Pages: 14

This instruction implements AFPD 32-70, Environmental Quality, establishes procedures and responsibilities for forest product sales, fishing, hunting, and trapping programs, and outdoor recreation use on lands under the control of Eielson Air Force Base (AFB). Failure to observe the prohibitions and mandatory provisions in sections 4 and 5 of this publication by military members is a violation of Article 92 of the Uniform Code of Military Justice (UCMJ). Violations may result in administrative disciplinary action without regard to otherwise applicable criminal or civil sanctions for violations of related laws. This instruction applies to all military units, Air National Guard, personnel assigned or attached to Eielson AFB, and civilian employees. All violators, regardless of affiliation, may be prosecuted in courts of state or federal jurisdiction for applicable violations of state or federal law, and are subject to the penalties of those jurisdictions through Assimilated Crimes Act (18 U.S.C. 1382), and/or in addition to the above penalties. The 354th Fighter Wing Commander (354 FW/CC) may impose administrative sanctions for non-compliance in the form of warnings, suspension of recreational privileges, and barment from the installation (18 U.S.C 1382). Law Enforcement, Natural Resources, Cultural Resources, Range Control, and Alaska Department of Fish and Game (ADF&G) personnel are exempt from the provisions of this instruction while operating within the scope of their authority. Ensure that all records created as a result of processes prescribed in this publication are maintained in accordance with AFMAN 33-363, Management of Records, and disposed of in accordance with Air Force Web-RIMS Records Disposition Schedule (RDS) located at **https://www.my.af.mil/afrims/afrims/afrims/rims.cfm**. Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using the AF Form 847, Recommendation for Change of Publication; route AF Forms 847 from the field

through the appropriate functional chain of command. The use of the name or mark of any specific manufacturer, commercial product, commodity, or service in this publication does not imply endorsement by the Air Force.

SUMMARY OF CHANGES

This publication has been substantially revised and requires a complete review. Changes made reflect the current policies and procedures for the Conservation and Management of Natural Resources on Eielson AFB, Alaska.

1. Definition of Eielson AFB. In this instruction Eielson AFB or base means Eielson AFB, Chena River Annex, Detachment (Det) 460 Air Force Technical Application Center (AFTAC), Remote Operating Facility (ROF), Birch Lake Recreation Area, and "C" Battery.

2. Responsibilities:

2.1. *The* 354 FW/CC is responsible for ensuring that natural resource plans, agreements, and activities are developed and monitored on Eielson AFB.

2.2. Base Civil Engineer (BCE) is responsible for forest product sales, fishing, hunting, and trapping programs, and outdoor recreation use on Eielson AFB lands. The BCE relies on his/her Natural Resources office for all technical assistance in establishing policies for the above programs as well as issuing all permits associated with forest product sales, fishing, hunting and trapping. Additionally, the Natural Resources office manages the Unit Natural Resources Conservation Agent program.

2.3. Eielson AFB Conservation Law Enforcement Officers (CLEO) and Unit Natural Resources Conservation Agents enforce base fish and game laws, assist the BCE in natural resources conservation education programs and other natural resources management duties.

2.4. Security Forces will assist the base CLEO and Unit Natural Resources Conservation Agents in the fish and game laws enforcement program.

2.5. Anyone who engages in recreational and natural resource harvesting activities does so completely at his/her own risk. Recreational users and those harvesting natural resources can be held financially liable for any damage to government or private property resulting from their activities.

3. Access to Eielson AFB Land and Water Resources. On Eielson AFB the privilege of hunting, fishing, trapping, and outdoor recreation will be granted to the general public subject to requirements for safety, security of government property, accomplishment of the military mission, and within the ability of the resources to support such activities without impairment of the resource base. All non-military dependent personnel and civilian DOD cardholders have the same privileges of hunting, fishing, trapping, and outdoor recreation on Eielson AFB as military personnel, and access to morale, welfare, and recreational facilities per AFI 34-104, Services Marketing and Publicity Program.

4. Littering. No person will leave any portion of any game animal on roads, parking areas, or in road ditches, nor will any person cause to release litter, refuse, or burning material on Eielson AFB. Failure by military members to obey the mandatory provisions in this paragraph is a violation of Article 92 of the UCMJ.

5. Forest Management Directives:

5.1. Any unit, company, organization, or individual (military or civilian) will contact Natural Resources for approval before cutting or clearing on any lands under Eielson AFB jurisdiction.

5.2. Arctic Survival and Natural Resources will develop a Natural Resources Operating Plan for the Arctic Survival Field Training Area.

5.3. Arctic Survival will have a continuing cutting permit for their training area on Eielson AFB lands, but will adhere to the following procedures:

5.3.1. Dead, downed, insect-infested, diseased, deformed, or suppressed trees will be used first.

5.3.2. All clear cutting must be first approved by 354th Civil Engineer Squadron (CES) Natural Resources Office (DSN 377-5182).

5.3.3. All stumps of cut trees will be 6 inches or less in height.

5.3.4. Training sites will be moved when it becomes apparent that further cutting will deteriorate the environmental qualities of the present site location.

5.3.5. No new roads or trails will be cut or constructed without prior approval from the BCE.

5.4. Tree Cutting/Digging Permit. No one will cut or dig trees (including Christmas trees) on base unless approval is granted by the Natural Resources Office and a form letter available at the Natural Resources Office (Building 2215), authorizing cutting/digging trees, has been issued. Any person issued a permit will abide by the rules set forth by the cutting/digging form letter. Fees may be charged for the permit according to current Air Force forest management policies. Failure by military members to obey the mandatory provisions in this paragraph is a violation of Article 92 of the UCMJ.

6. Unit Natural Resources Conservation Agent Program:

6.1. Appointment. Any Eielson AFB assigned or associate unit may have one Natural Resources Conservation Agent for every 100 personnel assigned, but not more than three agents per unit. Unit commanders should solicit volunteers. Unit agents should reside on base, have at least one year remaining on their base tour, and have no record of game law violations. Unit commanders will submit their appointment requests to the Natural Resources Office (354 CES/CEIEA), including name, rank, organization, hair and eye color, height, weight, birth date, rotation date, and any previous experience supporting the applicant's appointment. The Mission Support Group Commander appoints agents by issuing each an EAFB Form 32, Military Conservation Agent ID Card.

6.2. Training. Natural Resources will brief agents on their duties and responsibilities and give each a program handbook upon appointment.

6.3. Reports:

6.3.1. All agents will submit a quarterly report to Natural Resources annotating their activities related to the natural resources program. This report is due no later than ten days after the end of each quarter.

6.3.2. Each agent will maintain a log book of all hunting and fishing permits issued during the calendar year. The log books will be forwarded to Natural Resources by 10 January of the following year.

6.3.3. Enforcement Patrol:

6.3.3.1. Will be performed on base only.

6.3.3.2. Agents will not be armed when engaged in enforcement activities. Concealed weapons will not be carried at any time.

6.3.3.3. An agent's EAFB Form 32 card will be his/her authorized means of identification. The card will be shown to any hunter, fisherperson, trapper, or recreational user questioned, inspected, or detained.

6.3.3.4. Agents will not use force in detaining a violator. Agents do not have the authority to seize personal property used in a violation. Agents will request assistance from the base CLEO and Security Forces if warranted by the severity of the violation. Agents will document all incidents while performing their duties and submit their reports to Natural Resources personnel.

6.3.4. Termination:

6.3.4.1. Agents lose their status if convicted of a fish and game regulation violation, upon departure from Eielson AFB for reassignment, or when their appointment has expired, as indicated on their card.

6.3.4.2. The BCE will present a certificate of appreciation to deserving agents, as recommended by Natural Resources. To receive a certificate, a person must be an agent for a minimum of six months.

7. Fishing and Hunting Licenses and Permits:

7.1. State Licenses:

7.1.1. Non-resident active duty military personnel permanently stationed in Alaska and their dependents may purchase special non-resident military hunting and fishing licenses at resident rates.

7.1.2. Active duty military personnel and their dependents may purchase resident fishing, hunting, and trapping licenses after being stationed or living in the state for the preceding 12 months (365 days).

7.1.3. Juveniles under l8 years of age who qualify as residents are not required to possess a state license to hunt, fish, or trap in Alaska. Juveniles under 16 years of age who do not qualify as residents are not required to possess a state license to fish, but are required to possess a state license to hunt or trap in Alaska.

7.1.4. State licenses, harvest tickets, and tags can be obtained at any license vendor.

7.2. Federal Migratory Bird Hunting Stamps. Federal Migratory Bird Hunting Stamps, properly validated, will be in possession of all persons 16 years of age or older when hunting migratory waterfowl on base. The stamps may be obtained at any United States Postal Service office.

7.3. Alaska Waterfowl Conservation Stamp. A properly validated Alaska Waterfowl Conservation Stamp will be in possession of all persons hunting waterfowl in Alaska unless that person is an Alaska resident under the age of 16 or over the age of 60. The stamp can be obtained at the Base Exchange.

7.4. Base Permits. No one will hunt or fish on Eielson AFB without having been issued an EAFB Form 6, Hunting and Fishing Permit. The EAFB Form 6 is valid for one calendar year starting 1 January and must be renewed annually. Natural Resources and unit natural resources conservation agents will issue the EAFB Form 6. Natural Resources and all unit natural resources conservation agents will maintain a log book of all permits issued during a

calendar year. All log books will be forwarded to Natural Resources by 10 January of the following year. No one will trap on Eielson AFB without having been issued an EAFB Form 7, Eielson AFB Trapping Permit, by Natural Resources.

7.5. Requirements for Eielson AFB. All personnel will obtain the appropriate state licenses, base permits, Federal Migratory Bird Stamp, and Alaska Waterfowl Conservation Stamp before hunting, fishing, or trapping on base. If qualified to hunt moose by bow and arrow (paragraph **8.2.1.1**), a moose harvest ticket or tag will be obtained before hunting. The appropriate licenses, base permits, stamps, harvest tickets, and tags must be carried at all times when engaged in hunting, fishing, or trapping on base, and must be displayed upon request by an Eielson CLEO, authorized unit natural resources conservation agent, Security Forces Airmen, or state trooper.

8. Instructions for Fishing, Hunting, Trapping, and Outdoor Recreation Use On Base:

8.1. Fishing**.** Fishing will be permitted on Eielson AFB, after the appropriate license and base permit have been issued, except in restricted areas, or in lakes, ponds, and streams that are posted. All fisherpersons will comply with current state of Alaska Sport Fishing Regulations to include seasons, bag limits, and methods and means. Fishing from bridges on-base is not allowed, unless they have a pedestrian walkway or are blocked to traffic.

8.2. Hunting:

8.2.1. Big Game. The big game found on Eielson AFB are black bear, grizzly bear, moose, wolf, and wolverine. Taking of big game animals by any means on Eielson AFB is prohibited, except as follows:

8.2.1.1. On Eielson AFB moose may be taken by bow and arrow after successfully completing an annual weapons proficiency examination administered by Eielson AFB Natural Resources. The base hunting permit (EAFB Form 6) of those successfully completing the exam will be stamped "BOW AND ARROW QUALIFIED FOR MOOSE." During moose season a person may not possess broadheads in the designated hunting areas on Eielson AFB unless they possess an Eielson AFB hunting permit stamped as outlined above. Harvest information will be required from all hunters as determined by Natural Resources. All persons born after 1 January 1986 using bow and arrow for the taking of any game in Alaska are required to have an International Bow Hunting Proficiency Card on their persons.

8.2.1.2. In the Chena River Annex, all big game may be taken using all weapons considered legal by Alaska regulations for hunting. Baiting black bear is prohibited.

8.2.1.3. All hunters will possess the appropriate state license, big game harvest ticket or tag, and base permit and comply with current state of Alaska Hunting Regulations to include seasons, bag limits, and methods and means.

8.2.1.4. Possessing or transporting big game animals taken in violation of this regulation is prohibited.

8.2.2. Small Game. Taking small game on Eielson AFB after the appropriate license and base permit have been issued is permitted, except in restricted areas. If hunting migratory waterfowl, a validated Federal Migratory Bird Stamp and Alaska Waterfowl Conservation Stamp is required. All hunters will comply with current state of Alaska

Hunting Regulations to include seasons, bag limits, and methods and means. Small game is defined as all species of grouse, hares, rabbits, ptarmigan, waterfowl, and wilson or jacksnipe. All persons born after 1 January 1986 using a gun for the taking of any game in Alaska are required to have a Basic Hunters Education Card on their persons.

8.2.3. Permanent hunting blinds or stands are prohibited on Eielson AFB. Temporary blinds or stands may be used as long as they are removed within seven days of the hunting season in which the equipment is used. It is the responsibility of the original installer to remove the structure. Blinds made up of all natural vegetation and no manufactured materials may remain in place after completion of activity. All blinds or stands erected will be considered public use.

8.2.4. Fur Animal Hunting. Taking fur animals on Eielson AFB is permitted after the appropriate license and base permit have been issued, except in restricted areas. All hunters will comply with current state of Alaska Hunting Regulations to include seasons, bag limits, and methods and means. Fur animals are defined as coyote, red fox, lynx, red squirrel, wolf, and wolverine. Shooting wolf and wolverine is prohibited, except in the Chena River Annex, as they are big game animals.

8.3. Trapping. Trapping furbearers and hare on Eielson AFB is permitted as follows:

8.3.1. Furbearers include beaver, coyote, red fox, lynx, marten, mink, weasel, muskrat, land otter, squirrel (red, flying, ground), marmot, wolf, and wolverine.

8.3.2. Natural Resources will lay out trapping areas and make available base trapping maps. Persons currently assigned an area may seasonally apply and be reassigned their previous area for a maximum of three years. Trappers currently assigned an area will have between 1 and 31 July to reapply for their previous area. Trappers with grandfather rights who will be on leave or TDY during the entire month of July can reapply for their area before July. In this case the trapper will, before departing the base, bring proof of leave or TDY to Natural Resources and be registered at that time. All areas not applied for or claimed will be assigned to new applicants by a drawing after l August. Natural Resources will announce the time and date. New applicants must be present at the drawing and personally register a trapping area. The only exceptions will be if an applicant is TDY or on emergency leave. In this case, prior arrangements will be made with Natural Resources before 31 July and a stand-in may reserve an area. Proof of TDY or emergency leave will be required. The TDY or emergency leave applicant will register the area within five working days after returning to base. Only one area can be registered per individual family. Areas not registered during the drawing will be assigned to new applicants on a first come basis until they are gone. Once all areas have been registered, Natural Resources will compile a trapping area waiting list. Areas turned in for reassignment will be registered using the waiting list. When the trapping season is half over, Natural Resources will stop registering turned-in areas.

8.3.3. Only persons registered for an area can trap that area. The only exception is that a registered trapper can sublet their area to another person for certain furbearers or hare. This individual will obtain written permission from the registered trapper and present it to Natural Resources for endorsement. Persons who do not trap their assigned area will not sublet it to another person. Persons not trapping their assigned area by 20 November will contact Natural Resources by 23 November and turn in their area for reassignment.

Natural Resources will have the authority to terminate the trapping privileges of any person(s) not trapping their assigned area by 20 November and not turning it in by 23 November for reassignment. If requested by Natural Resources, trappers will be required to provide an overlay of their trapping area showing their trap line or accompany Natural Resources on a spot check of the trap line.

8.3.4. Persons assigned trapping areas will identify their lines by placing signs at any point a person may access the area. The signs will contain area number, name, and Natural Resources telephone number. The signs will be no smaller than 8" x 10" with print no smaller than 1 inch. Each individual trap or snare will be permanently marked for identification and the mark registered with Natural Resources. All trappers will comply with current State of Alaska Trapping Regulations to include seasons, bag limits, and methods and means.

8.3.5. Traps or snares will not be set within 200 feet of a facility or dumpster, unless they are in water.

8.3.6. The Arctic Survival Training Area and Wing Survival Training Area will be continuously designated as trapping areas #1 and #31, respectively. Trapping by personnel undergoing field training is the only trapping allowed. Trapping in either area by an individual not participating in field training exercises is prohibited.

8.3.7. Problem Beaver. When a beaver problem arises in an area either open or closed to trapping on base, Natural Resources will select a proficient trapper to remove the beaver. Problem beaver in an assigned trapping area will normally be removed by the trapper registered for that area. When beaver trapping season is closed and beaver problems requiring immediate action occur, Natural Resources will contact the State of Alaska Department of Fish and Game to obtain a special beaver trapping permit. Beaver may be removed from areas closed to trapping for preventative measures or population control. All trappers will comply with the conditions of the state beaver permit and current State of Alaska Trapping Regulations to include seasons, bag limits, and methods and means.

8.3.8. Each person assigned a trapping area will file a harvest report with Natural Resources by 10 June following each trapping season. Natural Resources has authority to terminate the trapping privileges of any person(s) not filing a harvest report.

8.3.9. In their assigned area, trappers can dispatch animals in traps with the following firearms only: a .22 pistol or rifle loaded with shorts, long, or long rifle ammunition.

8.4. Falconry. Small game and waterfowl can be hunted on base with a trained raptor controlled by a falconer possessing a joint state/federal falconry permit. The falconer will have the appropriate state hunting license and a base permit. If hunting migratory waterfowl, all falconers must comply with Federal Migratory Bird Hunting Stamp and Alaska Waterfowl Conservation Tag requirements. Hunting with a trained raptor is allowed only in the designated hunting areas. Base hunting area maps are available at Natural Resources (Building 2215). The falconer is liable for the actions of the raptor with respect to seasons, bag limits, and other applicable state regulations.

8.5. Weapons:

8.5.1. Weapon Restriction for Hunting on Base. Bow and arrow with the exception of the use of a crossbow for those with a State Method and Means Exemption form are the only weapons that will be used to take moose on Eielson AFB except for the Chena River Annex. Shotguns no larger than 10 gauge and bow and arrow are the only means that will be used to hunt small game or fur animals on Eielson AFB except for the Chena River Annex. In the Chena River Annex any weapon legal by state regulation may be used. Base hunting area maps are available at Natural Resources (Building 2215). Weapons will not be discharged:

8.5.1.1. Within the areas closed to hunting.

8.5.1.2. Within 50 feet of buildings, airfield lighting, antennas, structures, etc.

8.5.1.3. Where people are training or working.

8.5.1.4. For target practice except at officially established ranges.

8.5.1.5. From, on, or across any roads, streets, avenues, or access routes on base.

8.5.1.6. To cause damage to government or personal property.

8.5.2. Shot discharged from shotguns will be no larger than number two lead bird shot or steel BB shot.

8.5.3. Shotguns discharging slugs, buckshot or lead BB shot, rifles, air rifles, crossbows, pistols, and sling shots will not be used on base, except at established target ranges, Chena River Annex, or in the defense of life and property as stated in the Alaska Department of Fish & Game hunting regulations. No person hunting or shooting in the area surrounding the base will cause any rifle or pistol to be discharged so the projectile may impact on the reservation.

8.5.4. No person under 16 years of age will hunt with, or possess any type of weapon on base without being accompanied by a responsible adult 18 years of age or older. Parents are responsible for taking reasonable precautions to ensure children comply with this requirement.

8.5.5. Personnel authorized by law to possess/own firearms may transport firearms onto the installation. Possession and transport of firearms on the installation must comply with integrated defense regulations.

8.6. Off-limit Areas. Hunting, fishing, trapping, and outdoor recreation use on Eielson AFB in an area designated as off-limits or restricted, or in any other area so designated by proper authority, is prohibited at all times. Maps are available at Natural Resources (Building 2215).

8.6.1. Prohibited areas for hunting, fishing, trapping, and all other outdoor recreation include:

8.6.1.1. Airfield.

8.6.1.2. Firing range and its impact area.

8.6.1.3. Engineer Hill Munitions Storage Area.

8.6.1.4. Quarry Road Munitions Storage Area.

8.6.1.5. Explosive Ordinance Disposal Controlled Area.

8.6.1.6. Petroleum Oil Lubricant tank farm area.

8.6.1.7. Cooling ponds located behind the Central Heat and Power Plant (CHPP).

8.6.1.8. Asbestos landfill, soil remediation area, and fire training area.

8.6.1.9. Sewage lagoon and treatment area.

8.6.1.10. Det 460, AFTAC, ROF. Beaver Creek Road which goes through the Det 460, ROF, cannot be used for access to open areas on either side of the ROF.

8.6.1.11. "C" Battery off Johnson Road in the Yukon Training Area.

8.6.1.12. Areas adjacent the ammunition unloading rail spur when ammunition unloading is underway.

8.6.1.13. Arctic Survival Training Area. Trapping is allowed as outlined in paragraph **8.3.6**.

8.6.1.14. The public transportation route (PTR) of potential explosion sites (PES).

8.6.1.15. Any area where training is being conducted.

8.6.2. Hunting and trapping are prohibited in the following areas:

8.6.2.1. Chena River Campground.

8.6.2.2. Birch Lake Recreational Area.

8.6.3. Hunting is prohibited in the area described as follows: That area beginning at the intersection of Transmitter Road and the Trans-Alaska Pipeline bounded by Transmitter Road to mile 0.6, then a line west from mile 0.6 Transmitter Road to the perimeter fence, then south along the perimeter fence to mile 337 Richardson Highway, then east along airfield fence to Mullins Pit Road, then along Mullins Pit Road to Quarry Road, then west on Quarry Road to the Petroleum, Oil, Lubrication (POL) firebreak, then along the northern-most edge of the POL firebreak to the end of the railroad spur for unloading coal, then along a line from the railroad spur to the eastern end of the CHPP cooling pond, then along the northern-most edge of the CHPP cooling pond to the CHPP cooling pond overflow ditch, then along the CHPP cooling pond overflow ditch to French Creek, then along French Creek to the northeast corner of French Creek housing to the Trans-Alaska Pipeline, then along the Trans-Alaska Pipeline to its intersection with Transmitter Road.

8.6.4. Personnel who have been granted access to off-limit areas for official duties are prohibited from hunting, fishing, or trapping such areas.

8.6.5. Any hunting, fishing, trapping, or recreational equipment found in an off-limit area will be confiscated and handled in accordance with applicable military directives.

8.6.6. The BCE has the authority to prohibit hunting, fishing, trapping, or outdoor recreation use in any area for management purposes.

8.7. Violations:

8.7.1. Personal Responsibility and Punitive Actions. Personnel using Eielson AFB must be familiar with and are held responsible for knowing the federal, state, this and other fish and game and Eielson AFB recreational regulations. Natural Resources will provide recreational supplements, brochures, maps, website and other material as appropriate to inform the public of regulatory requirements.

8.7.2. All violations or possible violations of fishing, hunting, or trapping regulations by military personnel, civilian employees, or installation visitors will be reported immediately to the base CLEO.

8.7.3. When big game animals are taken in violation of this regulation, Natural Resources will be notified immediately. If personnel from Natural Resources cannot be located, Security Forces will handle the incident. The following will apply:

8.7.3.1. Such big game animals are property of the base. No part of such animals will be given to the violator(s).

8.7.3.2. All salvage requirements for all species must be met in accordance with the Alaska Department of Fish and Game.

8.7.3.3. The meat, hide, antlers, or skull will be donated to a charity acquired from the list maintained by the Alaska State Troopers/Fish and Wildlife Protection (907-451-5100).

8.7.3.4. The meat, hide, antlers, or skull will be secured in a cool area so they will not spoil if a charity is not immediately available.

8.7.3.5. State of Alaska wanton waste laws will apply.

8.7.4. All military, state, and federal violations by Army personnel on Eielson AFB lands will be processed by the Eielson CLEO or Security Forces and a report provided to the appropriate Army chain of command.

8.7.4.1. Civilians are subject to applicable state and federal laws and this instruction. In addition, civilians who commit violations, whether or not prosecuted, may be escorted off the base and denied reentry to the base.

8.7.4.2. Persons who commit violations may lose their Eielson AFB hunting, fishing, and trapping privileges for an appropriate period of time based on the severity of the violation.

9. Destroying Game in Defense of Life or Property:

9.1. When game animals must be destroyed in defense of life or property, Natural Resources will be notified immediately so they may investigate the conditions of the encounter and determine if Alaska law was followed in the defense of life or property.

9.2. Game destroyed in defense of life or property belongs to the State of Alaska. The edible meat, skull, and/or hide must be salvaged and the Alaska Department of Fish and Game and Fish and Wildlife Protection must be notified immediately as outlined in the Alaska Hunting Regulations.

9.3. When time and conditions allow, permission to destroy game in defense of life or property must be requested by contacting Natural Resources. Natural Resources will notify the State of Alaska, Department of Fish and Game for approval of the intended actions.

9.4. Beaver Dam Removal. Beaver dams can be removed only after approval by Natural Resources. All requests for beaver dam removal will be submitted to Natural Resources in writing. All requests will include justification for the action. If removal is justified for a dam belonging to an active beaver colony, Natural Resources will use the procedures outlined in paragraph **8.3.7** to eliminate the colony prior to removing the dam.

10. Feeding/Harassing Birds. The feeding of ravens, waterfowl and gulls on Eielson AFB is prohibited. The harassing or disturbing of waterfowl within the portion of Eielson AFB closed to hunting is prohibited, except if done as part of an authorized bird/Base Aircraft Strike Hazard reduction program.

11. Off-Road Vehicles. Off-road vehicle policies for Eielson AFB are in Eielson AFB Instruction 32-7002, Use and Control of Off-Road Vehicles (ORVs).

12. Camping. Camping is allowed on Eielson AFB except in off-limit areas, sections of the cantonment area designated for public use, or any other area so designated by proper authority. Persons camping in recreational vehicles will not park such vehicles as to damage vegetative cover. Persons with travel trailers or campers with a holding tank for sewage will not dump or release the sewage on Eielson AFB, except at designated sanitary dumping stations. A camper may use dead or down trees for campfires. Campfires will only be in approved iron fire rings. Fires may be allowed outside a fire ring, but only after acquiring approval from the Fire Department (907-377-4156). Approval is not needed for established fire pits in campgrounds or picnic areas on base. Only campfire wood free of nails will be used and under no circumstances will trash, wood containing nails, or items that are not solely made up of wood products be used at any time. Burning of any restricted item will be considered littering.

13. Trail and Recreation Area Use. Any trail or recreation area designated for a special or single use will be used for that purpose only.

13.1. Ski Slope. When there is snow on the ski slope, skiing and sledding in their respective areas will be the only forms of outdoor recreation allowed. Skiing will be permitted only if the 354th Force Support Squadron has the slope open for use. When there is no snow cover on the ski slope, hiking will be the only form of outdoor recreation allowed on the slope. Operation of any motorized vehicles (cars, trucks, motorbikes, all-terrain vehicles, etc.) on the ski slope (except 354th Force Support Squadron or BCE maintenance vehicles) is prohibited.

13.2. Cross-Country Ski Trails. When there is snow cover on cross-country ski trails, hiking, walking a dog or any pet, snowshoeing, or skiing with downhill skis on the cross-country ski trails is prohibited.

13.3. Self-Guided Nature Trail. Bicycling and operating motorized vehicles are prohibited on the trail. Users will stay on the trail and act accordingly as not to damage any of the plant specimens.

14. Swimming. Swimming is prohibited in all lakes, ponds, and streams on base. This includes those water bodies west of the Richardson Highway on Air Force property.

15. Watercraft. The use of watercraft (boats, canoes, rafts, etc.) on base lakes, ponds, and streams is permitted (this does not apply to off-limit areas). All occupants in a watercraft, regardless of age, will wear a U.S. Coast Guard (USCG) approved Type I, II, or III Personal Floatation Device while on Eielson AFB waters. Persons under 10 years of age must be under the supervision of an adult (someone 18 years of age or older).

15.1. The use of watercraft propelled with gas powered engines or motors is prohibited on Moose Lake. Electric motors are allowed.

15.2. The use of jet skis is prohibited on all bodies of water except Bear Lake.

15.3. Operators of motorized boats must meet state laws for operation of motorized vehicles. No individual may participate in boating on Eielson AFB lakes or waterways when impaired by alcohol or drugs.

DAVID A. MINEAU, Colonel, USAF
Commander
