AIR MOBILITY COMMAND
INSTRUCTION 16-1404

22 JULY 2026

Operations

TOP SECRET CONTROL

COMPLIANCE WITH THIS PUBLICATION IS MANDATORY

ACCESSIBILITY: A copy of this publication can be found digitally on the AMC Portal page at: **https://usaf.dps.mil/sites/AMC-IP/SitePages/Home.aspx**

RELEASABILITY: There are no releasability restrictions on this publication.

OPR: HQ AMC/IP
Certified by: HQ AMC/IP
Supersedes: AMCI16-1404, 23 October 2018
Pages: 48

This instruction implements Executive Order 13526: *Classified National Security Information*; DoDM 5200.01 Volume 1_DAFMAN 16-1404, Volume 1, *Information Security Program: Overview, Classification, and Declassification*; DoDM 5200.01 Volume 2_DAFMAN 16-1404, Volume 2*, Information Security Program: Markings of Classified Information*; DoDM 5200.01 Volume 3_DAFMAN 16-1404, Volume 3, *Information Security Program: Protection of \Classified Information*. This instruction applies to all HQ Air Mobility Command (AMC), AMC Bases, and AMC Units within AMC which contain a Top Secret Control Account (TSCA) and is designed to help manage the organization's TSCA. This publication applies to AMC gained Air Force Reserve Command (AFRC) and Air National Guard (ANG) Wings/Units required to participate in the US Strategic Command (USSTRATCOM) 801X mission. This publication may be supplemented at any level. Ensure all records generated as a result of processes prescribed in this publication adhere to Air Force Instruction (AFI) 33-322, *Records Management and Information Governance Program*, and disposed in accordance with (IAW) the Air Force Records Disposition Schedule which is located in the Air Force Records Information Management System. Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using the DAF Form 847*, Recommendation for Change of Product*; route the DAF Form 847 from the field through the appropriate functional chain of command. Submit improvements to HQ AMC/IP, 510 POW/MIA Dr. Suite E201, Scott AFB IL 62225-5307, DSN 576-4955/ Commercial 618-256-4955. The authorities to waive wing/unit level requirements in this publication are identified with a Tier ("T-0, T-1, T-2, T-3") number following the compliance statement. Submit requests for waivers through the chain of command to the appropriate Tier waiver approval authority, or alternately, to the Publication OPR for non-tiered compliance items.

SUMMARY OF CHANGES

Deviations from the procedures outlined in aforementioned publications should be crosschecked against the original source documents to assure compliance with policy and Federal law. This instruction is intended to be localized and used to help focus on critical aspects of properly safeguarding Top Secret (TS) information. The security of TS material is paramount to national security. Strict compliance with TS control procedures takes precedence over administrative convenience. Every individual who originates or handles TS material must contribute to its safeguarding. This rewrite of AMCI 16-1404 is updating references, adding Director, Commander, and Wing Information Protection Offices (IPO) responsibilities and adding Section 4.3, requirements for controlling received messages via the GASNT, SACCS, AMHS.

Chapter 1—INTRODUCTION **5**

1.1. General. 5

1.2. Responsibilities. 5

Chapter 2—TOP SECRET INFORMATION SAFEGUARDING **7**

Attachment 7—FORMAT FOR TOP SECRET AUDIT/INVENTORY OFFICIAL APPOINTMENT 45

Attachment 8—FORMAT FOR TOP SECRET CONTROL ACCOUNT AUDIT/INTVENTORY REPORT 47

Chapter 1

INTRODUCTION

1.1. General. The security of TS material is paramount. While DoDM 5200.01, Volume 1_DAFMAN 16-1404, Volume 1, *Information Security Program: Overview, Classification, and Declassification* makes a TSCA optional, this is a requirement for AMC units maintaining TS material and AMC-gained ANG and AFRC units required to participate in the USSTRATCOM 801X missions. This chapter contains policies individuals will use to maintain their TSCA. When collateral TS information/material is stored in Special Access Programs (SAP) facilities (SAPF), DoDM 5205.07, *DoD Special Access Program (SAP) Security Manual* guidance will be followed. When collateral TS information/material is stored in Sensitive Compartmented Information (SCI) Facilities (SCIF) DoDM 5105.21 Volume 1, *Sensitive Compartmented Information (SCI) Administration Security Manual: Administration of Information and Information Systems Security*, guidance will be followed. The IPO may impose more restrictive requirements for maintaining the TSCA. TS control procedures take precedence over administrative convenience. Each individual cleared for access to TS material is responsible for properly safeguarding such material and must ensure further disclosure is made only on the basis of a proper clearance and a verified need-to-know.

1.1.1. TS material is any document (i.e., book, sheet(s) of paper), received message (i.e., SACCS, AMHS, GASNT), magnetic storage device/media (i.e., hard drive (mobile and fixed GASNT and ACCS/SDT), floppy disk, CD), etc. that contains TS information.

1.1.2. All TS material will be controlled in accordance with IAW **paragraph 4.2** upon receipt. As an exception, messages received from the SACCS, AMHS, or GASNT held for less than 24 hours will be controlled IAW **paragraph 4.3**. **(T-2)**

1.1.3. TS information will be retained only to the extent necessary to satisfy mission requirements.

1.2. Responsibilities.

1.2.1. **Headquarter A-Staff or Special Staff Director/Wing, Group, or Squadron Commander.**

1.2.1.1. Establish in writing, See **Attachment 3**, a TSCA when the unit produces or stores collateral TS information/material. **(T-2)**

1.2.1.2. Close in writing, See **Attachment 4**, the TSCA when the unit no longer is required to generate, store, or receive TS information/material in the past 12 months. **(T-2)**

1.2.1.3. Appoint, in writing, a TSCO and one or more alternates to accomplish all matters affecting accountability and control of TS material. The appointment letter will include the name, grade, DOD ID, and security clearance level of the appointed individuals. Social Security Numbers are optional and if included, must be protected. **(T-2)**

1.2.1.4. Designates in writing, See **Figure A7.1**, an individual who understands TS control procedures to conduct the Annual Audit/Inventory to be complete after the TSCO re-controls TS information/material not to exceed 28 February of the current year. This authority cannot be delegated. **(T-2)**

1.2.2. **Wing Information Protection.** When a unit has established a TSCA, the Wing IPO will incorporate the TSCA into their Compliance Inspection Program. **(T-2)**

1.2.3. **Top Secret Control Officer (TSCO).**

1.2.3.1. The TSCO and alternates are responsible for receiving, dispatching, and maintaining accountability of all TS documents. Individuals shall be selected on the basis of experience and reliability, and all must have TS eligibility. See **Attachment 2**, Top Secret Control Account Instructions Checklist. Units may modify this checklist by adding steps as they see fit. **(T-2)**

1.2.3.2. Prior to allowing individuals access to TS information, verify with the security manager/assistant the individual has been granted TS access, via DISS or successor system, and properly briefed/trained. **(T-0)**

1.2.3.3. Coordinates with the Director/Commander for all TS meetings. **(T-3)**

1.2.3.4. Ensures only TS material which is authorized to be reproduced is done so at a minimum and accounted for by completion of the AF Form 143, *Top Secret Register Page*, for each copied document. **(T-0)**

1.2.3.5. Annually review the TS documents, verify the continued need to possess the documents for mission accomplishment. This will be conducted in conjunction with the "clean-out day" IAW With DoDM 5200.01, v3_DAFMAN 16-1404, v3, encl 3, para 17.b. **(T-0)**

1.2.3.6. Complete the annual re-controlling of TS information/material as soon as possible after 1 January of each year, but no later than 31 January.

1.2.3.7. Forwards written notices of account creations, closures, and appointments to the Wing Information Protection Office (IPO). **(T-2)**

1.2.4. **Top Secret Original Classification Authorities (OCAs).** TS OCAs make the decision to classify certain information at the TS level. AMC does not have an OCA authorized to classify information at the TS level. Contact your servicing Wing Information Protection Office for the current OCA listing.

Chapter 2

TOP SECRET INFORMATION SAFEGUARDING

2.1. Control Measures. DoDM 5200.01 Volume 1_DAFMAN 16-1404, Volume 1, DoDM 5200.01 Volume 2_DAFMAN 16-1404, Volume 2, and DoDM 5200.01 Volume 3_DAFMAN 16-1404, Volume 3 requires establishing a system of control measures that ensure access to classified information is limited to authorized persons. The control measures must be appropriate to the environment in which access occurs and the nature and volume of the information. The system must include technical, physical, and personnel control measures. While physical and personnel control measures are in place, administrative control measures include records of internal distribution, access, generation, inventory, reproduction, and disposition are required.

2.2. Top Secret Classification. All TS material will be controlled under the TSCA upon receipt, regardless of how long they will be maintained, with the exception of messages received via GASNT, SACCS, AMHS, or successor system held less than 24 hrs. **(T-2)** See **Paragraph 4.3**. TS classification is applied to information that, if disclosed to unauthorized persons, could reasonably be expected to cause exceptionally grave damage to our national security. Examples of exceptionally grave damage include:

2.2.1. Armed hostilities against the U.S. or its allies.

2.2.2. Disruption of foreign relations vitally affecting national security.

2.2.3. Compromise of vital national defense plans or complex cryptology and communications intelligence systems.

2.2.4. Revelation of sensitive intelligence operations.

2.2.5. Disclosure of scientific or technological developments vital to national security.

2.3. Safekeeping and Storage: TS information shall be stored:

2.3.1. A GSA-approved security container equipped with a lock meeting federal specification FF-L-2740 and be located in an area determined to have security-in-depth'

2.3.2. In a secure room (also called an open storage area) constructed according to DoDM 5200.01, Volume 3_DAFMAN 16-1404, Volume 3, Enclosure 3, Appendix 1 equipped with an IDS with the personnel responding to an alarm within 15 minutes of the alarm annunciation if the area has been determined to have security-in-depth, or within 5 minutes of alarm annunciation if it has not.

2.3.3. In a vault, or GSA-approved modular vault, meeting the requirements of Federal Standard (FED-STD) 832, Construction Methods and Materials for Vaults as specified in DoDM 5200.01, Volume 3_DAFMAN 16-1404, Volume 3, Enclosure 3, Appendix 1, with a GSA-approved door.

2.3.4. Four forms are associated and must be utilized with the security container, secure room, vault, and GSA-approved modular vault. The Standard Form (SF) 89, *Maintenance Record for Security Equipment*, is used to record the maintenance or repair of security containers, secure room doors, or vault doors while the SF 700, *Security Container Information*, identifies personnel to be notified in the event a security container, secure room door, or vault door is found unsecured, Standard Form SF 702, *Security Container Check Sheet*, is used to annotate

the date time and initials of the individual opening, closing and checking the security container is closed and locked, and Standard Form (SF) 701, *Activity Security Checklist,* is used to annotate the date, time and initials of the individual who completed the end of day checks.

2.3.4.1. SF 89 is posted in the security container or on the open storage area/vault door. The form provides a historical maintenance record for each container. Only repairs, alterations or modifications completed by GSA certified locksmiths/technicians, and the 5-year visual inspections are entered on the form. Custodians are responsible for completing required inspections, using the checklist in DoDM 5200.01, Volume 3_DAFMAN 16-1404, Volume 3, Enclosure 3, Appendix 2. Combination changes are not entered on this form. The form remains with the container throughout its lifetime. When filled, attach new form to the old one.

2.3.4.2. SF 700 has two parts.

2.3.4.2.1. Part 1 is completed and is attached to the inside of the security container's locking drawer or on the open storage area/vault door. If the security container has multiple locking drawers, a SF 700 is attached inside each drawer. Additional information needed on the form is self-explanatory and is outlined in the upper left-hand corner of the form.

2.3.4.2.2. Part 2 is in two parts. Part 2 is a carbon copy of Part 1 and is a self-sealing envelope. Part 2a is detachable and contains the combination for a specific container. It is inserted and secured in the enveloped supplied as Part 2. Part 2a (with the combination) and the Part 2 envelope are marked and controlled at the highest level of material stored in the container/secure room/vault. If used, the envelope containing Part 2a has an AF Form 144 attached for control and is stored in another approved GSA security container storing TS information. Ensure the Part 2 has the classification designation box with the following "Derived From: 32 CFR 2001.80 (d)(3) with declassification date being "Upon change of combination". Normally, if the organization has only one container authorized for storage of TS material, the combination is NOT recorded and stored. If the combination is not recorded, simply discard Parts 2 and 2A and post Part 1. Part 2 is opened when the director/commander specifically determines it is necessary for emergencies or in the event the combination cannot be remembered.

***NOTE:** When the combination to a TS security container is changed, the previous SF 700 Part 2/2a are declassified, will retain CUI designation and must be destroyed with a shredder approved for destroying CUI.

Chapter 3

TOP SECRET CONTROL AND MANAGEMENT

3.1. Top Secret Records Management. All TS records will be maintained IAW AFRIMS. **(T-0)**

3.2. Top Secret Control Account. The Director/Commander establishes a TSCA in an office or area whenever TS information is routinely originated, stored, received, or dispatched. The TSCA is established by written memorandum addressed to the IPO. Officials are appointed to manage the TSCA when it is established. **Attachment 6** is an example of how to write a TSCA establishment memorandum and appoint management officials in one piece of correspondence. The TSCA should be closed as soon as it is no longer needed or after 12 months of no receipt, generation or storage of material. **(T-2)** See **Chapter 11** for requirements and procedures.

3.2.1. The Director/Commander appoints, in writing, a primary TSCO and at least one alternate TSCO; or more than one depending on the volume of TS material maintained. The appointments are required as soon as the TSCA is established. A new appointment memorandum is required whenever the Director/Commander or TSCO changes. **(T-0)**

3.2.2. Appointments are based on appropriate personnel security investigations, proper clearance and access authorizations, training, and experience. Both primary and alternate TSCOs must be U.S. Government personnel, civilian or military, and have a need-to-know for TS material. The security manager/assistant should not serve as the primary TSCO. For operational necessity, during irregular or non-duty hours, TSCO appointing authorities may designate, in writing, additionally cleared personnel to work with the TSCO and to pick up TS messages from the Telecommunications Center. These people are briefed by the TSCO concerning proper storage requirements and handling procedures. **(T-0)**

3.3. TSCA Binder. Each TSCO maintains specific records to manage the TSCA. These records are maintained separate from the actual TS material. TSCOs will maintain an unclassified physical TSCA binder divided into six sections: **(T-2)**

3.3.1. Section 1 – TSCO Appointment Letter. Copy of TSCO appointments kept current as changes occur. Copy of TSCA establishment memorandum retained for the life of the TSCA.

3.3.2. Section 2 – Current/Active TS Control Log.

3.3.3. Section 3 – Active AF Form 143s and AMC Form 1565, *Entry, Receipt, and Destruction Certificate* (current year only).

3.3.3.1. Maintain in this section the AF Form 143s only for the current/active TS material. If material is destroyed or returned to originator, attach AF Form 144, *Top Secret Access Record and Cover Sheet*, to the AF Form 143 and file in Section 4 of the binder.

3.3.3.2. Attach AMC Form 1565 to the AF Form 143 to which a change has been made. The AMC Form 1565 must have section II and IV (at a minimum) filled out prior to being attached to the AF Form 143.

3.3.4. Section 4 – Inactive AF Form 143s and AF Form 144s (current year only). Maintain the AF Form 143s and AF Form 144s of material destroyed (current year only) in this section of the binder and retained for a period of 5 years following action taken to make page inactive. Form shows action taken to close or transfer accountability of particular TS material.

3.3.5. Section 5 – Results from audits/inventories. Retain results for five years.

3.3.6. Section 6 – Previous 5 years of TS Control Logs, AF Form 143s and AF Form 144s. This section can be kept in separate binders to accommodate the number of documents.

3.4. Top Secret Control Log.

3.4.1. Retain the Current/Active TS Control Log in Section 2 of the TSCA binder. It may be created using a locally developed form. See **Attachment 3**, TS Control Log Example. The following are the minimum requirements that must be documented on the TS Control Log: (**T-2**)

3.4.1.1. Register Control Number (RCN) from the AF Form 143, *Top Secret Register Page*, Block Number 14.

3.4.1.2. Subject of material (unclassified).

3.4.1.3. Date material was initially received into the TSCA.

3.4.1.4. Originating Control Number (OCN).

3.4.1.5. Number of copies received.

3.4.1.6. Copy number(s).

3.4.1.7. Location of material. Use this column to show the location of the material.

3.4.1.8. Disposition. If the document is destroyed, mark this column with "Destroyed YYYYMMDD". If it is returned to the originator, mark this column with "Returned to xxx, YYYYMMDD". If the document is re-controlled to the next year, mark this column with "Re-controlled to xxxxx (RCN)" on the old TS Control Log.

3.4.2. Mark the last page of each TS Control Log with: "This page (# __ of #__) is the last page of the Top Secret Control Log for calendar year 20__." This statement is only required after re-controlling.

3.4.3. The following documentation is required to be maintained. It may be maintained in the TSCA binder (space permitting) or separate binder: (**T-2**)

3.4.3.1. All AF Form 143s from previous five years.

3.4.3.2. All AF Form 144s from previous five years.

3.4.3.3. All audit results from the previous five years.

Chapter 4

TOP SECRET ACCOUNT MANAGEMENT

4.1. Forms Used in Top Secret Document Management. TS material is accounted for throughout its lifetime, from the time it is created until it is downgraded, declassified or destroyed. Actions associated with establishing accountability, whether by original creation or its transfer from another source, are documented using specific forms.

4.1.1. As soon as TS material is created or received, a new audit trail begins by completing the following two actions.

4.1.1.1. Accountability is established by creating an AF Form 143, *Top Secret Register Page.* **(T-2)**

4.1.1.2. A TS disclosure record is established by creating an AF Form 144, *Top Secret Access Record and Cover Sheet.* **(T-2)**

4.1.2. A receipt must accompany each separate piece of TS material entering or leaving the TSCA. (T-2) Air Force organizations normally use AF Form 310, *Document Receipt and Destruction Certificate*, to document receipt of a whole document and AMC Form 1565, *Entry, Receipt and Destruction Certificate*, to document receipt of changes. However, receipts used by other military branches, Government agencies and civilian companies are acceptable as long as they adequately describe the material. If a discrepancy between the material description on the receipt and the actual material received is found, the difference is resolved and/or annotated on the receipt prior to signing it and returning it to the sender. When the form is signed and mailed/faxed back to the sender, the sender's audit trail for that material is closed.

4.2. RECEIVE/CREATE TOP SECRET DOCUMENT.

4.2.1. Step 1 - Upon receiving/creating a TS document, the TSCO must ensure an AF Form 144 is attached to the front of the document. The AF Form 144 will only be created the first time the material is entered into the TSCA. **(T-2)**

4.2.2. Step 2 - Page check the document to ensure that no pages are missing, and the document is intact. Immediately notify the originator of any discrepancies. Fill out the Page Check page in the document (if applicable). **(T-2)**

4.2.3. Step 3 - Sign and return the receipt (normally AMC Form 1565) promptly to avoid tracer action. Annotate any discrepancies on the receipt. **(T-2)**

4.2.4. Step 4 – Assign RCN with the next number available from the current/active TS Control Log and complete an AF Form 143 for the document. **(T-2)**

4.2.5. Step 5 - Write the RCN and OCN on the front page of the TS document or equipment.

4.2.6. Step 6 - File the TS register page in numerical order in the Current/Active section of the TSCA binder. **(T-2)**

4.3. Top Secret Messages Received via Telecommunications, GASNT, SACCS, AMHS, or successor systems.

4.3.1. Top Secret messages received via GASNT, SACCS, AMHS, or successor system and held less than 24 hrs. will be destroyed but controlled with the following procedures.

4.3.1.1. Two appropriately cleared individuals are required to be present for the destruction of TS material (the individual destroying the material and a Witness). If the primary or alternate TSCO are not on duty, they will verify the destruction is annotated correctly on their next duty day. **(T-2)**

4.3.1.2. Don't complete AF Form 143/144.

4.3.1.3. Add to the current/active TS Control Log by assigning the next RCN available and filling in all columns. The following will be placed in the SUBJECT column "TS MESSAGE HELD LESS THEN 24 hr, 1 COPY No AF Form 143/144". The RCN will be used as the OCN. In the Location of Material column put "N/A". **(T-2)**

4.3.1.4. In the Disposition Column put the date the message was destroyed, print rank/name, and signature of the two appropriately cleared persons See **Figure A6.1**. **(T-2)**

4.3.2. For messages received via Telecommunications, GASNT, SACCS, AMHS, or successor system and retained greater than 24 hrs. follow the procedure outlined in 5.1-5.2. **(T-2)**

4.4. AF Form 144, *Top Secret Access Record and Cover Shee*t. Access to specific TS information is documented using the AF Form 144, *Top Secret Access Record and Cover Sheet.*

4.4.1. The TSCO prepares a separate form for each copy of the TS document created or received and attaches the forms to the applicable TS material. The TSCO uses the form as a documentation record of all persons given access to particular TS material. It provides a record of the individual accessing the material and on what date they had access to it. The AF Form 144 is always kept with each document and removed only when the document is destroyed, downgraded or declassified. **(T-2)**

4.4.2. All individuals who accessed the TS information will be identified/annotated on the AF Form 144, names will be printed or typed, not signed, a person's name must appear only once, regardless of the number of times the individual accesses the information. **(T-2)**

4.4.3. When a form becomes filled with names, a second page is prepared and added on top of the previous one. Number additional AF Form 144 with ___of___ page numbers. **(T-2)**

4.4.4. When the TS material or document is destroyed, downgraded, declassified, the forms are filed, by calendar year and register control number, in the inactive section of the TS Control Log for a period of five years. **(T-2)**

4.4.5. How to Prepare an AF Form 144.

4.4.5.1. Name and Grade – Write the first name, last name, and grade of the individual having access. **(T-2)**

4.4.5.2. Office Symbol and Phone Number – Self-explanatory. **(T-2)**

4.4.5.3. Date – Write the date the individual had access. **(T-2)**

4.4.5.4. Originator of TS document – Write the name of the originator of the document. This information will be found on the TS material. If your CP created the TS material, then enter your organization and function address symbol in this block. **(T-2)**

4.4.5.5. Originator Control Number (OCN) – Write the OCN number. This number will be found on the TS material. If your organization created the TS material, the initial RCN will be the OCN. Once an OCN is assigned to a document, it will never change. **(T-2)**

4.4.5.6. Register page Number – Write the current register page number. This number will change every year as the TSCA is re-controlled IAW **Chapter 7. (T-2)**

4.4.5.7. Date Accountability Terminated – Write the date material was permanently removed from the TSCA (destruction or accountability transferred). **(T-2)**

4.4.5.8. Remarks – This section is used to reflect:

4.4.5.8.1. An unclassified title.

4.4.5.8.2. Special Access Program identifiers, e.g., NC2-ESI, Controlled Nuclear Weapon Design Information (CNWDI), NATO, etc.

4.4.5.8.3. Warning notices, e.g., NOFORN, Restricted Data (RD), etc.

4.4.5.8.4. Copy number, if applicable.

4.5. AF Form 143, *Top Secret Register Page*. The TSCO uses the AF Form 143 to account for each document, including page changes and inserts, and each piece of material or equipment to include Automated Information System (AIS) media. The TSCO may automate their accounts as long as all of the required information is included in the AIS and is available to each alternate TSCO.

4.5.1. The TSCO uses one form to enter accountability when multiple copies of one document are received. Each copy on the form is managed as a separate entity.

4.5.2. For AIS or digital media, the TSCO must either describe each TS document stored on the media on the AF Form 143 or attach a list of the documents to it. This will facilitate a damage assessment if the media is lost or stolen. **(T-2)**

4.5.3. Prepare an AF Form 143 for each CD-ROM containing TS material. The disk or diskette is controlled as a separate document as long as it exists unless it has been declassified IAW DoDM 5200.01 Volume 1_DAFMAN 16-1404, Volume 1, DoDM 5200.01 Volume 2_DAFMAN 16-1404, Volume 2, and DoDM 5200.01 Volume 3_DAFMAN 16-1404, Volume 3. **(T-2)**

4.5.4. Retain the AF Form 143 for the CD-ROM in an active status until the disk or diskette is destroyed or declassified. **(T-2)**

4.5.5. When preparing transmission receipts and destruction certificates for classified AIS storage media, describe the storage media as a single document instead of listing individual documents stored within the media. **(T-2)**

4.5.6. If a “hard” copy of a TS document is printed from the CD/ROM, you will follow the same accountability procedures as a newly created TS document. Immediately place it into active accountability on AF Form 143 and assign an OCN from the TSCA. Control each additional printed hard copy using the above procedures and assign the next sequential number as the copy number (i.e.; copy 2, 3, etc.). **(T-2)**

4.5.7. An AF Form 143 is not required in the following situations:

4.5.7.1. Messages received via GASNT, SACCS, AMHS, or successor system held less than 24 hrs. See **Paragraph 4.3.1**.

4.5.7.2. The TSCO does not use the form as a receipt for information received from or delivered to the Defense Courier Service (DCS). DCS receipts suffice for accountability purposes in these cases.

4.5.8. How to Prepare an AF Form 143.

4.5.8.1. Section I – Description of Document. **(T-2)**

4.5.8.1.1. Block 1 – Use the guidance provided on the form and fill in all available information. **(T-2)**

4.5.8.1.2. Originator. The organization or office symbol that created the document. **(T-2)**

4.5.8.1.3. Type. A description of the material. I.e., compact disk, letter, message, etc. **(T-2)**

4.5.8.1.4. Date. The date the document was created. **(T-2)**

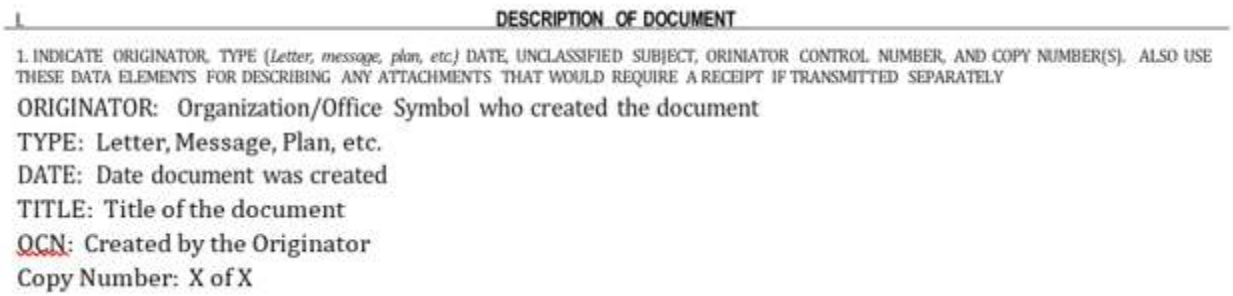

4.5.8.1.5. Title. The unclassified title of the document. If the document title is classified, enter a short unclassified description. **(T-2)**

4.5.8.1.6. OCN. Write the OCN number. This number will be found on the TS material. If your organization created the TS material the next available RCN on the TS Control Log will be the OCN. Once an OCN is assigned to a document, it will never change. **(T-2)**

4.5.8.1.7. Copy Number. Self-explanatory. **(T-2)**

4.5.8.1.8. For easy of audit/inventory/inspection format Block 1 as shown in **Figure 4.1**. All Information can be found on the cover/first page of the document.

Figure 4.1. AF FORM 143, EXAMPLE.

I. DESCRIPTION OF DOCUMENT

1. INDICATE ORIGINATOR, TYPE (*Letter, message, plan, etc.*) DATE, UNCLASSIFIED SUBJECT, ORINIATOR CONTROL NUMBER, AND COPY NUMBER(S). ALSO USE THESE DATA ELEMENTS FOR DESCRIBING ANY ATTACHMENTS THAT WOULD REQUIRE A RECEIPT IF TRANSMITTED SEPARATELY

ORIGINATOR: Organization/Office Symbol who created the document

TYPE: Letter, Message, Plan, etc.

DATE: Date document was created

TITLE: Title of the document

OCN: Created by the Originator

Copy Number: X of X

4.5.8.2. Section II – Record of Document Changes. Use this section to account for changes to the basic document.

4.5.8.2.1. Blocks 2. Enter the change number and date received. **(T-2)**

4.5.8.2.2. Block 3-7. Enter the copy number, date of change, classification of change, originator, and OCN of the change in the respective Blocks. **(T-2)**

4.5.8.2.3. Block 8. Enter the copy number of the basic document the change was posted to. **(T-2)**

4.5.8.2.4. When a certificate of destruction is required, annotate the destruction of superseded classified pages to the basic document on the accompanying AMC Form 1565, AF Form 143, or AF Form 310 by identifying each page being destroyed. File records of destruction for Top Secret material in Section 4 of the TSCA Binder. **(T-2)**

4.5.8.2.5. Attach a new AF Form 143 using the same Register/Log number with an added alpha character when a document has received more than four changes (i.e., YY-A3N-25, YY-A3N-25A, YY-A3N-25B, etc.) **(T-2)**

4.5.8.3. Section III – Disposition of Document

4.5.8.3.1. Block 9. Self-explanatory. Each copy of a Top Secret Document must have a copy number in a separate Block 9. For items which have more than one copy listed on the same form, annotate the copy number in this block. For multiple identical items (i.e. printer ribbons, etc.) listed on the same form, annotate the item serial number in this block. **(T-2)**

4.5.8.3.2. Block 10. Organization and functional address symbol of whom accountability is transferred to. **(T-2)**

4.5.8.3.3. Block 11. Date of the action. **(T-2)**

4.5.8.3.4. Blocks 12a /13a. The person receiving the document, because of accountability being transferred on the same installation, completes the signature block by printing and signing name. In cases when material is sent off the installation, enter the statement "See Attached Receipt" in this block and file the signed return receipt behind the register page. **(T-2)**

4.5.8.3.5. Blocks 12b /13b. These blocks are used when the TSCO retains accountability of the document, but has temporarily given it to another TSCO on the same installation because of action, review, or coordination requirements. The controlling TSCO prescribes suspense dates when the document will be returned. **(T-2)**

4.5.8.3.6. Block 12c /13c. The TSCO receiving the document back after action, review, or coordination requirement completes the signature block. **(T-2)**

4.5.8.3.7. Blocks 12d /12e & 13d /13e. Two appropriately cleared individuals, one must be the primary or alternate TSCO, are required to be present for the destruction of Top Secret Material or its committal to a central destruction facility. A signature is required in one of these blocks when document is destroyed or committed to central destruction facility and the witness signature in block 13f. When a central destruction facility is used, enter within block 13e the calendar date and serial number assigned to the bag containing the document being destroyed. **(T-2)**

4.5.8.3.8. Blocks 12f /13f. Signature of destruction witness (write in the word "Witness"). It is also used to specify other transactions affecting the document or register page. This includes comments such as date and authority of any downgrading or declassification action. **(T-2)**

4.5.8.3.9. Blocks 12g/13g. Signed by the Top Secret inventory official completing the action. Do not use this block to show "inventory" during annual inventory (inventoried material will be reflected on the Inventory Report, see **Chapter 9**). **(T-2)**

4.5.8.3.10. Block 14. Register page number. The TSCO constructs a register page number consisting of the last two digits of the current calendar year, the TSCA three-letter functional address symbol and the page number assigned consecutively, e.g. 15-A3N-01. This number provides a system to assist in the documentation of an audit trail. **(T-2)**

4.5.8.3.11. Block 15. Register page number the document was re-controlled from. **(T-2)**

4.5.8.3.12. Block 16. Pages that have only active entries being re-controlled to a new page, use this block. Reflects the new register page to which the documents are being carried forward to the next calendar year. When additional space is needed to establish accountability of more than six copies of a document, the TSCO creates a continuation page, an additional AF Form 143, and adds an alphabetical character, beginning with A, B, C, etc., to the original register page number, e.g. 15-CP-01A. **(T-2)**

4.5.8.4. To document the destruction of an entire Top Secret document or product, the two cleared individuals, one must be the primary or alternate TSCO, sign as destruction officials in the appropriate blocks on the corresponding AF Form 143. In section of the AF Form 143 that identifies the destroyed material, the two people sign the destruction blocks. If the AF Form contains no other active entries, the TSCO moves the form to the inactive section in the Top Secret Control Log where it becomes part of the inactive records for the current calendar year and where it remains until the end of the next 5 years. If the entries on the form remain active, the TSCO returns the form to the active section in the Top Secret Register where it remains until the end of the calendar year when re-controlling procedures are performed. **(T-2)**

4.6. AF Form 310, *Document Receipt and Destruction Certificate*. This form is used to transfer TS material off the installation. Two copies of the form are placed inside the inner wrapper of the outgoing package; one is sent with a facsimile transmission.

4.6.1. How to Prepare an AF Form 310, *Document Receipt and Destruction Certificate*.

4.6.1.1. The sending TSCO completes blocks 1-6 on the AF Form 310 as follows:

4.6.1.1.1. Block 1. The complete address of the receiving TSCA. **(T-2)**

4.6.1.1.2. Block 2. The complete address of the sending TSCA. **(T-2)**

4.6.1.1.3. Block 3. Number assigned from the container log for the current year. Numbers are maintained in consecutive order by calendar year and consist of Two-Digit for Current Calendar Year, Three-letter Office Symbol followed by Two-Digit Consecutive Numbers (15-A3N-01). **(T-2)**

4.6.1.1.4. Block 4. Date material is dispatched. Do not hold material beyond this date because that date determines the suspense date the receipt is due back to the sender (30 days in the US and 45 days outside the US). **(T-2)**

4.6.1.1.5. Block 5. A complete description of the material using the instructions on the form. **(T-2)**

4.6.1.1.6. Block 6. The date the receipt is due back to the sending TSCO from the receiving TSCO. **(T-2)**

4.6.1.2. The receiving TSCO completes the following actions:

4.6.1.2.1. Blocks 7-9. Self-explanatory to document receipt of the TS material. **(T-2)**

4.6.1.2.2. Promptly returns one copy of the form to the sending TSCO so it will arrive on or before the date recorded in Block 6. **(T-2)**

4.7. AMC Form 1565, *Entry, Receipt and Destruction Certificate*. AMC Form 1565 is used to document various actions associated with changes to TS documents and completed by the receiving TSCO. The form serves to document receiving page changes, to document page replacement and to document destruction of the removed pages, etc.

4.7.1. How to Prepare an AMC Form 1565.

4.7.1.1. Block 1. For TS, enter the AF Form 143 register page number to control the change or amendment. **(T-2)**

4.7.1.2. Blocks 2, 3 & 4. Self-explanatory.

4.7.1.3. Block 5. Description of the basic document using the guidance on the form. When the subject or title is classified, use an unclassified short title. Include the OCN if the basic document is a TS document. **(T-2)**

4.7.1.4. Block 6. Description of the amendment or change using the guidance on the form. Include the OCN for TS material. For multiple addressees, show the copy number next to the address element on the distribution listing. **(T-2)**

4.7.1.5. Blocks 7, 8 & 9. Self-explanatory.

4.7.1.6. Block 10. Place an "X" when a receipt must be returned to the originator, otherwise leave blank. **(T-2)**

4.7.1.7. Block 11. Place an "X" when a receipt is required for superseded material returned to another office for destruction, otherwise, leave blank. **(T-2)**

4.7.1.8. Blocks 12, 13 & 14. Self-explanatory.

4.7.1.9. Block 15. Enter the highest classification level of the material. **(T-2)**

4.7.1.10. Block 16. Enter the copy number of the basic document that the page changes were inserted into, otherwise leave blank. Place an "X" in only one block to show if there were any discrepancies. **(T-2)**

4.7.1.11. Blocks 17-19. Self-explanatory.

4.7.1.12. Block 20. Enter the highest classification level of the pages removed. **(T-2)**

4.7.1.13. Block 21. Place an "X" in only one block to show method of destruction. **(T-2)**

4.7.1.14. Blocks 22-24. Self-explanatory.

4.7.1.15. Block 25. When using a central destruction facility, write in the date and burn bag or container number. **(T-2)**

4.7.1.16. Blocks 26-27. Self-explanatory.

4.7.2. To document destruction of pages removed as a result of changes to a document, the two destruction officials complete the blocks in Section IV on the AMC Form 1565. The TSCO may use one AMC Form 1565 to document destruction of multiple copies of a change to a Top Secret document. The AMC Form 1565 showing destruction of all changed material is attached to the AF Form 143 controlling the basic document. **(T-2)**

Chapter 5

POSTING CHANGES TO TS MATERIAL

5.1. Changes to Top Secret Material. Changes to TS material can be received via an Interim Change/Interim Message Change (IC/IMC) or Change (CH). They are normally received via classified courier service or via an automated message source (Joint Worldwide Intelligence Communications System, JWICS).

5.2. Posting an Interim Message Change (IMC). IMCs are normally classified Secret or lower. If an IMC is received that is TS, it does NOT get controlled or added to the TSCA as a separate document. It gets added to Section II of the Form 143 of the basic document (i.e., IMC 2/1 to Volume 1 gets added to the Form 143 for Volume 1). **(T-2)**

5.2.1. Step 1- If required, acknowledge receipt of the IC/IMC. **(T-2)**

5.2.2. Step 2 – Post the IMC to the basic document using pen only. Annotate the IMC number in the outer edge of the basic document adjacent to the posted change. **(T-2)**

5.2.3. Step 3 – After all changes are made to the basic document, annotate on the IMC "Posted on (date) by ___ (initials of individual that posted the IMC)." **(T-2)**

5.2.4. Step 4 – Document posting of the IC/IMC on the Record of Changes page in the front of the basic document (some documents do not contain this page). **(T-2)**

5.2.5. Step 5 – Record the change in Section II of the AF Form 143 of the basic document. Put the change number and the date the change was received in Column 2 (Change No.) of Section II. **(T-2)**

5.3. Posting a Change (CH). A change to a TS document may be received with an accompanying AMC Form 1565, which requires TS pages to be removed from the original document and destroyed and replaced with the new changed page(s). The change material does not get controlled or added to the TSCA as a separate document. It gets added to Section II of the Form 143 of the basic document (i.e., CH1 to Volume 1 gets added to the Volume 1 Form 143).

5.3.1. Step 1 – Upon receipt of the material, the TSCO will complete Section II of the AMC Form 1565 (Certificate of Receipt) and send a copy of the form to the originator (usually via fax) to show proof of receipt. **(T-2)**

5.3.2. Step 2 – Remove the pages indicated in Section I, Column 8 of the AMC Form 1565 and replace with new pages indicated in Section 1, Column 9. After pages have been replaced, complete Section III of the AMC Form 1565 and place a copy of the AMC Form 1565 with the basic document. **(T-2)**

5.3.3. Step 3 – Destroy the removed pages with another witnessing official that has a TS clearance. After removed pages have been destroyed, complete Section IV of the AMC Form 1565 and attach it to the AF Form 143 that matches up to the basic document. This is your proof of destruction of all removed TS pages and must be kept with the Current/Active Form 143 of the basic document and maintained for 5 years after destruction of the basic document. **(T-2)**

5.3.4. Step 4 – Document posting of the Change on the "Record of Changes" page in the front of the basic document (if document has one). **(T-2)**

5.3.5. Step 5 – Record the change in Section II of the AF Form 143 (*Record of Document Changes*) of the basic document. Put the change number and the date the change was received in Column 2 (Change No.) of Section. **(T-2)**

Chapter 6

RE-CONTROLLING TOP SECRET

6.1. Accountability. Per this instruction, annual re-controlling of TS information is required. This chapter provides procedures used to close register pages at the end of the calendar year and carry forward to the new year only those register pages needed to document the active material in the TSCA. This procedure is known as "Re-controlling" register pages. **(T-2)**

6.1.1. Re-controlling allows the TSCO to close all the register pages, especially those that contain active and inactive entries, and move them to the inactive section of the TS Control Log at the end of each calendar year. The procedure provides a method for reducing the number of register pages because it allows the TSCO to start the year with accountability records for active material in the TSCA, do not re-control inactive material.

6.1.2. All material must be re-controlled annually, during the month of January. Active TS Control Log entries are re-controlled to a current year log as soon as possible after 1 January of each year, but not to exceed 30 January. **(T-2)**

6.2. How to Re-Control Register Pages.

6.2.1. Step 1 – Remove the AF Form 143s and AF Form 144s (inactive current year) from Section 4 of the TSCA binder. **(T-2)**

6.2.2. Step 2 – Create a new TS Control Log for all active material. List all new material IAW **Chapter 2**. **(T-2)**

6.2.3. Step 3 – Assign a new RCN to all active material. **(T-2)**

6.2.4. Step 4 – In the disposition column of the previous year log, annotate the words "Re-controlled to (the new RCN)" for all active material listed on the new log. **(T-2)**

6.2.5. Step 5 – Create new AF Form 143s for all active material. **(T-2)**

6.2.5.1. Register page that contains active and inactive entries, transfer the active entries to a new register page for the new calendar year. Carry forward to the new register page all the information recorded in Sections I, II and III. Do not carry forward inactive copies. **(T-2)**

6.2.5.2. Documents with changes, attach the AF Form 1565 to the active AF Form 143. **(T-2)**

6.2.5.3. In block 14, enter the new RCN from the newly created log. **(T-2)**

6.2.5.4. In block 15, enter the old RCN from the previous year. **(T-2)**

6.2.6. Step 6 – On the AF Form 143s from the previous year, in block 16, enter the new RCN that the document is being re-controlled to. **(T-2)**

6.2.7. Step 7 – On the last AF Form 143 from the previous year, annotate in block 1 or at the bottom of the form: "This page (RCN xxxxx) is the last page of the TS Control Log for calendar year 20xx". **(T-2)**

6.2.8. Step 8 – Re-file the previous year's log, AF Form 143s, and AF Form 144s to the appropriate section of the TSCA binder IAW **Chapter 3**. **(T-2)**

6.2.9. Step 9 – On the front of the TS document, cross out the old RCN and write in the new RCN. Do not cross out the OCN. **(T-2)**

6.2.10. Step 10 – On the document's existing AF Form 144, cross out the old RCN and write in the new RCN. Do not cross out the OCN. **(T-2)**

6.2.11. Combine Section 3 and Section 4 of the previous year and move to Section 6. The inactive pages are filed numerically by the RCN in yearly blocks for a period of 5 years. **(T-2)**

Chapter 7

TOP SECRET DESTRUCTION

7.1. Destroying Top Secret Material. Destruction of TS material will be accomplished by two personnel with TS access, one must be the primary or alternate TSCO (exception: destruction of GASNT, SACCS, AMHS, or successor system messages held less than 24 hrs. See **Paragraph 4.3**) **(T-2)** TS material is destroyed as soon as it is no longer needed, or retention requirement has expired. Material that is identified for destruction must remain protected in a container approved for TS storage until it is destroyed. Destruction of material and documents is accomplished by means that eliminate risk of reconstruction of the classified information it contains. **(T-2)**

7.1.1. The two destruction methods used most often are GSA approved shredders for TS within the local organization and burning at a Central Destruction Facility (CDF). Regardless of the method, destruction is documented by the primary or alternate TSCO. **(T-2)**

7.1.2. Normally, the TSCO must arrange a destruction appointment with the CDF operator. Two persons cleared for access to the TS information must take the material to the CDF and remain there until the operator deposits it into the furnace. **(T-2)**

7.1.3. Based on the destruction method, the primary or alternate TSCO, assisted by at one TS cleared individual, identifies and prepares the material for destruction. **(T-2)**

7.1.3.1. When shredding the material, both are present through the entire process from identification through completion of shredding. Documents are prepared for shredding according to machine instruction. **(T-2)**

7.1.3.2. When using the CDF, the material is separated by composition. The TSCO removes paper clips, metal bindings, staples, etc., and places paper documents; plastic products such as diskettes, viewgraphs, tape and ribbons or products containing chromium in separate paper bags (burn bags) or cardboard boxes. The weight of each container must not exceed 15 pounds. Each container is marked with the highest classification level of the material it contains, the identification of the type of material it contains (paper, plastic, etc.) and a sequential number to identify what part of the total this container is. (Example: #001 of 006, #002 of 006, etc.) The container is sealed and taken to the CDF without delay. Remember, the material requires protection at the TS level until it is destroyed. **(T-2)**

7.2. Documenting Destruction of TS information/material.

7.2.1. Step 1 – Both destruction officials must validate that the material is authorized to be destroyed. **(T-2)**

7.2.2. Step 2 – Remove the AF Form 144 from the material and put it with the AF Form 143 for the material. The AF Form 144 does NOT get destroyed with the material**. (T-2)**

7.2.3. Step 3 – Destroy the material using a GSA approved destruction device (i.e., disintegrator, shredder, etc.). **(T-2)**

7.2.4. Step 4 – Annotate the destruction of the material in Section III of the AF Form 143 (Disposition of Document) of the basic document. Both destruction officials must enter the destruction date in block 11 and sign in block 13; destruction official in block 13d and witness in block 13f (annotate block 12f with “Witness”). **(T-2)**

7.2.5. Step 5 – Remove the AF Form 143 from Section 3 of the TSCA binder attach the AF Form 144 to the AF Form 143 and place it in Section 4 of the TSCA binder. **(T-2)**

7.2.6. Step 6 – Annotate the statement: "Destroyed, YYYYMMDD in the Disposition column of the Current/Active Top Secret Control Log/Register. **(T-2)**

7.2.7. To document destruction of pages removed because of a change, the destruction officials complete Section IV on the AMC Form 1565 instead of the AF Form 143. The TSCO may use one AMC Form 1565 to document the destruction of multiple copies of a change to a TS document. The AMC Form 1565 is attached to the AF Form 143 controlling the basic document. **(T-2)**

Chapter 8

TOP SECRET AUDIT AND INVENTORY

8.1. Audit and Inventory. An audit is a formal reconciliation of the prior year's re-controlled and inactivate AF Form 143s. An inventory involves a detailed review of the current year TSCA Binder and verification of the physical location of all TS material controlled by the account. Its purpose is to confirm that all TS material is accounted for and to identify and document any discrepancies in the management of the account.

8.1.1. An audit and inventory will be conducted in the following circumstances: **(T-2)**

8.1.1.1. Annually, after the re-controlling, not to exceed 28 Feb of the current year. **(T-3)**

8.1.1.2. Appointment of a new primary TSCO. The newly appointed TSCO will conduct the audit/inventory in the presence of the out-going TSCO and annotate it in writing. **(T-2)**

8.1.1.3. Higher Headquarter or IPO compliance inspections. **(T-2)**

8.1.1.4. Any security incident involving TS material when the actual or potential loss, theft or compromise occurred. **(T-2)**

8.1.2. The Director/Commander owning the TSCA must designate in writing a disinterested party to conduct the audit/inventory; this authority cannot be delegated. Audit/inventories must be performed by personnel knowledgeable in TSCA management, such as the servicing IPO, a TSCO from another TSCA, or the SA/SM. Personnel performing an audit/inventory require TS eligibility and must be currently granted TS access. The primary and alternate TSCO of the account may not be appointed. (See **Attachment 4**). **(T-2)**

8.2. Audit. The audit confirms that all inactive AF Form 143s are filed correctly, final dispositions are recorded, and re-controlling procedures were properly executed. Items reviewed during the audit include:

8.2.1. Transfer receipts and tracer actions on AF Form 143, AF Form 310, and AMC Form 1565 (See **Chapter 10**). **(T-2)**

8.2.2. Re-controlled AF Form 143s (See **Chapter 6**).

8.2.2.1. During the annual audit following the January re-control, the audit/inventory official will review all previous year AF Form 143s and verify each entry in Part III indicates a proper disposition. **(T-2)**

8.2.2.2. Once verified, the audit/inventory official documents a completed audit by recording the date in Block 11g and print name and sign Block 13g for each Section of Part III that has an entry. Each Section of AF Form 143 Part III Blocks 11g and 13g will be completed only once. **(T-2)** Do not complete Block 11g or 13g on current year AF Form 143s.

8.2.3. Downgrade or declassification authorizations.

8.2.4. Certificates of destruction. (See **Chapter 7**).

8.2.5. Previous five-years AF Form 143s. Ensure there were no Part III sections overlooked by previous audit/inventory officials. Any previous five-year, AF Form 143s with incomplete Blocks 11g or 13g must be completed and signed during the current audit and noted in the

audit/inventory report. The audit/inventory official must determine the meaning of improper or unclear entries and document the findings in the audit/inventory report (See **Chapter 5**).

8.2.6. Current year inactive AF Form 143s, if any. Ensure Part 3 is properly completed and verify that documents removed from the account reflect a final disposition. Do no complete Blocks 11g or 13g. **(T-2)**

8.3. Inventory. The inventory inspects TS control procedures for compliance. Actions taken during the inventory include:

8.3.1. Comparing TS Register/Log against current year AF Form 143s. Ensure all information is correct and matches. No remarks, such as "inventoried," are placed on the AF Form 143. **(T-2)**

8.3.2. Physically verifying every TS document/material and AF Form 144. Match the document cover information against the TS Register/Log and AF Form 143. **(T-2)**

8.3.3. Examine any attached AMC Form 1565s, if applicable, and match the information on the form against posted changes on the AF Form 143. If a change is located with the basic document but has not been posted to the basic document, document this in the audit/inventory report. Maintaining an unposted change is contrary to DAF doctrine concerning the prompt destruction of unneeded classified material. **NOTE:** Some changes will specify a posting date. These instructions should always be strictly followed. **(T-2)**

8.4. Audit/Inventory Report. When the inventory is complete, the audit/inventory official prepares a written report of the findings made during the inspection. (See **Attachment 5**) **(T-2)**

8.4.1. The report is addressed to the appointing Director/Commander and verifies all TS control procedures complying with DAF and AMC requirements.

8.4.2. The report includes the name and full signature of the audit/inventory official and is sufficient in depth to explain compliance or non-compliance with TS control procedures.

8.4.3. The audit/inventory report will include all discrepancies and corrective actions identified during the audit/inventory. **(T-2)**

8.5. Report Endorsement. The appointing Director/Commander endorses the report to the TSCO with instructions for completing corrective actions, if required. In the endorsement, the appointing commander certifies there is a continued mission requirement for the TSCA. The TSCO retains the report with the appointing commander's endorsement in Section 5 of the TSCA Binder. If corrective actions are directed, the TSCO will document completion via MFR and attach to the commander's endorsement. **(T-2)**

Chapter 9

REPRODUCTION, TRANSMISSION, AND WORKING PAPERS

9.1. Reproduction of Top Secret Documents.

9.1.1. Prior approval for reproduction of TS information is not required unless it is restricted. When appropriate, classified information subject to specific limitations may be marked with notices such as: "Reproduction requires approval of originator or higher DoD authority." The TSCO must have prior approval from the originator before making copies of TS documents. The originator includes a statement of disapproval or approval to reproduce, in whole or in part.

9.1.1.1. Originators of TS material must keep account of the number of copies made and a list of the recipients. For example, enter "Copy 1 of 20 Copies" on the document and show the recipient on the file or record copy. The letters "RC" (reproduced copy) is recorded before the copy number on the reproduced copy. For example, if 5 copies were reproduced, Section I on the AF Form 143 would show a notation such as, "Reproduced 5 copies on (date) by authority of (authorizing agency), "RC1 of 5RC, RC2 of 5RC, and so on. Since messages do not have copy numbers assigned by the originator, the recipient enters own copy number for accountability purposes, e.g. "Copy 1 of 2 Copies", etc.

9.1.1.2. Additionally, an office other than the originator shows the following on reproduced material:

9.1.1.2.1. Reproduced on (date) by authority (identify authorizing agency).

9.1.1.2.2. Reproduced copy ___of ____reproduced copies.

NOTES:

1. The office of origin is listed as the authorizing agency when reproduction is authorized in the document.

2. The TSCO uses the AF Form 143 to bring each reproduced copy into accountability. Each copy is treated as a separate document and actions involved with each copy are documented accordingly.

9.1.2. A telecommunications center may reproduce, without approval of the originator, a sufficient number of copies needed to meet initial distribution requirements shown in the address element on a message. A reproduction entry is not used in these instances. Since messages do not include reproduction authority, any additional reproduction of TS messages after distribution from the telecommunications center requires approval from the originator. Again, the TSCO must enter all reproduced TS messages into the Top Secret Register.

9.2. Transmission of Top Secret Material.

9.2.1. Top Secret material is never transmitted through the U. S. Postal System or any other contracted package service. TS material is transferred only between TSCAs, and a receipt, signed by the gaining TSCO, is required to document the transfer.

9.2.2. The following methods provide the required hand-to-hand transfer between TSCAs:

9.2.2.1. By direct contact between TSCOs. This is the normal method of transfer between TSCAs on base. The TSCO receipts for the material by signing the AF Form 143 that belongs to the activity transferring the material. The TSCO can also sign an AF Form 310, Document Receipt and Destruction Certificate. (For more information, see "Receipts" discussed later.)

9.2.2.2. Defense Courier Service (DCS). The service is authorized to transfer TS material between TSCAs on base and TSCAs located away from the base.

9.2.2.2.1. Local TSCOs may set up an account with the DCS and may deal directly with DCS for pick-up and delivery of material. When using this service, the TSCO agrees to abide by any additional transfer requirements levied by DCS.

9.2.2.2.2. As a service to organizations with little need for transferring TS material, the base controlled mailroom has a TSCA that serves as the central point for receiving and dispatching material through DCS. The TSCO packages outgoing material, with a receipt included inside the inner wrapper; addresses the material to the recipient; prepares DD Form 2825, *Internal Receipt*, to transfer the package to the TSCO in the controlled mailroom. The TSCO brings the TS material and DD Form 2825 to the controlled mailroom. The TSCO in the controlled mailroom completes the transfer by signing the DD Form 2825 and arranges dispatch with the DCS. The process is used in reverse when material arrives from the DCS. Note: Verify availability of TSCO in controlled mailroom before bringing material for transfer. **(T-2)**

9.2.2.3. Cleared U. S. military or government civilian employees, may be designated to carry the information under the following conditions:

9.2.2.3.1. Traveling on a conveyance owned, controlled or chartered by the U. S. Government.

9.2.2.3.2. Traveling on scheduled commercial passenger aircraft within and between the United States, its Territories and Canada.

9.2.2.3.3. Traveling on scheduled commercial passenger aircraft on flights outside the United States, its Territories and Canada.

9.2.2.4. Cleared DoD contractor employees may be designated to carry information under the following conditions:

9.2.2.4.1. When traveling by surface transportation.

9.2.2.4.2. When traveling within and between the United States and its Territories provided that the transmission is authorized in writing by the appropriate Cognizant Security Agency (CSA) or a designated representative.

NOTE: DoDM 5200.01, Volume 3_DAFMAN 16-1404, Volume 3 requires the person designated as a courier must be authorized, in writing, to perform courier duties. The designated individual must be formally briefed on courier duties and have in their possession a courier

authorization letter or DD Form 2501, *Courier Authorization* (as appropriate). (Consult your security manager/assistant for addition information.)

9.2.2.5. Additional services authorized to transmit TS material include:

9.2.2.5.1. A cryptographic system authorized by the Director, NSA, or a protected distribution system designed and installed to meet the requirements of National Communications Security Instruction 4009. This applies to voice, data, message and facsimile transmissions.

9.2.2.5.2. A DoD Component Courier Services.

9.2.2.5.3. The Department of State Diplomatic Courier Service.

9.2.3. Facsimile Transmission of TS Material.

9.2.3.1. The transmission of TS material by facsimile is governed by the reproduction rules as well as the transmission rules. The reproduction rules apply because another copy of the document is produced at the receiving end of the transmission. The document must contain the originator's reproduction authority or reproduction authority is obtained from the originator before transmission is allowed. The facsimile must be approved for transmitting TS material and must be connected to a secure telephone circuit approved at the TS level. The TSCOs that make such transmissions require adequate training on using the equipment.

9.2.3.2. The following guidelines for transmitting TS information apply:

9.2.3.2.1. The TSCO must verify that the receiving activity has a valid TSCA and that the TSCA has a facsimile approved to receive TS transmissions. Transmission arrangements are made between the sending and receiving TSCOs.

9.2.3.2.2. The TSCO who transmits the TS information should enter the reproduction action on the AF Form 143 and obtain an accountability receipt from the receiving TSCO.

9.2.3.2.3. The TSCO transmitting the material includes an AF Form 310 or other accountability receipt as part of the transmission. The receiving TSCO signs the received receipt and immediately sends a signed copy back by return facsimile. **NOTE:** This is the only time a signature other than an original one is permitted.

9.2.3.2.4. The receiving TSCO immediately takes appropriate Top Secret Register actions to bring the material into accountability.

9.2.3.3. TSCOs ensure local security operating instructions (OIs) address facsimile procedures. The figure illustrates the facsimile transaction.

9.3. Top Secret Working Papers. Working papers containing TS information are accounted for, controlled and marked with the highest classification of any information contained in the document, date when created, and annotated "WORKING PAPER". Destroy when no longer needed or re-marked, within 180 days, as a finished document (i.e. subject, originator control number, date, OPR, "Classified by" or "Derived from" line and "Declassify on" line, paragraph and page markings that reflect the classification of the material contained in each paragraph and on each page.) and added to the Top Secret Register.

Chapter 10

RECEIPTS AND TRACER ACTION

10.1. AF Form 143, *Top Secret Register Page*.

10.1.1. This form is used as a receipt when transferring TS material from one TSCA to another TSCA on the same installation. Information about the TSCA receiving the material is recorded in Blocks 10a, 11a, and 13a and the receiving TSCO signs the form.

10.1.2. If the form contains no other active entries, the TSCO files the form in the inactive section of the control log. If the form does contain other active entries, the TSCO returns the page to the active section in the control log and closes the page at the end of the year during the re-controlling process (see **Chapter 7**).

10.2. AMC Form 1565, *Entry, Receipt and Destruction Certificate*. The form is used to document various actions associated with changes to TS documents. The form serves to document receiving page changes, to document page replacement and to document destruction of the removed pages, etc. **(T-2)**

10.2.1. The originator (sender) prepares an AMC Form 1565 to accompany changes being sent to each holder of a copy of the basic TS document. The sender annotates the AF Form 143 that controls the change by completing items 10a and 11a to show the agency of the intended recipient and date the material was sent. In block 13a on the AF Form 143, the TSCO enters the statement "See Attached Receipt", files a copy of the AMC Form 1565 in suspense pending return of the signed receipt or for use as a tracer, if necessary. The sender transmits 2 copies of the AMC Form 1565 for each basic document held by the recipient. The sender completes block 2 and Section II, on the form as follows:

10.2.1.1. Block 3 contains the recipient's address.

10.2.1.2. Block 4 contains the sender's address.

10.2.1.3. Block 5 contains the unclassified title, date and control number on the basic document.

10.2.1.4. Block 6 contains the change number; its date and control register page number.

10.2.1.5. Blocks 7, 8 and 9 contain a description of what part of the document the change affects, pages to remove and pages to insert.

10.2.2. The receiving TSCO receipts for the material by completing blocks 10-15 in Section II on both copies of the AMC Form 1565. The recipient promptly returns one copy to the sender, enters the change information in Section II on the AF Form 143 that controls the basic document; removes and/or replaces affected pages, sections, etc.; completes blocks 16-20, Section III, to certify changes made and files the form for future use as a destruction certificate. The TSCO completes blocks 21-27, Section IV, to documents destruction of the removed or changed pages and files the certificate with the applicable AF Form 143. Remember, destruction certification requires the signature of two people from the TSCA.

10.2.3. AMC Forms 1565 returned as a receipt are attached to the register page by the sending TSCO. As active documents are re-controlled to the next year's register, the AMC Form 1565 used as receipts/destruction certificates are attached to the active AF Form 143.

10.3. AF Form 310, *Document Receipt and Destruction Certificate*. This form is used to transfer TS material off the installation. Two copies of the form are placed inside the inner wrapper of the outgoing package; one is sent with a facsimile transmission. **(T-2)**

10.3.1. The sending TSCO completes blocks 1-6 on the AF Form 310 as follows:

10.3.1.1. Block 1 – The complete address of the receiving TSCA.

10.3.1.2. Block 2 – The complete address of the sending TSCA.

10.3.1.3. Block 3 – Number assigned from the container log for the current year. Numbers are maintained in consecutive order by calendar year and consist of Two-Digit for Current Calendar Year, Three-letter Office Symbol followed by Two-Digit Consecutive Numbers (15-A3N-01).

10.3.1.4. Block 4 – Date material is dispatched. Do not hold material beyond this date because that date determines the suspense date the receipt is due back to the sender (30 days in the US and 45 days outside the US).

10.3.1.5. Block 5 – A complete description of the material using the instructions on the form.

10.3.1.6. Block 6 – The date the receipt is due back to the sending TSCO from the receiving TSCO.

10.3.2. The receiving TSCO completes the following actions:

10.3.2.1. Completes blocks 7-9 to document receipt of the TS material.

10.3.2.2. Promptly returns one copy of the form to the sending TSCO so it will arrive on or before the date recorded in block 6.

10.4. Tracer Action.

10.4.1. No matter which form is used to transmit TS material, the sending TSCO must receive a signed receipt from the receiving TSCO within 30 days in the CONUS and 45 days outside the CONUS. If a signed receipt is not received by the due date, the sending TSCO reproduces another copy of the receipt from the suspense copy, marks it "Tracer-Original Not Received" and sends it to the intended recipient. **(T-2)**

10.4.2. If the receiving TSCO has already returned the original receipt, note the action and return the information with the tracer copy. If the material was received and the original receipt has not been sent, the receiving TSCO must immediately complete and return the tracer copy as a substitute for the original. If the material has not arrived in the account for some unknown reason, the receiving TSCO must immediately contact the sending TSCO to resolve the discrepancy. **(T-2)**

10.4.3. If a recipient does not return a receipt and confirm receiving the material, the sending TSCO must initiate security incident procedures according to DoDM 5200.01, Volume 3_DAFMAN 16-1404, Volume 3. **(T-2)**

Chapter 11

CLOSING A TOP SECRET CONTROL ACCOUNT

11.1. Closing a Top Secret Control Account. The TSCA should be closed as soon as it is no longer needed or after 12 months of no receipt, generation or storage of material. The account may reopen at any time the mission requirement returns. Use the following procedures to close or disestablish the TSCA.

11.1.1. The TSCO staff destroys or transfers all TS material and completes the appropriate disposition portions of all active register pages sections. Recording the disposition actions converts all register pages from active to inactive. **(T-2)**

11.1.2. The TSCA appointing authority appoints a TS audit/inventory official to conduct a final audit/inventory and submit a final written report to the appointing authority. The appointing authority formally disestablishes the TSCA in the endorsement approving the audit/inventory report or by a separate memorandum as shown in **Attachment 4. (T-2)** A copy of the report and endorsement and/or separate closing memorandum (See **Attachment 7) (T-2)** is sent to the servicing Information Protection Office. **(T-2)**

11.1.3. Upon receipt of the disestablishment notification, the Information Protection Office will remove the TSCA from the Top Secret Control Roster and notify the other accounts on the roster of the closure. **(T-2)**

11.1.4. The organization must retain all inactive files, including a copy of the final inventory report and disestablishment, according to Air Force Records Information Management System (AFRIMS) Records Disposition Schedule. **(T-2)**

11.1.5. Re-accomplish an EAP-STRAT Validation Form showing negative requirements for Vol 1, Vol 2, and Vol 2T and send to AMC/A3NC.

ROBERT C. CALCAGNO, DAFC
Director, Information Protection

TOP SECRET CONTROL ACCOUNT INSTRUCTIONS CHECKLIST

Figure A2.1. Top Secret Control Account Instructions Checklist.

____ A. Receiving TS:

____ 1. Page-check the document.

____ 2. Annotate page check on "Page Check" page within the document (if provided).

____ 3. Stamp document with correct classification. Stamp TOP, BOTTOM, FRONT, and BACK.

____ 4. Add document information to the log & assign the next RCN available.

____ 5. Add document information to AF Form 143.

____ 6. Add document information to AF Form 144 and attach it to the document.

____ 7. Write the log number onto the cover of the document itself.

____ 8. File the AF Form 143 in the TSCA binder.

____ 9. Store TS document with the AF Form 144 attached in the security container.

____ B. Re-controlling TS: Each year in January, re-control the TSCA to the new/current year by accomplishing the following:

____ 1. Create new TS Control Log (new register numbers for the new/current year).

____ 2. On previous log, fill in the RCN you are re-controlling documents to in the Disposition column.

NOTE: The disposition column should always be filled in. It should show either the document, transferred to xx & date, or destroyed & date.

____ 3. Create new AF Form 143s for all current/active documents.

____ a. Copy old RCN from Block 14 to Block 15 on the new AF Form 143.

____ b. Type new RCN in Block 14.

____ 4. On all previous AF Form 143s put the new RCN for the document in Block 16.

____ 5. Remove all AMC Form 1565s (for TS changes) from old AF Form 143s and place with the new/active AF Form 143s.

____ 6. File the forms in their appropriate section.

____ 7. Shred all AF Form 143s and AF Form 144s over 5 years old.

____ 8. On the last AF Form 143 from the previous year, annotate in block 1 or at the bottom of the form: "This page (RCN xxxxx) is the last page of the TS Control Log for calendar year 20xx"

____ C. Destroying TS:

____ 1. Two individuals with current TS clearance are required (both must have NC2-ESI if destroying NC2-ESI).

____ 2. Both check and verify the supersedes date and time.

____ 3. Remove document to be destroyed from security container.

____ 4. Both verify correct document to be destroyed.

____ 5. Place new document that supersedes the document to be destroyed into the security container, so it does not get destroyed inadvertently.

____ 6. Ensure all other TS documents are put away, so they do not get destroyed inadvertently.

____ 7. Remove staples from documents to be destroyed.

____ 8. Remove AF Form 144 from document to be destroyed and place in TSCA binder with its AF Form 143 and close the binder.

____ 9. Page-check the document to be destroyed.

____ 10. Two cleared individuals destroy the document using approved shredder.

____ 11. Annotate destruction on AF Form 143:

____ a. TSCO writes the date in Part III, Column 11D and signs in Column 13D for each section if applicable (if more than one copy was destroyed).

____ b. Witness writes the date in Part III, Column 11F, writes the word “Witness” under the word “Other (Specify)” in Column 12F, and signs in Column 13F for each section if applicable (if more than one copy was destroyed).

____ 12. Annotate destruction on AF Form 144 by writing the destruction date in the “Date Accountability Termination” Block

____ 13. Move the AF Form 143 and AF Form 144 to Section 4, *Current Year Inactive Register Pages*, of the TSCA binder.

____ 14. Annotate on the log in the Disposition Column “Destroyed, YYYYMMDD”.

____ D. TS Audit/Inventory. The inventory reconciles active register pages by physically sighting all active material and ensures all TS documents are on the log. The audit ensures register pages are filed correctly and that they show final disposition (transferred, re-controlled, downgraded or declassified, or destroyed).

____ 1. Ask the appointing official whom they want to be appointed to conduct the annual Audit/Inventory.

____ a. Fill out the inventory appointment template (Attachment 4).

____ b. Obtain required signatures.

____ c. Email it to appointee and include the TS Inventory Report Template (Attachment 5).

____ 2. Ensure the appointee has TS security clearance, has NC2-ESI access, and understands the proper audit procedures.

____ 3. Complete the audit/inventory.

____ 4. Inventory:

____ 5. Use current year TS Control Log. Physically sight each item on the log.

____ 6. Compare the TS Control Log and AF Form 143 with the document.

____ 7. Check that all changes to the basic document are listed on the AF Form 143 (Section II) and are changed in the actual document (see change page).

____ 8. Check that the information reflected on the AF Form 143 is the correct information (i.e., title, OCN, copy number, etc.).

____ 9. Have TSCO change any discrepancies (reprint AF Form 143 or TS Control Log). Annotate all discrepancies in the report summary.

____ 10. Audit:

____ 11. Active AF Form 143s are NOT audited so the audit official does NOT date and sign those forms.

____ 12. Compare AF Form 143s to TS Control Log for each year.

____ 13. Block 1 of the AF Form 143 matches the TS Control Log.

____ 14. Ensure register page number, re-controlled from page number and re-controlled to page numbers match what is on the TS Control Log.

____ 15. Destruction date and signatures are in blocks 11-13D (destruction official) and 11-13F (witness). “Witness” should be written below “Other” in block 12F.

____ 16. Disposition column on TS Control must reflect destruction date for those documents destroyed.

____ 17. For those Inactive register pages which were audited previously, ensure dates and signatures are in block 11-13G.

____ 18. For those Inactive register pages which are being audited during the current audit, after verifying all information is correct on the AF Form 143, AF Form 144, and document, place the date and audit official’s signature in blocks 11-13G for all copies on AF Form 143.

____ 19. Repeat step 2 for each year in any “unaudited inactive documents.”

____ 20. Document the findings for the report.

____ 21. On the Inactive AF Form 143s the inventory official writes the date in Part III, Column 11G, and signs in Column 13G for each section that applies (may be more than one section if more than one copy).

____ 22. Prepare the written report (See **Attachment 5**) and route appropriately.

Attachment 3

FORMAT FOR ESTABLISHMENT OF A TOP SECRET CONTROL ACCOUNT

Figure A3.1. Format for Establishment of a Top Secret Control Account.

APPROPRIATE LETTERHEAD

MEMORANDUM FOR (Wing IPO)

FROM: (UNIT)

SUBJECT: Establishment of a Top Secret Control Account

1. Purpose: Top Secret Control Account (TSCA) has been established in (UNIT).

2. Justification: The (UNIT) mission requires the receipt, storage, and handling of Top Secret material. The (UNIT) does not have the ability to process or store this material in a Sensitive Compartmented Information (SCI) facility (SCIF) at this time. The TSCA will be located at (BUILDING NUMBER/ADDRESS).

3. The following individuals are designated primary and alternate Top Secret Control Officers (TSCO) to manage all aspects of the TSCA. They are authorized to receive, store, handle, dispatch, and account for all transactions involving Top Secret material in accordance with AMCI 16-1404:

Primary: Name: RANK: DoD ID: UNIT/OFFICE SYMBOL

Alternate:

Commander's Signature Block

Controlled By:

CUI Category: OPEC
Distribution/Dissemination Control: FEDCON
POC:

FORMAT FOR LETTER TO CLOSE TOP SECRET CONTROL ACCOUNT

Figure A4.1. Format for Letter to Close Top Secret Control Account.

APPROPRIATE LETTERHEAD

MEMORANDUM FOR (Wing IPO)

FROM: (UNIT)

SUBJECT: Closure of Top Secret Control Account

1. The purpose of this letter is to notify you the (Unit/Office Symbol)'s Top Secret Control Account is closed.

2. All Top Secret (TS) documents maintained in the TSCA were appropriately (STATE DISPOSITION OF TS MATERIAL). Destruction (OR TRANSFER) actions were annotated on the TS register and the register was audited. The TS register for this account will remain in the (UNIT) security files for a period of five years from the date of the final entry.

3. For questions about this memorandum, contact (UNIT SECURITY ASSISTANT) at DSN: XXX-XXXX, or commercial (XXX) XXX-XXXX.
