Certified by: 305 APS/CC
(Lt Col Juan C. Pizarro)
Pages: 23

This instruction implements procedures pertaining to the movement of DoD personnel and government shipments/material on the installation. It outlines the local procedure requirements identified in DAFI 24-602V2, *Cargo Movement*, and DAFI 24-602V1, *Passenger Movement.* This Joint Base McGuire-Dix-Lakehurst Instruction (JBMDLI) applies to all units on the installation. Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using the AF Form 847, *Recommendation for Change of Publication*; route AF Forms 847 through appropriate chain of command. Ensure that all records created because of processes prescribed in this publication are maintained in accordance with Air Force Instruction (AFI) 33-322, *Records Management and Information Governance Program*, and disposed of in accordance with Air Force Records Information Management System (AFRIMS) Records Disposition Schedule (RDS).

Chapter 1

GENERAL SCOPE & RESPONSIBILITIES

1.1. Scope: This instruction applies to all personnel involved with the processing, packaging, and handling of arms, classified, sensitive, nuclear related material, and aircraft engines. Refer to Joint Base McGuire-Dix-Lakehurst Instruction (JBMDLI) 24-602V2 (*Handling, Processing, Storing, and Transporting Explosives)* for the movement of ammunition and explosives.

1.2. Commander Responsibilities: Commanders will ensure all unit personnel who handle, process and ship arms, classified, sensitive, nuclear related material, and aircraft engines, are trained and certified in accordance with (IAW) applicable career field education training plan and local training standards.

1.2.1. Commanders will appoint, in writing on official memorandum, personnel who are authorized to process, ship, and receive arms, ammunition, and explosives (AA&E), classified, sensitive, and nuclear related material. Refer to DAFMAN 21-201, *Munitions Management*, Chapter 2 and DAFI 23-101, *Material Management Policy*, Chapter 10.2. Commanders will ensure the memorandum is provided to the local Transportation Officer (TO), and it is updated as changes occur (at least annually). Only personnel who are trained and have the appropriate security clearance will be authorized to handle these type assets. Note: Only the Defense Information System for Security (DISS) will be used to verify security clearance eligibility, investigation status, and access levels; therefore, units must provide the 305th Aerial Port Squadron, Transportation Flight, Distribution Section (305 APS/TROTD) an update immediately if an individual's clearance, eligibility, and/or access level is downgraded or changed.

1.3. Other Personnel Responsibilities: It is the responsibility of all personnel involved with the processing, packaging, and handling of arms, classified, sensitive, nuclear related material, and aircraft engines to comply with the procedures contained in this joint base instruction. Failure to comply with this joint base instruction may result in a security incident which will be formally investigated.

1.3.1. All traffic management functions to include single installation intermodal decisions/responsibilities for JB MDL, will be performed by the Aerial Port Squadron (APS) on behalf of the joint base commander. This includes, but is not limited to, the delivery of installation movement support to all mission elements, defined tenants, and mobility/deployment preparation and training.

1.3.2 The Aerial Port (as defined in the Defense Transportation Regulation (DTR)) at McGuire-Dix-Lakehurst is a mission function of USTRANSCOM executed by Air Mobility Command and is therefore not installation support.

1.2.3. U.S. Army Reserve Command’s Unit Movement services to support regional Army Reserve component training and mobilization are a regionalized mission function and, therefore, are not installation support.

Chapter 2

CLASSIFIED SHIPMENTS

2.1. Scope: This chapter applies to all personnel involved with the processing, packaging, and shipment of weapons, classified, controlled, sensitive, and nuclear related material.

2.2. Procedures:

2.2.1. All units/personnel that offer for shipment classified material will ensure the asset is properly identified on the shipping documents (DD Form 1348-1A, *Issue Release/Receipt Document*, and/or DD Form 1149, *Requisition and Invoice/Shipping Document*). Additionally, for classified assets, the DD Form 1348-1A and DD Form 1149, will include applicable Controlled Inventory Item Code/Security Risk Category (CIIC/SRC). Only personnel that are cleared and listed on the classified receipt listing are authorized to receipt and/or process small package carrier deliveries (Note: Only the Defense Information System for Security (DISS) will be used to verify security clearance eligibility, investigation status, and access levels; therefore, units must provide the 305 APS an update immediately if an individual's clearance eligibility and/or access level is downgraded or changed). **NOTE:** "TOP SECRET" shipments are not authorized to be processed through 305 APS/TROTD Outbound freight section.

2.2.2. 305 APS/TROTD will (for classified/sensitive shipments up to 150 lbs.):

2.2.2.1. Establish delivery receipt/drop off times with the shipper. Normally, classified/sensitive shipments will be received and processed between the hours of 0800-1200, Monday-Thursday.

2.2.2.2. Only appointed personnel will receipt for classified material.

2.2.2.3. Initiate and utilize established checklist IAW DAFI 24-602V2, *Cargo Movement*. Chapter 4, Para 4.8.2 and Para 4.9.3.

2.2.2.4. Ensure all classified/sensitive shipments are safeguarded during the receiving, packing, and handling process. Classified/sensitive shipments will not be left unattended/unprotected.

2.2.2.5. Ensure piece count and each item is enclosed in two sealed containers or similar wrappings. If the classified material is an internal component of an item of equipment, the outside shell or body of the item may be a sufficient enclosure if it does not reveal classified information. Specialized shipping containers including closed cargo transporters may also be considered the outer wrapping or cover.

2.2.2.6. Ensure all previous markings on the exterior shipping container are obliterated. No new markings on the exterior container will contain any information indicating the piece is of a classified nature, e.g., security classification marking, or transportation protective service (TPS) required. Note: Maintenance T.O. may require a nomenclature marking on the exterior.

2.2.2.7. Ensure all copies of the shipping document are enclosed inside the exterior container.

2.2.2.8. Ensure all seams and openings are taped.

2.2.2.9. Enter required information into the Cargo Movement Operations System (CMOS) and affix DD Form 1387, *Military Shipment Label,* to cargo. Paper labels other than pressure- sensitive shall be securely affixed with a water-resistant label adhesive or PPP-T-60 waterproof, pressure sensitive tape. PPP-T-60 tape will be placed over the entire surface of the label.

2.2.2.10. Ensure DD Form 1348-1A and DD Form 1149, are complete and accurate, i.e., pieces, weight, cube, etc.

2.2.2.11. Process shipments utilizing a Next Generation Delivery Services (NGDS) contract carrier(s). (Must confirm the Transportation Service Provider (TSP) is authorized to move DoD classified material. Visit the website of approved TSPs. Refer to Defense Transportation Regulation (DTR), Part II, *Cargo Movement*, Chapter 205 for further guidance.) Refer to Transportation Facility Guide instructions for destination requirements.

2.2.2.11.1. The NGDS carrier(s) will be used only when next-day delivery can be provided. This mode WILL NOT be used on Friday unless "Saturday Delivery" has been coordinated with consignee.

2.2.2.11.2. Verify the shipment against the manifest/pickup record before releasing the item to the NDGS carrier.

2.2.2.11.3. Prepare and forward a Report of Shipment (REPSHIP) to consignee immediately after shipment departure per DoD 4500.9-R-Part II, *Cargo Movement*, Chapter 205, Section L, REPSHIP Requirements. For SRC I, SRC II, and Nuclear Weapons Related Material (NWRM) shipments the consignee shall acknowledge the ability to receive before the shipment occurs. If electronic means cannot be transmitted, a telephone REPSHIP will be accomplished with the consignee. This will be documented with the name of the person notified, Defense Switched Network (DSN) number called, date and time called. Shipment documentation will be maintained in the REPSHIP suspense file until shipment completion.

2.2.3. Outbound Cargo Movement will (for classified/sensitive shipments over 150 lbs.).

2.2.3.1. Initiate and utilize the AF Form 4387, *Outbound Transportation Protective Service Material Worksheet* checklist IAW DAFI 24-602V2. Chapter 4, Para 4.8.2. for processing classified/sensitive material.

2.2.3.2. Match DD Forms 1149/1348-1A against shipment to verify proper labeling.

2.2.3.2.1. Prepare shipping documentation using the proper tenders, correct mode and method of transportation, routing notes. Refer to Transportation Facility Guide (TFG) instructions for destination requirements. If the shipment is a hazardous material, use the DD Form 626, *Motor Vehicle Inspection (Transporting Hazardous Materials)*, to inspect carrier vehicle IAW DOD 4500-9-R, Defense Transportation Regulation (DTR), Part II, *Cargo Movement*. For government vehicles transporting AA&E, use the DD Form 2890, *DoD Multimodal Dangerous Goods Declaration*. The inspection can be conducted at any mutually convenient location.

2.2.3.2.2. Release property to the carrier. Utilize two-person concept when handling, shipping, loading, or offloading controlled, sensitive, or classified material.

2.2.3.2.3. Ensure shipping documents, Commercial Bill of Lading (CBL), DD Form 1907, *Signature and Tally Record*, and any other required forms are appropriately signed after checking commercial driver's license(s) and carrier/DOD authorization to carry classified/sensitive material.

2.2.3.2.4. Prepare and forward a REPSHIP to consignee immediately after shipment departure per DOD 4500.9-R-Part II, *Cargo Movement*, Chapter 205, Para. L. If electronic means cannot be transmitted, a telephone REPSHIP will be accomplished with the consignee. This will be documented with name of the person talked to, DSN number, date, and time called. Shipment documentation will be maintained in the REPSHIP

suspense file until shipment completion. Contact the consignee for cargo receipt verification if delivery confirmation is not received within 24 hours of the Required Delivery Date (RDD). If the consignee does not confirm receipt of cargo by RDD, plus two duty days, Documentation Section personnel will initiate a Transportation Discrepancy Report (TDR). If consignee does not respond, then verification may be made through the carrier's electronic signature service via the Defense Transportation Tracking System (DTTS), or the carrier's automated tracking system.

2.2.4. Inbound Cargo will:

2.2.4.1. The JBMDL transportation facility guide directs consignment of DoD freight to 305 APS/TROTD Inbound, 1757 Vandenberg Ave. In-checkers must handle all small package carrier deliveries as classified/sensitive material until security classification is determined. Only authorized personnel are authorized to in-check and receipt for a shipment of classified and protected cargo. If unable to verify shipment contents, shipments must be temporarily placed in cage until verification can be made, not to exceed 24 hours.

2.2.4.1.1. For Military Standard Requisitioning and Issue Procedures (MILSTRIP) and non-MILSTRIP shipments: Packages will be secured by constant monitoring or stored in an authorized storage area until turned over to the customer. Inbound personnel will open each MILSTRIP package as part of the receiving process. Upon identification of a classified item, inbound personnel will initiate and utilize the AF Form 4388, *Inbound Transportation Protective Service Material Worksheet*, checklist for classified material per DAFI 24-602V2, *Cargo Movement*, para 3.2.5.

2.2.4.1.2. The classified/sensitive cargo may be turned over to the consignee after the individual is confirmed on the classified receipt listing/appointment letter. Documentation of the transaction can be via: DD Form 1907; *Inbound Tally Sheet*; *CMOS Inbound Turnover Record*; DD Form 1348-1A; or Integrated Logistics System-Supply (ILS-S), Asset Management.

Chapter 3

AIRCRAFT ENGINE SHIPMENTS

3.1. Scope: This chapter applies to all personnel involved with the processing, packaging, handling, shipment, and receipt of the aircraft engines at Joint Base McGuire-Dix-Lakehurst.

3.2. Movement Routes:

3.2.1. The primary entry to the base for delivery trucks is Checkpoint 9. The only gate authorized for large commercial vehicle entry is Checkpoint 9. In the event the gate is closed, contact 609-754-1303 or LE Desk 609-754-6001 for entry.

3.2.2. Vehicle Inspection: The Checkpoint 9 gate is designated as the base's vehicle inspection station.

3.2.3. Suspicious Vehicle Holding Area: Suspicious vehicles will not be allowed on the installation. If a vehicle is suspicious, contact 87 SFS at 609-754-3938.

3.3. Procedures:

3.3.1. Inbound Engine Shipments:

3.3.1.1. Receipt of Engines from Carrier: 305 APS/TROTD will in-check/receipt for engine IAW directives. If there are no discrepancies, the engine will be downloaded from the carrier's equipment. All engine and engine transportation trailer damage will be reported to the Propulsion Flight before moving the engine. To limit the safety risk, engines will be downloaded at 1757 Vandenberg Ave., using the on-/off-load ramp and 10K AT Forklift. 305 APS/TROTD will notify 305th Maintenance Group (305 MXG) Engine Management (MXMTR) to establish formal receipt and a date/time for pick up IAW DAFI 24-602V2, *Cargo Movement*, Table 3.1.

3.3.2. Outbound Engine Shipments:

3.3.1.2. 305 MXG/MXMTR notifies 305 APS/TROTD of any pending engine movement requirement. 305th Maintenance Squadron Propulsion Flight purges, drains, preserves, wraps, and certifies the Air Force Technical Order (AFTO) Form 20, *Caution and Inspection Record*, and the DD Form 1348-1A with a signed statement that the engine has been prepared for shipment IAW T.O. 2J-1-18, *Preparation for Shipment and Storage of Gas Turbine Engines*, and T.O. 00-85-20, *Engine Shipping Instructions*. 305 MXG/MXMTR prepares the shipping document(s), using the automated DD Form 1348-1A and provides a copy to 305 APS/TROTD. The engine is delivered to 305 APS/TROTD for further processing, labeling, and loading onto carrier equipment for line haul movement. 305 MXG/MXMTR establishes priority/RDD for engine shipment IAW DAFI 24-602V2, *Cargo* Movement, Table 2.1 The Installation Transportation Office will expedite movement IAW the established priority/RDD, as required. TOs must process documentation on aircraft engines for movement according to Technical Order (T.O.) 00-85-20, *Engine Shipment Instructions*, for engine movements. Commercial vehicles moving aircraft engines must have both an air ride tractor and trailer in operating and serviceable condition. At a minimum, Routing Instruction Notes (RINs) 111, 343, and 367 will be printed on the Bill of Lading (BOL). A specific pickup date and time is confirmed as requested by the engine manager. NOTE: Aircraft engine shipments to a Centralized Repair Facility (CRF) are funded by the installation shipping the engine (for CONUS movements only). Refer to DAFI 65-601V1, *Budget Guidance and Procedures*, and the

Second Destination Transportation (SDT) Centrally Managed Account (CMA) Transportation Account Code (TAC) Memorandum.

3.3.3. In-transit Engine Shipments:

3.3.3.1. It is the responsibility of the origin unit to ensure that engines are properly prepared for shipment. 305 APS/TROTD will receipt for the engine from 305 APS/TROC and verify the serial number and shipping data with repairable/serviceable tag. 305 APS/TROTD will inspect for external leaks and proper wrapping/packaging of the engine. 305 APS/TROTD will ensure the DD Form 1384, *Transportation Control and Movement Document* (TCMD), and AFTO 20 are certified, and that the engine has been drained and purged IAW T.O. requirements. 305 APS/TROTD will arrange commercial movement to meet the RDD using carriers with air-ride tractor/trailers. 305 APS/TROTD will prepare all necessary commercial shipping documentation and will load, block, brace and supervise the securing of the engine to the carriers' equipment IAW T.O. shipping instructions.

3.4. When Traffic Management personnel are required to certify item(s) that require special preparation (e.g., munitions, engines, etc.), the item "Technical Specialist" or preparing activity will provide documentation indicating the item is prepared properly for shipment IAW applicable T.O.s, DoD guidance, and Title 49, Code of Federal Regulations (CFR), *Transportation*.

Chapter 4

TEST MEASUREMENT AND DIAGNOSTIC EQUIPMENT (TMDE)

4.1. Scope: This chapter applies to all distribution personnel whose duties involve receiving, processing, handling, and the movement of TMDE.

4.2. Procedures:

4.2.1. TMDE are non-MILSTRIP shipments, usually assigned project code 571. Normally, TMDE shipments are consigned to the destination TO, with the Precision Measurement Equipment Laboratory (PMEL) as the ultimate consignee. Shippers will prepare a DD Form 1149, and each package should have the appropriate PMEL Shipping Label attached. Transportation Account Code (TAC) F8TM and FXTM will pay for return of the TMDE asset from the repair facility to the base and any required OCONUS movement, port handling charges, and intra-inter-theater movements via Defense Travel System. The TMDE coordinator will annotate the DD Form 1149 with the project code and the statement "Recently repaired or calibrated" and TAC F8TM when it is authorized to be used. Wing funds will be utilized when TAC F8TM is not authorized to move the shipment. Refer to DAFI 24-602V2, *Cargo Movement*, Chapter 5.

4.2.2. Receipt of Precision Measurement Equipment Laboratory (PMEL) equipment from carriers will be processed by 305 APS/TROTD personnel. TROTD personnel will in-check/receipt for TMDE equipment IAW directives. 305 APS/TROTD will notify the TMDE coordinator to establish formal receipt and a date/time for pick up IAW DAFI 24-602V2, Table 3.1.

Chapter 5

MATERIAL TRANSFER OF ACCOUNTABILITY

5.1. Scope: This chapter applies to all distribution personnel whose duties involve the transfer of accountability between the Inbound Cargo and Inspection sections.

5.2. Procedures:

5.2.1. The Inbound Cargo section will document the transfer of accountability between the Aerial Port Squadron (APS) Inbound Cargo section and the Logistics Readiness Squadron (LRS) Material Management Inspection section by utilizing a locally developed log. The log will be maintained on the share drive and will be accessible to both Inbound Cargo and Inspection section members. The following will be annotated by Inbound Cargo personnel to track accountability: Transportation Control Number (TCN), National Stock Number (NSN)/part number, nomenclature, quantity, unit of issue, discrepancy, date, and Inbound Cargo member's initials. Once completed, Inbound Cargo personnel will notify the Inspection section and move the cargo to the Inspection section holding area.

5.2.2. The Inspection section will routinely monitor the inspection log and holding area to ensure cargo accountability. After corrective actions have been accomplished the following will be annotated on the log by Inspection personnel: corrective action, date, and Inspection member's initials. Once completed, Inspection personnel will notify the Inbound Cargo section and move the cargo to the Inbound Cargo section holding area for processing.

Chapter 6

SMALL PACKAGE CARRIER ACCOUNTS

6.1 Scope: This chapter applies to all Joint Base McGuire-Dix-Lakehurst units that maintain small package carrier accounts.

6.2 Procedures:

6.2.1. Establishment of small package carrier accounts must be approved in writing by the Transportation Officer for the purpose of transporting official government freight and materials. Each request must provide a valid and documented need to ship official government freight and materials with justification for why APS services are not adequate. If accounts are approved, the TO will train the unit on all responsibilities for tracing, transportation discrepancy reporting, certification of hazardous declarations, custom requirements, and fiscal responsibility for maintaining obligation authority.

6.2.2. Units will send all small package carrier account requests to the 305 APS/TROTD group email box, 305aps.trotd.tmocargo@us.af.mil. Requests will include estimated monthly shipments and a signed justification by section CC or higher. See **Attachment 2** for sample justification letter.

6.2.3. The TO will review the application/justification letter and determine if a new account is needed or if it would be more beneficial for the unit to ship as a rider on the 305 APS account. 305 APS/TROT will maintain financial oversight of the account and manage all Third-Party Payment System (TPPS) requirements and actions for rider accounts.

6.2.4. If approved, training will be provided by the 305 APS/Traffic Management Office (TMO), Packing and Crating Section.

6.2.5. The TO will conduct a biennial review of approved small package Transportation Service Provider (TSP) accounts no later than 30 June of each even year to ensure the intent of the account establishment is valid.

Chapter 7

REUSABLE CONTAINER PROGRAM

7.1. Scope: This chapter applies to all Joint Base McGuire-Dix-Lakehurst units who maintain and store Reusable Containers. Commanders other than LRS/CC or APS/CC will appoint in writing a primary and alternate Unit Reusable Container Monitor (URCM).

7.2. Procedures:

7.2.1. Squadron Commanders are accountable for the effectiveness of the Reusable Container Program, ensuring that all aspects of the program are in line with current AFIs, plus ensuring accountability of containers and understanding that their unit will be required to reimburse the 305 APS if the proper container is not turned in with the property being shipped. This includes but is not limited to, reimbursement and transfer of funds from host/tenant units for packaging services; lost, destroyed, or discarded fast packs, standard packs, Special Packaging Instructions (SPI) shipping containers or packaging materials; labor hours for constructing or replacing SPI containers and commercial transportation (shipping and handling) costs. This gives the installation direct control over the program and accountability.

7.2.2. 305 APS/TROTD will establish procedures for control, recovery/re-use of reusable containers, packaging materials, and reimbursement or prior transfer of funds for packaging costs.

7.2.3. Units will forward an updated Unit Reusable Container Monitor (URCM) appointment letter, see **Attachment 3** for sample letter, signed by designated commander to 305 APS/TROTD, annually at the start of each fiscal year or as changes occur. URCMs will be in the rank of SSgt or above, or civilian equivalent. Appointment letters will contain the primary and alternate URCM's full name and duty phone. Only the primary/alternate URCMs or the Unit Commander can sign the AF Form 451, *Request for Packaging Service*. If primary/alternate representatives are deployed at the same time new representatives will be appointed.

7.2.4. Commanders will ensure that designated URCMs attend training within 2 weeks of appointment. Once training is complete, URCMs will be given access to the Reusable Container Program SharePoint site to maintain a current inventory of their reusable containers.

7.2.5. Commanders will ensure URCMs attend the Reusable Container Program meetings and/or other necessary meetings as required. Commanders will identify and maintain a storage area within their squadron for reusable containers. This area must be covered, clean, and dry to protect reusable containers and packaging materials from inclement weather. If a reusable container is turned in as excess and not redistributed, it will become part of the 305 APS/TROTD bench stock. NOTE: This will not be considered courtesy storage, and these containers may be shipped, reissued, or reused at the discretion of 305 APS/TROTD.

Chapter 8

AFTER HOURS PROCEDURES (999/NMCS/MICAP)

8.1. Scope: This chapter covers procedures for after-hours Mission Impaired Capability Awaiting Parts (MICAP), Not Mission Capable Supply (NMCS), 999, and Maintenance Recovery Team shipments/deliveries. The term "after hours" in this instruction refers to other than normal duty hours (normal duty hours for 305 APS/TROTD are defined as 0730 to 1630; Monday through Friday excluding federal holidays). Standby personnel are assigned for all other hours, to include weekends and holidays.

8.2. Procedures:

8.2.1. The primary entry point to the base for commercial trucks is Checkpoint 9. If Checkpoint 9 is closed and there is a need to receive or ship a MICAP/NMCS/999, the 305 APS/TROTD personnel will call 87 SFS for coordination. All commercial vehicles will be inspected and, if necessary, escorted to/from the area in which they are loaded/downloaded by 305 APS/TROTD personnel. If Checkpoint 9 systems are down, 87 SFS personnel will inspect the vehicle, contact 305 APS/TROTD personnel to inform them an escort is needed.

8.2.2. **Standby Procedures:** Cargo movement utilizes a stand-by roster to cover after hours operations. The roster is provided to the Air Terminal Operation Center (ATOC). Traffic Management personnel will respond to requests to ship or receive 999/NMCS/MICAP after hours, within 60 minutes.

8.2.3. Inbound MICAP assets will be receipted utilizing ILS-S and transferred to the receiving agency/customer at the earliest opportunity.

8.2.4. Outbound MICAP assets will be packaged and processed IAW priority Uniform Material Movement and Issue Priority System (UMMIPS) time standards and shipped accordingly.

8.2.5. **NGDS MICAPs:** Small package shipments of MICAP/NMCS/999 covered by the Next Generation Delivery Service contract need to be turned over to TMO for shipment prior to 1500 for shipment on the same day. MICAP/NMCS/999 shipments turned over to TMO after 1500 hours will depart the next duty day due to commercial cargo flight availability.

PASSENGER TRAVEL

9.1. Scope: This chapter applies to all Joint Base McGuire-Dix-Lakehurst units who require official travel arrangements.

9.2. Centrally Billed Accounts (CBA):

9.2.1. Traffic Management passenger representative will download the Citi Bank Invoice from the online Citi Bank site no later than 3 days after the end of billing cycle. The invoice is date stamped which starts the clock for prompt payment. Note: If the online invoice is not accessible within three working days after the end of the billing cycle, the TO should contact the Government Travel Card Vendor (GTCV) and request assistance with the online invoice.

9.2.2. The passenger representative, at a minimum, must retain a copy of orders for CBA and either a copy of the ticket, itinerary receipt, Passenger Name Record (PNR), or AF Information Management Tool (IMT) 529, *Request for Air Carrier Services*, and Exception memorandum for each CBA transaction processed. Additional documentation such as justification for non-use of General Services Administration (GSA) Airline City Pair Program fares, Patriot Express mission impact statements, etc. must also be retained. CBA ticketing documentation must be grouped and filed together for reconciliation purposes and forwarded as determined by the supporting Financial Services Office (FSO) and Defense Finance and Accounting Service (DFAS) Field Site.

9.2.3. Once the CBA, saved files, and all transactions are matched, they are ready to complete the package upload to the Air Force Installation Mission Support Center (AFIMSC) SharePoint.

9.2.4. The passenger representative will utilize the Air Force Installation and Mission Support CBA Invoice upload instructions to upload the CBA documents to the AFIMSC SharePoint.

9.3. Leave-In-Conjunction with Official (LICWO):

9.3.1. LICWO travel refers only to travel in connection with TDY. The passenger representative will verify that leave has been approved in the member's TDY orders.

9.3.2. Travelers must schedule all official travel through the Travel Management Company (TMC). However, it is the individual's choice to arrange LICWO/unofficial travel with the TMC if offered. The use of Contract City Pair fares and other GOV (government) fares are forbidden to and from leave locations.

9.3.3. The Local Options for LICWO are as Follows:

9.3.3.1. Once the official ticket has been issued, the traveler will work directly with the TMC to "exchange" the authorized travel for their personal travel request. The TMC may charge a "change fee." Fees and additional costs are paid for by the traveler with personal funds (personal credit/debit card, cash).

9.3.3.2. Travelers will receive a memorandum signed by the Installation Transportation Officer (ITO) stating the maximum reimbursement costs for the official travel, utilizing the non-restricted City Pair fares (YCA) as the cost basis (If YCA is not available, lowest cost airline will be used as the cost comparison basis). All costs above official fares are at member's expense. NOTE: If a travel authorization identifies any location as personal or leave travel, then the authorization must state that any excess costs over the costs for official travel are the traveler's financial responsibility.

9.4. Circuitous Travel:

9.4.1. Circuitous/indirect travel is Permanent Change of Station (PCS) travel to, from or between OCONUS points over an indirect or circuitous route due to personal convenience and therefore all additional costs are at the traveler's personal expense, unless identified as official in the orders.

9.4.2. The passenger travel representative provides the member(s) Military Personnel Section, Approving Official, and Financial Operations the Government constructed cost to assist in the decision-making process. If the normal routing involves Patriot Express travel, TMO will use GSA City Pair Rates to the authorized port and the Air Mobility Command (AMC) Rates for OCONUS Travel.

9.4.3. The passenger representative advises authorized traveler they may self-procure commercial tickets through the TMC. Traveler may not purchase tickets on a Foreign Flag Carrier (Korean Air, British Airways, Asiana Airlines, etc.). Foreign Flag travel will not be reimbursed.

9.4.4. In the rare event that normal routing requires use of a Foreign Flag Carrier, TMO will advise the Military Personnel Flight (MPF) of the leg of travel that a Foreign Flag Carrier is required, and only that portion of the travel may be authorized.

9.5. Unused Ticket Report:

9.5.1 The passenger representative receives refunds/unused tickets on the CBA from the TMC (refund slip, Passenger Name record, and Orders).

9.5.2. The passenger representative will verify ticket refunds against the Citi Bank invoice during the CBA reconciliation process and upload refunds quarterly to the AFIMSC SharePoint utilizing AFIMSC's Unused Ticket Reporting Tool.

9.6. Port Call Procedures:

9.6.1. Members in PCS status traveling OCONUS will contact the passenger travel section to request a port call worksheet (AF IMT 1546, *Passenger Reservation Request*). The Passenger Travel clerk will provide a copy of the port call worksheet and request a copy of the PCS orders. If AMC is available, they will book all eligible passengers onboard.

9.6.2. If Patriot Express is available, the passenger representative will make the reservation in the Global Air Transportation Execution System (GATES) and notify the member of the date and time they should arrive at the Aerial Port of Embarkation/Aerial Port of Debarkation (APOE/APOD) along with the Report No Later Than date and time.

9.6.3. In the event AMC aircraft/flights are not available or do not meet mission needs, the passenger representative will proceed to the next step in order of precedence established in the DTR 4500.9-R, Part I, *Passenger Movement*, and DAFI 24-602V1, *Passenger Movement*.

9.7. After Hours Contact:

9.7.1. The passenger travel section utilizes a stand-by roster to cover after hours operations. The roster is provided to 87 ABW Command Post. The Passenger Travel stand-by is 609-915-4931. Traffic Management personnel have a 60-minute response time to either report or contact customer.

Terms

Classified Receipt Listing—a listing maintained by the 87 LRS Material Management Flight (MMF) listing installation personnel authorized to receive or otherwise handle classified material and supplies.

Explosives—Defined as all ammunition, munitions fillers, demolition material, solid rocket motors, liquid propellants, cartridges, pyrotechnics, mines, bombs, grenades, warheads of all types, explosives elements of ejection and aircrew egress systems, air-launched missiles and those explosive components of missile systems and space systems and assembled kits and devices containing explosive material. Explosives, explosives weight, net weight, and other like terms also refer to the fillers of an explosive item. Fillers may be explosive mixtures, propellants, pyrotechnics, and other toxic substances. This term does not include liquid fuels and oxidizers that are not used with missiles, rockets, and other such weapons or explosive items.

Hazardous Material—A substance or material that has been determined by the Secretary of Transportation to be capable of posing an unreasonable risk to health, safety and property when transported in commerce.

TOP SECRET—Information or material of which unauthorized disclosure reasonably could be expected to cause exceptionally grave damage to national security.

Sensitive Cargo—Arms, ammunition and explosives that are definite threats to public safety and can be used by militant, revolutionary, criminal, or other elements for civil disturbances, domestic unrest, or criminal actions.

Transportation Protective Service (TPS)—A commercial carrier service performed according to DOD standards that provides in-transit physical security for shipments of classified/sensitive cargo.

SMALL PACKAGE CARRIER ACCOUNT JUSTIFICATION

Figure A2.1. Small Package Carrier Account Justification.

RESET FORM

APPLICATION TO ESTABLISH A DOD-CONTRACTED SMALL PACKAGE CARRIER ACCOUNT

REFERENCES: AFI 24-602v2, *Cargo Movement*, and AFI 64-117, *Air Force Government Purchase Card Program*.

PURPOSE: Small package carrier accounts must be established IAW references for shipping government material/property from any alternate pickup location (i.e., not from the base-level Cargo Movement function). DoD personnel/government contractors are not authorized to procure small package carrier services for shipping government material/property without written approval from the installation Transportation Officer (TO). Approved accounts may be limited to specific services. Application expires 2 years from date of approval. A separate application must be submitted for each account requested.

PART I – REQUESTER

A. Requesting Organization/Point of Contact Information:

Organization: | POC Name/Grade:
Address: | Phone (Comm.):
Base/City: Select from Drop-down | POC Email:
State/Prov: Select from drop-down | Postal Code: 5-digit ZIP | Country: Select from drop-down

B. Requested Carrier (ONE per application)

Request a designated alternate pickup location with the selected carrier. I have considered best service/value at my installation.

Carrier: Select from drop-down
Acct #: (If known)

C. Requested Services

- ☐ First Overnight* (next day by 0800)
- ☐ Priority Overnight (next day by 1030)
- ☐ Standard Overnight (next day by 1500)
- ☐ Express 2-Day (2nd day by 1630)
- ☐ Express Saver (3rd day by 1500)
- ☐ International shipments
- ☐ Hazardous, classified or sensitive materials
- ☐ Items that are fragile or require special packaging
- ☐ Declared Value/Excess Valuation (See E.10.)
- ☐ Residential/Home Delivery

*NOTE: First Overnight should only be used when severe mission impact circumstances exist.

D. Justification.

Written justification is REQUIRED. A request for an alternate pickup location must clearly support mission requirements. Personal convenience is not a reason to bypass the base-level Cargo Movement function.

Please type justification here

E. Requirements

1. Government Purchase Card (GPC) use is mandatory for all small package shipping.
2. GPC training must be completed and documented.
3. Sufficient funds must be maintained to promptly process invoices and pay for services.
4. Only government rates and services approved by the TO may be utilized.
5. Shipment records must be maintained.
6. Loss and damage claims are filed directly with the carrier.
7. Notify the TO and unit GPC Approving Official when the account is no longer required.
8. Applications must be revalidated every 2 years, and are subject to suspension or deactivation.
9. First Priority Overnight should only be used when severe mission impact exists.
10. Government is self-insured; excess valuation (extra insurance) should only be applied on a case-by-case basis.

F. Acknowledgement.

I acknowledge the requirements above and agree to comply with all prescribed guidance for services approved by the TO for shipment of government material. I understand inappropriate use or abuse of DoD contracted small package carrier services could result in termination of the account, and that I have both fiduciary and pecuniary liability for all transactions associated with the account.
