1. PURPOSE. This AFJQS identifies competency requirements for individuals performing duties within an F-35 Materiel Management function. It provides the minimum training requirements for assignment of Special Experience Identifier (SEI) 2BD and 2BU. This AFJQS will be available in MyTraining and must be used to develop the Master Training Plan (MTP) for F-35 Materiel Management Sections and any Individual Training Plans (ITP). This AFJQS will remain in effect until superseded or rescinded.

JOB QUALIFICATION COMPETENCY MODEL

Competency	Sub-Competency	Sub-Competency Description
F-35 Supply Sustainment	Policy and Procedures	Operations of Supply Functions for the F-35 Enterprise
ALIS	ALIS Structure and Capabilities	The Fundamentals and Usage of ALIS
Materiel Demands	Warehouse Operations	Processing Demands and Managing Purchase Orders within ALIS
	Decentralized Materiel Support	Direct Maintenance Support
Deployable Spares Package (DSP)	Deployable Spares Package (DSP) Function	Contingency Spares Management
Support Equipment	Support Equipment Management Function	Aviation Support Equipment Management
Additional Supply Tasks	Electronic Equipment Logbook (EEL), Shelf life, and Asset Transfer	Electronic File Management that Contains Repair, Expiration, and Accountability of Assets

2. TASK QUALIFICATION. Personnel will be qualified to the GO/NO GO standard for all tasks listed in this AFJQS. GO means the individual can perform/identify the task, without assistance, utilizing appropriate instructions, training references, or other procedural guidance. If the required training listed in Part II of this AFJQS is provided, a supervisor/trainer from the 2S0 functionality will complete the trainer's block to document training completion. The behavior match column connects each training requirement to specific behaviors from the job qualification competency model. For ease of use, the required behaviors from the competency models are numbered and included in each section sub-header. This helps to identify how the training received directly contributes to developing the knowledge, skills, and abilities expected within the AFSC.

3. ADDITIONAL DUTY or TASK. If personnel are assigned an additional duty or task not listed in this AFJQS, the supervisor will develop an AF IMT 797, Job Qualification Standard Continuation/ Command JQS. The supervisor/trainer will then develop a plan for the UDM to receive training and become qualified for that duty position.

4. TRAINING DOCUMENTATION AND TRAINER/CERTIFIER IDENTIFICATION. Document training required by this AFJQS in accordance with DAFMAN 36-2689, Training Program. All trainers authorized to sign off tasks in Part II of this AFJQS will be identified in the identification block of this AFJQS. Trainer(s) and trainee(s) will use this AFJQS in conjunction with the Airman's respective Air Force Specialty Code (AFSC) Career Field Education and Training Plan (CFETP). Dual documentation is not required if the competency task is already accomplished for the member's primary AFSC. Training is to be conducted by the Airman's supervisor or applicable subject matter expert.

5. This AFJQS has been coordinated with all applicable CFMs. Overall POC for this AFJQS is HAF/A4LR, DSN 223-5021, AF.A4LRM.Workflow@us.af.mil.
