BY ORDER OF THE SECRETARY OF THE AIR FORCE

AIR FORCE MANUAL 10-3500
Volume 1
3 JUNE 2025

Operations

AFSPECWAR TRAINING PROGRAM

COMPLIANCE WITH THIS PUBLICATION IS MANDATORY

ACCESSIBILITY: This publication is available for downloading or ordering on the e-Publishing website at www.e-Publishing.af.mil.

RELEASABILITY: There are no releasability restrictions on this publication.

OPR: AF/A3S | Certified by: AF/A3S
Supersedes: AFMAN 10-3500V1, 1 June 2022 | Pages: 73

This manual implements Department of the Air Force Policy (DAFPD) 10-35, *Air Force Special Warfare*. It provides guidance and procedures on training for Air Force Special Warfare (AFSPECWAR) Airmen. This publication applies to individuals at all levels with a 19ZXX, 1ZXXX, or 1T0XX Air Force Specialty Code (AFSC), including the Air Force Reserve (AFR) and Air National Guard (ANG), except where noted otherwise. This publication applies to all AFSPECWAR assigned civilian employees. 1T0 personnel are subject to this publication only when assigned to an AFSPECWAR organization, to include Rescue Squadrons, Special Tactics Squadrons, and Air Support Operations Squadrons. The Air Reserve Components (ARCs) are the reserve forces of the United States Air Force (USAF), consisting of the AFR and the ANG. This publication does not apply to the United States Space Force. It consolidates Air Force Specialties (AFSs) 1Z1 (Pararescue (PJ)), 1Z2 (Combat Control (CCT)), 1Z3 (Tactical Air Control Party (TACP)), 1Z4 (Special Reconnaissance (SR)), 1T0 (SERE Specialist (SERE)), 19ZXA (Special Tactics Officer (STO)), 19ZXB (TACP Officer) and 19ZXC (Combat Rescue Officer) training programs into a single document. This publication fulfills the role of an Air Force Manual (AFMAN) 11-2MDS Volume 1 for AFSPECWAR non-rated aircrew as directed by AFMAN 11-202, Volume 1, *Aircrew Training*. This publication requires the collection and/or maintenance of information protected by the Privacy Act of 1974 authorized by Title 10 United States Code Section 9013, *Secretary of the Air Force;* and Title 37 United States Code Section 301a, *Incentive Pay*. The applicable system of records notice FO11 AF XOA, Aviation Resource Management Systems, is available at: https://dpcld.defense.gov/privacy/SORNS.aspx. Ensure all records generated as a result of processes prescribed in this publication adhere to Air Force Instruction (AFI) 33-322, *Records Management and Information Governance Program*, and are disposed in accordance with the Air Force Records Disposition Schedule, which is located in the Air Force Records Information Management System. Refer recommended changes and questions about this publication to the office of primary responsibility (OPR) using the Department of the

Air Force (DAF) Form 847, *Recommendation for Change of Publication*; route DAF Forms 847 from the field through the appropriate functional chain of command. This publication may be supplemented at any level, but all supplements must be routed to the OPR of this publication for coordination prior to certification and approval. Send supplements to Air Force Special Warfare Directorate, Deputy Chief of Staff for Operations (AF/A3S) at AF.A3S.Workflow@us.af.mil. The authorities to waive wing/unit level requirements in this publication are identified with a tier ("T-0, T-1, T-2, T-3") number following the compliance statement. See Department of the Air Force Manual (DAFMAN) 90-161, *Publishing Processes and Procedures*, for a description of the authorities associated with the tier numbers. Submit requests for waivers through the chain of command to the appropriate tier waiver approval authority, or alternately, as directed in **paragraph 1.5** for non-tiered compliance items. Compliance with the attachments in this publication is mandatory. The use of the name or mark of any specific manufacturer, commercial product, commodity, or service in this publication does not imply endorsement by the DAF.

SUMMARY OF CHANGES

This publication has been substantially revised and should be reviewed in its entirety. Changes include: the inclusion of the 1T0 SERE Specialists when assigned to AFSPECWAR organizations; the revision and updates to Combat Mission Ready (CMR), **Table A2.1**; and Continuation Training and Associated Currency Requirements, **Table A2.2**. The update recognizes the new AF/A3S created Instructor Qualification Training Program (QTP) and provides additional guidance for the repository of AF/A3S publications on the AFSPECWAR SharePoint.

Chapter 1

GENERAL INFORMATION

1.1. Overview. This manual establishes the training program for all AFSPECWAR Airmen, creating a framework that accommodates the unique requirements of AFSPECWAR training while leveraging proven elements from the Department of the Air Force Instruction (DAFI) 36-2670, *Total Force Development*; DAFMAN 36-2689, *Training Program;* and AFMAN 11-202V1. It establishes requirements for training and outlines currency and proficiency standards.

1.1.1. The overall objective is to develop and maintain a high state of mission readiness to facilitate immediate and effective employment in exercises and across the range of military operations. Though not all inclusive, training should be structured to provide mission capability based on employment concepts identified in the unit's Designed Operational Capability (DOC) statement and approved unit mission essential task list (METL).

1.1.2. Units design training missions to achieve combat capability in squadron tasked roles, maintain proficiency (as defined in the specific career field education and training plans (CFETPs)), and enhance mission accomplishment and safety.

1.2. Key Terms and Definitions.

1.2.1. AFSPECWAR Collaborative Site. The AFSPECWAR SharePoint site, which is maintained by AF/A3S, is a repository for all AF/A3S created publications and a source for AFSPECWAR information.

1.2.2. AFSPECWAR Operators. The term AFSPECWAR operator is restricted to members who hold a Control AFSC of 1ZXXX or 19ZXX, not the overarching AFSPECWAR enterprise.

1.2.3. Operations Group (OG). OG is used as a generic term used to encompass Air Support Operations Groups, Rescue Groups, Special Operations Groups, Special Tactics Groups, and the Special Warfare Training Group.

1.2.4. Formal Training Units (FTUs). FTUs are the Guardian Angel (GA) FTU (68th Rescue Squadron), the Special Tactics Training Squadron, and the TACP FTU (6th Combat Training Squadron, Detachment 2).

1.2.5. Readiness Tasking Message (RTM). An RTM is a message sent from the major command (MAJCOM) to all subordinate units with operators assigned. It lists the task events and full mission profiles (FMPs) required to sustain CMR status. **Note:** When applicable, Mission Qualification Training (MQT) is also required for Basic Mission Capable (BMC) status as defined in the prescribing publication(s).

1.2.6. Instructor. An AFSPECWAR operator who is qualified in accordance with **Chapter 5** and the Instructor QTP to conduct task training and certification for any task on which they are trained and current.

1.2.7. Trainer and Certifier. A member other than an AFSPECWAR operator who is certified to conduct and document training on CFETP tasks that they are current and certified or qualified to perform. At a minimum, they must meet all requirements for trainers listed in DAFMAN 36-2689, complete a MAJCOM-approved trainer upgrade, and be designated by the commander. (**T-1**) For the purposes of this document, references to instructors also apply when the task is being trained by a trainer.

1.2.8. Certification. Procedure used to document competency in a particular task. Certification is accomplished through completion of instruction with a DAF Form 623A, *On-the-Job Training (OJT) Record Continuation Sheet;* or DAF Form 797, *Job Qualification Standard Continuation/Command JQS*. Certifiers designated by the commander may also complete an Air Force (AF) Form 1035, *AFSPECWAR Evaluation Form,* in a particular task.

1.2.9. Qualification. Designation arising from graduating an approved course or a successful evaluation, documented on an AF Form 1035 that allows a member to perform specified duties.

1.3. AFSPECWAR Operator Utilization. Reference DAFI 36-2606, *Reenlistment and Extension of Enlistment*, for utilization restrictions of Selective Reenlistment Bonus recipients. **Note:** DAFI 36-2606 states duties may not be performed outside the Selective Reenlistment Bonus specialty for more than 90 combined days in a 360-day period. See DAFI 36-2606 for detailed guidance.

1.4. Training While Medically Restricted. While medically restricted, operators may conduct, and log training events not prohibited by the medical restriction. AFSPECWAR operators are entitled to Special Warfare Skill Incentive Pay (SWSIP) and special duty incentive pay for up to 365 days while in “down” status. Operators will not be temporarily returned to “up” status for the purpose of SWSIP or Special Duty pay. **(T-1)**

1.4.1. Duty Limiting Conditions, either temporary or permanent, will be annotated and communicated via AF Form 469, *Duty Limiting Condition Report*, and Department of Defense (DD) Form 2992, *Medical Recommendation for Flying or Special Operational Duty*, from medical authorities to commanders as defined by DAFMAN 48-123, *Medical Examinations and Standards*; the Medical Standards Directory (MSD); and AFI 48-133, *Duty Limiting Conditions*. An AF Form 469 outlines limitations, duration, and impact on duties not including Fly, Jump, Controlling, or Alert for all personnel. For conditions that may limit Fly, Jump, Controlling, or Alert, an individual is placed on “down” status when a competent medical authority, as designated by the Air Force Surgeon General marks block 12 on DD Form 2992. An operator will also be placed on “down” status for an expired annual Preventative Health Assessment (PHA). **(T-1)**

1.4.2. Returning personnel to "up" status is restricted to aeromedical providers qualified in accordance with AFMAN 48-149, *Flight and Operational Medicine Program (FOMP)*. Additionally, AFSPECWAR operators may work with a qualified aeromedical provider to annotate on their DD Form 2992 which duties may be performed while on "down" status, as these operators might be able to safely train on specific tasks or in a simulator environment, depending on their medical illness or injury. However, operators must not control live aircraft while in a live-virtual or live-virtual-constructive simulator environment while in down status. **(T-2)**

1.5. Waiver Authority. Unless otherwise specified, AF/A3S is the waiver authority for the provisions of this publication. Submit waiver requests through the appropriate chain of command using DAF Form 679, *Department of the Air Force Publication Compliance Item Waiver Request/Approval*. **Note:** All blanket waivers require AF/A3S coordination.

Chapter 2

ROLES AND RESPONSIBILITIES

2.1. The Deputy Chief of Staff, Operations (AF/A3), through AF/A3S. AF/A3S will:

2.1.1. Develop and standardize training guidance and procedures in coordination with all commands to which operators are assigned.

2.1.2. Participate in using MAJCOM Realistic Training Review Boards to collect data pertinent to policy & guidance updates.

2.1.3. Coordinate and oversee the development of career field Specialty Training Standards and associated tasks, conditions, and standards (TCSs) for the 1Z, 1T0, and 19Z career fields.

2.1.4. Fulfill all Headquarters Air Force (HAF) functional area manager duties outlined in AFI 10-201, *Force Readiness Reporting*, for AFSPECWAR.

2.1.5. Coordinate and publish standardized requirements for MQT, syllabus of instruction (SOI), or any other applicable courses of instruction derived from the 1Z, 1T0, and 19Z CFETPs. **Note:** Published documents will be posted on the AFSPECWAR collaborative site.

2.1.6. Coordinate revisions to DAFMAN 36-2689 and AFMAN 11-202V1 to ensure AFSPECWAR unique requirements are addressed and implemented.

2.1.7. Coordinate with MAJCOM training functions to develop the Air Force level AFSPECWAR training Self-Assessment Checklist and upload to the Management Internal Control Toolset as specified in DAFI 90-302, *The Inspection System of the Department of the Air Force*.

2.1.8. Designate above-MAJCOM-level key staff positions, as required. Active evaluators may not be designated as key staff. See **Note 3** on **Table A2.1** for key staff requirements.

2.1.9. Act as the primary interface with other service agencies to coordinate, publish, and distribute all applicable joint publications and periodicals pertaining to AFSPECWAR operations tactics, techniques, and procedures (TTPs), and authorized equipment. **Exception:** Air Force Special Operations Command (AFSOC) has direct liaison authority to coordinate with United States Special Operations Command (USSOCOM) and USSOCOM components.

2.2. Major Command/A3 (MAJCOM/A3). MAJCOM/A3s may delegate responsibilities outlined in this paragraph to the MAJCOM Functional Manager (MFM). MAJCOM/A3s will:

2.2.1. Process all DAF Form 847 change requests for this volume.

2.2.2. Assist in the development of standardized requirements for MQT, SOIs, or any other applicable courses of instruction derived from the 1Z, 1T0, and 19Z CFETPs.

2.2.3. Review, modify as needed, and approve the unit developed, Numbered Air Force or wing submitted RTMs. **Note:** RTM approval may be delegated to the wing commander (WG/CC).

2.2.4. Review unit Risk Management (RM) programs, as specified in AFI 90-802, *Risk Management.*

2.2.5. Review subordinate unit supplements and training programs when published and when a supplement's parent publication is superseded.

2.2.6. Develop MAJCOM master Job Qualification Standard (JQS) supplement, as required.

2.2.7. Assist AF/A3S in the development of CFETPs, TCSs, and AF METLs.

2.2.8. Review unit METLs, when published, annually.

2.2.9. Develop supplemental MAJCOM Initial Qualification Training (IQT) and MQT requirements, as necessary.

2.2.10. Forecast formal training quotas/requirements for AFSPECWAR training through MAJCOM Mission Readiness Training Program (e.g., Basic Airborne Course, Military Freefall course).

2.2.11. Designate MAJCOM level key staff positions, as required. Approved key staff designation below the MAJCOM staff function is the FTU instructor cadre, Air Education Training Command (AETC) instructor cadre, and the Special Operations Center for Medical Integration and Development (SOCMID) instructor cadres. See **Table A2.1**, **Note 3** for key staff requirements. **Note:** Active evaluators may not be designated as key staff.

2.3. Wing Commanders (WG/CC). WG/CCs will:

2.3.1. Ensure training objectives are met.

2.3.2. Assist subordinate units in management of training programs.

2.3.3. Ensure agreements are in place between AFSPECWAR units and supporting units/agencies to support training.

2.3.4. Review, modify as needed, approve, and forward the unit-developed, group-submitted RTMs.

2.3.5. Designate as necessary those key staff members that are operating with duties above the squadron level, or at a non-operational unit.

2.4. Operation Group Commanders (OG/CC). OG/CCs will:

2.4.1. Assist units in implementing and managing training programs to meet readiness requirements.

2.4.2. Ensure the establishment and maintenance of agreements between AFSPECWAR units and supporting units/agencies (e.g., operational support squadrons, base agencies, training ranges, and flying units) to support AFSPECWAR training and capture associated resource requirements.

2.4.3. Review, modify as needed, approve, and forward the unit-developed RTMs.

2.5. Unit Commanders. Unit commanders will:

2.5.1. Ensure training programs are mission focused and based on unit METLs.

2.5.2. Ensure all training is conducted safely and in accordance with applicable directives.

2.5.3. Implement and use RM principles at all levels of operations within the unit and ensure proper RM documentation for all operations, missions, and activities in accordance with AFI 90-802.

2.5.4. Initiate and approve changes to SWSIP on DAF Form 2096, *Classification/On-the-Job-Training Action*.

2.5.5. Designate instructors in writing (e.g., appointment letter, Letter of Xs (LOXs)).

2.5.6. Designate unit trainers and certifiers in writing (e.g., appointment letter, LOX).

2.5.7. Designate a Unit Training Manager (UTM) or Additional Duty Unit Training Manager and any Specialized Training Program Managers in writing.

2.6. Unit Director of Operations (SQ/DO). SQ/DOs will:

2.6.1. Oversee the scheduling, execution, and documentation of training events to ensure METL and TCS objectives are achieved.

2.6.2. Set upgrade training priorities based on mission requirements and this manual.

2.6.3. Chair recurring (e.g., quarterly, Force Generation cycle aligned) training boards.

2.6.4. Determine training objectives in support of METLs and TCSs.

2.6.5. Ensure an effective go/no-go system that verifies only current and qualified personnel (or members under the oversight of current and qualified instructors) are authorized to execute training events.

2.7. Unit Training Managers (UTMs). In addition to the requirements in DAFMAN 36-2689, UTMs will:

2.7.1. Standardize all individual training records in accordance with DAFMAN 36-2689, Chapter 5, paragraph 5.3, Training Forms and Documentation.

2.7.2. Maintain a copy of the MAJCOM (if published) and unit (if published) master JQSs.

2.7.3. Assist instructors, supervisors, and operators with the Special Warfare "Anytime Feedback" mechanism when a task is identified that was not trained to the 3-level standard, or to provide other AETC formal course feedback. This should be accomplished within 90 days of the individual arriving on station after completing the formal course(s). The "Anytime Feedback" can be completed by calling or texting the Special Warfare Training Group Training Evaluation office (SWTG/TGE) customer service information line, (210) 845-9088 or visiting https://app.suggestionox.com/r/swtg736.

2.7.4. Verify SWSIP tier level on the DAF Form 2096.

2.8. Specialized Unit Training Program Managers (PMs). Specialized unit training PMs will:

2.8.1. Hold (or have held) an advanced qualification or certification in the program they are managing. Established training programs will be executed in accordance with respective guidance (e.g., Joint Terminal Attack Controller (JTAC) program, Small Unmanned Aircraft Systems (sUAS) program, dive program, mountain program).

2.8.2. Manage specialized training programs not currently governed by an Air Force publication in accordance with **paragraph 3.7**.

2.8.3. Maintain currency requirements in all applicable qualifications and skills for their program.

2.8.4. Provide Plan of Instruction or syllabi for specialized training upgrades, certifications, or proficiency training that have observable and measurable training objectives and evaluations standards.

2.8.5. Assist UTM, Squadron Aircrew Resource Manager (SARM), and supervisors in ensuring documentation of training is completed in individual Airman's training folders in accordance with DAFMAN 36-2689, Chapter 5.3.

2.8.6. Where applicable, assist unit Weapons and Tactics training personnel with development of training mission profiles that incorporate the specialized training discipline. This training should be complementary to mission profiles and not done as a part task training when able.

2.8.7. Coordinate with the Unit Stan/Eval (CCV) to report specialized program training trend data to the squadron commander (SQ/CC) and SQ/DO with the use of squadron Standards and Evaluation Boards (SEBs).

2.8.8. Medical Training Coordinator (MTC). MTCs are required in units with Pararescue (PJ) specialists assigned but are otherwise optional. **Note:** An Independent Duty Medical Technician with Special Experience Identifier 496 is best qualified to perform these duties, if available. AETC units may use MTC assigned to aligned Human Performance Support units. MTC will:

2.8.8.1. Oversee the unit's Tactical Combat Casualty Care (TCCC) training program.

2.8.8.2. Ensure each assigned National Registry Paramedic (NRP) certified member has a profile established with the National Registry of Emergency Medical Technicians (NREMT) (https://nremt.org/) and is affiliated with SOCMID.

2.8.8.3. Review each assigned NRP certified member's profile for progress toward recertification requirements annually. **Note:** Annual reviews are recommended at least six months prior to the 31 March recertification date to ensure adequate time.

2.8.8.4. Coordinate with operations and flight leadership to ensure all recertification training requirements are completed and submitted by 31 March of the year the NRP certification is programmed to expire.

2.8.8.5. Coordinate with operations and flight leadership to ensure required medical training is programmed into unit training plans.

2.8.8.6. Draft and submit a semi-annual report to the MFM identifying medical training and equipment deficiencies.

2.8.8.7. Be the unit focal point for coordinating memoranda of understanding (MOU) with military treatment facilities or appropriate civilian medical facilities as necessary to accomplish medical training. **Note:** AFMAN 41-108, *Training Affiliation Agreement Program*, identifies MOU requirements. MOUs will identify all training requirements of the host military treatment facility and ensure continuity of the program. A flowchart outlining the MOU process is available on the AFSPECWAR collaborative site.

2.9. Squadron Aviation Resource Manager (SARM). In addition to requirements within AFMAN 11-421, *Aviation Resource Management,* the SARM will:

2.9.1. Review Air Resource Tool Enterprise Mission Information System (ARTEMIS) or utilized tracking system products to ensure only current and qualified personnel are assigned to execute training requirements.

2.9.2. Input and track all AFSPECWAR currencies mandated by this manual and task items reflected in the MAJCOM RTM.

2.9.3. Send a copy of the DAF Form 2096 to the Host Aviation Resource Manager office to be filed as a source document in the Jump Record Folder.

2.10. AFSPECWAR Instructors. Instructors will:

2.10.1. Be qualified in accordance with **Chapter 5** of this manual.

2.10.2. Meet all instructor evaluation requirements listed in AFMAN 10-3500, Volume 2, *AFSPECWAR Standardization and Evaluation*.

2.10.3. Review courseware and contents of applicable training plans before giving instruction. Also review student training records, to include records of counseling or progress indicators, prior to performing each training session. Additionally, ensure pre-mission coordination is completed to include respective operations/scheduling documentation.

2.10.4. Review and provide feedback to the SQ/DO on unit courseware and training plans to ensure requirements meet the standards outlined in relevant governing documents.

2.10.5. Conduct pre-mission training, briefs and post-mission debriefs.

2.10.6. Ensure required training items are completed in accordance with TCS or applicable SOI.

2.10.7. Ensure training is executed safely and appropriate RM steps are followed.

2.10.8. Document all accomplished training in the member's DAF Form 623, *Individual Training Record Folder,* and/or an approved system of record.

2.10.9. Use the Special Warfare "Anytime Feedback" mechanism when a task is identified that was not trained to the 3-level standard, or to provide other AETC formal course feedback. See **paragraph 2.7.3**.

2.11. Supervisors. Supervisors will:

2.11.1. Review training records for completion, identify training deficiencies, and route recommended courses of action to the operations section for resolution.

2.11.2. Ensure compliance with on-the-job training (OJT) responsibilities in accordance with DAFMAN 36-2689, AFS CFETP, and this manual.

2.12. AFSPECWAR Operators. Operators will:

2.12.1. Review and sign all accomplished and documented ground and flight training and track completed and remaining CFETP line items.

2.12.2. Provide feedback on training events to respective instructor and supervisor to clarify any concepts, techniques, and processes requiring more training.

2.12.3. Only participate in events or tasks in which they are trained and current, certified, or qualified, or receiving training to become current, certified, or qualified.

2.12.4. If NRP certified, established a profile with the NREMT (https://nremt.org/) and affiliate with the "SOCMID" and update recertification documentation as training is accomplished.

Chapter 3

QUALIFICATION TRAINING

3.1. Initial Qualification Training (IQT). AFSPECWAR IQT requirements are completed during the AFS' respective AETC apprentice courses. Graduates of IQT formal course training will be proficient in all 3-level tasks as indicated by the career field specialty training standards. **(T-1) Note:** This does not include specific qualifications (e.g., JTAC qualification).

3.2. Local In-Processing. Gaining units will establish OJT records for operators arriving after completion of IQT and determine remaining local in-processing requirements in accordance with **Table A2.2** for all newly assigned operators.

3.3. Mission Qualification Training (MQT). MQT is the training needed to qualify operators to accomplish a unit's mission essential tasks. These items may be prescribed by either functional or command channels. Operators must complete MQT as a prerequisite for attaining CMR (and BMC when applicable). **(T-2) Note:** With OG/CC concurrence, operators may perform missions in support of civil authorities, humanitarian assistance, and other non-combat contingencies prior to MQT completion provided the member is trained and current for events to be performed.

3.4. 1Z Skill Level Upgrade Training (UGT). 1Z skill-level UGT is designed to increase AFSPECWAR skills. Specified 1T0 UGT requirements will be tailored to increase AFSPECWAR skills, when assigned. AFS UGT requirements are outlined in this manual, DAFMAN 36-2689 and AFMAN 36-2100, *Military Utilization and Classification*.

3.4.1. 1Z members must complete all mandatory training requirements outlined in their respective AFS CFETP for award of the 3-, 5-, 7-, and 9-skill levels. **(T-1)**

3.4.2. Tactical Enlisted Leader Qualification. Operators will complete the training in accordance with the AF/A3S Tactical Enlisted Leader QTP. **(T-2) Note:** A prerequisite for Tactical Enlisted Leader is qualification as an AFSPECWAR Instructor.

3.5. 19Z Upgrade Training (UGT). 19Zs must complete all mandatory training requirements as outlined in this manual, AFMAN 36-2100, the 19Z CFETP, and MAJCOM SOIs (if applicable) for award of the 2, 3, and 4-skill levels. **(T-1)**

3.6. On-the-Job Training (OJT) Certification. Operators generally do not require third party certification on tasks listed in their respective training records. There is, however, a small set of skills which may require further certification before operators may perform them unsupervised. These skills are identified by the respective career field managers in the specific AFS CFETP and certified by an instructor or trainer that meets the DAFMAN 36-2689 requirements as a certifier.

3.7. Specialized Training Programs. Specialized training (e.g., sensitive activities, alternate insertion, and extraction (AIE)) is conducted in accordance with AF/A3S, and MAJCOM

approved, or unit specific SOIs.

3.7.1. AF/A3S approved SOIs and QTPs are available on the AFSPECWAR collaborative site.

3.7.2. MAJCOM approved training SOIs will be forwarded to AF/A3S for awareness and inclusion on the AFSPECWAR collaborative site. **(T-1)**

3.7.3. Unit specific training SOIs will be forwarded to the unit's MAJCOM and weapon system lead agent for awareness and best practices considerations.

Chapter 4

CONTINUATION TRAINING (CT)

4.1. General. Continuation training items define the standards needed to maintain CMR and currency on tasks which they are trained. **Table A2.1** prescribes the minimum continuation training requirements for each AFSC. **Table A2.2** lists additional training items that may be completed based on mission analysis. These requirements define what is needed to maintain currency and do not equate to proficiency.

4.1.1. The RTM is the MAJCOM approved list of FMPs and additional task events from **Table A2.2** required to maintain unit specific CMR status. **Note:** RTM approval authority may be delegated to the WG/CC in accordance with **paragraph 2.2.3**. RTM development is initiated at the unit level by:

4.1.1.1. Reviewing assigned METLs and TCSs.

4.1.1.2. Performing mission analysis of upcoming taskings.

4.1.1.3. Identifying FMPs and additional training tasks from **Table A2.2**, along with any increase in frequency and/or quantity that are necessary to mitigate identified risks and develop a mission-ready force.

4.1.1.4. Forwarding the mission analysis and recommended FMPs and training tasks up the Chain of Command for validation.

4.1.1.5. Echelons of command above the unit review, modify as required, validate the unit's recommendations, and submit to the MAJCOM for approval.

4.1.1.6. The MAJCOM receives the submissions, reviews, modifies as required and updates the RTM to reflect the adjudicated FMPs and additional tasks required for each unit's members to achieve CMR.

4.1.1.7. The MAJCOM will maintain all approved RTMs. **(T-2)**

4.1.2. CMR. Status of satisfactorily completing the specified qualification/certification training and maintenance of the minimum currencies to fulfill AFS worldwide combat deployment requirements. A member is considered CMR after completion of IQT, MQT, and maintaining training frequency in accordance with **Table A2.1** and the RTM.

4.1.3. Non-Combat Mission Ready (N-CMR). N-CMR status results from not meeting all requirements listed in **paragraph 4.1.2**. Unless noted, CMR currencies are go/no-go for the individual currency event only and operators may conduct training on any other qualified/current training items. N-CMR status will disqualify operators from combat deployments. **(T-2) Note:** The tier waiver authority may waive the requirement for CMR

status for combat deployments, but this waiver does not waive the requirement to undertake any of the CMR requirements in **Table A2.1**.

4.1.4. Non-Training (NT). NT status results from not meeting designated requirements. No AFSPECWAR training events will be conducted until requirements are met. **(T-3) Note:** The tier waiver authority may waive the requirement for NT status for AFSPECWAR training events, but this waiver does not waive the requirement to undertake any of the NT requirements in **Table A2.1**. NT waiver may not be delegated lower than the wing commander. NT currencies are go/no-go items for all training events except those necessary to prepare for and regain currency in the event driving NT status. **Note:** AFSPECWAR personnel who are in NT status may still conduct training items aligned with classroom instruction, computer-based training, and/or simulated training events (includes simulator training). Identified training events are permitted so long as it does not conflict with a member's existing medical waiver, profile, or exemptions.

4.2. Currency Requirements. Currency is a defined frequency that maintains qualification/certification in accordance with documented level of training. **Attachment 2** prescribes currency requirements for all operators.

4.2.1. Frequency Exceeded. If an event's frequency is exceeded, that event may not be performed except for the purpose of regaining currency. Currency will be regained under supervision of an instructor who is current in the same task and qualified to the same or greater level required by the CFETP. **(T-2)**

4.2.2. Grace Period. Members trained in tasks with a periodic currency are considered non-current but trained to the specified level in the event until 181 days following the expiration of the currency. **Note:** Unless directed otherwise by Department of Defense publication. After this period, the member must be retrained in accordance with a SQ/CC directed retraining, recertification, or requalification program. **(T-3)** Qualification events require the completion of all evaluations for the event in question in accordance with AFMAN 10-3500V2. **(T-2)** The SQ/CC may approve adjustments to the training program based on individual experience level and training requirements. SQ/CC approved training is documented in the individual's DAF Form 623.

4.2.3. Deployment Currency. If a member goes non-current/overdue in any CMR/NT item and has the ability to re-accomplish this task, all efforts will be made to regain currency. If the deployed member is unable or prohibited from regaining the currency due to operational restrictions, the member will remain current through the duration of the deployment. **(T-2)** Upon return, all overdue currencies will be regained in accordance with **paragraph 4.2.1**. This paragraph also applies to members on a geographically restricted alert. **Exception:** See AFMAN 10-3500V2 for evaluation waiver requirements.

4.2.4. Humanitarian Aid Disaster Response/Defense Support of Civil Authorities. AFSPECWAR operators, when authorized may be required to perform missions in support of civil authorities, humanitarian assistance, and other non-combat contingencies. Operators will be current on all AFS Non-Training items listed in **Table A2.1**. Additionally, operators

will be current on any required mission items to be conducted that are listed in **Table A2.2**.
Note: ANG members on Title 32 status during NGB and/or State ordered mobilizations will work go-no-go requirements within **Table A2.1** and **Table A2.2** with individual state authorities and chain of command based on mobilization mission requirements.

Chapter 5

AFSPECWAR INSTRUCTOR QUALIFICATION

5.1. Instructors. Formalized instructor and evaluator programs are a prerequisite for effective training, standardization, and accident prevention.

5.1.1. Instructor. An AFSPECWAR operator who is qualified in accordance with this chapter to conduct task training and certification for any task on which they are trained and current. Instructors will conduct task training/certification only up to the level they hold in each task. **(T-2) Note:** AFSPECWAR operators must be qualified as an instructor to certify tasks within the AFS CFETPs. **(T-2)** To be designated as an instructor, an individual must:

5.1.1.1. Possess a minimum of 12 months experience as a qualified 5-Level AFSPECWAR operator for enlisted and a minimum of 24 months experience as a 19Z3X or previously qualified as an enlisted AFSPECWAR instructor for officers. **(T-3) Exception:** Members qualified as instructors through other formal upgrades (e.g., formal schoolhouse instructor, JTAC Instructor, Small Unmanned Aircraft System-Instructor (sUAS-I), SERE Specialists previously qualified in accordance with DAFI 10-3004, *SERE Program*; and Air Education and Training Command Instruction (AETCI) 36-2604, *Flying Training Instructor Programs,* may be designated as an instructor at the unit commander's discretion.

5.1.1.2. Meet all requirements for trainers/certifiers listed in DAFMAN 36-2689 and complete the AF/A3S Instructor Qualification Training Program (QTP), located on the AFSPECWAR SharePoint. **(T-2)** The AFSPECWAR Instructor QTP outlines how to effectively teach, coach, and mentor all duty areas listed in **Table A2.2** within the unit's DOC statement and METLs.

5.1.1.3. Successfully complete an Instructor (INSTR) evaluation. Guidance for INSTR evaluations is in AFMAN 10-3500V2.

5.1.1.4. Be designated an instructor in writing by the unit commander.

5.1.1.5. Be a member of the Regular Air Force, ANG, AFR, DAF civilian, or contractor. **(T-1)**

5.1.2. DAF civilian and contractor instructors. If DAF civilians and contractors serve as instructors, the following criteria will be met:

5.1.2.1. Previously qualified as an instructor with an AFSPECWAR AFS within the last 24 months. A comprehensive review of the individuals prior service training records and medical status will be conducted prior to finalizing the hiring process.

5.1.2.2. Non-prior AFSPECWAR civilian and contractors will require completion of the AFSPECWAR Instructor (INSTR) QTP under the supervision of a Regular Air Force, ANG, AFR, or DAF civilian instructor.

5.1.2.3. Maintain qualification requirements in accordance with this AFMAN.

5.1.2.4. Restricted to operations in a training environment only.

5.1.2.5. Prohibited from performing AFSPECWAR operator duties in support of combat operations.

5.1.2.6. Complete a 24-month reoccurring INSTR evaluation, which will be administrated by a Regular Air Force, ANG, AFR, or DAF civilian AFSPECWAR evaluator. **(T-1)**

5.2. AFSPECWAR Evaluator. An evaluator is an AFSPECWAR operator who has been designated to conduct AFSPECWAR evaluations. See AFMAN 10-3500V2 for guidance on AFSPECWAR evaluators.

Chapter 6

SIMULATED TRAINING

6.1. General. AFSPECWAR leaders, instructors, and operators should use simulation systems to optimize training to achieve the highest degree of readiness and proficiency or extend currency in events authorizing the use of a simulator for currency. These systems can be physical, virtual, or blended.

6.1.1. Physical simulators are systems that enable the physical movements and actions associated with the execution of a specific task while mitigating specific risks (e.g., vertical wind tunnels).

6.1.2. Virtual simulators provide a computer-generated environment that can be used to replicate scenarios and enable training tasks not achievable in a live training environment. Virtual systems can be networked with other virtual systems over a distributed network to further enhance training.

6.1.3. Blended simulation involves combining multiple forms of live and simulated training to achieve maximum realism and training effectiveness. Types of simulation can be blended for maximum training effectiveness.

Chapter 7

TRAINING DOCUMENTATION

7.1. General. The OJT records meet and satisfy the requirement for individual training records in accordance with DAFMAN 36-2689, and subordinate MAJCOM directives.

7.1.1. The record can be kept digitally through a system of record or hard copy. **Note:** Maintaining both digital and hard copy training records is recommended.

7.1.2. The training folder will reflect all qualifications, certifications, and appointments directed in this manual.

7.2. Record Organization. Training folder organization will be standardized by UTMs as follows: **(T-2) Note:** MFMs may permit Tabs 2 and 3 to be combined if the AFS utilizes a 6-part folder in that MAJCOM.

7.2.1. Tab 1: CFETP. AFS specific CFETP including the career field Specialty Training Standards.

7.2.2. Tab 2: DAF Form 623A, *On-the-Job Training (OJT) Record Continuation Sheet.*

7.2.3. Tab 3: Specialized Training Documentation. The records of specialized training, (e.g., Air Combat Command Form 206, *Individual Mission Grade sheet*; DAF Form 797, *Job Qualification Standard Continuation/Command JQS*; DAF Form 1098, *Special Task Certification and Recurring Training*.

7.2.4. Tab 4: Appointment Letters. The member's current qualification and certification designations. **Note:** A signed LOX indicating appointment may be used as a designation letter. The LOX may be maintained centrally, but at a minimum a current copy will be placed in the member's records prior to a deployment or other action where administrative control of the member is not the member's unit of assignment. **(T-2)**

7.2.5. Tab 5: Evaluation Documentation. Contains all records of formal evaluations. See AFMAN 10-3500V2 for additional information.

7.2.6. Tab 6: Certification and Formal School Documentation. Units will include a copy of any certificates received through completion of training (e.g., Army Airborne, Air Assault, state watercraft operator, etc.). Additionally, UTMs and operators will ensure a copy of any source documentation providing certification to a LOX item will be maintained in Tab 6 (DAF Form 803, *Report of Task Evaluations*; DAF Form 623A; DAF 797; AF Form 1035). **(T-2)**

7.2.7. Tab 7: AFS Specific documentation. (e.g., Pararescue medical training or CCT ATC training).

7.3. Tracking and Documentation.

7.3.1. Tracking 19Z Training. All training, certification, and documentation remains under the CFETP for IQT and upgrade training. The 19Z CFETP, if used as a JQS, is the sole source document for recording all task training.

7.3.2. Tracking 1Z and 1T0 Training. All training, certification, and documentation remains directly under the Enlisted Specialty Training and/or OJT system. The 1Z and 1T0 CFETPs are the sole source document for recording all task training.

7.3.3. AFSPECWAR personnel will document training accomplishments on the AF Form 1522, *ARMS Additional Training Accomplishment Report*, in the designated electronic system of records (e.g., ARTEMIS) or other squadron training accomplishment reporting procedure in accordance with MAJCOM/unit standard operating procedures (SOP). **(T-2)** **Note:** If 1C0XX1 personnel are assigned to the unit, they will ensure this data is uploaded into ARTEMIS. **(T-2)**

7.3.4. Units will use the date of the last equivalent event accomplished to fill in ARTEMIS "Accomplished date" for continuation training requirements. **(T-2)**

7.4. CFETP Waivers and Routing.

7.4.1. Submit waiver requests through the appropriate functional chain using DAF Form 679.

7.4.2. AFSPECWAR Career Field Managers are the waiver authority for all respective CFETP core tasks regardless of unit availability and applicability. **Note:** This requirement is more restrictive than guidance in DAFMAN 36-2689.

7.4.3. AFSPECWAR MFMs are the waiver authority for their respective MAJCOM JQS requirements in accordance with DAFMAN 36-2689.

7.4.4. CCV will maintain waiver logs for one year. **(T-2)** At a minimum, the following waiver information must be tracked and maintained: waiver type, waiver number, approval authority, approval date, expiration date, and a copy of the signed waiver. **(T-2)**

ADRIAN L. SPAIN, Lt Gen, USAF
Deputy Chief of Staff, Operations

Terms
Aeromedical Provider—A health care provider (physician, physician assistant or nurse practitioner) who graduated from the Aerospace Medicine Primary course and carries the AFSC or special identifier. Aeromedical providers are privileged to provide health care to flight and special operational duty personnel in accordance with AFMAN 48-149.

AFSPECWAR Operators—The term AFSPECWAR operator is restricted to members who hold a 1ZXXX or 19ZXX AFSC, not the overarching AFSPECWAR enterprise.

Certification—Procedure used to document competency in a particular task. Not interchangeable with qualification, which requires AF Form 1035 documentation.

Combat Mission Ready (CMR)—Status of satisfactorily completing the specified qualification/certification training and maintenance of the minimum currencies to fulfill AFS worldwide combat deployment requirements. A member is considered CMR after completion of IQT, MQT, and maintaining training frequency in accordance with **Table A2.1** and the RTM.

Competent Medical Authority—Medical personnel authorized by AF/SG to place an Airman in “down” status.

Currency—A measure of how frequently missions, tasks, or events are completed. Currency requirements should ensure the average member maintains a minimum level of proficiency in a given event.

Instructor—An AFSPECWAR operator or other identified personnel who is qualified in accordance with **Chapter 5** and the *Instructor* QTP to conduct task training and certification for any task on which they are trained and current.

Key Staff—Positions that maintain an administrative focus may be designated as key staff by the approved authority directed by this publication. Key staff position minimum requirements to maintain mission qualified are in accordance with **Table A2.1**. Active evaluators will not be

designated as key staff. **(T-1)**

Letter of X—A commander authorized list of current/maintained qualifications and certifications for all unit AFSPECWAR operators and Special Warfare Mission Support personnel. The Letter of X will be updated monthly by CCV when all required documentation is provided and certified. Unit AFSPECWAR operators and Special Warfare Mission Support personnel may not operate in any capacity beyond what they are authorized to on the Letter of X. If the unit AFSPECWAR operators and Special Warfare Mission Support personnel have all required documentation and certifications necessary to conduct duties not currently listed on the Letter of X (ex: prior to Letter of X monthly update) they may do so with unit commander authorization.

Non-CMR (N-CMR)—Status resulting from not meeting all task currencies in **Table A.2.1**. N-CMR status will disqualify operators from combat deployments.

Non-Training (NT)—Status resulting from not meeting currency on the identified NT task items in **Table A2.1**. Operators are not permitted to accomplish AFSPECWAR training without meeting currency on all NT items.

Formal Training Units (FTU)—FTUs are the Guardian Angel (GA) FTU (68th Rescue Squadron), the Special Tactics Training Squadron, and the TACP FTU (6th Combat Training Squadron, Detachment 2).

Operations Group (OG)—OG is used as a generic term used to encompass Air Support Operations Groups, Rescue Groups, Special Operations Groups, Special Tactics Groups, and the Special Warfare Training Group.

Proficiency—Enhanced level of training above basic qualification/certification aimed at reducing risk to force/mission.

Qualification—Designation arising from a successful evaluation, documented on an AF Form 1035 that allows a member to perform specified duties.

Qualified—Operator has satisfactorily completed qualification training and evaluation to perform the specified task or duties. The member must perform at the minimum specified frequency necessary to maintain currency in the qualification or satisfactorily complete a periodic evaluation.

Readiness Tasking Message (RTM)—An RTM is a message sent from the MAJCOM to all subordinate units with operators assigned. It lists the task events and full mission profiles (FMPs) required to sustain Combat Mission Ready (CMR) status. **Note:** When applicable, MQT is also required for BMC status as defined in the prescribing publication(s).

Specialized Training—Training that requires its own training syllabus and cannot be accomplished using a task, condition, and standard (TCS) from a CFETP.

Trainer and Certifier—A member other than an AFSPECWAR operator who is certified to conduct and document training on CFETP tasks that they are current and certified or qualified to perform. At a minimum, they must meet all requirements for trainers listed in DAFMAN 36-2689, complete a MAJCOM approved trainer upgrade, and be designated by the commander. **(T-1)** For the purposes of this document, references to instructors also apply when the task is being trained by a trainer.

Tactical Enlisted Leader—An enlisted AFSPECWAR operator who has completed the *Tactical Enlisted Leader* QTP.

Attachment 2

TRAINING REQUIREMENTS

A2.1. Purpose.

A2.1.1. Operators will be current on all tasks listed in **Table A2.1** for their AFS and meet RTM requirements to be considered CMR. **(T-2)**

A2.1.2. **Table A2.1** identifies the associated NT Task IDs by AFS required for AFSPECWAR personnel to conduct training on AFSPECWAR related training events identified in **Table A2.2** and AFS CFETPs. **Note:** AFSPECWAR personnel who are in NT status associated with the OFT and/or QUAL Eval may still conduct any simulator training and non-AFSPECWAR AF readiness generation training items aligned with; classroom instruction, computer-based training, and/or simulated training events. Identified training events are permitted so long as it does not conflict with a member's existing medical waiver, profile, or exemptions. The tier waiver authority may waive the requirement for NT status for AFSPECWAR training events, but this waiver does not waive the requirement to undertake any of the NT requirements at **Table A2.1**. NT waiver may not be delegated lower than the wing commander.

A2.1.3. **Table A2.2** outlines a "menu" of tasks that AFSPECWAR may be trained in that SARM personnel will track in ARTEMIS and/or the electronic system of record. **(T-2)**

A2.1.3.1. If an AFSPECWAR operator fails to complete the task within the listed frequency, they will be considered non-current on the task and require instructor supervision to perform the task to regain currency. **(T-2)**

A2.1.3.2. Operators who go 181 days overdue on an event with an established periodicity require retraining on the task in accordance with **paragraph 4.2.2**.

A2.2. CMR Requirements and Task Definitions.

Table A2.1. Non-Training (NT) and Combat Mission Ready (CMR) Requirements.

Task ID	Task	Freq.	Prescribing Reference	AFS	Status if non-current*
SW01[1,2]	AFSPECWAR Operator Fitness Test	12 MOs	AFMAN 36-2919, *Air Force Special Warfare Operator Fitness Test*	All	NT
AA01[1]	QUAL Eval (Closed Book)	24 mos	AFMAN 10-3500V2	All	NT
SW02[3]	Preventative Health Assessment	11-15 mos	DAFMAN 48-123 & MSD	All	NT
SW03[3,4]	Tactical Combat Casualty Care (TCCC)	36 mos	DoDI 1322.24, *Medical Readiness Training*	All	NT
PJ01[3,5]	NREMT-P Recertification	24 mos	This manual	1Z1	NT

SW04[6]	Air Force Qualification Course (AFQC)	12 mos	DAMAN 36-2655, *USAF Small Arms and Light Weapons Qualification Programs*	All	N-CMR
SW05[6]	Live Fire Sustainment Training	12 mos	AFI 36-2654, *Combat Arms Program*	All	N-CMR
SW06[3]	Basic Life Support Certification (BLS)	24 mos	American Heart Association ©/Red Cross and this manual	All	N-CMR
SS03	Conduct After Capture (CAC)	36 mos	DAFI 10-3004, *Survival, Evasion, Resistance, and Escape (SERE) Program*	All	N-CMR
AA03[1]	MSN Eval (Employment)	24 mos	AFMAN 10-3500V2	All	N-CMR
PJ02[7]	Pararescue Medical Skills Certification	24 mos	This manual	1Z1	N-CMR
PJ10	Pararescue Medical Skills Refresher	24 mos	This manual	1Z1	N-CMR

Notes:

1. These CMR requirements only pertain to 1T0 personnel assigned to AFSPECWAR units (e.g., Rescue Squadron, Special Tactics Squadron, and Air Support Operations Squadron).

2. Operators who fail the OFT will be due again in 3 months (e.g., if member receives an Unsatisfactory on 15 April, then member's due month is July of the same year). **(T-1)** It is the member's responsibility to ensure they retest before the end of the 3rd month as non-currency begins on 1st calendar day of the 4th month. **Note:** Traditional Reserve (TR), and Drill Status Guardsmen will be due again in 6 months. Operators require commander's approval to test earlier than the 3rd calendar month. **(T-3)** Operators who fail the OFT must take the Air Force Physical Fitness Assessment.

3. Key Staff Minimum Requirements. Individuals in Student, Trainee, or Personnel Holdee (STP) status or filling positions designated in accordance with **paragraph 2.1.8** or **paragraph 2.2.11** are required to complete only these tasks to remain mission qualified. Key staff are only evaluated on tasks for which currency is maintained. Key staff must accomplish all AFS identified events above to regain CMR status. **(T-2)** Key staff must complete all task specific Go/No-Go items prior to training or evaluating the task (e.g., Military Free Fall (MFF) Emergency Procedures (EPs) before a Freefall jump). **(T-2)** Key staff will be current on all AFS NT tasks prior to conducting training or evaluations. **(T-2)**

4. Members must complete TCCC training within 12 months of deployment, Air Reserve Component (ARC) members do not have to meet the 36-month currency but must meet the 12-month pre-deployment currency. **(T-0)**

5. This is a 24-month currency window defined by the National Registry of Emergency Medical Technicians (NREMT) as ending 31 March. Members fall into even or odd year cycles based on their current NRP certification expiration.

6. AFQC and Live Fire Sustainment Training are annual requirements that are offset by six months.
*See **paragraph 4.1** for status definitions.

7. Log training on AF Form 1522 or electronic system of record.

A2.2.1. AFSPECWAR Operator Fitness Test (OFT).

A2.2.1.1. Purpose. Ensure operators achieve and maintain operationally specific physical fitness standards to perform mission requirements.

A2.2.1.2. Description. Operators will complete an Air Force Occupationally Specific Fitness Assessment, AFSPECWAR OFT administered by a commander designee in accordance with AFMAN 36-2919. **(T-1)** Units will utilize the Review Board process outlined in AFMAN 10-3500V2 for all individuals failing to meet OFT standards outlined in AFMAN 36-2919. **(T-3)** Log the OFT on AF Form 4447, *Air Force Special Warfare Operator Fitness Test Scorecard,* and have attached AF Form 4447A*, Air Force Special Warfare Operator Fitness Test Fitness Screening Questionnaire (OFT FSQ)*. Any AFSPECWAR personnel designated as key staff who do not complete the OFT will be required to complete the Air Force Physical Fitness Assessment in accordance with DAFMAN 36-2905, *Department of the Air Force Physical Fitness Program.*

A2.2.1.2.1. AFSPECWAR personnel will be afforded a minimum of two hours of the standard duty day to maintain fitness levels required to perform operational missions. Training and real-world operations require a level of physical fitness above the normal USAF standard.

A2.2.1.2.2. The ability to provide sustained performance coupled with rapid recovery from exertion is critical to successfully execute physically and mentally demanding operational mission profiles.

A2.2.2. QUAL Eval (Closed Book). Reference and complete in accordance with AFMAN 10-3500V2, Chapter 4. **(T-2)**

A2.2.3. Preventative Health Assessment. Complete examination in accordance with DAFMAN 48-123 and the MSD. **Note:** Guidance provided in AFI 48-170, *Periodic Health Assessment,* service members must complete the PHA no earlier than 11 months (10 months, for ARC only) and no later than 15 months from the previous PHA.

A2.2.4. TCCC. 1Z1 operators complete TCCC – Tier 4 (Combat Paramedic), typically as part of their NRP/ATP refresher. All other operators complete TCCC – Tier 2 (Combat Life Saver). **(T-1)**

A2.2.5. National Registry Paramedic (NRP) Recertification.

A2.2.5.1. Purpose. Recertify Paramedics in accordance with the requirements established by the National Registry of Emergency Medical Technicians (NREMT) available on their website (https://nremt.org).

A2.2.5.2. Description. The NREMT's Paramedic National Continued Competency Program (NCCP) requires a total of 60 credits of continuing education to recertify as an

NRP every two years. All credit must be approved by the Air Force State Office of Emergency Medical Services or the Commission on Accreditation for Pre-Hospital Continuing Education. The Air Force State Office of Emergency Medical Services requires accredited programs for Basic Life Support, Advanced Cardiac Life Support, and Pediatric Advanced Life Support in the NCCP credits submitted towards NRP recertification. For currency tracking in ARTEMIS the 24-month recurring due date will be 31 March of the calendar year. **Note:** If a member is also a certified Special Operations-Advanced Tactical Practitioner, that certification will be maintained in accordance with USSOCOM D 350-29, *Special Operations Forces Baseline Interoperable Standards for Medical Training*. **(T-1)**

A2.2.6. Air Force Qualification Course (AFQC). Qualify annually using the specialized qualification course (rifle/carbine and handgun as applicable) or advanced tables/phases/orders of the AFQC.

A2.2.7. Live Fire Sustainment Training. Complete unit live-fire sustainment training on assigned weapons. Units must conduct Live Fire Sustainment Training five to seven months after completion of qualification training to minimize gaps between live fire events. **(T-2)**

A2.2.8. Basic Life Support Certification. Complete and maintain certification in an accredited Basic Life Support program that includes cardiopulmonary resuscitation and automated external defibrillator training.

A2.2.9. Conduct After Capture. Guidance provided in DAFI 10-3004.

A2.2.10. MSN Eval (Employment). Reference and complete in accordance with AFMAN 10-3500V2, Chapter 4.

A2.2.11. Pararescue Medical Skills Certification (MSC).

A2.2.11.1. Purpose. A recertification of a paramedic's ability to provide medical care at a NRP level in accordance with the scenario scoring/grading sheet located in the Pararescue Medical Operations Handbook titled "Pararescue Medical Skills Certification."

A2.2.11.2. Description. The MSC is a 24-month recurring recertification offset 12-months from the NRP Recertification in sync with the Pararescue Medical Skills Refresher (PMSR) ensuring Paramedics are up to NREMT certification standard at least once per year. **(T-3)** The MSC is focused on patient treatment, not tactics, technical rescue, or maneuver/infil/exfil to/from platforms.

A2.2.11.2.1. The medical scenarios used in the MSC will reflect medical care representative of real-world missions.

A2.2.11.2.2. A library of mission reports is available on the AFSPECWAR SharePoint. The MSC is administered by the unit's Medical Director to ensure

continuity of patient care, guidance, and trending medical treatment.

A2.2.11.2.3. Units will utilize the review board process outlined in AFMAN 10-3500V2 for all individuals failing to meet MSC standards outlined in the Pararescue Medical Operations Handbook (PJMOHB). **(T-2) Note:** If the unit Medical Director is unavailable, the MSC can be administered by any individual(s) designated by the unit Medical Director on an appointment letter provided to the Unit Standards and Evaluations (CCV) section.

A2.2.12. Pararescue Medical Skills Refresher (PMSR).

A2.2.12.1. Purpose. The PMSR is a 40-hour training block focused on Pararescue medical care during operationally relevant mission sets aligned to the unit DOC statement and METL. **(T-2)**

A2.2.12.2. Description. The PMSR occurs every 24-months, offset 12-months from the NRP Recertification, in sync with MSC Recertification. **(T-3)** At a minimum, the PMSR will include:

A2.2.12.2.1. Review of tactical need for medical skills in accordance with DAFPD 10-35 and AFTTP 3-3.GA, *Combat Fundamentals.* **(T-3)**

A2.2.12.2.2. Refresh on assembly/operation procedures of all unit assigned medical equipment for use both inside and outside an aircraft. **(T-3)**

A2.2.12.2.3. Refresh on care under fire, tactical field care, extended care, and inflight survivor care/documentation procedures used during operational missions. **(T-2)**

A2.2.12.2.4. Introduction or refresh on additional local procedures (e.g., unit Medical Director specific training requirements). **(T-3)**

A2.2.12.2.5. Review of all PJ Medical and Trauma protocols and selected sections of the PJMOHB. **(T-2)**

A2.2.12.2.6. Initial or refresher training of advanced medical skills that require unit medical director authorization to perform per the PJMOHB. The advanced medical skills requiring unit medical director authorization include fasciotomy, whole blood transfusion, red blood cell transfusion, rapid sequence intubation, and amputation. **(T-2)**

A2.2.12.2.7. At least five realistic situational medical training exercises (or trauma lanes) covering different injuries or illnesses, designed to assess and improve a PJ's individual ability to provide emergency medical/trauma assessment and treatment under simulated mission conditions. **(T-2)** Medical exercises should last no more than 15 minutes and focus on initial or definitive interventions.

A2.2.12.2.8. A minimum of 10 scenarios, based on actual missions, will be provided by the PJ Medical Program Manager, and placed on the medical GA SharePoint® page. **(T-2)** At least one must include a pediatric patient. **(T-2)** Units may develop additional scenarios.

A2.3. Continuation Training Frequency and Tracking. Table A2.2 provides a standardized task list of training items the Aviation Resource Manager community uses to provide a list of task identifiers common across AFSPECWAR for electronic tracking. The codes below are used in **Table A2.2** to annotate administrative CT tracking requirements for 1Z, 1T0 and 19Z AFSs and will be tracked for each member in ARTEMIS or another system of record. **(T-2) Note: Table A2.2** items are not required CT or CMR unless designated as such by a MAJCOM on their RTM.

A2.3.1. T – Track. These are the designated AFS core tasks that are tracked for all members.

A2.3.2. Q – Track when qualified. These are additional AFS tasks that only require tracking for members who are trained in that task.

A2.3.3. The "Minimum Frequency" column indicates the required frequency to maintain currency in the task. The source of that requirement is listed in the "Prescribing Reference" column. If the individual exceeds the specified frequency, complete requalification or recertification requirements in accordance with **paragraph 4.2.2**. **Note:** For tasks with a minimum frequency determined by months, currency on the task is maintained through the last day of the expiration month.

Table A2.2. Continuation Training and Associated Currency Requirements.

#	Task ID	Task	Min Freq.	Prescribing Reference (Remarks)	1Z1	1Z2	1Z3	1Z4	1T0	19ZA	19ZB	19ZC
* = frequency and AFSC requirements will be determined at the MAJCOM if not already directed. † = Exceptions or additional restrictions apply, see description.

A2.4. Continuation Training Task Definitions.

A2.4.1. General.

A2.4.1.1. Local Area Orientation – Mission. Purpose: Provide operators with awareness of the missions associated to their new unit of assignment. This orientation can include but is not limited to review of the unit Mission Capability and the DOC statements.

A2.4.1.2. Local Area Orientation – Range. Purpose: Ensure operators are familiar with local training areas and associated requirements. This requirement equips operators to execute AFSPECWAR training within local ranges and airspace.

A2.4.1.3. SERE Mission Orientation. Guidance provided in DAFI 10-3004.

A2.4.1.4. INSTR Evaluation – Guidance provided in AFMAN 10-3500V2 and **paragraph 5.1.2.6**. **Note:** Instructors assigned to an FTU and designated as "key staff" in accordance with this manual will complete a 24-month reoccurring INSTR evaluation. **(T-2)**

A2.4.2. Alternate Insertion/Extraction Operations.

A2.4.2.1. Fast Rope.

A2.4.2.1.1. Purpose. Ensure operators are able to complete a fast rope insertion using mission equipment.

A2.4.2.1.2. Description. Operators will complete one live fast rope insertion with rucksack and weapon. This event will be designed to provide hands on training with equipment prep and usage, rigging procedures, briefings, and safety procedures used during fast rope insertion operations in accordance with USSOCOM-M 350-6 or AFMAN 10-3511. **(T-3)**

A2.4.2.2. Fast Rope Master.

A2.4.2.2.1. Purpose. Ensure certified operators are able to perform Fast Rope Master duties utilizing prescribed procedures.

A2.4.2.2.2. Description. Certified operators will perform Fast Rope Master duties

for a live fast rope deployment in accordance with USSOCOM-M 350-6 or AFMAN 10-3511. **(T-3)**

A2.4.2.3. Helocast.

A2.4.2.3.1. Purpose. Ensure operators are able to complete a freefall swimmer deployment using mission equipment.

A2.4.2.3.2. Description. Operators will complete one live freefall swimmer deployment (1Z1s with stokes litter or other rescue device). This event will be designed to provide hands-on training with equipment prep and usage, rigging procedures, briefings, and safety procedures used during freefall swimmer deployments operations. **(T-3)**

A2.4.2.4. Helocast Master.

A2.4.2.4.1. Purpose. Ensure certified operators are able to perform Helocast Master duties utilizing prescribed procedures.

A2.4.2.4.2. Description. Certified operators will perform Helocast Master duties for a live helocast deployment in accordance with USSOCOM-M 350-6 or AFMAN 10-3511. **(T-3)**

A2.4.2.5. Hoist.

A2.4.2.5.1. Purpose. Ensure operators are able to complete a hoist insertion or extraction using mission equipment.

A2.4.2.5.2. Description. Operators will complete one live hoist insertion or extraction with rucksack and weapon. This event will be designed to provide hands on training with equipment prep and usage, rigging procedures, briefings, and safety procedures used during hoist insertion or extraction operations in accordance with USSOCOM-M 350-6 or AFMAN 10-3511. **(T-3)**

A2.4.2.6. Rappel.

A2.4.2.6.1. Purpose. Ensure operators are able to complete a rappel insertion using mission equipment.

A2.4.2.6.2. Description. Operators will complete one live rappel insertion with rucksack and weapon. This event will be designed to provide hands on training with equipment prep and usage, rigging procedures, briefings, and safety procedures used during rappel insertion operations in accordance with USSOCOM-M 350-6 or AFMAN 10-3511. **(T-3)**

A2.4.2.7. Rappel Master.

A2.4.2.7.1. Purpose. Ensure certified operators are able to perform Rappel Master duties utilizing prescribed procedures.

A2.4.2.7.2. Description. Certified operators will perform Rappel Master duties for a live Rappel deployment in accordance with USSOCOM-M 350-6 or AFMAN 10-3511. **(T-3)**

A2.4.2.8. Rope/Caving Ladder.

A2.4.2.8.1. Purpose. Ensure operators are able to complete a ladder extraction using mission equipment.

A2.4.2.8.2. Description. Operators will complete one live ladder extraction with rucksack and weapon. This event will be designed to provide hands on training with equipment prep and usage, rigging procedures, briefings, and safety procedures used during rope ladder extraction operations in accordance with USSOCOM-M 350-6 or AFMAN 10-3511. **(T-3)**

A2.4.2.9. Rapids.

A2.4.2.9.1. Purpose. Ensure operators have hands on training in employment procedures of tactical vehicles from ramp equipped aircraft.

A2.4.2.9.2. Description. Demonstrate knowledge of on- and off-loading tactical vehicles from aircraft in accordance with supporting aircraft SOPs and USSOCOM-M 350-6 or AFMAN 10-3511.

A2.4.2.10. Belay Equipment.

A2.4.2.10.1. Purpose. Ensure operators have hands on training in belaying equipment from vertical lift platforms.

A2.4.2.10.2. Description. Demonstrate proper aircraft rigging, time calls, load control, controlled belay of equipment and system breakdown. The equipment belayed can range from team rucks to a T-Duck but must be heavy enough to not create a safety hazard to the deploying aircraft. (See AFTTP 3-3.GA.) **(T-2)**

A2.4.3. <u>Parachute Operations.</u>

A2.4.3.1. Aircrew Flight Equipment (AFE) LL01 Familiarization. A one-time event, per every base assignment. It should be conducted during in-processing. Ensure this requirement is complete prior to the first flight at home station.

A2.4.3.1.1. The event will familiarize operators with local AFE policies and procedures to include equipment issue, use, local aircraft and equipment

configurations (includes survival components), inspection and fit-check cycles, pre-flight, and post-flight requirements.

A2.4.3.1.2. Training will ensure operators demonstrate proficiency in air and ground emergency egress procedures. Training will stress the importance of aircrew coordination, aircrew responsibilities, and use of appropriate emergency egress equipment. Training is conducted in accordance with AFMAN 11-301V1, and the appropriate MAJCOM supplement with AFSPECWAR currency set by this manual. **(T-1)**

A2.4.3.2. Aircrew Flight Equipment (AFE) LL06 Training.

A2.4.3.2.1. Purpose. Familiarize operators with AFE issued equipment.

A2.4.3.2.2. Description. Completed upon arrival at the new duty station as an academic and equipment training event, in which members demonstrate their ability to locate, inspect, and use all unit-issued AFE.

A2.4.3.2.2.1. Operators are briefed on the availability, issue, use, pre-use, and post-use procedures of unit specific equipment. This training includes the limitations and safety issues related to AFE. Additionally, include information on hazards associated with improper wear and failure to use only authorized clothing and equipment items.

A2.4.3.2.2.2. Training is conducted in accordance with AFMAN 11-301V1 and the appropriate MAJCOM supplement with currency set by **Table A2.1**. **Note:** Aircrew Flight Equipment Training (LL06) is not grounding for key staff and geographically separated units who are unable to resource appropriate AFE support.

A2.4.3.2.2.3. LL06 exemptions require MAJCOM/A3 approval. **(T-2)**

A2.4.3.3. High Altitude Parachutist Physiology Training. Complete initial and recurring Parachutist Aerospace Physiology Training. Complete in accordance with AFMAN 11-403. **(T-1)**

A2.4.3.4. Parachutist Recurring Training (Hanging Harness, EPs, etc.).

A2.4.3.4.1. Purpose. Ensure operators conduct an annual review on parachute operations, EPs, jumpmaster procedures (for those qualified), malfunction/incident/mishap reports and lessons learned or safety trends. This training is independent of individual parachute system refresher training and academics completed for re-qualification.

A2.4.3.4.2. Description. Training block designed to review the following:

A2.4.3.4.2.1. Precision air drop mission.

A2.4.3.4.2.2. Jump Master Personnel Inspection procedures for all unit equipment not required for standard currency (e.g., Oxygen (O2), specialized equipment loads).

A2.4.3.4.2.3. Jumpmaster Directed procedures and Precision Jumpmaster deployment patterns.

A2.4.3.4.2.4. Electronic Automatic Activation Device calculations and procedures, aircraft configuration and procedures for all types of deployments (i.e., High Altitude High Opening, Jumpmaster Directed, etc.) not required for standard currency.

A2.4.3.4.2.5. Operators will also complete EP training on systems they are qualified on in accordance with AFI 10-3503, *Personnel Parachute Program;* and ATP 3-18.11, *Special Forces Military Freefall Operations*. **(T-2)** In an effort to provide MFF simulation, units should attempt to rehearse MFF EPs in a Vertical Wind Tunnel.

A2.4.3.4.2.6. Parachutists will review parachute incident reports and lessons learned. **(T-3)** Training time varies based on unit assigned equipment and individual experience levels. **Note:** This event meets the USSOCOM 350-3, *Special Operations Forces Baseline Interoperable Airborne Operations (Parachuting) Training Standards,* operation pause requirement.

A2.4.3.5. Wet Silk Training. Complete in accordance with TC 3-21.220, *Static Line Parachuting Techniques and Training*, paragraph 25-9. **Exception:** For non-USSOCOM units performing service pure operations (USAF only), military divers qualified in accordance with AFI 10-3504, *Dive Program*, are exempt from the wet silk training requirement.

A2.4.3.6. MFF Jumpmaster (JM).

A2.4.3.6.1. Purpose. Ensure certified operators are able to perform MFF JM duties utilizing prescribed procedures.

A2.4.3.6.2. Description. Certified operators will perform JM duties for a live MFF deployment in accordance with AFI 10-3503 and ATP 3-18.11. **(T-3)**

A2.4.3.7. MFF Parachute Deployment. †Go/No-Gos: A2.4.3.1-4 and **A2.4.3.5** (for deliberate water jumps).

A2.4.3.7.1. Purpose. Ensure operators are able to deploy from an aircraft utilizing prescribed MFF procedures.

A2.4.3.7.2. Description. Operator will properly don and rig the parachute system, perform a MFF parachute deployment in accordance with AFI 10-3503 and ATP 3-18.11, and land within 100 meters of the target or the low man if conducting a team jump (provided an accurate release point). **(T-2) Note:** May not dual-log with task SW24 (see **paragraph A2.4.3.20**).

A2.4.3.8. MFF Parachute Deployment with Equipment. †**Go/No-Gos: A2.4.3.1-4** & **A2.4.3.5** (for deliberate water jumps).

A2.4.3.8.1. Purpose. Ensure operators are able to deploy from an aircraft utilizing prescribed MFF procedures.

A2.4.3.8.2. Description. Operator will properly don and rig the parachute system and equipment, perform a MFF parachute deployment in accordance with AFI 10-3503 and ATP 3-18.11, and land within 100 meters of the target or the low man if conducting a team jump (provided an accurate release point). **(T-2)**

A2.4.3.9. RASL Jumpmaster.

A2.4.3.9.1. Purpose. Ensure certified operators are able to perform RASL JM duties utilizing prescribed procedures.

A2.4.3.9.2. Description. Certified operators will perform JM duties for a live RASL deployment in accordance with AFI 10-3503 and TC 18-11, *Special Forces Double-Bag Static Line Operations*. **(T-3)**

A2.4.3.10. RASL Parachute Deployment. †**Go/No-Gos: A2.4.3.1-4** and **A2.4.3.5** (for deliberate water jumps).

A2.4.3.10.1. Purpose. Ensure operators are able to deploy from an aircraft utilizing RASL procedures.

A2.4.3.10.2. Description. Operator will properly don and rig the parachute system, perform a RASL parachute deployment in accordance with AFI 10-3503 and TC 18-11, and land within 100 meters of the target or 100 meters of the low man if conducting a team jump (provided an accurate release point). **(T-2)**

A2.4.3.11. RASL Parachute Deployment with Equipment. †**Go/No-Gos: A2.4.3.1-4** and **A2.4.3.5** (for deliberate water jumps).

A2.4.3.11.1. Purpose. Ensure operators are able to deploy from an aircraft utilizing RASL procedures.

A2.4.3.11.2. Description. Operator will properly don and rig the parachute system and equipment, perform a RASL parachute deployment in accordance with AFI 10-3503 and TC 18-11, and land within 100 meters of the target or 100 meters of the

low man if conducting a team jump (provided an accurate release point). **(T-2)**

A2.4.3.12. S/L Jumpmaster.

A2.4.3.12.1. Purpose. Ensure certified operators are able to perform S/L JM duties utilizing prescribed procedures.

A2.4.3.12.2. Description. Certified operators will perform JM duties for a live S/L (round) deployment in accordance AFI 10-3503 and TC 3-21.220. **(T-1)**

A2.4.3.13. S/L Parachute Deployment. †Go/No-Gos: A2.4.3.1-3 & **A2.4.3.5** (for deliberate water jumps).

A2.4.3.13.1. Purpose. Ensure operators are able to deploy from an aircraft utilizing S/L procedures.

A2.4.3.13.2. Description. Operator will properly don and rig the parachute system, perform a S/L (round) parachute deployment in accordance with AFI 10-3503 and TC 3-21.220, maneuver towards the target while maintaining safe separation from other jumpers and land using proper procedures. **(T-2)**

A2.4.3.14. S/L Parachute Deployment with Equipment. †Go/No-Gos: A2.4.3.1-3 & **A2.4.3.5** (for deliberate water jumps).

A2.4.3.14.1. Purpose. Ensure operators are able to deploy from an aircraft utilizing S/L procedures.

A2.4.3.14.2. Description. Operator will properly don and rig the parachute system and equipment, perform a S/L (round) parachute deployment in accordance with AFI 10-3503 and TC 3-21.220, maneuver towards the target while maintaining safe separation from other jumpers and land using proper procedures. **(T-2)**

A2.4.3.15. Tandem – Equipment. †Go/No-Gos: A2.4.3.1-4 & **A2.4.3.5** (for deliberate water jumps).

A2.4.3.15.1. Purpose. Ensure operators are able to deploy equipment from an aircraft utilizing prescribed Tandem techniques.

A2.4.3.15.2. Description. Operator will properly don and rig the tandem parachute system and equipment, perform a tandem parachute deployment in accordance with AFI 10-3503 and HAF/MAJCOM approved SOI standards, and land within 100 meters of the target (provided an accurate release point). **(T-2)**

A2.4.3.16. Tandem – Passenger. †Go/No-Gos: A2.4.3.1-4 & **A2.4.3.5** (for deliberate water jumps).

A2.4.3.16.1. Purpose. Ensure operators are able to deploy a passenger from an aircraft utilizing prescribed Tandem techniques.

A2.4.3.16.2. Description. Operator will properly don and rig the tandem parachute system and passenger, perform a tandem parachute deployment in accordance with AFI 10-3503 and HAF/MAJCOM approved SOI standards, and land within 100 meters of the target (provided an accurate release point). **(T-2)**

A2.4.3.17. Aerially Deployable Equipment Refresher.

A2.4.3.17.1. Purpose. Ensure operators have hands-on training in equipment rigging and deployment procedures for all unit assigned equipment.

A2.4.3.17.2. Description. Half-day (approximately four hours) training block designed to refresh the ability to rig, as required, configure, deploy, and de-rig unit-assigned aerial deployment equipment. Training time varies based on unit assigned equipment and individual experience levels. Refresher training will include procedures for one land and one water deployment method. **(T-3)**

A2.4.3.17.3. Methods selected are at the unit's discretion. Examples include:

A2.4.3.17.3.1. T-Duck, Rigging Alternate Method Boat (RAMB), Quad, Soft Duck, Hard Duck, Equipment Bundles, Rapid Extrication Deployment System, belay bundles, Advanced Rescue Craft, and Motorcycle bundles in accordance with AFMAN 10-3511. **Note:** Only refresh deployment methods not utilized on an Aerial Deployable Equipment Drop.

A2.4.3.17.3.2. Example 1. If a RAMB drop (water) is performed in one 365-day period and all refresher requirements are met, an individual need only be refreshed on a single land method.

A2.4.3.17.3.3. Example 2. If a RAMB drop (water) and a tactical vehicle drop (land) are performed in one 365-day period and all refresher requirements are met, log Aerial Deployable Equipment Refresher event as well. (See AFMAN 10-3511 and AFTTP 3-3.GA.)

A2.4.3.18. Follow Aerially Deployed Equipment.

A2.4.3.18.1. Purpose. Ensure operators are able to employ following aerially deployed equipment (e.g., Hard Duck, Bike bundle, equipment bundle).

A2.4.3.18.2. Description. Individually or as part of a team, member will perform a combination parachute drop following a bundle deployed as part of the same stick in accordance with AFTTP 3-3.GA. **(T-2)**

A2.4.3.19. Ram Air Parachute System (RAPS) Main Canopy Repack Training.

A2.4.3.19.1. Purpose. Ensure certified operators are able to perform a RAPS main canopy repack utilizing prescribed procedures.

A2.4.3.19.2. Description. Certified operators will successfully repack a RAPS main canopy under the supervision of a system qualified AFE technician (see AFI 10-3503 for other authorized supervisors if a system qualified AFE technician is not available). **(T-3)**

A2.4.3.20. NTRAPS. †Go/No-Gos: A2.4.3.1-4 and **A2.4.3.5** (for deliberate water jumps).

A2.4.3.20.1. Purpose. Ensure operators are able to deploy from an aircraft utilizing prescribed NTRAPS procedures.

A2.4.3.20.2. Description. Operator will properly don and rig the parachute system, perform a NTRAPS parachute deployment in accordance with AFI 10-3503 and HAF/MAJCOM approved SOI standards, and land within 100 meters of the target or the low man if conducting a team jump (provided an accurate release point). **(T-2) Note:** May not dual-log with MFF Parachute Deployment task (see **paragraph A2.4.3.7**).

A2.4.3.21. Freefall Videography.

A2.4.3.21.1. Purpose. Ensure certified operators are able to perform freefall videography.

A2.4.3.21.2. Description. Operators will perform freefall videography for a live deployment, maintaining safety, proximity, parachutist-in-view, and debrief standards in accordance with a HAF/MAJCOM approved SOI. (See AFI 10-3503.) **(T-2)**

A2.4.4. <u>Dive/Maritime Operations.</u> Note: All CY currencies require operators to complete four dives per CY. They are then current until the end of the next CY. **Example:** An operator completes four dives on 1 January 2023, then the operator is current until 31 December 2024.

A2.4.4.1. Conduct Diving Procedures Review.

A2.4.4.1.1. Purpose. Ensure operators are able to perform combat dive operations.

A2.4.4.1.2. Description. Review combat dive Special Operation Forces Baseline Interoperability Standards and AFSPECWAR specific diving mission procedures in accordance with AFI 10-3504; SS521-AG-PRO-010, *U.S. Navy Diving Manual*; and USSOCOM-M 350-25, *Special Operations Forces Baseline Interoperable Combat Diving Training Standards*.

A2.4.4.2. Open Circuit Emergency Procedures (EP).

A2.4.4.2.1. Purpose. Ensure operators are able to perform open circuit dive EPs.

A2.4.4.2.2. Description. Operators perform open circuit EP including lost diver, lost air, unconscious diver, and loss of buoyancy control in accordance with AFI 10-3504 and the *U.S. Navy Diving Manual*.

A2.4.4.3. Open Circuit Dive Operations. †Go/No-Gos: A2.4.4.1-2.

A2.4.4.3.1. Purpose. Ensure operators are able to perform open circuit dive operations.

A2.4.4.3.2. Description. Perform an open circuit dive in accordance with AFI 10-3504. This event is designed to provide hands-on training with tools, equipment, and procedures used during sub-surface infiltration, search or other unit assigned dive operations.

A2.4.4.4. Dive Supervisor, Open Circuit.

A2.4.4.4.1. Purpose. Ensure AFSPECWAR diving supervisors are able to supervise open circuit dive operations.

A2.4.4.4.2. Description. Perform diving supervisor duties in accordance with AFI 10-3504.

A2.4.4.5. Closed Circuit EPs.

A2.4.4.5.1. Purpose. Ensure operators are able to perform closed circuit dive EPs.

A2.4.4.5.2. Description. Operators perform closed circuit EP including lost diver, lost air, contaminated underwater breathing apparatus, unconscious diver, and loss of buoyancy control in accordance with AFI 10-3504 and the *U.S. Navy Diving Manual*.

A2.4.4.6. Closed Circuit Dive Operations. †Go/No-Gos: A2.4.4.1 & **A2.3.3.5**.

A2.4.4.6.1. Purpose. Ensure operators are able to perform closed circuit dive operations.

A2.4.4.6.2. Description. Perform a closed-circuit dive in accordance with AFI 10-3504. This event is designed to provide hands-on training with tools, equipment, and procedures used during sub-surface infiltration, search or other unit assigned dive operations.

A2.4.4.7. Dive Supervisor, Closed Circuit.

A2.4.4.7.1. Purpose. Ensure AFSPECWAR diving supervisors are able to supervise closed circuit dive operations.

A2.4.4.7.2. Description. Perform diving supervisor duties in accordance with AFI 10-3504 and the *U.S. Navy Diving Manual*.

A2.4.4.8. Conduct Search and Recovery Dive Fundamentals.

A2.4.4.8.1. Purpose. Ensure operators are able to perform search and recovery dive operations.

A2.4.4.8.2. Description. Review AFSPECWAR specific diving missions and general dive and search procedures to include lift bag use in accordance with AFI 10-3504 and the *U.S. Navy Diving Manual*.

A2.4.4.9. Amphibious/Small Boat Ops/Nav.

A2.4.4.9.1. Purpose. Ensure operators have hands-on training in Combat Rubber Raiding Craft (CRRC) employment procedures.

A2.4.4.9.2. Description. Operators will demonstrate knowledge of CRRC operations and maintenance to include assembly and inspection of CRRC and engine, basic routine maintenance and field expedient maintenance, dewatering procedures, and engine start. Perform basic watercraft operations, navigation, and beaching techniques in accordance with USSOCOM 350-4V2, *Special Operations Forces Baseline Interoperable Training Standards- Maritime Infiltration* or AFTTP 3-3.GA. **(T-3)**

A2.4.4.10. Derig and Employ T-Duck.

A2.4.4.10.1. Purpose. Ensure operators are able to employ a T-Duck.

A2.4.4.10.2. Description. Individually or as part of a maximum 4-member team, member will derig T-Duck from deployment configuration, configure for navigation, and employ. **(T-2)** This event is designed to provide hands on derigging and employment training and may start from a simulated helicopter deployment. (See AFTTP 3-3.GA.)

A2.4.4.11. Derig and Employ SOF Duck.

A2.4.4.11.1. Purpose. Ensure operators are able to employ a SOF Duck.

A2.4.4.11.2. Description. Individually or as part of a maximum 4-member team, member will derig SOF Duck from deployment configuration, configure for

navigation, and employ. **(T-2)** This event is designed to provide hands on derigging and employment training and may start from a simulated helicopter deployment. (See AFTTP 3-3.GA.)

A2.4.4.12. Derig and Employ Hard Duck.

A2.4.4.12.1. Purpose. Ensure operators are able to employ an aerially deployed Hard Duck.

A2.4.4.12.2. Description. Individually or as part of a maximum 4-member team, member will derig a Hard Duck from deployment configuration, configure for navigation, and employ. **(T-2)**

A2.4.4.12.3. This event is designed to provide hands on derigging and employment training and may start from a simulated aerial deployment (bundle may be presented without parachute(s) attached) in accordance with AFTTP 3-3.GA.

A2.4.4.13. Derig and Employ RAMB.

A2.4.4.13.1. Purpose. Ensure operators are able to employ an aerially deployed RAMB.

A2.4.4.13.2. Description. Individually or as part of a maximum 4-member team, member will derig a RAMB from deployment configuration, configure for navigation, and employ. **(T-2)**

A2.4.4.13.3. This event is designed to provide hands on derigging and employment training and may start from a simulated aerial deployment (bundle may be presented without parachute(s) attached) in accordance with AFMAN 10-3511 and AFTTP 3-3.GA.

A2.4.5. Heavy Weapons/Demolition Employment.

A2.4.5.1. Demolition. Conduct demolitions in accordance with TM 3-34.82, *Explosives and Demolitions,* and local unit Demolition specific Operating Instructions.

A2.4.5.2. Explosive Safety. Review DESR 6055.09_DAFMAN 91-201 and local explosive and demolitions Operating Instructions and SOPs. This refresher training is specific to location and will be accomplished per permanent change of station (PCS) and should be accomplished prior to conducting demolition or explosive training on an unfamiliar training range. **(T-2)**

A2.4.5.3. Operate M240/M48.

A2.4.5.3.1. Purpose. Ensure operators conduct qualification training to remain qualified on the M240/M48 in accordance with DAFMAN 36-2655.

A2.4.5.3.2. Description. Operators who are qualified on the weapon system will at a minimum conduct qualification training and should conduct live fire sustainment training. **(T-2)** This task is designed to provide hands on training and maintain basic proficiency with the weapon system.

A2.4.5.4. Operate M249.

A2.4.5.4.1. Purpose. Ensure operators conduct qualification training to remain qualified on the M249 in accordance with DAFMAN 36-2655.

A2.4.5.4.2. Description. Operators who are qualified on the weapon system at a minimum will, conduct qualification training and should conduct live fire sustainment training. **(T-2)** This task is designed to provide hands on training and maintain basic proficiency with the weapon system.

A2.4.5.5. Operate MK-19/M320.

A2.4.5.5.1. Purpose. Ensure Operators conduct qualification training to remain qualified on the Mk-19/M-320 in accordance with DAFMAN 36-2655.

A2.4.5.5.2. Description. Operators who are qualified on the weapon system will at a minimum conduct qualification training and should conduct live fire sustainment training. **(T-2)** This task is designed to provide hands on training and maintain basic proficiency with the weapon system.

A2.4.5.6. Utilize Hand Grenade.

A2.4.5.6.1. Purpose. Ensure operators are able to employ hand grenades.

A2.4.5.6.2. Description. Demonstrate knowledge of hand grenades: characteristics and capabilities, safety procedures, demonstrate grip and aim, demonstrate proper throwing techniques and positions (may use grenade simulators).

A2.4.5.7. Utilize Pyrotechnics.

A2.4.5.7.1. Purpose. Operators are able to employ pyrotechnics.

A2.4.5.7.2. Description. Demonstrate knowledge of pyrotechnics: characteristics and capabilities, safety procedures, demonstrate proper activation and employment techniques (may use pyrotechnic simulators).

A2.4.6. Overland Movement/IADs.

A2.4.6.1. Swiftwater.

A2.4.6.1.1. Purpose. Ensure operator is prepared to perform swiftwater operations.

A2.4.6.1.2. Description. Operator will identify personal equipment requirements, hydrology and river dynamics, hazards, safety principles and swiftwater crossing techniques. Operator will recover a casualty to shore using the following techniques: Throw-bag, highline vector, pendulum and "live bait." **(T-3)** Employ or review employment techniques of a watercraft in a swiftwater rescue and crossing scenario in accordance with AFTTP 3-3.GA.

A2.4.6.2. Fundamental Mountain Skills.

A2.4.6.2.1. Purpose. Ensure climbers maintain and are able to perform fundamental mountain skills.

A2.4.6.2.2. Description. In unit or field conditions climbers perform the following skills: Tie knots, bends, and hitches. Construct natural and artificial anchors; Perform rope ascent with friction hitches and mechanical ascending devices; Perform rappel techniques; and Knot bypass on-rappel procedures. Reference AF/A3S Mountain Operations QTPs.

A2.4.6.3. Adverse Terrain Evacuation. Reference AFMAN 10-3507 and AF/A3S Mountain Operations QTPs.

A2.4.6.3.1. Purpose. Ensure climbers maintain and are able to perform rope rescue skills.

A2.4.6.3.2. Description. In unit or field conditions climbers perform the following skills:

A2.4.6.3.2.1. Construct and use mechanical advantage systems.

A2.4.6.3.2.2. Patient packaging for horizontal raise and vertical raise.

A2.4.6.3.2.3. System knot bypass.

A2.4.6.4. Snow and Ice Knowledge Refresher. Reference AFMAN 10-3507 and AF/A3S Mountain Operations QTPs.

A2.4.6.4.1. Purpose. Ensure climbers maintain the required knowledge base to operate in avalanche prone and glaciated terrain.

A2.4.6.4.2. Description. In unit or field conditions climbers review or perform the following skills:

A2.4.6.4.2.1. Environmental effects on operations in cold weather environment.

A2.4.6.4.2.2. Emergency medical operations in adverse terrain.

A2.4.6.4.2.3. Avalanche causes.

A2.4.6.4.2.4. Avalanche hazard prediction methods.

A2.4.6.4.2.5. Avalanche survival actions.

A2.4.6.4.2.6. Avalanche rescue equipment requirements and techniques.

A2.4.6.4.2.7. Glacier travel movement fundamentals. Crevasse rescue procedures.

A2.4.6.5. Snow and Ice Operations. Reference AFMAN 10-3507 and AF/A3S Mountain Operations QTPs.

A2.4.6.5.1. Purpose. Ensure climbers maintain and are able to perform necessary skills to operate safely in alpine environments with avalanche hazards and glaciated terrain.

A2.4.6.5.2. Description. In field settings that offers alpine, snow, and glaciated terrain climbers perform the following skills:

A2.4.6.5.2.1. Perform snow/alpine travel movement fundamentals with skis or snowshoes.

A2.4.6.5.2.2. Perform avalanche rescue.

A2.4.6.5.2.3. Construct snow and ice anchors.

A2.4.6.5.2.4. Perform ice axe self-arrest and team-arrest.

A2.4.6.5.2.5. Perform glacier travel movement fundamentals wearing crampons.

A2.4.6.5.2.6. Perform crevasse rescue procedures. Place ice climbing protection.

A2.4.6.6. Mission Support Site Operations. In support of a reconnaissance push or pull mission, in both urban and rural environments, members will establish and operate a Mission Support Site. Members will demonstrate a situational understanding of the operational environment. **(T-3)**

A2.4.6.7. Egress Vehicle under Rollover Conditions.

A2.4.6.7.1. Purpose. Ensure operators are familiar on actions to take immediately following a rollover to avert rollover injuries and preserve manpower by building an understanding of best practices to egress a rollover tactical vehicle scenario.

A2.4.6.7.2. Description. Operators will complete a vehicle rollover recovery course that utilizes a HMMWV Egress Assistant Trainer or equivalent system. **(T-2)** This task trains operators on how to escape a tactical vehicle rollover scenario in combat and non-combat environments.

A2.4.6.8. Evacuate Injured Personnel from Vehicle.

A2.4.6.8.1. Purpose. Ensure operators are familiar with safe evacuation of injured personnel from a vehicle and can successfully perform those techniques.

A2.4.6.8.2. Description. Operators will be given a tactical scenario in which they recover at least one injured person from a vehicle. This task will require operators to ensure injured personnel are stabilized and provide immediate lifesaving first aid if required. Once the injured person is stable, the operator will safely evacuate the person from the vehicle. This task provides hands-on training during evacuation of injured personnel from a vehicle and first aid materials. **(T-3)**

A2.4.6.9. Manual Range Calculation.

A2.4.6.9.1. Purpose. Operators are able to determine distance between two points/positions without the use of Global Positioning System (GPS) devices.

A2.4.6.9.2. Description. Operators will utilize maps, compass, and map plotting instruments and be given a tactical scenario to determine their location. They will also determine the range and bearing to various features given to them in a tactical scenario. **(T-3)** The task should culminate in a tactical dismounted movement without aided systems. This task is designed to provide hands on training with equipment and dismounted movement in a tactical scenario.

A2.4.6.10. Tactical Mounted Ops (SMUT/NAV/IAD).

A2.4.6.10.1. Purpose. Ensure operators are able to conduct mounted operations in a tactical scenario.

A2.4.6.10.2. Description. Operators will be given a tactical scenario requiring the movement of multiple vehicles along tactical driving conditions between points and will execute immediate action and battle drills in accordance with AFTTP 3-2.58, *Multi-Service Tactics, Techniques, and Procedures for Tactical Convoy Operations*.

A2.4.6.10.2.1. This task will require operators to move vehicles in optimal formations, assess danger areas, and respond to direct/indirect fire.

Additionally, the tactical scenario should be repeated during periods of darkness.

A2.4.6.10.2.2. This task provides hands on training of small unit tactics, navigation, and immediate action drills during mounted operations and use of key principles from applicable TTPs and unit SOPs. **(T-3) Note:** Operators will be trained (and licensed as applicable) on the tactical vehicle(s) used in accordance with AFMAN 24-306*, Operation of Air Force Government Motor Vehicles*. **(T-1)**

A2.4.6.10.2.3. Units should reference electronic publications (E-Pubs) QTPs for tactical vehicle training development. Commanders may incorporate use of Army License Instructor Training and Army Master Drivers in accordance with Army Regulation (AR) 600-55, *The Army Driver and Operators Standardization Program (Selection, Training, Testing, and Licensing)* to meet this requirement.

A2.4.6.11. Prepare Vehicle for Convoy.

A2.4.6.11.1. Purpose. Ensure operators are able to prepare a vehicle for convoy operations under tactical driving conditions.

A2.4.6.11.2. Description. Operators will be given a tactical scenario requiring the preparation of a vehicle to participate in the execution of tactical convoy operations in accordance with AFTTP 3-2.58. This task will require operators to ensure proper camouflage, concealment, and deceptive measures. Additionally, operators will program radios required for communications during the convoy and are prepared for additional roles for their position in the convoy. **(T-3)** This task provides hands-on training for preparing vehicles operating in a convoy and use of key principles from applicable TTPs and unit SOPs.

A2.4.6.12. System Aided Range Estimation.

A2.4.6.12.1. Purpose. Operators are able to determine distance between two points/positions with the use of GPS devices.

A2.4.6.12.2. Description. Operators will utilize maps, GPS devices, map plotting instruments and be given a tactical scenario to determine their location. They will also determine the range and bearing to various features given to them in a tactical scenario. The task should culminate in a tactical dismounted movement with GPS-aided systems. This task will be designed to provide hands on training with equipment and dismounted movement in a tactical scenario. **(T-3)**

A2.4.6.13. Tactical Dismounted Ops (SMUT/NAV/IAD).

A2.4.6.13.1. Purpose. Ensure operators are able to conduct dismounted operations

in a tactical scenario.

A2.4.6.13.2. Description. Operators will be given a tactical scenario requiring the movement of a squad to platoon size element under tactical conditions between points and will execute immediate action and battle drills reacting to direct and indirect fire. This task will require operators to navigate to and from an objective, which they should complete actions-on the objective. Additionally, the tactical scenario should be repeated during periods of darkness. **(T-3)** This task provides hands-on training of small unit tactics, navigation, and immediate action drills during dismounted operations and use of key principles from applicable TTPs and unit SOPs.

A2.4.6.14. Tactical Mounted Ops (SMUT/NAV/IAD).

A2.4.6.14.1. Purpose. Ensure operators are able to conduct mounted operations in a tactical scenario.

A2.4.6.14.2. Description. Operators will be given a tactical scenario requiring the movement of multiple vehicles along tactical driving conditions between points and will execute immediate action and battle drills in accordance with AFTTP 3-2.58.

A2.4.6.14.2.1. This task will require operators to move vehicles in optimal formations, assess danger areas, and respond to direct/indirect fire. Additionally, the tactical scenario should be repeated during periods of darkness.

A2.4.6.14.2.2. This task provides hands on training of small unit tactics, navigation, and immediate action drills during mounted operations and use of key principles from applicable TTPs and unit SOPs. **(T-3) Note:** Operators will be trained (and licensed as applicable) on the tactical vehicle(s) used in accordance with AFMAN 24-306. **(T-1)**

A2.4.6.14.2.3. Units should reference electronic publications (E-Pubs) Qualification Training Packages (QTPs) for tactical vehicle training development. Commanders may incorporate use of Army License Instructor Training and Army Master Drivers in accordance with AR 600-55 to meet this requirement.

A2.4.6.15. Use Maneuver Control Measures.

A2.4.6.15.1. Purpose. Ensure operators are able to identify, plan, and utilize maneuver control measures for infiltration/actions-on-objective/exfiltration.

A2.4.6.15.2. Description. Operators will be given a tactical scenario requiring the use of maneuver control measures to coordinate movement to, on, and from an objective. This task can be augmented with academics at the discretion of the

instructor utilizing Army Field Manual 1-02.2, *Military Symbols*. This task should be conducted as a practical exercise to demonstrate proficiency in the use of maneuver control measures or as part of a comprehensive execution of tasks. **(T-3)**

A2.4.6.16. Vehicle Recovery Operations.

A2.4.6.16.1. Purpose. Ensure operators are able to successfully complete or assist in the recovery of a disabled vehicle.

A2.4.6.16.2. Description. Operators will be given a tactical scenario in which a disabled (may be simulated) vehicle needs to be recovered. Operators will utilize AFTTP 3-2.58 as an aid in procedures for recovering the vehicle. This task culminates in the successful recovery and movement of a disabled vehicle back to an established position. **(T-3)**

A2.4.6.17. Prepare Vehicle for Air Lift Mobility Operations.

A2.4.6.17.1. Purpose. Ensure operators are able to prepare a vehicle for airlift mobility operations.

A2.4.6.17.2. Description. Operators will be given a tactical scenario requiring the movement of vehicles to an aerial porter position with the vehicle ready for airlift inspection and manifest. This task will require operators to be familiar with basic operator requirements for preparing a vehicle for airlift mobility. This task provides hands on training with a vehicle to meet requirements defined by local airlift mobility governing documents, TTPs, and unit SOPs. **(T-3)**

A2.4.6.18. Derig and Employ Bike Bundle.

A2.4.6.18.1. Purpose. Ensure operators are able to employ an aerially deployed motorcycle.

A2.4.6.18.2. Description. Individually or as part of a maximum two-member team, member will derig a bike bundle from deployment configuration, configure for mission use, and employ. **(T-2)** This event is designed to provide hands on derigging and employment training and may start from a simulated aerial deployment (bundle may be presented without parachute(s) attached).

A2.4.7. <u>Tactical Communications and Targeting.</u>

A2.4.7.1. Build Field Expedient Antennas.

A2.4.7.1.1. Purpose. Ensure operators are able to create field expedient antennas that properly communicate on the intended frequency of their design.

A2.4.7.1.2. Description. Operators will be given materials to construct a field

expedient antenna and an intended frequency(ies). This task will require operators to choose optimal designs given the terrain, weather, time of day, and distance to the receiving radio. This task provides hands-on training with equipment and usage of materials to create antennas. **(T-3)**

A2.4.7.2. Create and Load Mission with radio provided Mission Planning Software (MPS).

A2.4.7.2.1. Purpose. Ensure operators are able to create and load a mission plan utilizing radio's given MPS.

A2.4.7.2.2. Description. Operators will load a mission plan into Program of Record radios utilizing MPS. The plan should include various waveform types and frequencies. This task will be designed to provide hands-on training with equipment and usage of the radio's MPS software. **(T-3)**

A2.4.7.3. Operate BLOS Waveforms (HF, MUOS, IW, HPW).

A2.4.7.3.1. Purpose. Ensure operators are able to operate radios on BLOS waveforms (e.g., HF, MUOS, IW, HPW).

A2.4.7.3.2. Description. Operators will properly program radios with BLOS waveforms and configure the radio to utilize the programmed waveform. **(T-3)** Operators should program various BLOS waveforms and make positive radio contact with another user on that waveform and Point-to-Point/Point-to-Net connections via Mobile User Objective System (MUOS). This task is designed to provide hands on training with equipment and usage of BLOS waveforms.

A2.4.7.4. Operate ECCM (Second Generation Anti-Jam Tactical Ultra High Frequency Radio (SATURN), etc.).

A2.4.7.4.1. Purpose. Ensure operators are able to properly program ECCM (e.g., SATURN) into radios for communication resiliency.

A2.4.7.4.2. Description. Operators will program a frequency-hopping channel into their radios, successfully transmit a time of day, and switch to an active hopping network. **(T-3)** This task is designed to provide hands-on training with equipment and usage of ECCMs.

A2.4.7.5. Operate MANET Waveforms.

A2.4.7.5.1. Purpose. Ensure operators are able to utilize PoR radios' MANET waveforms for battle tracking, positional awareness, and passing targeting data within MANET.

A2.4.7.5.2. Description. Operators will program a MANET via PoR radio, establish

good link connectivity, and confirm transmission of both positional and targeting data. **(T-3)** This task is designed to provide hands-on training with equipment and usage of MANET waveforms.

A2.4.7.6. Operate peripherals via HUB/EUD (VDL, Radios).

A2.4.7.6.1. Purpose. Ensure operators are able to interact with their linked devices (wired or wirelessly) through the EUD and provided tactical HUB (Black Diamond, Par GOV, Glenair Starpan).

A2.4.7.6.2. Description. Operators will establish connection of radios, peripherals, and power through issued tactical HUB and change frequencies of their radios through the EUD, scan VDL channels through the EUD, and interact with other peripheral accessories of their kit through the EUD and the applications loaded on it (Pocket Laser Range Finder (PLRF)-25C, etc.). **(T-3)** This task is designed to provide hands-on training with equipment and usage of their tactical HUB and EUD.

A2.4.7.7. Tx and Rx Digital Waveforms (J/K/CoT through RF and IP routed MANET).

A2.4.7.7.1. Purpose. Ensure operators are capable of utilizing digital waveforms to share information with ground or air users on a digital network.

A2.4.7.7.2. Description. Operators at a minimum will transmit positional data, free text messages, and targets on a digital network and receive data from another user on that network (ground or air user). **(T-3)** This task is designed to provide hands on training with equipment and usage of digital waveforms.

A2.4.7.8. Operate Laser Designating Device.

A2.4.7.8.1. Purpose. Ensure operators are able to properly set up and utilize a laser designating device for target marking/designating.

A2.4.7.8.2. Description. Operators will be given a laser designator and properly configure the device with a given pulse repetition frequency. Additionally, they will operate the device in mark and designate modes (if applicable). The task should include aircraft with the capability to confirm laser mark/designation. **(T-3)** This task is designed to provide hands on training utilizing laser, equipment, terminology, brevity, and safety procedures.

A2.4.8. <u>Aircraft Operations.</u>

A2.4.8.1. Marshalling.

A2.4.8.1.1. Purpose. Ensure operators can safely and effectively direct air- and

ground-taxiing aircraft.

A2.4.8.1.2. Description. Properly demonstrate direction of aircraft movement and obstacle avoidance using standard signals in a day or night setting in accordance with AFMAN 11-218.

A2.4.8.2. Marshalling Exam.

A2.4.8.2.1. Purpose. Ensure operators understand proper marshalling procedures and signals preventing aircraft ground/hover taxi incidents.

A2.4.8.2.2. Description. A written or electronic 20 question (minimum) open book examination taken after a review of AFMAN 11-218. This exam is normally administered by the OG Stan/Eval (or equivalent) office. **(T-2)**

A2.4.8.3. Crew Resource Management (CRM).

A2.4.8.3.1. Purpose. Ensure operators are familiar with Crew Resource Management concepts and employment.

A2.4.8.3.2. Description. CRM refresher training is conducted in accordance with AFMAN 11-290 and applicable supplements. It should be tailored to the unit mission and built on the principles of team coordination, communication skills, decision making, and leadership. Instruct CRM in accordance with MAJCOM approved curriculum.

A2.4.8.4. Aircraft Anti-Hijacking.

A2.4.8.4.1. Purpose. Ensure operators understand USAF policy and guidance on preventing and resisting aircraft piracy (hijacking).

A2.4.8.4.2. Description. Complete the Total Force Awareness Training: AMC Anti-Hijacking Refresher annual requirement (via myLearning at https://lms-jets.cce.af.mil/moodle/) with frequency defined to biennial (once every two years) by this manual as an exception to AFI 13-207-O.

A2.4.8.5. Emergency Egress Training. Complete with Mission Design Series (MDS) crewmember prior to flight.

A2.4.8.5.1. Purpose. Ensure all operators are able to safely egress aircraft and react to aircraft emergencies.

A2.4.8.5.2. Description. Operators will be able to identify, locate, and utilize appropriate emergency equipment; identify and document equipment discrepancies; and perform required egress procedures, signals, and announcements in accordance with Technical Orders for that specific MDS. **(T-2)**

A2.4.8.5.3. Aircraft emergency equipment includes fire extinguishers, emergency escape breathing devices, smoke mask and/or quick don mask/goggles, oxygen mask, crash axes, escape ropes, ladders, slides, emergency lights, life preservers, and rafts.

A2.4.8.5.4. Emergency egress procedures include all aircraft exits including chopping areas. Training will be instructed by any qualified instructor. **(T-2)** MDS specific instructors are preferred if available.

A2.4.8.6. Basic Sortie.

A2.4.8.6.1. Purpose. Ensure proficiency to perform aircrew duties when assigned (e.g., equipment rigging, crew coordination, MDS Systems use) during AFSPECWAR missions. **Note:** While an AFSPECWAR instructor is preferred, any aircrew instructor filling a primary crew position during the sortie fills the oversight requirement to regain currency on this task.

A2.4.8.6.2. Description. AFSPECWAR aircrew will complete the following:

A2.4.8.6.2.1. Identify emergency egress points. **(T-3)**

A2.4.8.6.2.2. Inspect and operate communication system panel. **(T-3)**

A2.4.8.6.2.3. (Fixed Wing only) Inspect aircraft oxygen systems for aircrew and patient use. **(T-3)**

A2.4.8.6.2.4. Correctly stow the following equipment items: **Note:** Only one platform must be rigged to log this event.

A2.4.8.6.2.4.1. Mission Equipment Tie-down (e.g., ruck, med kit). **(T-3)**

A2.4.8.6.2.4.2. (Vertical Lift only) AIE Equipment (procedure for use of AIE equipment is covered under their respective paragraphs). **(T-3)**

A2.4.8.6.2.4.3. (Fixed Wing) litter Stanchions or Tie-down (while a review of stanchion use is required, actual rigging of stanchions is not required). **(T-3)**

A2.4.8.7. ECAS/CFF Training (Non-JTAC). Academics and Live or Simulated Calls.

A2.4.8.7.1. Purpose. Ensure non-JTAC qualified operators are able to provide the minimum information required to conduct ECAS and CFF with rotary-wing and surface-fire support assets.

A2.4.8.7.2. Description. Operators will receive academic lessons on the

fundamentals of ECAS and CFF (preferably instructed by a qualified JTAC or JTAC Instructor). After completion of academics, given a tactical scenario, the trainee with execute multiple live or simulated ECAS and CFF briefs. This task will be designed to provide academic and hands on training with equipment and practice of core task principles. **(T-3)**

A2.4.8.8. Landing Zone Survey. Perform landing zone survey in accordance with DAFMAN 13-217.

A2.4.8.9. Helicopter Landing Zone Survey. Perform helicopter landing zone survey in accordance with DAFMAN 13-217.

A2.4.8.10. FARP Survey. Perform FARP survey/site assessment or refresher training in accordance with AFI 11-235 and the AFSOC FARP SOI.

A2.4.8.11. Drop Zone Controller. Perform drop zone controller duties on a drop zone event in accordance with DAFMAN 13-217.

A2.4.8.12. Landing Zone Controller. Perform landing zone controller duties in accordance with DAFMAN 13-217. Minimum required LZC academic and practical tasks for currency include:

A2.4.8.12.1. LZC supervision and management responsibilities. **(T-3)**

A2.4.8.12.2. Pattern Information, Phraseology, Ground Control Procedures. **(T-3)**

A2.4.8.12.3. Wake turbulence. **(T-3)**

A2.4.8.12.4. Runway separation (CAT/Visual). **(T-3)**

A2.4.8.12.5. Handling emergency A/C, incident reporting. **(T-3)**

A2.4.8.12.6. Transfer of control. **(T-3)**

A2.4.8.12.7. Limited weather observations/reporting. **(T-3)**

A2.4.8.13. Landing Zone Safety Officer. Perform Landing Zone Safety Officer duties on a landing zone or austere airfield event in accordance with DAFMAN 13-217.

A2.4.8.14. Air Traffic Control (ATC) Hours.

A2.4.8.14.1. Purpose. Provide cumulative minimum of 4 hours of ATC service to fixed or rotary wing aircraft during multi-ship air land operations in a live air traffic environment or simulated environment in accordance with Federal Aviation Administration Order 7110.65, *Air Traffic Control*.

A2.4.8.14.2. Description. Apply ATC service to Landing Zone or austere airfield operations in accordance with DAFMAN 13-217 and AFI 11-235. **Note:** If a position evaluation is conducted as part of LZC training, apply time and dual log for ATC hours.

A2.4.8.15. FARP Operations Review. Conduct FARP operations or review in accordance with AFI 11-235.

A2.4.8.16. Austere Airfield Operations. Conduct tactical airfield assessment, establishment, and control. May include specialized fueling operations (SFO)/FARP operations. Conduct training evolution in accordance with DAFMAN 13-217 and unit SOP/TTPs pertinent to austere airfield operations and role. Operations: Jump Clearing Team, Dirt Landing Strip (DLS) Ops, HA/DR, MSS Ops. Role: Jump Clearing Team Roles (e.g., TL, Primary/Alternate ATC, Bike Chasers, Strobe Man), Team Leader, Team Member.

A2.4.8.17. LZ Safety Officer (SO) Academic Refresher. Conduct review of LZSO academics in accordance with DAFMAN 13-217 and TSPWG 3-260-03.02-19, *Airfield Pavement Evaluation Standards and Procedures*.

A2.4.8.18. LZ Surveyor Academic Refresher. Academic Refresher. Conduct review of LZ Surveyor academics in accordance with DAFMAN 13-217 and TSPWG 3-260-03.02-19.

A2.4.8.19. Pavement Assessment. Accomplish at a minimum, a visual pavement inspection, underlying soil strength, pavement thickness measurements for a paved/prepared LZ/airfield surface and/or process valid data to generate LZ strength by PCN number in accordance with DAFMAN 13-217, TSPWG M 3-260-03.02-19, UFC 3-260-16 O&M Manual: Standard Practice for Airfield Pavement Condition Surveys.

A2.4.9. <u>Actions on the Objective:</u>

A2.4.9.1. Extrication.

A2.4.9.1.1. Purpose. Ensure operators are able to perform extrication operations.

A2.4.9.1.2. Description. The operator will safely utilize the following tools during extrication training:

A2.4.9.1.2.1. Combi-Tool (hand pump and/or powered). **(T-3)**

A2.4.9.1.2.2. Reciprocating saw. **(T-3)**

A2.4.9.1.2.3. Grinder/Cut Off tool. **(T-3)**

A2.4.9.1.2.4. Crash Axe. **(T-3)**

A2.4.9.1.2.5. Lift Bags (high volume/low pressure and/or low volume/high pressure). **(T-3)**

A2.4.9.1.3. Optional tools:

A2.4.9.1.3.1. Shoring/Cribbing.

A2.4.9.1.3.2. Quickie Saw.

A2.4.9.1.3.3. Exothermic Torch.

A2.4.9.1.3.4. Operators should practice extrication from thin-skinned vehicles, armored vehicles, and aircraft. (See 1T2XX CFETP, *Pararescue Specialty;* and AFTTP 3-3.GA.)

A2.4.9.2. Confined Space/Structural Collapse (CS/SC).

A2.4.9.2.1. Purpose. Ensure operators are able to perform CS/SC operations.

A2.4.9.2.2. Description. Operator will safely utilize the following tools during CS/SC training:

A2.4.9.2.2.1. Respirator. **(T-3)**

A2.4.9.2.2.2. Gas Monitor. **(T-3)**

A2.4.9.2.2.3. Shoring/Cribbing. **(T-3)**

A2.4.9.2.2.4. Quickie Saw. **(T-3)**

A2.4.9.2.2.5. Lift Bags (high volume/low pressure and/or low volume/high pressure). **(T-3)**

A2.4.9.2.3. Optional tools:

A2.4.9.2.3.1. Self-contained breathing apparatus.

A2.4.9.2.3.2. Exothermic Torch, and other extrication tools (see **paragraph A2.4.9.1**).

A2.4.9.2.3.3. Operators should practice both CS entrant procedures and SC search and rescue/recovery procedures. (See CFETP 1T2XX, and Air Force Tactics, Techniques and Procedures (AFTTP) 3-3.GA.)

A2.4.9.3. Anchors and Low/High Angle Evacuation.

A2.4.9.3.1. Purpose. Ensure operators are able to establish anchors and perform low/high angle evacuation operations.

A2.4.9.3.2. Description. The operator will perform the following tasks (see CFETP 1T2XX, and AFTTP 3-3.GA):

A2.4.9.3.2.1. Construct an Equalized, Redundant, No Extension, Solid and Strong, and Timely (ERNEST) anchor, with an appropriate safety factor to hold a rescue load. **(T-3)**

A2.4.9.3.2.2. Establish and operate a low-angle evacuation without dropping the patient, shocking the system, or leaving the patient unsecured at any time. **(T-3)**

A2.4.9.3.2.3. Establish and operate the following high angle evacuation systems including mechanical advantage and a knot bypass: a main and belay line system and a single rescuer, single patient, single line system. **(T-3)**

A2.4.9.3.2.4. Rope ascension, pick-off, and buddy rappel. **(T-3)**

A2.4.9.3.2.5. Belay, Litter attendant, and Safety/edge man. **(T-3)**

A2.4.9.4. Electromagnetic Spectrum Operations.

A2.4.9.4.1. Purpose. Operators will integrate with joint electromagnetic spectrum operations cell to conduct electromagnetic spectrum operations activities, including electronic warfare, and offensive cyberspace operations in support of combatant commander objectives and intelligence requirements. **(T-2)**

A2.4.9.4.2. Description. Given a tactical scenario, operators execute any or all sub-components of electronic warfare (electronic attack, electronic support, electronic protection), and offensive cyberspace operations, using man-packable equipment and appropriate TTPs to geo-locate, destroy, degrade, disrupt, deceive, detect, or exploit enemy personnel, facilities, or equipment (e.g., radar, weapons systems, cyber systems, and platforms). Operators execute offensive cyberspace operations within the physical layer of cyberspace to gain logical access and project power.

A2.4.9.5. Long Range Target Interdiction. Operators will conduct Designated Marksman or stand-off weapons system training. **(T-2)** This will include review of all applicable ballistics of their issued weapons systems. Operators will execute full mission profiles or part-task training to include mission planning, infiltration, position selection, observing/reporting, direct action, and exfiltration. **(T-2)** Operators will conduct assembly, full tear down, and maintenance of their issued system, and will assume both spotter and shooter roles for direct action scenarios. Live fire iterations will include engagements exceeding 500m. **(T-2)**

A2.4.9.6. Reconnaissance Operations. In support of Commander's Critical Information Requirements, members will conduct Point, Area, Zone, Environmental and Route Reconnaissance, push and pull missions under tactical conditions, and in accordance with USSOCOM M 350-18 Appendix A. **(T-2)**

A2.4.9.7. Special Reconnaissance (SR) Mission Planning. Given a specified SR mission in a SOF mission planning environment, members will accomplish the following:

A2.4.9.7.1. Utilize the appropriate planning process in accordance with service component requirements and USSOCOM M 350-18 Appendix A.

A2.4.9.7.2. Conduct mission planning analysis in accordance with service component requirements, analyze mission requirements per commander's intent and operational or strategic effects of the mission.

A2.4.9.7.3. Develop a scheme of maneuver that accounts for SR mission planning.

A2.4.9.7.4. Develop power management plan during mission planning.

A2.4.9.7.5. Demonstrate ability to operate required electrical equipment throughout duration of the mission.

A2.4.9.7.6. Demonstrate accountability and protection of sensitive equipment from compromise. **(T-2)**

A2.4.9.8. Surveillance Operations. In support of reconnaissance missions, members will conduct fixed, physical, foot, vehicle, and multi-mode surveillance techniques. Members will provide surveillance data collection report and debrief to mission commanders and relevant intel personnel. Surveillance tasks will be completed in accordance with conditions and standards outlined in USSOCOM-M 350-18 Appendix A. **(T-2)**

A2.4.9.9. Operational Preparation of the Environment.

A2.4.9.9.1. Purpose. Supports network development and sets conditions for mission execution in likely or potential operational areas.

A2.4.9.9.2. Description. Operators will utilize active and passive observation, area and network familiarization, site surveys, and mapping the information environment to develop knowledge of the operational environment; establish human, physical, or virtual infrastructure and networks; and for target development. Given a scenario, operators will demonstrate understanding of commander's critical information requirement, select appropriate techniques, execute operational preparation of the environment according to core task principles, and complete

appropriate reporting. **(T-3)** Techniques include, but are not limited to:

A2.4.9.9.2.1. Reconnaissance.

A2.4.9.9.2.2. Technical/physical surveillance.

A2.4.9.9.2.3. Establishing personal/professional relationships.

A2.4.9.9.2.4. Integrating intelligence, surveillance, and reconnaissance.

A2.4.9.9.2.5. Sharing intelligence or operational information.

A2.4.9.9.2.6. Establishing communications.

A2.4.9.9.2.7. Provision of fires support.

A2.4.9.9.2.8. Provision of medical/casualty evacuation.

A2.4.9.9.2.9. Support of sensitive site exploitation. (See JP 3-05, *Joint Doctrine for Special Operations,* and USSOCOM 525-16, *Preparation of the Environment,* (S//NF).)

A2.4.9.10. Advanced Special Operations Techniques (Basic). In accordance with USSOCOM D 525-5.

A2.4.9.11. JTAC Employment. Maintain Joint Terminal Attack Controller (JTAC) currency and evaluation in accordance with AFMAN 10-3505V1 and AFMAN 10-3505V2, or USSOCOM-M 350-5 as directed.
