This instruction implements DAFMAN 17-1203, *Information Technology Asset Management (ITAM)*. This instruction establishes local procedures for the procurement, management, and protection of Information Technology (IT) hardware asset(s) and IT software asset(s). **Note:** DAFMAN 17-1203 will be referenced for primary IT Asset Management (ITAM) requirements. This instruction applies to all Tinker AFB organizations attaching devices to any US Air Force Network, inclusive of stand-alone networks, and any USAF owned or managed stand-alone device. Ensure all records generated as a result of processes prescribed in this publication adhere to Air Force Instruction (AFI) 33-322, Records Management and Information Governance Program, and are disposed in accordance with the Air Force Records Disposition Schedule, which is located in the Air Force Records Information Management System. Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using AF Form 847, *Recommendation for Change of Publication*. Route AF Forms 847 from the field through the appropriate functional point of contact's chain of command. This publication may not be supplemented or further implemented/extended.

SUMMARY OF CHANGES

This instruction supersedes TAFBI 17-1203, *Information Technology Hardware Asset Management*, 06 August 2025. Modifications have been completed throughout the document's entirety along with a new chapter, chapter four, has been added establishing the Commercial Mobile Device program for Tinker AFB.

Chapter 1—OVERVIEW **3**

1.1. Overview. 3

1.2. Roles and Responsibilities. 3

Chapter 2—HARDWARE ASSET MANAGEMENT **10**

2.1. Control Measures 10

Table 2.1. Suggested Continuity Folder Structure. 11

3.1. Annual Inventory Process 13

3.2. Overdue Notification/Elevation Process 13

3.3. Software Lifecycle Management 14

Chapter 4—COMMERCIAL MOBILE DEVICE ASSET MANAGEMENT **15**

4.1. Control Measures. 15

4.2. Tinker AFB CMD Program and Purchasing Procedures. 15

Attachment 1—GLOSSARY OF REFERENCES AND SUPPORTING INFORMATION **17**

Attachment 2—PILFERABLE ITEM WORKSHEET **20**

Chapter 1

OVERVIEW

1.1. Overview. It is the responsibility of everyone who procures, manages, and/or uses government IT hardware and software asset(s) to ensure strict accountability is maintained of those asset(s). Both physical and informational security will be maintained on each United States Air Force government asset from the time of procurement until the time of disposal.

1.2. Roles and Responsibilities.

1.2.1. Equipment Control Officer (ECO): The ECO maintains ultimate responsibility for the management of IT hardware asset(s) within AFMC units and designated tenant units, as directed by the current Host Tenant Support Agreement, at Tinker Air Force Base. The ECO will:

1.2.1.1. Coordinate all unit ITAM inventory management issues through the Unit Accountable Property Officer (UAPO) and, if applicable, Organization Computer Manager (OCM).

1.2.1.2. Inform UAPOs and personnel of changes to ITAM regulation and maintain current relevant training materials.

1.2.1.3. Conduct Staff Assist Visits (SAV) to ensure accountability and asset management processes are effective. SAV findings will be provided to the responsible UAPO.

1.2.1.4. Utilize electronic methods to maintain all official records created as a result of ITAM Office practices in accordance with AFI 33-322.

1.2.1.5. Coordinate appropriate endorsements on transfer documents for any accountable IT asset(s) transferring to a new DoDAAC. The gaining ECO and IT Property Custodian (ITPC) will be provided with a copy of the completed transfer paperwork to be maintained as an official Key Supporting Document (KSD).

1.2.1.6. Provide initial and refresher ITAM training for PCs and OCMs. Maintain a current listing of all appointed ITPCs and OCMs.

1.2.1.7. Coordinate with ITPCs to assist organizations with the completion of Management Internal Control Toolset (MICT) requirements.

1.2.1.8. Inform ITPC of requirement to complete one for one asset swap within 30 calendar days of receiving replacement asset(s).

1.2.2. Base Software License Manager (BSLM) responsibilities.

1.2.2.1. Provide software license training for newly appointed BSLMs, Unit Software License Managers (USLMs), and Client System Technicians (CSTs).

1.2.2.2. Ensure each unit maintains a software inventory of all government owned Internal Use Software (IUS), Commercial off-the-shelf (COTS), and freeware software in use.

1.2.2.3. Ensure each unit performs an annual inventory of all IUS, COTS, and/or freeware software licenses, and corresponding documentation of unit software. Ensure UAPO electronically endorses the inventory letter supplied to BSLM.

1.2.2.4. Maintain a current list of all appointed USLMs.

1.2.2.5. Ensure SCORE or current automated inventory tools are used for tracking software installed on base network.

1.2.2.6. Ensure all software purchases follow the “General Guidelines for Acquisition of Software” as listed in DAFMAN 17-1203.

1.2.3. Commercial Mobile Device (CMD) program office responsibilities:

1.2.3.1. Ensure Unit CMD Managers receive initial/annual training to manage the organization's mobile devices in accordance with DAFMAN 17-1203 and local guidance.

1.2.3.2. Review account status monthly for overdue accounts and notify Unit CMD Managers of non-compliance.

1.2.3.3. Maintain a current listing of all appointed Unit CMD Managers on Tinker AFB.

1.2.3.4. Serve as the primary liaison between units and mobile service providers.

1.2.3.5. Establish and provide local procedures for the validation of assigned devices, utilization, and mobile services under contract.

1.2.3.6. Add approved devices to the mobile device management system as required.

1.2.3.7. Update or erase devices with approved government system.

1.2.3.8. Respond to tickets/tasks regarding mobile device issues and requests for setup

1.2.4. Unit Accountable Property Officers (UAPOs): Commanders or their equivalent (as designated by AFI 38-101, *Air Force Organization*) are responsible for providing guidance to ensure adequate protection and oversight is afforded to IT asset(s) and corresponding mobile services under their control. This duty is performed under the title of the UAPO. UAPO’s will:

1.2.4.1. Accept responsibility for the accountability of all IT hardware, software asset(s) and mobile services assigned to their unit.

1.2.4.2. Designate custodial areas within an accountable area that can be physically inventoried within two (2) workdays or less. Accounts should not span multiple buildings and it is suggested ITPCs be physically located near their designated custodial area. Each designated custodial area will be managed using the SAF/CIO A6 designated Accountable Property System of Record (APSR).

1.2.4.3. Appoint, at minimum, one primary and one alternate ITPC for each designated custodial area.

1.2.4.3.1. Replace ITPC 45 calendar days prior to the projected departure of current ITPC.

1.2.4.3.2. Replace any ITPC that will be deployed, assigned temporary duty (TDY), or is unable to perform ITPC duties for more than 179 days.

1.2.4.3.3. Ensure complete out-processing for departing ITPCs upon transfer of account. This requires assignment of a new ITPC and a completed joint loss-gain inventory of IT asset(s) when the Primary ITPC is being replaced.

1.2.4.4. Approve ITPCs to be relieved of other responsibilities during mandatory annual inventories until such time as the inventory has been completed.

1.2.4.5. Ensure positive action is taken to properly account for and secure all IT equipment especially during unit moves, reorganizations, or facility remodeling.

1.2.4.6. Email the ECO, at **72ABW.SCOSB.ITAMWorkflow@us.af.mil**, to authorize the transfer of excess or re-obligated IT asset(s) to a new Accountable Unit Identification Code (AUIC).

1.2.4.7. Adhere to the Financial Liability Investigation (FLI) timeframes and guidance outlined in DoD 7000.14-R, Financial Management Regulation, Volume 12, Chapter 7 Financial Liability for Government Property for any lost, stolen, or damaged IT asset(s) requiring an investigation.

1.2.4.8. Determine a threshold of acceptable risk for those assets identified as pilferable but non-accountable IT asset(s) which require proper management to ensure reasonable insulation from theft. Non-accountable assets are IT assets not meeting the accountable property threshold as defined in DAFMAN 17-1203. Examples of non-accountable assets including monitors, Voice over Internet Protocol (VOIP) phones, mice, etc.

1.2.4.8.1. Document a definition of IT asset(s) to be managed as pilferable and provide to their organization's Government Purchase Card (GPC) holder. For example, a stated threshold could be "any asset(s) with a purchase price of $400 or more." UAPOs or their designated delegates will ensure IT asset(s) meeting the stated criteria are tracked and made available to the GPC holder for audit purposes.

1.2.4.8.2. Ensure construction of an automated tracking system IAW DoDI 5000.64 to track IT asset(s) meeting the organization's pilferable asset definition. **Figure A2.1** may be used as a template to create a pilferable tracking spreadsheet.

1.2.4.9. Annually designate custodial responsibilities within accountable areas and appoint, at minimum, a primary and alternate USLM to the BSLM in support of the Software License Management Program. USLM appointment letter will be IAW guidelines established by the BSLM.

1.2.4.9.1. Annual appointment letters must be completed NLT 365 calendar days from the date the UAPO electronically endorsed the current appointment letter.

1.2.4.9.2. Replace USLM 45 calendar days prior to the projected departure of current USLM.

1.2.4.9.3. Replace any USLM that will be deployed, assigned temporary duty (TDY), or is unable to perform USLM duties for more than 179 days.

1.2.4.10. Ensure custodial areas are wisely designated for a manageable span of control for USLMs. Custodial areas can be consolidated to allow accountability for all units under the span of control of UAPOs.

1.2.4.11. Annually certify and document the USLM has completed all annual requirements. This certification is documented by electronically endorsing an annual memorandum indicating the USLM has completed all requirements no later than 365 days from the last account certification and submitted it to the BSLM. Annual requirements can be found in **para 1.2.6.1** of this instruction. Failure to provide BSLM with annual requirements may cause the account to be locked with restrictions as described in **para 3.1.2** of this publication and sub-sections.

1.2.4.12. Ensure unit out-processing procedures include turn-in of IT assets to ITPCs.

1.2.4.13. Ensure software acquisitions are submitted and approved IAW current 72 ABW Communications Directorate guidance.

1.2.4.14. Ensure a completed Unit CMD Manager appointment letter is routed to the CMD program office and resubmitted annually, or as changes in personnel occur.

1.2.5. Organization Computer Manager (OCM): An OCM may be appointed by the UAPO as the focal point for computer operation issues. The OCM will:

1.2.5.1. Submit an OCM appointment letter identifying each PCAN under his/her management. The OCM appointment letter will be re-accomplished and submitted annually. The OCM appointment letter format will be IAW guidelines established by the ECO.

1.2.5.2. Complete initial ITPC training or been assigned as a PC within the past calendar year.

1.2.5.3. Validate ITAM requirements within their organization.

1.2.5.4. Advise/assist ITPC(s) in accomplishing their assigned duties and responsibilities IAW with direction from the ECO.

1.2.5.5. Coordinate with the ECO and ITPC(s) to ensure completion of all annual requirement packages.

1.2.6. ITPC: Manages IT assets within their area of responsibility and are accountable to the ECO for all IT assets on their inventory. ITPC will:

1.2.6.1. Initially receive formal classroom or other approved training conducted by the ECO prior to accepting responsibility for an ITAM account.

1.2.6.1.1. The ECO schedules the class size and frequency of this training.

1.2.6.1.2. Initial training certificates will be valid for three months after training is completed.

1.2.6.1.3. If not added to an ITAM account within three (3) months, refresher training will be completed before an ITPC can be added to the requested account.

1.2.6.2. Re-accomplish ITAM Training NLT 365 calendar days from the date training was last completed. This requirement will be fulfilled using a training link provided on the Tinker ITAM SharePoint site.

1.2.6.3. Coordinate with the ECO and OCM regarding all ITAM inventory management issues. This includes change of assigned ITPC or change of ITAM account status.

1.2.6.4. Maintain organized and official records of all actions performed on their ITAM account(s) IAW AFI 33-322 and ECO guidance.

1.2.6.4.1. ITAM records must be maintained in a continuity folder that both primary and alternate ITPCs can always access. A suggested continuity folder structure is located in **Table 2.1**.

1.2.6.5. Account for all IT assets according to Serialized Item Management (SIM) and Item Unique Identification (IUID) guidance in *AFI 63-101/20-101, Integrated Life Cycle Management.*

1.2.6.6. Route requests for annual inventory suspense extensions to the ECO through the UAPO. Extensions are approved in two-week intervals. Requests not routed through the UAPO may be disapproved.

1.2.6.7. Ensure appropriate APSR-generated, IUID or equivalent labels are located on each IT asset listed on their inventory. Labels must be accurate, legible, and current. New labels are required when a label is no longer legible, incorrect, or not present. Labels are available from the ECO upon request.

1.2.6.8. Coordinate with the ECO to add newly acquired accountable IT hardware to their account when it becomes government property. The information required to add new equipment to the designated APSR must be provided to the ECO within five (5) business days of delivery. Requests to add equipment to the designated APSR will be submitted using Tinker Form 30, *IT Asset Management Asset Addition* (available on the Tinker ITAM SharePoint site).

1.2.6.9. Coordinate with ECO to transfer accountable IT hardware asset(s) between accounts within the same UIC. Transfer requests will be submitted using Tinker Form 32, *Computer System Equipment Action* (available on the Tinker ITAM SharePoint site).

1.2.6.10. Review their ITAM account(s) every 365 days for excess IT asset(s). It is recommended that IT asset(s) deemed excess and in good working condition be included on the ITAM Office's SharePoint site "Available Excess IT Asset Listing" for re-utilization on Tinker AFB.

1.2.6.11. Notify the ECO prior to deploying, shipping, or transferring accountable IT asset(s) to a new AUIC by submitting Tinker Form 32.

1.2.6.12. Ensure a one for one IT asset swap occurs within 30 calendar days of receiving replacement IT asset(s).

1.2.6.13. Dispose of assets to the Tinker Dispositions Office within 60 days of exchange.

1.2.6.14. Ensure all batteries and hard drives are removed from IT asset(s) being turned in for disposition.

1.2.6.14.1. If units do not have adequate space, storage, or equipment to complete removal before turn-in, the Disposition Office will provide necessary equipment, space, and training to complete removal of batteries and hard drives during disposition appointments.

1.2.7. Unit Software License Manager (USLM): Manages software licenses/asset(s) within their area of responsibility and are accountable to the BSLM for all software licenses/asset(s) on their inventory. USLMs will:

1.2.7.1. Perform annual inventory of assigned custodial areas of installed/owned software. Failure to provide BSLM with annual requirements may cause the account to be locked with restrictions as described in **para 3.1.2** of this instruction and sub-sections.

1.2.7.2. Update USLM training annually through the BSLM.

1.2.7.3. Coordinate with the BSLM, functional system administrators, CSTs, and software purchasers when new software is being purchased.

1.2.7.4. Monitor delivery of all new software and update software folders in a timely manner IAW DAFMAN 17-1203.

1.2.7.4.1. Store evidence of license agreements or licenses (e.g., user manuals, purchase documentation, CD-ROMs, etc.) and physical software media in a secure centralized location (e.g., locked drawer, file cabinet, room, etc.). Work with local Records Inventory Manager or Base Records Management Office to ensure proper retention and disposition of official records and records approval in the office file system.

1.2.7.4.2. Use BSLM-provided account folders in SharePoint to load corresponding account records as listed below.

1.2.7.4.2.1. Hard or soft copy of the software license inventory.

1.2.7.4.2.2. “Proof-of-License Ownership” of all COTS/IUS in use within their custodial area. Proof may consist of hardcopy or softcopy documentation from the supplier such as manual, purchase documentation, email, or distribution media.

1.2.7.4.2.3. Purchase requests associated with license purchases by the current 72 ABW/SC-directed process

1.2.7.5. Ensure the legal use of all software for the unit IAW the End-User License Agreement (EULA).

1.2.7.5.1. Each COTS application must have a license.

1.2.7.5.2. Use of software must correspond to the applicable license agreement.

1.2.7.5.3. Freeware software, when applicable by EULA, must have a purchased license and be listed as approved for the base network.

1.2.7.6. Request approval for disposal/redistribution of software from BSLM.

1.2.7.6.1. Provide Memo For Record (MFR) and process IAW licensing and/or purchasing agreements.

1.2.7.6.2. Retain completed MFR for audit trail of disposed asset(s).

1.2.7.7. Route requests for extension of annual requirements suspense to the BSLM through the UAPO. Extension requests not routed through the UAPO may be disapproved.

1.2.8. Unit CMD Managers serve as the unit's focal point for administering the CMD program, acting on behalf of the UAPO as specified in the appointment letter. This function is unique from ITPCs and is focused solely on mobile service and device management. The Unit CMD Manager will:

1.2.8.1. Support the Tinker AFB CMD program by annually re-submitting an updated appointment letter and performing annual reviews of assigned devices, utilization, and mobile services, as directed by the CMD Program Office.

1.2.8.2. Coordinate all unit CMD requirements, including procurement and service management actions, through the CMD Program Office.

1.2.9. CSTs will:

1.2.9.1. Assist USLMs with software inventories as required.

1.2.9.2. Ensure illegal copies of copyrighted software are not made.

1.2.9.3. Ensure software is not installed without approval from USLM.

1.2.9.3.1. All software installs require USLM approval unless it is in the BSLM designated “no approvals needed" network location.

1.2.9.3.2. BSLM will provide a list of all designated network locations where approvals are not required.

1.2.9.4. Notify the USLM if users appear to have installed software applications without USLM approval.

1.2.10. IT Hardware Asset Users: Users are responsible for the overall safeguarding and welfare of IT hardware asset(s) under their control. In addition, users will:

1.2.10.1. Maintain a clean and secure environment for their assigned IT hardware asset(s).

1.2.10.2. Not relocate any IT hardware asset(s) without prior approval from their ITPC.

1.2.10.3. Notify their ITPC immediately if a piece of equipment is lost, stolen, or damaged.

1.2.10.4. Not attempt to repair or upgrade IT hardware asset(s).

1.2.10.5. Only connect government furnished equipment (GFE) to IT hardware asset(s).

1.2.11. CMD Users will:

1.2.11.1. Perform Software updates as required.

1.2.11.2. Notify Unit CMD Manager if devices are lost, missing, or damaged.

1.2.11.3. Return device to Unit CMD Manger upon moving between organizations or if the mobile device is not being used.

1.2.11.4. Request permission from their Unit CMD Manager to take their device OCONUS.

Chapter 2

HARDWARE ASSET MANAGEMENT

2.1. Control Measures .

2.1.1. Per AFI 23-111, *Management of Government Property in Possession of the Air Force*, personnel having custodial responsibility may incur pecuniary liability for the loss, destruction, or damage to property caused by willful misconduct, deliberate unauthorized use, or negligence in the use, care, custody, or safeguard of the property from causes other than normal wear and tear. There are two methods to establish custodial responsibility:

2.1.1.1. Unit Accountable Property Officer appointment of a Property Custodian.

2.1.1.2. The use of signed hand receipts. Signed hand receipts are required for laptops, mobile devices, tablets, and external hard drives. It is highly recommended that other pilferable items be hand receipted when issued to end users.

2.1.1.2.1. Hand receipts may be AF Form 1297, *Temporary Issue Receipt*.

2.1.1.2.2. If the AF IMT 1297 is not used, the electronic hand receipt or automated system must state, “I acknowledge receipt of and responsibility in accordance with DoDI5000.64_DAFI23-111 for the items described below and will return them by the return date indicated.”

2.1.1.2.3. All hand receipts must be endorsed and contain the endorser’s contact information.

2.1.2. Physical or automated ITAM inventories will be completed no later than 365 days from the date the last inventory was endorsed by the UAPO. IT asset(s) to be maintained on ITAM inventories include APR and AR asset(s) (as defined by DAFMAN 17-1203) and all printing devices. The UAPO will certify inventory accuracy and completion by electronically endorsing ITAM inventories.

2.1.2.1. Any IT asset(s) determined to be lost, stolen, or damaged (whose manufacturer’s warranty will not repair or replace) must be reported to the responsible UAPO and ECO within 5 duty days of determination via the FLI process utilizing the DD Form 200 or Tinker Form 34, *Inventory Adjustment Form*.

2.1.2.2. Before turning into the ITAM office for processing, completed inventories must contain active FLI numbers or Tinker Form 34 annotated next to each asset(s) determined to be lost, stolen, or damaged (whose manufacturer’s warranty will not repair or replace).

2.1.3. PCs will submit an Annual Requirements Package consisting of an official inventory (will initially receive an inventory spreadsheet to be updated and returned to the ITAM Office), an updated appointment letter (using the latest template from the Tinker ITAM SharePoint site), and training certificates for both the primary and alternate PC to the ITAM Office by the 10th of the month annual requirements are due. All documents within the package must be electronically endorsed, dated, and completed within the same calendar month with exception of initial ITAM training certificates, which are valid for three months after completion.

2.1.3.1. Partial packages will be returned to PCs until all requirements are complete.

2.1.3.2. Loss/Gain packages, used to transfer primary PC responsibilities, must have all documents electronically endorsed, dated, and completed within the same calendar month.

2.1.4. The ITAM office will notify PCs, OCMs, and appropriate organization workflows 30 to 45 days prior to annual requirements setting a suspense date. The annual requirement suspense date will be determined using the previous annual inventory's UAPO endorsement date.

2.1.4.1. If annual requirements are not received by the set suspense date, an initial elevation email will be sent to the Division/Squadron Commander. If no resolution occurs after seven (7) calendar days a second elevation email will be sent to the Directorate/Group Commander. If, after 14 calendar days, resolution has not occurred, a third elevation email will be sent to the Wing Commander.

2.1.5. Overdue ITAM accounts will be frozen in the designated APSR and new purchases are disallowed until the account is compliant. All transactions (i.e., additions, transfers, etc.) will be suspended until the account is compliant. The only exceptions will be for transactions necessary to produce an accurate inventory.

2.1.6. Electronic continuity folders will be maintained by the ITAM Office and ITPCs. The Continuity folders will have six tabs as outlined in the table below. It is recommended ITPCs maintain their continuity folder on the ITAM SharePoint site.

Table 2.1. Suggested Continuity Folder Structure.

Tab Title	Relevant Documents
Tab 1	ITPC Appointment Letter, Training Certificates
Tab 2	Current Inventory
Tab 3	Warranty Replacement Records
Tab 4	Hand Receipts/DAF Form 1297
Tab 5	Tinker Forms 30, 32, DD Form1149
Tab 6	1348-1A, Hard Drive Destruction Memorandum, DD Form 200, Form 34

2.2. Purchasing Procedures.

2.2.1. End-user devices will be technically refreshed to maintain and optimize operational readiness. Units must continuously assess device capabilities against mission needs in accordance with the Adaptive Acquisition Framework (AAF) principles outlined in DAFI 63-101/20-101. However, to prevent mission degradation and ensure security, devices must be refreshed no later than the frequency thresholds outlined in DAFMAN 17-1203. Units may elect to refresh devices earlier if required to meet specific operational capabilities.

2.2.1.1. The ECO will provide ITPCs with a list of assets eligible for technical refresh.

2.2.1.2. ITPCs will advise their leadership of technical refresh requirements to ensure adequate funding is available for future IT purchases.

2.2.1.3. To support continuous capability planning, ITPCs must assess their inventories and provide the ITAM Office, within the first 31 calendar days of the start of the Fiscal Year, (FY) a list of serial numbers for all end-user devices scheduled for replacement throughout that FY as well as any devices requiring an earlier refresh due to operational readiness needs.

2.2.1.3.1. When an organization receives replacement IT assets for technical refresh or replaces unserviceable IT assets, the owning ITPC will coordinate with the ECO and the Information System Security Office (ISSO) or wing Information Assurance (IA) to dispose of the replaced IT asset(s) through DLADS. (T-1). Once DLADs has received the asset(s) and completed the turn in, the ECO will remove the asset(s) from the APSR within 30 calendar days.

2.2.1.4. All IT assets will be procured through established Air Force managed programs, e.g., Quantum Enterprise Buy (QEB) using Client Computing Solutions, Digital Imaging and Printing (DPI), or established Blanket Purchase Agreement (BPA). UAPOs will ensure acquisitions are submitted and approved IAW current 72 ABW Communications Directorate guidance.

2.2.1.4.1. UAPOs will be notified if 72 ABW Communications Directorate purchasing guidance is not followed. IT shipments will be detained at the ITAM Warehouse until compliance is achieved.

2.2.1.5. All IT purchases will contain accurate information for shipping labels.

2.2.1.5.1. “Ship To” information will contain the complete delivery address:

CIPS, Contract Number, and Purchase Order Numbers to 7330 Sentry Rd Building 469 Delivery Door 33 Tinker AFB, OK 73145

2.2.1.5.2. “Mark For” information will include ITPC and Resource Advisor names, phone numbers and emails.

2.2.1.5.3. Shipments not containing accurate information on shipping labels will result in delayed processing time and end-users will experience a delay in receiving their purchased IT equipment.

2.2.2. Central Delivery of IT Hardware Assets: All IT hardware asset purchases will be delivered to the ITAM Centralized Warehouse, for receipt and processing. The current ITAM Centralized Warehouse address is listed on the ITAM SharePoint Site. Exceptions must be coordinated during the requirements phase of the purchase via the CIPS process.

2.2.2.1. ITPCs will be notified by the ITAM warehouse personnel when IT asset(s) are available for pickup and must retrieve assets within 5 business days of notification. Failure to pick up asset(s) will result in an elevation email to the ITPC’s leadership.

2.2.2.2. Upon pickup of newly received IT asset(s) ITPCs will create a turn-in appointment with the Dispositions Office ensuring a one-for-one swap occurs within 60 calendar days of receiving new asset(s).

2.2.2.2.1. If replaced IT asset(s) are not turned in for Disposition within 60 days ITPC leadership will be notified.

Chapter 3

SOFTWARE ASSET MANAGEMENT

3.1. Annual Inventory Process

3.1.1. All USLM accounts have an assigned static month due date. Account compliance is determined by submitting the annual inventory package on or before the 15th day of the account's static month due date.

3.1.2. Annual inventory packages consist of a current year appointment letter, primary and alternate USLM training certificates/in-person training attendance, and a Commander/Director signed annual account inventory. All documents must be dated for the current year aligning with the static month due date.

3.1.3. Accountable and Unauthorized software are listed in the SCORE report provided to the USLM. Unauthorized software must be uninstalled NLT 7 days after receiving vulnerability identification from ISSM. USLMs can view the TAFB Software Listing located on the USLM SharePoint page.

3.1.4. Failure to remove unauthorized software will result in the affected IT system being quarantined and or removed from the network.

3.2. Overdue Notification/Elevation Process

3.2.1. An initial notification email will be sent to the current appointed USLM approximately 45 days prior to account's static month due date.

3.2.2. The BSLM will email the USLM and supervisor on file if no account documents are submitted by the account's static due month date. USLM's will be given a 5-calendar day suspense to comply. If no resolution occurs the BSLM will initiate an elevation process.

3.2.3. A first-level elevation email will be sent to the Division/Squadron Commander with a 14-calendar day suspense to comply. If no resolution occurs, a second-level elevation email will be sent to the Directorate/Group Commander with a 14-calendar day suspense to comply. If there is still no resolution, a third-level elevation email will be sent to the Wing Commander with a 14-calendar day suspense to comply. After the third elevation, an email to the Wing, Group, and Squadron Commanders/Director or equivalent will be sent every 14 days until the account is compliant.

3.2.4. BSLM will lock accounts when first-level elevation occurs. Locked accounts are affected by the following:

3.2.4.1. Software purchases are placed on hold.

3.2.4.2. Software installations requiring USLM/BSLM approval will be denied.

3.2.4.3. Non-Enterprise software may be removed from USLM account to ensure compliance with this instruction and DAFMAN 17-1203.

3.2.4.4. Only transactions that are required to ensure all necessary documents are submitted for account compliance will be permitted.

3.3. Software Lifecycle Management

3.3.1. USLMs must match receipts to a fully approved work order, or current 72 ABW/SC directed process, and all new software media/licenses must be stored at the Enterprise Information Management (EIM) site designated by BSLM. The BSLM may designate an alternative electronic storage method for software license management working level documentation.

3.3.2. License documentation must be filed in the USLM account's SharePoint page within 7 days of receipt. License documentation information will include the number of licenses purchased, the total cost of the licenses, company name/vendor info, date of purchase, and period-of-performance/license expiration.

3.3.3. Before installing newly acquired software the above receipt procedures must be completed in their entirety.

3.3.4. USLMs shall receive all physical media.

3.3.5. USLMs must check the Tinker AFB Software Listing to ensure software certification are current for software on their account.

3.3.5.1. USLMs may assist software users to acquire SACA certification if software is expired or not listed in the Tinker AFB Software listing.

3.3.6. Software license transfers between USLM accounts must be accomplished with the appropriate Tinker Form 335, *Software Transfer Request*, and uninstalled from the losing account's computers.

3.3.7. USLMs will send BSLM a copy of the final Tinker Form 335. USLMs will file the form in their EIM folder, account folder, and local Tinker Electronic Records Management System (ERMS) site.

Chapter 4

COMMERCIAL MOBILE DEVICE ASSET MANAGEMENT

4.1. Control Measures.

4.1.1. Account Compliance & Elevation Process

4.1.1.1. Program compliance is determined by a current Unit CMD Manager appointment letter on file with the CMD office. The Unit CMD Manager Appointment letter verifies completion of the following:

4.1.1.1.1. Validation of device utilization

4.1.1.1.2. User information has been updated on the carrier website and in the CMD tracking application

4.1.1.1.3. Completion of Unit CMD Manager annual refresher training

4.1.1.2. All Unit CMD accounts have an assigned static month. An updated Unit CMD Manager appointment letter is due by the 15th of the static month, or the next business day if it falls on a weekend or holiday. An initial notification email will be sent to the current appointed Unit CMD Manager 45 days prior to the due date.

4.1.1.2.1. A reminder email from the CMD program office will be sent to the Unit CMD Managers and their supervisor if no appointment letter is submitted by the account's static month due date. Unit CMD Managers will be given a 7-calendar day suspense to comply and if no resolution occurs the CMD program office will initiate an elevation process.

4.1.1.2.2. If no resolution occurred, a first-level elevation email will be sent to the Division/Squadron Commander with a 14-calendar day suspense to comply. If no resolution has occurred, a second-level elevation email will be sent to the Directorate/Group Commander with a 14-calendar day suspense to comply. If still unresolved, a third-level elevation email will be sent to the Wing Commander with a 14-calendar day suspense to comply.

4.2. Tinker AFB CMD Program and Purchasing Procedures.

4.2.1. All unit requests for CMD mobile services and associated mobile devices must be coordinated through the CMD program office via the CIPS acquisition process.

4.2.2. The CMD program office's validation ensures all requests are compliant with current Department of War (DOW) guidance, 23 May 2024 memo DoD UNCLASSIFIEID Wireless Mobile Services and Devices Spiral 4, and DAFMAN 17-1203, paragraph 2.5.1.10, which mandates that mobile services and devices be purchased through the required DOW mobile service and devices acquisition contract.

4.2.3. Mobile services and devices purchased outside of this established process may be considered non-compliant and may not be eligible for government support and/or connection to the network.

FENCISCO N. HARRIS, Colonel, USAF
Commander

Figure A2.2. Pilferable Item Tracking Spreadsheet Directions.

Pilferable Item Tracking Spreadsheet Directions	
Acq Cost:	Initial acquisition cost and depreciation information, if applicable; or original acquisition cost if the property does not require capitalization
Custodian Name:	Individual accountable for managing pilferable assets
Desc:	Description (e.g., noun, nomenclature) of asset
Ldgr:	General ledger classification (e.g., general equipment, loaned or leased, or a means to apply business rules for making such a determination)
Loc:	DoD activity address code, unit identification code, commercial and government entity code
Model #:	Model Number of asset
NSN:	National stock number (if known)
Owning Org/Off:	Current owning Organization/Office symbol
Part #:	Part Number of asset
Pilferable Item Definition:	UAPO defined parameters of Pilferable assets to be managed
Qty:	Received, Fabricated, Issued, or On-Hand
Serial # or UII:	Serial Number or Unique item identifier or DoD recognized IUID equivalent as defined in DoDI 8320.04 of asset
Svc Date:	Date asset was placed in service
Status:	Active or Inactive/Retired (e.g., Staged, Stored, In-Transit, Transferred, Declared Excess, Awaiting Disposition, or Dispositioned)
U/I:	Unit of measure
Useful Life:	Estimated useful life (years or activity based for capitalized property)
