and fulfills the role of an Air Force Manual (AFMAN) 11-2MDS Volume 2 for AFSPECWAR non-rated aircrew as directed by AFMAN 11-202, Volume 2, *Aircrew Standardization and Evaluation Program,* and is designed to be the source document for AFSPECWAR Standardization and Evaluation Program guidance. This publication requires the collection and/or maintenance of information protected by the Privacy Act of 1974 authorized by Title 10 United States Code Section 9013*, Secretary of the Air Force*; and Title 37 United States Code Section 301, *Incentive Pay*. The applicable system of records notice FO11 AF XOA, Aviation Resource Management Systems, is available at: https://dpcld.defense.gov/privacy/SORNS.aspx. Ensure all records generated as a result of processes prescribed in this publication adhere to Air Force Instruction (AFI) 33-322, *Records*

Management and Information Governance Program, and are disposed in accordance with the Air Force Records Disposition Schedule, which is located in the Air Force Records Information Management System. Refer recommended changes and questions about this publication to the office of primary responsibility (OPR) using Department of the Air Force (DAF) Form 847, *Recommendation for Change of Publication*; route DAF Forms 847 from the field through the appropriate functional chain of command. This publication may be supplemented at any level, but all supplements must be routed to the OPR of this publication for coordination prior to certification and approval. Send supplements to Air Force Special Warfare Directorate, Deputy Chief of Staff for Operations (AF/A3S) at AF.A3S.Workflow@us.af.mil. The authorities to waive wing/unit level requirements in this publication are identified with a tier ("T-0, T-1, T-2, T-3") number following the compliance statement. See Department of the Air Force Manual (DAFMAN) 90-161, *Publishing Processes and Procedures*, for a description of the authorities associated with the tier numbers. Submit requests for waivers through the chain of command to the appropriate tier waiver approval authority, or alternately, to AF/A3S for non-tiered compliance items. Send approved T-2 and T-3 waivers to AF/A3S within three duty days for tracking and process improvement. Compliance with the attachments in this publication is mandatory.

SUMMARY OF CHANGES

This publication has been substantially revised and should be reviewed in its entirety. Changes include: the inclusion of the 1T0 SERE Specialists when assigned to AFSPECWAR organizations; the implementation of a Pyramid Evaluations Structure, **Table 4.1**; clarification and adjustment to mission and optional/task (SPOT) evaluation criteria; revised Air Force (AF) Form 1035, *AFSPECWAR Evaluation Form,* instructions; and the addition of AFSPECWAR Evaluator Objectivity SPOT Evaluations, **Table A7.1**.

Chapter 1

GENERAL INFORMATION

1.1. Overview. This manual establishes the Stan/Eval program for all AFSPECWAR Airmen. It establishes requirements for evaluations and outlines grading criteria. This instruction also provides specific and amplifying guidance to AFMAN 11-202V2 when AFSPECWAR operators function as aircrew.

1.1.1. The purpose of the AFSPECWAR Stan/Eval program is to provide commanders with a tool to ensure members possess the knowledge and skills consistent with the requirements of their assigned duties and the ability to manage the risks of AFSPECWAR operations, thus functioning as an effective operator within their skill level and qualifications.

1.1.2. The AFSPECWAR Stan/Eval program provides commanders with the means to document individual member qualifications, feedback on the effectiveness of unit training programs and mission execution and ensure a quality control function with clearly defined roles and responsibilities that are objective and effective.

1.1.3. This program supports the AF's on-the-job training (OJT) program under DAFMAN 36-2689, *Training Program*, with an evaluation model successfully employed by the aircrew enterprise under AFMAN 11-202V2 with modifications to fit the air/ground integration evaluation requirements for AFSPECWAR.

1.2. Objectives.

1.2.1. Provide a system to assess and document members' capability to accomplish assigned AFSPECWAR duties.

1.2.2. Develop and ensure standardization of operational procedures for weapon system employment via recommendations of improvements to training programs, lesson plans, standard operating procedures, and directives based on performance and evaluation results.
1.2.3. Ensure compliance with appropriate operational, training, and administrative directives.

1.2.4. Evaluate and revise operational directives, procedures, and techniques as required.

1.2.5. Recognize and analyze trends and recommend/initiate changes to training programs and directives.

1.2.6. Provide procedures, standards, and programmatic guidance across AFSPECWAR.

1.2.7. Ensure continuity and mission capability by establishing inter-command standards.

1.3. Key Terms and Definitions. For the purposes of this manual:

1.3.1. AFSPECWAR Operator. The term AFSPECWAR operator is restricted to members who hold a 1ZXXX or 19ZXX AFSC, not the overarching AFSPECWAR enterprise.

1.3.2. Operations Group (OG). OG is used as a generic term that includes Air Support Operations Groups, Rescue Groups, Special Operations Groups, Special Tactics Groups, and the Special Warfare Training Group.

1.3.3. Unit. The term unit includes levels of organization under higher headquarters (HHQ) required to establish a Stan/Eval function. Most units are composed of an OG and AFSPECWAR squadrons or detachments. Where there is no parent Group, squadrons/detachments assume duties listed for Groups.

1.3.4. Formal Training Units (FTUs). FTUs are the Guardian Angel (GA) FTU (68th Rescue Squadron), the Special Tactics Training Squadron, and the TACP FTU (6th Combat Training Squadron, Detachment 2).

1.3.5. Tactical Enlisted Leader. A Tactical Enlisted Leader is an enlisted AFSPECWAR operator who has completed the Tactical Enlisted Leader upgrade in accordance with the respective AFS Career Field Education and Training Plan, FTU syllabus, or HHQ Tactical Enlisted Leader Qualification Training Package.

1.3.6. Certification. Certification is the procedure used to document competency in a particular task following the completion of a Syllabus of Instruction or training course. It is documented on a DAF Form 623A, *On-the-Job Training (OJT) Record Continuation Sheet;* or DAF Form 797, *Job Qualification Standard Continuation/Command JQS*. Certification is not interchangeable with qualification, which requires documentation on an AF Form 1035, *AFSPECWAR Evaluation Form*.

1.3.7. Qualification. Qualification/Qualified is a designation arising from graduating an approved course or a successful evaluation, documented on an AF Form 1035, that allows a member to perform specified duties.

Chapter 2

ROLES AND RESPONSIBILITIES

2.1. The Deputy Chief of Staff, Operations (AF/A3), through AF/A3S. AF/A3S will:

2.1.1. Develop guidance and oversee the execution of the AFSPECWAR Stan/Eval program.

2.1.2. Review major command (MAJCOM) supplements to this manual to ensure MAJCOMs adhere to basic guidance in this manual.

2.1.3. Maintain liaison with Headquarters Air Force (HAF) organizations, MAJCOMs, and aircrew career-field functional managers.

2.1.4. Coordinate with HAF organizations and MAJCOM Stan/Eval functions to ensure guidance in separate publications conforms to and comply with basic AF guidance.

2.1.5. Coordinate with MAJCOM Stan/Eval functions to develop the Air Force-level AFSPECWAR Stan/Eval Self-Assessment Checklist and upload to the Management Internal Control Toolset as specified in Department of the Air Force Instruction (DAFI) 90-302, *The Inspection System of the Department of the Air Force*.

2.1.6. Resolve Stan/Eval issues that arise between MAJCOMs.

2.1.7. Function as the OPR for AFSPECWAR aircrew requisites at the AF level.

2.2. The Deputy Chief of Staff, Operations, Director for Training and Readiness (AF/A3T). AF/A3T will develop guidance and oversee the conduct and execution of the aircrew Stan/Eval program.

2.3. The Director, Aircrew Task Force (AF/ACTF). AF/ACTF will:

2.3.1. Coordinate with AF/A3S to ensure AFSPECWAR aircrew evaluations comply with basic guidance in AFMAN 11-202V2, Chapter 8.

2.3.2. Ensure AFSPECWAR aircrew guidance in this manual fulfills the requirements of AFMAN 11-2MDS Volume 2 guidance contained in AFMAN 11-202V2.

2.4. MAJCOM/A3 Operations. MAJCOM/A3s will:

2.4.1. Lead MAJCOMs will assign an AFSPECWAR operator for each of the represented AFSs to the Stan/Eval staff. All other MAJCOMs will assign or designate an AFSPECWAR for each represented AFS.

2.4.2. See AFMAN 10-3500, Volume 1, *AFSPECWAR Training Program*, for guidance on key staff member evaluations.

2.4.3. Approve subordinate FTU-developed 24-month reoccurring instructor (INSTR) evaluation standards for any FTU instructors designated as "key staff." (See **paragraph 4.4.3.2**.)

2.5. MAJCOM/A3 Stan/Eval. MAJCOM/A3 Stan/Eval will:

2.5.1. Have AFSPECWAR operators assigned for each represented AFSs if a lead MAJCOM. All other MAJCOMs may designate AFSPECWAR operators for each represented AFS.

2.5.2. Designate and certify staff-assigned AFSPECWAR evaluators in writing. **Note:** These evaluators will maintain instructor qualification and will operate at a rate utilizing guidance provided in AFMAN 10-3500V1, Attachment 2, to maintain required currencies necessary to fulfill the responsibilities of an evaluator.

2.5.3. Use augmentees from other MAJCOMs to support or conduct staff assistance visits, Inspector General inspections, and evaluations with concurrence of all the MAJCOM Stan/Eval organizations involved, if necessary. Augmentees will use the criteria of the MAJCOM they are augmenting.

2.5.4. Assist in the development and management of this manual in coordination with AF/A3S.

2.5.5. Provide MAJCOM decision makers with AFS Stan/Eval subject matter expertise on all issues related to AFSPECWAR operations.

2.5.6. Maintain oversight of Stan/Eval functions in lower echelon units.

2.5.7. Maintain oversight of HHQ pyramid evaluation program and provide subordinate unit Stan/Eval support through staff assistance visits.

2.5.8. Convene or attend joint and service conferences and working groups related to AFSPECWAR guidance, architecture, and to review and improve Stan/Eval policies and procedures.

2.5.9. Provide staff coordination and control of all Flight Crew Information File (FCIF) items applicable to AFSPECWAR using the FCIF infrastructure for dissemination in accordance with **Chapter 8**. **Note:** MAJCOM AFSPECWAR Stan/Eval staffs should closely scrutinize FCIFs and ensure that the information communicated is pertinent to AFSPECWAR operators' operations involving the affected Mission Design Series (MDS) prior to assigning FCIF applicability to AFSPECWAR weapon systems.

2.5.10. Establish and maintain an electronic library of all publications applicable to the command's AFSPECWAR members.

2.5.11. Establish the command's Electronic Publications Program (e.g., electronic flight bag), guidance for utilization, and publication management tools as required.

2.5.12. Coordinate and process applicable DAF Forms 847 through Stan/Eval channels.

2.5.13. Conduct annual review, update, and distribute closed book, open book, and upgrade Master Question Files (MQF) to using agencies in accordance with **paragraph 5.2.2**.

2.5.14. Coordinate operational procedures, evaluation criteria, and guidance in conjunction with the lead MAJCOMs and other user MAJCOMs.

2.5.15. Assist safety offices and agencies in evaluating mishaps when requested.

2.5.16. Provide Stan/Eval subject matter experts to MAJCOM/Inspector General in support of unit effectiveness inspections.

2.5.17. Consolidate unit trend analysis semi-annually and provide feedback to senior, lateral, and subordinate headquarters as required.

2.5.18. Consult MAJCOM Functional Managers and coordinate with other publication OPRs to resolve conflicting guidance or procedures and determine precedence for AFSPECWAR operators and weapon systems.

2.6. Operations Group/CC (OG/CC). The conduct of the unit level Stan/Eval program is directed by the OG/CC. The OG/CC will:

2.6.1. Designate and certify OG Stan/Eval (OGV) evaluators (see **paragraph 3.2**).

2.6.2. Provide the means to procure the necessary materials for mission planning and pre-mission briefings.

2.6.3. Provide a suitable Stan/Eval testing area.

2.6.4. Chair the Standardization and Evaluation Board (SEB).

2.6.5. Establish procedures to implement MAJCOM-mandated Stan/Eval software.

2.7. Operations Group Standardization and Evaluation (OGV). The OGV will:

2.7.1. Ensure standardization of unit-assigned evaluators and unit Stan/Eval (CCV) functions.
Note: If there is only one AFSPECWAR unit in an OG, the OG/CC may delegate the responsibilities below, in writing, to that CCV office.

2.7.2. Establish procedures for review and quality control of AF Form 1035, and any accompanying DAF Form 623A.

2.7.3. Establish procedures to maintain and review the evaluation documentation in the members' training records. Maintain the evaluation documentation for units that do not have

a CCV.

2.7.4. Develop and manage standardized open and closed book exams for subordinate organizations as required (see **Chapter 5**).

2.7.5. Establish and maintain a trend program to identify areas requiring attention, monitoring, or correction.

2.7.6. Conduct supplementary evaluations as directed by the OG/CC (see **paragraph 8.9**).

2.7.7. Conduct SEBs and document in accordance with **paragraph 8.6**.

2.7.8. Establish and maintain the unit Information File program in accordance with **paragraph 8.1**.

2.7.9. Maintain, control, and disseminate all applicable Information Files issued from HHQs.

2.7.10. Review and coordinate on the MAJCOM publications electronic library to ensure information is accurate.

2.7.11. Advise MAJCOM Stan/Eval on unit-level FCIFs to identify potential, cross-MAJCOM applicability.

2.7.12. Coordinate on and process applicable DAF Forms 847 through Stan/Eval channels.

2.7.13. Provide and coordinate support as requested by MAJCOMs to conduct program staff assistance visits and formal inspections.

2.7.14. Attend joint, service, and MAJCOM conferences and working groups related to AFSPECWAR guidance, architecture, training, and mission employment.

2.7.15. Serve on mishap review panels.

2.7.16. Organize their AFSPECWAR evaluators to best meet mission needs.

2.7.16.1. OGV staff should include at least one AFSPECWAR evaluator from each of the represented AFSs.

2.7.16.2. Enlisted evaluators will be fully qualified 7-levels. Officer evaluators will have experience as either an enlisted 7-level AFSPECWAR evaluator or operations flight commander.

2.7.16.3. The OG/CC may designate Stan/Eval Liaison Officers, DAF civilians, or contractors to assist OGV.

2.8. Unit Commander. Any or all of the following responsibilities may be assumed at a higher

level in situations where a CCV function does not exist. The Unit/CC will:

2.8.1. Appoint a unit Chief of Stan/Eval in writing to oversee all CCV functions.

2.8.2. Review and sign all AF Forms 1035 with an overall grade of Qualification Level 2 (Q2) or Qualification Level 3 (Q3). **Note:** Evaluation and documentation signature authority may be delegated to Chief of Stan/Eval or Operations Officer.

2.8.3. Designate and certify unit evaluators (see **paragraph 3.2**).

2.8.4. Establish an annual proportion of evaluations that will be No-Notice (N/N).

2.8.5. Approve unit evaluation scenarios.

2.8.6. Direct and control the SEB and trends analysis program, in accordance with **Chapter 8**.

2.8.7. Use the SEB review process to identify trends, deficiencies, and implement corrective actions.

2.8.8. Designate an OPR for the unit Go/No-Go program (see **paragraph 8.4**).

2.8.9. If desired, designate Stan/Eval Liaison Officers, DAF civilians, or contractors to assist CCV.

2.9. Unit Stan/Eval (CCV). CCV will:

2.9.1. Consists of a Chief of Stan/Eval who is a certified evaluator and reports directly to and is rated by the unit commander.

2.9.2. Designate at least one evaluator from each of the remaining represented AFSs. AFSPECWAR enlisted evaluators should be qualified 7-level evaluators and officers are qualified evaluators.

2.9.3. Manage and conduct evaluations in accordance with this manual.

2.9.4. Conduct supplementary evaluations as directed by the commander (see **paragraph 8.9**).

2.9.5. As able, utilize other-unit-assigned evaluators to perform the majority of evaluations.

2.9.6. Administer Stan/Eval open and closed book examination (exam) procedures in accordance with **Chapter 5**.

2.9.7. Implement OGV maintenance and review guidance for the evaluation section of assigned members' training records.

2.9.8. Assist OGV in managing the trend program (see **paragraph 2.7.5**).

2.9.9. Manage and submit unit DAF Form 847 for coordination through Stan/Eval channels. Educate members on the form's utility to change publications.

2.9.10. Ensure compliance with the OGV Information File program, review MAJCOM publications electronic library, and maintain unit Read File.

2.9.11. Ensure proper completion, routing, and filing of AF Forms 1035.

2.9.12. Periodically review and validate unit evaluation scenarios to ensure they are conducted in accordance with **Attachment 4**.

2.9.13. Validate qualifications and certifications and update the commander-signed qualification and certification summary (i.e., Letter of Xs).

2.9.14. Direct the evaluation of tasks and qualifications through the use of SPOT evaluations (see **paragraph 4.5**).

2.9.15. Conduct Review Boards when required.

2.9.16. Augment OGV to joint, service, and MAJCOM conferences and working groups related to AFSPECWAR guidance, architecture, training, and mission employment, as required.

2.9.17. Create and maintain electronic or physical files for record keeping and trend analysis as directed in this manual.

Chapter 3

AFSPECWAR EVALUATORS

3.1. General. AFSPECWAR members with assigned Evaluator duties will have a clear understanding of their respective training and evaluation system. These individuals should be trained and proficient in both career progression and the role of their specific AFS.

3.2. AFSPECWAR Evaluator Selection and Qualification. A qualified evaluator is an AFSPECWAR instructor who has been designated to conduct AFSPECWAR evaluations. To be designated as an evaluator, an individual must:

3.2.1. Have at least 12 months experience as a qualified AFSPECWAR instructor. **(T-3)** Enlisted evaluators must be at least a 7-level. **(T-3)**

3.2.2. Complete the AF/A3S AFSPECWAR-approved evaluator upgrade program in accordance with **Table A6.1**. **(T-2)** Evaluator upgrade programs train evaluators to accurately assess all AFSPECWAR operator, AFSPECWAR instructor, and evaluator evaluation criteria. **Exception:** Members qualified as evaluators through other formal upgrades (e.g., Joint Terminal Air Control (JTAC) evaluators, Small Unmanned Aircraft Systems evaluators) may be designated as an AFSPECWAR evaluator at the unit commander's discretion.

3.2.3. Be designated an evaluator in writing by the unit commander. **(T-3)**

3.2.4. Have received an objectivity evaluation (documented as a SPOT) if previously certified, prior to being designated as an evaluator at a new unit of assignment. **(T-3)** See **Attachment 7** for objectivity evaluation guidance.

3.3. Evaluators will:

3.3.1. Conduct evaluations in accordance with **Chapter 4** and document in accordance with **Chapter 5**. **(T-1)**

3.3.2. Only evaluate those missions, skill sets, or tasks on which they are qualified and current. **(T-2) Note:** Officer and enlisted evaluators can evaluate each other on like tasks.

3.3.3. Not evaluate examinees for whom they were the primary instructor for the syllabus of instruction/qualification being evaluated. **(T-3) Note:** Evaluators will not administer a requalification (RQ) evaluation to a member to whom they administered the failed evaluation. **(T-3) Exception:** Closed Book (CB) evaluation re-tests may be administered by the same evaluator.

3.3.4. Conduct a mission brief and debrief for the examinee and applicable team members on all aspects of the evaluation. **(T-2)** The mission brief will cover specific evaluation areas, purpose, and conduct of the evaluation. **(T-3)** The evaluators debrief will include the overall

rating, specific deviations, and required additional training, if applicable. **(T-3)**

3.3.5. Immediately correct breaches of safety or discipline (during an evaluation, this applies to both the examinee and any accompanying team members). Disqualify or decertify the individual as appropriate. See **paragraph 4.11** and **paragraph 4.12** for guidance on corrective actions.

3.3.6. During an actual emergency, the evaluator determines when to terminate an evaluation or when to assume control of the event.

3.3.7. Notify the examinee's supervisor immediately following examinee's evaluation debrief when substandard performance not correctible through debrief is observed.

3.3.8. Notify the examinee's commander, within one week, whenever substandard performance is not correctible through debrief is observed. **(T-3)**

3.3.9. Use the evaluation criteria, defined in **Chapter 4**, to ensure evaluations are standardized and objective.

3.3.10. Assist and notify CCV with trend data and observed deficiencies in training.

3.4. DAF Civilian AFSPECWAR Evaluators. DAF civilians are restricted to operations in a training environment only. **(T-2)** To be designated as an evaluator, an individual must:

3.4.1. Meet requirements set forth in AFMAN 10-3500V1, paragraph 5.1. **(T-2)**

3.4.2. Complete upgrade training in accordance with **Table A6.1**. **Exception:** If qualified as an AFSPECWAR evaluator within the last five years, an objectivity evaluation may be substituted for upgrade. These members will maintain qualification requirements utilizing guidance provided in AFMAN 10-3500V1 and this manual. **(T-1)**

Chapter 4

EVALUATIONS

4.1. General. An AFSPECWAR evaluation is an assessment of an individual operator's capability to accomplish the assigned duties being evaluated. All evaluations will be documented in accordance with **Chapter 5**.

4.1.1. Cross AFS evaluations are authorized provided the requirements of **paragraph 3.3.2** are met.

4.1.2. AFSPECWAR operators, defined by the Air Force Enlisted and Officer Classification Directories as aircrew, are designated by AFMAN 11-202V2, paragraph 8.5.3 as universally qualified in all USAF aircraft. These operators will maintain aircrew status utilizing guidance in AFMAN 11-202V2, paragraph 8.5 and **Chapter 7** of this manual.

4.1.3. Pyramid Evaluation Structure. Units will administer required mission (MSN) evaluations in a pyramid style evaluation structure in accordance with **Table 4.1**.

Table 4.1. Pyramid Evaluation Structure.

Examinee	Examiner
HHQ O-6 and above	Any AFSPECWAR Evaluator with concurrence of examinee's Supervisor
HHQ AFSPECWAR Evaluator	Any AFSPECWAR Evaluator with concurrence of examinee's Supervisor
Wg Commander/Deputy Commander/Superintendent	Supervisor, HHQ AFSPECWAR Evaluator
Gp Commander/Deputy Commander/Superintendent	Supervisor, HHQ AFSPECWAR Evaluator
OGV AFSPECWAR Evaluators	Any AFSPECWAR Evaluator with concurrence of examinee's Supervisor
Squadron (or Det) CC, DO, Senior Enlisted Leader, Operations Superintendent, CCV OIC/NCOIC	Supervisor, OGV, HHQ AFSPECWAR Evaluator, equal position from another squadron
Flight level AFSPECWAR Evaluators	Any AFSPECWAR Evaluator with concurrence of examinee's Supervisor
Squadron Assigned/Attached personnel	Any AFSPECWAR Evaluator

4.1.3.1. When no qualified evaluator is available immediately above the examinee in the pyramid evaluation structure or chain of command, the next evaluator up the pyramid will administer the evaluation.

4.1.3.2. Units with examinees requiring HHQ evaluation will contact the HHQ Stan/Eval for availability 120 days prior to the examinee's evaluation expiration for evaluator availability. The HHQ Stan/Eval may delegate by position if no appropriate evaluator is available. If examiner has been delegated by HHQ, annotate this in the remarks section (part VII) of the AF Form 1035.

4.2. Closed Book (CB) Evaluation. The CB evaluation is developed and maintained in accordance with **Chapter 5**.

4.2.1. Purpose. To assess an operator's knowledge on key elements of critical tasks related to basic duties of their AFS or core infiltration/exfiltration duties and to obtain and maintain basic qualification in their weapon system.

4.2.2. Execution. AFSPECWAR operators (and 1T0) must complete initial and 24-month periodic CB evaluations. **(T-2)**

4.2.2.1. The CB evaluation will consist of at least 30 questions consisting of:

4.2.2.1.1. Evaluator will utilize a minimum of 20 general knowledge questions from the MAJCOM-approved AFS specific MQF (see **Chapter 5**). **(T-1)**

4.2.2.1.2. Ten questions may come from a local procedure MQF (increase general knowledge MQF questions to 30 if no local procedures MQF is developed). **Exception:** Units with JTAC qualified operators may add the 20 general knowledge questions to those in AFMAN 10-3505, Volume 2, *Joint Terminal Attack Controller (JTAC) Standardization/Evaluation Program,* paragraph 5.1; or Air Force Special Operations Command Instruction (AFSOCI) 13-50, *Joint Terminal Attack Controller (JTAC) Training/Evaluation Program,* to form a single exam for those operators.

4.2.2.2. CB evaluations will be completed within a set time-limit. **(T-3)** The time limit will be calculated by multiplying the total number of questions by three minutes (e.g., a 30-question CB evaluation has a 90-minute time limit). **(T-3)**

4.2.2.3. Any evaluator may proctor the CB evaluation. Electronic delivery is preferred (e.g., Patriot Excalibur). **Note:** This includes non-AFSPECWAR evaluators (e.g., HH-60W Evaluator within the OGV).

4.2.3. Grading. Grade written or computer-based exams as a percentage of correct answers. The minimum passing grade is 85%. **Note:** For JTACs completing a JTAC Ground-Phase Eval with intention to dual credit with AFSPECWAR CB Eval, minimum passing score is

85%. All questions missed must be reviewed immediately following the examination.

4.3. Mission (MSN) Evaluation. The MSN evaluation is a full mission profile scenario encompassing all fundamental aspects of preparation, infiltration, actions on, exfiltration, and mission debriefing.

4.3.1. Purpose. The MSN evaluation provides an employment-based evaluation to ensure an operator's ability to employ in their assigned weapon system role, accomplish the unit's operational or Designed Operational Capability statement mission(s), and maintain mission standards. Successful completion of MSN evaluation results in mission qualification.

4.3.2. Execution. AFSPECWAR operators must complete initial and 24-month periodic MSN evaluations to be considered combat mission ready. **(T-2)**

4.3.2.1. MSN evaluations may be conducted during non-contingency deployments or scheduled exercises. Scheduled exercises require prior coordination and/or deconfliction with exercise planners.

4.3.2.2. Evaluation profiles will be based on Designed Operational Capability taskings, training scenarios, and operational missions normally conducted by the unit. **(T-3)**

4.3.2.3. Evaluations should be conducted in geographic areas representative of the unit's area of responsibility and areas not used during routine unit training.

4.3.2.4. Individuals will be evaluated at their highest operational leadership qualification (e.g., Team Member, Tactical Enlisted Leader, Team Commander, etc.) during an operationally relevant full mission profile aligned to unit Designed Operational Capability statement, mission essential task list, or upcoming deployment tasking. **(T-3)**

4.3.2.5. Evaluators performing the evaluation should not be incorporated into the evaluation scenario and will not receive MSN evaluation credit. **(T-2)**

4.3.3. Minimum Requirements. See **Attachment 4** for all required tasks and criteria for an MSN evaluation to be valid.

4.3.4. AFS specific requirements.

4.3.4.1. Pararescue Specialist (PJ). Evaluators will ensure tactical profiles include recovery tactics and procedures, which are common to, and directly associated with the planning, preparation, insertion, execution, and extraction phases of a strike, access, or recovery operation. **(T-2) Note:** There should be a minimum of two team members, at least one of which is another PJ during the MSN evaluation.

4.3.4.2. Combat Control (CCT). Evaluators will ensure tactical profiles precision strike or global access tactics and procedures, which are common to, and directly associated with the planning, preparation, insertion, execution, and extraction phases of a strike,

access, or recovery operation. **(T-2)** Successful completion of a JTAC evaluation, utilizing guidance in AFMAN 10-3505V2, USSOCOM M 350-5, *Special Operations Forces Baseline Interoperability Standards for Special Operations Forces, Joint Terminal Attack Controller Training,* and AFSOCI 13-50, may be dual credited as an MSN evaluation, provided it meets all **Attachment 4** criteria and has been transcribed to an AF Form 1035.

4.3.4.3. Tactical Air Control Party (TACP). Evaluators will ensure tactical profiles include precision strike tactics and procedures, which are common to, and directly associated with the planning, preparation, insertion, execution, and extraction phases of a strike, access, or recovery operation. **(T-2)** Successful completion of a JTAC evaluation utilizing guidance in AFMAN 10-3505V2 or USSOCOM M 350-5, and AFSOCI 13-50 may be dual credited as an MSN evaluation, provided it meets all **Attachment 4** criteria and has been transcribed to an AF Form 1035.

4.3.4.4. Special Reconnaissance (SR). Evaluators will ensure tactical profiles include special reconnaissance and surveillance operations, which are common to, and directly associated with the planning, preparation, insertion, execution, and extraction phases of a strike, access, or recovery operation. **(T-2)** Successful completion of a SR evaluation which incorporates items from the Critical Task List (CTL) within USSOCOM M 350-18, *Special Operations Force Baseline Interoperability for Special Reconnaissance,* may be dual-credited as an MSN evaluation, provided it meets all conditions and standards therein, meets all **Attachment 4** criteria, and has been transcribed to an AF Form 1035.

4.3.4.5. SERE Specialist. Evaluators will ensure tactical profiles include recovery tactics and procedures, which are common to, and directly associated with the planning, preparation, insertion, execution, and extraction phases of a strike, access, or recovery operation. **(T-3)**

4.3.4.6. Tactical Enlisted Leaders. In addition to the AFS specific MSN evaluation requirements, enlisted members placed in a tactical leadership position are evaluated against the Tactical Enlisted Leader column of **Table A4.1** (see **paragraph 1.3.5**).

4.3.4.7. CRO/TACPO/STO (19ZXX). Evaluators will ensure the MSN evaluation will reflect the type and difficulty of tasks required in the performance of normal operational and training events from mission planning through risk assessment, leadership actions on the objective, debrief, all the way to follow up actions. **(T-2)** These evaluations ensure 19Zs have the skills and capability to accomplish their core mission safely and effectively. It evaluates the 19Z's ability to perform as a tactical commander with the knowledge required to make quick, decisive, safe, and actionable decisions concerning the utilization and employment of personnel and equipment necessary to prosecute a full-spectrum AFSPECWAR mission.

4.4. Instructor (INSTR) Evaluations.

4.4.1. Purpose. To assess an operator's instructional ability and provide the unit commander with a validated instructor cadre.

4.4.2. Execution. AFSPECWAR instructors must complete an initial INSTR evaluation. **(T-2) Note:** Air Education and Training Command (AETC) formal instructor, AFMAN 10-3505V2, USSOCOM M 350-5, or AFSOCI 13-50 JTAC-I evaluations meet this requirement.

4.4.2.1. Prior to evaluation, instructor candidates must complete an instructor upgrade utilizing guidance in AFMAN 10-3500V1. **(T-1)**

4.4.2.2. Instructors and candidates must be qualified in all areas they will instruct during their INSTR evaluation. **(T-2)**

4.4.2.3. Instructors and candidates will be evaluated on instructional ability, subject and guidance knowledge, briefings/debriefings, and demonstration of tasks. **(T-3)** Instructors must demonstrate an understanding of systems, procedures, guidance and techniques, and the ability to convey these to a student in a clear and effective manner. **(T-2)** They must also have the judgment to immediately recognize and control unsafe situations.

4.4.2.4. Whenever possible, instructor evaluations should be conducted with a “student” occupying the applicable role. The “student” performs those duties prescribed by the instructor for the task being accomplished. The instructor examinee monitors all phases of training from an advantageous position and is prepared to demonstrate, terminate, or explain any procedure. **Note:** When mission requirements, team composition requirements, or “students” are not available for INSTR evaluations, the evaluator may serve as the student for the purpose of evaluating the examinee’s instructional ability.

4.4.2.5. See **Attachment 5** for all required INSTR evaluation tasks and criteria.

4.4.2.6. JTAC instructors previously qualified utilizing guidance in AFMAN 10-3505V2, USSOCOM M 350-5, or AFSOCI 13-50 must be authorized by their unit commander as AFSPECWAR instructors (documented on the unit Letter of Xs) prior to providing unsupervised instruction beyond the scope of JTAC instructor duties. **(T-3)**

4.4.2.7. SERE Specialists previously qualified utilizing guidance in DAFI 10-3004, *SERE Program*; and Air Education and Training Command Instruction (AETCI) 36-2604, *Flying Training Instructor Programs;* must be authorized by their unit commander as AFSPECWAR instructors (documented on the unit Letter of Xs) prior to providing unsupervised instruction beyond the scope of SERE Specialist duties. **(T-3)**

4.4.2.8. If INSTR qualification is lost, it must be regained by a RQ INSTR evaluation. **(T-2)**

4.4.3. Frequency.

4.4.3.1. After initial qualification, members will complete an INSTR evaluation upon

each assignment to a new unit prior to the gaining commanders appointing them as unit instructors. **(T-3)**

4.4.3.2. Instructors assigned to an FTU and designated as "key staff" utilizing guidance in AFMAN 10-3500V1 will complete a 24-month reoccurring INSTR evaluation. These evaluations will be developed and tracked by the FTU and approved by the parent MAJCOM. **(T-2)**

4.5. SPOT Evaluation. An evaluation of a specific task or group of tasks from **Table A4.1**, **Table A7.1**, or AFSC specific Career Field Education and Training Plan.

4.5.1. Purpose. SPOT evaluations are used to evaluate individual skills or qualifications (e.g., Technical Rescue/Rigger Operations, AFSPECWAR INSTR, Alternate Insertion Extraction Master, etc.). A SPOT evaluation may be used to initially qualify a Tactical Enlisted Leader upon Qualification Training Package completion. Provided all MSN evaluation criteria in **Table A4.1** are met, and a Qualification Level 1 (Q1) grade is given, the SPOT evaluation can be dual credited as an MSN evaluation, restarting the 24-month evaluation window. To document dual credit, select "SPOT" and "MSN" in part II of AF Form 1035. Should the member fail the SPOT evaluation it will not affect Combat Mission Ready status, and they will remain current in their previously held position.

4.5.2. Execution. A SPOT evaluation may be conducted at any time.

4.5.2.1. SPOT evaluations may be No-Notice (N/N). However, personnel receiving an N/N SPOT evaluation must be notified that they are being evaluated prior to the start of the evaluated task(s) or event(s). **(T-2)**

4.5.2.2. Areas found to be substandard will be documented utilizing guidance in **Chapter 5**. **(T-3)** Additional training in the substandard task(s) will be given and an RQ SPOT evaluation is required to re-qualify/certify the member on the failed task(s). **(T-3)**

4.5.2.3. Any task requiring an evaluation, other than CB, MSN, and INSTR, will be documented as a SPOT evaluation.

4.6. Evaluation Prefixes. The following prefixes are used, when applicable, to further describe the evaluations listed in this chapter:

4.6.1. Initial (INIT). The first evaluation of any type, except SPOT, (e.g., INIT CB, INIT MSN, INIT INSTR).

4.6.1.1. INIT CB Evaluation. INIT CB evaluations will be accomplished utilizing guidance in AFMAN 10-3500V1 upon completion of Initial Qualification Training (IQT), arrival at the first operational duty station, and additional requirements utilizing guidance in MAJCOM approved lesson plans or syllabus of instructions. **(T-2)**

4.6.1.2. INIT MSN Evaluation. To be mission qualified a member must accomplish all

Mission Qualification Training (MQT) line items specified by that AFSC's Career Field Manager and pass an Initial Mission Evaluation. **(T-2)** Required MQT line items are located on the AFSPECWAR/GA SharePoint.

4.6.2. Requalification (RQ). An evaluation administered to remedy a loss of qualification due to one or more of the following reasons:

4.6.2.1. Expiration of a required periodic evaluation. The RQ evaluation will be in accordance with the guidance for that periodic evaluation. **(T-2)**

4.6.2.2. In the event of a failed evaluation (including commander-directed downgrades) administer the RQ evaluation in accordance with the provisions of **paragraph 4.8**.

4.6.2.3. In the event a member was decertified or disqualified for cause for substandard performance in their AFSPECWAR duties and responsibilities or was discretionary decertified or disqualified due to actions unrelated to the performance of their AFSPECWAR duties, utilizing guidance in **paragraph 4.11**.

4.6.2.4. The RQ prefix does not apply if it is the evaluation following a failed INIT evaluation.

4.6.3. No-Notice (N/N).

4.6.3.1. N/N evaluations provide commanders with a sampling of operator performance in situations where the standard rehearsal or review period is not required prior to the event.

4.6.3.2. Examinee is notified of the evaluation at or after the beginning of normal preparation for the mission. The beginning of normal preparation will be determined by the evaluator. The intent is to prevent advanced preparation for the mission or task. However, the examinee must be notified of the N/N evaluation prior to initiation of the evaluated task. **Note:** Informing the examinee after the fact is not allowed. **(T-2)**

4.6.4. Simulator (SIM). Used when the evaluation is conducted in a simulator or suitable virtual training device approved by the MAJCOM.

4.6.5. Multiple Prefixes. More than one prefix may be used to describe an evaluation (e.g., N/N SIM SPOT). The applicability of any prefixes to portions of an evaluation and the purpose for any prefixes (if not obvious by the context of the evaluation) will be explained on the AF Form 1035 utilizing guidance in **Attachment 3**, Part VII. **(T-2)**

4.7. Evaluation Criteria and Grading. A two-tiered grading system is used to evaluate and document overall performance. Individual scores are recorded for CB exams and areas/subareas are graded for all other evaluations. An overall qualification is determined from the compilation of the individual scores or areas/subareas graded (i.e., qualified/unqualified).

4.7.1. Area/Subarea Grades. The required tasks tables in **Attachment 4** establish areas and subareas to be evaluated during MSN or SPOT evaluations to include the appropriate grading criteria for those areas/subareas. Areas/subareas will have either a two-level or three-level grading system. **(T-3)**

4.7.1.1. Qualified (Q). The desired level of performance. The examinee demonstrated a satisfactory knowledge of all required information, performed duties within the prescribed tolerances, and accomplished the assigned mission.

4.7.1.2. Qualified with Comments (Q-). Indicates the examinee is qualified to perform the assigned area/subarea tasks but requires debriefing or additional training as determined by the evaluator. Deviations from established standards must not exceed the prescribed Q- tolerances or jeopardize safety. **(T-2)** The Q- grade is not used in two-level grading.

4.7.1.3. Unqualified (U). Indicates a breach of discipline, performance outside allowable parameters or deviations from prescribed procedures/tolerances that adversely affected mission accomplishment or compromised mission safety. An examinee receiving an area/subarea grade of U requires additional training and an overall grade of Q3. **(T-2)**

4.7.2. Evaluation Task Types. Essential and required task grading areas have been established for all evaluations.

4.7.2.1. Essential Areas. Essential areas are defined as those essential core areas, which if not performed to the "Q" level, could adversely affect the qualification of a member and result in loss of life or damage to property (e.g., safety). Grade all essential areas as either (Q) or (U).

4.7.2.2. Required Areas. Required areas are defined as those tasks necessary to observe in order to ensure an AFSPECWAR operator's MSN evaluation meets minimum AFSC requirements. Required areas can be graded (Q), (Q-), or (U).

4.7.3. Qualification Grades. Overall evaluation performance is graded as follows:

4.7.3.1. Qualification Level 1 (Q1). The examinee demonstrated desired performance and knowledge of procedures, equipment, and directives within tolerances specified in the criteria. The evaluator assigns this qualification level when no discrepancies were noted, but may be awarded when discrepancies are noted if:

4.7.3.1.1. No U grades were awarded for any graded area/subarea.

4.7.3.1.2. In the judgment of the evaluator, none of the Q- grades precluded awarding of a Q1.

4.7.3.1.3. No remedial actions required additional training, only debriefed discrepancies.

4.7.3.2. Qualification Level 2 (Q2). The examinee demonstrated the ability to perform duties safely, but there were one or more graded area(s)/subarea(s) where additional training may be assigned. The evaluator assigns this qualification level if:

4.7.3.2.1. In the judgment of the evaluator, a Q2 may be given if there is justification based on Q- performance in one or several graded areas/subareas regardless of additional training requirements.

4.7.3.2.2. Any area is graded Q- and requires additional training.

4.7.3.3. Qualification Level 3 (Q3). The examinee demonstrated an unacceptable level of safety, performance, or knowledge and is considered a failed evaluation. The evaluator assigns this qualification level if:

4.7.3.3.1. In the judgment of the evaluator, a Q3 may be given if there is justification based on Q- performance in one or several non-critical graded areas/subareas.

4.7.3.3.2. Any area graded U requires a qualification level of Q3.

4.7.4. Grading Instructions.

4.7.4.1. Evaluations will not be terminated or negated to avoid an unsatisfactory grade. **(T-2)**

4.7.4.2. Once an evaluation has begun, the evaluator documents the final results utilizing guidance in **Attachment 3**. All areas/subareas performed will be graded. **(T-3)**

4.7.4.3. The evaluator will compare examinee performance for each required area accomplished during the evaluation with the evaluation criteria provided in each of the corresponding sections and assign an appropriate grade. **(T-2)** Derive the overall evaluation grade from the area grades based on observed events and tasks utilizing guidance in this manual.

4.7.4.4. Evaluator judgment is exercised when the wording of areas is subjective and when specific situations are not covered.

4.7.4.5. Evaluator judgment will be the determining factor in assigning the overall grade. **(T-3)**

4.7.4.6. Verbal Evaluation of subareas.

4.7.4.6.1. For INIT and RQ evaluations, all required items must be performed by actual demonstration. **(T-3)**

4.7.4.6.2. For periodic evaluations, when it is impossible or impractical to evaluate a required area, the evaluator may elect to evaluate the area(s) by an alternate method (procedural trainer or verbal exam). Document why the required area(s) were not evaluated as part of the evaluation and the alternate method of evaluation used in the remarks section of the AF Form 1035. If additional room is needed, continue comments on DAF Form 623A.

4.7.4.6.3. The unit Chief of Stan/Eval decides if the evaluation is complete.

4.7.5. Remedial Action. All grades of Q- or less require action to remedy the discrepancy and/or deficiency in performance. Remedial action includes debriefing the discrepancy and/or assignment of additional training.

4.7.5.1. Debriefed Discrepancy. Remedial action accomplished during debrief of the evaluation when the evaluator provides instruction concerning the discrepancy and determines that the examinee has gained the necessary knowledge or proficiency to remedy the discrepancy.

4.7.5.2. Additional Training. Any training recommended by an evaluator to remedy deficiencies identified during an evaluation.

4.7.5.2.1. Document assignment and completion of additional training on the affected AF Form 1035. If additional space is required, use DAF Form 623A.

4.7.5.2.2. May include self-study, ground instruction, simulation, or live scenario. To complete additional training, the examinee must demonstrate attainment of satisfactory knowledge or proficiency. **(T-3)**

4.7.5.2.3. Evaluated members additional training must include demonstration of satisfactory knowledge or proficiency to an evaluator, supervisor, or instructor (as stipulated in the additional training description) to qualify as completed. **(T-1)** The evaluator will indicate the allotted time to complete the additional training.

4.7.5.2.4. If an operator receives a U in a specific area that originally required an event/task certification from the unit commander, the evaluator must recommend that the commander decertify the operator on that specific event/task along with corrective retraining and recertification action. **(T-3)**

4.7.5.2.5. If an operator exceeds the allotted time or fails satisfactory completion of additional training, the commander reviews the situation and directs appropriate action. Document the circumstances with a memorandum for record (MFR) to be included with the AF Form 1035 utilizing guidance in **Attachment 3**.

4.8. Evaluation Failures and Restrictions.

4.8.1. The member will have 60 days to re-accomplish the evaluation (or two regularly

scheduled drills, whichever is longer, for Air Reserve Components). **(T-3)** The member will be placed on supervised status for the specific task that caused the failure, documented on the AF Form 1035. **(T-3)**

4.8.2. Restrictions. As deemed necessary in the judgment of the evaluator, additional restrictions may be imposed on the examinee until the successful completion of assigned additional training and/or a requalification evaluation. Restrictions address the specific tasks and/or operation that require supervision and the criteria for removal of the restrictions.

4.8.3. Supervised Status. If unsatisfactory performance or restrictions require an examinee be placed on supervised status, the type of supervisor (i.e., instructor, trainer, or designated supervisor) required to provide oversight is determined by the commander. **(T-3)** The member will not perform the specified task(s) without supervision until Part V of the affected AF Form 1035 is signed by the certifying official. **(T-2)**

4.8.4. If a CB or MSN evaluation is failed, the member will be placed in no train or non-combat mission ready status utilizing guidance in AFMAN 10-3500V1 and will not perform any instruction or evaluation until a successful RQ evaluation is accomplished. **(T-2)** The member will be placed on supervised status for the specific task or tasks that caused the failure as well as any other areas deemed necessary by the evaluator. **(T-2)**

4.8.5. If a member receives two Q3 ratings in a row on the same evaluation type, they will be placed in a supervised status for all AFSPECWAR training events listed in Table A2.1 and Table A2.2 of AFMAN 10-3500V1, and their status will meet a review board utilizing guidance in **paragraph 8.5**. **(T-2)**

4.9. Evaluation Timing.

4.9.1. Expiration Date. Periodic evaluations expire on the last day of the 24th month from the previous CB or MSN evaluation (e.g., an MSN evaluation completed on 9 October 2020 expires on 31 October 2022). **(T-2)** Shorter frequencies to standardize core evaluations within the unit's readiness and training cycle are encouraged.

4.9.2. If an operator fails to complete a periodic evaluation within the required 24-month window, they will lose the qualification covered by the evaluation and regress to no train or non-combat mission ready status utilizing guidance in AFMAN 10-3500V1, Attachment 2. **(T-2)**

4.9.3. Unit commanders may extend an evaluation expiration date up to three months.

4.9.4. MAJCOM/A3s, delegable no lower than wing commander, may extend an evaluation expiration date up to six months. Provide notification to AF/A3S when extensions are approved.

4.9.5. AF/A3S may authorize blanket or group extensions to evaluation expiration dates on an as-required basis. Requests for extensions at MAJCOM or subordinate levels will be

submitted in accordance with standard waiver procedures. **Note:** For blanket aircrew waivers see AFMAN 11-202V2; for JTAC waivers see AFMAN 10-3505V2, USSOCOM M 350-5, or AFSOCI 13-50.

4.10. Evaluation Ratios (Evaluator: Examinee).

4.10.1. MSN Evaluations.

4.10.1.1. Non-leadership AFS evaluations will not exceed a 1:3 ratio. Evaluators must ensure that they can effectively monitor all aspects of the examinees' performance throughout the entire scenario. **(T-1)**

4.10.1.2. Leadership evaluations (enlisted and 19Z) require a dedicated evaluator and will not exceed a 1:1 ratio.

4.10.1.3. Multiple evaluations are authorized within the same event. However, evaluators will not exceed the number of examinees directed by the most restrictive administered evaluation ratio. **(T-3)**

4.10.2. SPOT evaluation ratios are determined by the evaluator, ensuring that they do not exceed the evaluator's ability to effectively monitor all aspects of the examinees' performance of the task.

4.10.3. INSTR evaluations require a dedicated evaluator and will not exceed a 1:1 ratio.

4.11. Decertification and Disqualification. Any AFSPECWAR operator may be subject to decertification/disqualification for cause for substandard performance in their AFSPECWAR duties and responsibilities or discretionary decertification/disqualification that is unrelated to the performance of their AFSPECWAR duties.

4.11.1. Decertification/Disqualification for cause (with prejudice) is used for observed substandard performance as an AFSPECWAR operator regardless of whether observed actions were part of an evaluation. Document decertification/disqualification on an MFR signed by the observing AFSPECWAR evaluator and the unit commander and place in the member's evaluation folder.

4.11.2. Discretionary decertification/disqualification (without prejudice) is an administrative action that is not based upon performance as an AFSPECWAR operator. Discretionary decertification/disqualification is warranted when Uniform Code of Military Justice action is initiated, or any condition applies that prohibits personnel from performing AFSPECWAR duties utilizing guidance in AFMAN 10-3500V1. The individual AFSPECWAR operator's commander has the discretion to decertify/disqualify or not.

4.12. Commander-Directed Downgrade.

4.12.1. The operator's unit commander (or the commander of the unit to which the operator

is attached) or any commander in the chain of command above that unit commander, may direct a commander-directed downgrade.

4.12.2. A commander-directed downgrade may be a downgrade (Q-/U) in a specific area/subarea without disqualifying an individual.

4.12.3. A commander-directed downgrade may direct a downgrade anywhere from removing a qualification (e.g., instructor) to completely disqualifying an operator.

4.12.4. Downgrades may be directed without administering an evaluation using the following guidance:

4.12.4.1. Examples of mission employment include breach of discipline, safety, etc. Incidents do not have to be directly observed by an evaluator during an evaluation but may be recommended by an evaluator from any AFS.

4.12.4.2. For non-employment-related cases, do not use these downgrades as a substitution for, or in lieu of, administrative, or judicial actions (e.g., Letter of Counseling, Article 15). (Consult with the supporting Staff Judge Advocate office for legal advice in these cases.) Use in cases where such incidences directly affect the commander's confidence in the operator's ability to safely execute their assigned duties (e.g., lapse in judgment significant enough to cast doubt on the operator's tactical decision-making abilities).

4.12.4.3. For downgrades that either disqualify or decertify an operator, the affected operator will cease acting in the qualification(s)/certifications(s) from which they have been downgraded effective with the date the commander initiated the downgrade. **(T-3)**

4.12.5. Commander-Directed downgrades will be documented utilizing guidance in **Attachment 3**.

4.13. Cross-unit Evaluations. When administering cross-unit evaluations (including cross MAJCOM) AFSPECWAR evaluators will:

4.13.1. Receive prior concurrence from both the evaluators and examinees commander. **(T-2) Exception:** Evaluations administered in accordance with formal training course syllabi (including periodic evaluations) do not require concurrence when the syllabus evaluation requirements completely cover all owning MAJCOM periodic evaluation requirements.

4.13.2. Adhere to any unique evaluation criteria of the examinee's unit/MAJCOM. **(T-2)**

4.13.3. Upon completion of the evaluation, the examinee's commander will endorse the AF Form 1035 and forward a copy to the first Stan/Eval function with oversight of both evaluator and examinee and to both affected MAJCOM Stan/Evals for cross MAJCOM evaluations. **(T-2)**

Chapter 5

AFSPECWAR EXAM PROGRAM

5.1. Purpose. The AFSPECWAR exam program measures an operator's knowledge or ability to locate information of normal/emergency procedures required during the performance of their individual AFS duties as well as planning, infiltration, actions on, and exfiltration duties through the administration of written or computer-based exams. The program can be expanded to provide additional exams on advanced skills.

5.2. Question Sources.

5.2.1. Evaluators will draw exam questions from an MQF. **(T-2)**

5.2.1.1. Evaluators will ensure closed book MQF questions consist of knowledge items considered essential for the performance of core AFS duties (e.g., parachuting emergency procedures, anaphylaxis protocols, danger close procedures, minimum helicopter landing zone dimensions) and include detailed references (references may be omitted when the question is placed on an exam). **(T-1)** Examination databases should contain at least twice the number of questions required for each examination (e.g., if a 50-question examination is generated, there must be at least 100 questions in the examination database).

5.2.1.2. Open book MQF questions are designed to test the operator's ability to quickly locate information pertinent to their duties but not required or discouraged from committing to memory and include detailed references (references should be omitted or limited to publication number/title when the question is placed on an exam).

5.2.2. The lead MAJCOMs' AFSPECWAR Stan/Eval component is the OPR for development and maintenance of the MQF(s) for their weapon system(s). Lead MAJCOMs will review MQFs annually and ensure they are available for distribution and use. **(T-1)** MAJCOMs utilizing the MQFs will assist the lead MAJCOM with the annual review, update, and distribution of closed book, open book, and upgrade MQFs. **(T-2)**

5.2.2.1. MAJCOMs are only required to maintain open book MQFs if they have operators with an open book testing requirement.

5.2.2.2. Cross command coordination is strongly encouraged.

5.2.2.3. The lead MAJCOM for Guardian Angel will ensure the approved PJ, CRO, and SERE MQF(s) questions include topics covering airmanship, duties on-board the aircraft, safety, and equipment procedures for general flight to meet **Chapter 7** requirements.

5.2.2.4. Air Force Special Operations Command will ensure approved MQF(s) questions align with special operations forces baseline interoperability standards, as

established by USSOCOM manuals or directives.

5.2.2.5. Units may suggest MQF edits to accommodate local testing procedures, administrative errors and reflect recent changes to systems or operational procedures; however, subject matter will not be changed. All change requests will be routed to their respective OGV, or equivalent level for approval. If the change is applicable to other units, OGV will forward the edits to the OPR through Stan/Eval channels.

5.2.2.6. Units submit recommended MQF questions for inclusion in the next MQF re-write through Stan/Eval channels to the OPR for approval and inclusion.

5.3. Exam Study.

5.3.1. MQFs will be certified current by the respective AFS MAJCOM Stan/Eval representative or MAJCOM Functional Managers and maintained on the MAJCOM publications electronic library. **(T-2)**

5.3.2. When questions are added or updated, they will be highlighted as such until the next MQF review.

5.4. Exam Management. When randomized electronic testing is not available, the test-administering organization will maintain two versions (i.e., A & B) of each AFS exam and re-write these non-random exams annually. **(T-3)**

5.5. Retention of Exam Records. The Stan/Eval function will retain graded exam answer sheets or computer records until the AF Form 1035 is completed and placed in the evaluation section of the OJT records. **(T-2)** Retain failed exams until a passing exam is accomplished or a review board is completed.

5.6. Exam Security. Stan/Eval personnel will maintain positive control of all examinations, answer sheets in any stage of completion, and associated computer-based media. **(T-2)**

Chapter 6

DOCUMENTATION

6.1. Scope. Administration of the evaluation program requires accurate documentation. **Note:** This chapter does not apply to JTAC training and evaluation folders prescribed by AFMAN 10-3505V2 or USSOCOM M 350-5.

6.2. Qualifications versus Certifications. Qualifications are attained through graduating an approved course or successful evaluations and documented on an AF Form 1035. Certifications are attained through methods other than evaluation and documented utilizing guidance in AFMAN 10-3500V1.

6.3. Procedures. Each AFSPECWAR member will maintain an evaluation documentation section within their OJT records. **(T-1)**

6.3.1. All evaluations will be documented on an AF Form 1035 and the assigned/attached CCV office will maintain the source document in paper or electronic format. **(T-1)** If maintained in electronic format, Stan/Eval Offices must employ a backup method. **(T-1)** Examples include stand-alone electronic systems, separate servers or paper copies and should be specified in a unit operation instruction. **Note:** A member's OJT records are not considered an appropriate backup method and are a separate requirement.

6.3.2. Units define local procedures for evaluation section storage, but storage procedures must ensure Stan/Eval accessibility. **(T-2)**

6.3.3. A signed source document (e.g., AF Form 1522, *ARMS Additional Training Accomplishment Report,* or AF Form 1035) is submitted to Squadron Aviation Resource Management and maintained in the Air Resource Tool Enterprise Mission Information System (ARTEMIS) database creating a tracking record of each CB and MSN evaluation's completion date. **Note:** Units without ARTEMIS access use the appropriate system of record.

6.4. Contents of the Evaluation Section. AF Forms 1035 will be in chronological order with the most recent on top. Maintain all AF Forms 1035 for the entire duration of the member's service effective with the publication of this manual. **(T-1) Note:** Any AF Form 8, *Certificate of Aircrew Qualification*; AF Form 8A, *Certificate of Universal Aircrew Qualification*; and DAF Form 803, *Report of Task Evaluations;* are retained as historical documents. Place AF Forms 8, AF Forms 8A, and DAF Forms 803 in chronological order behind all AF Forms 1035.

6.4.1. MFRs documenting waivers, extensions, or unusual circumstances to potentially be included in an AF Form 1035 are filed on top of the affected AF Form 1035.

6.4.2. Once the circumstance, waiver, or extension has reached its conclusion, incorporate the information contained in the MFR onto the applicable AF Form 1035 under Remarks.

6.5. Review of the Evaluation Section.

6.5.1. The evaluation section will be reviewed by a Stan/Eval functional office, normally in the organization to which the individual is assigned or attached for duty. **(T-2)**

6.5.2. HHQ personnel on active flying, jump, or dive status will have their evaluation section reviewed by the Stan/Eval function at the unit of attachment. **(T-2)**

6.5.3. Outdated certification letters, medical recommendations and miscellaneous documentation identified during reviews will be returned to the member for disposal.

6.6. Initial Review. Prior to a newly assigned or attached member's first training event, unit CCV will review the evaluation section and document the review on an DAF Form 623A. **(T-2)**

6.6.1. At a minimum, the review will identify:

6.6.1.1. Major discrepancies in documentation or evaluations performed in previous organizations not already annotated by previous reviews. **(T-2)**

6.6.1.2. Qualifications and verification of parity with the unit's currency tracking system of record. **(T-2)**

6.6.2. CCV will place the completed DAF Form 623A chronologically in line with the AF Forms 1035. **(T-1)**

6.6.3. From then on, the reviewing organization is only responsible for subsequent documentation placed in the evaluation section.

6.7. Posting Review. The Stan/Eval function will review each AF Form 1035 before they are placed in the evaluation section to ensure accuracy and completeness. **(T-3)**

6.7.1. This review will confirm that the qualification/certification as documented is correct, all required evaluation events were accomplished, and that the AF Form 1035 is signed by the evaluator and examinee. **(T-3) Note:** Q2 and Q3 evaluations will require commanders, or designated signatory, review, and signature. **(T-3)**

6.7.2. Upon completion of review and correction of any identified deficiencies, the reviewer signs the AF Form 1035. **(T-3)**

6.7.3. The Stan/Eval function will retain copies of all reviewed AF Forms 1035, either electronically or in paper format for each member. **(T-2)**

6.8. Evaluation Section Discrepancies. Discrepancies include those on the AF Form 1035 and any MAJCOM-directed documentation.

6.8.1. Major Discrepancies Disposition. Major discrepancies are those that affect the qualification of the affected member. They will be documented by the Stan/Eval function on

a permanent MFR filed in the evaluation section immediately above the affected AF Form 1035. **(T-1)** An MFR created to document late evaluations, OG/CC waivers, etc. is removed from the evaluation section once the information is incorporated onto the completed, affected AF Form 1035 under Remarks.

6.8.2. Minor Discrepancies Disposition. Minor discrepancies are those that do not affect the qualification of the affected member and are corrected utilizing guidance in **paragraph 6.9**. If a minor discrepancy cannot be corrected on the affected form, they are documented by the Stan/Eval function on a DAF Form 623A and placed on top of the affected form. **(T-2)** Typos, formatting and misspellings that do not affect the overall clarity of the document are not considered minor discrepancies.

6.9. Corrections. As the AF Form 1035 is a source document, only minor discrepancies may be corrected by use of white-out/over-print or pen and ink alterations of the original document. The original evaluator must initial the correction. **(T-3)** When the original evaluator is not available, OGV members are authorized to correct minor discrepancies (OGV Chief for minor discrepancies in OGV member's records).

6.10. Transfer of the Evaluation Section. If the operator has a hard copy evaluation section, they hand-carry the records to the gaining organization. If any evaluation section information is maintained electronically, transfer by secured electronic transmission to the gaining unit.

6.10.1. When circumstances prevent this, the losing organization mails the hard copy evaluation section to the gaining unit via registered mail.

6.10.2. When mailing an evaluation section or any of its contents, retain a copy (paper or electronic) until the gaining organization has confirmed receipt.

6.11. Disposition of the Evaluation Section.

6.11.1. Dispose of the evaluation section according to the Air Force Records Disposition Schedule.

6.11.2. Outdated certification letters, medical recommendations, and miscellaneous documentation identified during reviews are returned to the member for disposal.

6.12. AF Form 1035. See **Attachment 3** for form guidance.

6.13. Expiration Date of Qualification. Expiration dates will be tracked by the squadron aviation resource management office in ARTEMIS, Patriot Excalibur, or other MAJCOM-authorized electronic means. **(T-2)**

6.14. Commander-Directed Downgrade. Upon observation of sub-standard performance or review of trend analysis, commanders may direct a down-grade utilizing guidance in **Attachment 3**.

Chapter 7

UNIVERSAL QUALIFICATION OF AFSPECWAR AIRCREW

7.1. General.

7.1.1. Universal qualification is an AFMAN 11-202V2 designation that allows AFSPECWAR aircrew (as defined in the Air Force Enlisted and Officer Classification Directories) to attain/maintain qualification in multiple aircraft.

7.1.2. Utilizing guidance in AFMAN 11-202V2, upon achieving universal qualification, AFSPECWAR aircrew are qualified in all USAF aircraft.

7.2. Evaluations.

7.2.1. Utilizing guidance in AFMAN 11-202V2, AFSPECWAR aircrew initial and periodic Universal Qualification evaluation consists of a closed book exam.

7.2.1.1. The closed book exams will be developed and maintained utilizing guidance in **Chapter 5** and contain a minimum of 20 general knowledge questions from the Guardian Angel lead MAJCOM-developed AFS specific MQF.

7.2.1.2. Any evaluator may administer the closed book exam. Electronic delivery is preferred.

7.2.1.3. The minimum passing score is 85%. An operator's failure to pass the requisite evaluation will result in loss of universal qualification.

7.2.2. CB evaluations based on the Guardian Angel lead MAJCOM-developed MQFs are dual credited as the AFSPECWAR aircrew closed book evaluation.

7.3. Documentation. Utilizing guidance in AFMAN 11-202V2 and **paragraph 6.3.3** of this manual, AFSPECWAR aircrew will document successful requisite exam completion on an AF Form 1035. The Stan/Eval function of the unit to which universal qualified aircrew are assigned/attached for flying will verify that ARTEMIS information is logged appropriately. **(T-1)**

7.4. Aviation Qualification Codes. Utilizing guidance in DAFI 11-412, *Aircrew Management*; the following aircrew qualification code (first characters) are assigned to AFSPECWAR aircrew AFSs when:

7.4.1. "F": Upon successful completion of the requirement in **paragraph 7.2**, AFMAN 10-3500V1 initial qualification training (IQT), and local unit in-processing requirements, operators will be considered a basic qualified AFSPECWAR aircrew. **(T-2) Note:** This qualification qualifies AFSPECWAR aircrew to fly without an instructor, provided that the operator is trained/certified to perform all tasks included in the training profile. For example, a team performing helicopter operations to accomplish a Fast Rope Master evaluation. In

this instance, the evaluator may fly on lead with the examinee, while a basic qualified AFSPECWAR aircrew member flies on the trail aircraft without an instructor, provided that no new tasks or training are introduced on the trail aircraft during the flight.

7.4.2. "M": Upon successful completion of the requirement in **paragraph 7.4.1** and AFMAN 10-3500V1 MQT, operators will be considered a mission qualified AFSPECWAR aircrew. **(T-2)**

7.4.3. "I": Upon successful completion of the requirement in **paragraph 4.4** and **paragraph 7.4.2**, operators will be considered an instructor qualified AFSPECWAR aircrew. **(T-2)**

7.4.4. "E": Upon successful completion of the requirement in **paragraph 4.2** and **paragraph 7.4.3**, operators will be considered an Evaluator Certified AFSPECWAR aircrew. **(T-2)**

7.4.5. "U": Upon a failed requisite closed book, lapsed exam currency, or other complete disqualification, operators will be considered an Unqualified AFSPECWAR aircrew. **(T-2)**

7.4.6. Should an AFSPECWAR aircrew member be downgraded or have a certification removed, their Aircrew Qualification Code (first character) will revert to the highest level that they remain qualified. **(T-2)**

Chapter 8

ADDITIONAL PROGRAMS

8.1. Information Files. Units will establish and maintain ease of access and use for operators to a physical or electronic library consisting of publications directed by their MAJCOMs utilizing guidance in **paragraph 2.5.10**, information files utilizing guidance in **paragraph 2.7.9**, and current read files. **(T-2)**

8.1.1. Documents in the information files will be made available for deployments via either electronic or hardcopy means.

8.1.2. Use the AF Form 50, *Flight Crew Information File,* to generate information file messages in which pertinent information is published to units (see **paragraph 8.3**). MAJCOMs may tailor the form to reflect weapon system information as necessary.

8.1.3. Required Volumes. If units choose hardcopy format and the contents of any volume exceeds the capacity of its binder, use an additional binder, and identify the first and subsequent binders by a letter of sequence (e.g., IIIA, IIIB). Label binders on the spine indicating volume and title.

8.1.3.1. Volume I: Current Read File. Consists of a minimum of two parts to include an index (Part A) and current read files (Parts B and C). MAJCOMs may add additional components to Volume I as appropriate.

8.1.3.1.1. Part A is a table of contents listing all material contained in information files volumes I through V.

8.1.3.1.2. Part B is the current read file of FCIF messages. Messages contain information temporary in nature, directly pertinent to the safe conduct of flight aboard USAF aircraft and must be read before an operator conducts any event requiring flight aboard a USAF aircraft. **(T-2) Note:** MAJCOM and OGV AFSPECWAR Stan/Eval staffs should closely scrutinize FCIFs and ensure that the information communicated is pertinent to AFSPECWAR operators' operations aboard the affected MDS prior to assigning FCIF applicability to AFSPECWAR.

8.1.3.1.3. Part C is the current read file that contains information temporary in nature related to jump, dive, ground, equipment and other safety messages not related to the safe conduct of flight aboard USAF aircraft and must be read by operators before conducting any event requiring a go/no-go review (see **paragraph 8.4**). **(T-2)**

8.1.3.1.4. Parts B and C may be combined and filed in chronological order with the most recent issuance on top.

8.1.3.2. Volumes II-IV Publications Library. These volumes consist of the functional

publications library maintained by MAJCOM/A3 Stan/Eval utilizing guidance in **paragraph 2.5.10** and at a minimum contain all mandatory publications listed in **Table 8.1**.

8.1.3.3. All publications in the library will be current and complete.

Table 8.1. Mandatory Publications by Volume.

T.O. 13C7-55-1	Rigging Motorcycles and Quad Runners

8.2. Special Interest Items (SII).

8.2.1. SIIs are items of emphasis relating to existing procedure(s) designed to mitigate or eliminate specific risks or trends.

8.2.2. SIIs are generated on AF Forms 50 (see **paragraph 8.3**).

8.2.2.1. SIIs do not add to or amend established procedures. Reference guidance on issuing FCIF messages in **paragraph 8.1.3.1.2**.

8.2.2.2. SIIs are based on analysis of risks and trends from a variety of sources to include Safety Investigation Board findings/recommendations, safety related incidences, trend analysis, deployed area of operations and potential problems with equipment/procedures.

8.2.3. SII(s) are issued through the same process used to release FCIF messages with the following elements:

8.2.3.1. Specific MDS or type of AFSPECWAR operation applicability (e.g., CV-22 or Military Freefall parachuting).

8.2.3.2. References.

8.2.3.3. Risk factors and trend details.

8.2.3.4. Specific emphasis actions to reduce/eliminate the risk or trend that generated the SII.

8.2.3.5. Effective date of rescission.

8.2.3.6. Point of contact/subject matter expert for further information.

8.2.4. SII(s) will be of limited duration (generally not to exceed 90 days).

8.2.5. SII(s) may be issued/rescinded from the HAF, MAJCOM, Numbered Air Force or unit level. If issued from agencies outside the MAJCOMs (e.g., HAF, Headquarters, but not subordinate Numbered Air Forces or units), the lead MAJCOM Stan/Eval function will coordinate the intent and verbiage of the SII with other MAJCOM Stan/Eval functions to determine the level of applicability within the individual MAJCOMs prior to release. **(T-1)**

8.2.6. Information File owners will place SIIs into the Volume I, Part B for SIIs on USAF aircraft concerning AFSPECWAR and Part C for all other SIIs, for dissemination to operators. **(T-2)**

8.2.7. All Risk Management related SIIs will be briefed by the enlisted leader or officer in charge during mission/team briefs for the duration of the SII(s). **(T-1)** Mission-specific SIIs will only be briefed on those missions for which the SII is relevant.

8.3. AF Form 50, *Flight Crew Information File.*

8.3.1. The AF Form 50 is used to generate FCIF messages in which pertinent information is published to units. MAJCOMs may tailor the form to reflect weapon system information as necessary.

8.3.2. It is the MAJCOMs responsibility establish guidance for issuing messages to subordinate units.

8.4. Go/No-Go Procedures. Units will establish a control system that ensures operators are current and qualified for the anticipated event. **(T-1)** Units will provide guidance on this system in the unit supplement or operating instructions. **(T-1)** At a minimum, the go/no go system will monitor:

8.4.1. AF Form 1035 qualification or appropriate ARTEMIS products.

8.4.2. Restricting currency items required utilizing guidance in AFMAN 10-3500V1, AFMAN 11-202V1; and AFMAN 11-421, *Aviation Resource Management* (as applicable). **(T-2)**

8.4.3. Any restrictions listed on operators' current DD Form 2992, *Medical Recommendation for Flying or Special Operational Duty*. **(T-2)**

8.4.4. Currency on all Information File (Volume 1, Part B) messages. **(T-2)**

8.5. Review Board. Review boards are designed to look at the overall evaluation or training process to deliver an impartial judgment. Review boards look at the trainee and the training process to see if the failure is individual, institutional, or procedural.

8.5.1. Convene a review board when:

8.5.1.1. Directed by the commander.

8.5.1.2. A member fails a re-evaluation/re-certification. **(T-3) Exception:** JTAC evaluation failures are handled utilizing guidance in AFMAN 10-3505V2 or USSOCOM M 350-5.

8.5.1.3. After any incident that compromised safety or resulted in injury to personnel or damage to equipment through negligence or violation of directives. **(T-3)**

8.5.1.4. A review board is not required in situations where personnel do not yet hold a 3-level AFSPECWAR AFS.

8.5.2. Composition of Review Boards. CCV conducts the review board for their specific AFSs. **Exception:** For Squadron Commander (SQ/CC), OGV personnel, or personnel attached to the unit (i.e., HHQ) the OG/CC will conduct and determine the composition of the review board. **(T-2)** If a primary board member cannot be present, the presiding commander designates an alternate. The alternate is typically the next senior ranking member of the AFS involved. The reviewer's direct supervisor may observe the board proceeding; however, the supervisor will not be a voting member. **(T-2)** The commander may observe the proceedings as a non-voting member since the board recommends action to the commander.

8.5.2.1. A 19Z review board will consist of the 19Z assigned or designated to CCV, the operations officer, and the 19Z assigned to OGV (or another member designated by the OG/CC). **(T-2)**

8.5.2.2. An enlisted review board will consist of the like AFS assigned or designated to CCV, the operations officer, the senior like AFS assigned to the unit, and the like AFS assigned to OGV (or another member designated by the OG/CC). **(T-2)**

8.5.3. Review Board Actions. The board evaluates and analyzes all factors bearing on a situation and provides the commander with recommendations.

8.5.3.1. Recommendations may include removal of an advanced skill qualification, additional supervised training, or recommendation for downgrade or removal of AFSC. Board findings of personnel retained in the AFS will be maintained on file for 18 months. **(T-2)** If an AFSC downgrade/removal is recommended, the unit training manager coordinates with the base training office for guidance and documentation management procedures.

8.5.3.2. Actions resulting in the recommendation for removal of an AFS will be forwarded to the next higher headquarters or MAJCOM level as appropriate. **(T-1)**

8.6. Standardization and Evaluation (SEB). The unit commander, or their designated representative, will chair a semi-annual SEB. **(T-3)**

8.6.1. The following are the recommended minimum attendees:

8.6.1.1. Commander.

8.6.1.2. Senior enlisted leader.

8.6.1.3. Director of operations.

8.6.1.4. Operations superintendent.

8.6.1.5. Chief of Stan/Eval.

8.6.1.6. Training program managers.

8.6.2. The Chief of Stan/Eval or commander designated representative will coordinate the schedule, agenda, and attendees for the semi-annual SEB. **(T-3)** The SEB minutes will be sent to the next higher headquarters by the OGV no later than 30 days after the conclusion of the SEB. **(T-3)** See **Attachment 2**.

8.6.3. Groups will consolidate unit SEB minutes to determine any group-wide trends. **(T-3)**

8.6.4. Wings should review group minutes and provide cross-tell to their parent MAJCOM.

8.7. Trend Analysis Program. The Stan/Eval function will maintain the trend analysis program which will include an objective analysis of all AFSPECWAR evaluations, closed book examinations, and any deficiencies/items of interest observed during training, exercises, and contingencies. **(T-3)**

8.7.1. Stan/Eval organizations at the unit level will establish a trends analysis program. **(T-3)** Group and squadron commanders are the final authority for establishing their unit's trends. **(T-3)**

8.7.1.1. The unit will establish specific trend analysis threshold percentages and procedures. **(T-3)**

8.7.1.2. OGV and CCV will report any negative trend data, recommend corrective actions, assign an OPR, and report trend status to the SEB. **(T-3)**

8.7.1.3. For FTUs, CCV will maintain separate trend data for students and instructors. **(T-3)**

8.7.2. The trend program is the commander's program, and the commander will determine which trends to effectively track, evaluate, correct, and close, and for how long. **(T-3)**

8.7.3. Trend data will be included in the SEB minutes and follow-up actions will be addressed by the SEB lead at the subsequent SEBs until the discrepancies are corrected/closed. **(T-3)** CCV must maintain the trend analysis data collected from the date of the last unit inspection. **(T-3)**

8.7.4. For closed book examination trends, consider the validity of the question, and the appropriateness. Consider the need for increased emphasis on the question's subject area.

8.7.5. For MSN qualification trends, calculate the percentage of "Q", "Q-" and "U" grades against the total number of evaluations given in the subarea. Trends are not always identified by a threshold percentage but may be determined by the commander's assessment as a potential weakness area.

8.8. Unit Supplemental Exams. Each OGV or CCV function may conduct supplemental testing for all AFSPECWAR members. The intent of this testing is to evaluate additional knowledge beyond the scope of required periodic exams, such as a cross-section of general knowledge, tactical/threat knowledge, or operational procedures, etc., to determine if knowledge deficiencies exist within the unit (e.g., USSOCOM 350-series). This exam may be open or closed book, but does not count as a required periodic exam, nor does a periodic exam satisfy the requirement for a supplemental exam. Units will describe this program in the unit supplement to this manual, to include procedures for failed exams. **(T-3)**

8.9. Unit Supplemental Evaluations.

8.9.1. Purpose. Supplementary evaluations are optional administrative tools used by a commander to ensure standardization of operations and to identify and evaluate implemented solutions to operational problems, such as negative evaluation trends. The form and content of a supplementary evaluation is at the discretion of the commander.

8.9.2. Supplementary evaluations may be administered in conjunction with any other evaluation. Supplementary evaluations are not periodic evaluations and will not affect grading or the qualification level and will not be documented on an AF Form 1035.

8.9.3. The commander directing the supplementary evaluation determines the areas to be evaluated. The Stan/Eval function directly under the commander will determine the method of evaluation and provide administrative management of data collection. Once complete, the Stan/Eval function will report results to the commander. **(T-3)**

8.9.4. Commanders may appoint anyone to conduct supplementary evaluations.

8.9.5. At a minimum, the SEB lead will ensure supplementary evaluations results are documented in SEB minutes (see **Attachment 2**). **(T-3)**

ADRIAN L. SPAIN, Lt Gen, USAF
Deputy Chief of Staff, Operations

OG/CC—Operations Group Commander
SQ/CC—Squadron Commander

Terms
AFSPECWAR Operator—The term AFSPECWAR operator is restricted to members who hold a 1ZXXX or 19ZXX Air Force Specialty Code (AFSC), not the overarching AFSPECWAR enterprise.

Certification—Procedure used to document competency in a particular task. Not interchangeable with qualification, which requires AF Form 1035, *AFSPECWAR Evaluation Form*, documentation.

Closed Book Evaluation (CB)—An evaluation consisting of the closed book exam utilizing guidance in **paragraph 5.2**. Individuals who fail the exam are considered unqualified.

Combat Mission Ready—The status of an individual who has successfully completed IQT, MQT, requisite evaluations, and complies with continuation training requirements and frequencies in accordance with AFMAN 10-3500V1.

Cross AFS Evaluations—An evaluation in which the evaluator and member have different AFSs
Evaluator—Evaluators are qualified instructors certified by the commander to conduct evaluations.

Flight Crew Information File—A collection of publications and material determined by the MAJCOM and unit as necessary for day-to-day operations.

Formal Training Units (FTU)—FTUs are the Guardian Angel (GA) FTU (68th Rescue Squadron), the Special Tactics Training Squadron, and the TACP FTU (6th Combat Training Squadron, Detachment 2).

Fragmentary Order (FRAGORD)—An abbreviated operation order that is issued to modify or change an existing order.

Instructor (INSTR)—Highly experienced AFSPECWAR operator or 1T0 who successfully accomplishes an instructor evaluation.

Letter of X —A commander authorized list of current/maintained qualifications and certifications for all unit AFSPECWAR operators and Special Warfare Mission Support

personnel. The Letter of X will be updated monthly by CCV when all required documentation is provided and certified. Unit AFSPECWAR operators and Special Warfare Mission Support personnel may not operate in any capacity beyond what they are authorized to on the Letter of X. If the unit AFSPECWAR operators and Special Warfare Mission Support personnel have all required documentation and certifications necessary to conduct duties not currently listed on the Letter of X (ex: prior to Letter of X monthly update) they may do so with unit commander authorization.

Master Question File (MQF)—The question bank used to construct closed book exams. Operators have access to MQFs.

Mission Evaluation (MSN)—A periodic evaluation reflecting the type and difficulty of tasks required in the performance of normal operational and training events.

No-Notice Evaluation (N/N)—An evaluation where the examinee is notified of the evaluation at or after the beginning of normal preparation for the mission.

Office of Primary Responsibility (OPR)—Any headquarters, agency, or activity having the primary functional interest in, and responsibility for, a specific action, project, plan, program, or problem.

Optional/Task Evaluation (SPOT)—An evaluation of varied scope based on commander's intent, evaluator discretion, or upgrade requirements and can range from plotting 10-digit grid to executing an entire precision jumpmaster deployment.

Operations Group (OG)—OG is used as a generic term additionally including Air Support Operations Groups, Rescue Groups, Special Operations Groups, Special Tactics Groups, and the Special Warfare Training Group.

Qualification—Designation arising from graduating an approved course or a successful evaluation, documented on an AF Form 1035 that allows a member to perform specified duties.

Qualification Expiration—The date qualification expires, normally, the last day of the 24th month from the last successful evaluation (e.g., an evaluation completed on 9 Oct 20 expires on 31 Oct 22).

Requalification Evaluation (RQ)—An evaluation administered to remedy a loss of qualification due to expiration of a required periodic evaluation, loss of currency, following a failed periodic evaluation, or loss of qualification due to a commander-directed downgrade.

Reviewer—An evaluator that has been designated in writing by the commander as the Squadron or Group STAN/EVAL function.

Special Interest Item (SII)—Items of emphasis relating to existing procedure(s) designed to mitigate or eliminate specific risks or trends.

Special Reconnaissance Operations—Reconnaissance and surveillance actions conducted as a special operation in hostile, denied, or diplomatically and/or politically sensitive environments to collect or verify information of strategic or operational significance, employing military capabilities not normally found in conventional forces.

Specialized Aircrew—Flight surgeons, combat camera, and non-rated aircrew, to include K-, Q- and X- prefix specialty codes (does not include X-prefix aeromedical evacuation crewmembers).

Stan/Eval Function—An organization at appropriate echelons of command that accomplishes the objectives of this manual.

Supervised Status—The status of an individual who must operate under the supervision of an instructor qualified in the tasks being performed.

Supplementary Evaluation Program—Administrative tools used by a commander to ensure standardization of operations and to identify and evaluate implemented solutions to operational problems.

Tactical Enlisted Leader—An enlisted AFSPECWAR operator who has completed the Tactical Enlisted Leader upgrade in accordance with the respective AFS Career Field Education and Training Plan, FTU syllabus, or HHQ Tactical Enlisted Leader Qualification Training Package.

Trend Program—Analysis designed to identify areas requiring attention, monitoring, or correction.

Unit—The term unit includes levels of organization under higher headquarters (HHQ) required to establish a Stan/Eval function. Most units are composed of an OG, AFSPECWAR squadron or detachment. Where there is no parent group, squadrons/detachments assume duties listed for groups.

Universal Qualification—Process where specialized aircrew attain/maintain qualification in two or more MDS aircraft where qualification is attained/maintained via a minimum of a ground phase examination.

Attachment 2

STAN/EVAL BOARD MINUTES

Table A2.1. Stan/Eval Board Minutes Example. Note: The information below is the minimum information a board should address.

MEMORANDUM FOR (SEE DISTRIBUTION)

FROM: (UNIT'S COMPLETE ADDRESS)

SUBJECT: Stan/Eval Board Minutes

1. Personnel Attending: (name and organization)

2. Overview:

a. Manning. (Enter any Stan/Eval manning problems discussed or deviations from authorized manning. Record all current evaluators including attached HHQ and/or attached unit evaluators.) Include any OG/CC designated additional OGV evaluators.

b. Summary.

(1) Evaluations. Report periodic evaluations by AFS and type of evaluation (QUAL/MSN). Include SPOT, N/N, and INIT INSTR evaluations, when applicable. Show qualification levels, sub-levels and rates (Rate = # given divided by total given).

(a) Q1,

(b) Q2,

(c) Q3,

(d) Total evaluations for each AFS.

(2) Examinations. Report examination results by AFS and type of examination (open book / closed book).

(3) Waivers and extensions. Identify all waivers and extensions as identified in this AFMAN.

(4) Trends. Identify new, continuing and resolved trends. Where necessary, report corrective action as OPEN/CLOSED, the OPR(s) and any suspense date.

(5) Report progress toward achievement of no-notice requirements, if applicable.

(6) Report the number of cross-unit evaluations conducted and identify if unit evaluator manning was a contributing factor.

c. Stan/Eval Program Inspections and Reviews (if applicable).

d. Publications. Review open DAF Forms 847.

Supplementary Evaluations. Report results of evaluations conducted at both the OGV and subordinate levels.

3. Old business. Enter the disposition of any items left open at the last board meeting. If final action was taken on an item during the quarter, state the action taken and then close the item if closure is approved by the board chairman. If an item remains open, list the action taken since the last board. Findings from formal Stan/Eval inspections are addressed and covered until they are closed out.

4. New business. Enter all new business discussed during the board. The new business items are those included on the published agenda along with any unplanned items discussed.

5. Other: This is an optional paragraph that can be used as necessary.

6. Problems requiring HHQ assistance: Enter problems that, based on board resolution, require HHQ assistance. The assistance may be in any form (for example, staff assistance visit requests, clarification of directives, change of directives, and so forth).

Attachments:

1. Board agenda

2. Evaluator roster reviewed

3. As required

Attachment 3

AF FORM 1035 INSTRUCTIONS

A3.1. General Guidelines. The following directions clarify how to properly fill out and complete the AF Form 1035.

A3.1.1. Format: Use DD MMM YY for dates (e.g., 20 JUN 21). The form is designed to be completed digitally. If completed on paper, complete in blue or black ink. Minor corrections maybe made provided it does not impact legibility. Corrections will be initialed by both the evaluator and the examinee; any grade/qualification corrections will be initialed by the commander (or designated representative).

A3.1.2. Flow: The form is designed with signature locking to be completed and signed in the following order:

A3.1.2.1. Evaluator.

A3.1.2.2. If additional training has been assigned, then signed by the certifying official once
complete.

A3.1.2.3. Commander or designee. (This is optional for non-JTAC evaluations with a Q1 grade but required for all others.)

A3.1.2.4. Examinee.

A3.1.2.5. Reviewer.

A3.1.3. Overflow: If additional space is required, use an DAF Form 623A and annotate its use at the very bottom of Part VII (include the filename if maintained digitally, or attach to the back of the AF Form 1035 if maintained physically).

A3.2. Part I – Individual Information.

A3.2.1. Name: Last, First, Middle Initial (e.g., Doe, John, A).

A3.2.2. Rank: (e.g., TSgt/SrA).

A3.2.3. DoD ID: Personal identification number of the individual being evaluated. **Note:** The two following date blocks remain unlocked until final review and the reviewer verifies the qualification and expiration date.

A3.2.4. Qualification Date: This block indicates the day that your qualification period begins and is matched to the evaluation date. This ensures evaluations are conducted within their periodicity. **Note:** If additional training was assigned, the AF 1035 is not complete until additional training is complete, the training was certified, and the AF 1035 has been signed by the "Reviewer". Individuals are not "qualified" until the AF 1035 is completed

and locked.

A3.2.5. Expiration Date: Date that the completed evaluation will expire based on the prescribed interval for the qualification period starting on the qualification date. **Note:** If there are two expiration dates, e.g., JTAC, JTAC-I, JTAC-E (all 18 months) and AFSPECWAR (24 months), annotate the shortest expiration date in this block and put the longer expiration date by itself as the first line in Part VII Remarks: (e.g., "Second Expiration Date: Team Member MSN: 01 Jun 2025.").

A3.2.6. Unit: Examinee's unit of assignment or attachment (e.g., 118th Air Support Operations Squadron).

A3.2.7. AFSC w/ Prefix: 5-digit AFSC of examinee (6 digits if member has a prefix, e.g., J, K, Q, T, W, X).

A3.2.8. Overall qualification: This is the final grade for the evaluation. Select the checkbox for the overall qualification level. The box is checked at the completion of the evaluation prior to the accomplishment of additional training if directed.

A3.3. Part II – Evaluation Data.

A3.3.1. Evaluation location: The location where the evaluation was conducted (e.g., McPherson Impact Area, Fort Bragg, NC).

A3.3.2. Evaluation date: Date that the evaluation was conducted.

A3.3.3. Evaluation prefix: Check all applicable boxes for this evaluation. Select whether the evaluation was conducted in a simulator (SIM), was an initial (INT) evaluation, a re-qualification (RQ) evaluation (performed following either a lapsed or failed evaluation), or a no-notice evaluation (N/N). **Note 1:** The preponderance of all evaluations will be live, recuring evaluations, which will have no prefixes selected.

A3.3.4. Evaluation type: Check all applicable boxes for this evaluation. Select closed book (CB), mission evaluation (MSN), instructor evaluation (INSTR), and/or spot evaluation (SPOT). **Note 1:** "CB" must be selected if there is data input into Part III. **Note 2:** "MSN" can only be selected if all applicable areas in **Table A4.1** were graded (input tasks into Part IV).

A3.3.5. Evaluated skillset: Check all applicable boxes and/or write in evaluated skillsets. If all AFSC skills in **Table A4.1** were assessed, select team member. If all Tactical Enlisted Leader tasks were also assessed, select Tactical Enlisted Leader. **Note:** 19Zs who are not officially "Team Commanders" but who complete **Table A4.1** tasks will annotate "TACP-O" or "STO" in the "Other" section.

A3.4. Part III – CB Evaluation/JTAC Ground MQF.

A3.4.1. Date given: Date the test was administered.

A3.4.2. Test Version: Version designator of the closed book test that was administered.

A3.4.3. Score: Enter in the score the individual received on the test in this block.

A3.4.4. Re-test date: Date the re-test was administered if applicable.

A3.4.5. Re-test version: Version designator of the closed book test that was administered. Use this when the examinee fails their first attempt at the CB evaluation.

A3.4.6. Re-test score: Enter in the score the individual received on the test in this block. **Note:** In the case of a failed CB evaluation/JTAC ground MQF, the administering evaluator completes Part I-III to include a Q3 grade, digitally signs the AF Form1035, and sends to the member's commander (after commander's certification, place in the member's evaluation section outlined in **paragraph 6.4**). When member re-tests, the administering evaluator transcribes the data to the new AF Form1035 (or uses the pre-signature AF Form 1035), inputs the re-test data and either provides the form to the assigned/attached CCV for use in follow-on evaluations, or signs the form for a standalone CB and files in member's evaluation section.

A3.5. Part IV – Evaluation Details.

A3.5.1. Event description: Describe the scenario, assets involved, and any other relevant amplifying data. **Note:** JTAC evaluations will indicate the scenario's threat level (1-5) but will not add amplifying data into the evaluation forms to include specific nomenclature of threats utilized during the scenario.

A3.5.2. Tasks and grades: Fill out tasks evaluated in the task column as prescribed in **Table A4.1**; check the respective grade for that item outlined in **paragraph 4.7**. For JTAC evaluations, enter all the areas required for the evaluated skillset, utilizing guidance in AFMAN 10-3505V2, Chapter 4.

A3.6. Part V – Restrictions and Additional Training.

A3.6.1. Restrictions: If the examinee does not require any additional training, the evaluator checks "NO," and the rest of this section is not required. If the evaluator checks "YES," the rest of the section must be filled out. The "YES" box will be checked if there is additional training assigned to the member based on evaluator observation or commander directed downgrade.

A3.6.2. Additional training items: List all item numbers from the evaluation that require additional training. Define each required training item in Part VII, "Remarks".

A3.6.3. Training due date: Enter the date by which all additional training must be completed.

A3.6.4. Training completion date: Enter the date by which all additional training was completed.

A3.6.5. Certifying official signature: Digital signature for the certification that additional training was accomplished. **Note:** If a wet signature is used, the certifier must write and sign their name.

A3.6.6. Date: Date that additional training was certified.

A3.7. Part VI – Endorsement.

A3.7.1. Evaluator: Type name of the evaluator for this evaluation. (e.g., Doe, John A.).

A3.7.2. Evaluator Rank: Type the rank of the evaluator for this evaluation.

A3.7.3. Evaluator OSC: Type the office symbol code (e.g., "CCV") of the evaluator for this evaluation.

A3.7.4. Evaluator remarks: Indicates that there are evaluator remarks in Part VII.

A3.7.5. Evaluator signature: Evaluator signs the form, if performed digitally, this will lock the majority of Parts I-V. **Note:** The evaluator signs the form when they have finished filling out all applicable information and their portion of the evaluation is complete. This does not complete the evaluation as other reviews remain as well as any prescribed additional training.

A3.7.6. Evaluator date: Date the evaluator signed the AF Form1035. **Note:** A commander or designated representative's review and certification is optional for non-JTAC evaluations with a Q1 grade but required for all others.

A3.7.7. Commander: Type the commander's (or designated representative's) name responsible for the examinee. (e.g., Doe, John A.).

A3.7.8. Commanders' office symbol: Type the office symbol of the commander (i.e., "CC") or designated representative.

A3.7.9. Concur / non-concur: Commander (or designated representative) selects the applicable block indicating whether they concur with the evaluator's assessment. A non-concur from the commander that results in a failure of the evaluation or downgrade of specific evaluation items are considered a commander directed downgrade.

A3.7.10. Commander remarks: Indicates that there are remarks from the respective signatory in Part VII.

A3.7.11. Commander's signature: Self-explanatory.

A3.7.12. Commander date: Date the respective signatory signed the AF Form 1035.

A3.7.13. Name of examinee: (Prefilled from Part I).

A3.7.14. Rank of examinee: (Prefilled from Part I).

A3.7.15. Examinee signature: Self-explanatory.

A3.7.16. Examinee date: Self-explanatory.

A3.7.17. Reviewer: Type the name of the reviewing official (e.g., Doe, John A.).

A3.7.18. Reviewer rank: Type the rank of the reviewing official (e.g., TSgt).

A3.7.19. Reviewer signature: Self-explanatory **Note:** Reviewer must verify qualification and expiration dates as well as entering reviewer date before signing as signature locks entire form (see **paragraph A3.2.2** and **paragraph A3.2.3**). **(T-3)**

A3.7.20. Date: Date that the reviewer reviewed and signed the AF Form1035.

A3.8. Part VII- Remarks.

A3.8.1. Additional expiration dates. If there are two or more qualification expiration dates that will expire on different days, the shortest expiration date is annotated in **Part I** "Expiration Date," and the other(s) are annotated as a standalone first line in **Part VII** Remarks.

A3.8.2. In the remarks block, enter in any amplifying data relevant to performance during evaluation, discrepancies, or downgrades during the evaluation. The following are examples of remark headers and contents:

A3.8.3. CB evaluation: (JTAC EVAL, Ground Phase ***only***) List any questions missed or challenged in the written evaluation and state whether they were debriefed or not with the individual.

A3.8.4. MSN evaluation: List any discrepancies or commendations that occurred during the MSN evaluation. If discrepancies are listed, state whether they were debriefed with the individual.

A3.8.5. Additional training: Define how additional training requirements will be met before the evaluation is complete.

A3.8.6. Evaluator remarks: This is where the evaluator may add any additional comments necessary. Use this space to clarify prefixes or multiple prefixes (if not obvious by the context of the evaluation).

A3.8.7. Commander's remarks: Used if the commander (or designee) has any remarks.

A3.8.8. Additional training: Specify, in detail, the additional training required by the examinee before the evaluation is complete. For a commander-directed downgrade, write "Commander-Directed Downgrade utilizing guidance in AFMAN 10-3500V2" and document cause of downgrade, additional training required, review board actions, and re-qualification requirements.

A3.8.9. Restrictions: Outline all restrictions imposed upon the examinee resulting from evaluation performance. For a commander-directed downgrade, write "Commander-Directed Downgrade utilizing guidance in AFMAN 10-3500V2" and document cause of downgrade, additional training required, review board actions, and re-qualification requirements.

A3.8.10. Annotate if there is an accompanying DAF Form 623A that documents further graded areas that justify the evaluated skillsets listed on the AF Form 1035.

Attachment 4

EVALUATION, TASKS, AND CRITERIA

A4.1. Instructions.

A4.1.1. Members will be evaluated in accordance with AFS column. Enlisted member qualified/designated as tactical leaders (e.g., PJ Element Leaders, Team Leaders, or Flight Chiefs) will additionally be evaluated in accordance with the enlisted leader column. **(T-3)** For SPOT evaluations utilize appropriate tasks based on evaluated event. (e.g., Alternate Insertion Extraction Master, Dive Supervisor, etc.)

A4.1.2. "R" Tasks are ***required*** MSN evaluation items for the designated examinee and must be completed by the member. **(T-2)**

A4.1.3. "E" Tasks are ***essential*** MSN evaluation items, and the examinee must be evaluated and receive a "Q" grade in the task to pass the evaluation. **(T-2)**

A4.1.4. If an item is marked "R" or "E" in the 19Z column it is applicable to all three shreds. Otherwise, the affected shred(s) are identified by their fifth AFSC character (STO=A, TACPO=B, CRO=C) along with the requirement.

Notes:

1. The member must be graded on at least one (1) of the subareas on every MSN evaluation. **(T-3)**

2. Insertion/infiltration and Extraction/Exfiltration will be planned for all missions. Execution from an aircraft is not required.

3. Will be evaluated on qualified members if task is part of the mission scenario. **(T-3)**

4. An MSN evaluation may be used to update a JTAC evaluation expiration date provided all evaluation requirements are completed.

Table A4.2. Evaluation Criteria.

ID	Q	Q-	U
100	**MISSION PREPARATION**		
101	**Battle Space Geometry C2**		
	Controlled mission efforts in the objective area. Exercised thorough situational awareness and control of assets and personnel throughout mission. Utilization of assets/personnel performed in a positive and timely manner.	Made minor errors in mission control efforts in the objective area. Control of assets had minor errors that did not preclude mission success or present a hazard to friendly forces.	Did not control mission efforts in the objective area. Control of assets/personnel instructions were not timely, clear, and accurate or unsafe. Actions resulted in either degraded or ineffective mission.
102	**Briefing**		
	Ensured briefing contained pertinent critical information to the mission. Prepared at briefing time. Briefings effectively organized and professionally presented in a logical sequence. Presented all objectives, training tasks	Omitted items pertinent but not critical to the mission. Some difficulty communicating clearly. Did not make effective use of available briefing aids. Limited discussion of training tasks or special	Failed to conduct/attend required briefings. Failed to use appropriate briefing aids. Omitted essential items or did not correct erroneous information that could affect mission accomplishment.

ID	Q	Q-	U
	and special interest items. Effectively used available briefing aids. Well organized and professionally presented in a logical sequence. Presented required tasks and effective discussion for accomplishing the mission.	interest items. Dwelled on non-essential items. Not fully prepared for briefing. Tasks out of sequence, hard to follow, some redundancy, dwelled on nonessential items, and/or omitted some minor tasks.	Demonstrated lack of knowledge of subject. Briefing poorly organized and not presented in a logical sequence. Presented erroneous information that would affect safe/effective mission accomplishment. Presentation created doubts or confusion. Failed to discuss training tasks or special interest items. Delays due to excessively long briefing. Sequence disorganized and illogical. Presentation created doubts or confusion and omitted major tasks.
103	**CDO Considerations**		
	Effectively planned for contested and degraded operations environment factors. Understood mission command responsibilities in a distributed operations environment, where higher echelon reach back may not be possible. Effectively built a redundant multi-spectral communications plan that included user procedures in the event of jamming. Understood how to detect radio frequency jamming environment. Effectively planned for request and use of redundant kinetic/non-kinetic weapon system platforms and their specific weapon employment weaknesses / strengths specific to a domain (GPS, laser, inertial, electronic, surface fires, etc.). Ref. RAND Study ISBN: 978-1-	Mission planning demonstrated understanding of CDO considerations with minor points of omission to communications plan, fires, or navigation redundancy that would not detract from mission success or safety.	Failed to factor CDO considerations into mission plan. Did not demonstrate understanding of mission command responsibilities. Failed to build a redundant, survivable comm plan. Failed to identify jamming environment or conduct comm plan procedure when jamming detected. Failed to consider, request, or plan for domain-redundant weaponeering solutions.

ID	Q	Q-	U
	9774-0232-5, *Distributed Operations in a Contested Environment*.		
104	**Command Responsibilities**		
	Demonstrated C2 fundamentals and understanding of concept of operations (CONOPS), Troop Leading Procedures (TLPs), 5-point contingency plans, and types of orders. Provided comprehensive incident site/actions- on management. Successfully functioned as an air-ground interface to enhance mission effectiveness. If in a supporting role, demonstrated timely coordination with ground commander or designated representative. Accurately explained data and dangers to friendly forces to the ground commander. Understood ground commander's scheme of maneuver. Requested timely ground commander clearance as necessary. *CRO Only: Concentrated on coordination that takes place internally within the Joint Personnel Recovery Center / Personnel Recovery Coordination Cell /Operations Center and externally with all the various units, offices, assets, and agencies that assist in and/or conduct mission type operations.	Showed average understanding of CONOPS, TLPs, 5-point contingency plans, and types of orders. Minor errors in incident site/actions-on management/air- ground interface that did not affect overall mission success. If in a supporting role, demonstrated coordination with ground commander or designated representative. Explained only minimal data and dangers to friendly forces. Mission impacted but still successful.	Lacked understanding of CONOPS, TLPs, 5-point contingency plans, and types of orders. Errors in incident site/actions-on management/air- ground interface that negatively affected mission success. If in a supporting role, insufficiently coordinate with ground commander/designated representative. Omitted or provided inaccurate mission data or dangers to friendly forces. Impacted mission effectiveness or exposed friendly forces to hazards. Hampered mission effectiveness by lack of understanding of roles/responsibilities. *CRO Only: Did not concentrate on coordination that takes place internally within the PRCC and externally with all various units, offices, assets, and agencies that assist in or conduct PR.
105	**Discipline**		
	Executed the mission in an efficient manner.		Major discrepancies in knowledge and/or

ID	Q	Q-	U
	Demonstrated an understanding of mission roles. Ensured mission was accomplished with constant regard to team members, supported and supporting forces and assets.		employment with significant impact on mission effectiveness. Did not understand risk-estimate distances, and exposed friendly forces to unacceptable risk. Failed to achieve desired results (due to operator's action/ inaction). Mission resulted in unwanted outcomes lacking situational awareness and improper execution.
106	**Equipment Preparation**		
	Adhered to and knowledgeable of all checks.	Minor deviations. Made timely and positive corrections. Did not jeopardize operation.	Gross errors, incorrect procedures, and minor violations deviating from established procedures.
107	**Equipment Requirements**		
	Had all required personal and professional equipment, displayed satisfactory knowledge of the care and use of such equipment and the contents of required publications. Required equipment inspections were current.	Had only some of required personal/professional equipment or had limited knowledge of the use or the content of required publications.	Did not have required personal/professional equipment essential for the mission.
108	**Judgment**		
	Actively engaged in the mission planning and/or military decision-making processes. Common sense and sound judgment based on actual factors encountered in a given situation. Decisions concerning employment feasibility and duration considered the worst probable circumstances and were mutually understood by both the commander and the deploying Senior Enlisted	Team executed the mission in an untimely or inefficient manner. Questionable decisions which did not compromise safety. Inability to control team members without mission/safety compromise.	Did not include other COA before implementing plan. Directives intentionally violated. Did not anticipate contingencies or reacted to an unplanned event in a manner which prevented mission accomplishment.

ID	Q	Q-	U
	Leader. Made decisions based on solid information rather than personal opinion. Decision-making processes. Actively engaged in the decision-making process to accomplish the mission. Anticipated contingencies and reacted to unplanned events in a manner that ensured mission accomplishment.		
109	**Knowledge of Directives**		
	Knowledgeable of all applicable publications – (e.g., AFMANs, AFTTPs, USSOCOM manuals).	Marginal knowledge of capabilities, approved operation procedures and rules.	Inadequate knowledge of operating capabilities and procedures. Major omissions that would preclude safe/effective mission accomplishment. Has inadequate knowledge of operational capabilities and procedures in publications and directives.
110	**Leadership**		
	Operator's leadership ensured team executed the assigned mission in a timely and efficient manner. Conducted the operations with a sense of understanding and comprehension. Ensured all aspects of the mission were accomplished with regard to the safety of the team members, supported and supporting forces and assets (and the proper field medical care patient if applicable).	Team executed the mission in an untimely or inefficient manner. Questionable decisions which did not compromise safety. Inability to control team members without mission/safety compromise.	Decisions resulted in failure to accomplish the assigned mission. Demonstrated poor judgment to the extent that safety could have been compromised. Regulations/directives were intentionally violated. Compromised safety and allowed a dangerous situation to develop. No adequate field medical care.
111	**Mission Planning**		
	Clearly defined the mission overview and mission goals. Provided specific information on required tasks. Thoroughly critiqued	Did not adequately define the mission overview and mission goals. Potential problem areas partially addressed or not at all. Did	Did not define the mission overview and goals. Lack of specific information on required tasks. Did not solicit feedback from other

ID	Q	Q-	U
	plans to identify potential problem areas and ensured all understood possible contingencies. When required, extracted necessary information from mission type orders/air tasking order/FRAGORDs. Aware of the available alternatives if unable to complete the mission as planned. Developed a sound plan to accomplish the mission from several Courses of Action. Adequately planned work assignments and priorities. Accurately anticipated equipment requirements. 19Z only: Established component Go/No Go criteria.	not adequately solicit feedback or critique the plans to ensure understanding of possible contingencies. Minor errors or omissions detracted from mission effectiveness but did not affect mission accomplishment. Limited knowledge of performance capabilities or approved operating procedures/rules. Same as Q, except minor errors or omissions could degrade mission effectiveness.	team members to ensure understanding. Did not critique plans to identify potential problem areas. Major errors or omissions would have prevented a safe or effective mission.
112	**Personnel Accountability**		
	Established procedures for accountability, assigned responsibility along team lines. Identified critical tasks and the personnel responsible for accomplishing these tasks.	Established some procedures for accountability but did not assign all responsibility along team lines. Committed errors or omissions when liaising with supporting units. Only identifying some of the critical tasks and the personnel responsible for accomplishing these tasks.	Did not establish procedures for accountability. Did not prepare details of the plan to include identifying personnel responsible for accomplishing tasks designated to personnel.
113	**Pre-Mission Inspection**		
	Accomplished all required inspections in accordance with applicable directives in a timely manner. Correctly configured for the assigned mission. Adhered to all timelines and used all appropriate checklists correctly.	Same as Q except for minor procedural deviations which did not degrade mission effectiveness.	Did not use the checklist or omitted major item(s). Major deviations in procedure which would preclude safe mission accomplishment. Failed to accurately determine proper configuration to perform the mission.
114	**Publications**		
	Publications, manuals, handbooks were current and properly posted/used. Read	Most information was current and properly posted/used. Read and	Publications, manuals, handbooks were not current. FCIF not reviewed

ID	Q	Q-	U
	and initialed items in FCIF.	initialed items in FCIF.	or signed.
115	**Risk Management/Decision Making**		
	Identified contingencies and alternatives. Gathered and cross-checked relevant data before deciding. Clearly stated problems and proposed solutions. Investigated doubts and concerns of operators. Used facts to come up with solution. Involved and informed necessary supporting personnel when appropriate. Coordinated team activities to establish proper balance between command authority and team participation and acted decisively when the situation required. Clearly stated decisions, received acknowledgement, and provided rationale for decisions. Completed and assessed risk analysis/mitigation.	Partially identified contingencies and alternatives. Made little effort to gather and cross check relevant data before deciding. Did not clearly state problems and propose solutions. Did not consistently use facts to come up with solutions. Did not effectively inform supporting personnel when appropriate. Did not effectively coordinate team activities to establish a proper balance between command authority and team participation and acted indecisively at times. Completed risk analysis/mitigation but did not factor in adequate risks of Courses of Action.	Failed to identify contingencies and alternatives. Made no effort to gather and cross check relevant data before deciding. Did not inform necessary supporting personnel when appropriate. Did not use facts to come up with solution. Avoided or delayed necessary decisions which jeopardized mission effectiveness. Did not coordinate team activities to establish proper balance between command authority and team participation; acted indecisively. Did not complete risk analysis/mitigation.
116	**Safety**		
	Aware of and complied with all safety factors required for safety of mission accomplishment regarding the safety or danger to the operator(s), supporting vehicles, and supporting personnel. Employed all available methods to ensure safety of personnel. Analyzed emergency situations and implemented emergency procedures. Used equipment and employed personnel in a safe manner.		Was not aware of or did not comply with all safety factors required for safe operations and mission accomplishment. Any dangerous act. Disregarded safety procedures. Did not use equipment or employ personnel in a safe manner. Did not comply with safety requirements. Disregarded safety or danger to operators, supporting vehicle(s), and supporting personnel.
117	**Situational Awareness**		
	Anticipated situations that would have adversely		Decisions, or lack of them, caused failure to

ID	Q	Q-	U
	affected the mission and corrected them. Made appropriate decisions based on available information. Recognized the need for action. Aware of performance of self and other team members. Aware of on-going mission status. Recognized, verbalized and acted on unexpected events. Exercised thorough situational awareness and control of assigned operators throughout mission. Personnel recovery events issued in a positive and timely manner. Executed the mission in an efficient manner. Demonstrated an understanding of mission roles in applicable aircraft, vehicle, boat or dismount operations. Ensured mission was accomplished with constant regard to team members, supported and supporting forces and assets.		accomplish assigned mission. Did not recognize the need for action. Not aware of performance of self and other team members. Not aware of on-going mission status. Failed to recognize, verbalize, and act on unexpected events. Control instructions were not timely, clear, and accurate or were unsafe. Actions resulted in either degraded or ineffective mission.
118	**Tasking/Updates**		
	Correctly identified, prioritized, and managed tasks based on existing and new information that assured mission success. Used available resources to manage workload, communicated task priorities to other team members. Asked for assistance when required. Effectively identified contingencies and alternatives. Gathered and crosschecked available data before acting. Clearly stated decisions and ensured they were understood. Investigated doubts and concerns of other team members when necessary.	Made minor errors in prioritization, management of tasks, system knowledge which did not affect safe or effective mission accomplishment. Did not completely communicate task priorities to other team members. Made minor errors in identifying contingencies, gathering data, or communicating a decision which did not affect safe or effective mission accomplishment.	Incorrectly prioritized or managed tasks. Displayed lack of knowledge causing task overload that seriously degraded mission accomplishment or safety. Failed to communicate task priorities to other team members. Failed to ask for assistance when overloaded. Improperly or ineffectively identified contingencies, gathered data, or communicated a decision that seriously degraded mission

ID	Q	Q-	U
			accomplishment or safety.
119	**Team Coordination**		
	Effectively based team complement off mission profile as dictated by tactical situation. Effectively assigned team duties and responsibilities to maximize effectiveness. Provided direction/information when needed. Adapted to meet new situational demands and focused attention on the task. Knew assigned task of other supporting personnel. Asked for inputs and made positive statements to motivate team members.	Minor coordination errors but did not adversely affect mission accomplishment. Team coordination was limited though adequate to accomplish the mission. Provided limited direction/information when needed. Slow to adapt to meet new situational demands due to limited focus on task. Did not consistently seek inputs from other team members. Limited effort to motivate team members.	Delays caused by untimely coordination or team duty assignments precluded successful mission accomplishment. Did not provide direction/information when needed. Did not adapt to meet new situational demands and focus attention on the task. Did not seek inputs or made no effort to motivate team members. Lack of team coordination resulted in significant degradation of mission accomplishment.
120	**Troop Leading**		
	Demonstrated timely coordination procedures with appropriate ground force staff agencies and team. Team executed the assigned mission in a timely and efficient manner. Conducted the operations with a sense of understanding and comprehension. Ensured all aspects of the mission were accomplished.	Demonstrated coordination with all appropriate agencies. Delays caused by untimely coordination did not affect mission accomplishment. Minor deviations to functioning as air-ground interface.	Coordination with appropriate agencies was not completed prior to commencing attack. Delays caused by untimely coordination degraded or prevented successful mission accomplishment. Did not lead, allowing other agencies or factors influence the leadership decision process creating confusion and ineffective mission accomplishment.
200	**INSERTION/INFILTRATION**		
201	**Aerial Cargo Delivery**		
	All bundles were prepared, inspected, and deployed accurately.	Bundles were prepared with minor discrepancies and were corrected prior to deployment.	Bundles were improperly rigged, critical items in preparation missed.
202	**AIE Master Operations**		
	Displayed a thorough understanding of all AIE master responsibilities and safety requirements. Understands the capability of aircraft used. Demonstrated proper inspection of equipment. Conducts proper	Displayed marginal understanding of AIE Master responsibilities and safety requirements. Made errors that did not adversely affect mission accomplishment in areas of proper inspection, effective	Displayed poor understanding of AIE master responsibilities and safety requirements. Does not understand the capability of aircraft used. Demonstrated improper inspection of equipment. Fails to conduct proper ground training.

ID	Q	Q-	U
	ground training. Demonstrates use of required knots, connecting hardware, and properly rigs helicopter. Properly inspects AIE equipment, effectively monitors technique, and properly conducts AIE operations.	instructional/deployment techniques, and/or rigging of helicopter.	Inability to demonstrate use of required knots, connecting hardware, and improperly rigs helicopter. Improperly inspects equipment, Ineffective instructional technique, fails to properly conduct AIE operations.
203	**Authentication**		
	Ensured proper survivor authentication to determine identity and possible threats. Performed authentication with no errors.	Minor deviations which did not interfere with safe mission accomplishment. Required numerous attempts to complete authentication.	No authentication completed or authenticated incorrectly.
204	**Communications**		
	Radio communications were concise, accurate and effectively used to direct maneuvers or describe the tactical situation. Understands capabilities, limitations, proper use of radio. Logically and efficiently troubleshoots technical problems.	Minor terminology errors or omissions occurred, but did not significantly detract from situational awareness, mutual support, or mission accomplishment. Extraneous comments over primary or secondary radios presented minor distractions. Limited understanding of radio results in avoidable technical problems. Illogically or inefficiently troubleshoots.	Radio communications over primary/secondary radios were inadequate or excessive. Inaccurate or confusing terminology significantly detracted from mutual support, situational awareness, or mission accomplishment. Cannot make complete basic user-solvable technical problems.
205	**Fast Rope**		
	Properly configured rope, took appropriate actions at each time call, safely deployed.	Rope configured improperly; failed to take appropriate actions at specific time calls.	Rope configured unsafely; deployed in an unsafe manner.
206	**Helo-cast**		
	Took appropriate actions at each time call, safely deploys.	Failed to take appropriate actions at specific time calls. Deployed at wrong alt / airspeed / location.	Deployed at unsafe alt / airspeed / location.
207	**Hoist**		
	Correctly used insertion/extraction device; safely deployed.	Incorrectly used insertion/extraction device.	Unsafely used insertion/extraction device.
208	**Insertion Procedures**		
	Preliminary review of the team's health, equipment	Incorrectly reviewed team's health, equipment status and	Did not review team's health, equipment status, and overall

ID	Q	Q-	U
	status, and overall capabilities. Decided/executed on agreed upon insertion plan based upon mission, enemy, terrain/weather, troops, time, and civil considerations (METT-TC). Had and considered up to three viable insert options. Considered command/control, method of insertion, primary/secondary routes, threats, and actions in response to threats, mission essential tasks, timeline, supporting forces, communications, go/no-go criteria, and contingencies.	overall capabilities. Consider only one insertion options. Minor deviations to method of insertion, routes, threats, and actions in response to threats. Only several mission essential tasks performed but did not negate mission accomplishment.	capabilities. Did not decide or execute a coherent insertion plan based upon METT- TC. Did not consider other insertion options. Did not assess command/control, method of insertion, primary/secondary routes, threats, and actions in response to threats, mission essential tasks, timeline, supporting forces, communications, go/no-go criteria, and contingencies.
209	**Jumpmaster Operations**		
	Thoroughly aware of published jump related requirements, limitations, and emergency Procedures. Demonstrated proper use of checklists, inspection of personnel, equipment, and Aircraft in accordance with published directives. Considered all factors relating to personnel deployment (e.g., winds, terrain, DZ size, Release Point and Jump Performance) Demonstrated the knowledge and ability to closely monitor jump team, correctly determined the exit point and safely deployed parachutist.	Aware of jump related requirements, limitations, and emergency procedures. Made non- critical errors in use of checklists, inspections (equipment/personnel). Monitored jumpers but made omission that did not adversely affect exit point and safety of deployed parachutists.	Lacked the knowledge of published jump related requirements, limitations, or emergency procedures. Failed to properly demonstrate the use of checklist, inspection of personnel, equipment, and aircraft in accordance with published directives. Did not consider all factors relating to deployment. Failed to monitor the jump team. Inadequately determined the exit point. Compromised the safe deployment of parachutists.
210	**Maritime – Sub-Surface (Dive)**		
	Correctly donned equipment; demonstrated understanding of Eps, adhered to dive plan, identified hazardous situations, used equipment in	Incorrectly donned equipment. Incorrectly operated specialized underwater equipment (if certified on the device).	Unable to don equipment. Selected unnecessary equipment causing mission degradation. (if certified on the device).

ID	Q	Q-	U
	accordance with applicable guidance, correctly used specialized underwater equipment (if certified on the device).		
211	**Maritime – Surface**		
	Correctly de-rigged airdrop equipment (if required); correctly inflated boat (if required); correctly and safely operated vehicle, performed appropriate trouble shooting / field repair.	Incorrectly started, operated vehicle causing avoidable delays. Lacked sufficient understanding to troubleshoot problems logically / efficiently.	Vehicle rendered inoperable by examinee; Does not know how to operate vehicle. Operated vehicle in a manner that caused avoidable swamping / overturning.
212	**Medical Coordination**		
	Coordinated patient treatment and handoff to higher care.	Employed minor deviations from standards which did not interfere with safe mission accomplishment or unnecessarily aggravate the patient's condition.	Medical facility considerations not addressed or made unnecessary decisions adversely affecting patient's or mission assets.
213	**Military Tandem Master Operations**		
	Conducted passenger brief within 24 hours of the actual jump. Coordinated with the drop zone support personnel if necessary to ensure all equipment and personnel have been identified to support the operation. Ensured equipment and passenger were inspected prior to boarding the aircraft (**Note:** Recommend two jumpmaster inspections). Ensured passenger safety in and around all aircraft operations, when boarding ensured passenger secured next to the Tandem Operator away from any open door. The Tandem Operator always controlled passenger ensuring passenger wore the seatbelt and helmet for taxi,	Made minor errors in use of briefings, checklists, inspections (equipment/personnel) that did not affect safety or mission success.	Operator performed incorrect hook-up procedures. Conducted in the vicinity of an open door when not necessary. Performed aircraft duties (Tandem Operator and passenger do not perform aircraft duties). No hook knife available. Off drop DZ due to Tandem Master error. Passenger brief not conducted within 24 hours of actual jump.

ID	Q	Q-	U
	take-off and if necessary, landing. (Students must be attached prior to takeoff for open door aircraft).		
214	**Precision Jumpmaster Operations**		
	Executed all appropriate checklists. Effective crew coordination. Achieved accurate aircraft line-up. Correctly and accurately deployed wind drift indicator. Selected appropriate airdrop pattern. Deployed jumpers over correct spot.	Difficulty coordinating accurate aircraft line-up. Deployed wind drift indicator incorrectly or off target. Poor crew coordination resulting in avoidable go-arounds. Deployed jumpers over incorrect spot.	Omitted a checklist. Ineffective crew coordination resulting in inability to accomplish briefed tasks. Off-DZ drop.
215	**Rappel**		
	Properly configured rope, took appropriate actions at each time call, safely deployed.	Rope configured improperly and failed to take appropriate actions at specific time calls.	Rope configured unsafely; deployed in an unsafe manner.
216	**RAPs Parachute**		
	Correctly donned parachute / equipment load; took appropriate actions at each time call; executed freefall and canopy actions as briefed; landed within 25m of target/team member (**Exception:** bad spot or malfunction); landed safely.	Incorrectly donned parachute / equipment load; failed to take appropriate actions at time calls; did not execute freefall/canopy actions as briefed; landed within 100m from target/team member (**Exception:** bad spot or malfunction).	Unsafely donned parachute / equipment load; landed >100m from target (**Exception:** bad spot or malfunction); incorrectly performed EPs (if required).
217	**Search Procedures**		
	Accurately determined the area where the survivors are or will be located upon arrival at the scene. Detailed search plans provided to all members of the search significantly increased the probability of successfully locating and rescuing those in distress. Planned the search by appropriately calculating search area and then outlining the boundaries of the search area.	Failed to take appropriate search procedures. Marginal search planning. Calculating the search area and boundaries was useable but better search procedures existed.	Ineffective search determination. Did not know where the survivor would be located based upon operator error. Poor search planning decreased the probability of locating and rescuing those in distress. No plan for search.

ID	Q	Q-	U
218	**Site Evaluation**		
	Site evaluation ensured mission accomplishment. A thorough site selection was accomplished.	Selected site was useable but better site was available. Valuable resource not utilized.	Selected unnecessarily hazardous site. Unable to accomplish mission from selected site.
219	**Static Line Parachute**		
	Correctly donned parachute / equipment load; took appropriate actions at each time call; demonstrated competent canopy manipulation; correctly executed pre-landing actions; landed safely.	Incorrectly donned parachute / equipment load; slow to take appropriate actions at time calls; did not execute pre-landing actions appropriately.	Unsafely donned parachute / equipment load; failed to take appropriate actions at time calls; did not execute pre-landing actions appropriately.
220	**Supporting Vehicle Preflight/Inspection**		
	Inspected all vehicles in accordance with applicable guidance. Ensured all mission equipment is serviceable and properly installed.	Incomplete inspection, skipped only non-critical areas.	Incomplete inspection, skipped mission critical areas.
221	**Tactical Vehicle Operations**		
	Effectively cross-loaded equipment and personnel to allow redundant capabilities across the convoy. Successfully navigated route and passed accurate and timely execution checklist calls. Performed contingency maneuvers correctly. Maintained security during movement and at stops.	Minor deviations or discrepancies from standard operating procedures that did not result in mission failure or compromise of safety.	Actions resulted in mission failure or an avoidable compromise of safety.
300	**BASIC TACTICS**		
301	**Navigation (Mounted or Dismounted)**		
	Used applicable resources to account for survivor and team members' orientation showing expertise in all map reading and navigation skills to include the use of nonmilitary maps, aerial photographs, and terrain analysis with respect to both friendly and enemy force	Made errors with respect to friendly and enemy force location to account for survivors and team member orientation that did not preclude mission accomplishment.	Failed to determine distance(s) to be traveled. Failed to travel the proper distance. Failed to properly plot or locate the objective. Failed to select easily recognized check point and landmarks. Failed to consider the ease of movement factor. Lacked

ID	Q	Q-	U
	enhancing mission accomplishment. If CDO: Executed use of system-aided and unaided navigation techniques for both ownership and reference/target locations.		basic skills of map reading, dead reckoning, and terrain association with respect to friendly and enemy force's location that precluded mission accomplishment. If CDO: Failed to identify or lacked positional awareness whether system-aided or unaided.
302	**Security**		
	Security was complete and appropriate for the mission, resources, and threat.	Gaps in security. Did not use all available resources. Limited threat awareness.	No regard for security of team or supporting entities.
303	**Survivor Contact and Handling**		
	Team controlled survivor. Contact procedures were accurately followed. Appropriate use of force to control survivor.	Team had limited control of survivor. Some contact procedures followed. Too much or too little use of force to control survivor.	Team failed to control the situation. Contact procedures were not followed.
304	**Tactics**		
	Executed in accordance with current guidance and unit SOP's and procedures. Required areas if applicable: routes of travel, primary and alternate insertion points, initial rallying point, Delta points, fire suppression of pre- designated targets, primary and alternate objective rallying points, primary and alternate link-up points, primary and alternate extraction points, safe areas, designated areas for recovery, emergency recovery points, and known threat locations. Integrated team tactics with supporting vehicle tactics.	Used some unit Standard Operating Procedures. Made minor deviations that marginally impacted mission accomplishment but not mission success.	Did not use or follow units Standard Operating Procedures. Made major deviations that significantly impacted mission success.
305	**Weapons/Munitions Employment**		
	Demonstrated thorough knowledge of weapons characteristics, capabilities,	Demonstrated limited knowledge of weapons characteristics, capabilities,	Demonstrated major discrepancies in knowledge and/or employment with

ID	Q	Q-	U
	and effects. Employed weapons in the correct manner, and in compliance with the Law of War and applicable Rules of Engagement. Considered aircraft and ground forces survivability. Understood the Law of War principles of military necessity, humanity, distinction, proportionality, and honor. Considered options to mitigate civilian harm. Understood risk-estimate distances.	and effects. Minor errors that did not preclude mission accomplishment, nor Law of War or Rules of Engagement violations. Did not impact mission or aircraft survivability.	significant impact on mission effectiveness. Did not understand risk-estimate distances, the Law of War principles (military necessity, humanity, distinction, proportionality, and honor), and exposed friendly forces to unacceptable risk. Failed to achieve desired results. Mission resulted in unwanted collateral damage and potential violation of the Law of War.
400	**OPERATIONAL EVENT**		
401	**Air Traffic Control**		
	Safely and effectively provided ATC service to fixed or rotary wing aircraft during multi- ship air and air-land operations in a live (or simulator) air traffic environment in accordance with Federal Aviation Administration (FAA) Order JO 7110.65AA, *Air Traffic Control*. Used proper phraseology, maintained situational awareness, maintained control and proper separation of all involved aircraft. Properly handled emergency situations (if applicable).	Safely provided ATC service to fixed or rotary wing aircraft during multi-ship air and air-land operations in a live (or simulator) air traffic environment in accordance with FAA Order JO 7110.65AA. Used few improper phraseology terms, temporary and minor loss of situational awareness, maintained control and proper separation of all involved aircraft. Properly handled emergency situations (if applicable).	Unsafely provided ATC service to fixed or rotary wing aircraft during multi-ship air and air-land operations in a live (or simulator) air traffic environment in accordance with FAA Order JO 7110.65AA Used unsafe number of improper phraseology terms, lost situational awareness, did not maintain control and/or separation of all involved aircraft. Improperly / dangerously handled emergency situations (if applicable).
402	**Austere Airfield Operations**		
	Safely and effectively conducted tactical airfield establishment, operations, and collapse in accordance with DAFMAN 13-217, *Drop Zone and Landing Zone Operations,* and local operating procedures pertinent to austere airfield	Conducted tactical airfield establishment, operations, and collapse in accordance with DAFMAN 13-217 and local operating procedures pertinent to austere airfield operations with only minor discrepancies.	Unsafely or ineffectively conducted tactical airfield establishment, operations, and collapse in accordance with DAFMAN 13-217 and local operating procedures pertinent to austere airfield operations with many and/or major

ID	Q	Q-	U
	operations.		discrepancies.
403	**Dive Supervisor**		
	Thoroughly aware of published dive related requirements, limitations, and emergency procedures. Demonstrated proper use of checklists, inspection of personnel, equipment in accordance with published directives. Considered all factors relating to personnel employment (e.g., available dive chamber, weather, dive bill, use of dive logs, search procedures, medical plan) Determined method and area to employ. Good communication to diver. Correct Dive Supervisor Personal Inspections (DSPIs). Demonstrated the knowledge and ability to closely monitor dive team, correctly determine diver emergency types and actions to be taken.	Aware of dive related requirements, limitations, and emergency procedures. Made non- critical errors in use of checklists, inspections (equipment/personnel). Omitted non-critical factors relating to personnel employment. Employment method had omissions or lacked efficiency. DSPIs had minor errors. Demonstrated limited knowledge and ability to closely monitor dive team, correctly determine diver emergency types and actions to be taken.	Lacked the knowledge of published dive related requirements, limitations, or emergency procedures. Failed to properly demonstrate the use of checklist, inspection of personnel, equipment, in accordance with published directives. Did not consider all factors relating to employment. Did not determine viable dive plan. Poor comms with diver. No profile map considered. Poor, unsafe, or no DSPIs. Failed to monitor the dive team. Incorrectly determined diver emergency types and actions to be taken.
404	**Electromagnetic Spectrum Operations (EMSO)**		
	Integrated with joint EMSO cell (JEMSOC) and conducted mission planning to incorporate given tactical problem with successful execution of Combatant Commander objective or intelligence requirement. Conducted EMSO activities to include Electronic Warfare and Offensive Cyber operations. Geo-locates, destroys, degrades, disrupts, deceives, detects, or exploits enemy personnel, facilities, or equipment. Conducted assessment,	Integrated with JEMSOC. Conducted EMSO planning, execution, or assessment with minor errors that did not impact mission success as defined by the CONOPS.	Fails to integrate with JEMSOC, or otherwise conducts EMSO planning, execution, or assessment with major errors that precluded mission success as defined by the CONOPS.

ID	Q	Q-	U
	including BDA, and reports as required according to CONOPS.		
405	**Evasion Plan of Action (EPA)**		
	Briefed and executed EPA appropriately per mission profile.	EPA deviated from, not well briefed.	EPA not executed as briefed or omitted.
406	**Extrication**		
	Operated tools correctly and effectively. Considered and prevented inadvertent release of stored energy (electrical, hydraulic, kinetic, or potential). Took appropriate measures to prevent injury to self or others.	Operated tools with some errors but did not jeopardize mission accomplishment. Considered but did not prevent inadvertent release of stored energy (electrical, hydraulic, kinetic, or potential). Took some action to prevent injury to self or others.	Unable to operate tools correctly. Damaged tools through misuse. Sudden, unplanned release of stored energy. Exposed self or others to potential injury.
407	**Fire Control Operations**		
	Coordinated timely fire support. Established effective airspace coordination and deconfliction measures for attack aircraft.	Followed some terminal area protocols. Slow to coordinate fire support. Incomplete deconfliction measures for attack aircraft that did not impact mission or aircraft survivability.	Did not follow terminal area protocols. Did not coordinate fire support. Did not recognize airspace congestion. Did not establish deconfliction measures for attack aircraft.
408	**Foreign Internal Defense (FID)**		
	Member demonstrated ability to successfully train and prepare foreign partner force. Demonstrated understanding of tactics, techniques, and procedures and standard operating procedures and effectively communicated them. Gauged partner force proficiency and adjusted as necessary. All operations were safe.	Minor deviations or deficiencies that did not detract from mission success or degrade safety.	Major lapses in judgement or procedure that resulted in mission failure or safety issues.
409	**Forward Arming and Refueling Point (FARP)**		
	Safely and effectively surveyed, established, operated, and retrograde a FARP utilizing guidance in	Surveyed, established, operated, and retrograded a FARP, with only minor discrepancies utilizing	Unsafely and/or ineffectively surveyed, established, operated, and retrograded a FARP, with

ID	Q	Q-	U
	AFI 11-235, *Specialized Refueling Operations*.	guidance in AFI 11-235.	several discrepancies in utilizing guidance in AFI 11-235.
410	**Identity Activities, Sensitive Site Exploitation (SSE)**		
	Understood and adhered to operational authorities per commander's guidance. Conducted functions and actions that appropriately recognize and differentiate one entity from another, to support decision making with focus on Anti-Access/Area Denial threats. Given a tactical problem, collected, processed, and exploited identity attributes and physical materials. Actions supported the identification, characterization, and tracking of threat actors, or access to critical infrastructure, key assets, and cultural properties.	Understood and adhered to operational authorities per commander's guidance. Conducted identity activities with minor errors that did not impact mission success, or actions fail to support identification, characterization or tracking of threat.	Did not understand or failed to adhere to operational authorities per commander's guidance. Conducted identity activities with major errors that precluded mission success, actions notionally risk adjacent missions, operations, campaigns, or strategic initiatives.
411	**Land Search Team Member**		
	Carried appropriate food, water, clothing, and signaling gear. Understood assigned tasks, objectives, communication plan, and emergency plan. Searched assigned area efficiently.	Did not have some important items. Uncertainty regarding assigned tasks, objectives, communication plan, and emergency plan. Inefficient use of time, tools, resources. Searched outside assigned area. Any or all above degraded but did not prevent mission accomplishment.	Does not have essential items. Does not know assigned tasks, objectives, communication plan, and emergency plan. Fails to record and report area searched or evidence found. Becomes lost to the point of requiring assistance from another search team.
412	**Long Range Precision Engagement Operations**		
	Accomplished four phases of the operation with no deficiencies: (1) pre-checks, rehearsals, and back-briefs, (2) insertion/infiltration, (3), hide site selection, construction, occupation, and	Accomplished four phases of the operation with minor deficiencies that did not hinder mission success. Demonstrated shooter and spotter proficiency and overcame injected	Neglected or unsatisfactorily completed any of the four phases. Failed to demonstrate shooter and spotter proficiency or failed to overcome injected

ID	Q	Q-	U
	shot execution, and (4) exfiltration/extraction. All phases may be notional, pending evaluator feasibility determination, except phase 1 and shot execution. Demonstrated tactical engagement proficiency as a shooter and spotter. Overcame evaluator-injected weapons and equipment malfunctions (e.g., forced to manually range targets). Effectively grouped, conducted alternate weapon fire, and defeated minimum number of presented targets within an allotted time and for an assigned field of fire.	malfunctions with minor errors that did not hinder mission success. Effectively grouped, conducted alternate weapon fire, and defeated minimum number of presented targets within an allotted time and for an assigned field of fire.	malfunctions. Failed to group, conduct alternate weapon fire, or defeat minimum number of presented targets within the allotted time. Recklessly engaged targets outside field of fire.
413	**LZ/DZ/HLZ Surveys**		
	Effectively surveyed LZ, DZ, and/or HLZ utilizing guidance in DAFMAN 13-217 with zero or very few errors, none of which were errors that did or would cause a safety issue(s).	Surveyed LZ, DZ, and/or HLZ utilizing guidance in DAFMAN 13- 217 with few errors, none of which were errors that did or would cause a safety issue(s).	Ineffectively surveyed LZ, DZ, and/or HLZ utilizing guidance in DAFMAN 13-217 with many errors, of which were errors that did or would cause a safety issue(s).
414	**Mass Casualty Incident**		
	Understood unit Mass Casualty Incident standard operating procedures. Establishes Casualty Collection Point (CCP) in appropriate location. Efficiently conducts search and triage without adverse distinction. Accurately recorded location and priority of patients. Minimized treatment outside of CCP. Treatment in CCP is rendered to do the greatest good for the greatest number. Patients evacuated in order that makes most efficient use	Required some explanation of unit Mass Casualty Incident standard operating procedures. Established CCP in problematic location. Slowly conducted search and triage without adverse distinction. Inaccurately Recorded location and priority of patients. Rendered more treatment than appropriate outside of CCP. Patient(s) in CCP received inappropriate level of care based on available resources. Patient(s) evacuated in order that makes less than optimal	Did not know unit Mass Casualty Incident Standard Operating Procedures. Did not establish CCP. Fails to conduct search and/or triage or conducts search and triage while discrimination against patients. Lost patient location or priority. Becomes inappropriately focused on a single patient outside CCP. Neglected or consumed excessive resources on patient in CCP. Patients evacuated in order that causes

ID	Q	Q-	U
	of resources while maintaining highest possible standard of care. Reported suspected or alleged Law of War violations (if applicable).	use of resources or results in unnecessarily decreased standard of care. Was aware of responsibility to report the Mass Casualty Incident if it is suspected or an alleged Law of War violation (if applicable).	significant waste of resources or places patient in serious jeopardy unnecessarily. Did not know of or mention the responsibility to report suspected or alleged Law of War violation (if applicable).
415	**Mission Support Site (MSS) Operations**		
	Identified potential MSS during mission planning. Appropriately established MSS at least one terrain feature away from objective (METT-TC dependent) in location that facilitates internal and external signal communications. Established security and supervises final preparation of operators, weapons, & equipment in the MSS. Facilitates transfer of intelligence to HHQ, and controls reconnaissance and surveillance elements into and out of the MSS. Conducted MSS breakdown and undetected exfiltration/extraction with 100% accountability of operators, weapons, and equipment.	Identified potential MSS during mission planning. Established MSS in a sub-optimal location despite availability of a more tactically sound option. Suboptimal MSS does not hinder communications or mission success. Established security and supervises final preparation of operators, weapons, & equipment in the MSS. Facilitates transfer of intelligence to HHQ, and controls reconnaissance and surveillance elements into and out of the MSS. Conducted MSS breakdown. was detected during exfiltration/extraction, but detection does not hinder mission success and maintains 100% accountability of operators, weapons, and equipment.	Failed to establish MSS or established MSS in an insufficient location despite availability of a tactically sound option. Insufficient MSS hinders communications or mission success. Failed to establish security and/or supervise final preparation of operators, weapons, or equipment in the MSS. Failed to facilitate transfer of intelligence HHQ, and/or failed to control reconnaissance and surveillance elements into and out of the MSS. Failed to conduct MSS breakdown, and/or was detected upon exfiltration/extraction, or conducts MSS breakdown with less than 100% accountability of operators, weapons, and equipment.
416	**Mountaineering Operations**		
	Effectively assessed current/approaching weather systems, anchor placement, surface conditions, route selection, and rope travel.	Assessed current/approaching weather systems, anchor placement, surface conditions, route selection, rope travel, but made marginal errors.	Ineffectively assessed current/approaching weather systems, anchor placement, surface conditions, route selection, and rope travel.
417	**Observation Post and Listening Post (OP/LP) Operations**		
	Identified potential OP/LP	Identified potential OP/LP	Failed to establish OP/LP

ID	Q	Q-	U
	during mission planning. Conducted leader's recon during execution and briefs remainder of team. Selected proper patrolling technique and route for approach to OP/LP. Constructs appropriate camouflage, hide sites, security measures, defensive measures, equipment requirements, and hasty site / blow-out procedures and mechanisms. Establishes and maintains communications with MSS. Executed OP/LP mission according to requirements. Conducted OP/LP breakdown and undetected exfiltration/extraction according to plan, or conducts hasty- site/blow-out procedures, with 100% accountability of operators, weapons, and equipment.	during mission planning. Conducted leader's recon during execution and briefs remainder of team. Selected proper patrolling technique and route for approach to OP/LP. Constructed appropriate camouflage, hide sites, security measures, defensive measures, equipment requirements, and hasty site / blow-out procedures and mechanisms. Established and maintains communications with MSS. Executed OP/LP mission according to requirements with minor deficiencies that do not hinder mission success. Conducted OP/LP breakdown. Was detected during exfiltration/ extraction, but detection does not hinder mission success and maintains 100% accountability of operators, weapons, and equipment.	or established OP/LP in an insufficient location despite availability of a tactically sound option. Insufficient OP/LP hinders communications or mission requirements. Failed to conduct leader's recon and/or fails to brief remainder of team. Did not construct appropriate camouflage, hide sites, security measures, defensive measures, equipment requirements, and hasty site / blow-out procedures and mechanisms. Failed to establish or maintain communications with MSS. Failed to execute OP/LP mission, according to requirements. Failed to conduct OP/LP breakdown, and/or was detected upon exfiltration/extraction, or conducts OP/LP breakdown with less than 100% accountability of operators, weapons, and equipment.
418	**Operational Preparation of the Environment (OPE)**		
	Integrated with joint operational support activities or sensitive activities cells and conducts mission planning to incorporate given tactical problem with successful execution of Combatant Commander objective or intelligence requirements/ Commander's Critical Information Requirements (CCIRs). Conducted OPE activities to	Integrated with joint operational support activities or sensitive activities cells. Applied improper or inappropriate OPE technique(s) for required mission & activity, or omitted an appropriate technique, which marginally impacted mission but did not inhibit mission success.	Failed to integrate with joint operational support activities or sensitive activities cells. Misunderstood CCIR or required OPE mission & activity. Applied improper or inappropriate OPE technique(s) for required mission & activity, or omitted an appropriate method, which precluded mission success. Actioned

ID	Q	Q-	U
	set conditions for mission execution. CCIR dependent: developed knowledge of the operational environment; establishes human, physical, or virtual infrastructure; conducted target development. METT-TC dependent: executed active and passive observation; area and network familiarization; site surveys; mapping the information environment. Selected appropriate techniques for mission and activity.		notionally risk adjacent missions, operations, campaigns, or strategic initiatives.
419	**Small Unmanned Aircraft Systems Operations (sUAS)**		
	Incorporated flight planning into CONOPS and mission planning and aligns with commander approved concept of employment (CONEMP). Conducted takeoff/launch, mission, and landing according to demonstrated systems knowledge, applicable airspace rules/procedures, and mission requirements. All phases may be notional, pending evaluator feasibility determination, except flight planning, mission planning, and demonstrated system knowledge, and demonstrated knowledge of applicable airspace rules/procedures. At minimum, adhered to all requirements within DAFMAN 11-501, *Small Unmanned Aircraft Systems Management;* and DAFMAN 11-502*, Group(s) 1 and 2 Small Unmanned Aircraft*	Incorporated flight planning into CONOPS and mission planning with minor deficiencies that do not hinder mission success and aligns with commander approved CONEMP. Conducted takeoff/launch, mission, and landing according to demonstrated systems knowledge, applicable airspace rules/procedures, and mission requirements with minor deficiencies that do not hinder mission success. Adhered to all requirements within DAFMAN 11-501 and DAFMAN 11-502.	Failed to incorporate flight planning into CONOPS and mission planning, and/or failed to align with CONEMP. Failed to conduct takeoff/launch, mission, and landing according to demonstrated systems knowledge, applicable airspace rules/procedures, and/or mission requirements. Failed to adhere to DAFMAN 11-501 and DAFMAN 11-502.

ID	Q	Q-	U
	Systems.		
420	**Special Reconnaissance (SR) Operations**		
	Accomplished all phases of an SR mission (planning, pre-checks /rehearsals, insertion/infiltration, mission execution, exfiltration /extraction). Insertion / infiltration and exfiltration/extraction phases may be notional, pending evaluator feasibility determination. Achieved target acquisition and/or specific data collection. At minimum, SR Operations will adhere to task, condition, and standards (TCS), and periodicity per the SR Critical Task List (CTL) found in USSOCOM M 350-18.	Accomplished all phases of an SR mission (planning, pre-checks/rehearsals, insertion/infiltration, mission execution, and exfiltration / extraction) with minor deficiencies which did not hinder mission success (achieved target acquisition and/or specific data collection). Adhered to TCS per CTL of USSOCOM M 350-18 with minor deviations which did not hinder mission success.	Failed to accomplish all phases of an SR mission (feasible portions only). Committed deficiencies which hindered mission success (did not achieve target acquisition and/or specific data collection. Failed to adhere to TCS per CTL of USSOCOM M 350-18. Committed major deviations which hindered mission success.
421	**Surveillance Operations**		
	Accomplished all phases of a surveillance mission (planning, prechecks/rehearsals, insertion/infiltration, mission execution, and exfiltration/extraction). Insertion/infiltration and exfiltration/extraction phases may be notional, pending evaluator feasibility determination. Adequately organized surveillance sectors and employed appropriate viewing techniques and fixed site equipment. Demonstrated superior knowledge of detection vulnerabilities and mitigated appropriately. Conducted surveillance in accordance with mission	Accomplished all phases of a surveillance mission (planning, pre-checks/rehearsals, insertion/infiltration, mission execution, exfiltration/ extraction) with minor deficiencies which did not hinder mission success. Organized surveillance sectors and employed appropriate viewing techniques and fixed site equipment with minor errors that did not hinder mission success. Demonstrated adequate knowledge of detection vulnerabilities and mitigated appropriately. Conducted surveillance in accordance with mission parameters and target	Failed to accomplish all phases of a surveillance mission (planning, pre-checks/rehearsals, insertion/infiltration, mission execution, exfiltration/ extraction). Poorly organized surveillance sectors, and/or employed inappropriate viewing techniques and fixed site equipment with major errors which hindered mission success. Failed to demonstrate adequate knowledge of detection vulnerabilities, and/or failed to mitigate vulnerabilities. Failed to conduct surveillance in accordance with mission parameters and/or target

ID	Q	Q-	U
	parameters and target opportunities. Departed area undetected, leaving no sign of presence. Employed appropriate counter-tracking techniques upon departure.	opportunities. Departed area undetected, leaving small signs of presence which did were not identifiable. Employed appropriate counter-tracking techniques upon departure with minor deficiencies which did not hinder mission success.	opportunities. Detected upon departure, and/or left large and identifiable signs of presence. Failed to employ counter-tracking techniques or employed with major deficiencies which hindered mission success.
422	**Swiftwater Operations**		
	Established safety zone, sets up spotters, supervises system setup, rope management, patient care.	Established safety zone, sets up spotters, supervises system setup, rope management, patient care. Committed errors or omissions that did not jeopardize mission accomplishment.	Failed to establish safety zone, set up spotters, and supervise system setup, rope management or patient care. Committed errors that jeopardized mission accomplishment.
423	**Tactical Combat Casualty Care (TCCC)**		
	Performed the correct intervention at the correct time in the continuum of field care by managing the three distinct casualty management phases during the combat mission: 1. Providing care under fire 2. Tactical field care 3. Combat casualty evacuation as needed.	Did not perform the correct intervention at the appropriate time but the intervention did not lead to further casualties.	Performed the wrong intervention at the incorrect time in the continuum of field care that reduced the standard of care of the survivor and led to further casualties.
424	**Technical Rescue/Rigger Operations**		
	Conducted a light/fast technical response, signals (voice/ whistle/hand) correctly, establishes safe, roped rescue/access/traverse system for the intended operation. Demonstrated proper rope management. Correctly packaged patient. Passed three tests of a safe system (white board, critical points, and whistle).	Did not adequately conduct a light/fast technical response. Signals, rescue/access/ traverse system and rope management demonstrated with few errors. Packaged patient. Passed three tests of safe with minor deviations.	Did not past three tests. Could not conduct light/fast technical response. Unfamiliar with rescue/access/traverse system and rope management. Rescue system inadequate for slope.
425	**Underwater Search Team Member**		
	Clearly understanded arc,	Required explanation of	Cannot execute search

ID	Q	Q-	U
	walking shoreline, jack stand search patterns. Communicated effectively between diver and line tender. Maintains taught search lines. Accurately marked locations of found evidence. Executed search efficiently.	patterns prior to search. Inaccurately marked locations of found evidence. Area searched not accurately recorded. Executed search inefficiently.	patterns due to lack of understanding. Lost / cannot relocate found evidence. Did not record area searched. Area must be re-searched due to poor searcher skills.
426	**Water Surface Search Team Member**		
	Displayed a clear understanding of creeping line, sector, expanding square search patterns. Accurately recorded area searched using GPS. Executed search efficiently.	Required explanation of patterns prior to search. Area searched not accurately recorded. Executed search inefficiently.	Cannot execute search patterns due to lack of understanding. Did not record area searched. Area must be re-searched due to poor searcher skills.
427	**Survivor Contact and Handling**		
	Team controlled survivor. Contact procedures were accurately followed. Considered stealth walking procedures. Appropriate use of force to control survivor.	Team had limited control of survivor. Some contact procedures followed. Too much or too little use of force to control survivor.	Survivor controlled the situation not team. Contact procedures were not followed.
428	**Medical Assessment/Treatment/Packaging**		
	Patient assessed, treated, and packaged correctly and efficiently utilizing guidance in *Pararescue Medical Operations Handbook*.	Patient assessed, treated, and packaged with minor, non-detrimental deviations to procedures in *Pararescue Medical Operations Handbook*. Non-life, limb, or eyesight threats missed or address inefficiently. Patient packaging did not consider patient comfort (METT-TC), but patient was secure.	Life, limb, or eyesight threats missed or address inefficiently. Patient packaging did not adequately secure the patient or otherwise threatened patient survivability.
500	**EXFILTRATION/EXTRACTION**		
501	**Enroute – Exfiltration**		
	Coordinated follow-on actions with proper entity for higher care / reintegration / detainment / exploitation / debrief.	Same as "Q", except for minor deviations which did not interfere with safe mission accomplishment or unnecessarily aggravate the survivor's condition.	Follow-on considerations not addressed or made unnecessary decisions adversely affecting patients or mission assets.
502	**Fast Rope Insertions/Extraction System**		

ID	Q	Q-	U
	Closely monitored aircraft path and position correctly rigging extraction loops in a smooth, controlled, safe manner. Rigged according to even or odd number of operators. Used hand/arm signals as needed.	Aware of aircraft and position but needed unusual amount of time to rig extraction loops. Hand/arm signals had minor errors.	Unable to recover to aircraft because improperly rigged to extraction loops in a careless, uncontrolled manner. Not rigged according to even or odd number of operators. No hand/arm signals used. Did not face in the direction of the traveling helicopter once rigged. Connection of ropes crossed and tangled.
503	**(H)LZ Operations**		
	Operator identified effective (H)LZ allowing smooth unobstructed operations in the terminal area by supporting vehicle.	Operator identified less than optimum (H)LZ. Terminal area operations by supporting vehicle hampered by (H)LZ selection or identification.	Operator did not identify the (H)LZ. Supporting vehicle unable to operate in terminal area of selected (H)LZ. Unable to demonstrate (H)LZ general knowledge.
504	**Hoist**		
	Successful hoist recovery. Understood and operated within the capabilities and limitations of the hoist. Correctly followed emergency procedures. Cable slack held to a minimum.	Successful hoist recovery with some deviations. Incomplete understanding of capabilities and limitation of the hoist.	Unsuccessful hoist recovery. Clearly lacked understanding of critical capabilities and limitations of hoist. Excessive cable slack. Exceeded maximum load, cable shear, limitations. Incorrect general control or function procedures.
505	**Maritime – Boat Raise to Large Vessel**		
	Operator coordinated clear recovery plan with vessel. Conducted lift from leeward side of recovery ship. Wore helmet, flotation, lighting (night). Utilized bow painter. Avoided being directly under ship's shackle. Did not raise Combat Rubber Raiding Craft (CRRC) with personnel aboard.	Marginal coordination with vessel creating a plan with few errors. Confusion between vessel and CRRC creates some delays.	Did not coordinate with vessel. Attempted lift on windward side in rough seas. Did not wear helmet, flotation, lighting (night). Did not use bow painter. Did not attempt to avoid being directly under shackle. Raised CRRC with personnel aboard.
506	**Maritime – Small Boat Underway to Helicopter**		
	Operator coordinated clear	Incomplete recovery plan	Did not coordinate with

ID	Q	Q-	U
	recovery plan with helicopter. Maintained CRRC underway into the wind at appropriate speed. Prepared survivors / team members for hoist prior to arrival of rotor wash. Maintained stable CRRC to maximum extent possible during hoist. Hoisting executed efficiently without serious entanglement or excessive pendulum caused by CRRC occupants.	resulted in confusion and delays between helicopter and CRRC. CRRC varies direction and speed unnecessarily. Operator/survivor/team member not ready for rotor wash arrival.	helicopter prior to commencing hoist. Deliberately attempted hoist with CRRC dead in the water. Did not consider wind / wave direction. Serious entanglement caused by CRRC occupants.
507	**Medical Transportation**		
	Moved patients under medical supervision to and between medical treatment facilities by air transportation accurately and timely assessing all transportation options. Coordinated local air/ground transportation.	Moved patients under medical supervision to and between medical treatment facilities by air transportation assessing some transportation options. Coordinated local air/ground transportation. Committed errors of omissions that did may have hampered but did not prevent mission accomplishment.	Movement of patients was NOT under medical supervision nor to adequate level of care by air/ground transportation in an accurate and timely manner. Committed errors which prevented mission accomplishment.
508	**Recovery Vehicle (RV) Integration**		
	Coordinated RV Exfiltration/Extraction. Effectively communicated terminal area game plan, Threat/Location/Condition, and load plan to RV.	Coordinated RV Exfiltration/Extraction. Committed errors of omissions that degraded RVs understanding of terminal area plan, caused delays in the terminal area, or increased Risk to Force and Risk to Mission.	Did not coordinate RV for Exfiltration/Extraction. Terminal area coordination put RV in high threat area or at extreme Risk to Force.
509	**Reintegration Phase 1**		
	Cared for returnee's immediate needs, followed proper reintegration checklist to ensure proper procedure, provided oversight for or accomplished SERE debrief. Addressed needs for further care or Phase 2+ considerations. **Note:** May		Did not care for returnee's immediate needs. Did not follow checklist or guidance. SERE debrief not accomplished.

ID	Q	Q-	U
	be a tabletop discussion, particularly if the scenario did not have a returnee.		
510	**Rope Ladder**		
	Thorough understood of all rope ladder responsibilities and requirements. Understood the capability of aircraft used. Effectively climbed ladder in smooth, controlled, safe manner. Demonstrated hand and arm signals as needed.	Some understanding of rope ladder requirements. Marginal inspection, maintenance and rigging of equipment. Hand and arm signals had minor errors.	No understanding of rope ladder responsibilities or requirements. Does not understand the capability of aircraft used. Demonstrates improper inspection, maintenance, or rigging of equipment. Demonstrates poor aircraft inspection. Did not climb rope. Did not know hand and arm signals.
511	**Short Haul**		
	Operator efficiently and effectively managed rope utilizing optimum knots, correct orientation, and correct hardware. Operator managed rope without excessive slack. Operator attached to rope correctly. Executed correct hand/arm signals.	Operator effectively managed rope but with less than optimum knots, orientation, or hardware. Operator needed unusual amount of to manage rope. Marginal use of hand/arm signals.	Operator did not effectively manage rope. Operator did not use correct knots, orientation, or hardware. Operator did not attach to rope correctly. Executed incorrect hand/arm signals.
512	**Stokes with Barrelman**		
	Operator positively controlled patient at all times. Operator established optimum height to control the patient. Correctly checked pins or carabineers. Correctly followed entry protocols and safety procedures. If the patient is incapacitated, maneuvered patient to enter the cabin first. Executed correct hand/arm signals.	Operator controlled patient with some deviations. Operator established marginal height to control patient. Marginal use of hand/arm signals.	Operator did not adequately control patient. Operator established incorrect height to control patient. Did not check pins or carabineers. Did not follow safety procedures. Unable to correctly maneuver patient into cabin. Executed incorrect hand/arm signals. Critical signal: “ready to be picked up.”
513	**Supporting Vehicle**		
	Operator effectively interoperated with Supporting Vehicle. Operator understood the capabilities, limitations and procedures of fixed wing, rotary	Operator had degraded interoperation with vehicle due to limited understanding of vehicle’s capabilities, limitations, and procedures.	Operator unable to interoperate with vehicle without significant degradation. Operator used incorrect supporting

ID	Q	Q-	U
	wing, maritime, or ground vehicles as applicable to the scenario. Properly boarded the vehicle. Operator communicated to vehicle extraction site location, ingress/egress routes, and pertinent situational information.	Limited communication with vehicle.	vehicle capabilities, limitations, and procedures to plan or execute recovery. Operator did not communicate to vehicle.
514	**Tactical Vehicle Operations**		
	Effectively cross-loaded equipment and personnel to allow redundant capabilities across the convoy. Successfully navigated route and passed accurate and timely execution checklist calls. Performed contingency maneuvers correctly. Maintained security during movement and at stops.	Minor deviations or discrepancies from standard operating procedures that did not result in mission failure or compromise of safety.	Actions resulted in mission failure or an avoidable compromise of safety.
515	**Transload Operations**		
	Operator planned and executed effective, efficient transload operations. Plan specifically addressed: number of patients, passengers, cargo carried; any special requirements, aircraft configuration, medical conditions, and ground security. Executed correct hand/arm signals.	Operator executed transload operations. Transload plan did not contain sufficient detail to prevent confusion. Marginal use of hand/arm signals.	Operator did not plan transload operations. Transload operations significantly degraded. Operator did not relay number of casualties by triage category: immediate, delayed, minimal, and expectant. Neglected survivor's injuries, to include mechanism of injury, stable or unstable, and treatment performed while transloading. Ground security not assessed. Executed incorrect hand/arm signals.
600	**POST OPERATION**		
601	**Debrief**		
	Debriefed mission using specific, non-threatening positive and negative feedback of team and individual performance.	Debriefed mission without specific, non-threatening positive and negative feedback on individual and team performance. Did not	No team debrief. Sequence was disorganized and illogical. Did not use training aids. Presentation created doubts or confusion

ID	Q	Q-	U
	Provided specific ways to correct errors. Asked for inputs from others. Re-capped key points and compared mission results with mission objectives.	consistently seek input from others. Incomplete or inadequate re-cap of key points and comparison of mission results to mission objectives.	and omitted major events. Did not use approved debriefings. Did not provide non-threatening positive and negative feedback during debriefing. Did not seek input from others. Did not re-cap key mission points nor compare mission results to mission objectives.
602	**After Action Procedures and Reporting**		
	All reports and paperwork completed: consolidated mission report, after action reports, patient care reports, and other mission essential documents. (Training documentation filed with ARTEMIS, etc.)	Minor errors or omissions in reports and/or training documentation.	Reports and paperwork not filed or filed with major errors or omissions.
603	**Reconstitution**		
	All team and personal equipment were cleaned and returned to mission status. All water gear was rinsed and hung to dry.	Some personal or non-essential team equipment was overlooked, which would not result in a follow-on mission failure.	Any mission essential team gear was not returned to mission ready status, which would result in follow on mission failure
604	**Reintegration (Phase 2)**		
	Ensured no more than 4 hours per day individual debriefings. Group decompression and personal prep time honored Continued medical care as needed. Continuation Phase II Debriefing/Decompression Begin Group debriefing. Continue group decompression and personal prep time. Continue medical care as needed.	Minor omissions or errors not affecting outcome of reintegration or well-being of returnee.	Did not follow decompression protocol. Did not continue the reintegration process. Did not provide on scene management.

Attachment 5

INSTRUCTOR EVALUATION CRITERIA

A5.1. Instructor Evaluations. INSTR evaluations will meet the minimum requirements in **Table A5.1**. **(T-2) Note:** AETC formal instructor and AFMAN 10-3505V2 JTAC-I evaluations may be used in place of these requirements.

Table A5.1. Instructor Evaluation Grading Areas.

ID	AREA	INSTR
900	Instructional Ability	R
901	Instructor Knowledge	R
902	Briefings / Debriefings	R
903	Demonstration of Tasks	R
904	Open Book Test	R

Table A5.2. Instructor Evaluation Criteria.

AREA	Q	Q-	U
900. Instructional Ability	Demonstrated excellent instructor/evaluator ability. Clearly defined all mission requirements and any required additional training/corrective action. Instruction was accurate, effective, and timely. Was always completely aware of task/mission situation.	Problems in communication or analysis degraded effectiveness of instruction.	Demonstrated inadequate ability to instruct. Unable to perform, teach or assess techniques, procedures, systems use or tactics. Did not always remain aware of task/mission situation.
901. Instructor Knowledge	Demonstrated in-depth knowledge of procedures, requirements, equipment systems/performance characteristics, mission, and tactics beyond that expected of non-instructors. Demonstrates through knowledge of governing guidance.	Deficiencies in depth of knowledge, comprehension of procedures, requirements, equipment systems/ performance characteristics, mission, tactics, or governing guidance.	Unfamiliar with procedures, requirements, equipment systems/ performance characteristics, mission, tactics, or governing guidance. Lack of knowledge in certain areas seriously detracted from instructor effectiveness.

AREA	Q	Q-	U
902. Briefings / Debriefings	Presented a comprehensive, instructional briefing/debriefing which encompassed all mission tasks. Made excellent use of training aids. Excellent analysis of all tasks/maneuvers. Clearly defined objectives. Gave positive and negative performance feedback at appropriate times—feedback was specific, objective, based on observable behavior, and given constructively. Re-capped key points/compared mission's results with objectives. When appropriate, took the initiative and time to share operational knowledge and experience.	Minor errors or omissions in briefing/debriefing or mission critique. Occasionally unclear in analysis of tasks or maneuvers. Some feedback given but was not always given at appropriate times and not always a positive learning experience for the entire formation. Debrief covered the mission highlights but was not specific enough.	Major errors or omissions in briefing/debriefing. Analysis of tasks or maneuvers was incomplete, inaccurate, or confusing. Did not use training aids/reference material effectively. Briefing/debriefing below the caliber of that expected of instructors. Failed to define mission objectives. Feedback not given or given poorly. Attempted to hide mistakes. Elected not to conduct flight debrief.
903. Demonstration of Tasks	Performed required tasks within accepted norms in accordance with current guidance. Provided concise, meaningful in-event commentary. Demonstrated excellent instructor proficiency.	Performed required tasks with minor deviations from accepted norms. In-event commentary was sometimes unclear.	Was unable to properly perform required tasks. Made major procedural errors. Did not provide in-event commentary. Demonstrated below average instructor proficiency.
904. Open Book Test	Correctly and efficiently located information in references that the instructor would not be expected to have memorized.	Struggled to locate information in references.	Failed to locate information in references.

Attachment 6

EVALUATOR UPGRADE

Table A6.1. Minimum Requirements for AFSPECWAR Evaluator Upgrade Training Plan.

Classroom Training
Complete an evaluator academic course that provides: Stan/Eval Upgrade Procedures, Stan/Eval Organization, Stan/Eval Duties and Responsibilities, Stan/Eval Governing Publications, AFSPECWAR MSN Evaluations Scenario Development, Go/No-Go Procedures, Publications Open-book Test, Conduct of Ground Phase Evaluation, Conduct of Employment Phase AFSPECWAR Evaluation, Conduct of Employment Phase AFSPECWAR Instructor Evaluation, Conduct of Employment Phase evaluator SPOT Evaluation, Failure and Additional Training Procedures, Evaluation Documentation, and AFSPECWAR Training and Evaluation Record Review.
Understand AFSPECWAR and aircrew references per flight/ground safety standards and governing supplements/instructions.
Task Training
Manage development of two complete AFSPECWAR MSN evaluation scenarios, ensuring all mandatory evaluation requirements are considered.
Full Mission Profile Event #1: Observe a certified evaluator providing evaluation to an AFSPECWAR operator during an AFSPECWAR MSN evaluation from notification of evaluation through evaluation form debrief.
Full Mission Profile Event #2: Conduct a mock AFSPECWAR MSN evaluation, from tactical scenario development through evaluation debrief and evaluation form completion.

Attachment 7

AFSPECWAR EVALUATOR OBJECTIVITY EVALUATION GRADING CRITERIA

A7.1. Instructions. The following grading criteria will be used by evaluators when conducting AFSPECWAR evaluator objectivity SPOT evaluations.

Table A7.1. AFSPECWAR Evaluator Objectivity SPOT Evaluations.

AREA	Q	Q-	U
1100. Evaluator Performance	Evaluator performed as briefed and contributed to a thorough evaluation of the examinee.	Committed minor errors which did not detract from the examinee's performance.	Committed major errors disrupting the examinee's performance or preventing a thorough evaluation.
1101. Evaluator Compliance with Stan/Eval Directives	Complied with all directives pertaining to the administration of an AFSPECWAR evaluation.	Complied with most directives. Deviations did not jeopardize the effectiveness of the evaluation or safety.	Failed to comply with directives or allowed safety to be jeopardized.
1102. Review of Examinee's Currency and Eligibility for Evaluation	Evaluator reviewed examinee's currency and eligibility for evaluation and made appropriate decisions.	Evaluator reviewed examinee's currency and eligibility for evaluation and failed to make appropriate decisions that did not affect the validity of the evaluation.	Evaluator failed to review the examinee's currency and eligibility for evaluation or did not make appropriate decisions that affected the validity of the evaluation.
1103. Examiner's Briefing	Evaluator thoroughly briefed the examinee on the conduct of the evaluation, mission requirements, responsibilities, grading criteria, and evaluator actions/position during the evaluation.	Items were omitted during the briefing causing minor confusion. Did not fully brief the examinee as to the conduct and purpose of the evaluation.	Evaluator failed to adequately brief the examinee.
1104. Evaluation Scenario Management	The evaluation scenario was effective and efficient maximizing the resources and time available, covering all required areas.	The evaluation scenario was not well thought-out or was implemented inefficiently/poorly and detracted from the overall evaluation.	The evaluation scenario and management of accomplishing the required graded areas was poorly planned and/or executed and significantly affected the validity of the

AREA	Q	Q-	U
			evaluation.
1105. Evaluation Duration	The evaluation duration was of appropriate length to effectively measure the qualification of the examinee.	The evaluation ran long or was cut short due to lack of organization or preparedness by the evaluator but did not significantly affect the quality of the evaluation.	The duration of the evaluation was too long and significantly contributed to an unfair and unrealistic level of fatigue in the examinee. Or the evaluation was too short to effectively cover a realistic mission scenario.
1106. Assessment of Examinee's General Knowledge	The evaluator presented a fair amount of appropriately challenging general knowledge questions during suitable moments or periods of the evaluation.	The amount or difficulty of the evaluator's general knowledge questions were unfairly difficult or not challenging enough but did not significantly detract from the overall quality of the evaluation.	The evaluator did not assess the examinee's general knowledge, or the questions asked included incorrect information or were irrelevant to the evaluation.
1107. Identification of Discrepancies	Identified all discrepancies.	All critical discrepancies and most non-critical/minor discrepancies were identified.	Failed to identify discrepancies related to flight discipline or deviations which merited an unqualified grade.
1108. Evaluator's Subjective Assessment of Graded Areas	The subjective assessment of graded area performance, not specifically covered by AFI, AFMAN, or T.O. standards, or requiring subjective interpretation, was fair and consistent with general	The subjective assessment of graded areas was either more strict or more lenient than generally accepted AFSPECWAR principles but did not significantly affect the	The subjective assessment of graded areas was significantly more strict or lenient than generally accepted AFSPECWAR principles and does not give the commander an accurate representation

AREA	Q	Q-	U
	AFSPECWAR principles.	validity of the evaluation.	of the qualification of the examinee.
1109. Evaluator's Objective Assessment of Graded Areas	Evaluator's assessment of objective graded areas governed by T.O.s or AFIs, or AFMANs were accurately assessed.	Graded areas governed by T.O.s or AFIs, or AFMANs that require objective assessment were misassigned Q grades which should have been Q- or were assigned Q- grades for performance within Q standards.	Graded areas governed by T.O.s or AFIs, or AFMANs that require objective assessment were misassigned Q or Q- grades which should have been U or were assigned U grades for performance within Q or Q- standards.
1110. Assessment of Examinee Qualification Level	Assigned the appropriate qualification level based on the examinee's performance.	Awarded a qualification level without proper consideration of cumulative deviations in the examinee's performance.	Did not assign a qualification level commensurate with the examinee's overall performance.
1111. Appropriate Assignment of Additional Training	Assigned proper additional training if warranted.	Additional training assigned was insufficient to ensure the examinee would achieve proper level of qualification.	Failed to assign additional training when warranted.
1112. Evaluation Debrief & Mission Critique	Thoroughly debriefed the examinee on all aspects of the evaluation. Debriefed all key mission events, providing instruction and references as required.	Failed to discuss all deviations and assigned grades. Did not advise the examinee of additional training, if required. Failed to debrief or adequately reconstruct all key mission events.	Did not discuss any assigned area grades or the overall rating. Changed grades without briefing the examinee. Did not debrief mission at all. Debriefed few or no key mission events.
1113. Evaluation Documentation	Correctly completed all required documentation.	Minor errors in documentation which did not affect the validity of the evaluation.	Failed to complete all required documentation. Major errors caused the validity of the evaluation to be questioned.

AREA	Q	Q-	U
1114. Evaluator Professionalism	The evaluator's tone and conduct during the evaluation reflected the serious nature of the evaluation program and exemplified the utmost professionalism.	The evaluator displayed minor lapses in professionalism that did not detract from the serious nature of the evaluation program.	The evaluation was not conducted in a professional manner.
