JOINT BASE LANGLEY-EUSTIS VA

AFMAN10-206_ACCSUP_ACCGM2025-01
18 NOVEMBER 2025

MEMORANDUM FOR ACC UNITS

FROM: ACC/A3

SUBJECT: Air Combat Command Guidance Memorandum to AFMAN10-206_ACCSUP, *Operational Reporting (OPREP)*

By Order of the Commander, Air Combat Command, this Guidance Memorandum immediately implements changes to AFMAN 10-206, Air Combat Command Supplement, *Operational Reporting (OPREP)*. Compliance with this memorandum is mandatory. To the extent its directions are inconsistent with other ACC publications, the information herein prevails, in accordance with Department of the Air Force Instruction (DAFI) 90-160, *Publications and Forms Management*.

This guidance is applicable to Regular Air Force, Air Force Reserve, and Air National Guard units/members assigned to/supporting ACC.

This document should be reviewed in its entirety. Significant changes to ACC Commander Critical Information Requirements (ACC CCIRs) have been made in order to meet the needs of Commander Air Combat Command (COMACC) and to align ACC critical information requirements reporting with Air Force C2 CIF 23-003B, *DAF Reporting Program Changes,* and changes to AFMAN 10-206, *Operational Reporting (OPREP)*.

Ensure all records generated as a result of processes prescribed in this publication adhere to Air Force Instruction (AFI) 33-322, *Records Management and Information Governance Program*, and are disposed in accordance with the Air Force Records Disposition Schedule which is located in the Air Force Records Information Management System.

This memorandum becomes void after one year has elapsed from the date of this memorandum, or upon publication of an interim change (IC) or rewrite of AFMAN10-206_ACCSUP, whichever is earlier.

BRIAN S. LAIDLAW, Brigadier General, USAF
Director of Operations

Chapter 10 (Added)

ACC COMMANDER CRITICAL INFORMATION REQUIREMENTS (CCIR)

10.1. Overview. Units will use the ACC CCIR report to notify Commander ACC (COMACC) and HQ ACC Staff Agencies/Directorates of events/incidents affecting or involving ACC resources which do not meet higher level OPREP-3 or Department of the Air Force (DAF) CCIR reporting criteria. ACC CCIRs are not a substitute or replacement for OPREP-3s or DAF CCIRs. This supplement does not eliminate or replace requirements for other reports such as SITREPs and other directorates' accident or incident investigation reports. Submitting an ACC CCIR does not change, nor is it a substitute for any report required by other directives. Real-world ACC CCIRs take priority over exercise events.

10.2. Roles and Responsibilities:

10.2.1. Approval and transmission:

10.2.1.1. ACC CCIR releasing and approving authorities will mirror OPREP-3 and DAF CCIR releasing and approving authorities identified in AFMAN 10-206, *Operational Reporting (OPREP)*, and Air Force C2 CIF 23-003B, *DAF Reporting Program Changes*.

10.2.1.2. Only C2 Operations Specialists (1C3 AFS personnel) and certified personnel assigned to a Wing/Installation C2 Operations node (86P, 13N, and GS assigned to a Command Post, A33, etc.) are authorized to transmit ACC CCIRs.

10.2.2. COMACC:

10.2.2.1. Through the C2 Operations (1C3 AFS) ACC Functional Manager and their policy team; develop and manage the ACC CCIR program, policies, procedures, and reporting criteria to ensure situational awareness of incidents affecting ACC resources, personnel, and operations which are not identified in higher-level reporting programs and requirements.

10.2.3. ACC Command Center:

10.2.3.1. Continuously (24/7) monitor the designated ACC synchronous secure chatroom and designated asynchronous secure systems for pertinent information and ACC CCIRs.

10.2.3.2. Develop and maintain ACC CCIR Checklists to verify submitted ACC CCIRs meet the needs of COMACC and are submitted in the proper format, within established timelines, having appropriate content, and ensure timely COMACC notification. Electronic checklists are authorized. However, a printed copy must be kept with the Reports checklists.

10.2.3.3. Assess unit-submitted ACC CCIR reports for possible higher category reporting requirements (OPREP-3 and DAF CCIR).

10.2.4. Wing/Installation Commanders:

10.2.4.1. Commanders use ACC CCIRs to immediately notify COMACC of any significant event or incident that does not meet OPREP-3 or DAF CCIR criteria, but does meet criteria identified in the ACC CCIR Matrix. C2 Operations personnel assigned to Wing/Installation C2 Operations nodes will submit the applicable ACC CCIR regardless of whether or not the event is being reported through other channels.

10.2.5. Wing/Installation C2 Operations Nodes:

10.2.5.1. Be responsible for providing commanders the necessary information to facilitate an informed decision and submit timely ACC CCIRs using the ACC CCIR Matrix. The ACC CCIR Matrix will be posted in the C2 Operations ACC continuity folder under ACC Reports located on the NIPRNET C2 Operations Intelink Site, (https://intelshare.intelink.gov/sites/afcommandpost/SitePages/ACC%20Continuity%20Page.aspx).

10.2.5.2. Monitor ACC synchronous secure chat continuously (24/7) for HHQ reporting information, requests, requirements, and/or notifications.

10.2.5.3. Develop and maintain ACC CCIR Checklists. These contain step-by-step procedures to ensure ACC CCIRs meet the needs of COMACC and are submitted in the proper format, within established timelines, and with the correct content. ACC CCIR checklists may be independent of other Reports checklists or incorporated into existing Reports checklists. Electronic checklists are authorized. However, a printed copy must be kept with the Reports checklists.

10.2.5.4. Provide initial (within 30 days of assignment) and semi-annual training to Commanders and staff (Wing/Group/Squadron Commanders, Chiefs of Staff, A-Staff Directors, Special Staff Chiefs) and First Sergeants on ACC CCIR processes and requirements. Face-to-face is the primary means of training. Training may be conducted via email or other methods. Training will be documented regardless of means used. Semi-annual training requirements can be accomplished as ACC CCIR Reports Matrix changes occur. The following are the minimum items which must be trained by the Non-Commissioned Officer in Charge (NCOIC) of Reports assigned to the Wing/Installation C2 Operations node:

10.2.5.4.1. The ACC CCIR system and process.

10.2.5.4.2. ACC CCIR Reports Matrix.

10.2.5.4.3. ACC CCIR timing criteria.

10.2.5.4.4. ACC CCIR releasable information.

10.2.5.4.5. ACC CCIR appropriate and inappropriate report content.

10.2.5.4.5. ACC CCIR Classification

10.3. ACC CCIR Classification. ACC CCIRs are classified according to content. Approving/releasing Commanders and Command Post Controllers must review report content to ensure it is classified appropriately per the applicable classification guide or Original Classification Authority. **(T-0)** Personnel transmitting classified ACC CCIRs through either synchronous or asynchronous means are considered derivative classifiers and are responsible for appropriately marking all reports IAW DoDM 5200.012. **(T-0)** Examples of derivatively classified reports found in this manual are provided to aid controllers in the proper formatting of derivative classification lines; however, DoDM 5200.01V2 is the governing directive for the marking of classified information and must be referenced to ensure information is properly protected. **(T-0)**

10.4. ACC CCIR Appropriate Report Content. ACC CCIRs will adhere to the appropriate report content stipulations for OPREP-3s and DAF CCIRs identified in AFMAN 10-206, *Operational Reporting (OPREP)*, and Air Force C2 CIF 23-003B, *DAF Reporting Program Changes*.

10.4.1. ACC CCIR Inappropriate Report Content. ACC CCIRs will adhere to the inappropriate report content stipulations for OPREP-3s and DAF CCIRs identified in AFMAN 10-206, *Operational Reporting (OPREP)*, and Air Force C2 CIF 23-003B, *DAF Reporting Program Changes*. This includes the authorized use of a named POC and a named Approving Authority as the only exceptions to the restriction of using any personally identifiable information throughout the report (See Figure 10.2 for examples).

10.5. ACC CCIR Report Timing Requirements. Units will use **Table 10.1**, for synchronous (ACC Synchronous secure chat)/asynchronous (SIPRNET email) timing requirements.

10.5.1. When a qualified/certified specialist must be consulted to determine if an ACC CCIR reportable event/incident has occurred, according to ACC CCIR Reports Matrix requirements (e.g., medical provider for confirmation of death), timing standards will begin from Wing/Installation C2 Operations notification (1C3 personnel in a Command Post, A33, etc.) of the determination rather than the time of incident, IAW Figure 10.2.

Table 10.1. ACC CCIR Timing Requirements.

Type of Report	Synchronous Report/Voice Report Timing	Asynchronous Report/Record Copy Timing
ACC CCIR	30 minutes from incident	4 hours from ACC Command Center approval time

10.6. ACC CCIR Report Construction. ACC CCIR reports are formatted based on COMACC direction. Units will develop checklists to ensure adherence to this publication when formatting and submitting reports. Use of checklists is mandatory for ACC CCIR report submission processes.

10.6.1. ACC CCIR Message Subject Line. Regardless of transmission medium, all ACC CCIR subject lines will be constructed in the following manner:

10.6.1.2. Portion Marking. All ACC CCIR subject lines will contain a portion marking for the classification of the subject line **(T-0)**. The portion marking (U, C, S, S/NF, etc.) for the subject line does NOT identify the overall classification of the report, only the subject line.

10.6.1.3. Report FLAGWORD: ACC CCIR.

10.6.1.4. DTG of Incident. This time should be when the incident occurred, not when the incident was determined to meet ACC CCIR Matrix reporting criteria. Clarification can always be provided in the narrative to explain DTG if incident occurred several days prior to a report. The DTG will not change as subsequent reports are submitted.

10.6.1.5. Location Event Occurred. This is the location of the incident or where the event took place. This may or may not be the same location as a military installation. Do not narrow the location beyond or below city/base level.

10.6.1.6. Event/Incident Title. Used to identify the incident listed in ACC CCIR Reports Matrix.

10.6.1.7. Example Subject Line: (U) ACC CCIR/LN-1C, 251458ZDEC2014, Oklahoma City, OK, Serious Injury

10.6.2. Report Body. The body of the report narrative includes the who, what, when, where, how, and operational impact of the incident. Include new information as details unfold. In subsequent reports, do not restate previously stated facts. Regardless of transmission medium, C2 Operations personnel will construct the ACC CCIR narrative (event text) in the following manner, to include the line headings (see Figure 10.2, Report Body Example):

10.6.2.1. Report Type. Initial, Initial/Final, Follow-Up, Final, and Corrected Report.

10.6.2.2. Time and Date. Time of Incident in HHMMZ, DD Mon YY format. For Initial and Initial/Final ACC CCIRs, this time will match the DTG of Incident in the subject line. For Corrected Reports, Follow-Ups, and Final ACC CCIRs this time will reflect the time new information was provided or the Follow-Up or Final was approved for release by the commander.

10.6.2.3. Unit. Include designator for unit/wing/installation C2 Operations node submitting the ACC CCIR.

10.6.2.4. Member(s). Member information including age, gender, rank, military status (RegAF, ANG, AFR, or CAP), unit of assignment (i.e. 552 ACW/SE), etc. If ANG or AFR, specify status (e.g. ANG or AFR-Full Time, ANG or AFR-Drill Status, ANG or AFR Traditional Status, etc.). If Civil Air Patrol, specify status (e.g. Air Force Assigned Mission or Corporate Status). Multiple members should be separated by semicolons. Use “N/A” for reports that do not involve a service member.

10.6.2.5. Details. In the narrative (the "WHY" section), use sentence case format and include the who, what, when, where, and how the event/incident occurred. When aircraft are involved include aircraft type, full tail number, owning unit, aircrew unit and squadron, mission type and number.

10.6.2.6. Mission Impact/Impairment. This section of the ACC CCIR should identify how the event or incident impacts the unit/wing/installation mission (individual squadron/duty section impact is not required). Mission impact may or may not classify the overall classification of the CCIR. Use "N/A" for CCIRs that are not dependent on the impact to mission for reportable events.

10.6.2.7. Point of Contact. Include rank, last name, agency or office symbol, and 7-digit DSN number (10-digit if OCONUS number). A point of contact will be provided by the unit submitting the report for all ACC CCIRs.

10.6.2.8. Approving Authority. Include rank, last name, agency or office symbol, and 7-digit DSN number (10-digit if OCONUS number). Refer paragraph 10.2.1.1. of this publication for authorized releasing/approving authorities. An approving authority will be identified for all ACC CCIRs.

10.6.2.9. Reviewing Command Center. ACC CCIRs will mirror the stipulations and processes (as applicable) identified in AFMAN 10-206, *Operational Reporting (OPREP)*, and Air Force C2 CIF 23-003B, *DAF Reporting Program Changes*, for identifying a Reviewing Command Center.

Figure 10.2. Report Body Example.

(U) ACC CCIR/LN-1C, 252300ZJUL2014, Boise, ID, Serious Injury (U) WHO: 366 Fighter Wing (U) WHAT: ACC CCIR/LN-1C, Serious Injury, Initial (U) WHEN/WHERE: 252300ZJUL2014, Boise, ID (U) WHY: 25 y/o male SrA, REGAF, 366 CES. Member is reported to have sustained serious internal injuries in a vehicle collision. Member was found unconscious at the scene. The individual is being transported to a civilian trauma hospital. Alcohol is unknown at this time. Media attention is not expected. Further information will be provided through ACC CCIR channels. (U) Mission Impact/Impairment: N/A (U) Point of Contact: N/A (U) Approving Authority: Col Carter, 366 FW/CD (U) Reviewing Command Center: ACC Command Center
(U) ACC CCIR/LN-1C, 252300ZJUL2014, Boise, ID, Serious Injury (U) WHO: 366 Fighter Wing (U) WHAT: ACC CCIR/LN-1C, Serious Injury, Initial/Final (U) WHEN/WHERE: 252300ZJUL2014, Boise, ID

(U) WHY: 25 y/o male SrA, REGAF, 366 CES. Member was seriously injured while detonating a homemade firecracker in an empty field adjacent to his residence. The individual was transported to the hospital. The member has a non-life-threatening injury to his left eye. Alcohol was not a factor. Media attention is not expected. No further information will be provided through ACC CCIR channels.
(U) Mission Impact/Impairment: N/A
(U) Point of Contact: Lt Col Jackson, 366 CES/CC, DSN 312-555-8829
(U) Approving Authority: Col O'Neill, 366 FW/CC
(U) Reviewing Command Center: ACC Command Center

10.7. Report types and upgrading. All reports should contain as much information as immediately available within established time parameters about an event or incident.

10.7.1. Initial, Final, and Initial/Final reports. An Initial report may only be submitted as an Initial/Final report if it contains all required information to close the report. The ACC Command Center may ask questions during initial reporting to get clarification and/or request additional information required by COMACC to post in the record copy or Follow-Up reports. Information requested by the ACC Command Center during synchronous reporting will be provided in an asynchronous report when the information becomes available. All reports are posted in ACC Synchronous secure chat prior to submitting via asynchronous means.

10.7.2. If seven calendar days have elapsed from the Initial report and those questions are not answered, a Final ACC CCIR will be submitted stating "No further information will be provided through ACC CCIR channels". Identify approved POC, agency/agencies, and contact number(s)**.**

10.7.3. When events/incidents occur, which overlap multiple titles/rules, units will combine them and submit one CCIR. Only one Event/Incident Rule and one Event/Incident Title will be reflected in the subject line; use the most severe incident in the subject line and identify additional rules and titles at the end of the Event Detail section of the report (i.e., Rule ACC GEN-6, Ground Mishap or Property Damage, also applies).

10.7.4. In order to maintain consistency, clarity, and tracking of ACC CCIRs: Initial ACC CCIRs will include the phrase "further information will be provided through ACC CCIR channels."

10.7.5. Follow-Up Reports. These reports are essential to keep commanders informed of developing situations and to provide additional details as they are learned. Follow-Up reports will be submitted IAW section 10.6. Follow-Up reports are posted in ACC Synchronous secure chat prior to sending via SIPRNET email. Follow-Up reports will include "Follow-Up" at the beginning of the subject line.

10.7.6. Corrected Copy Reports. Command Posts will submit a correction if an error is noticed in content (e.g., correcting F-15 to F-16). C2 Operations nodes will post corrected reports to ACC synchronous secure chat prior to sending via asynchronous means. Units will include a statement at the end of the details section stating what information was updated (e.g. Corrected MDS from F-15 to F-16).

10.7.7. ACC CCIR Upgrading. In the event an incident which triggered an ACC CCIR becomes OPREP-3 or DAF CCIR reportable, synchronous notification will be made to the ACC Command Center. Synchronous notification will provide the respective ACC CCIR DTG, state which OPREP-3 or DAF CCIR rule to which it is being upgraded and include the reason/justification. This automatically closes the ACC CCIR. For OPREP-3 and DAF CCIR report submission refer to AFMAN 10-206, *Operational Reporting (OPREP)*, and Air Force C2 CIF 23-003B, *DAF Reporting Program Changes*.

10.8. Synchronous Reporting. The primary medium for transmitting all ACC CCIR synchronous reports is the designated ACC synchronous secure chat. The alternate means for submission is SIPRNET email. The tertiary means for submission is secure phone (i.e. VoSIP) to the ACC Command Center.

10.8.1. Do not delay the initial synchronous notification to obtain additional information. The initial synchronous notification time is the time a unit submits the ACC CCIR into the designated system. Use Follow-Up reporting to provide additional information as it becomes available.

10.8.2. Units submitting an ACC CCIR will enter the report into the ACC synchronous secure chat. Units will be logged in to ACC synchronous secure chat as “Unit (Rank Last Name)”.

10.8.3. The ACC Command Center will acknowledge wing/unit reports within 5 minutes of the posting. In the event the ACC Command Center does not acknowledge within 5 minutes, the Wing/unit will contact the ACC Command Center via phone. The ACC Command Center will then provide acknowledgement through ACC synchronous secure chat.

10.8.3.1. ACC Command Center will make an initial acknowledgement of “ACC Command Center acknowledges receipt, standby.”

10.8.3.2. Units will not submit their asynchronous report until approved by the ACC Command Center. The ACC Command Center approves units by entering the phrase: “ACC has no further questions, email your report via SIPRNET within 1 hour.” This serves as the official ACC approval time.

10.8.4. ACC Command Center may direct submitting units to make corrections, changes, or provide additional information to reports IAW with this publication and COMACC guidance. Submitting units will implement ACC Command Center directed alterations so long as they do not conflict with this supplement.

10.9. Asynchronous Reporting. Units will submit an asynchronous report via SIPRNET email for all ACC CCIRs after obtaining ACC Command Center approval/direction to do so.

10.9.1. Reports should contain the who, what, when, where, how, operational impact, media applicability, and other pertinent information of the event/incident being reported based on available information. Units will include any updated information gathered after the initial synchronous notification without exceeding the time criteria.

10.9.1.1. In the event a unit requires additional time to submit an Asynchronous Report due to real-world operations tempo, the C2 Operations node will immediately contact the ACC Command Center for approval by providing a reason for the delay along with estimated submission time. Do not delay asynchronous reporting to obtain additional information.

OPR: HQ ACC/A3OC

Certified by: HQ ACC/A3O
(Col John K. Lussier)

Supersedes: AFI 10-206_ACCSUP, 13 April 2015

Pages: 8

AFMAN10-206, *Operational Reporting (OPREP)*, is supplemented as follows: This supplement describes Air Combat Command (ACC) procedures for use in conjunction with the basic AFMAN. It applies to all ACC units, ACC-gained Air Force Reserve Command (AFRC) units, and Air National Guard (ANG) United States Title 10 status, when mobilized. When conflicts exist between AFRC/ANG and ACC instructions, follow the AFRC/ANG procedures prior to mobilization. Following mobilization/activation, compliance with this supplement is mandatory. The authorities to waive wing/unit level requirements in this publication are identified with a Tier ("T-0, T-1, T-2, T-3") number following the compliance statement. See AFI 33-360, Publications and Forms Management, for a description of the authorities associated with the Tier numbers. Submit requests for waivers through the chain of command to the appropriate Tier waiver approval authority, or alternately, to the requestors commander for non-tiered compliance items. Refer recommended changes and questions about this publication to the OPR using the AF Form 847, *Recommendation for Change of Publication*; route AF Form 847s from the field through the appropriate functional chain of command. Ensure that all records created as a result of processes prescribed in this publication are maintained in accordance with (IAW) Air Force Manual 33-363, *Management of Records*, and disposed of IAW the Air Force Records Information Management System Records Disposition Schedule. This publication may not be supplemented or further implemented/extended.

SUMMARY OF CHANGES

This document is substantially revised and must be completely reviewed. Major changes include: AFI 33-360 and AFI 90-201 tier identification and waiver requirements have been incorporated; adding ACC Commanders Critical Interest Requirements; adding ACC Command Center cyber reporting responsibilities; adding delegation of ACC Command Center reporting responsibilities.

1.1.1.1. **(Added)** Commander Critical Information Requirements (CCIR). Units will use the CCIR to notify COMACC and HQ ACC Staff Agencies of events/incidents affecting or involving ACC resources which do not meet higher level OPREP-3 BEELINE or PINNACLE submission criteria **(T-2)**.

2.4.4. **(Added)** In the event of a transfer of Command Center responsibilities, the appointed agency will assume the responsibilities as stated in paragraphs **2.4.1.** - **2.4.3.**

2.7.1.2.1. **(Added)** ACC CCIR Matrix **(T-2)**.

2.7.1.5.1. **(Added)** ACC CCIR timing criteria **(T-2)**.

2.7.5.1. **(Added)** Monitor ACC Synchronous Secure Chat continuously (24/7) for HHQ reporting information requests, requirements, and/or notifications **(T-2)**.

2.8.2.1. **(Added)** Current CCIR Matrix. The CCIR Matrix will be posted in the ACC continuity folder under ACC Reports located on the NIPRNET Command Post Intelink Site.

2.8.4.1. **(Added)** Checklists. These contain step-by-step procedures to ensure required CCIRs are submitted in the proper format, within established timelines, and with the correct content. Electronic checklists are authorized; however a printed copy must be kept with the Reports checklists.

3.2.1.1. **(Added)** CCIRs are classified according to content. Approving/releasing Commanders and Command Post Controllers must review report content to ensure it is classified appropriately per the applicable classification guide or Original Classification Authority **(T-2)**. Personnel transmitting classified CCIRs through either synchronous or asynchronous means are considered derivative classifiers and are responsible for appropriately marking all reports IAW DoDM 5200.01 Vol 2 **(T-2)**. Examples of derivatively classified reports found in this manual are provided to aid controllers in the proper formatting of derivative classification lines; however, DoDM 5200.01 Vol 2 is the governing directive for the marking of classified information and must be referenced to ensure information is properly protected **(T-2)**.

Chapter 9 (Added)

COMMANDER CRITICAL INFORMATION REQUIREMENTS (CCIR)

9.1. Subject and Purpose. Commanders use CCIRs to immediately notify COMACC of any significant event or incident that does not meet OPREP-3 level criteria, but does meet the CCIR Matrix. Command posts will submit the applicable CCIR regardless of whether or not the event is being reported through other channels **(T-2)**. CCIRs do not replace the requirement for more detailed reports such as the SITREP and other directorate's accident or incident investigation reports. Submitting a CCIR does not change, nor is it a substitute for, any report required by other directives. Real-world CCIRs take priority over exercise events.

9.2. CCIR Report Timing Requirements. Units will use AFMAN10-206_ACCSUP, **Table 9.1.**, for synchronous (ACC Synchronous Secure Chat) /asynchronous (SIPRNET email) timing requirements **(T-2)**. When a qualified/certified specialist must be consulted to determine if a CCIR event/incident has occurred, according to ACC CCIR Reports Matrix requirements (e.g., medical provider for confirmation of death), timing standards will begin from CP notification of the determination rather than the incident, IAW AFMAN10-206_ACCSUP, **Table 9.1. (T-3)**.

Table 9.1. Timing Criteria.

Type of Report	Synchronous Report/Voice Report Timing (IAW AFMAN10-206_ACCSUP, Paragraph 9.2.)	Asynchronous Report/Record Copy Timing (IAW AFMAN10-206_ACCSUP, Paragraph 9.2.)
CCIR	1 hour from incident	1 hour from ACC Command Center approval time

9.3. Report Construction. Units should develop processes that enable the correct and expedient transmission of reports via synchronous, asynchronous, and alternate means of communication. Synchronous reports are transmitted via ACC Synchronous Secure Chat. Asynchronous reports are transmitted via SIPRNET e-mail to the ACC Command Center (**usaf.jble.acc.mbx.acccomm-center-senior-controller-org@mail.smil.mil**).

9.3.1. CCIR Message Subject Line. Regardless of transmission medium, all CCIR subject lines will be constructed in the following manner **(T-2)**:

9.3.1.1. Portion Marking. All subject lines will contain a portion marking for the classification of the subject line. The subject line portion marking (U, C, S, S/NF, etc.) does NOT identify the overall classification of the report, only the subject line **(T-2)**.

9.3.1.2. Overall Classification. Reference paragraph **3.2.1.1.**

9.3.1.3. Report FLAGWORD. CCIR.

9.3.1.4. DTG of Incident. This time should be when the incident occurred, not when the incident became reportable. Clarification can always be provided in the narrative to explain DTG if incident occurred several days prior to a report. The DTG will not change as subsequent reports are submitted.

9.3.1.5. Location Event Occurred. This is the location of the incident or where the event took place. This may or may not be the same location as a military installation. Do not narrow the location beyond or below city/base level.

9.3.1.6. Event/Incident Title. Used to identify the incident listed in ACC CCIR Reports Matrix.

9.3.1.7. Example Subject Line: (U) CCIR, 251458ZDEC2014, Oklahoma City, OK, Serious Injury

9.3.2. Report Body (Synchronous Secure Chat) or Event Text (SIPRNET email). The body of the report narrative includes the who, what, when, where, how, and operational impact of the incident. Include new information as details unfold. In subsequent reports, do not restate previously stated facts. Regardless of transmission medium, Command Posts will construct the CCIR narrative (event text) in the following manner, to include the line headings (see AFMAN10-206_ACCSUP **Table 9.2.** for example) **(T-2)**:

9.3.2.1. Report Type. Initial, Initial/Final, Follow-Up, Final and Corrected Report.

9.3.2.2. Time and Date. Time of Incident in HHMMZ, DD Mon YY format. For Initial and Initial/Final CCIRs, this time will match the Date Time Group of Incident in the subject line **(T-2)**. For Corrected Copy, Follow-Up and Final CCIRs this time will reflect the time new information was provided or the Follow-Up or Final was approved for release by the commander **(T-2)**.

Table 9.2. Report Body Example.

(U) CCIR, 252300ZJUL2014, Boise, ID, Serious Injury (U) Report Type: Initial/Final (U) Time and Date: 2300Z, 25 Jul 14 (U) Unit: 366 Fighter Wing (U) Member(s): 25 y/o male SrA, REGAF, 366 CES (U) Details: Member was seriously injured while detonating a homemade firecracker in an empty field adjacent to his residence. Individual was transported to the hospital. The member has a non-life threatening injury to his left eye. Alcohol was not a factor. Media attention is not expected. No further information will be provided through CCIR channels. (U) Mission Impact: N/A (U) ETIC: N/A (U) POC: Lt Col John Smith, 366 CES/CC, DSN 312-555-8829

9.3.2.3. **Unit.** Include CP designator for unit/wing/installation submitting the CCIR.

9.3.2.4. **Member(s).** Include member information including age, gender, rank, military status (RegAF, ANG, AFR, or CAP), unit of assignment (i.e. 552 ACW/SE), etc. If ANG or AFR, specify status (e.g. ANG or AFR-Full Time, ANG or AFR-Drill Status, ANG or AFR Traditional Status, etc.). If Civil Air Patrol, specify status (e.g. Air Force Assigned Mission or Corporate Status). Multiple members should be separated by semicolons. Use “N/A” for reports that do not involve a service member.

9.3.2.5. **Details.** In the narrative, use sentence case format and include the who, what, when, where, and how the event/incident occurred. When aircraft are involved be sure to include information as specified in AFMAN10-206_ACCSUP, paragraph **9.6.2.1.**

9.3.2.6. **Mission Impact/Impairment.** This section of the CCIR should identify how the event or incident impacts the unit/wing/installation mission (individual squadron/duty section impact is not required). Mission impact may or may not classify the overall classification of the CCIR. Use "N/A" for CCIRs that are not dependent on the impact to mission for reportable events.

9.3.2.7. **Estimated Time in Commission (ETIC).** Identify the estimated time a situation will end, a weapon system is expected to return to service, or repair will be complete. Use "N/A" for CCIRs that do not require an ETIC.

9.3.2.8. **Point of Contact.** Include rank, name, agency office symbol, and 7-digit DSN number. A point of contact will be provided for all CCIRs.

9.3.3. **Initial and Final reports.** These reports should contain as much information as immediately available within established time parameters about an event or incident. Both reports will be submitted IAW AFMAN10-206_ACCSUP, paragraph **9.3.** An Initial report may only be submitted as an Initial/Final report if it contains all of the required information to close the report. The ACC Command Center will ask questions during initial reporting to get clarification and/or request additional information required by the COMACC to post in the record copy or Follow-Up reports. Information requested by the ACC Command Center during synchronous reporting will be provided in an asynchronous report when the information becomes available **(T-2)**. Both reports are posted in ACC Synchronous Secure Chat prior to submitting via SIPRNET email **(T-2)**.

9.3.3.1. If seven calendar days have elapsed from the Initial report and those questions are not answered, a Final CCIR will be submitted stating that "No further information will be provided through CCIR channels" **(T-2)**. Identify approved POC, agency/agencies, and contact number(s) **(T-2)**.

9.3.3.2. When events/incidents occur, which overlap multiple titles, units will combine them and submit one CCIR **(T-2)**. Only one Event/Incident Title will be reflected in the subject line; use the most severe incident in the subject line and identify additional titles at the end of the Event Detail section of the synchronous (ACC Synchronous Secure Chat)/asynchronous (SIPRNET email) report (i.e., Ground Mishap also applies) **(T-2)**.

9.3.4. **Follow-Up Reports.** These reports are essential to keep commanders informed of developing situations and to provide additional details as they are learned. Follow-Up reports will be submitted IAW AFMAN10-206_ACCSUP, paragraph **9.3. (T-2)**. Follow-Up reports are posted in ACC Synchronous Secure Chat PRIOR to sending via SIPRNET email. Follow-Up reports will include "Follow-Up" at the beginning of the subject line **(T-2)**. When submitting a follow-up, units will "reply to all" from the most current CCIR **(T-2)**.

9.3.5. **Corrected Copy Reports.** Command Posts will submit a correction if an error is noticed in content (i.e., correcting F-15 to F-16) **(T-2)**. Command Posts will format Correct Copy reports IAW AFMAN10-206_ACCSUP, paragraph **9.3.** and post to ACC Synchronous Secure Chat PRIOR to sending via SIPRNET email. Units will include a statement at the end of the details section stating what information was updated (e.g. Corrected member's duty status) **(T-2)**.

9.4. Synchronous Reporting Processes. The primary medium for transmitting all CCIR synchronous reports is ACC Synchronous Secure Chat. The alternate means for submission is SIPRNET email. The tertiary means for submission is secure phone (i.e. VoSIP) to the ACC Command Center. Do not delay the initial synchronous notification to obtain additional information. The initial synchronous notification time is the time a unit submits the CCIR into the designated system. Use Follow-Up reporting to provide additional information as it becomes available. ACC Command Center assesses unit reports for possible higher category reporting requirements.

9.4.1. Units submitting a CCIR will enter it into the ACC Synchronous Secure Chat. See AFMAN10-206_ACCSUP, paragraph **9.3.** for proper report construction **(T-2)**. Units will be logged in to ACC Synchronous Secure Chat as "Unit (Rank/ Last Name)" **(T-2)**.

9.4.2. The ACC Command Center will acknowledge wing/unit reports within 10 minutes of the posting **(T-2)**. In the event that the ACC Command Center does not acknowledge within 10 minutes, the wing/unit will contact the ACC Command Center via phone **(T-2)**. The ACC Command Center will then provide acknowledgement through ACC Synchronous Secure Chat.

9.4.2.1. ACC Command Center will make an initial acknowledgement of "ACC Command Center acknowledges receipt, standby" **(T-2)**. Units will NOT submit their asynchronous report until cleared by the ACC Command Center **(T-2)**. The ACC Command Center clears units by entering the phrase: "ACC has no further questions, email your report via SIPRNET within 1 hour." This serves as the official ACC approval time. Units will make corrections (if any) and include information requested by ACC Command Center and email the report.

9.4.3. Units may submit exercise CCIRs to the ACC Command Center at any time using the *acc.exercise* ACC Synchronous Secure Chat room. Units will coordinate prior to submitting exercise CCIRs. When mission dictates, the ACC Command Center attempts to reply to exercise messages and provide feedback on reports submitted. All exercise reports must state "EXERCISE" at the beginning and end of the report.

9.5. Asynchronous Reports. Examples of this include email (the receiver does not have to be logged on when the sender sends the email message), discussion boards, which allow conversations to evolve and community to develop over a period of time. Units will submit an asynchronous report via SIPRNET email for all CCIRs **(T-2)**.

9.5.1. Reports should contain (everything that is known at the time) the who, what, when, where, how, operational impact, media applicability, and other pertinent information of the event/incident being reported based on available information. Units will include any updated information gathered after the initial synchronous notification without exceeding the time criteria **(T-2)**. In the event a unit requires additional time to submit an Asynchronous Report due to real-world operations tempo, the Command Post will immediately contact the ACC Command Center and provide reason for delay along with estimated submission time. Do not delay asynchronous reporting to obtain additional information **(T-2)**.

9.6. Appropriate Report Content. While the narrative section of each report must clearly convey the details of the incident, reports will not be personally identifiable to an individual **(T-2)**. To ensure anonymity, reports may contain:

9.6.1. Rank, age, gender, marital status, number and age of dependents, duty status (e.g., RegAF, ANG, AFR [whether on orders or not], DoD Civilian Status, Civil Air Patrol [CAP]), and assigned unit/agency.

9.6.2. Names cannot be included in CCIRs. The only exception is the POC line.

9.6.2.1. Aircraft type, full tail number, owning unit, aircrew unit and squadron, mission type, and mission number; this is for all reports involving ACC or CAP owned, contracted, or operated aircraft.

9.6.3. Inappropriate Report Content. Although the narrative section of each report must clearly convey the details of the incident, it will not include **(T-2)**:

9.6.3.1. Any speculation regarding responsibility, failure of equipment or facilities, legal liability, or causes (except when the cause of death is known).

9.6.3.2. Quotations or opinions from witnesses or other privileged sources.

9.6.3.3. Use of personally identifiable information to include name (see exceptions above), SSN, or home address. If Higher Headquarters requires names/SSN, they will request it as an addendum separate from the CCIR. Even then, only the last 4 digits of the SSN will be provided.

9.7. CCIR Upgrade. Upgrading a CCIR automatically closes the CCIR; however, units will notify the ACC Command Center of the change in circumstance **(T-2)**.

KEVIN A. HUYCK
Major General, USAF
Director of Operations
