OPERATIONAL REPORTING (OPREP)

COMPLIANCE WITH THIS PUBLICATION IS MANDATORY

ACCESSIBILITY: Publications and forms are available for downloading or ordering on the e-Publishing website at **www.e-publishing.af.mil**.

RELEASABILITY: There are no releasability restrictions on this publication.

OPR: AFGSC/A3OC

Certified by: AFGSC/DA3O
(Lt Col Christopher J. Lovett)

Supersedes: AFI10-206_AFGSCSUP, 6 November 2015

Pages: 9

AFMAN 10-206, *Operational Reporting*, is supplemented as follows: This supplement prescribes MAJCOM operational reporting procedures for use in conjunction with AFMAN 10-206, *Operational Reporting*. It applies to all AFGSC organizations and personnel, including those in the AFGSC Command Center, CP, and Specialized Command and Control Elements (SC2E). This instruction does not apply to Air National Guard (ANG) or Air Force Reserve Command (AFRC) personnel. Further, it establishes availability requirements and associated policies, responsibilities and procedures for personnel assigned to AFGSC. This publication may not be supplemented or further implemented/extended. Refer recommended changes and questions about this publication to HQ AFGSC/A3OC, Policy and Procedures, Office of Primary Responsibility (OPR) using the AF Form 847, *Recommendation for Change of Publication*. The authorities to waive wing, and unit level requirements in this publication are identified with a tier number ("T-0, T-1, T-2, or T-3") following the compliance statement. See AFI 33-360, *Publications and Forms Management*, Table 1.1 for a description of the authorities associated with the Tier numbers. Submit requests for waivers through the chain of command to the appropriate tier waiver approval authority, utilizing guidance identified in AFI 33-360. Ensure that all records created as a result of processes prescribed in this publication are maintained in accordance with Air Force Manual (AFMAN) 33-363, *Management of Records*, and disposed of in accordance with the Air Force Records Information Management System (AFRIMS) Record Disposition Schedule (RDS).

SUMMARY OF CHANGES

This document has been substantially revised and needs to be completely reviewed. Major changes include: clarification of sensitive reporting guidance for AFGSC Commander's Critical Interest Requirements (CCIR) reports, and supplemental guidance for Nuclear Command, Control, and Communications (NC3) reporting.

1.2. (Added) The AFGSC Commander's Critical Interest Requirements (CCIR). This report provides the AFGSC Commander and selected key staff, the information necessary for timely operational decisions. CCIRs are used to report events or incidents which do not meet Air Force-level operational reporting criteria but are of interest to the AFGSC Commander. The main criterion for inclusion in the AFGSC CCIR system is the requirement for immediate critical information to make timely operational decisions for command and control of nuclear and conventional forces. Submitting an AFGSC CCIR does not change, nor is it a substitute for, any other report required (e.g., Situation Reports, accident or incident investigation reports, etc.) or other directives. Real-world AFGSC CCIR reports take priority over exercise events **(T-2)**.

1.2.1. **(Added)** AFGSC CCIRs will mirror OPREP-3 reporting procedures (i.e. subject line, timing, matrix use, synchronous reporting), but will not be transmitted outside of AFGSC channels, unless otherwise directed. **(T-2)**.

2.6.2. Ensure timely and accurate reporting for all events/incidents that meet HQ AFGSC reporting criteria. Notification/coordination with Numbered Air Force/MAJCOM leadership will not delay submission of reports to the AFGSC Command Center **(T-2)**.

2.7.1.7. **(Added)** The AFGSC CCIR process **(T-2)**.

2.7.1.8. **(Added)** CCIR timing criteria for submission **(T-2)**.

2.7.1.9. **(Added)** Authorized/unauthorized releasable information **(T-2)**.

2.7.1.10. **(Added)** AFGSC CCIR Reports Matrix reporting criteria **(T-2)**.

2.7.1.11. **(Added)** Reporting/releasing authority **(T-2)**.

2.7.1.12. **(Added)** AFGSC/CC Notification Matrix for Wing Commanders **(T-2)**.

2.7.13. **(Added)** Use the AFGSC CCIR Reports Matrix as guidance to report an event/incident **(T-2)**.

2.7.14. **(Added)** Ensure proper timing IAW **Table 3.1.**, content, format, spelling, addressing, and classification (if applicable) of synchronous/asynchronous reports submitted.

2.7.15. **(Added)** In accordance with established local reporting procedures, provide commanders the necessary information to facilitate an informed decision and submit timely reports utilizing the AFGSC CCIR Reports Matrix.

2.7.16. **(Added)** Units will acknowledge receipt and understanding of all messages applicable/pertinent to their unit in the af_global_strike_command chat room within five (5) minutes **(T-2)**.

2.7.17. **(Added)** Develop AFGSC CCIR checklist, constructed IAW AFMAN 10-207. Checklists will contain report upgrade and closure procedures **(T-2)**.

2.8.5. **(Added)** AFGSC CCIR Reports Matrix. The matrix is used to assist in determining what incidents have been deemed of interest and reportable to HQ AFGSC and the AFGSC Commander. AFGSC CCIR Reports Matrix will be maintained in the Reports Guidebook **(T-2)**. The most current CCIR matrix will be posted on the AFGSC Policy and Procedures SharePoint site **(T-2)**. Command Posts will be notified of changes via AFGSC Command and Control Controller Information Files (C2 CIFs) **(T-2)**.

2.9. (Added) HQ AFGSC Policy and Procedures will:

2.9.1. **(Added)** Develop AFGSC CCIR reporting guidance to ensure timely and accurate CCIR reporting **(T-2)**.

2.9.2. **(Added)** Maintain the AFGSC CCIR Reports Matrix and ensure it meets the needs of the AFGSC Commander **(T-2)**.

2.10. (Added) AFGSC Command Center will:

2.10.1. **(Added)** Monitor and provide guidance on information required to be reported in synchronous and asynchronous methods **(T-2)**.

2.10.2. **(Added)** Monitor unit reports and ensure they meet all criteria IAW AFMAN 10-206, and this supplement for OPREP-3s and CCIRs **(T-2)**.

2.10.3. **(Added)** Advise on the need to report an incident, and ensure the wing has utilized the correct AFGSC CCIR rule and level of attention **(T-2)**.

2.10.4. **(Added)** Develop checklists, for submission of reports on behalf of units in the event of a synchronous or asynchronous outage **(T-2)**.

2.10.5. **(Added)** AFGSC Command Center NCOIC, Command and Control Operations Reports, will train/familiarize MAJCOM and Joint Global Strike Operations Center (J-GSOC) key personnel on OPREP-3/CCIR processes and requirements within 60 days of arrival or position appointment. This includes the following personnel, at a minimum: AFGSC Commander and Deputy Commander; AFGSC Chief of Staff; AFGSC A3/6 and DA3/6; Joint Global Strike Operations Center Commander and Deputy Commander, Air Forces Strategic (AFSTRAT) A3 and DA3, and AFGSC First Sergeant **(T-2)**.

2.10.6. **(Added)** Develop and maintain a Senior Leader Notification Matrix. This matrix will identify the OPREP-3 and CCIR incidents that require the AFGSC Command Center to notify AFGSC, Joint Global Strike Operations Center (J-GSOC), and Air Forces Strategic (AFSTRAT) leadership, as well as the method of notification **(T-2)**.

2.10.7. **(Added)** The AFGSC Command Center will monitor the applicable PACAF Command Center SIPRNet chatroom for Hurricane Condition (HURCON)/Tropical Cyclone Condition of Readiness (TCCOR) changes worldwide that would affect AFGSC assets (e.g., bombers located at Andersen AFB). If AFGSC assets are affected, the AFGSC Command Center will notify AFGSC and Air Forces Strategic (AFSTRAT) leadership and any affected Command Posts **(T-2)**.

3.2.1. CCIRs are classified according to content. Approving/releasing Commanders and Command Post Controllers must review report content to ensure it is classified appropriately per the applicable classification guide or Original Classification Authority **(T-0)**. Personnel transmitting classified CCIRs through either synchronous or asynchronous means are considered

derivative classifiers and are responsible for appropriately marking all reports IAW DoDM 5200.01 Vol 2 **(T-0)**. Examples of derivatively classified reports found in this manual are provided to aid controllers in the proper formatting of derivative classification lines. However, DoDM 5200.01 Vol 2 is the governing directive for the marking of classified information and must be referenced to ensure information is properly protected **(T-0)**.

Table 3.1. AFGSC CCIR Timing Criteria

Type of Report	Synchronous Report/Voice Report Timing (IAW Paragraph 3.6.)	Asynchronous Report/Record Copy Timing (IAW Paragraph 3.7.)
AFGSC CCIR	15 minutes from notification of reportable event/incident **(T-2)**.	1 hour from AFGSC Command Center approval time **(T-2)**.

3.9. Report Construction. AFGSC CCIR initial, follow-up, and final reports will be formatted in the same manner as OPREP-3 reports. **Table A2.1**. in **Attachment 2** of this supplement provides the CCIR template **(T-2)**.

3.9.1.4.1. **(Added)** For events/incidents that occur in multiple locations, the base name will be used (e.g., missile squadron(s) that span across multiple counties and/or cities) **(T-2)**.

3.9.1.6. **(Added)** AFGSC CCIR Message Subject Line. CCIR subject lines will be formatted identical to OPREP-3 reports with the exception of report FLAGWORD and rule number **(T-2)**. Units will use "AFGSC CCIR" in place of "OPREP-3" **(T-2)**. Units will also use the "Subject" from the applicable AFGSC CCIR Matrix rule being used in place of the rule number in OPREP-3 subject lines **(T-2)**.

3.9.1.7. **(Added)** Example CCIR Subject Line: "(U) AFGSC CCIR, 041325ZJUN2018, Shreveport, LA, Suspicious Activity".

3.9.3.1.1. **(Added)** If seven calendar days have elapsed from the initial AFGSC CCIR and there are still questions not answered, a final AFGSC CCIR will be submitted stating that "No further information will be provided through AFGSC CCIR channels" **(T-2)**. Identify approved points of contact (POC), agency/agencies, and contact number(s) **(T-2)**.

3.10. Synchronous Reporting Processes. Reports will be submitted in sentence case **(T-2)**. AFGSC synchronous chat room posts will be formatted the same as an OPREP-3 synchronous notifications, with the exception of the report type ("AFGSC CCIR") and rule number (e.g., "Suspicious Activity", etc.) **(T-2)**.

3.10.1. Command posts will submit CCIR synchronous notifications, not identified as sensitive reports, for all Initial, Follow-Up, Final, Initial/Final, and Corrected reports **(T-2)**. CCIR synchronous notifications will be formatted in accordance with **paragraph 3.9.** and transmitted via the "af_global_strike_command" chatroom within 15 minutes from notification of the reportable event **(T-2)**.

3.10.3. AFGSC units may use the "afgsc_exercise" chat room to submit any exercise CCIRs, if desired. However, units should contact the AFGSC Command Center prior to submitting any report in this room since it is not monitored 24/7. Units will ensure any CCIRs submitted to this chat room state "EXERCISE" at the beginning and end of the report **(T-2)**.

3.10.4. **(Added)** USSTRATCOM synchronous reporting. In addition to the chat rooms already identified, and IAW EAP-STRAT Volume 12, STRATCOM committed units will also post any nuclear related OPREPs and CCIRs in the "stratcom_goc_nc3" chat room within 15 minutes of incident **(T-0)**.

3.11. Asynchronous Reports. Asynchronous Reports will be submitted within one hour from AFGSC Command Center approval of the synchronous notification **(T-2)**. If a unit requires an extension for asynchronous reporting, contact the AFGSC Command Center immediately for approval.

3.11.4. **(Added)** Command Posts will format asynchronous AFGSC CCIRs in accordance with **paragraph 3.9**. **(T-2)**. Submit asynchronous CCIRs for all Initial, Follow Up, Final, Initial/Final, and Corrected reports to the AFGSC Command Center via SIPRNet email (consistent with the classification) **(T-2)**.

3.11.5. **(Added)** Units will not delay transmission of an asynchronous CCIR to gather information requested by the AFGSC Command Center during the synchronous notification **(T-2)**. The requested information will be provided in an asynchronous report as the information becomes available (in a Follow-Up or Final report if necessary) **(T-2)**.

3.12.4. **(Added)** AFGSC CCIR reporting with degraded system capabilities:

3.12.4.1. **(Added)** SIPRNET chatroom outage: Contact the AFGSC Command Center via unclassified or secure telephone (consistent with report classification) **(T-2)**.

3.12.4.2. **(Added)** SIPRNET chatroom and telephone outage: transmit the report via SIPRNet email to the AFGSC Command Center **(T-2)**.

3.12.4.3. **(Added)** SIPRNet chatroom and SIPRNet email outage: transmit report via unclassified or secure telephone (consistent with report classification) **(T-2)**.

3.14. (Added) AFGSC Special Interest Items.

3.14.1. **(Added)** Sensitive reports: Incidents that meet the CCIR Serious Injury/Death and Criminal Activity criteria (including events sexual in nature), that are not OPREP-3 reportable, are considered sensitive reports. CCIRs that are sensitive in nature will be viewed only by personnel authorized by the AFGSC/CC, CD, or AFGSC A3/6 **(T-2)**. These reports will be identically formatted to all other CCIRs and be sent directly to the AFGSC Command Center via SIPRNet email for dissemination **(T-2)**. Synchronous reporting (via SIPRNet chatroom) will not be accomplished for sensitive reports **(T-2)**.

3.14.2. **(Added)** Positive Control Material. The base Communications Security (COMSEC) Account Manager (CAM) will courtesy copy AFGSC/A3OC SIPRNet Workflow on any report transmitted IAW CJCSI 3260.01E (*Joint Policy Governing Positive Control Material and Coded Control Devices*) or USSTRATCOM Emergency Action Procedures Volume 3 (*Positive Control Policy, Procedures, and Coded Control Devices*) at the following address: **usaf.barksdale.afgsc.mbx.afgsc-a3oc-workflow@mail.smil.mil** **(T-2)**.

8.7.3. **(Added)** Units are highly encouraged to create a desktop pop-up color scheme that emphasizes emergency situations, where significant loss of life could occur (e.g., tornadoes, active shooters, etc.), and creates a distinction from common notifications (e.g., heat stress, weather advisories, etc.). If utilized, the font color of desktop pop-ups should be of a conservative color that is easily read in contrast to the colored background.

8.7.4. **(Added)** "Quick publish" scenarios for emergency situations, where delay of the notification process could cause serious injury or loss of life (e.g., tornadoes, active shooter, etc.), will be made available to facilitate immediate publication to the end users **(T-3)**. The verbiage for an emergency situation initial notification ("quick publish"), will be minimal and not require any editing by controllers prior to being published (e.g., "A Tornado Warning has been issued. Seek shelter immediately") **(T-3)**. This enables critical, and potential life-saving, notifications to take place as quickly as possible.

Chapter 9 (Added)

NUCLEAR COMMAND, CONTROL, AND COMMUNICATIONS (NC3) REPORTING

9.1. Monthly Reporting. AFGSC Command Posts submitting NC3 System availability percentage reports will courtesy copy the AFGSC 1C3 Policy and Procedures workflow: **AFGSC.A3CP.C2.PP@us.af.mil** **(T-2)**.

9.2. Nuclear Command and Control Communication. Attendance in the Joint Nuclear Command and Control (JNC2) course is required prior to attending the NC3 course. The JNC2 and NC3 courses should be attended back to back whenever possible. AFGSC units requesting attendance in the NC3 course must submit a separate course request to the AFGSC Policy and Procedures Workflow at **AFGSC.A3CP.C2.PP@us.af.mil** **(T-2)**.

9.3. Communications Continuing Evaluation Program (Comm CEP). This program is governed by Strategic Instruction (SI) 513-03. This section only applies to those AFGSC Command Posts with a Mobile Support Team commitment.

9.3.1. IAW SI 513-03, units with a Mobile Support Team (MST) commitment must deploy and set up all mobile NC3 systems to the same location for the same CEP evaluation. Additionally, failure to receive a message on any mobile system does not eliminate a unit from CEP participation **(T-0)**.

9.3.2. AFGSC Command Posts will set up all mobile NC3 systems for every CEP evaluation until a message is received on each system **(T-3)**. If weather is outside of a system's allowable parameters (e.g., winds, extreme heat/cold, etc.), or presents a hazard to personal safety (e.g., lightning, ice, etc.), Command Post Management may waive participation for that particular CEP test. However, the CEP summary report will contain remarks with amplifying details (e.g. "Not set up due to observed lightning within 5nm"; or "Not set up due to ice hazard.") **(T-0)**. Once an individual system receives a successful CEP test, this requirement is considered satisfied and that particular system is not required to be set up for the remainder of the current month.

9.3.3. If an individual NC3 system fails to receive and/or send the required message traffic due to any equipment failure, units will coordinate with local Communication Squadron for data entry into Integrated Maintenance Data System (IMDS) **(T-2)**. A separate entry per system is required if multiple systems fail during the same CEP test **(T-2)**.

9.3.4. AFGSC Command Posts will courtesy copy the AFGSC 1C3 Policy and Procedures office workflow **AFGSC.A3CP.C2.PP@us.af.mil** on all CEP evaluation reports **(T-2)**.

JOHN T. WILCOX II
Brigadier General, USAF
Director of Operations and Communications
