Pages: 12

This directive implements Air Force Policy Directive (AFPD) 38-1, *Manpower and Organization* and Air Force Mission Directive 13, *Air Force District of Washington (AFDW).* This Mission Directive does not apply to the Air Force Reserve Command or the Air National Guard. Ensure all records created as a result of processes prescribed in this publication are maintained in accordance with AFI 33-322, *Records Management and Information Governance Program*, and disposed of in accordance with Air Force Records Information Management System (AFRIMS) Records Disposition Schedule (RDS) located at **https://afrims.cce.af.mil**. Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using the AF Form 847, *Recommendation for Change of Publication,* through the appropriate functional chain of command to HQ AFDW/A5X, 1500 West Perimeter Road, Suite 5370, Joint Base Andrews, MD 20762.

This mission directive defines the mission of the 844th Communications Group (844 CG), communicates responsibilities of the 844 CG to subordinate organizations and assigned personnel and explains the organizational relationship between the 844 CG, Headquarters Air Force District of Washington (HQ AFDW) and Headquarters Air Force (HAF).

SUMMARY OF CHANGES

This directive reflects substantive and administrative changes and should be read in its entirety. Changes include the roles and responsibilities of 844 CG in accordance with recent organizational

realignment including 844th Communications Squadron (844 CS), 794th Communications Squadron (794 CS), and 744th Communications Squadron (744 CS). These changes include the standup of the 794 CS on Joint Base Anacostia-Bolling (JBAB) and moving the Unit Deployment Manager (UDM) responsibilities under the Commander's Support Staff (CSS). Additional responsibilities are identified for the Operations (SCO), Quality Assurance (QAR), Plans and Engineering (SCX), and Resources (SCR) divisions. Additionally, revised statements under 744 CS reflect correct terminology based on DAFI 33-360, *Publications and Forms Management*.

1. Mission.

1.1. The 844th Communications Group (844 CG):

1.1.1. Manages the National Military Command Center (NMCC) communications and information technology operations through execution and facilitation of the Air Force role as the executive agent for the NMCC. Provides worldwide Executive Travel Communications for the Secretary of Defense (SECDEF), Chairman of the Joint Chiefs of Staff (CJCS), and HAF senior leadership.

1.1.2. Manages all HAF Enterprise Information Technology (IT) Services across the Air Force National Capital Region (AFNCR) and AFDW supported Air Force Elements (AFELMs) worldwide. Serves as the Chief Information Technology Officer (CITO) for AFDW and organizes, trains, equips, and deploys expeditionary combat support forces for Homeland Operations and worldwide Air Expeditionary Forces (AEFs). While in garrison, the 844 CG provides comprehensive communications and information management support to the Department of Defense (DoD), HAF, HQ AFDW and subordinate Wings, 89th Airlift Wing (89 AW), and other units at/or supported by Joint Base Andrews-Naval Air Facility Washington (JBA-NAFW), JBAB, and the Pentagon. On order, the 844 CG provides support to Joint Task Force-National Capital Region (JTF-NCR) and to United States Northern Command (USNORTHCOM).

2. Command.

2.1. Organization Structure. The 844 CG is a subordinate unit of AFDW and supports three communications squadrons: 744 CS, 794 CS, and 844 CS. The group is organized in accordance with AFI 38-101, *Manpower and Organization*, and HQ USAF approved variances.

2.2. Organization Changes. Requests to change the organizational structure of 844 CG must be made in accordance with AFI 38-101, *Manpower and Organization* through HQ AFDW/A1.

3. Responsibilities.

3.1. Commander (844 CG/CC):

3.1.1. Reports directly to the AFDW Commander.

3.1.2. Organizes, trains, and equips 844 CG forces for operations within the NCR and for worldwide deployments. Provides communications and IT systems support to federal organizations within the NCR to include travel support to the SECDEF, CJCS, HAF, and the 320th Air Expeditionary Wing (AEW) when activated. Serves as the Risk Management Framework (RMF) Administrator and Information System Owner (ISO) for assigned

NMCC Nuclear Command and Control (NC2) capabilities/systems and other supported network enclaves within the AFNCR cyberspace environment.

3.2. Deputy (844 CG/DD):

3.2.1. Assists the Commander in the performance of duties and responsibilities. Serves as the Technical Director and CITO for communication and information systems and technology insertion for the 844 CG and AFDW and as the Group's senior civilian. Manages 844 CG activities to ensure seamless operations and efficient use of personnel.

3.3. Chief Enlisted Manager (844 CG/CEM):

3.3.1. Serves as the principal advisor to the Commander and staff on matters of health, welfare, morale, and utilization of enlisted personnel within the 844 CG. Provides leadership advice in organizing, equipping, and training assigned personnel to most effectively accomplish the mission. Resolves enlisted issues for subordinate squadrons and group staff. Serves on the Team Andrews Command Chief Board as an installation partner.

3.4. First Sergeant (844 CG/CCF):

3.4.1. Educates and communicates with the enlisted force on policies, goals and objectives, and ensures support agencies are responsive to the needs of unit personnel. Provides the Commander a mission-ready enlisted force to execute the mission.

3.5. Executive Officer (844 CG/CCE):

3.5.1. Responsible to the Commander for the overall efficient operation of the commander's support staff. Provides general oversight and guidance on 844 CG administrative matters and exercises tasking authority for all 844 CG organizations and resources.

3.6. Commander's Support Staff (CSS):

3.6.1. Provides information and guidance on collaboration tools, workflow, records management, content management, time and attendance, travel, taskings, and information access management to the 844 CG leadership. Manages civilian and military training activities and implements the 844 CG unit deployment process as the UDM.

3.6.2. Provides oversight of the commander's self-inspection and training programs. Serves as the 844 CG liaison to 316th Wing (316 WG) and 11th Wing (11 WG) Inspector General (IG) offices for By-Law Inspections on wing and installation programs. Focal point for Management Internal Control Toolset (MICT) and Inspector General Evaluation Management System (IGEMS) for inspection observations. Plans and executes exercises to ensure readiness. Manages military and civilian training programs on behalf of the 844 CG.

3.7. Operations Division (SCO):

3.7.1. Network Cyber Operations: Develops and implements strategic guidance in support of tactical level operations executed by the 744 CS, 794 CS, and 844 CS. Directs NIPRNet and SIPRNet Cyber Operations requirements for the 844 CG. Manages network vulnerabilities, Client Agent Health, Account Management, the Protective Distribution Systems (PDS), File/Shared Drives, Domain Servers, Anti-Terrorism Program, Operations

Security (OPSEC) Program, TEMPEST, MAJCOM Communications Coordination Center (MCCC), Priority Management, and the Cyber Scorecard. Manages telecommunications mobile devices, audiovisual, annual maintenance requirements, and software license management.

3.7.2. Cybersecurity: Ensures network vulnerability and cybersecurity activities are optimally aligned both internally and with Air Force guidance. Directs NIPRNet and SIPRNet cybersecurity and information assurance (IA) activities for the 844 CG. Guides NMCC-related cybersecurity activities. Manages the Unit RMF program requirements, Security Impact Assessment (SIA), Computer Network Defense (CND), Information Security Program, Industrial Security Program, Physical Security Program, and Personnel Security Program. Serves as the program manager for assigned network enclaves.

3.7.3. Enterprise Watch and Operations Center (EWOC): Leads the day-to-day tactical operations for JBA-NAFW, JBAB, and numerous sites designated as GSUs. 844 CG operates the contracted EWOC and government Production Work Centers (PWCs). The EWOC provides situational awareness to the tactical leadership team from first contact through after action reporting. The EWOC is comprised of an Operations Watch (Ops Watch), Communications Focal Point (CFP), Major Incident Response (MIR) cell, service desk, and Call Center.

3.8. Quality Assurance Division (SCQ):

3.8.1. Serves as program management/senior technical advisor on contract and acquisition activities. Provides IT acquisition, vendor management, and contract oversight of all 844 CG contracted services. Serves as the Program Manager and Program Management Office for the AFNCR Information Technology Services Contract. Monitors period of performances for timely execution, ensures timely invoice payments, relevant and timely contract modifications, Contract Development, and IT Acquisition. Oversees IT System Development.

3.8.2. Quality Assurance: Provides trained Contracting Officer Representative (COR) and Quality Assurance Representatives (QARs) to continuously monitor, track, and report contractor performance. Validates and verifies performance metrics, contractor deliverables, and Performance Work Statement (PWS) “shall” statements. Ensures personnel are trained to IT Acquisition Certification Levels I, II, and III.

3.8.3. IT Asset Management: Serves as the 844 CG focal point accountable for oversight of the IT asset management program for the AFNCR. Develops goals and objectives that ensure the organization contract and acquisition objectives are aligned with the strategic plan and concept of operations. Provides foundational data in support of life cycle management activities.

3.9. Plans and Engineering Division (SCX):

3.9.1. Plans and Requirements: Provides strategic planning and management of the requirements process, including technical integration and implementation of activities for the 844 CG. Focuses on the ability of current and future cyberspace systems to support user needs, and on the timely identification, funding, acquisition, and implementation of required resources. These systems begin with a validated mission need and evolve through the planning and implementation of deliverables on time and within budget. The Division

typically serves as the project/portfolio manager for enterprise and downward directed efforts, including support for Military Construction and other Civil Engineer-related activities.

3.9.2. Enterprise Architecture and Change Management: Manages and facilitates development of the enterprise architecture for the supported cyberspace environment, including the 844 CG Enterprise Architecture Plan. Oversees the 844 CG change management governance process, network and system hardware/software configuration management activities (except systems such as the NMCC that have unique configuration control processes), and IT engineering. Maintains the enterprise baseline.

3.9.3. Agreements: Manages Support Agreements for the group, including Memoranda of Agreements (MOAs), Memoranda of Understandings (MOUs), Service Level Agreements (SLAs), and Installation Support Agreements (ISAs).

3.9.4. Contract Development and IT Acquisition: Oversees IT System Development and Lifecycle management to include hardware, software, licensing, telecommunications, mobile devices, audiovisual, and annual maintenance requirements.

3.10. Resources Division (SCR):

3.10.1. Resources: Serves as the 844 CG financial resource manager. Manages the Group's financial resources through Program Objective Memorandums and Budget Estimates Submissions to include budget execution and billing. Executes the 844 CG budget per the Commander's direction.

3.11. 744th Communications Squadron (744 CS):

3.11.1. The 744 CS is the base communications squadron for JBA-NAFW. The 744 CS is organized into three flights: Operations (SCO), Plans & Resources (SCX) and Special Missions (SCP). Additionally, the 744 CS has a Quality Assurance (QA) function that ensures a program, system, or process is of the type/quality that meets or exceeds mission requirements. 744 CS manages all base-level (not enterprise-level) communications requirements.

3.11.2. Operations Flight (SCO):

3.11.2.1. Coordinates with the Defense Information Agency (DISA) to maintain and provide long-haul communications to the AFNCR and thousands of mission partners around the globe. Installs, operates, and maintains Outside Plant (OSP) and Inside Plant (ISP) cable infrastructure, and core NIPR and SIPR network devices for JBA-NAFW. Operates and maintains the core systems providing analog and unclassified Voice-over-Internet Protocol (VoIP) services. Operates and maintains the Andrews Region Command Post's (ARCP) Giant Voice system and Land Mobile Radios (LMR). Maintains the 316th Security Forces Group's (316 SFG) hangar security system which services the Presidential Airlift Group (PAG).

3.11.3. Plans and Resources Flight (SCX):

3.11.3.1. Manages local requirement validation and technical solution implementation to include project management, system upgrades, and fulfilling new requirements. Serves as the Commercial Communications liaison between government and commercial telecommunication vendors validating billing and reimbursable expenses.

Provides Spectrum Management services for JBA-NAFW. Manages all base blueprint and Base Installation Records and Drawings (BIRDs) which account for inside and outside plant drawings in the Cyberspace Infrastructure Planning System (CIPS), virtual repository modules Visualization Component (CVC), and ISP.

3.11.4. Special Missions Flight (SCP):

3.11.4.1. Establishes and updates the office of record in AFRIMS, maintains monthly deposition of records, and stages records for orderly maintenance of historical data. Provides inventory of record assistance/guidance. Conducts biennial records management (RM) staff assistance visits on organizations within the NCR. Conducts RM courses for unit commanders and designated unit RM POCs. Logs, processes, and prepares support packages for Freedom of Information Act (FOIA) and Privacy Act (PA) requests. Reviews and edits publications for accuracy and compliance IAW DAFI 33-360, *Publications and Forms Management* before final approval/submission for publication and forms biennial pubs review. Manages SharePoint access and permissions. Manages all COMSEC operational accounts on JBA-NAFW. Receives, stores, issues, and accounts for authenticators and COMSEC materials.

3.12. 794th Communications Squadron (794 CS):

3.12.1. Ensures squadron network operations and activities are aligned with the 844 CG Strategic Plan and Concept of Operations. Provides Defense Switched Network and Commercial Telephone Services for JBAB. Manages all base-level communication system requirements documents for telecommunication installations and activations (Voice, Data, Computer, etc.), including circuit actions and commercial requirements. Executes radio frequency spectrum management activities at base level. Manages Communication Systems Information Records for JBAB, including Command, Control, Communications, Computer, Intelligence, Surveillance, and Reconnaissance (C4ISR) Infrastructure Planning System storage. The QA program, reports to the squadron commander and ensures a program, function, process, equipment, system, end item or service are of the type and quality to meet/or exceed mission requirements.

3.12.2. Communications Capabilities: Operates and maintains JBAB network and voice equipment supporting AFNCR users and legacy voice dial tone for all JBAB customers. Provides touch maintenance on AFNCR VoIP devices. Operates and maintains the JBAB Giant Voice system and LMR antenna site. Provides OSP and ISP services to support network cable infrastructure.

3.12.3. Information Management: Establishes and updates the office of record in AFRIMS, maintains monthly deposition of records, and stages records for orderly maintenance of historical data. Provides inventory of record assistance/guidance. Conducts biennial RM staff assistance visits on organizations within the NCR. Conducts RM courses for unit commanders and designated unit RM POCs. Logs, processes and prepares support packages for FOIA and PA requests. Reviews and edits publications for accuracy and compliance IAW DAFI 33-360, *Publications and Forms Management* before final approval/submission for publication and forms biennial pubs review. Manages SharePoint access and permissions.

3.12.4. Requirements: Manages local requirement validation and technical solution implementation to include project management, system upgrades, and fulfilling new requirements. Serves as the Commercial Communications liaison between government and commercial telecommunication vendors validating billing and reimbursable expenses. Manages all base blueprint and Communications Systems & Infrastructure Records (CSIR) which account for OSP cabling. Serves as 794 CS representation for any military construction or Civil Engineering work conducted on JBAB.

3.13. 844th Communications Squadron (844 CS):

3.13.1. Ensures all squadron network operations and activities are aligned with the 844 CG Strategic Plan and integrates with the EWOC and SAF/AAI as significant mission partners. Provides oversight and Assistant Contracting Officer Representatives (ACORs) activities for IT contracted services for HAF, the Pentagon and other designated sites as required within a 300 mile radius, to include Continuity of Operations (COOP) locations. Manages the Squadron Report of Survey (ROS) Program, NMCC Agreements and Accreditation actions required under the RMF.

3.13.2. Support to NMCC: Executes executive agent responsibilities for the NMCC C4ISR systems and provides facility engineering and maintenance support to include mission critical primary/back-up power, chilled water, access control, Chemical, Biological, Radiological, and Nuclear (CBRN) Defense, plumbing, and electrical support. Provides QA and ACOR activities for all contracted services within the NMCC. Executes executive agent responsibilities for the NMCC to include agreements, security related activities, access control, multi-media and Video Teleconferencing (VTC) support. Supports all NMCC Nuclear Command, Control, and Communication (NC3) Systems. Supports numerous National Military Command System (NMCS) Boards and Issue Working Groups as a member, chair, or co-chair.

3.13.3. Executive Communications: Provides communication support 24-hours a day/7-days a week to locations worldwide, including a wide array of aircraft and ground communications packages (voice, video, data, and network services) in support of SECDEF, Deputy Secretary of Defense (DEPSECDEF), CJCS, Vice Chairman of the Joint Chiefs of Staff (VCJCS), and HAF as well as personal communications (PC) support to the SECDEF and DEPSECDEF, throughout the NCR, in residence, and during other travel missions, as required.

3.13.4. Communications Capabilities: Operates/maintains communications and information technology systems providing technical and systems support in the Pentagon within a 300 miles radius for HAF, Air Force Agency's and federal government organizations. Manages all HAF communication system requirements in accordance with 844 CG policy. Provides program management for the North Star network. Provides IT and NC3 support to Site-R and alternate sites. Ensures communications and IT support services for HAF and other federal and government organizations and performs all system administration duties as required by agreements. Provides Automated Budget Interactive Data Environment System, Global Command and Control System program management, and HAF security officer duties required to support those unique systems. Monitors the 844 CS Report of Survey program and asset management activity for HAF and AFDW organizations located in the Pentagon.

3.13.5. Information Management: Manages all AF COMSEC operational accounts within the Pentagon, to include HAF, NMCC, and all other AF units within the NCR not on an installation (i.e. American Red Cross, alternate sites). Performs COMSEC inspections and maintains user account information for senior Air Force leadership. Receives, stores, issues, and accounts for authenticators and COMSEC materials. Serves as the liaison between subaccount holders and authorized item managers for procurement of COMSEC materials.

3.13.6. Plans and Requirements: Manages C4 systems planning for HAF leadership within the Pentagon. Provides strategic planning, requirements analysis, and integration support. Ensures timely development and processing of all IT requirements, to include implementation of associated solutions. Supports HAF IT Management Board planning initiatives and coordinates architecture direction and application of standards with Joint Service Providers (JSP). Provides SLA, MOA, MOU, and contract management support. Monitors executive support contract services. Operates and maintains communications and IT systems while providing technical and systems HAF support at the Pentagon and other Air Force organizations as directed.

JOEL D. JACKSON
Major General, USAF
Commander
