Supersedes: WR-ALCI21-106, 28 January 2021

Pages: 7

This instruction implements Air Force Materiel Command Instruction 21-100v3, *Depot Maintenance Production Support*. It establishes procedures for managing maintenance, movement, and use of Aerospace Ground Equipment/Support Equipment (AGE/SE) owned or controlled by Warner Robins Air Logistics Complex (WR-ALC) organizations. It applies to the 402d Aircraft Maintenance Group (402 AMXG), 402d Commodities Maintenance Group (402 CMXG), and 402d Maintenance Support Group (402 MXSG). Report errors, suggest revisions, and recommend corrective action about this instruction to the office of primary responsibility (OPR) using the Department of the Air Force (DAF) Form 847, *Recommendation for Change of Publication*. This instruction may be supplemented at any level, but all direct supplements must be routed to the OPR of this instruction for coordination prior to certification and approval. Requests for waivers must come through the chain of command from the commander or civilian director of the maintenance group seeking relief from compliance. Waiver requests will be submitted using the DAF 679, *Department of the Air Force Publication Compliance Item Waiver Request/Approval*, or via e-mail or memorandum if the form is unavailable. Waiver requests must be submitted to the OPR; waiver authority has not been delegated. This instruction is exempt from tiering pursuant to Department of the Air Force Instruction (DAFI) 90-160, *Publications and Forms Management*. Ensure that all records created because of processes prescribed in this instruction are maintained in accordance with (IAW) Air Force Instruction (AFI) 33-322, *Records Management and Information Governance Program*, and disposed of IAW the Air Force (AF) Records Information Management System Records Disposition Schedule. See **Attachment 1** for a glossary of references and supporting information.

SUMMARY OF CHANGES

This revision removed the requirement to initiate quality deficiency reports for defective equipment/parts.

1. Roles and Responsibilities.

1.1. **The AGE Flight (402d MXSS/MXDXB) will:**

1.1.1. At the beginning of each month, provide electronic AGE/SE due/past-due reports to squadron commanders/directors and deputies via group workflows for review and necessary action for the turn-in of applicable equipment.

1.1.2. Review and balance periodic maintenance inspection (PMI) workload, as required, to stagger the PMI schedule to maintain constant workflow.

1.1.3. Initiate meetings when problems occur (i.e., equipment specialists, engineers, etc.) for unavailable parts, specific modifications, and defective equipment.

1.1.4. Provide recommendations/information to the owning organizations equipment custodians to initiate an Air Force Technical Order (AFTO) Form 375, *Selected Support Equipment Repair Cost Estimate*, to determine repair/replacement criteria's feasibility IAW technical orders (TO) 00-25-240, 35-1-24, 35-1-25, and 35-1-26.

1.1.5. Review past-due AGE/SE and recommend removal from custodian inventory report to the appropriate owning organization's monitor. Equipment that has not been dispatched or used within two years will be recommended for removal.

1.1.6. Perform scheduled and unscheduled maintenance, dispatch, pick-up, service and returns, and assist during storm prep as requested. Engage with owning organization engineers who have sustainment authority for equipment not supported by the AF System Program Office for issues. Use approved ground support equipment checklist when applicable. Technicians will engage with equipment specialist and/or engineering for information as needed.

1.1.7. Ensure equipment is in good working condition and within inspection due dates prior to being dispatched.

1.2. **Organizations requiring government supported AGE/SE maintenance, repair, and dispatch will:**

1.2.1. Identify the appointed primary and alternate equipment custodians and test, measurement, and diagnostic equipment monitors. This appointment must be provided, in writing, to the AGE/SE Production Support Flight (PSF) and include name, organization, phone, and e-mail address. The AGE/SE PSF must be notified of changes to these appointments.

1.2.2. Owning organization equipment custodians will review monthly AGE/SE due/past-due report from respective workflows for action. To gain separate access to reports contact the Facility and Equipment Management Office.

1.2.3. Electronically submit a completed WR-ALC Form 37, *Preventive Maintenance Action Request*, to AGE/SE PSF when new or additional AGE/SE requires support. The WR-ALC Form 37 will identify technical data with maintenance instructions referenced or attached TO, commercial-off-the-shelf manuals, etc. Technical data will be submitted to AGE/SE. AGE/SE Flight will evaluate all equipment before being considered preventive or corrective maintenance.

1.2.4. For any AGE/SE going off-base, coordinate the approval with the applicable authority and notify the AGE/SE Flight with the correct status of the asset leaving Robins Air Force Base.

1.2.5. Provide, in writing, to AGE/SE PSF, a list of all AGE/SE that has been removed from custodial account records that no longer requires maintenance by the AGE/SE Flight.

1.2.6. Review the monthly AGE/SE due/past-due report and distribute to the applicable area of responsibility. Squadron leadership must ensure AGE/SE is released on time by the users so that all required maintenance inspections can be performed by the AGE/SE Flight.

1.2.7. The AGE/SE that requires dispatch, maintenance, service and return, or repair, must be coordinated through **402MXSS.AGE.FLIGHTDISPATCHOFFICE@us.af.mil.** Or use Defense Switched Network: 468-4174. Cell #: 478-874-9826 or 478-874-9839. Leave a message if applicable.

1.2.8. It is the discretion of the owning organization and facility manager whether to assign a designated AGE/SE pick-up/drop-off area. If a specific area is not designated, each dispatch/pick-up request must be specific when providing a location. The Maintenance Operation Center will provide all NON-AGE/SE emergency services, clearances for ground movement of aircraft and equipment, etc.

1.2.9. Annotate AFTO Form 244, *Industrial/Support Equipment Record*, of equipment not turned in as appropriate IAW TO 00-20-1, *Aerospace Equipment Maintenance Inspection, Documentation, Policies, and Procedures*, Chapter 7.

1.2.10. Shop supervisors must review AFTO Forms 244 (Part IV) annually. Review must be documented.

1.3. **Users/operators will:**

1.3.1. Prepare AGE/SE for pick-up and transport, when no longer in use or when AGE/SE requires service and return. Ensure all original handrails (matching equipment numbers) are reinstalled prior to pick-up. AGE/SE must be free of foreign object debris and returned to original configuration (for example, attaching handrails and placing hoses, cords, air ducts, etc., in storage compartments). If AGE/SE has been modified for extra height, additional stands must be removed. AGE/SE must be removed from under the aircraft wings with tow bar facing away from aircraft for AGE/SE pick-up.

1.3.2. If equipment is found with missing items, the responsible organization will initiate an Air Force Materiel Command (AFMC) Form 310, *Lost/Found Item Report*. If equipment is found damaged, the responsible organization will initiate an AF Form 978, *Supervisor Mishap Report*. The responsible organization is defined as who has ownership of the equipment at the time the mishap occurred and/or the item was found missing. The equipment will stay in that organization's possession until the reports have been initiated.

1.3.3. Perform a "prior-to-use" inspection before operation of the equipment, to include reviewing the AFTO Form 244 and checking fluid levels (if applicable). In addition, verify the condition of AGE/SE at the start of the work shift and annotate any discrepancies on the applicable part of AFTO Form 244.

1.3.4. Have the right to refuse dispatched AGE/SE. Users/operators should refrain from accepting AGE/SE dispatched by the AGE/SE Flight that is due or past-due PMI, inoperable, has out of date gauges, etc. If AGE/SE is required for use outside of that period, ensure AFTO Form 244 is properly annotated and equipment is turned in after completion of task.

1.3.5. Move AGE/SE from drop-off areas to workstations and return to pick-up area when task is completed. Moves are permissible inside the controlled flight line area only. An exception to this is given for loaded trailers and dollies for the purpose of routing parts and material.

1.3.6. Maintain AGE/SE in a safe and orderly condition at the worksites. Any abuse, illegal modifications, or tampering of safety devices is forbidden on any AGE/SE.

1.3.7. Ensure AGE/SE is not modified or disassembled without the written approval of the appropriate engineering authority.

1.4. **User/Owner Schedulers/Planners/Supervisors will:**

1.4.1. Determine the requirements for AGE/SE needed IAW this instruction.

1.4.2. Submit preload requirements to **402MXSS.AGE.FLIGHTDISPATCHOFFICE@us.af.mil.** no later than 24 hours prior to the start of the next shift and follow up with a phone call to notify the AGE/SE Production Support Flight that a preload has been submitted.

1.4.3. Coordinate the turn in of unused equipment to reduce the frequency of "Non-Available" (N/A) equipment dispatch requests. Squadrons will contact AGE/SE PSF to assist in expediting "N/A" AGE/SE that is in possession of the AGE/SE Flight.

1.4.4. Supervisors will ensure AGE/SE is turned in after completion of the task.

JON A. EBERLAN
Brigadier General
Commander
