This instruction implements AFI 32-2001, *Fire and Emergency Services Program*. It establishes policies, procedures and resources for directing the 42d Mission Support Group Fire and Emergency Services Flight to provide Basic Life Support (BLS) level emergency medical service on Maxwell-Gunter AFB. Refer recommended changes and/or corrections to this publication to the Office of Primary Responsibility (OPR) using the AF Form 847, *Recommendation for Change of Publication*, through your chain of command. Requests for waivers to guidance contained in the publication maybe submitted to the 42 MDG/CC. Subordinate units may not issue implementing publications. The 42 MDG/CC must coordinate on draft publications prior to certification and approval. The 42 MDG/CC requires a copy of approved publications. This publication directs collecting information protected by the Privacy Act of 1974 and AFI 33-332, *Privacy Act Program*; authority: 10 U.S.C. 55, 10 U.S.C. 8013, and E.O. 9397. System of Records Notice F044 AF SG E, *Medical Record System*, applies. Ensure all records created as a result of processes prescribed in this publication are maintained in accordance with AFMAN 33-363, *Management of Records*, and disposed of in accordance with the Air Force Records Disposition Schedule. This publication applies to all 42d Air Base Wing Medical, Fire and Emergency Services personnel.

SUMMARY OF CHANGES

This revision: Removed 2.1. The Air Force is responsible for paying ambulance service fees when active duty Air Force members require ambulance services due to an illness or injury. 2.2. Billing for dependents of active duty members, retired personnel or dependents of retired

personnel may be cost shared by the patient under the TRICARE. 2.3. Civilian employees pay for ambulance service, except when it is in response to an on-the-job injury or illness.

1. General.

1.1. In the event of a serious injury or illness, any person can activate an emergency medical service request by calling 911 from any on-base phone or by calling (334) 953-9911 from a cellular phone.

1.2. The 911 system is answered by 42d Fire and Emergency Services Flight (42 CES/CEF) and 42d Security Forces (42 SFS) dispatchers simultaneously.

1.3. No hospital or emergency room is available on Maxwell-Gunter AFB.

1.4. Emergency medical service at Maxwell-Gunter AFB is provided by base contracted ambulance support or 42 CES/CEF (when the contract ambulance is off the installation). Assistance by Montgomery Fire Department is requested through a local mutual aid agreement by 42 CES/CEF personnel for response to Maxwell-Gunter AFB.

1.5. In the event of multiple emergencies, delays in medical services may occur based on response priorities. Response to aircraft emergencies will have priority.

1.6. The 42d Medical Group (42 MDG) Commander or designated physician representative will review and approve standard emergency medical protocols to be used by 42 CES/CEF personnel.

2. Policy.

2.1. The 42 MDG will determine and provide a limited budget for medical supplies and logistical support for 42 CES/CEF to support the emergency medical response mission.

2.2. The 42 MDG will assist 42 CES/CEF in conducting required certification training and learning resources.

3. Responsibility.

3.1. When contacted with a medical emergency, the 42 CES/CEF Flight Dispatcher will immediately dispatch a senior fire officer (SFO) and a first responder vehicle with at least two emergency medical technicians (Basic) to the scene. He or she will coordinate with 42 SFS to escort off-base ambulance crews and/or Montgomery Fire Medics to the scene, if they are requested by the SFO. A contract ambulance service will provide emergency medical service on Maxwell AFB as administered by 42 MDG and 42d Contracting Squadron.

3.2. The 42 SFS dispatcher will dispatch a patrol to the scene of the medical emergency as needed or requested.

3.3. The 42 CES/CEF dispatchers will dispatch base contracted ambulance on all medical emergencies. Important communications will be logged in the official log database.

3.4. Anytime the contracted ambulance service is off site from Maxwell-Gunter AFB, 42 CES/CEF will respond to medical emergencies to provide BLS until more advanced medical services arrive on scene.

3.5. The SFO will request an additional off-base contract ambulance and/or Montgomery Fire Department medics when he/she determines the illness or injury requires advance medical assistance.

3.6. The 42 CES/CEF dispatchers will notify the base command post (and medical control center, if open) when a person is transported via ambulance. The dispatcher will also relay to the hospital where the patient was transported.

3.7. Follow-up on patient status will be solely coordinated by 42 MDG.

3.8. Based on the situation, the SFO may request activation and deployment of 42 MDG mass casualty teams in accordance with Incident Command System procedures and policies.

3.9. Hazardous medical waste will be placed in red Bio Hazard bags or sharps containers and brought to the base clinic for disposal in approved areas. Transportation will be made in a government owned vehicle and materials secured and marked appropriately. Civilian ambulances will dispose of medical waste through their own channels.

3.10. The 42 CES/CEF personnel will use the AF Form 552, *Pre-Hospital Evaluation/Care Report*, to document patient information relevant to emergency calls for assistance. The data is filled in as applicable/other areas filled in are self-explanatory. It is stocked and used by 42 CES/CEF. The completed AF Forms 552 will be immediately forwarded to the 42 MDSS/SGST section for medical review and filing in the approved system of records protecting PII and HIPPA information.

4. Procedures. When an Automated External Defibrillator (AED) is used by the 42 CES/CEF, the SFO will ensure the crew leader completes Maxwell AFB Form 13, *Event Summary Sheet*. The SFO will immediately take control of the AED, remove it from service, clean and ensure it's turned into the 42 MDG Medical Equipment Unit for downloading. AED replacement items will be ordered immediately and the unit provided to the 42 MDG, Medical Equipment Management Unit. All efforts will center on ensuring the AED unit is serviceable and is immediately returned to service.

PATRICK J. CARLEY, Colonel, USAF
Commander
