RC/WC/TC-135—AIRCREW EVALUATION CRITERIA

COMPLIANCE WITH THIS PUBLICATION IS MANDATORY

ACCESSIBILITY: This publication is available for downloading or ordering on the e-Publishing website at **www.e-Publishing.af.mil**.

RELEASABILITY: There are no releasability restrictions on this publication.

OPR: ACC/A3CR

Certified by: ACC/A3T

Pages: 61

This publication implements Air Force Manual (AFMAN) 11-202, Volume 2, *Aircrew Standardization and Evaluation Program*. This publication applies to all Air Combat Command (ACC), Air National Guard (ANG) and Air Force Reserve (AFR) aircrews operating the RC/WC/TC-135. This publication is not applicable to the United States Space Force. It establishes the minimum Air Force (AF) standards for training and qualifying personnel performing duties in the RC/WC/TC-135. This publication requires the collection and or maintenance of information protected by the Privacy Act of 1974 authorized by Title 37 United States Code (USC) Section (§) 301a, *Incentive Pay: Aviation Career* and § 320, *Incentive Pay: Career Enlisted Flyers*. The applicable System of Record Notice (SORN) F011 AF XO A is available at: **http://dpclo.defense.gov/Privacy/SORNs.aspx**. This publication may be supplemented at any level, but all supplements must be routed to the OPR of this publication for coordination prior to certification and approval. Ensure all records generated as a result of processes prescribed in this publication adhere to Air Force Instruction (AFI) 33-322, *Records Management and Information Governance Program*, and are disposed in accordance with (IAW) the Air Force Records Disposition Schedule, which is located in the Air Force Records Information Management System. Submit recommended changes to this publication to ACC Standardization and Evaluation Branch (ACC/A3TV) using the Department of the Air Force (DAF) Form 847, *Recommendation for Change of Publication*. The authorities to waive wing and unit level requirements in this publication are identified with a Tier ("T-1, T-2, T-3") number following the compliance statement. See Department of the Air Force Manual (DAFMAN) 90-161, *Publications Processes and Procedures*, for a description of the authorities associated with the Tier numbers. Submit requests for waivers through the chain of command to the appropriate Tier waiver approval authority, or alternately, to the requestor's commander for non-tiered compliance items.

Commanders may waive non-tiered requirements but must send a copy of the approved waiver through the chain of command, including the Numbered Air Force (NAF), to the OPR (ACC/A3TV) of the waiver (see DAFMAN 90-161, paragraph 9.6.2) within 30 days of approval. Waiver approval authority for C-135 specific aircrew requirements is Operations Directorate, MAJCOM: ACC Director of Operations (ACC/A3) (ANG: National Guard Bureau Director of Operations [NGB/A3/10]), unless otherwise specified in this volume or delegated lower and will be routed through the NAF for comment/approval. For purposes of this publication the NGB is to be treated as a Major Command (MAJCOM). ANG: 170th Group Commander (170 GP/CC) or 238th Reconnaissance Squadron (RS) Commander (238 CTS/CC), Offutt Air Force Base (AFB), NE, will be notified when situations require an operations group commander or squadron commander approval/waiver. Waiver requests should utilize the DAF Form 679, *Air Force Publication Compliance Item Waiver Request/Approval*.

Chapter 1

ROLES AND RESPONSIBILITIES

1.1. Flight Examiners (FEs):

1.1.1. Should exercise judgment when assigning subjective area grades, when assigning the overall qualification level, and when evaluating in situations not covered explicitly by this Air Combat Command Manual (ACCMAN).

1.1.2. Will use the grading policies contained in AFMAN 11-202V2, as supplemented, and the evaluation criteria in this manual for conducting all RC/WC-135 flight evaluations, Aircrew Training Device (ATD) evaluations, and Emergency Procedures Evaluations (EPEs). All evaluations assume smooth air, a stable platform, and normal operating conditions. Compound emergency procedures will not be used.

1.1.3. Should schedule all evaluation activity on one sortie (operational aircraft or ATD) to the greatest extent possible. All flight phase requirements may be accomplished in-flight or ATD as specified in this publication or the ACCMAN 11-2RC-135V2 Supplement or local guidance. Any evaluation event may be accomplished in an ATD with a Simulator Certification Level 1 (SIMCERT 1) or Training Value Code 1 (TVC 1).

1.1.4. May evaluate any grading area, observed by the evaluator, during all evaluations. If additional training is required for areas outside of the scheduled evaluation, document the training required under the appropriate area on the AF Form 8, *Certificate of Aircrew Qualification*.

1.1.5. Will brief the examinee on the purpose, conduct, and extent of each evaluation.

1.1.6. May assist in evaluation mission planning/briefing as tasked by the examinee.

1.1.7. May evaluate from any position to conduct a thorough evaluation.

1.1.8. Will apply the grading criteria contained in **Chapter 4**, as applicable.

1.1.9. Evaluate all crewmembers on areas listed in **Table 4.1** and all instructors on areas listed in **Table 4.2**. Crew position specific requirements are listed in **Table 5.1**., **Table 6.1**., **Table 7.1**., **Table 8.1**., **Table 9.1**., **Table 10.1**.

1.1.10. Will debrief the examinee's overall rating, specific deviations, area grades assigned (if other than qualified), and any required additional training, at a minimum.

1.1.11. Should use all means available to reconstruct, evaluate, and debrief the mission adequately.

1.2. Examinees. Examinees:

1.2.1. Will accomplish required mission planning IAW the crew position assigned during the evaluation, furnishing FEs a copy of necessary mission data and mission materials, if appropriate.

1.2.2. Will brief items for the mission flown, as required.

1.2.3. Will satisfactorily demonstrate the ability to perform required duties safely and effectively, including the operation of appropriate aircraft systems IAW applicable technical orders, instructions, and directives.

Chapter 2

GENERAL EVALUATION GUIDELINES

2.1. General.

2.1.1. All evaluations fall under the Qualification (QUAL), Instrument (INSTM), Mission (MSN), Instructor (INSTR), or SPOT categories listed in AFMAN 11-202V2.

2.1.2. Evaluations may be conducted on operational sorties and/or when Operational Control has been transferred to another command (e.g., United States Air Forces in Europe/Pacific Air Forces) outside of ACC. Any evaluation paperwork will be routed through the home-station squadron (e.g., 95 RS to 38 RS) and 55 OG for processing. **(T-2)**

2.2. Evaluation Procedures.

2.2.1. Each chapter in this ACCMAN contains a table of evaluation requirements for various positions and profiles. To complete an evaluation, all areas annotated with a "Q" for QUAL. "M" for MSN, or "R" for required will be successfully completed. **(T-2)** The "notes" column of each table may include a number which refers to a note shown below the table.

2.2.2. Unit Flight Examiners may give evaluations outside of their organization to include administering evaluations between ACC and ANG or AFR Command.

2.2.3. 55th Operations Group Standardization and Evaluation (55 OG/OGV) can administer crewmember evaluations in any squadron, IAW AFMAN 11-202V2.

2.2.4. Momentary deviations from tolerances should not be considered in the grading, provided the examinee applies prompt corrective action and such deviations do not jeopardize flight safety. Consider cumulative deviations when determining the overall grade. Consider deviations incurred while employing the "see and avoid" concept as momentary deviations. The FE states the examinee's overall rating, thoroughly critiques specific deviations, area grades assigned and assigns any required additional training.

2.2.5. If additional sorties are required to complete the evaluation, document IAW AFMAN 11-202V2_ACCSUP, *Aircrew Standardization and Evaluation Program*. If multiple evaluators are required, document IAW AFMAN 11-202V2_ACCSUP, paragraph 7.3.10.1.3.

2.3. General Evaluation Guidance.

2.3.1. Qualification (QUAL) Evaluations. Qualification evaluation ensures an individual can use the equipment, possesses the skills necessary to execute required actions on the aircraft, and can safely operate aircraft and equipment.

2.3.2. Mission (MSN) Evaluation. Qual and MSN evaluations should be combined whenever possible. All MSN evaluations will contain a mission scenario. The scenario should be incorporated throughout the flight/ATD portion of the evaluation. For aircrew qualified in multiple missions, recurring evaluations need only evaluate the primary mission events if currency is maintained in all other required training events.

2.3.3. Certifications. Initial certifications that will require subsequent recertification IAW ACCMAN 11-2RC-135, Volume 1, *RC/WC/TC-135—Aircrew Training,* will be documented on the AF Form 4348, *USAF Aircrew Certifications*, IAW AFMAN 11-202V2_ACCSUP and

filed in the member's electronic Flight Evaluation Folder (eFEF). The individual will remain certified as long as currency is maintained. **(T-3)**

2.3.4. Multiple Qualifications. IAW AFMAN 11-202V2_ACCSUP, paragraph 5.10, ACC has determined several crew positions on the RC/WC-135 series are functionally the same across the series and do not necessitate additional requirements for a multiple qualification. Specific guidance for multiple qualifications is included in the chapters for applicable crew positions and/or **Attachment 2**. If a crew position is not listed in the aforementioned attachment, unit must gain approval IAW AFMAN11-202V2_ACCSUP, paragraph 5.10.2.

2.3.4.1. Evaluations on examinees for whom this is applicable may be combined on one sortie provided all evaluation requirements are covered. If the qualifications of the Flight Examiner cannot cover all the examinee's requirements, multiple examiners are authorized to complete the remaining graded areas using another sortie or ATD. The FE will complete an AF Form 3862, *Flight Evaluation Worksheet,* for any portion of an evaluation conducted. **(T-2)**

2.3.4.2. The EWO and CMC crew positions possess upgrades that require greater responsibilities for mission accomplishment. Formal training for these upgrades will culminate in an Initial (INIT) evaluation. The graded areas of the base qualification are required to be evaluated on all subsequent recurring evaluations.

2.3.4.3. One set of requisites can satisfy all evaluation requirements within the eligibility period if completed IAW AFMAN 11-202V2_ACCSUP, paragraph 5.5.4.

2.3.5. Instrument Evaluations. Instrument evaluations apply to pilots. See **Chapter 5** of this volume for specific requirements. General instrument procedures should be evaluated in the ATD in conjunction with the EPE. Instrument evaluations should be combined with qualification evaluations.

2.3.6. No-Notice Evaluations. Normal preparation for no-notice evaluations is no earlier than the beginning of mission planning for the event up to the step brief.

2.3.7. Difference Training (DT) SPOT Evaluations. The OG/CC determines whether a SPOT evaluation or certification is required after DT. These evaluations may be used to qualify crewmembers in a different system/tactic or to validate the DT personnel receive (e.g., baseline or avionic upgrades).

2.3.8. Instructor (INSTR) Evaluations.

2.3.8.1. Initial INSTR flight evaluations should be conducted with a student occupying the applicable aircrew position whenever possible.

2.3.8.2. Subsequent periodic evaluations, to include upgrade evaluations and requalification, will include evaluation of the instructor graded areas. Instructor qualification is independent of the RC-135 crew position.

2.3.8.3. The instructor will monitor all phases of flight from an advantageous position and be prepared to demonstrate or explain any area or procedure. The FE focuses on the instructor's ability to recognize student difficulties and provide effective, timely corrective action.

2.3.8.4. The FE also evaluates any student grade assigned and Training Accomplishment and Progress Report completion on initial instructor checks.

2.3.8.5. The student performs those duties prescribed by the instructor for the sortie being accomplished. If an actual student is not available, the FE identifies to the examinee (prior to the mission) the level of performance to be expected from the FE acting as the student. If this option is utilized, at least one event or briefing should be instructed.

2.3.9. Senior Staff Qualification (SSQ) Evaluations. For evaluations of members in the SSQ program, annotate the crew position on the AF Form 8 as either FP (for a Pilot), FN (for a Navigator), FE (for an Electronic Warfare Officer), FA (for an Information Integration Officer), FK (for an Airborne Systems Engineer), and FQ (for an Airborne Cryptologic Language Analyst (ACLA) or Signals Search and Development operator (SSD) based on DAFMAN 11-401, *Aviation Management,* guidance.

2.3.10. Simulator Evaluations.

2.3.10.1. Consecutive recurring evaluations will not be completed in the ATD without 55 OG/CC approval. For example, if the examinee accomplished some graded areas in the aircraft and completed the remaining graded areas in an ATD, the next evaluation for that examinee must be completed fully in the aircraft.

2.3.10.1.1. For multi-event evaluations (e.g., AMS and SSD) the restriction on consecutive simulator evaluations only apply to the highest upgrade position held.

2.3.10.1.2. For multiple qualifications (e.g., ASE1 and ASE5) the restriction applies to both qualifications held.

2.3.10.2. SQ/CC's have the discretion to authorize evaluations in a TVC 1 certified ATD for recurring and SPOT evaluations. Any evaluation that originates in an ATD must be approved in writing by flying SQ/CC. Annotate subject title and date in remarks section of AF Form 8 and retain MFR in examinee's Flight Evaluation Folder (FEF) until all signatures are complete. Evaluations that are continued and/or finished from an incomplete flight evaluation profile on the aircraft do not require the written approval but still must be annotated in the remarks section of the AF Form 8. If the evaluation is completed on a different date and/or with a different evaluator, create a separate worksheet for the graded areas observed.

Chapter 3

REQUISITES

3.1. General. Requisite requirements for INSTM, QUAL and MSN evaluations are listed in this chapter. Flight requirements are in position specific chapters.

3.2. Requisites. Requirements listed in **Table 3.1** are accomplished IAW AFMAN 11-202V2, as supplemented, and according to unit directives. These should be accomplished prior to the flight phase.

3.2.1. Publications Check. The publications check is a requisite to all qualification evaluations. The examinee will bring all required checklists. **(T-2)**

Table 3.1. Crew Position Specific Requisites.

Test Type	**Pilot**		**Navigator**	**EWO/ASE/CMC/IIO**
	QUAL	**INSTM**	**QUAL**	**QUAL**
OPEN BOOK	R		R	R
CLOSED BOOK	R		R	R
Instrument		R	R[1]	
EPE	R		R	R
BOLDFACE	R			
Notes: 1. Required per AFMAN 11-202V2_ACCSUP, paragraph 5.5.3.2.				

3.2.2. Emergency Procedures Evaluation (EPE). Every QUAL evaluation which updates an expiration date includes an EPE. Units can determine scenarios for EPEs. The FE assigns an overall EPE grade (1 or 3) in the requisites block of the AF Form 8 and annotates type of EPE and how it was conducted in the additional comments section.

Chapter 4

GENERAL GRADING INSTRUCTIONS AND AREAS

4.1. Grading Instructions and General Grading Criteria. Standards and performance parameters are contained in AFMAN 11-202V2 and this publication. A three-level grading system (Q, Q-, and U) is used for most areas; however, a "Q-" grade will not be indicated under critical areas.

4.1.1. Critical Areas. Critical areas are events that require adequate accomplishment by the examinee in order to successfully achieve the sortie objectives and complete the evaluation. If an examinee receives a "U" grade in any critical area, the overall grade for the evaluation is "Q3". Critical areas are identified by "(CRITICAL)" following the applicable area title.

4.1.2. Non-critical Areas. If an examinee receives a "U" grade in a non-critical area, then the overall grade awarded can be no higher than "Q2". An examinee receiving a "Q-" grade in a non-critical area or areas may still receive a "Q1" overall grade at evaluator discretion. An overall "Q3" may be awarded if, in the judgment of the flight examiner, there is justification based on performance in one or several areas or sub-areas.

4.1.3. The FE should exercise judgment when the wording of areas is subjective and when specific situations are not covered.

4.1.4. Evaluator judgment is the final determining factor in deciding the overall qualification level. **(T-2)**

4.1.5. The "Area" number column under grading areas is derived from an ACC/A3TV consolidated list to track trends in the Combat Air Force.

4.2. General Grading Criteria. Table 4.1 lists general qualification criteria which are common to all crew positions and will be used for all applicable evaluations.

Table 4.1. General Grading Areas (All Crew Positions).

Area	DESCRIPTION	NOTES
1	Mission Planning	
28	Post-flight/Debrief	
29	Equipment/Publications	
30	Airmanship (CRITICAL)	
31	Safety (CRITICAL)	
32	Aircrew Discipline (CRITICAL)	
37	Crew Resource Management (CRM)/Crew Coordination	
50	Communications, Logs, and Reports	1
52	Emergency Procedures	
302	Checklist Procedures	
Notes: 1. Not required for Navigator, EWO, and IIO SSOs.		

4.2.1. **Area 1, Mission Planning.**

4.2.1.1. **Q.** Developed a plan considering mission objectives, specific action points, and aircraft/crew capabilities. Complied with procedures prescribed by the flight manual and other applicable directives. Met all flight requirements, complied with local directives, and participated in all required briefings. Mission planning was adequate with no more than minor omissions, deviations or errors which did not impact planned sortie accomplishment.

4.2.1.2. **Q-.** Did not fully comply with directives. Omissions, deviations, or errors detracted from planned sortie execution.

4.2.1.3. **U.** Failed to comply with local directives or participate in all required briefings. Mission planning was inadequate. Failed to check Flight Crew Information File, Volume 1, and Part B.

4.2.2. **Area 28, Post-flight/Debrief.**

4.2.2.1. **Q.** Satisfactory knowledge and performance of required procedures. Attended and fully participated in required debrief(s). Ensured required paperwork was completed and satisfactorily debriefed with required personnel.

4.2.2.2. **Q-.** Incomplete knowledge of required procedures. Attended/participated in required debrief(s), but hesitant to make appropriate inputs. Required paperwork entries and required debriefing(s) were not complete or thorough.

4.2.2.3. **U.** Unsatisfactory knowledge of required procedures. Major deviations in procedures. Failed to attend or participate in required debrief(s). Failed to complete or ensure completion of required paperwork and debrief(s).

4.2.3. **Area 29, Equipment/Publications. Note:** Crewmembers should not be accountable for technical difficulties that prevent Electronic Flight Bag (EFB) syncing. A backup or shared EFB may be utilized in this instance. Publications review will be conducted IAW AFI 11-215_ACCSUP, *USAF Flight Manuals Program (FMP)*.

4.2.3.1. **Q.** Possessed all personal/professional equipment and publications required for mission accomplishment. Maintained equipment in serviceable condition. Publications are current and properly posted according to directives.

4.2.3.2. **Q-.** Possessed all personal/professional equipment and publications required for mission accomplishment. Maintained equipment in serviceable condition but was missing ancillary items. Publications were non-current or posted with minor omissions, deviations, or errors.

4.2.3.3. **U.** Failed to possess personal/professional equipment or to maintain equipment in serviceable condition. Required publications were posted with major omissions, deviations or errors. EFB was in violation of policy and unable to be updated.

4.2.4. **Area 30, Airmanship (CRITICAL).**

4.2.4.1. **Q.** Executed the assigned mission in a timely, efficient manner. Conducted the flight with a sense of understanding and comprehension.

4.2.4.2. **U.** Decisions or lack thereof resulted in failure to accomplish the assigned mission.

4.2.5. **Area 31, Safety (CRITICAL).**

4.2.5.1. **Q.** Aware of and complied with all safety factors required for safe aircraft operation and mission accomplishment.

4.2.5.2. **U.** Was not aware or did not comply with all safety factors required for safe aircraft operation or mission accomplishment. Operated the aircraft in a dangerous manner. Demonstrated poor judgment to the extent that safety could have been compromised.

4.2.6. **Area 32, Aircrew Discipline (CRITICAL).**

4.2.6.1. **Q.** Demonstrated strict professional flight and aircrew discipline throughout all phases of the mission.

4.2.6.2. **U.** Failed to exhibit strict professional flight or aircrew discipline. Violated or ignored rules or instructions.

4.2.7. **Area 37, Crew Resource Management/Crew Coordination.**

4.2.7.1. **Q.** Effectively coordinated with other aircrew members. Demonstrated basic knowledge of other crewmembers' duties and responsibilities. Provided timely direction or information, as required, which clarified/rectified a situation. Efficiently used available resources to manage workload.

4.2.7.2. **Q-.** Adequate coordination with other aircrew members but demonstrated limited knowledge of other crewmembers' basic duties/responsibilities. Showed some hesitation to provide timely direction/information which would have clarified confusion or rectified a situation. Used a limited number of available resources to manage workload.

4.2.7.3. **U.** Coordination with other aircrew members and lack of knowledge of their duties/responsibilities were detrimental to flight safety or mission effectiveness. Did not provide timely direction/information which would have clarified/rectified a situation. Did not use any available resources to manage workload.

4.2.8. **Area 50, Communications, Logs, and Reports.**

4.2.8.1. **Q.** Communicated required information within the aircraft/ATD and with external agencies, if applicable. Communications were clear, concise, timely, and used standard terminology/format. All logs, reports, media, and forms required were completed IAW applicable directives, tasking and policy. Information was provided in sufficient detail to allow accurate and timely analysis of associated data. Complied with security procedures.

4.2.8.2. **Q-.** Minor deviations, omissions or errors which did not significantly impact the planned mission. Complied with security procedures.

4.2.8.3. **U.** Major deviations, omissions or errors which significantly impacted the planned mission. Communications caused confusion or delay. Logs, reports, media, or forms required contained errors or omissions precluding analysis of mission data. Failed to comply with security procedures.

4.2.9. **Area 52, Emergency Procedures. Note:** The EPE may satisfy this requirement if an actual in-flight emergency did not occur.

4.2.9.1. **Q.** Satisfactory systems/procedural knowledge. Recognized malfunctions and applied corrective action. Accomplished all required checklists/flight manual actions and/or effectively used available aids. Performed and/or explained proper corrective action for each type of malfunction in the proper sequence. Effectively coordinated emergency actions with other crewmembers without delay or confusion.

4.2.9.2. **Q-.** Marginal systems/procedural knowledge. Slow to recognize malfunctions or apply corrective action. Did not effectively use checklists/flight manual and/or available aids. Performed and/or explained proper corrective action for each type of malfunction in the proper sequence but with minor errors, deviations, or delays. Slow or hesitant to coordinate emergency actions with other crewmembers.

4.2.9.3. **U.** Unsatisfactory systems/procedural knowledge. Failed to recognize malfunctions or apply corrective action. Failed to accomplish required checklists/flight manual actions and/or unable to locate information in available aids. Did not perform and/or explain proper corrective action for each type of malfunction in the proper sequence. Improperly or ineffectively coordinated emergency actions with other crewmembers causing delay or confusion.

4.2.10. **Area 302, Checklist Procedures.**

4.2.10.1. **Q.** Checklist items and procedures required by the flight manual and applicable directives were accomplished in a thorough and proficient manner with deviations or errors which did not impact sortie accomplishment.

4.2.10.2. **Q-.** Checklist items and procedures required by the flight manual and applicable directives were accomplished with major omissions, deviations, or errors which did not negatively impact sortie accomplishment.

4.2.10.3. **U.** Checklist items and procedures required by the flight manual and applicable directives were accomplished with major omissions, deviations, or errors which negatively impacted sortie accomplishment.

4.3. Instructor Grading Criteria. Table 4.2 lists areas to be evaluated for all instructor evaluations. Awarding a "**U**" in any of the Instructor Grading Criteria areas results in a Q3 for the overall instructor grade. The overall grade for the instructor portion of the evaluation will be no higher than the lowest overall grade awarded under QUAL/INSTM. The following qualification criteria are common to all crew positions and will be used for all instructor evaluations. **(T-2)**

Table 4.2. Instructor Grading Areas.

Area	DESCRIPTION
33	Ability to Instruct
47	Briefings/Critique
56	Instructor Knowledge
1001	Training Forms Preparation/Documentation

4.3.1. **Area 33, Ability to Instruct.**

4.3.1.1. **Q.** Demonstrated effective ability to instruct. Clearly defined all mission requirements and any required additional training/corrective action. Instruction was

accurate, effective, and timely. Maintained mission situation awareness while communicating effectively to provide guidance or prevent mission degradations.

4.3.1.2. **Q-.** Deficiencies with instructor's ability. Did not clearly define mission requirements and/or required additional training/corrective action. Provided untimely or inappropriate corrective guidance in minor areas or managed time poorly. Had difficulty planning and providing inputs/communicating to prevent mission degradation. Minor discrepancies did not adversely affect safety or mission accomplishment, or adversely affect student progress.

4.3.1.3. **U.** Demonstrated inadequate ability to instruct. Unable to perform, teach or assess techniques, procedures, systems use or tactics. Did not provide corrective guidance where necessary. Did not plan or anticipate student problems. Did not maintain mission situational awareness. Failed to effectively communicate with the student. Deviations adversely affected safety or mission accomplishment or adversely affected student progress.

4.3.2. **Area 47, Briefings/Critique.**

4.3.2.1. **Q.** Briefings/debriefings and critiques were well organized, accurate, and thorough. Made effective use of training aids as necessary. Clearly defined objectives. Gave corrective guidance with positive and negative performance feedback at appropriate times—improvement feedback was specific, objective, based on observable behavior, and given constructively. Offered effective mission reconstruction and analysis of events. Debrief re-capped key points/compared mission's results with objectives. When appropriate, took the initiative and time to share operational knowledge and experience.

4.3.2.2. **Q-.** Minor errors or omissions in briefings/debriefings or critiques. Unclear objectives. Provided some corrective feedback guidance, but feedback was not always given constructively or at appropriate times. Offered incomplete mission reconstruction and/or analysis of events. Debrief covered objectives and mission highlights with minor errors or omissions. Minor discrepancies did not affect safety or adversely affect student.

4.3.2.3. **U.** Major errors or omissions in briefings/debriefing and critiques were marginal or nonexistent. Failed to utilize training aids/references correctly when necessary. Failed to define realistic objectives. Feedback guidance not given, or given in a poorly timed, incomplete, inaccurate, and/or confusing manner. Failed to adequately provide mission reconstruction and/or analysis of events or elected not to debrief entirely. Major discrepancies adversely affected safety and/or student progress.

4.3.3. **Area 56, Instructor Knowledge.**

4.3.3.1. **Q.** Demonstrated thorough knowledge of procedures, regulations, requirements, mission systems/performance characteristics, and tactics at an instructor level.

4.3.3.2. **Q-.** Deficiencies in depth of knowledge, comprehension of procedures, regulations, requirements, mission systems/performance characteristics, and tactics. Minor discrepancies did not affect safety or adversely affect student progress.

4.3.3.3. **U.** Unfamiliar with procedures, regulations, requirements, mission systems/performance characteristics, and tactics. Lack of knowledge in certain areas

seriously detracted from instructor effectiveness. Deviations affected safety or adversely affected student progress.

4.3.4. **Area 1001, Training Forms Preparation / Documentation.**

4.3.4.1. **Q.** Reviewed student's training folder, past performance, and assessed current level of training. Accurately defined mission events to be performed as required. Comments were clear, comprehensive, pertinent, and adequately assessed recorded performance relative to standards/prescribed directives. Completed training documentation appropriately and accurately.

4.3.4.2. **Q-.** Reviewed student's training folder, past performance, and assessed current level of training with minor errors or omissions. Defined mission events to be performed as required, but with minor errors or omissions. Comments were incomplete or slightly unclear. Completed training documentation with minor errors or omissions that did not adversely impact student training.

4.3.4.3. **U.** Did not review student's training folder, past performance, or assess current level of training. Failed to define mission events to be performed when required or with major errors or omissions. Comments were incomplete, invalid, unclear, and/or did not accurately document performance. Assigned grades did not reflect actual student performance. Did not complete required forms and/or training documentation contained major discrepancies that adversely impacted student training.

Chapter 5

PILOT EVALUATIONS

5.1. General. Grading criteria contained herein cannot cover every situation. Written parameters should be tempered with sortie objectives, evaluator judgment, and task accomplishment in the determination of overall aircrew performance.

5.2. Qualification Evaluations.

5.2.1. Requisites. See **Table 3.1**.

5.2.2. Flight Phase. All areas required in **Table 5.1** under Aircraft Commander (AC) qualification or Pilot qualification (PQ) will be evaluated in flight to the max extent possible. Area 25, Landing must be accomplished inflight. **(T-3)**

5.2.3. Aircrew initially upgrading to aircraft commander will have a qualified Instructor Pilot (IP) in the right seat during critical phases of flight. If an IP is unavailable, the FE may occupy the right seat.

5.3. Multiple Qualification. RC/WC/TC-135 variants are considered the same series for pilots qualified in the RC-135V/W. DT IAW ACCMAN 11-2RC-135V1 and 55 OG/CC required prior to unsupervised flight on the series that pilots did not receive an INIT or RQ evaluation.

5.4. Instrument Evaluations.

5.4.1. Requisites. Instrument Refresher Course (IRC) Examination.

5.4.2. Flight Phase. All areas required in **Table 5.1** under "INSTM" will be evaluated.

5.5. Instructor Evaluations. Pilots receiving initial INSTR evaluations will occupy the right seat for evaluation of takeoff, initial buffet (ATD only), and all traffic pattern activity. **(T-3)** An IP or FE will occupy the left seat. **(T-3)** On recurring checks, instructors may occupy either seat to accomplish required items in **Table 5.1**. A student, pilot, copilot, IP, or FE may occupy the opposite pilot position. Evaluate all instructor areas. In all cases, the examinee occupies the position normally required to instruct, and performs all tasks as demonstration items.

5.5.1. Instructor examinees accomplish the following demonstrations:

5.5.1.1. Approach to initial buffet (initial C-135 instructors only; accomplish only in ATD).

5.5.1.2. 30 flap landing.

5.5.1.3. Touch and go landing. Instructor examinees perform touch and go landings as both pilot flying and pilot monitoring.

5.5.1.4. Grade demonstrations using the criteria for Areas 33 and 56. Grade 30 Flap landing/Touch and Go landings using Area 25 and Area 75.

5.5.2. Instructor Requalification Evaluations. Follow guidance for recurring INSTR evaluations, IAW AFMAN 11-202V2.

5.6. EPE, additional guidance.

5.6.1. EPEs evaluate the pilot's performance of all boldface procedures, a cross section of noncritical emergency procedures, and knowledge and performance of general systems operation. At a minimum, evaluate all boldface/critical action items.

5.6.2. The FE administers the EPE in the ATD or conducts a tabletop exercise and documents the method of EPE accomplishment in the comments block of the AF Form 8.

5.6.3. Evaluate Engine Failure during Takeoff or Climb-Out After Takeoff for AC or IP examinees during the EPE.

5.6.4. If the EPE is being conducted in conjunction with an INSTM evaluation the following should be included.

5.6.4.1. Unusual Attitudes (ATD only).

5.6.4.2. Holding.

5.6.4.3. General instrument procedures and non-critical instrument malfunctions.

5.6.4.4. Low visibility approach and landing [ceiling/visibility ≤ 500/2] (ATD only).

5.6.4.5. Instrument approach with missed approach [ceiling/visibility below minimums] (ATD only).

5.7. Pilot Evaluation Requirements. Table 5.1 lists areas for pilot or copilot qualification, instrument, and INSTR evaluations.

Table 5.1. Pilot Evaluation Requirements.

Area	DESCRIPTION	NOTES	AC	PQ	INSTM
2	Briefings		Q		
3	Pre-Takeoff		Q	Q	
4	Takeoff		Q	Q	
6	Departure/Climb (Instrument Flight Rules (IFR)/Visual Flight Rules (VFR))		Q	Q	
8	Cruise/Navigation		Q	Q	
10	In-Flight Checks		Q	Q	
12	Air Traffic Control (ATC) Communications/Identification Friend or Foe(IFF)/ Selective Identification Feature (SIF)		Q	Q	
15	Unusual Attitudes				R

738	Automation Management	6	Q	Q	
746	Operations Procedures	5	M	M	
1002-1007	Reserved				

Notes:

1. Includes practice emergency separations. Non-instructor aircraft commander qualification evaluations can be completed without AR qualification at OG/CC discretion. AC/IP will complete an inflight refueling SPOT evaluation if not accomplished during the initial qualification. **(T-3)**

2. Tactical air navigation system (TACAN), Localizer/VHF omni-directional radio range (VOR), air surveillance radar (ASR), lateral navigation (LNAV) or non-directional beacon (NDB) (if installed).

3. Not required for SSQ evaluations.

4. Instrument Landing System (ILS), Precision Approach Radar (PAR) or approach with vertical guidance (APV) (localizer performance with vertical guidance (LPV), LNAV/vertical navigation (VNAV), localizer type directional aid (LDA) with glide slope)

5. Reference ACCMAN 11-2RC-135V2 *55th Group Supplement* for more guidance.

6. VNAV, Datalinks, autopilot and/or auto throttles

5.8. General Grading Criteria. For grading general areas, see **Chapter 4**. For all evaluations, the FE will disregard minor deviations from tolerances for the purpose of clearing conflicting traffic provided the examinee initiates timely corrective action. **(T-2)** When Visual Meteorological Conditions, see and avoid responsibilities are paramount. Apply the general criteria from **Table 5.2** during all phases of flight except as noted for specific events:

Table 5.2. General Pilot Grading Criteria.

Q	Altitude	+/- 200 feet
	Airspeed	+/- 20 Kts
	MACH Speed	+/- .03
	Heading (when assigned or as specified)	+/- 5 degrees
	TACAN Arc	+/- 2 NM
Q-	Altitude	+/- 300 feet
	Airspeed	+/- 25 Kts
	MACH Speed	+/- .04
	Heading (when assigned or as specified)	+/- 10 degrees
	TACAN Arc	+/- 3 NM
U	All	Exceeded Q- Limits

5.9. Specific Grading Criteria.

5.9.1. **Area 2, Briefings.**

5.9.1.1. **Q.** Briefings were well organized and presented effectively in a logical sequence. Covered all pertinent items according to applicable AFMANs, Flight Manuals, Flight Information Publications, Foreign Clearance Guide, and/or other directives. Effectively used available briefing aids.

5.9.1.2. **Q-.** Briefings lacked continuity or contained unnecessary repetition. Some difficulty communicating thoughts clearly. Did not make effective use of available briefing aids. Dwelled on non-essential items.

5.9.1.3. **U.** Failed to use briefing aids. Omitted essential items. Demonstrated lack of knowledge of subject. Briefing was poorly organized and not presented in logical sequence, resulting in confusion. Presented erroneous information which would affect safe/effective mission accomplishment.

5.9.2. **Area 3, Pre-Takeoff.**

5.9.2.1. **Q.** Performed all required procedures, calculations, and coordination prior to takeoff according to flight manuals, applicable directives, and conditions. Accurately determined aircraft's readiness for flight. Taxi speeds appropriate for conditions. Visually cleared area.

5.9.2.2. **Q-.** Minor procedural deviations which would not detract from mission effectiveness. Accurately determined aircraft's readiness for flight. Limited knowledge of

performance data and aircraft weight and balance. Taxi speeds appropriate for conditions. Visually cleared area.

5.9.2.3. **U.** Omitted major item(s). Major deviation in procedures. Failed to accurately determine aircraft's readiness for flight. Inadequate knowledge of performance data and aircraft weight and balance. Taxi speeds inappropriate for conditions. Did not adequately clear area.

5.9.3. **Area 4, Takeoff.**

5.9.3.1. **Q.** Smooth, positive aircraft control throughout takeoff. Performed according to flight manual procedures.

5.9.3.2. **Q-.** Minor deviations from published procedures not affecting safety of flight. Control rough or erratic. Hesitant to apply corrections.

5.9.3.3. **U.** Liftoff potentially dangerous. Exceeded aircraft/systems limitations. Failed to establish proper climb attitude. Marginal control of the aircraft. Violated flight manual procedures.

5.9.4. **Area 6, Departure/Climb (IFR/VFR).** Airspeed "+" tolerances do not apply unless assigned by ATC or restricted by tech data. Examinee did not exceed placard speeds.

5.9.4.1. **Q.** Performed departure as published/directed and complied with all restrictions. Applied headings/course corrections promptly. Airspeed +/- 10 Kts.

5.9.4.2. **Q-.** Performed departure as published/directed and complied with all restrictions. Slow to apply headings/course corrections. Airspeed +/- 15 Kts.

5.9.4.3. **U.** Failed to comply with published/directed departure instructions or exceeded Q- criteria. Failed to maintain positive rate of climb.

5.9.5. **Area 8, Cruise/Navigation.**

5.9.5.1. **Q.** Leveled off smoothly. Established proper cruise airspeed promptly. Properly used appropriate navigation equipment/procedures. Ensured navaids were properly tuned, identified, and monitored. Aware of exact position at all times. Visually cleared the area. Maintained/adjusted speeds as required to meet mission timing.

5.9.5.2. **Q-.** Level off erratic. Slow in establishing proper cruise airspeed. Minor errors in procedure/use of navigation equipment. Some deviations in tuning, identifying, and monitoring navaids. Slow to comply with clearance instructions. Had some difficulty in establishing exact position and maintaining/ adjusting speed to meet mission requirements. Visually cleared the area.

5.9.5.3. **U.** Level off erratic, exceeded Q- criteria. Excessive delay or failed to establish proper cruise airspeed. Major errors in procedures/use of navigation equipment to the extent that position was unreliable. Did not maintain/adjust speed to meet mission requirements. Did not visually clear the area.

5.9.6. **Area 10, In-Flight Checks.**

5.9.6.1. **Q.** Adhered to briefed/directed minimum fuel requirements/performed in-flight checks as required. Satisfactorily managed/monitored fuel and other systems.

5.9.6.2. **Q-.** Deviations or omissions during checks did not detract from mission accomplishment.

5.9.6.3. **U.** Did not adhere to minimum fuel requirements, perform in-flight checks, or monitor systems to the degree that an emergency condition could develop if allowed to continue uncorrected.

5.9.7. **Area 12, ATC Communications/IFF/SIF.**

5.9.7.1. **Q.** Complete knowledge of and compliance with correct procedures. Transmissions concise with proper terminology. Complied with and acknowledged all required instructions. Understood clearances and complied with controlling agency instructions. Correctly operated equipment.

5.9.7.2. **Q-.** Occasional deviations from correct procedures that required re-transmissions. Slow in initiating required actions. Transmissions contained extraneous information, were not in proper sequence, non-standard terminology. Understood clearances. Complied with controlling agency instructions with minor errors or omission not affecting mission safety. Slow to comply with controlling agency instructions. Missed several radio calls from ATC. Minor errors, deviations, or omissions in operating equipment.

5.9.7.3. **U.** Incorrect procedures or poor performance caused confusion and reduced mission effectiveness. Omitted required checks or procedures. Erroneous IFF/SIF codes used. Did not understand clearance or accepted clearance that could not be complied with. Did not read back clearance accurately (when required). Did not comply with clearance. Did not make required reports. Major errors, deviations, or omissions in operating equipment.

5.9.8. **Area 15, Unusual Attitudes.**

5.9.8.1. **Q.** Smooth positive recovery to level flight, correct recovery procedures used, or demonstrated satisfactory knowledge of correct procedures.

5.9.8.2. **Q-.** Slow to analyze attitude, or erratic in recovery to level flight correct recovery procedures followed.

5.9.8.3. **U.** Unable to determine attitude, or improper recovery procedures.

5.9.9. **Area 17, Air Refueling. Note:** Copilots will be evaluated on performance of duties during rendezvous and refueling operations including fuel panel operations and checklist procedures. Copilot AR checks may be completed in the ATD or an aircraft on the ground if unable to complete during flight. AR track time should be scheduled to allow a minimum of 30 minutes contact time. Unit Standardization and Evaluation (Stan/Eval) may establish a maximum amount of time from initial pre- contact to achieve required contact time.

5.9.9.1. **Q. Instructors and Aircraft Commanders (ACs)**. Continuous contact for 15 minutes for initial qualification, no more than 3 inadvertent disconnects. Continuous contact for 10 minutes with not more than 3 inadvertent disconnects for recurring evaluations (may be reduced to 5 minutes for INSTR evaluations.) Used correct procedures during emergency separation. **Copilots.** Preplanned target fuel distribution and on-load to remain within aircraft weight/center of gravity (CG) limits. Correctly configured the aircraft for refueling. Operated fuel panel during refueling to achieve desired on-load IAW

planned or recalculated distribution. Provided appropriate back up to AC. Used correct procedures during emergency separation.

5.9.9.1.1. Airspeed +/- 10 kts (0.5 NM).

5.9.9.1.2. Altitude +/- 200 ft (1 NM) -300 ft to +100 ft (1 NM to 0.5 NM).

5.9.9.2. **Q-. Instructors and Aircraft Commanders (ACs)**. Continuous contact for 15 minutes for initial qualification, more than 3 inadvertent disconnects. Continuous contact for 10 minutes with more than 3 inadvertent disconnects for recurring evaluations (may be reduced to 5 minutes for INSTR evaluations.) Slow to recognize and apply needed corrections to establish and maintain proper refueling position. Aircraft control not always positive and smooth, but adequate. Accomplished procedures required by the flight manual and local directives with minor errors, deviations, and/or omissions. Minor errors, deviations, and/or omissions in emergency separation procedures. **Copilots.** Preplanned target fuel distribution and on-load to remain within aircraft weight/CG limits. Correctly configured the aircraft for refueling. Operated fuel panel during refueling to achieve desired onload IAW planned or recalculated distribution. Provided minimal back up to aircraft commander. Minor errors, deviations, or omissions in emergency separation procedures.

5.9.9.2.1. Airspeed +/- 15 kts (0.5 NM).

5.9.9.2.2. Altitude +/- 300 ft (1 NM) -300 ft to +200 ft (1 NM to 0.5 NM).

5.9.9.3. **U. Instructors and Aircraft Commanders (ACs)**. Erratic or dangerous in the refueling position. Errors/deviations/omissions that affected flight safety and/or the successful completion of AR. Exceeded the Q- criteria. Major errors, deviations, or omissions in aerial refueling procedures including practice separations. **Copilots.** Major errors, deviations, and/or omissions in configuring the aircraft for refueling. Did not calculate target fuel distribution and CG or exceeded Q- criteria. Exceeded or attempted to exceed operating/CG limits while operating fuel panel during refueling. Did not back up, or caused distraction of, the aircraft commander. Major errors, deviations, and/or omissions in procedures during emergency separation.

5.9.10. **Area 18, Descent (Enroute or Published).**

5.9.10.1. **Q.** Performed descent as directed. Complied with all restrictions. Visually cleared the area. Complied with flight manual procedures and local directives. Computed required airspeeds and distances.

5.9.10.2. **Q-.** Performed descent as directed with minor deviations. Visually cleared the area adequately. Slow to accomplish flight manual procedures and complied with local directives. Limited knowledge of performance data.

5.9.10.3. **U.** Performed descent with major deviations. Did not accomplish required checks. Failed to visually clear the area adequately. Major errors, deviations, or omissions in landing data. Exceeded Q- criteria. Inadequate knowledge of performance data.

5.9.11. **Area 19, Go Around.** May be flown from any type of approach, IFR or VFR. May be combined with Area 24, Missed Approach. FE may direct a go-around at any point in an approach or landing to evaluate go-around procedures.

5.9.11.1. **Q.** Aircraft control was smooth and positive. Promptly established appropriate go around pitch and power settings. Performed procedures IAW the flight manual. Complied with pattern/maneuver and flap retraction speed limitations.

5.9.11.2. **Q-.** Slow to establish appropriate go around pitch and power settings. Minor errors/ deviations/omissions in flight manual procedures. Complied with pattern/maneuver and flap retraction speed limitations.

5.9.11.3. **U.** Rough or erratic aircraft control. Pitch and power settings were inappropriate. Major errors/deviations/omissions in flight manual procedures. Failed to comply with pattern/ maneuver and/or flap retraction speed limitations.

5.9.12. **Area 23, VFR Traffic Pattern.** May be graded using a rectangular pattern, overhead pattern, or a circling maneuver.

5.9.12.1. **Q.** Performed traffic patterns according to the flight manual, operational procedures, and directives. Aircraft control was positive and smooth. Effectively cleared ahead of flight path. Airspeed +(did not exceed flap placard speed)/-5 kts.

5.9.12.2. **Q-.** Performed traffic patterns with minor deviations to procedures outlined in the flight manual, operational procedures, and directives. Aircraft control was not consistently positive and smooth, but safe. Adequately cleared area of intended flight. Airspeed +(did not exceed flap placard speed)/-5 kts.

5.9.12.3. **U.** Traffic patterns not performed according to procedures outlined in the flight manual, operational procedures, and directives. Erratic aircraft control. Did not clear area of intended flight. Exceeded Q- criteria.

5.9.13. **Area 25, Landing.**

5.9.13.1. **Q.** Performed landings according to procedures outlined in the flight manual, operational procedures, and directives.

5.9.13.1.1. Threshold Speed: +10/-5 kts.

5.9.13.1.2. Touchdown Point: +/- 1000 feet as compared to computed flare distance and within stopping distance for runway available.

5.9.13.1.3. Centerline: Touchdown +/- 15 feet of centerline.

5.9.13.2. **Q-.** Landings performed according to procedures outlined in the flight manual, but outside the tolerances listed in Q criteria. Touchdown within stopping distance for runway available.

5.9.13.3. **U.** Landings not performed according to procedures outlined in the flight manual, operational procedures, and directives. Exceeded Q- criteria.

5.9.14. **Area 26, After Landing.**

5.9.14.1. **Q.** Aircraft taxi procedures accomplished IAW the flight manual and applicable directives. Taxi speeds appropriate for conditions. Visually cleared area. Safely followed marshaller’s instructions.

5.9.14.2. **Q-.** Same as Q except minor errors, deviations or omissions were noted in aircraft taxi procedures. Taxi speeds appropriate for conditions. Visually cleared area. Some confusion over marshaller's instructions.

5.9.14.3. **U.** Major errors, deviations or omissions were made in aircraft taxi procedures. Taxi speeds inappropriate for conditions. Failed to clear. Disregarded marshaller's instructions or allowed marshaller to direct an unsafe situation.

5.9.15. **Area 36, Equipment/Systems Knowledge.**

5.9.15.1. **Q.** Satisfactory knowledge of systems ensuring effective operation within prescribed limits and diagnosis of problems. Explained proper corrective action for each type of malfunction. Effectively utilized publications and/or available aids.

5.9.15.2. **Q-.** Incomplete knowledge of system operating limits. Slow to analyze problems or take proper corrective action. Did not effectively use publications and/or available aids.

5.9.15.3. **U.** Unsatisfactory knowledge of systems. Unable to analyze problems or take corrective action. Did not use publications and/or available aids.

5.9.16. **Area 54, Emergency Procedures - Boldface (CRITICAL).**

5.9.16.1. **Q.** Correct responses. Maintained aircraft control. Coordinated proper actions.

5.9.16.2. **U.** Incorrect sequence, unsatisfactory response, or unsatisfactory performance of corrective action.

5.9.17. **Area 61, Holding.**

5.9.17.1. **Q.** Entry and holding procedures according to applicable directives. Airspeed +/- 15Kts.

5.9.17.2. Q-. Non-standard entry and holding procedures but remained within air space limits. Airspeed +/- 20 kts.

5.9.17.3. **U.** Exceeded holding airspace limits or Q- criteria.

5.9.18. **Area 63, IFR Pattern (prior to Final Approach Fix (FAF)).**

5.9.18.1. **Q.** Procedures required by the flight manual and applicable directives were accomplished. Followed controller's instructions and complied with all restrictions. Made smooth and timely corrections. Airspeed +20 (did not exceed flap placard)/-5 kts.

5.9.18.2. **Q-.** Procedures required by the flight manual and applicable directives were accomplished with omissions or deviations. Slow or hesitant in following controller's instructions. Over controlled slightly or occasionally and/or slow in making corrections. Airspeed +30 (did not exceed flap placard)/-5 kts.

5.9.18.3. **U.** Made major deviations or omissions in procedures required by the flight manual or directives. Failed to comply with controller instructions. Exceeded Q- criteria.

5.9.19. **Area 64, Non-Precision Approach (FAF-Missed Approach Point (MAP)). Note:** Only approaches with a published MDA, not Decision Hehight (DH)/DA, qualify for evaluation purposes. Approaches to minimums requiring vertical guidance do not qualify for evaluation purposes.

5.9.19.1. **Q.** Performed procedures as published/directed. Made smooth and timely corrections. Position would have permitted safe landing.

5.9.19.1.1. Airspeed +10/-5 kts. 5.9.19.1.2. Altitude +100/-0 feet.

5.9.19.1.2. Heading/Course +/-5 degrees or within one dot.

5.9.19.1.3. Timing computed to 10% of actual timing (when applicable).

5.9.19.2. **Q-.** Performed procedures with minor deviations. Slow to make corrections. Position would have allowed safe landing.

5.9.19.2.1. Airspeed +15/-5 kts.

5.9.19.2.2. Altitude +100/-50 feet.

5.9.19.2.3. Heading/Course +/-10 degrees or within two dots.

5.9.19.2.4. Timing computed to 20% of actual timing (when applicable).

5.9.19.3. **U.** Performed procedures with major deviations. Erratic corrections. Exceeded Q- criteria. Maintained steady state flight below MDA even though the -50 foot momentary deviation limit was not exceeded. Position would not have permitted a safe landing.

5.9.20. **Area 65, Precision Approach (Glidepath-Decision Height/Altitude (DH/DA)). Note:** An ILS, PAR, or Approach with Vertical Guidance (LPV, LNAV/VNAV, LDA with glideslope) qualify for evaluation purposes.

5.9.20.1. **Q.** Performed procedures correctly/as published. Smooth and timely corrections. Initiated appropriate action or prompt response at DA. Position would have permitted a safe landing.

5.9.20.1.1. Glide slope. Did not exceed slightly above/slightly below or one dot.

5.9.20.1.2. Airspeed +10/-5 kts.

5.9.20.1.3. Heading/Course +/-5 degrees of controller's instructions/within 1 dot.

5.9.20.2. **Q-.** Performed procedures with minor deviations. Slow to respond/make corrections. Initiated appropriate action at DH/DA +/-50 ft. Position would have permitted a safe landing.

5.9.20.2.1. Glide slope Within PAR safety limits or 2 dots above/1 dot below.

5.9.20.2.2. Airspeed +15/-5 kts.

5.9.20.2.3. Heading/Course +/-10 degrees of controller's instructions/within 2 dots.

5.9.20.3. **U.** Performed procedures with major deviations. Erratic corrections. Did not respond to controller's instructions and/or exceeded Q- criteria. Did not comply with DH/DA. Position would not have permitted a safe landing.

5.9.21. **Area 67, Missed Approach. Note:** Missed approach should be initiated from an instrument approach. Airspeed "+" tolerances do not apply unless assigned/restricted by ATC/tech data. Examinee did not exceed placard speeds.

5.9.21.1. **Q.** Executed missed approach as published or directed. Completed all procedures according to applicable flight manual and directives.

5.9.21.1.1. Airspeed +/- 5 kts.

5.9.21.1.2. Heading +/- 5 degrees.

5.9.21.2. **Q-.** Executed missed approach with minor deviations. Slow to comply with published procedures, controller's instructions, flight manual procedures, or directives.

5.9.21.2.1. Airspeed +/- 10 kts.

5.9.21.2.2. Heading +/- 10 degrees.

5.9.21.3. **U.** Executed missed approach with major deviations. Failed to comply with published procedure, controller's instructions, flight manual procedures, or directives. Exceeded Q- criteria.

5.9.22. **Area 70, Simulated Engine-Out Pattern/Landing. Note:** AC or IP only.

5.9.22.1. **Q.** Performed pre-landing checks, traffic pattern, approach and landing IAW procedures outlined in the flight manual and other directives. Aircraft control was positive and smooth.

5.9.22.1.1. Airspeed on final +15/-5 kts.

5.9.22.1.2. Airspeed Pattern +(did not exceed flap placard)/-5 kts.

5.9.22.2. **Q-.** Minor procedural errors during pre-landing checks, traffic pattern, approach/ landing which did not affect safety. Landed in slight crab.

5.9.22.2.1. Airspeed on Final +20/-5 kts.

5.9.22.2.2. Airspeed Pattern +(did not exceed flap placard)/-10 kts.

5.9.22.3. **U.** Failed to recognize and apply corrections to avoid over/undershoots, did not comply with procedures outlined in the flight manual/other directives. Exceeded Q- criteria.

5.9.23. **Area 74, Simulated Engine-Out/Go Around. Note:** AC or IP only.

5.9.23.1. **Q.** Initiated and performed go-around promptly IAW flight manual and applicable directives. Acquired/maintained a positive climb with airspeed no less than -5 Kts.

5.9.23.2. **Q-.** Slow or hesitant to initiate go-around. Minor procedural deviations which did not affect safety. Acquired/maintained a positive climb. Airspeed not less than -10 Kts.

5.9.23.3. **U.** Did not initiate go-around when appropriate or directed. Techniques unsafe or applied incorrect procedures. Exceeded Q- criteria.

5.9.24. **Area 75, Touch and Go Landings. Note:** Instructors will perform a touch and go as both the pilot flying and pilot monitoring to complete this area. **(T-3)**

5.9.24.1. **Q.** Complied with flight manual procedures, operational restrictions, and local directives. Ensured adequate runway length to permit a safe stop. Corrected to centerline prior to rotation. Smooth, positive aircraft control throughout takeoff phase.

5.9.24.2. **Q-** , Minor errors, deviations, or omissions in flight manual procedures, operational restrictions, or local directives. Ensured adequate runway length to permit a

safe stop. Slow to correct to centerline. Control rough, erratic, or hesitant during takeoff phase.

5.9.24.3. **U.** Major errors, deviations, or omissions in flight manual procedures, operational restrictions, or local directives. Failed to ensure adequate runway length. Did not correct to centerline. Liftoff potentially dangerous. Over controlled aircraft.

5.9.25. **Area 465, Engine Failure During Takeoff or Climbout After Takeoff. Note:** AC or IP only.

5.9.25.1. **Q.** Used positive application of proper control inputs. 10 kts or less of airspeed lost. Called for and accomplished checklist IAW Technical Order.

5.9.25.2. **Q-.** Slow to apply proper inputs. Lost more than 10 but not greater than 15 kts of airspeed. Slow to call for and accomplish required checklist.

5.9.25.3. **U.** Failed to properly control aircraft. Lost more than 15 kts of airspeed. Failed to call for or accomplish required checklist.

5.9.26. **Area 738, Automation Management.**

5.9.26.1. **Q.** Satisfactorily demonstrated knowledge and employment of automation appropriate for mission or segment of flight. Automation increased safety, CRM, and enhanced the mission effectiveness.

5.9.26.2. **Q-.** Lack of or incorrect use of automation appropriate for mission or segment of flight. Knowledge was incorrect or employed wrongly. Mission was unaffected.

5.9.26.3. **U.** Lack of or incorrect use of automation resulting in mission ineffectiveness or failure. Errors, deviations, or omissions that negatively affected flight safety, CRM, and/or caused significant violation(s) of AFMAN, FAA, or ICAO guidance.

5.9.27. **Area 746, Operations Procedures.**

5.9.27.1. **Q.** Satisfactorily complied with all appropriate mission procedures. Monitored mission and supervised flight with no loss of collection.

5.9.27.2. **Q-.** Accomplished mission with errors or deviations from procedures. Collection was degraded but not lost.

5.9.27.3. **U.** Errors, deviations, or omissions that affected flight safety and/or the successful completion of the mission. Exceeded the Q- criteria. Significant loss of collection.

Chapter 6

NAVIGATOR EVALUATIONS

6.1. General. Grading criteria contained herein cannot cover every situation. Written parameters should be tempered with sortie objectives, evaluator judgment, and task accomplishment in the determination of overall aircrew performance. Specific requirements for each evaluation are as follows:

6.2. Qualification Evaluations.

6.2.1. Requisites. See **Table 3.1**.

6.2.2. Flight phase. All areas in **Table 6.1** will be evaluated either in the aircraft or ATD (TVC 1) IAW this ACCMAN and ACCMAN 11-2RC-135V2 Supplement or local guidance. **(T-2)**

6.3. Multiple Qualification. RC/WC/TC-135 variants are considered the same series for navigators qualified in the RC-135V/W. DT IAW 11-2RC-135V1 and 55 OG/CC required prior to unsupervised flight on the series that pilots did not receive an INIT or RQ evaluation. Document initial certification on AF Form 4348.

6.4. Instructor (INSTR) Evaluations.

6.4.1. Initial Instructor. If combined with a recurring QUAL evaluation, the examinee will be in the seat for the primary events (e.g., AR, recon orbit procedures). **(T-3)** The examinee will demonstrate proficiency by instructing a student navigator (ideal) or a qualified navigator, in all areas required for a qualification evaluation. **(T-3)** The evaluator may require the examinee to demonstrate and/or present verbal instruction of AR, emergency equipment, aircraft systems, navigation procedures, and techniques.

6.4.2. Recurring Instructor. For recurring INSTR evaluations, all applicable areas required in **Table 6.1** and all instructor areas will be evaluated. **(T-2)** The evaluator may require the examinee to demonstrate and/or present verbal instruction. The examinee can demonstrate proficiency by instructing a navigator who is executing primary navigator duties. These demonstrations should be briefed to the examinee and accomplished in- flight/ATD at an appropriate time so as not to interfere with the examinee's crew duties or pacing.

6.4.3. Instructor Requalification Evaluations. Follow guidance for recurring INSTR evaluations, IAW AFMAN 11-202V2.

6.5. Emergency Procedures Evaluation (EPE). EPEs may be conducted verbally and satisfy the requirement for emergency procedures if no actual emergency procedure is experienced in-flight.

6.6. Navigator Evaluation Requirements. The table below lists areas for navigator qualification and INSTR evaluations.

Table 6.1. Navigator Evaluation Requirements.

Area	DESCRIPTION	NOTES	
8	General Navigation/and Inflight Info		Q
17	Air Refueling	1	Q
20	Descent/Approach/Landing		Q
295	Orbit Procedures		M
296	Pacing		Q
755	Equipment/Systems Operation		M
1014-1020	Reserved		

Notes:
1. Not required for SSQ evaluations.

6.7. General Grading Criteria. For grading general areas, see **Chapter 4**.

6.8. Specific Grading Criteria.

6.8.1. **Area 8, General Navigation and Inflight Information. Note:** The navigator is always responsible for position awareness. Navigator's primary responsibility for navigation commences at level off and ceases when the pilot or air traffic controller assumes responsibility for navigation to the terminal facility.

6.8.1.1. **Q.** Maintained course, any deviations were momentary and did not exceed 5 NM (2 NM or as specified for operations below Flight Level 180) from Air Route Traffic Control Center- cleared course. System crosschecks using all available resources were accomplished during the flight. Significant errors were resolved prior to the next crosscheck.

6.8.1.2. **Q-.** Did not allow the airplane to deviate more than 10 NM (4 NM or as specified for operations below Flight Level 180) from the course. System crosschecks using all available resources were accomplished during the flight.

6.8.1.3. **U.** Exceeded Q- tolerances.

6.8.2. **Area 17, Air Refueling. Note:** Navigators should demonstrate proficiency in Allied Tactical Publication (ATP)-3.3.4.2., *Air-To-Air Refueling*, and established flight manual procedures in all phases of AR. Examinee should not be penalized for radio malfunctions or limitations (e.g., unable to contact a command post) that prevent revising the rendezvous time or accomplishing required radio calls on time.

6.8.2.1. **Q.** Rendezvous, AR procedures, and checklists were accomplished with no more than minor discrepancies. Met planned AR timing +/- 1.5 minutes using all reasonable effort. If unable to make the scheduled AR rendezvous time after using speed and route adjustments, coordinated a revised Rendezvous Control Time (RVCT). Directed closure to within 1 NM of tanker or until pilots have visual with the tanker and assume responsibility for the rendezvous. No training was lost which could be attributed to the navigator's error.

6.8.2.2. **Q-.** Displayed lack of knowledge with rendezvous, AR procedures, and/or checklists; however, was able to accomplish rendezvous and AR with minimal loss of training. Poor timing control resulted in delaying the rendezvous (greater than 1.5 but less

than 2.5 minutes of the RVCT) but a revised RVCT was coordinated prior to the IP. Directed closure to within 1 NM of tanker or until pilots have visual with the tanker and assume responsibility for the rendezvous. No significant training was lost which could be attributed to the navigator's error.

6.8.2.3. **U.** Exceeded Q- tolerances.

6.8.3. **Area 20, Descent/Approach/Landing.**

6.8.3.1. **Q.** Configured Flight Management System (FMS) for approach. Provided heading, altitude, and airspeed corrections when required. Thoroughly understood approach and/or missed approach instructions/procedures.

6.8.3.2. **Q-.** Did not monitor or understand approach and/or missed approach instructions/procedures. Slow to provide heading, altitude or airspeed corrections when required.

6.8.3.3. **U.** Failed to monitor aircraft position. Did not ensure terrain clearance during approach. Incorrectly loaded FMS and approach was delayed, or wrong approach was loaded into FMS.

6.8.4. **Area 295, Orbit Procedures. Note:** If the orbit/data track procedures should be terminated or abbreviated for weather, equipment malfunction, emergency, or mission profile change, the evaluator may give credit for this event provided all "Q" requirements are met. May be conducted verbally with an experienced navigator.

6.8.4.1. **Q.**

6.8.4.1.1. [**RC-135V/W]** Orbit procedures were IAW prescribed directives and were accomplished with no more than minor discrepancies. Every reasonable effort was made to make exit timing within +/- 1.5 minutes of briefed control time with no degrade to collection activity. Repositioned aircraft as required to cover tactical mission requirements.

6.8.4.1.2. [**RC-135S/U]** Rolled out at TOT within 1 minute of the announced time, and within 2 degrees of the desired data track heading. Forwarded the time-on-track and current true heading to the Tactical Coordinator (TC) within 2 minutes after rollout.

6.8.4.1.3. [**WC-135R]** Adequately monitored position and ensured placement of aircraft to optimize collection IAW orbit and re-intercept procedures. Kept aircraft within bounds of operating area at all times.

6.8.4.2. **Q-:**

6.8.4.2.1. **[RC-135V/W]** Displayed a lack of knowledge and familiarity with orbit area procedures. However, knowledge was sufficient to ensure orbit area procedures were accomplished with minimal loss of training or collection activity. Exit timing was greater than 1.5 minutes but less than 2.5 minutes of briefed time.

6.8.4.2.2. **[RC-135S/U]** Rolled out at TOT, within 1.5 minutes of the announced time and within 3 degrees of the desired data track heading. Forwarded the time-on-track and current true heading to the TC within 3 minutes after rollout.

6.8.4.2.3. **[WC-135R]** Deviations from course were minor and would have had a minimal effect on mission accomplishment. Displayed a lack of familiarity with orbit and re- intercept procedures. Aircraft strayed outside the operating area boundary.

6.8.4.3. **U.** Exceeded Q- criteria.

6.8.5. **Area 296, Pacing.**

6.8.5.1. **Q.** Held an even workflow, achieving maximum use of available time. Stayed ahead of flight progress. Expeditiously dealt with deviations from original flight plan.

6.8.5.2. **Q-.** Pacing was adequate but occasionally worked behind aircraft.

6.8.5.3. **U.** Overall pacing was unsatisfactory. Worked behind aircraft throughout most of flight.

6.8.6. **Area 755, Equipment/Systems Operation.**

6.8.6.1. **Q.** Operated equipment effectively. Equipment was operated/configured according to prescribed procedures and directives. Navigation system was never more than 5 NM in error provided there were no malfunctions or GPS jamming.

6.8.6.2. **Q-.** Operated equipment hesitantly or slowly, indicating a need for study and/or corrective training. Examinee made minor omissions, deviations, or errors in prescribed procedures and directives. Actions could not have damaged equipment or jeopardized sortie accomplishment. Navigation system was never more than 10 NM in error provided there were no malfunctions or GPS jamming.

6.8.6.3. **U.** Did not operate/configure equipment IAW prescribed procedures and directives. Examinee made significant omissions, deviations, or errors. Equipment damage could have occurred as a result of operator error/deviation.

Chapter 7

ELECTRONIC WARFARE OFFICER (EWO) EVALUATIONS

7.1. General. Grading criteria contained herein cannot cover every situation. Written parameters should be tempered with sortie objectives, evaluator judgment, and task accomplishment in the determination of overall aircrew performance. Specific requirements for each evaluation are as follows:

7.2. Qualification Evaluations.

7.2.1. Requisites. See **Table 3.1**.

7.2.2. Flight Phase. All areas required in **Table 7.1** will be evaluated. **(T-2)**

7.2.3. INIT Qualification evaluations will not be performed in ATD or static aircraft.

7.3. Multiple Qualification. See **Attachment 2** to determine if DT or evaluation is required for unsupervised flight.

7.4. Upgrade Evaluations.

7.4.1. TC is an upgrade from a base EWO qualification on their respective RC-135 series. Members upgraded to TC are qualified to execute EWO duties unless otherwise restricted on AF Form 8.

7.4.2. Crew positions not authorized in **Attachment 2** are considered multiple qualifications and must be IAW AFMAN 11-202V2_ACCSUP, Para 5.10.

7.5. Instructor(INSTR) Evaluations. Grade all areas required in **Table 4.2**. General grading criteria is located in **Chapter 4**. Accomplish Initial Instructor evaluations during flight.

7.6. Emergency Procedures Evaluation. EPEs may be conducted verbally and satisfy the requirement for emergency procedures if no actual emergency procedure is experienced in-flight.

7.7. EWO Evaluation Requirements. The table below lists areas for EWO qualification.

Table 7.1. EWO Evaluation Requirements.

Area	DESCRIPTION	NOTES	EWO	TC
13	Crew Management			Q
36	Equipment/Systems Knowledge		Q	Q
84	Mission Coordination			M
111	Search and Acquisition		M	M
755	Equipment/Systems Operation	1	Q	Q
757	Data Collection Recording		M	M
760	Graphics Functions		Q	Q
762	Track Management	2, 3	M	M
768	Tasking and Reporting		M	M
769	Threat Warning	2, 3		M
1021-1025	Reserved			

Notes:
1. Required for SSQ evaluations.
2. Not required for RC-135U.
3. Not required for RC-135S.

7.8. General Grading Criteria. For grading general areas, see **Chapter 4**.

7.9. Specific Grading Criteria.

7.9.1. **Area 13, Crew Management.**

7.9.1.1. **Q.** Applied effective crew management concepts. Anticipated, planned, and responded appropriately to mission needs and unpredictable situations (e.g., crew illness, system malfunctions). Effectively managed RC-135 aircrew by implementing solutions leading to mission accomplishment with minor omissions, deviations, or errors.

7.9.1.2. **Q-.** Applied effective crew management concepts but with omissions, deviations, or errors detracted from planned mission accomplishment.

7.9.1.3. **U.** Did not apply crew management concepts. Failed to anticipate, plan, or respond to mission needs and unpredictable situations. Mismanaged aircrew and jeopardized mission accomplishment.

7.9.2. **Area 36, Equipment/Systems Knowledge. Note:** Equipment/system discussions may be accomplished at any time prior to the critique. Evaluators should ensure discussions do not interfere with the examinee's crew duties.

7.9.2.1. **Q.** Satisfactory knowledge of applicable reconnaissance equipment and related systems.

7.9.2.2. **Q-.** Incomplete knowledge of applicable reconnaissance equipment and related systems. Aware of and understands system limitations and cautions.

7.9.2.3. **U.** Unsatisfactory knowledge of applicable reconnaissance equipment and related systems. Unaware of or does not understand system limitations or cautions.

7.9.3. **Area 84, Mission Coordination.**

7.9.3.1. **Q.** Effectively coordinated (simulate as necessary) with off-board agencies, controlling authorities and platforms, and demonstrated adequate knowledge of their functions. Provided timely direction or information as required which clarified or rectified a situation.

7.9.3.2. **Q-.** Adequately coordinated (simulate as necessary) with off-board agencies, controlling authorities and platforms but demonstrated limited knowledge of their functions. Hesitated to provide direction/information which would have clarified confusion or rectified a situation.

7.9.3.3. **U.** Coordination (or simulated coordination) with off-board agencies, controlling authorities and platforms and lack of knowledge of their functions/responsibilities was detrimental to flying safety or mission effectiveness. Did not provide timely direction/information that would have clarified/rectified a situation.

7.9.4. **Area 111, Search and Acquisition.**

7.9.4.1. **Q.** Demonstrated the ability to define, modify, and configure the system for collection and reporting. Minor errors or deviations did not detract from task or mission accomplishment.

7.9.4.2. **Q-.** Operator defined, modified, or configured the system for collection and reporting with errors, or delays. Committed deviations that did not result in significant data loss or detract from mission accomplishment.

7.9.4.3. **U.** Failed to demonstrate the above tasks. Major errors degraded accomplishment of mission tasking, resulted in significant data loss, and/or jeopardized mission accomplishment.

7.9.5. **Area 755, Equipment/Systems Operation.** This area includes equipment operation, malfunctions, and corrective action procedures.

7.9.5.1. **Q.** Operated equipment effectively. Equipment was operated/configured according to prescribed procedures and directives. Used acceptable commands, search modes and procedures when interfacing with computer-aided systems.

7.9.5.2. **Q-.** Operated equipment hesitantly or slowly, indicating a need for study and/or corrective training. Examinee made minor omissions, deviations, or errors in prescribed procedures and directives that would not have damaged equipment or jeopardized mission accomplishment.

7.9.5.3. **U.** Did not operate/configure equipment IAW prescribed procedures and directives. Failed to use acceptable commands, search modes, and procedures when interfacing with computer-aided systems. Examinee made significant omissions, deviations, or errors. Equipment damage could have occurred because of operator error/deviation.

7.9.6. **Area 757, Data Collection/Recording.**

7.9.6.1. **Q.** Tasked data was intercepted, recorded, and annotated. Utilized adequate equipment settings and procedures.

7.9.6.2. **Q-.** Minor omissions, deviations, or errors that did not significantly jeopardize mission accomplishment or resulted in minimal data loss.

7.9.6.3. **U.** Failed to intercept, record, and/or adequately annotate tasked data. Significant deviations or errors. Lost significant data or jeopardized mission accomplishment.

7.9.7. **Area 760, Graphics Functions.**

7.9.7.1. **Q.** Established and manipulated graphics and displays considering mission objectives, specific action points, and likely threats. Situational awareness was achieved by use of the graphics functions.

7.9.7.2. **Q-.** Operator manipulated graphics and displays but with significant errors or delays. Deviations detracted from mission objectives but did not detract from planned mission accomplishment.

7.9.7.3. **U.** Failed to properly set-up or manipulate graphics, which caused a loss of situational awareness. Major errors or deviations jeopardized mission accomplishment.

7.9.8. **Area 762, Track Management.**

7.9.8.1. **Q.** Demonstrated the ability to read, interpret, manipulate, and amplify tracks and track data. Maintained situational awareness through efficient use of data display options and dynamic queue usage. Was able to use available resources to assist in the identification of unknown tracks.

7.9.8.2. **Q-.** Demonstrated the ability to read, interpret, manipulate, and amplify tracks and track data but with significant errors or delays. Committed minor deviations or omissions that did not detract from planned mission accomplishment.

7.9.8.3. **U.** Was unable to demonstrate efficient track management procedures. Was unable to read, interpret, manipulate, and amplify tracks and track data . Errors or deviations detracted from planned mission accomplishment.

7.9.9. **Area 768, Tasking and Reporting.**

7.9.9.1. **Q.** Based on tasking, flight manuals, and applicable directives, effectively accomplished mission tasking and required reporting.

7.9.9.2. **Q-.** Did not comply with all applicable tasking, flight manuals, and directives. Minor errors, omissions, or deviations in applying tasking and reporting guidance detracted from mission accomplishment but did not jeopardize mission accomplishment.

7.9.9.3. **U.** Failed to comply with applicable tasking, flight manuals, and directives. Major errors, omissions, or deviations jeopardized mission accomplishment.

7.9.10. **Area 769, Threat Warning.**

7.9.10.1. **Q.** Recognized situations requiring threat warning and took appropriate action. Demonstrated knowledge of common terminology, combat terminology, code words, authentication methods, brevity usage, and possessed general radio discipline.

7.9.10.2. **Q-.** Slow to recognize situations requiring threat warning or hesitated to take appropriate action. Poor knowledge of common terminology, combat terminology, code words, authentication methods, brevity usage, and general radio discipline.

7.9.10.3. **U.** Failed to recognize situations requiring threat warning and/or failed to take appropriate action. Errors, omissions, or deviations jeopardized mission accomplishment or another platform's mission accomplishment.

Chapter 8

AIRBORNE SYSTEMS ENGINEER (ASE) EVALUATIONS

8.1. General. Grading criteria contained herein cannot cover every situation. Written parameters should be tempered with sortie objectives, evaluator judgment, and task accomplishment in the determination of overall aircrew performance. Specific requirements for each evaluation are as follows:

8.2. Qualification Evaluations.

8.2.1. Requisites. See **Table 3.1**.

8.2.2. Flight Phase. Evaluate all areas required in **Table 8.1** under crew position name unless not applicable to the specific aircraft and crew position as noted.

8.2.2.1. Standard requirement for an ASE evaluation is two hours system time. Actual system time may be adjusted to meet evaluation requirements.

8.2.2.2. Equipment/systems knowledge and use of block/schematic diagrams for areas listed in **Table 8.1** may be evaluated on the ground the duty day prior, during, and/or after the flight.

8.2.2.3. If evaluating using a static aircraft or ATD, all necessary crew members will be present in order to evaluate CRM/crew coordination grading criteria. **(T-3)**

8.2.2.4. INIT QUAL evaluations will not be performed in ATD or static aircraft.

8.2.3. Mission Scenario. ASE evaluation scenarios should reflect the aircraft and system requirements for the flight phase. FEs should ensure evaluation profiles include demonstration of adequate events to measure proficiency as described in the evaluation requirements.

8.2.3.1. Examinees may use publications, reference materials, and aids that are normally available inflight to demonstrate and answer questions.

8.2.3.2. Examinees will only be required to demonstrate or answer questions that pertain to the aircraft baseline and configuration used for the flight phase of the evaluation.

8.3. Multiple Qualification. RC-135S/U ASE 1s require difference certification to transfer between S and U series. Document each series initial certification on AF Form 4348. Crew positions not authorized in **Attachment 2** are considered multiple qualifications and must be IAW AFMAN 11-202V2_ACCSUP, Para 5.10.

8.4. Instructor Evaluations. Specific criteria are included in **Chapter 4** and **Table 4.2**. Accomplish Initial Instructor evaluations during flight.

8.5. Emergency Procedures Evaluation. Evaluate an ASE's knowledge of emergency procedures and equipment on all evaluations. Accomplish the EPE on the ground or in-flight. For EPEs, the FE will include sufficient in-flight and ground emergencies to evaluate the examinee's knowledge of systems and procedures to the FE's satisfaction.

8.6. ASE Evaluation Requirements. The table below lists areas for ASE qualification evaluations.

Table 8.1. Airborne Systems Engineer (RC-135) Evaluation Requirements.

Area	DESCRIPTION	NOTES	RC-135V/W			RC-135 S/U	RC-135S	RC-135U
			ASE 1	ASE 3	ASE 5	ASE 1	ASE 2	ASE 3
759	Operator Workstation		M	M	M	M	M	M
980	Power Distribution	1	Q	Q	Q	Q	Q	Q
981	Interphone System		Q	Q	Q	Q	Q	Q
982	Networking Systems		M	M	M	M	M	M
983	Navigation/Time/Reference		M	M	M	M	M	M
984	Audio/Video/IF/RF Distribution		M	M	M	M	M	M
985	Processors		M	M	M	M	M	M
986	Maintenance System		M	M		M	M	M
987	Search System Tasking		M			M	M	
988	Storage Systems		M	M	M	M	M	M
989	Reachback Systems				M	M		
990	Data Links				M	M		
991	Radios				M	M

994	ELINT Systems			M			M	M
995	Signal Search and Development Systems				M	M		
997	Optical Sensor Suite						M	
998	Scientific and Technical Processing							M
999	Airborne Tracking System							M

Notes:
1. Required for SSQ evaluations.

8.7. General Grading Criteria. For grading general areas, see **Chapter 4**.

8.8. RC-135 Specific Grading Criteria. The following paragraphs contain grading criteria for the areas listed in **Table 8.1**.

8.8.1. **Area 759** , Operator Workstation (OWS).

8.8.1.1. **Q.** Satisfactory knowledge of OWS & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission

accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.1.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.1.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.2. **Area 980, Power Distribution.**

8.8.2.1. **Q.** Satisfactory knowledge of Power Distribution & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.2.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.2.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.3. **Area 981, Interphone System.**

8.8.3.1. **Q.** Satisfactory knowledge of Interphone System & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.3.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.3.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.4. **Area 982, Networking Systems.**

8.8.4.1. **Q.** Satisfactory knowledge of Networking Systems & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.4.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.4.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.5. **Area 983, Navigation/Time/Reference.**

8.8.5.1. **Q.** Satisfactory knowledge of Navigation/Time/Reference & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.5.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.5.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.6. **Area 984, Audio/Video/IF/RF Distribution.**

8.8.6.1. **Q.** Satisfactory knowledge of Audio, Video, Intermediate Frequency (IF) & Radio Frequency (RF) Distribution & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.6.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.6.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.7. **Area 985, Processors.**

8.8.7.1. **Q.** Satisfactory knowledge of Processors & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.7.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.7.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.8. **Area 986, Maintenance System.**

8.8.8.1. **Q.** Satisfactory knowledge of Maintenance System & associated equipment to include theory of operation, function, location, and power source. Correctly utilized

equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.8.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.8.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.9. **Area 987, Search System Tasking.**

8.8.9.1. **Q.** Satisfactory knowledge of Search System Tasking & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.9.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.9.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.10. **Area 988, Storage Systems.**

8.8.10.1. **Q.** Satisfactory knowledge of Storage Systems & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.10.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.10.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.11. **Area 989, Reachback Systems.**

8.8.11.1. **Q.** Satisfactory knowledge of Reachback Systems & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.11.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.11.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.12. **Area 990, Data Links.**

8.8.12.1. **Q.** Satisfactory knowledge of Data Links & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.12.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.12.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.13. **Area 991, Radios.**

8.8.13.1. **Q.** Satisfactory knowledge of Radios & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.13.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.13.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.14. **Area 992, Environmental Control Systems (ECS).**

8.8.14.1. **Q.** Satisfactory knowledge of ECS & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.14.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.14.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.15. **Area 993, Modern Collection Systems (MCS).**

8.8.15.1. **Q.** Satisfactory knowledge of MCS & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission

accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.15.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.15.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.16. **Area 994, Electronic Intelligence (ELINT) Systems.**

8.8.16.1. **Q.** Satisfactory knowledge of ELINT Systems & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.16.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.16.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.17. **Area 995, Signal Search and Development (SSD) Systems.**

8.8.17.1. **Q.** Satisfactory knowledge of SSD Systems & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.17.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.17.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.18. **Area 997, Optical Sensor Suite.**

8.8.18.1. **Q.** Satisfactory knowledge of Optical Sensor Suite & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.18.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.18.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.19. **Area 998, Scientific and Technical Processing (STP).**

8.8.19.1. **Q.** Satisfactory knowledge of STP & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.19.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.19.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

8.8.20. **Area 999, Airborne Tracking System (ATS).**

8.8.20.1. **Q.** Satisfactory knowledge of ATS & associated equipment to include theory of operation, function, location, and power source. Correctly utilized equipment for mission accomplishment. Satisfactory knowledge and/or performance of effective troubleshooting procedures.

8.8.20.2. **Q-.** Limited knowledge. Correctly utilized equipment but with significant errors or delays. Limited knowledge and/or performance of troubleshooting procedures. Errors or delays did not jeopardize mission accomplishment.

8.8.20.3. **U.** Unsatisfactory knowledge. Utilized equipment with major errors and delays. Unsatisfactory knowledge and/or performance of troubleshooting procedures. Errors and delays jeopardized mission accomplishment.

Chapter 9

CRYPTOLOGIC MISSION CREW (CMC) EVALUATIONS

9.1. General. The criteria contained in this chapter are applicable to qualification flight evaluations for the CMC positions on all RC-135 aircraft. For the purposes of this manual the CMC is comprised of ACLA, SSD, Data Link Operators (DLO), Airborne Analysts (AA), and Airborne Mission Supervisors (AMS). Grading criteria contained herein cannot cover every situation. Written parameters should be tempered with sortie objectives, evaluator judgment, and task accomplishment in the determination of overall aircrew performance. Specific requirements for each evaluation are as follows:

9.2. Qualification Evaluations.

9.2.1. Requisites. See **Table 3.1**.

9.2.2. Flight Phase. Evaluate all areas required in **Table 9.1** under ACLA, SSD, DLO, AA, AMS, unless not applicable to the specific qualification as noted. INIT Qualification evaluations will not be performed in ATD or static aircraft.

9.3. Multiple Qualification. See **Attachment 2** to determine if DT or evaluation is required for unsupervised flight. Crew positions not authorized in **Attachment 2** are considered multiple qualifications and must be IAW AFMAN 11-202V2_ACCSUP, paragraph 5.10.

9.4. Upgrade Evaluations.

9.4.1. AA and DLO are an upgrade from a base ACLA or SSD qualification. Members upgraded to AA or DLO are qualified to execute ACLA or SSD duties unless otherwise restricted on AF Form 8.

9.4.2. AMS is an upgrade from a base ACLA or SSD qualification IAW ACCMAN 11-2RC-135V1, Table 4.4. Members upgraded to AMS are qualified to execute ACLA or SSD duties unless otherwise restricted on AF Form 8.

9.4.3. Initial qualification for AMS requires a previous AA or DLO qualification documented in member's FEF. SQ/CC may authorize AMS cadre to drop AA or DLO qualification, document via MFR and retain in FEF.

9.4.4. Members upgraded to AMS, AA, or DLO are qualified to execute their base qualification duties (e.g. ACLA or SSD) unless otherwise restricted on Form 8.

9.5. Instructor (INSTR) Evaluations. All areas required in **Table 4.2** will be evaluated. Accomplish Initial Instructor evaluations during flight.

9.6. Emergency Procedures Evaluation (EPE). EPEs may be conducted verbally and satisfy the requirement for emergency procedures if no actual emergency procedure is experienced in-flight.

9.7. Evaluation Requirements. The table below lists areas for ACLA, SSD, DLO, AA, and AMS qualification evaluations.

Table 9.1. Cryptologic Mission Crew Evaluation Requirements.

Area	DESCRIPTION	NOTES	ACLA	SSD	DLO	AA	AMS
13	Crew Management						Q
36	Equipment/Systems Knowledge				Q	Q	Q
42	Data Link Procedures				M		M
84	Mission Coordination				M	M	M
85	Communications Systems					M	M
111	Search and Acquisition	2	M		M	M	M
759	Operator Workstation	1	Q	Q	Q	Q	Q
760	Graphics Functions		Q	Q	Q	Q	Q
761	Geolocation		Q	Q	Q	Q	Q
762	Track Management				Q		Q
765	Receiver Manipulation		Q	Q	Q	Q	Q
768	Tasking and Reporting				M	M	M
769	Threat Warning					M	M
770	Management Specific System						Q
771	Signals Collection and Recording	3		M	M	M	M
1025 - 1030	Reserved						

Notes:
1. Required for SSQ evaluations.
2. Required if base qualification is ACLA.
3. Required if base qualification is SSD.

9.8. General Grading Criteria. For grading general areas, see **Chapter 4**.

9.9. Specific Grading Criteria.

9.9.1. **Area 13, Crew Management.**

9.9.1.1. **Q.** Applied effective crew management concepts. Anticipated, planned, and responded appropriately to mission needs and unpredictable situations (e.g. crew illness, system malfunctions, etc.). Effectively managed RC-135 aircrew by implementing solutions leading to mission accomplishment.

9.9.1.2. **Q-.** Applied effective crew management concepts but with omissions, deviations, or errors detracted from planned mission accomplishment.

9.9.1.3. **U.** Did not apply crew management concepts. Failed to respond to unpredictable situations, crew illness, system malfunctions, divert/RON procedures, etc. Mismanaged aircrew and jeopardized mission accomplishment.

9.9.2. **Area 36, System Capabilities.**

9.9.2.1. **Q.** Demonstrated satisfactory knowledge of system capabilities, processors, receiver configuration and usage, and back- up/redundant systems with minor deviations, omissions, or errors which did not detract from mission accomplishment.

9.9.2.2. **Q-.** Demonstrated satisfactory knowledge of system capabilities, processors, receiver configuration and usage, and back- up/redundant systems with minor errors, omissions, or deviations which detracted from mission accomplishment but did not jeopardize mission accomplishment.

9.9.2.3. **U.** Failed to demonstrate knowledge of system capabilities, processors, receiver configuration and usage, and back-up/redundant systems. Major errors, omissions, or deviations jeopardized mission accomplishment.

9.9.3. **Area 42, Data Link Procedures.**

9.9.3.1. **Q.** Correctly performed data link operations for mission accomplishment. Demonstrated adequate knowledge of data link systems and net procedures.

9.9.3.2. **Q-.** Performed data link operations with significant errors or delays. Demonstrated limited knowledge of data link systems, and net procedures. Omissions, errors, or deviations detracted from, but did not jeopardize mission accomplishment.

9.9.3.3. **U.** Failed to perform data link operations and/or demonstrate adequate knowledge of data link systems, and net procedures. Deviations, errors, or omissions jeopardized mission accomplishment.

9.9.4. **Area 84, Mission Coordination.**

9.9.4.1. **Q.** Effectively coordinated (simulate as necessary) with off-board agencies, controlling authorities and platforms, and demonstrated adequate knowledge of their functions. Provided timely direction or information as required which clarified or rectified a situation.

9.9.4.2. **Q-.** Adequately coordinated (simulate as necessary) with off-board agencies, controlling authorities and platforms but demonstrated limited knowledge of their functions. Hesitated to provide direction/information which would have clarified confusion or rectified a situation.

9.9.4.3. **U.** Coordination or simulated coordination with off-board agencies, controlling authorities, platforms, or lack of knowledge of their functions and responsibilities was detrimental to flying safety or mission effectiveness. Did not provide timely direction/information that would have clarified or rectified a situation.

9.9.5. **Area 85, Communications Systems.**

9.9.5.1. **Q.** Effectively operated communications equipment to satisfy mission requirements.

9.9.5.2. **Q-.** Operated communications equipment with minor errors, omissions, or deviations, which affected mission accomplishment but did not jeopardize mission accomplishment.

9.9.5.3. **U.** Failed to effectively operate communications equipment. Major errors, omissions or deviations jeopardized mission accomplishment.

9.9.6. **Area 111, Search and Acquisition.**

9.9.6.1. **Q.** Demonstrated the ability to set, modify, and manipulate automatic and manual assignments.

9.9.6.2. **Q-.** Operator set, modified, or configured the system assignments resulting in significant errors or delays. Minor deviations did not result in significant data loss or detract from mission accomplishment.

9.9.6.3. **U.** Failed to demonstrate the ability to set, modify, and manipulate automatic and manual assignments. Major errors degraded accomplishment of mission tasking, resulting in significant data loss and/or jeopardization of mission accomplishment.

9.9.7. **Area 759, Operator Workstation Utilization.**

9.9.7.1. **Q.** Utilized the operator workstation, set-up, and operated position in an efficient manner. Effectively utilized system applications and mission databases.

9.9.7.2. **Q-.** Operator's setup and position utilization detracted from planned mission accomplishment.

9.9.7.3. **U.** Operator failed to utilize the operator workstation for mission accomplishment.

9.9.8. **Area 760, Graphics Functions.**

9.9.8.1. **Q.** Established and manipulated graphics and displays considering mission objectives, specific action points, and likely threats. Situational awareness was achieved by use of the graphics functions.

9.9.8.2. **Q-.** Operator manipulated graphics and displays but with significant errors or delays. Deviations detracted from mission objectives but did not detract from planned mission accomplishment.

9.9.8.3. **U.** Failed to properly set-up or manipulate graphics, which caused a loss of situational awareness. Major errors or deviations jeopardized mission accomplishment.

9.9.9. **Area 761, Geo-Location Data.**

9.9.9.1. **Q.** Demonstrated the ability to take, verify, and manipulate manual and automatic lines of bearing and to geo-locate emitters.

9.9.9.2. **Q-.** Demonstrated the ability to take, verify, and manipulate manual and automatic lines of bearing and to geo-locate emitters with significant errors or delays. Did not detract from planned mission accomplishment.

9.9.9.3. **U.** Failed to take, verify, or manipulate manual and automatic lines of bearing or was unable to geo-locate emitters. Jeopardized planned mission accomplishment.

9.9.10. **Area 762, Track Management.**

9.9.10.1. **Q.** Demonstrated the ability to read, interpret, manipulate, and amplify tracks and track data. Maintained situational awareness through efficient use of data display options and dynamic queue usage. Was able to use available resources to assist in the identification of unknown tracks.

9.9.10.2. **Q-.** Demonstrated the above tasks but with significant errors or delays. Minor deviations or omissions that did not detract from planned mission accomplishment.

9.9.10.3. **U.** Was unable to demonstrate efficient track management procedures. Was unable to complete above tasks. Errors or deviations detracted from planned mission accomplishment.

9.9.11. **Area 765, Receiver Manipulation.**

9.9.11.1. **Q.** Demonstrated the ability to manipulate receiver settings for optimal collection.

9.9.11.2. **Q-.** Manipulated receiver settings with significant errors or delays. Deviations or errors caused minor loss of collection or situational awareness but did not detract from overall mission accomplishment.

9.9.11.3. **U.** Failed to manipulate receivers or manipulated receivers with major errors which jeopardized accomplishment of mission tasking or resulted in significant data loss.

9.9.12. **Area 768, Tasking and Reporting.**

9.9.12.1. **Q.** Based on tasking, flight manuals, and applicable directives, effectively accomplished mission tasking and required reporting.

9.9.12.2. **Q-.** Did not comply with all applicable tasking, flight manuals, and directives. Minor errors, omissions, or deviations in applying tasking and reporting guidance detracted from mission accomplishment but did not jeopardize mission accomplishment.

9.9.12.3. **U.** Failed to comply with applicable tasking, flight manuals, and directives. Major errors, omissions, or deviations jeopardized mission accomplishment.

9.9.13. **Area 769, Threat Warning.**

9.9.13.1. **Q.** Recognized situations requiring threat warning and took appropriate action. Demonstrated knowledge of common terminology, combat terminology, code words, authentication methods, brevity usage, and possessed general radio discipline.

9.9.13.2. **Q-.** Slow to recognize situations requiring threat warning or hesitated to take appropriate action. Poor knowledge of common terminology, combat terminology, code words, authentication methods, brevity usage, and general radio discipline.

9.9.13.3. **U.** Failed to recognize situations requiring threat warning and/or failed to take appropriate action. Errors, omissions, or deviations jeopardized mission accomplishment or another platform’s mission accomplishment.

9.9.14. **Area 770, Management Specific System Functions.**

9.9.14.1. **Q.** Demonstrated the ability to display, manipulate, and interpret processor and subsystem information, monitored operator activities, system status, and frequency assignment status and other management functions as required. Made conclusions on data received and took appropriate actions with minor omissions, deviations, or errors that did not detract from mission accomplishment.

9.9.14.2. **Q-.** Omissions, deviations, or errors detracted from mission accomplishment.

9.9.14.3. **U.** Unable to display, manipulate or interpret processor and subsystem information, or monitor operator activities, system status, or frequency assignment status or other management functions. Omissions, deviations, or errors jeopardized mission accomplishment.

9.9.15. **Area 771, Signals Collection and Recording.**

9.9.15.1. Q. Intercepted, recorded, and annotated tasked signal(s). Utilized adequate equipment settings and procedures. No significant signal collection lost.

9.9.15.2. Q-. Demonstrated signals collection and recording with minor errors, deviations, or omissions that did not jeopardize mission accomplishment.

9.9.15.3. U. Failed to intercept, record, and/or adequately annotate tasked signals. Significant deviations or errors. Lost significant data or jeopardized mission.

Chapter 10

INFORMATION INTEGRATION OFFICER (IIO) EVALUATIONS

10.1. General. Grading criteria contained herein cannot cover every situation. Written parameters should be tempered with sortie objectives, evaluator judgment, and task accomplishment in the determination of overall aircrew performance. Specific requirements for each evaluation are as follows:

10.2. Qualification Evaluations.

10.2.1. **Requisites.** See **Table 3.1**.

10.2.2. Evaluate all areas required in **Table 10.1** under crew position name unless not applicable to the specific aircraft and crew position as noted.

10.2.3. Initial Qualification evaluations will not be performed in ATD or static aircraft.

10.3. Instructor (INSTR) Evaluations. Evaluate all areas required in **Table 4.2**. General grading criteria is located in **Chapter 4**. Accomplish Initial Instructor evaluations during flight.

10.4. Emergency Procedures Evaluation. EPEs may be conducted verbally and satisfy the requirement for emergency procedures if no actual emergency procedure is experienced in-flight.

10.5. IIO Evaluation Requirements. The table below lists areas for IIO qualification and INSTR evaluations.

Table 10.1. IIO Evaluation Requirements.

Area	DESCRIPTION	NOTES	IIO
36	Equipment/Systems Knowledge		Q
84	Mission Coordination		M
759	Operator Workstation	1	Q
763	Multi-Intelligence Fusion and Analysis		M
843	Intelligence, Surveillance, and Reconnaissance (ISR) Asset Knowledge and Integration		M
1031-1035	Reserved		
Notes: 1. Required for SSQ evaluations.			

10.6. General Grading Criteria. For grading general areas, see **Chapter 4**.

10.7. Specific Grading Criteria.

10.7.1. **Area 36, Equipment/Systems Knowledge.**

10.7.1.1. **Q.** Satisfactory knowledge of applicable reconnaissance equipment and related systems.

10.7.1.2. **Q-.** Marginal knowledge of applicable reconnaissance equipment and related systems. Aware of and understands system limitations and cautions.

10.7.1.3. **U.** Unsatisfactory knowledge of applicable reconnaissance equipment and related systems. Unaware of or does not understand system limitations or cautions.

10.7.2. **Area 84, Mission Coordination.**

10.7.2.1. **Q.** Effectively coordinated (simulate as necessary) with off-board agencies, controlling authorities and platforms, and demonstrated adequate knowledge of their functions. Provided timely information as required which clarified or rectified a situation.

10.7.2.2. **Q-.** Adequately coordinated (simulate as necessary) with off-board agencies, controlling authorities and platforms, but demonstrated limited knowledge of their functions. Hesitated to provide information which would have clarified confusion or rectified a situation.

10.7.2.3. **U.** Coordination (simulate as necessary) with off-board agencies, controlling authorities and platforms and lack of knowledge of their functions/responsibilities was detrimental to flying safety or mission effectiveness. Did not provide timely information which would have clarified confusion or rectified a situation.

10.7.3. **Area 759, Operator Workstation.**

10.7.3.1. **Q.** Utilized the operator workstation, set-up, and operated position in an efficient manner. Effectively utilized system applications and mission databases.

10.7.3.2. **Q-.** Operator's setup and position utilization detracted from planned mission accomplishment.

10.7.3.3. **U.** Operator failed to utilize the operator workstation for mission accomplishment.

10.7.4. **Area 763, Multi-Intelligence Fusion and Analysis.**

10.7.4.1. **Q.** Effectively extracted intelligence information for fusion, analysis, and dissemination. Made analytical conclusion(s) relevant to mission data and communicated analytical conclusion(s) with appropriate compartment head and/or external agencies. Minor errors or deviations did not detract from task accomplishment or the accomplishment of mission tasking.

10.7.4.2. **Q-.** Minor errors, omissions, or deviations in extracting intelligence data for fusion, analysis and/or dissemination detracted from effective mission accomplishment but did not jeopardize mission accomplishment.

10.7.4.3. **U.** Failed to comply with applicable procedures pertaining to effective multi-intelligence fusion and analysis. Major errors, omissions, or deviations jeopardized mission accomplishment.

10.7.5. **Area 843, ISR Asset Knowledge and Integration.**

10.7.5.1. **Q.** Explained the communications and ISR integration plan for tactical, theater, and national entities/stakeholders. Demonstrated adequate knowledge of blue ISR assets capabilities and employment considerations. Identified opportunities for ISR integration and executed cross-cue attempts IAW local guidance. Displayed only minor errors or omissions which did not jeopardize mission accomplishment.

10.7.5.2. **Q-.** Explained the communications and ISR integration plan with errors or omissions that could cause misunderstanding but did not jeopardize mission accomplishment. Demonstrated errors or omissions in knowledge of blue ISR assets capabilities and employment concern. Missed some opportunities for ISR integration or cross-cue. Errors or omissions affected mission accomplishment but did not jeopardize mission accomplishment.

10.7.5.3. **U.** Failed to explain the communications and ISR integration plan. Demonstrated unsatisfactory knowledge of blue ISR capabilities and employment considerations. Failed to identify opportunities for ISR integration or execute appropriate cross-cue attempts. Major errors, omissions, or deviations jeopardized mission accomplishment.

DAVID G. SHOEMAKER, Major General, USAF
Director of Operations

Terms

Airborne Systems Engineer (ASE)—The generic term for the RC-135S/U/V/W reconnaissance system maintenance technicians. ASE requirements apply to all ASE positions unless otherwise directed.

Aircraft Commander (AC)—Pilot who has been certified to perform "pilot-in-command" duties.

Airmanship—An aircrew member's continuous perception of self and aircraft in relation to the dynamic environment of flight, threats, and tasking, and the ability to forecast, then execute, tasks based on that perception.

Copilot—Pilot qualified to perform duties in the right seat only.

Critical Phases of Flight—Take-off, air refueling, approach to landing, landing, or any flight maneuver specifically requiring immediate access to controls. Approaches to planned missed approaches and air refueling rendezvous are not considered critical phases of flight.

Deviation—Performing an action not in sequence with current procedures, directives, or regulations. Performing action(s) out of sequence due to unusual or extenuating circumstances is not considered a deviation. In some cases, momentary deviations may be acceptable; however, cumulative deviations should be considered in determining the overall qualification level.

Error—Departure from standard procedure. Performing incorrect actions or recording inaccurate information.

Flight Examiner/Evaluator—A crew member designated to administer evaluations.

Instructor—Crew member trained, qualified, and certified by the squadron commander as an instructor to perform both ground and in-flight training.

Major (deviation/error/omission)—Detracted from task accomplishment, adversely affected use of equipment, or violated safety.

Minor (deviation/error/omission)—Did not detract from task accomplishment, adversely affect use of equipment, or violate safety.

Multiple Qualification—Multiple qualification applies to aircrew members who maintain qualifications in two or more aircrew positions or in two or more MDS where separate qualifications are required by lead MAJCOM.

Omission—To leave out a required action or annotation.

SPOT—Aircrew evaluation, EPE, examination or the evaluation of a specific event that does not intend to satisfy the requirements of an initial, periodic or requalification evaluation.

Attachment 2

QUALIFICATION, UPGRADE, AND DIFFERENCE CERTIFICATION MATRIX

A2.1. EWO and ASE Qualifications and Certifications. The matrix below illustrates what crew positions are eligible to earn qualifications in upgraded positions while maintaining ability to perform duty on the base qualification position and/or perform duties on a multiple RC-135 series.

A2.1.1. *Example 1:* An RC-135U Raven 3 is eligible to upgrade to RC-135U MCC. That aircrew may *execute* either duty on the RC-135U but not any other position without approval IAW 11-202V2_ACCSUP para 5.10.2.

A2.1.2. *Example 2:* Aircrew who qualify as an ASE 1 on RC-135S is authorized to execute duty as an ASE 1 on the RC-135U after completing DT IAW 11-2RC-135V1.

Table A2.1. EWO and ASE Position Matrix.

		Additional Series & Aircrew Position Authorization																	
		RC-135 V/W					RC-135S					RC-135U							
		TC	RX	ASE1	ASE3	ASE5	MCC	R1/2	R3	ASE1	ASE2	MCC	R1/2	R3-5	R6	R8	R9	ASE1	ASE3
Primary Series and Aircrew Position	RJ TC	Q	Q[1]																
	RJ RX	UP	Q																
	RJ ASE1			Q															
	RJ ASE3				Q														
	RJ ASE5					Q													
	CB MCC						Q	Q1											
	CB R1/2						UP	Q											
	CB R3						UP		Q										
	CB ASE1									Q								D	
	CB ASE2										Q								
	CS MCC											Q	Q1						
	CS R1/2											UP	Q						
	CS R3-5											UP		Q					
	CS R6											UP			Q				
	CS R8											UP				Q			
	CS R9											UP					Q		
	CS ASE1									D								Q	
	CS ASE3																		Q

Notes:
1. Dependent on TC/MCC's base raven qualification

Key:
Q: Qualified in MDS Crew Position
D: DT required prior to unsupervised flight IAW 11-2RC-135V1; no eval required
E: DT IAW 11-2RC-135V1 & Eval required prior to unsupervised flight
UP: Eligible to upgrade to position and execute either crew position duty

A2.2. CMC Qualifications and Certifications.

A2.2.1. The matrix below illustrates what crew positions are eligible to earn qualifications in upgraded positions while maintaining ability to perform duty on the base qualification position and/or perform duties on a multiple RC-135 series. (Note: This chart assumes aircrew will conduct formal training on the V/W variant. If formal training is conducted on the S or U variants, DT is required on the V/W IAW 11-2RC-135V1 prior to unsupervised flight).

A2.2.2. *Example:* ACLA qualified aircrew are eligible to upgrade to either AA or DLO. That aircrew may execute either ACLA or AA/DLO duty.

Table A2.2. CMC Position Matrix.

		Additional Series & Aircrew Position Authorization														
		RC-135 V/W					**RC-135S**					**RC-135U**				
		AMS	AA	DLO	ACLA	SSD	AMS	AA	DLO	ACLA	SSD	AMS	AA	DLO	ACL	SSD
Primary Series and Aircrew Position	AMS	**Q**	**Q[1]**		**Q[2]**		**D**	**D[1]**		**D[2]**		**D**	**D[1]**		**D[2]**	
	AA	**UP**	**Q**		**Q[2]**			**D**		**D[2]**			**D**		**D[2]**	
	DLO	**UP**		**Q**	**Q[2]**				**D**	**D[2]**				**D**	**D[2]**	
	ACLA		**UP[3]**		**Q**					**D**					**D**	
	SSD		**UP[3]**			**Q**					**D**					**D**

Notes:
1. Dependent on DLO-AA upgrade qualification
2. Dependent on base ACLA-SSD qualification
3. ACLA or SSD qualified aircrew may upgrade to either AA or DLO. Maintaining qualification in both base qualifications requires approval IAW 11-202V2_ACCSUP, paragraph 5.10.2

Key:
Q: Qualified in MDS Crew Position
D: DT required prior to unsupervised flight IAW 11-2RC-135V1; no eval required
E: DT IAW 11-2RC-135V1 & Eval required prior to unsupervised flight
UP: Eligible to upgrade to position and execute either crew position duty
