Supersedes: AFH 23-123V2PT1_PACAFSUP, 04 March 2014

Pages: 7

AFH23-123V2PT1, *Integrated Logistics System-Supply (ILS-S), Materiel Management Operations* is supplemented as follows: These procedures apply to all Materiel Management personnel (military, civilian and contractors) working for the Logistics Readiness Squadrons (LRS) and Materiel Management Activities within the Pacific Air Forces (PACAF) Command. It identifies requirements specific to PACAF. This supplement does not apply to the Air National Guard (ANG) or Air Force Reserve Command (AFRC), but does apply to the Air Force Reserve members assigned to PACAF units or activities. The authorities to waive wing/unit level requirements in this publication are identified with a Tier ("T-0, T-1, T-2, T-3") number following the compliance statement. See AFI 33-360, Publications and Forms Management, for a description of the authorities associated with the Tier numbers. Tier 2 waiver authority is delegated to HQ PACAF/A4 for this publication. Submit requests for waivers through the chain of command to the appropriate Tier waiver approval authority, or alternately, to the Publication OPR for non-tiered compliance items. Ensure that all records created as a result of processes prescribed in this publication are maintained IAW AFMAN 33-363, *Management of Records*, and disposed of IAW Air Force Records Disposition Schedule (RDS) located in the Air Force Records Information Management System (AFRIMS). Refer recommended changes and questions about this publication to the OPR using Air Force Form 847, *Recommendation for*

Change of Publication; route AF Forms 847s from the field through the appropriate functional chain of command. IAW the Paperwork Reduction Act and DoD policy, ensure that reports of information collections that are collected and/or are compiled and transmitted from the general public are cleared and licensed by the Office of Management and Budget prior to collection. Information that is collected from other DoD components or Federal agencies must be approved by DoD and licensed with a report control symbol. This instruction may not be further supplement or extended unless otherwise indicated.

SUMMARY OF CHANGES

This document has been changed substantially and needs to be completely reviewed. Major changes include the clarification for the use of exception codes and for whom is responsible for the monitoring of their use.

Table 2.61. List and Description of SEX Codes.

SEX	ENC	Phrase	ECC Required	Notes	Monitor
B	R	Retail Outlet Item	No		MAJCOM
R	R	Blank			HQ PACAF
S	P	Support Center Pacific (SCP)	Yes	1	HQ PACAF
T-V	R	Blank			HQ PACAF
W	P	C-130 CRF			HQ PACAF
X-Y		Assigned as Required by Major Command and/or LRS			HQ PACAF

Note:

1. **(Added)** HQ AMC will direct use for the following locations as they support the Forward Supply System (FSS): Andersen, JBER, JBPH-H, Kadena and Yokota. Local use at these locations is prohibited. New contingency locations can be added once verified the existing SEX code is not in use on the host account.

2. **(Added)** Load SEX Code "S" only when directed by HQ PACAF/A4RMW. The 18th LRS is authorized to suppress shipment suspense details and SSC images for transaction code SHP and A21 to FB2316.

4.3.7.2.1.2. FSC in PACAF will not place customer demands on the ILS-S for repair parts.

4.3.7.2.1.3. FSC in PACAF will not store end-items awaiting bits and pieces.

4.3.8.5. Maintenance shops will store AWP end-items and maintain AWP suspense files.

Table 5.1. AF Form 2005 Entry Requirements:

Note 1: Blocks G-I are unused or locally determined.

Table 5.16. Issue Exception Codes.

Code	ENC	Exception Phrase	Manager	Notes
P	R	Air Force Repair Enhancement Program	Unused or locally determined	Note 5
Q-R	R	Blank		Note 5
T	P	Mated Item	Unused or locally determined	Note 5
U-Z	R	Blank		Note 5

Notes:

1. IEX 6 and E are for Individual Equipment Items.

2. See Chapter 10 for proper assignment of these codes.

a. If the LRS CC/AO directs, change the ENC to P for IEX 9 items.

b. If the ENC is changed to P for IEX 9 items, establish local procedures IAW AFMAN23-122, Chapter 5 to ensure the DD 1348-1A output issue document contains the required certificate.

3. IEX D is assigned by Stock Control personnel to improve support for customer requirements. IEX D prevents automatic backorder of items which cannot be requisitioned online. An example of when IEX D may be used is when the item is assigned a requisition exception (REX) code 4 (do not requisition), REX 5 (requires additional information from the customer prior to requisitioning), or when the item has a NPPC 2, 3, 5, or 9 and a replacement stock number is available. See paragraph 5.2.47 for more information concerning REX codes. Processing instructions for each item assigned IEX D should be readily available if rejects occur. This will ensure processing actions are not unnecessarily delayed. Additionally, processing actions may be entered in the item record nomenclature field. However, when the nomenclature field is used for processing instructions, the instructions must be complete and understandable. The intent of using this method is to provide enough information on reject notices so processing of the customer request is not delayed. Standard phrases such as:

ORDER NHA, USE 1560001234567BF, or ORDER REPAIR KIT should be used instead of local abbreviations. Caution: Do not use the nomenclature field when processing instructions require extensive explanation, multiple stock numbers, or information which exceeds the available positions of the nomenclature. In these cases, use either the exception control card (ECC) image for the REX assigned (if applicable) or an ECC for the IEX D. The objective is to make it easier to satisfy customer demands without unnecessary delay. Any method that satisfies this objective is allowed if locally documented in either a supplement or local operating instruction.

4. IEX G is assigned for Civil Engineering request.

5. The following information applies:

a. If the major command desires, maintain ECC images for IEX P through Z.

b. If local management desires, maintain ECC images for IEX 1 through 9 and A through O. Normally, ECC images are not maintained for these IEX codes.

6. Assign IEX H to QEC kits and afterburners.

7. Assign IEX 7 to all hazardous material/waste item records. IEX 7 will not be used in place of IEX 9.

8. Assign IEX 9 to items containing ODCs as determined by the HAZMART/BES. For these types of items, all customer issue requests must be accompanied by an approved Air Force waiver.

9. IEX B is not required for serialized small arms which have serialized report code (SRC). An assigned or COMSEC items which have SRC of C assigned. COMSEC items with MMAC codes CA, CK, CL, CO, CR, and CY must have SRC C loaded on the item record. SRCs are normally loaded automatically through Stock Number User Directory (SNUD) (BME) change transactions received from the Cataloging and Standardization Center (CASC).

5.2.17.4.2. The I004 MGT Notice does not need to be sent to the requesting organization after a cancellation request.

5.2.17.4.3.2. Copies of the I023 MGT notice can be destroyed after processing.

Table 5.55. Requisition Exception Code.

REX	ENC	Exception Phrase	ECC Required	Monitor
A-F	R	Locally Assigned	As Required	LRS/Material Management
G-Limited Restrictions	R	AMC FSS/Contingency Support: Modify requisitions PSP	Manually order through AMC. Primary supply application code will identify weapon system manager. Notes 8 and 9	HQ AMC/A4RM

H	R	Blank		
I-Limited Restrictions	P	AMC FSS/Contingency Support: Modify requisitions for F77 – Boeing	Note 8 and Note 9	HQ AMC/A4RM
J	R	Blank		
K- Limited Restrictions	P	AMC FSS/Contingency Support: Modify requisition for DLA	Note 8	HQ AMC/A4RM
L-M	R	Blank		
N- Limited Restrictions	P	AMC FSS/Contingency Support: Modify requisition for F81 – Lockheed	Notes 8 and 9	HQ AMC/A4RM
O	P	C-130 CRF	No	Determined Locally
P-Q	R	Blank		
R- Limited Restrictions	P	AMC FSS/Contingency Support: Modify requisition for AFMC	Note 8	HQ AMC/A4RM
S	P	Support Center Pacific (SCP), FB2316	Note 10	AFMC SCM-R Stock Control Activity
T	R	Blank		
U-Limited Restrictions	P	AMC FSS/Contingency Support: Modify requisition	Note 8	HQ AMC/A4RM
V	R	Blank		

Notes:

1. Individual exception control (ECC) images are not required when the ILS-S assigns REX code 1 as a result of processing MILSTRIP status. REX code 1 must be monitored. If a requisition must be permanently suppressed, process a Stock Control Data Change (FCD) transaction to change the REX code to 4 or 5.

2. Individual ECC images are not required when the ILS-S assigns REX 3 as a result of processing stock list changes received through the stock number user directory (SNUD). Retain a copy of the 036 (End of Job), 037 (Reserved), 045 (Reserved) REJ notice, or F470 MGT notice (BVD03) in stock number sequence until action is taken to delete the stock

number from the ILS-S. If the stock number is not deleted, change to REX code 4.

3. Individual ECC images are not required for stock numbers under the following conditions:

a. REX code 4 is assigned to suppress requisitions for the following items:

(1) Items assigned budget code V (vehicles).

(2) Mechanized Materiel Handling Systems (MMHS).

(3) Bench mock-up/sets.

(4) Gas Cylinders.

(5) Constant Shelter Materiel.

(6) Calendars.

b. When complete processing instructions are loaded in the nomenclature field; e.g., requisition repair kit.

4. When alpha REX codes are used for purposes other than requisition override, local management (AFMC SCM-R Stock Control Activity, LRS/Materiel Management Activity or MAJCOM) will decide how to manage and use the exception phrase record, ENC, and ECC image.

5. Satellite Procurement Flag. The satellite procurement flag is contained on the satellite OCCR (000099). REX code 0 indicates that the stock number contains an exception (opposite) to the flag.

6. ECC images are required to be maintained for each individual item assigned REX code 5 except when complete processing instructions are loaded in the nomenclature field (for example, order bit and pieces).

7. REX 2 is assigned to items coded local purchase/local manufacture where no local procurement source or local manufacture capability exists.

8. **(Added)** HQ AMC/A4RM will direct use for the following locations as they support the Forward Supply System (FSS): Andersen, JBER, JBPH-H, Kadena and Yokota. Local use at these locations is prohibited. When loading REX modifier use signal code D, advice code 6Y, project name Pacer Haul and project code 196 or 720. New FSL/contingency locations can be added once verified that the existing REX codes are not in use on the host account.

9. **(Added)** Requisitions going back to the AMC Primary Supply Point (PSP) for resupply will use project codes 196 or 720 and priority 03.

10. **(Added)** Verify the priority for REX "S." The priority should be left blank. This will allow normal program control to assign the requisition priority. If the priority is not blank on the requisition modifier, process an FXR to blank the priority.

JEFFREY R. KING, Brigadier General, USAF
Director of Logistics, Engineering & Force Protection
