OPR: AETC/A3D | Certified by: AETC/A3D

Supersedes: AETCI36-2604, 20 September 2020 | Pages: 15

This instruction implements Department of the Air Force Manual (DAFMAN) 36-2689, *Training Program*. It contains procedural guidance and responsibilities for planning, conducting, and documenting training for instructors and instructional support personnel assigned to flying training. Specifically, it applies to flying training academic instruction and the Master Instructor Program. This publication applies to instructors who teach formal flying training courses and flying training support personnel who perform related instructional functions in AETC organizations. With the exception of Air Reserve Component personnel participating in Total Force Associations, this publication does not apply to National Guard Bureau or Air Force Reserve Command units and members unless specified by a major command Memorandum of Understanding. This publication does not apply to the United States Space Forces. This publication requires the collection and/or maintenance of information protected by the Privacy Act of 1974 authorized by Title 10 U.S.C., Sec 9013, Secretary of the Air Force. The applicable System of Record Notice F036 AF PC C, Military Personnel Records System is available at: **https://pclt.defense.gov/DIRECTORATES/Privacy-and-Civil-Liberties-Directorate/Privacy/SORNs/**. This instruction may be supplemented at any level, but all supplements must be routed to the office of primary responsibility (OPR) listed above for coordination prior to certification and approval. Refer recommended changes and questions about this publication to the OPR using the Department of the Air Force (DAF) Form 847, *Recommendation for Change of Product*; route DAF Forms 847 from the field through the appropriate functional chain of command. Ensure all records created as a result of processes prescribed in this publication are maintained in accordance with (IAW) Air Force Instruction (AFI) 33-322, *Records Management and Information Governance Program,* and disposed of according

to the Air Force Records Information Management System Records Disposition Schedule. References to forms within this instruction also equate to electronic products when authorized. The authorities to waive wing/unit level requirements in this publication are identified with a Tier ("T-0, T-1, T-2, T-3") number following the compliance statement. See DAF Instruction (DAFI) 90-161, *Publishing Processes and Procedures,* for a description of the authorities associated with the Tier numbers. Submit requests for waivers through the chain of command to the appropriate Tier waiver authority, or alternately, to the Publication OPR for non-tiered compliance items.

SUMMARY OF CHANGES

This document has been substantially revised and must be completely reviewed. Deletes all references to the Inter-American Air Forces Academy and the Community College of the Air Force. Updates office symbols throughout the document; revises the AETC Form 329, *Master Instructor Qualification Record (Aircrew and SERE);* reorganizes the Academic Instructor Program paragraphs and provides clarity to the Academic Instructor (AI) training and approval process (paragraphs **2.1** and **2.2**); updates the Master Instructor Program paragraphs and provides greater clarity to the program (**Chapter 3**); updates References, Acronyms, and Terms sections (**Attachment 1**); updates Fundamental Instructor competencies listing (**Figure A2.1**.).

Chapter 1—OVERVIEW **4**

Attachment 2—FUNDAMENTAL INSTRUCTOR COMPETENCIES LISTING 15

Chapter 1

OVERVIEW

1.1. Introduction. Effective instructors are essential to AETC's flying training programs. Primary presentation methods used in training are demonstration-performance and lecture-discussion but emerging technologies may be approved and applied for flying instruction.

1.1.1. Demonstration-Performance Method. Requirements for instructor qualification using the demonstration-performance method vary by Air Force Specialty Code (AFSC) and Mission Design Series (MDS). In flying training, demonstration-performance is most commonly associated with what is referred to as a "positional instructor". Specific positional instructor requirements are addressed in the appropriate Volume 1 series instructions and syllabuses.

1.1.2. Lecture Method. In flying training, the lecture method is also referred to as a "platform or academic instruction." Graduates of an Academic Instructor Course (AIC), Instructor Methodology Course, Academic Instructor School, Weapons Instructor Course, formal training unit instructor qualification course, or equivalents are authorized to conduct lecture method training in an AETC formal course. Chapter two of this instruction focuses on flying training's lecture method and academic instructor requirements.

1.1.3. If a conflict exists between this instruction and an existing contract, the contract takes precedence. Contracts developed and executed after the implementation date of this instruction will include a requirement to follow the provisions of this instruction to the extent they are applicable to performance of the contract. **(T-2)**

1.2. Master Instructor Program. Master instructor programs (reference **Chapter 3**) are levels of achievement recognizing sustained training delivery and professional growth above the average AETC requirements for instructors.

1.3. Responsibilities:

1.3.1. AETC Graduate Formal Training (AETC/A3D). As the OPR for this instruction, provides standardized command guidance for AETC flying training instructor programs, whether graduate or undergraduate.

1.3.2. AETC/A3D, AETC Undergraduate Formal Training (AETC/A3F), and AETC Future Operations Division (AETC/A3X) develop academic instructor syllabuses/courses to meet unit requirements.

1.3.3. Flying unit commanders will train academic platform instructors to a level of proficiency to meet training mission requirements and determine if academic courses will be considered during the master instructor program determination process.

1.4. Contract Instructors. Functional commanders and CORs, during contract development, will ensure contract instructors use the same AIC, Academic Instructor School, or Instructor Methodology Course, as applicable, in conjunction with the contractor's Training and Certification Plan to achieve the proficiency specified by contract. **(T-2)** The local site manager will certify the individual for instructor duties based on the objectives specified by contract and COR oversight. **(T-2)** Contract instructors normally maintain the same evaluation and Continuation Training requirements as their Government counterparts unless the governing contract dictates a more restrictive currency interval. **(T-2)**

Chapter 2

ACADEMIC INSTRUCTOR PROGRAM

2.1. Academic Instructor Program. The requirement to become an AI in AETC starts with a candidate attending and completing an AETC or non-AETC approved AIC. Completion of a positional instructor training course does not automatically qualify an individual as an AI unless AIC training is included during instructor upgrade training. Once qualified, the AI candidate needs to complete AI certification to teach individual lessons, phases, or courses. While it is true an AI may instruct students during ground or ancillary training, he/she is not automatically qualified as an academic instructor or certified to present specific, testable, academic lectures in a classroom environment.

2.1.1. **Lecture Method Training Requirements.** Lecture method training requirements are specifically defined in each formal syllabus as Academics, and unless otherwise noted in this publication, must be presented by or monitored by a qualified AI certified in the lesson presented. However, not being a certified AI does not necessarily disqualify an instructor from presenting lectures or lessons. For example, while an F-15C instructor pilot is capable of providing ground training on local area procedures or offensive basic fighter maneuvers, the IP is not necessarily certified to develop a lesson plan and present a lecture to a class on spatial disorientation. Similarly, an individual capable of presenting a lecture on the C-130J propulsion system does not mean said individual is qualified to demonstrate and instruct an actual engine out go-around. Also,

2.1.2. T-25 instructors, when properly trained, will be considered academic instructors for the purposes of qualification and recurring evaluations.

2.2. Approved AI Qualification Courses. AI qualification courses must contain fundamental instructor competencies to include, but not limited to teaching methodologies, questioning techniques, academic counseling, professional and unprofessional relationships, and discipline and motivation procedures (if applicable). Units will forward requests for AI qualification course approvals or waivers to AETC/A3DC. **(T-2)**

2.2.1. AETC/A3DC maintains a current list of AETC approved AI courses on the AF Portal at: **https://usaf.dps.mil/sites/aetc-19af/do/dog/DOGC/SitePages/Home.aspx**. Units will ensure candidates complete an AETC approved AI course. **(T-2)** The date of course completion will be considered in the approval process. AETC/A3DC determines if non-AETC approved courses will be accepted. Requesting units will forward course information to AETC/A3DC for approval. **(T-2)** Acceptance of a non-AETC AI course will be determined by the OPR after reviewing information about the course using the competencies mentioned in **paragraph 2.2** and the list in **Figure A2.1**.

2.2.2. Units document AI course completion and maintain it in the AI's training records, or according to service contract requirements. **(T-2)** In all instances of documentation, use of electronic forms is authorized including use of electronic signatures. In all instances, computer-generated forms must mirror AF forms as published on the USAF e-Publishing web site.

2.3. AI Qualification:

2.3.1. AI qualification denotes completion of an approved AI course and an evaluation that has demonstrated an individual's knowledge, capacity, and suitability to perform as an

academic instructor and present instructional material in a lecture format. AI qualification does not necessarily imply competence as a subject matter expert in a career field or weapon system.

2.3.2. Qualification evaluations focus on areas such as lesson preparation, lesson plan use, instructional techniques and delivery, use of training aids, time management, lesson objective completion, student measurement administration, and feedback to students.

2.3.3. Document qualification evaluations on AETC Form 281A, *Instructor Evaluation Checklist*; AETC Form 620, *Academic Instructor Monitoring Checklist*; or AETC Form 620E, *T25 Instructor Monitoring Checklist*; as appropriate. Survival instructors use forms outlined in AETCI 36-2607, *Survival, Evasion, Resistance, and Escape (SERE) Training Systems Evaluation.* **(T-2)**

2.3.4. Graduates of formal flying training instructor upgrade courses are considered AI qualified and certified as long as the academics instructed thereafter fit within operations and tactics of that airframe for which they have been evaluated..

2.4. AI Certification. Certification denotes subject matter expertise in specific lessons and courseware. Unit representatives confirm through the certification process that a qualified AI is competent in specific lessons, phases, or courses.

2.4.1. AI Lesson, Phase, or Course. Prior to designating an AI as capable of instructing syllabus identified lessons, units will ensure:

2.4.1.1. The AI has reviewed all of the applicable lesson materials, including computer-based materials.

2.4.1.2. A lesson-certified AI, contractor site manager, flight commander (or above), or COR monitors the AI while instructing a lesson ensuring course content is presented properly. For flying training instructors, an AFMAN 11-2MDSV2 mission qualification checkride satisfies this requirement provided instructor performance is evaluated. The upgrading AI must demonstrate thorough application and knowledge of the lesson information and proper presentation.

2.4.1.3. AIs will complete an academic test associated with the applicable academic lesson, phase, or course. The minimum passing score is 90 percent. AIs who do not score at least 90 percent will not instruct any academic lessons until they complete a retake and score at least 90 percent. AIs that are also flying training instructors meet the intent of initial testing requirements by maintaining a basic and mission qualification IAW AFMAN 11-202V2, *Aircrew Standardization and Evaluation Program,* and their respective AFMAN 11-2MDSV2.

2.4.2. It is recommended that AIs be certified by individual lessons; however, units may elect to designate academic instructor certification by phase or entire course rather than individual lessons. If so, the unit is not required to monitor each individual lesson performance, nor is the AI required to take every test associated with the various lessons as part of the initial certification. However, the AI will be administered at least one academic test associated with the phase or block representative of the material to be taught. The upgrading AI will not teach any lesson, phase or block of training unless a lesson-certified AI is present. This restriction is removed once the AI is certified in the lesson, phase or course. Once an AI is certified in a

phase or course, he/she is liable for evaluation on each lesson within the phase or course to include the associated academic tests.

2.4.3. Lesson, phase, or course designation certifications are documented in the AI's training records with a new entry on the AF Form 4141, *Individual's Record of Duties and Experience Ground Environment Personnel*, or equivalent. **(T-2)**

2.4.4. Military instructors will be recertified through ongoing evaluations IAW the appropriate AFMAN 11-202V2 in order to instruct exclusively operations and tactics outlined in a particular syllabus. If at any point an instructor teaches lessons or topics not covered by these evaluations the instructor will be certified IAW this instruction.

2.5. Recurring AI Evaluations. Recurring AI qualification evaluations are required annually.

2.5.1. Recurring AI evaluations are conducted on lessons that are representative of the AI's duties. The intent is to determine the AI's continued academic instructional capability, not to verify proficiency in each certified lesson. There is no annual requirement to evaluate each lesson the AI is certified to instruct nor is there a requirement to take every academic test for all the lessons in which the AI is certified. However, if identified as certified to instruct a lesson, AIs are liable for evaluation in that lesson, to include the associated academic testing.

2.5.2. Academic testing is also a recurring annual requirement and must be completed within 30 calendar days of the academic platform evaluation. The AI will not perform AI duties until an academic evaluation is complete. AIs will complete an academic test associated with an applicable academic lesson within their eligibility period. The minimum score is 90 percent for academic testing. AIs that do not score at least 90 percent will not instruct any academic lessons until they complete a retake and score at least 90 percent. **Exception:** AIs that are also formal training instructors meet the intent of the recurring testing requirement by maintaining a basic and mission qualification IAW AFMAN 11-202V2 and their respective AFMAN 11-2MDSV2 requirements.

2.5.3. Failure of a recurring AI evaluation or academic test results in lesson decertification until remedial training and a reevaluation or re-examination is completed. Evaluators and/or AI qualified supervisors will identify remedial training for failure of an academic test or recurring AI evaluation. A minimum of 24 hours must elapse before administering a re-examination or reevaluation to allow for an adequate period to study, however, the applicable remedial training must be completed by the end of the eligibility period. If AI-certified aircrew fail to satisfactorily maintain a basic or mission qualification (i.e. failed checkride, emergency procedures evaluation, aircrew testing, etc.), the aircrew member will be decertified in all lessons until satisfactorily completing requalification requirements. **(T-2)**

2.6. Eligibility Period. AI evaluations expire on the last day of the 12th month after initial qualification or the last periodic evaluation.. This is the evaluation due date. For example, if the initial qualification or recurring evaluation was completed 15 January 2025, the recurring evaluation must be accomplished by 31 January 2026. **Exception:** For flying training instructors, AI evaluations expire on the last day of the 17th month following the month in which the previous periodic aircrew evaluation was completed IAW AFMAN 11-202V2. AI evaluation eligibility is normally conducted during the three months prior to the evaluation expiration date. Squadron Commanders may extend the eligibility period for up to six months. Document the extension in the training record. **(T-2)** If more than 30 days pass after the evaluation expiration date or extension

date, the individual loses AI qualification. Requalification will be regained by following the procedures in **paragraph 2.8.2**. **(T-2)**

2.7. AI Evaluators. The Squadron Commander may authorize the operations officer, assistant operations officer, flight commanders, assistant flight commanders, Instructor Supervisors, and Affiliated School Liaisons as evaluating officials. These individuals may give initial and recurring evaluations.

2.8. AI Currency. AIs will maintain currency by instructing an appropriate lesson at least once every 120 calendar days. **(T-2)** Flying training instructors must instruct an appropriate lesson at least once every 180 calendar days. **(T-2)** It is recognized that some lesson plans identify that the material may be taught in either a classroom or field and/or laboratory environment. If not specifically identified in the course syllabus as academic lectures, these lessons may still be counted toward currency requirements after evaluation and approval by the Squadron Commander on a case-by-case basis.

2.8.1. AIs who have not instructed IAW **paragraph 2.8** are considered noncurrent. **(T-2)** Loss of AI currency requires the AI to be monitored by a current AI during an academic lesson to regain currency. **(T-2)** Document the monitored lesson in the training folder. **(T-2)** No specific form is required. An email printout, separate memorandum, or a locally produced form are examples of acceptable documentation. Once currency is regained, the individual may continue AI duties.

2.8.2. AIs who have not instructed in over 180 days are considered unqualified, except flying training instructors. **(T-2)** Loss of AI qualification requires the AI to complete additional training as determined by the Squadron Commander. **(T-2)** Requalification training will be annotated on AETC Forms 281A, 620, or 620E. **(T-2)** Survival instructors use the forms outlined in AETCI 36-2607. **(T-2)** No academic instruction will be performed until the individual completes AI requalification. **(T-2)**

2.9. AI Continuation Training. Unit commanders will ensure academic continuation training meetings scheduled periodically to ensure quality instruction. **(T-2)** Discuss both administrative topics and instruction techniques. Emphasize specific academic topics such as proper questioning techniques, increasing student involvement, improving transitions and interim summaries, presenting ideas for attention and motivation steps, exchanging AI innovations, and improving communication skills. Similar meetings where academic or instructional techniques are discussed satisfy this requirement.

2.10. AI COR Requirements. CORs, or COR designated subject matter experts, who oversee academic training contracts will complete an approved AIC. **(T-2)** AI CORs will attend AIC training within 120 days of assuming duties. **(T-2)** AI CORs will attend AIC training prior to conducting AI oversight. **(T-2)**

2.11. Non-progression in the Academic Instructor Program. Notify the Squadron Operations Officer of individuals who cannot perform or meet the unit training mission requirements. These individuals will be referred to the Squadron Commander for administrative action when substandard performance indicates the individual is unable to perform tasks associated with the required skill level. **(T-2)**

2.12. Contracted Flight Training in Civil Aircraft. When utilizing contracted flight training in Civil aircraft, the USAF accepts the Federal Aviation Administration (FAA) certification, refresher

requirements, and oversight of flight and ground instructors unless specifically stated in the contract.

2.12.1. Contracts should specifically state the required level of FAA certification required (i.e. Advanced Ground Instructor or Certificated Flight Instructor Instrument) as well as the category and class required.

2.12.2. Program Managers and/or COR's will ensure contractors possess the required certifications.

Chapter 3

MASTER INSTRUCTOR PROGRAMS

3.1. General. This voluntary achievement denotes exemplary subject matter expertise and teaching ability that instructors developed through education and training experiences in addition to initial qualification training.

3.1.1. Eligible (active-duty and civilian, not contractor) personnel are:

3.1.1.1. Flying training unit instructors (T-prefix AFSCs).

3.1.1.2. SERE training instructors (AFSC 1T0X1).

3.1.1.3. Aerospace Physiology instructors (AFSC X13H1 and 1H0X1).

3.1.1.4. Flying training and SERE Formal and Technical training instructors (AFSC 1T0X1) assigned outside of AETC are eligible to accumulate points toward master instructor. The instructor's points will be evaluated for award of the certificate upon reassignment to AETC.

3.1.2. Individuals who earn master instructor status are authorized to wear the AETC Master Instructor Badge according to the guidelines in AETCI 36-2601, *AETC Instructor and Master Instructor Badging Program;* and DAFI 36-2903, *Dress and Personal Appearance of Department of the Air Force Personnel,* as supplemented.

3.2. Responsibilities: Unit Commanders will approve and sign the AETC Form 329 and AETC Form 630, *Master Instructor Certificate*.

3.3. Experience Criteria:

3.3.1. Flying Training Instructors. Instructors are required to have 3 years of teaching experience after completion of a formal instructor training course. **(T-2)** Two years of this experience must be in the current duty assignment which may occur in or outside of an AETC instructor assignment. **(T-2)** The last 6 months of experience (within the 2 years) must be as a current, qualified flying training instructor. **(T-2)**

3.3.2. SERE Instructors. Instructors are required to have 3 years instructor experience. Two years of this experience must have been in a duty assignment in which the instructor taught a minimum of 24 hours each fiscal quarter.

3.3.3. SERE Trainers. Instructors are required to have a minimum of 18 months of experience as a trainer.

3.4. Academic Criteria:

3.4.1. Officers must have at least a baccalaureate degree. SERE and enlisted flying training instructors and civilians must have at least an associate degree.

3.4.2. Academic credit beyond the baccalaureate degree for officers and beyond the associate degree for enlisted and civilian instructors is encouraged. These degree levels represent the minimum required for instructor duty. Master instructor status should exemplify achievements that exceed the minimum requirement.

3.5. Master Instructor Process. Flying training and SERE instructors earn master instructor by accumulating a total of 30 points for specific education, training, and job functions. Points are accumulated after completion of a formal instructor training course and are required in at least four of the following six areas.

3.5.1. Five points maximum can be earned for completing resident military or civilian courses that do not award an Air Force specialty or instructor rating, but are job related. One point is earned for courses less than 3 weeks in length. Two points are earned for courses 3 weeks or longer.

3.5.2. Ten points are required (15 maximum) in the area of college education. Courses will relate to instructor's career field or should be education related. **(T-2)** Recommended subject areas are psychology of learning, counseling, human resources development, test analysis, English composition, speech or other communicative skills, or courses related to the instructor's AFSC. Each Semester Hour counts for 2 points and each quarter hour counts for 1.3 points. **Note:** Credit is not earned for military courses that have been evaluated for college equivalent credit. Credit is not earned for courses taken toward the minimum required degree. College Level Examination Program or Defense Activity for Non-Traditional Education Support tests do not apply.

3.5.3. Flying training and SERE instructors may earn 10 points maximum for periodic instructor awards. **Note:** Minimum level for award computation is the squadron.

3.5.3.1. Flying training instructors may earn points as follows: one point for unit instructor of the quarter, three points for unit instructor of the year, six points for AETC instructor of the year.

3.5.3.2. SERE instructors may earn points as follows: one point for unit instructor of the quarter, three points for unit instructor of the year, five points for AETC Instructor of the Year, and seven points for USAF Instructor of the Year.

3.5.4. A maximum of five points can be earned for completing job-related correspondence and self-study courses. The point value per course hour is 0.12.

3.5.5. A maximum of 10 points may be earned by taking part in continuation and/or recurring training not required to maintain currency or qualification. This training enhances or improves instructor knowledge or performance, other than upgrade training, in courses that broaden the basic level area of expertise. Such training could include FAA certification and computer courses. Each 12 hours of training earns 1 point.

3.5.6. A maximum of 10 points may be earned for instructing during qualification training. The points will be accrued by teaching academic lessons in a qualification training course. List the course identifier, title of the lesson, date and the number of lesson hours taught on the AETC Form 329. One point is earned for every 6 hours of qualification training taught.

CHRISTOPHER R. AMRHEIN, Brig Gen, USAF
Director, Operations and Communications

Terms

Additional Training—Includes any training or action recommended by a unit commander that must be completed following removal or downgrade in instructor status.

Air Advisor—General purpose force personnel with knowledge and skills necessary to assess, train/educate, advise, and assist partner nations in support of our National Military Strategy. Air Advisor education and training improves the USAF ability to operate in an Irregular Warfare environment and enhances partnerships and partnership capacity with traditional allies, as well as developing nations of strategic interest to the United States.

Block—Major component of a course.

Certification—Designation of a qualified AI as having completed required training and denotes subject matter expertise to instruct specific lessons and courseware (see qualification).

Course—Entire program of academic training, ground training, simulators and aircraft (as required) conducted in all media during the programmed training days as directed by the syllabus.

Currency—Compliance with annual positional proficiency required by this directive.

Downgrade—Removal of an individual's instructor status due to failure to meet annual currency requirements or the unit CC determines the individual to be non-proficient.

Instructor Supervisor—A qualified instructor whose responsibilities are to perform instructor duties and to supervise and evaluate other instructors.

Master Instructor—Qualified instructor who has demonstrated sustained training delivery and professional growth above the minimum AETC training and performance requirements.

Non-AETC—As this applies to the consideration of AI courses, refers to a course that was not previously approved by AETC (from any major command) or from a sister service or civilian organization/institution.

Phase—A major component of a course. For example, undergraduate pilot training consists of three phases: preflight, primary, and advanced.

Qualification—Denotes completion of an approved AI course and an evaluation that has demonstrated an individual's knowledge, capacity, and suitability to perform as an academic instructor and present instructional material in a lecture format (see certification).

Attachment 2

FUNDAMENTAL INSTRUCTOR COMPETENCIES LISTING

Figure A2.1. Fundamental Instructor Competencies Listing.

Fundamental Instructor Competencies Listing. The following list of Instructor Competencies in addition to the list mentioned in paragraph **2.2** will be used during consideration and acceptance of non-AETC approved AI courses:

1. Analyze course materials and learner information.
2. Assure preparation of the instructional site.
3. Establish and maintain instructor credibility.
4. Manage the learning environment.
5. Demonstrate effective communication and presentation skills.
6. Respond appropriately to learner's needs for clarification/feedback.
7. Provide positive reinforcement and motivational incentives.
8. Use media effectively.
9. Evaluate learner performance.
10. Evaluate delivery of instruction and report evaluation information.

Paragraph **2.2** requirements:

1. Teaching methodologies
2. Questioning techniques
3. Academic counseling
4. Professional/unprofessional relationships
5. Discipline/motivation procedures (if applicable)
