Flying Operations

TRAINING RECORDS AND PERFORMANCE EVALUATION IN FORMAL FLYING TRAINING PROGRAM

COMPLIANCE WITH THIS PUBLICATION IS MANDATORY

ACCESSIBILITY: Publications and forms are available for downloading or ordering on the e-Publishing web site at **www.e-Publishing.af.mil**.

RELEASABILITY: There are no releasability restrictions on this publication.

OPR: AFGSC/A3TO

Supersedes: AFGSCI11-464, 1 February 2010
Pages: 14

This instruction implements Air Force Policy Directive (AFPD) 11-4, *Aviation Service*. It establishes the minimum United States Air Force (USAF) standards for training documentation of all aircrews enrolled in formal flying training. This instruction establishes requirements for the completion, maintenance, and disposition of training records in support of formal syllabus training. It prescribes procedures for documenting flying and simulator performance and providing the data to instructors, supervisors, and training managers. This instruction applies to units, including Air Force Reserve Command (AFRC), conducting formal flying training courses under an Air Force Global Strike Command (AFGSC) approved syllabus. This instruction does not apply to operational units conducting training under other directives, Air National Guard (ANG) units, United States Space Force (USSF) or MH-139 Training Units under AETC. Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using the DAF Form 847, *Recommendation for Change of Publication.* Ensure that all records created as a result of processes prescribed in this publication are maintained in accordance with (IAW) AFI 33-322, *Records Management and Information Governance Program*, and disposed of IAW Air Force Records Information Management System (AFRIMS) Records Disposition Schedule (RDS). The authorities to waive wing, and unit level requirements in this publication are identified with a tier number ("T-0, or T-3") following the compliance statement. See Department of the Air Force Manual (DAFMAN) 90-161, *Publishing Processes and Procedures*, for a description of the authorities associated with the Tier numbers. Submit requests for waivers for tiered or non-tiered compliance items through the chain of command to the appropriate tier waiver approval authority, utilizing guidance identified in DAFMAN 90-161. This publication may be supplemented at any

level, but all supplements must be routed to the OPR of this publication for coordination prior to certification and approval. The use of the name or mark of any specific manufacturer, commercial product, commodity, or service in this publication does not imply endorsement by the Air Force. This instruction requires collecting and maintaining information protected by the Privacy Act of 1974 authorized by Title 10, United States Code, Section 8013. System of Records Notice F036 AF PC C, Military Personnel Records System, applies.

SUMMARY OF CHANGES

This document has been changed to reflect the transfer of the B-1B and E-4B mission from Air Combat Command (ACC) to Air Force Global Strike Command (AFGSC). This document is substantially revised and must be completely reviewed.

Chapter 1

ROLES AND RESPONSIBILITIES

1.1. Roles and Responsibilities.

1.1.1. AFGSC/A3T will provide overall guidance for the operational aspects and requirements of the training records and performance evaluation in formal flying training program.

1.1.2. FTUs and FTFs will adhere to the guidance listed in this publication. If additional or supplemental training requirements are necessary, FTUs/FTFs will coordinate with AFGSC/A3T for approval IAW **paragraph 2.11** of this publication.

1.2. Deviations and Waivers. Submit requests for waivers through the chain of command to the appropriate Tier waiver approval authority, or alternately, to the Publication office of primary responsibility (OPR) for non-tiered compliance items. See DAFMAN 90-161, *Publishing Processes and Procedures*, for a description of the authorities associated with the Tier numbers. Waiver requests will be submitted using the AF Form 679, Air Force Publication Compliance Item Waiver Request/Approval, or via e-mail or memorandum if the form is unavailable.

Chapter 2

GENERAL INFORMATION

2.1. General. The objective of formal flying training is to ensure student aircrews attain the skill level established by syllabus course training standards. AFGSC formal flying training will offer aircrews the opportunity to develop their maximum individual capabilities within the constraints of available sorties, facilities, or other resources. This instruction describes the forms and procedures used to document the student's progress toward and attainment of course training standards.

2.2. AFGSC Weapon System Training Program Managers. AFGSC/A3TO is the training program manager and coordinates AFGSC actions associated with programming, scheduling, and conducting formal training for the B-1, B-2, B-52 and E-4B weapon systems. AFGSC/A3TW represents the USAF Weapons School and their Weapons Instructor Courses.

2.3. Screening of Student Data. Units will screen incoming student records to ensure that they are complete and that course entry prerequisites are met. **(T-3)** Units will immediately notify the AFGSC training program manager if records are missing or if the student does not meet course entry prerequisites and there is no evidence of a waiver. The AFGSC training program manager will notify the appropriate training unit when course entry prerequisites are waived for any student. Personnel Reliability Program (PRP) / Personnel Reliability Assurance Program (PRAP) screening for each student requiring it for their MWS should be accomplished before the student begins training at the FTU.

2.4. Class Quotas. The AFGSC Programmed Flying Training (PFT) document establishes quotas for each class. The AFGSC training program manager will notify affected units of changes of quotas. If the number of available students fails to equal the latest established class quota, the training unit will immediately notify the AFGSC training program manager.

2.5. Student Training Records:

2.5.1. FTU/FTF will prepare Student Training Record Folders or Electronic Gradebook for each student entering training.

2.5.2. Lists of records that will be filed/maintained in the Student Training Record Folder are in **Chapter 2** of this instruction. Individual FTU/FTFs may develop local training forms with the approval of the OG/CC (or equivalent). These forms will include but are not limited to the student's name and rank, instructor's name and rank, date of mission, sortie number, module or phase completed (if applicable).

2.5.3. Student Training Record Folders will be available for review by instructors, supervisors, and student aircrew members.

2.5.4. Instructors will review Student Training Record Folders prior to each flight, simulator or training event. Supervisors will make weekly reviews of the progress of student aviators.

2.6. Distinguished Graduates (DGs). The goal in designating DGs is to give formal recognition to aircrew members who demonstrate superior performance. DG status does not automatically apply to the best student in a given class; the highest standards apply, and it is possible that a given class may have no DGs. The FTU/FTF is responsible for determining DG eligibility criteria. The

OG/CC or equivalent will approve the criteria and include it in this instruction and applicable supplement. Annotate Training Record, or equivalent, to reflect DG status for those selected.

2.7. Withdrawal from Training.

2.7.1. When a student is withdrawn from training for medical or other reasons (e.g., extended Duties Not Involving Flying [DNIF], Flying Evaluation Board [FEB], waiver to FEB, death, etc.), the training unit will immediately notify the AFGSC weapon system training program manager (AFGSC/A3TO) by message or e-mail with an information copy to Numbered Air Force (NAF) CD. For ANG students, the training unit will request to have the student recalled from ANG/DPDF.

2.7.2. Recalling a student from training is initiated by the gaining unit, students cannot withdraw themselves. In accordance with (IAW) AFMAN 11-202V1, *Aircrew Training*, page 5, paragraph 1.5.4.., Recall Procedures; MAJCOMs will notify training command headquarters and training units prior to recalling a student from a formal school course. Recalling a student will only be done for reasons other than performance. (e.g., emergencies, unforeseen delays in training, etc.) If the student is a recent Specialized Undergraduate Pilot Training/Undergraduate Combat Systems Officer Training or IFF graduate, send an information copy of the message to AFPC/DPAOC. The message will include the student's name, rank, DoDID, and assignment action number; the course title and class number from which the student was withdrawn; the reason for withdrawal; and any effect on follow-on courses/assignments. See DAFI 36-2110, *Assignments*, for additional guidance.

2.8. Disposition of Student Training Records:

2.8.1. Student Training Records will be either hand-carried by the graduate or mailed/e-mailed directly to the gaining unit within 10 working days after the graduation date. Only complete records may be hand-carried. If any portion of the records is incomplete when the graduate departs, the FTU/FTF must complete and mail the records within the time limit.

2.8.2. Student Training Records of aircrew members who are withdrawn from a course due to requests for suspension, fear of flying, FEB action for failure to meet course training standards, or by reason of death, will be filed and then destroyed.

2.8.3. The unit will retain Student Training Records of aircrew members who complete formal training and remain in the same unit.

2.8.4. USAF Weapons School student grade books will remain at the weapons school. The USAF Weapons School will complete a Training Record and Training Summary; and then forward them to the student's gaining unit.

2.8.5. "Academic only" courses do not require student grade books. However flying courses that consist of academics at the FTU/FTF and in-unit flying still require grade books.

2.9. Course Critiques. Units conducting formal flying training courses will solicit student comments on the effectiveness of instruction using locally developed end-of-course critiques.

2.10. Classification of Training Systems. AFGSC uses two generalized training systems in flying training programs. The OG/CC (or equivalent) will determine the system the unit uses and will notify the AFGSC training program manager. Once designated, the FTU/FTF will apply the chosen system to execute the syllabus.

2.10.1. Sortie-Driven System. The basic building block for student progression is completion of specific sorties, modules ("blocks"), or phases.

2.10.2. Event-Driven System. The basic building block for student progression is the individual event or training task. The unit may combine events or tasks in appropriate sequences on a given mission.

2.11. Grading Criteria. FTUs/FTFs *may* use the criteria in **Table 2.1** to grade specific tasks and **Table 2.2** to grade each flight, simulator mission, and training event." Units may also use criteria developed by the unit and approved by AFGSC/A3T. Reference to additional criteria, such as written behavioral objectives, is permissible.

2.11.1. Determine individual mission element grades and the overall mission grade by comparing the student's performance with the grading criteria. The overall grade is an assessment of the student's achievement of the primary mission objectives for that sortie.

2.11.2. As a minimum, record grades for each mission on the Individual Mission Grade sheet.

Table 2.1. Task Grading Criteria.

Grade	Explanation of Grade
K	"Unknown" - Performance was not observed or the element was not performed. Can also be identified by task being left blank.
D	"Dangerous" - Performance was unsafe (one element marked "Dangerous" will require an event grade of "NE/SNP").
F	"Familiarization" - Exposure to an event through academic instruction and/or instructor supervised activity in flight/ATD simulated. Only available on Familiarization Special Events
0	Performance indicates a lack of ability or knowledge.
1	Performance is safe but indicates limited proficiency. Makes errors of omission or commission.
2	Performance is essentially correct. Recognizes and corrects errors.
3	Performance is correct, efficient, skillful, and without hesitation.
4	Performance reflects an unusually high degree of ability.

Table 2.2. Event Grading Criteria.

Grade	Explanation of Grade
U	"Unsatisfactory" - Unsatisfactory progress or regression
S	"Satisfactory" - Progress is satisfactory, but Required Proficiency Level (RPL) is not achieved
P	"Proficient" - Achieved the required proficiency level (Ready for Evaluation IAW 11-2MDSV2)

Grade	Explanation of Grade
E	"Excellent" - Significant progress beyond RPL
NE/SNP	"Non-effective/student non-progression"
NE/OTH	"Non-effective/Other" - Events not completed due to weather, equipment malfunctions, abort or cancelation

2.12. Course Training Standards. Use course training standards in course design to describe the minimum overall performance levels required to progress through and/or graduate from a course. Standards will reflect average performance as described in the units' grading standards; an example would be a "1", "2", or "3", as defined above in **Table 2.1**. It is inappropriate to design courses to train to the upper or lower end of the grading scale.

2.13. Documentation of Achievement of Course Training Standards:

2.13.1. Sortie-driven Systems. The student's immediate supervisor or instructor (academic or flight), whichever is applicable, will determine achievement of course training standards in each phase, module, or course for sortie-driven system. The supervisor/instructor will enter the following statement in the remark's section of the final individual grade sheet at each stage: "Course training standards achieved for (enter appropriate phase, module, or course)." Enter the standards achieved in each phase/module/course on the training record.

2.13.2. Event-driven Systems. The student's immediate supervisor/instructor will determine that achievement of proficiency in all required events is complete before the AFMAN 11-202V2, *Aircrew Standardization/ Evaluation Program*, flight. The instructor will enter the following statement on the master training record: "Proficiency achieved in all required events."

2.14. Responsibilities of Syllabus Offices of Primary Development Responsibility (OPDRs):

2.14.1. Determine the level of proficiency required of each task in the task list and publish course training standards in each syllabus as established by ACCI *11-252 ACC Formal Operations Training Publication Management*.

2.14.2. Use the training task list to develop master overprints of mission elements for Individual Mission Grade Sheets for flying and simulator missions.

2.15. Non-effective Missions:

2.15.1. Sortie-driven Systems:

2.15.1.1. Mark a mission Non-effective/Student Non-progression (NE/SNP) on the Individual Mission Grade Sheet if student performance is not sufficient to allow progression to the next syllabus mission or if the student receives a "Dangerous" performance grade. Make an entry citing specific student performance deficiencies. For missions marked NE/SNP, the student will fly an additional instruction sortie or equivalent training ("X" sortie), for example, if TR-6 is NE/SNP, annotate the additional sortie as TR-6X.

2.15.1.2. Mark a mission Non-effective/Other (NE/OTH) on the Individual Mission Grade Sheet when the student cannot complete specific elements called for in the mission and the

unit cannot incorporate them into a subsequent mission. This is not an "X" sortie. The instructor will make an entry citing the specific reason the mission was non-effective (for example, weather, weapon system malfunction, air abort, etc.). For missions marked NE/OTH, the mission will be reflown annotated with an ‘A’ letter suffix designator and increment alphabetically for additional events as required. Only append the letters “C” or “R” to an evaluation event. For example, if TR-6 is NE/OTH, fly another mission with the TR-6A annotation.

2.15.2. Event-driven Systems:

2.15.2.1. Mark an event NE/SNP on the Individual Mission Grade sheet if the student has not met proficiency requirements and is unable to complete an AFMAN 11-202V2 mission. Entries by the instructor will cite specific student performance deficiencies. For events marked NE/SNP, the student will fly an additional instruction sortie ("X" sortie) concentrating on the event(s) requiring proficiency. The sortie will be reflown as the last sortie the student attempted (for example, if S-14 is the last sortie prior to the AFMAN 11-202V2 mission, annotate the X sortie as S- 14X).

2.15.2.2. Mark an event or sortie NE/OTH on the Individual Mission Grade Sheet when the student cannot complete specific events called for in the mission and the unit cannot incorporate them into a subsequent mission. This is not an "X" sortie. The instructor will make an entry citing the specific reason the mission was non-effective (for example, weather, weapon system malfunction, air abort, etc.). For missions marked NE/OTH, the mission will be reflown annotated with an ‘A’ letter suffix designator and increment alphabetically for additional sorties as required. Only append the letters “C” or “R” to an evaluation event. Events marked NE/OTH must be completed to at least a Satisfactory level or waived prior to attempting the AFMAN 11-202V2 mission or graduation.

2.16. Procedures for Handling Substandard Performance (Flying and Simulator Missions). Remedial action for failure to meet performance standards may include training/practice using academic programs, part-task trainers, simulators, or additional sorties.

2.16.1. Additional Sorties:

2.16.1.1. Sortie-driven Systems. The unit will call additional instructional sorties "X" sorties and identify them by adding the suffix "X" to the normal syllabus sortie number. The student will fly an "X" sortie (or equivalent training) when the instructor marks a mission Non-effective/Student Non- progression (NE/SNP) or when a student fails to meet course training standards at the end of a phase, module, or course. If an "X" sortie is not successful and requires additional "X" sorties for the same syllabus sortie annotate those additional sorties with suffixes "XX," "XXX," etc., to the normal syllabus sortie number. The squadron commander may authorize additional instructional sorties only to the extent that such flights would result in the student meeting course requirements.

2.16.1.2. Event-driven Systems. Additional instructional sorties are "X" sorties and identified by adding the suffix "X" to the last normal training sorties prior to checkride. A student will fly an "X" sortie upon the failure to meet end of course training standards and completion of the total number of syllabus sorties. If an "X" sortie is not successful and requires additional "X" sorties for the same events. The instructor will annotate the additional sorties by adding suffixes "XX," "XXX" etc., to the number of the last training

sortie. The squadron commander may authorize additional instructional sorties/ATD events only to the extent that such events would result in the student meeting end of course requirements.

2.16.1.3. Maximum Additional Sorties. Each AFGSC formal course syllabus determines the maximum number of "X" sorties per course. "X" sorties beyond the course limit require the notification of the training program manager in addition to approval as described in the syllabus. Corrective action (adding the suffix "C" to the normal syllabus sortie number) and recheck sorties (the suffix "R") generated because of standardization/evaluation flight check deficiencies are not "X" sorties.

2.16.2. Progress Check Flight. A progress (PROG) check flight is an additional sortie flown at the discretion of the squadron commander to document a student's proficiency level and to recommend follow-on action. A PROG check flight is outside of the programmed course event flow and is intended to evaluate the student's current training progress/status and does not prescribe new learning objectives to convey new information beyond what had already been taught. There is no requirement to provide a PROG check flight.

2.16.2.1. Identify a progress check flight by adding the suffix "PROG" to the normal syllabus sortie number. It is not countable as an "X" sortie.

2.16.2.2. The squadron commander may direct a progress check at any time. The progress check will include an assessment of the student's basic flying and/or mission skills. Recommendations of personnel conducting progress checks may be, but are not limited to: continuation in the normal course of training, additional training followed by another progress check, or elimination from the course.

2.16.2.3. The FTU/FTF will conduct, if required, an FEB IAW DAFMAN 11-402, *Aviation, Missile and Parachutist Service*.

2.16.3. The training unit will notify the ANG/DPDF if an ANG student is placed into remedial training for failure to meet performance standards.

2.17. Class Training Summary. Training units will send a summary for each graduating class to the AFGSC/A3TO weapon system training program manager. The report will contain the following:

2.17.1. A list of graduates by name, rank, and end assignment.

2.17.2. Comments and recommendations concerning problem areas.

2.17.3. Number entering training (including washbacks from earlier classes).

2.17.4. Number graduating.

2.17.5. Number of individuals washed back to later classes.

2.17.6. Names of individuals withdrawn from training for any cause. Indicate new class designation for washbacks and specify reasons for withdrawals.

2.17.7. Number of additional missions flown (flight and simulator) due to student non-progression. Report type of event or mission.1.18.8. Summary of any waivers or training deferments to allow students to graduate with training deficiencies.

Chapter 3

STUDENT TRAINING RECORDS

3.1. Student Training Records. The following documentation will be filed/maintained in the physical or electronic Student Training Record Folder. The documentation will be applicable to both sortie and event driven systems. Each wing will develop a standard format for training records. Upon approval of the OG/CC or equivalent, the FTU/FTF may include local forms that meet school needs. FTU/FTFs will include locally developed forms in the local supplement to this regulation.

3.2. Completion of Records. Complete all records by computer or in ink. The records for each student should include:

3.2.1. **Flying/Simulator Training.** For each phase, enter the actual number of sorties flown. Enter the overall course-training standard achieved for each phase of training.

3.2.2. **Tactical/Weapons Delivery Accomplishment (as required).** Enter proficiency achieved in each event without regard to proficiency required. This will recognize above-or below-average performance (for example: required FAM but achieved QUAL or required QUAL, but achieved NONE).

3.2.3. **Training Deficiencies.** List all training deficiencies. Identify the office or agency that granted the waiver to graduate the student with a training deficiency.

3.2.4. **Academic Training.** For courses with exams, enter the percentage grade achieved. Enter the failed exam grade and followed by the make-up exam grade (for example, 72/89).

3.2.5. **End-of-Course/End-of-Phase Summary.** The summary should contain a brief description of the student's characteristic performance in each phase and should cite specific strengths, weaknesses, areas of improvement, and general attitudes. When a student conducts at least one event, an entry is mandatory for that phase of training. When two or fewer events constitute a phase, the instructor may combine entries with another phase (for example: Transition/Formation). To ensure accurate recall of desired details, supervisors/instructors will write phase summaries as soon as possible after the completion of each phase. The end-of-course summary will contain a brief description of the student's overall performance during the course and should include an overall summary of the student's judgment, situation awareness, flight discipline, and general airmanship. It will include an assessment of performance trends throughout the course and a recommendation of the degree of supervision the student will require at the gaining unit.

3.2.6. **Maintain a chronological record.** The student’s record will show all simulator and flying missions accomplished in chronological order.

3.2.7. **The Individual Mission Grade Sheet.** A student will receive a grade for each flying and simulator mission or training event where performance is under the supervision of an instructor. The instructor will complete the grade sheet prior to the next mission (unless flown with the same instructor on the same day) but in no case later than 48 hours following the mission or the first duty day following an Alert mission. Until sufficient information is available, the instructor may withhold an assessment of performance in events requiring

weapons scores, mission tape/mission data assessment, or any other data. The following should be documented on the individual mission grade sheet:

3.2.7.1. Heading. Include the Student's Name, Class Number, Position, Aircraft Information, Applicable Dates, and Instructor.

3.2.7.2. Grades Heading. Include AFGSC Grading Scale (K, D, F, 0, 1, 2, 3, 4) or the applicable grading scale from the formal course syllabus.

3.2.7.3. Training/Mission Profile. The instructor will detail the training or mission profile (e.g. Alert, Generation, local sortie, Aerial Refueling sortie, etc).

3.2.7.4. Training or Mission Tasks/Elements/Events. Include specific training or mission tasks/elements/events that could be accomplished in accordance with the course syllabus.

3.2.7.5. Grades for Training or Mission Tasks/Elements/Events. Instructors will enter the grade for each Duty, Task, Subtask, or Activity IAW the course syllabus using the applicable grading criteria. If just grading Duty with The Individual Mission Grade Sheet, an additional sheet with The Training Task List will be used to record specific task grades for the student.

3.2.7.6. Remarks. The instructor will use the remark section to record details of the mission including the following:

3.2.7.6.1. Student performance graded above standard to advise subsequent instructors of the student's training progress and possible potential for proficiency advancement.

3.2.7.6.2. Details of student performance graded below phase/block standard, as needed to properly advise subsequent instructors of the student's training progress.

3.2.7.6.3. Specific student performance deficiencies for missions marked NE/SNP.

3.2.7.6.4. Specific reason the mission was non-effective (for example, weather, weapon system malfunction, air abort, etc.) for missions marked NE/OTH.

3.2.7.6.5. Recommendations for additional training prior to the next syllabus mission.

3.2.7.6.6. The statement "course training standards achieved for (enter phase or course)" on the final grade sheet of the phase or course.

3.2.7.7. Event Grade. Used to enter in the overall effectiveness of the mission.

3.2.7.8. Instructor Signature and Student Initials.

3.2.7.9. When a student has a flight or simulator evaluation mission (IAW AFMAN 11-202V2), a duplicate copy of the AF Form 8, *Certificate of Aircrew Qualification,* may replace the grade sheet in the Student Training Record Folder.

3.3. Disposition of Student Training Records. The FTU/FTF will forward the training records to the student's gaining organization (note special requirements for the USAF Weapons School). Also, the school registrar will retain an electronic copy IAW DAF disposition schedule.

GLENN T. HARRIS, Brig Gen, USAF
