Pages: 20

MEMORANDUM FOR SECURITY FORCES (SF) OFFICERS

FROM: 31P CAREER FIELD MANAGER (CFM)

SUBJECT: 31P Officer Professional Development (OPD)

PURPOSE: Develop SF Officers into effective Squadron Commanders, Defense Force Commanders, Joint Protection Leaders, and Air Force leaders.

DEVELOPMENT OBJECTIVES:

Develop SF officers' competencies in commanding squadrons, leading base defense, and synchronizing joint protection across all levels.

Prepare SF officers for effective command and future leadership roles.

Communicate OPD goals and objectives to Commanders and Supervisors to enable targeted feedback and deliberate development of all SF officers.

Support the Air Force mission to fly, fight, and win – airpower anytime, anywhere.

We are committed to developing expert, resilient SF professionals capable of delivering decisive results for the Air Force and our Joint and coalition partners. This commitment includes a defined career path, consistent mentoring, and focused development of the specialized skills and aptitude required for mission success in all environments.

Company Grade Officers (CGOs) will gain diverse experience serving in roles such as Flight Commander, Operations Officer, Staff Officer, and Squadron Commander, building a strong foundation and deep understanding of the Security Forces career field.

Nuclear Experience: Every Active Duty (AD) SF officer will gain nuclear security experience within their first three assignments. This experience provides CGOs with critical leadership experience and deliberate development essential for future success.

Flight Commander: Flight Commanders lead Airmen in protecting nuclear and conventional weapons and other critical resources. This role provides essential introductory leadership experience and familiarization with core SF duties, including base defense, force protection, and resource security.

Operations Officer: Operations Officer experience is critical for SF officer development. This role provides firsthand knowledge of daily squadron management, contingency operations support, and opportunities to collaborate with mission partners. It furthers the group/wing mission while developing leadership skills essential for command.

CAREER BROADENING: The Air Force defines career broadening as formal programs developing member skills, knowledge, and abilities. These valuable OPD experiences should be

considered after officers gain sufficient tactical-level experience within the SF career field.

Command: The CFM and Development Team (DT) determine year groups eligible for command. Command allows SF officers to apply their experience. Prerequisites for Squadron Command include completing the Basic Officer Course (BOC), Antiterrorism Level II (AT Level II), Integrated Defense Command and Control Course (IDC3), and the Security Forces First Time Commanders Course (SF FTCC).

Staff Experience: While staff opportunities exist at all levels, Field Grade Officers (FGOs) seeking strategic-level development should pursue positions at the Office of the Secretary of Defense (OSD), Joint Staff, Headquarters Air Force (HAF), Major Command (MAJCOM), Air Force Installation and Mission Support Center (AFIMSC), Air Force Security Forces Center (AFSFC), AFIMSC Detachments, Combatant Command (CCMD), North Atlantic Treaty Organization (NATO), or Service Component Command (SCC).

DEVELOPMENTAL EDUCATION (DE):

Core Training Opportunities: SF Officers can take several developmental courses. Optional courses are listed in Appendix B.

Intermediate Developmental Education/Senior Developmental Education (IDE/SDE): The Central Professional Military Education (PME) Board selects eligible officers to attend in-resident DE. For more information, refer to the "Officer Developmental Education and Special Programs" page on MyFSS.

The Air Force relies on us to protect its bases, assets, and people. Our Airmen rely on us to provide the leadership they need and deserve. Providing the right tools and experiences for full-spectrum contingency leadership is paramount. Senior leaders review these fundamental principles annually at the DT and welcome your input.

JASON W. MEDSGER, Colonel, USAF
31P CFM

CAREER FIELD EDUCATION AND TRAINING PLAN
SECURITY FORCES OFFICER
AFSC 31PX

PART I

PREFACE

This publication implements Department of the Air Force Instruction (DAFI) 36-2689, *Training Program.* This CFETP is a comprehensive education and training document that identifies life-cycle education and training requirements, training support resources, and minimum requirements for this specialty. The CFETP will provide personnel a clear career path to success and will instill rigor in all aspects of career field training.

The CFETP consists of two parts. Supervisors plan, manage, and control training within the specialty using both parts of the plan.

Part I provides information necessary for overall management of the specialty. Section A explains how everyone will use the plan; Section B identifies career field progression information, duties and responsibilities, training strategies, and career path; Section C associates each level with specialty qualifications (knowledge, education, training, experience, and other mandatory requirements); and Section D indicates resource constraints. Some examples are funds, manpower, equipment, and facilities.

Part II includes the following: Section A identifies the 31P Specialty Training Standards (STS) required to achieve each level of the Air Force Specialty Code (AFSC); Section B identifies the training course index supervisors can use to determine resources required to support training; Section C identifies available support materials; and Section D identifies MAJCOM unique training requirements. At the unit level, supervisors and trainers will use Part II to identify, plan, and conduct training commensurate with the overall goals of this plan.

Using guidance provided in the CFETP will ensure individuals in this specialty receive effective and efficient training at the appropriate points in their career. This plan will enable us to train today's officers to operate in the dynamic battlespace of tomorrow effectively. Component (AD, Reserve, Air National Guard) 31P Career Field Managers hold waiver authority for requirements set forth in this document through coordination with AF/A4SF. Process waivers in accordance with (IAW) Department of the Air Force Manual (DAFMAN) 36-2100, *Military Utilization and Classification*.

ABBREVIATIONS/TERMS EXPLAINED

Air Force Specialty Code (AFSC). An alphanumeric code used by the Air Force to identify an Air Force Specialty (AFS).

Career Field Education and Training Plan (CFETP). A comprehensive, multipurpose document encapsulating the entire spectrum of education and training for a career field. It outlines a logical growth path, including training resources, eliminates duplication and makes training identifiable and budget defensible.

Career Field Manager (CFM). Individuals appointed by their respective HAF Deputy Chief of Staff or Director to ensure development, implementation and maintenance of CFETP for their assigned Air Force specialties.

Core Task. Required by AFS functional managers as minimum qualification within an AFS or duty position.

Exportable Training. Supplemental training; via computer assisted, paper text, interactive video or other means.

Field Manual (FM). United States Army (USA) publication used to define key training requirements for certain SF tasks. Use USA FMs for training only when a FM is listed as a STS line item task technical reference.

Initial Skills Training (IST). A formal school course that results in award of a 3-skill level AFSC for enlisted personnel. For SF Officers, initial skills training is the first Air Education and Training Command (AETC) formal career field course attended. (May also include a "qualifying" course before the AFSC awarding course.)

On-the-Job Training (OJT). An on-duty training method to certify personnel in both upgrade (skill level award) and job qualification (duty position certification) training. It is hands-on, over-the-shoulder training.

Qualification Training. Actual hands-on task performance-based training designed to qualify Airmen in a specific duty position. This training program occurs during and after the upgrade training process. It provides the performance skills training required to do the job.

Resource Constraints. Resource deficiencies such as money, facilities, manpower and equipment, which preclude delivery of desired training.

Security Forces Training Reference Guide (SFTRG). A sole-source document for SF training, created to capture the standardization of training, aiding the execution of Home Station Training (HST), duty position training and SF technical training.

Specialty Training. A mix of formal training (technical school) and informal training (OJT) to qualify and upgrade Airmen in each skill level of a specialty.

Specialty Training Standard (STS). An Air Force publication that describes an AFS in terms of tasks and knowledge that an Airman in that specialty performs or knows on the job. It further serves as a contract between AETC and the functional user to show overall training requirements taught in formal schools, Career Development Courses and exportable training courses.

Standard. A fixed quantity or quality.

Sustainment Training. Training conducted to sustain skills or knowledge previously acquired.

Task. A unit of work activity or operation which forms a significant part of a duty. A task usually has clear beginning and ending points and is directly observable or measurable.

Upgrade Training (UGT). Mandatory training that leads to the award of a higher skill level.

Utilization and Training Workshop (U&TW). A forum of Air Force and MAJCOM functional managers, subject matter experts (SMEs) and AETC training personnel that determines STS requirements and responsibilities for a specialty.

SECTION A - GENERAL INFORMATION

1. General Information

1.1. Purpose. This CFETP provides the information necessary for the SF Officer CFM, MAJCOM, and Direct Reporting Unit (DRU) SF leadership, training management, supervisors, trainers and commanders to plan, develop, manage and conduct an effective and efficient career field training program. The plan outlines the training individuals should receive in this AFSC in order to develop and progress throughout their career. This plan divides training into initial skills, upgrade and proficiency training. IST is mandatory for upgrading to "Qualified" (31P3) for officers. AETC conducts this training at the 343rd Training Squadron (343 TRS), Joint Base San Antonio-Lackland. Upgrade Training (UGT) identifies the mandatory courses, qualification requirements, and educational requirements for award of the Qualified (3) or Staff (31P4) level. Proficiency training is additional training provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade.

1.2. Use. Commanders and supervisors will use the plan at all levels to ensure comprehensive and cohesive training programs are available for each individual in the specialty.

1.2.1. Training personnel develop and revise formal resident, nonresident, field and exportable training based on requirements established by the users and documented in Part II of this CFETP. They will also work with the SF Officer CFM to develop acquisition strategies for obtaining resources needed to provide the identified training.

1.2.2. Commanders will ensure their training programs complement the CFETP mandatory initial, upgrade, and proficiency requirements. OJT, resident training, and contract training or exportable courses can satisfy identified requirements. MAJCOMs must identify any training they have specifically designed to support this AFSC for inclusion into the plan.

1.2.3. Each individual will complete the mandatory training requirements specified in this plan. Use the list of courses in Part II as a reference to support training.

1.3. Coordination and Approval. AF/A4S develops this CFETP. The approval authority is the SF Officer CFM. MAJCOM and DRU Security Forces leadership and AETC training personnel will identify and coordinate on the career field training requirements. The SF Officer CFM will initiate an annual review of this document during the Winter Development Team meeting to ensure currency and accuracy.

SECTION B – 31PX CAREER FIELD PROGRESSION AND INFORMATION

1. Specialty Description.

1.1. Refer to the 31P section of the Department of the Air Force Officer Classification

Directory (DAFOCD) found on MyFSS for specialty and duty description.

2. Skill and Career Progression. Adequate training and timely progression from the Entry (1) to the Qualified (3) level play an important role in the Air Force's ability to accomplish its mission. It is crucial everyone involved in training must do their part to plan, manage, and conduct an effective training program. The guidance provided in this part of the CFETP will ensure each individual receives viable training at appropriate points in their career. The CFM must approve any exemptions to skill level requirements.

2.1. Entry (1) Level. Award the AFSC 31P1 upon assignment to the SF career field. Completion of the BOC is mandatory for all personnel entering the career field. 31P1 officers also participate in an OJT program centered on the tasks listed in the 31PX STS and require Home Station Training (HST) to meet local duty position certification requirements. Primary duties include leading flight-sized elements and assisting in one of the unit's S-functions.

2.2. Qualified (3) Level. Award the AFSC 31P3 upon graduation of the BOC, completion of 24 months of experience in an SF officer billet, and graduation from the Combat Leaders Course (CLC). NOTE: The 24 months of experience begin when the officer begins work in a 31P billet at their first duty station, regardless of whether they have attended BOC yet. All SF officers will complete the CLC between two years and five years commissioned time in service (CTIS). The CLC requirement is in effect for Year Groups (YG) 2021 and later.

2.3. Staff (4) Level. Award the AFSC 31P4 for officers who hold the 31P3 AFSC while assigned to staff position above the wing level. SF officers should aim for a staff assignment between 6-12 years CTIS.

2.4. Squadron Command. Officers must attend the BOC as well as the following prerequisites for assuming a 31P command: IDC3 between 5-8 years CTIS; AT Level II; and the SF FTCC.

3. Training Decisions. The CFETP uses a building block approach (simple to complex) to encompass the entire spectrum of training requirements for the SF career field. The spectrum includes a strategy of training requirements for when, where, and how to meet the training requirements in a specific time period. The strategy must be apparent and affordable to reduce duplication of training and eliminate a disjointed approach to training. The Specialty Training Requirements Team (STRT), U&TW, and SF Executive Board (SFEB) determine training requirements. AF/A4S manages policy to enforce these standards.

3.1. Initial Skills. The SF STRT and U&TW identify IST requirements. AETC instructors of the 343 TRS at JBSA-Lackland teach the BOC, which executes the IST for the SF Officer Career Field.

3.2. Proficiency Training. SF officers achieve job task proficiency through a combination of formal courses and OJT. Formal courses provide task training to meet a specified standard identified by a proficiency code. SF Officer CFM and other members of the STRT use the Proficiency Code Key (PCK) to designate the level of training provided in a formal course. The

PCK identifies tasks as either subject knowledge only or those requiring task performance and knowledge. Annex A generally lists subject knowledge only tasks by subject area. Most formal courses do not prepare a person to do all aspects of a job task without OJT.

3.2.1. "Go" Level. Formal training courses rarely develop students to the task performance level 3 (competent). Officers must engage in OJT to reach at least the "Go" level of performance on all required tasks. DAFMAN 36-2689, *Training Program*, provides this definition for the "Go" level: "Go" means the individual can perform the task without assistance and meets local demands for accuracy, timeliness, and correct use of procedures ("Go" level equates to 3c in the specialty training standard (STS) proficiency code key). All SF officers must meet the "Go" level of proficiency for home station duty tasks.

3.2.2. Supervisors conduct OJT or appoint trainers to ensure officers reach the "Go" level on all performance tasks. OJT and extensive work experience areas also essential for the analysis (code C) and evaluation (code D) levels for subject knowledge tasks.

3.2.3. The Air Force, sister services, and other government departments offer courses to enhance an officer's proficiency. SF officers and their commanders should develop an individualized training plan that will broaden their capabilities. Part II, Section B, lists several courses that may be helpful when developing individual training plans.

4. Career Field Path. SF officers are part of the Line of the Air Force Combat Support (LAF-C) officer developmental category. The career path does not provide definitive, concrete steps that lead you to reach rank or position; however, certain jobs or experiences, training and PME will help you achieve your goals. Future SF leaders will achieve depth and breadth through job experience, education and training, and professional development. A solid foundation in these areas will pay high dividends in your future. Failure to build your foundation at the appropriate time may, in effect, close certain doors for advancement later in your career. In other words, your development as a future Air Force leader begins now. First and foremost, the Air Force needs leaders. All SF officers should put themselves on a course to eventually compete for a command position at the squadron level. Appendix C illustrates career field milestones for SF officers.

5. Wear of Occupational Badge. Upon graduation from technical training, SF officers may wear the Basic Force Protection (FP) occupational badge. SF officers may wear the Senior FP occupational badge after holding the 31P AFSC for 7 years and the Master FP occupational badge after 15 years, regardless of time spent doing duties outside a 31P billet. Time as an SF enlisted member counts towards the time requirement. SF officers retain occupational badges earned as a SF enlisted member and/or from other career fields.

SECTION C – PROFICIENCY TRAINING REQUIREMENTS

1. Purpose. This CFETP defines proficiency training requirements in the SF Officer Career Field in terms of tasks and knowledge requirements. This section outlines the specialty qualification requirements for award of AFSC 31P3. The STS and Training Course Index at Part II, Sections A and B of this CFETP identify specific task and knowledge training requirements.

2. Specialty Qualification.

2.1. Entry Level (31P1) Qualification

2.1.1. Knowledge. 31P1 officers must become knowledgeable on: SF programs and management functions, such as installation security measures; security concepts for conventional weapon systems and resources; base defense; vulnerability assessment and mitigation; law and order; confrontation management; military working dog (MWD) utilization; deployment operations; operational capabilities, limitations, and vulnerabilities; basic security equipment capabilities; combat arms training and maintenance (CATM); employment of assigned weapons; SF and Air Force Tactics, Techniques, and Procedures (TTP); SF Weapons and Tactics Program fundamentals; and understand the Air Force Planning Process (AFPP) and the National Defense Strategy (NDS). Thorough understanding of flight operations, tactics, and structures is necessary, as well as a firm understanding on the use and employment of the various SF weapons systems.

2.1.2. Other. For entry into this specialty, accessions personnel must screen candidates for eligibility and ensure they meet all requirements outlined in the 31P DAFOCD.

2.2. Qualified (31P3) Training Specialty Qualification.

2.2.1. Knowledge. Advanced SF officers must have an in-depth knowledge of the AFPP and operations. Additionally, these officers must be knowledgeable of the processes and programs of each of the S-functions, as well as base defense doctrine, SF and Air Force TTPs, deployment operations, base defense tactics, the joint protection function, and protection-related programs, activities, and tasks.

2.2.2. Training. Refer to Section B.

2.2.3. Experience. Refer to Section B.

2.2.4. Training Sources and Resources: Core Tasks required for training and certification can be found in Appendix A.

2.2.5. Implementation: Per DAFMAN 36-2100, Military Utilization and Classification, the Military Personnel Section (MPS) monitors the eligibility of officers for upgrade to a Qualified AFSC.

2.2.5.1. MPS uses the officer upgrade Report of Individual Personnel (RIP) to notify commanders or supervisors when officers have met necessary experience requirements.

2.2.5.2. Commanders or supervisors review an officer's qualification for upgrade and return annotated RIP to the MPS. If an officer is not qualified for upgrade, the

commander or supervisor will advise the MPS to establish a new suspense date. The new suspense date will represent the commander's or supervisor's estimate as to when the individual will be ready for upgrade.

2.3. Staff (31P4) Training Specialty Qualification.

2.3.1. SF officers do not require any additional experience for the award of the Staff (4) Level. Award SF officers in the 31P3 AFSC the 31P4 AFSC when assigned staff duties above the wing level: Numbered Air Force (NAF), MAJCOM, AFIMSC, Air Force, Joint, OSD, etc.

SECTION D - RESOURCE CONSTRAINTS

1. Purpose. This section identifies known resource constraints that preclude the development or execution of optimal and desired training, to include information such as cost and manpower. This section includes narrative explanations of each resource constraint and an impact statement describing the effect each constraint has on training. Also included in this section are actions required, office of primary responsibility, and target completion dates. Resource constraints will be, as a minimum, reviewed and updated annually.

1.1. At this time, no resource constraints exist for any level of training or qualification.

1.2. If in the future a course lacks the appropriate resources to complete training to the desired proficiency level, the specific constraints will be annotated on the STS.

PART II

SECTION A – SPECIALTY TRAINING STANDARDS

1. Purpose. The students will demonstrate the desired learning outcomes contained in this STS.

2. Documentation. Document and certify completion of training. Officers will complete training during the BOC.

3. Qualitative Requirements. Appendix A contains the behavioral statement which makes up the initial skills training course.

4. Qualification Training Requirements. Commanders will set forth standards for Qualified (3) level officer certification in duty positions. This certification (if applicable) combined with HST make up the training necessary for the Qualified (3) Level.

5. Proficiency Designator Table.

Proficiency Designator	Title	Course Requirements	Time in Training Requirements
31P1	Entry	No formal course required	None
31P3	Qualified	BOC and CLC between 2-5 years CTIS (YG 21 and later)	24 months in a 31P billet, regardless of whether member has attended BOC yet
31P4	Staff	No formal course required; awarded when assigned to staff duties above the wing level	

Note: Designation of staff level relates only to the level of functional responsibility and only applies to positions above wing level. It does not denote additional specialty qualifications.

6. Recommendations. Report unsatisfactory performance of individual course graduates. Reference specific STS paragraphs.

SECTION B – TRAINING COURSE INDEX

1. Purpose. This section of the CFETP identifies training courses available for the specialty and shows how each MAJCOM uses them in their career field training programs.

2. Air Force in-residence Courses. The SF courses officers attend throughout their career:

2.1. L3OBR31P1, BOC, JBSA-Lackland: Newly accessed officers and cross-trainees

2.2. L3AZR3P071, CLC, JBSA-Camp Bullis: 31P Officers with 2-5 years CTIS (YG 2021 and later)

2.3. L3OCR31P4, IDC3, JBSA-Lackland: 31P Officers with 5-8 years CTIS

2.4. Newly accessed SF officers must attend all courses required commensurate with their grade

3. Relevant Course Listing. Appendix B contains a course list sampling of those available to SF officers to enhance their development.

SECTION C – SUPPORT MATERIALS

1. OJT Support Materials. These materials consist of Department of the Air Force publications (DAFIs, DAFMANs, etc), Joint Publications, Sister Service Field Manuals, Technical Orders (TO) and SFTRGs. Applicable SFTRGs can be found on the SF SMARTNet (https://usaf.dps.mil/teams/SMARTNet/SitePages/Home.aspx). These documents contain comprehensive information on SF subjects, procedures or equipment. Use these publications for qualification or sustainment training, or skills/knowledge enhancement.

SECTION D – MAJOR COMMAND UNIQUE REQUIREMENTS

There are currently no MAJCOM unique requirements. The SF Officer CFM reserves this section for requirements as MAJCOMs identify them.
