This supplement implements and extends the guidance of DAFMAN 21-200, *Munitions and Missile Maintenance Management* and DESR 6055.09_DAFMAN 91-201, *Explosives Safety Standards*. This instruction establishes the local processes and procedures for the oversight and operation of the Consolidated Munitions Control Center (CMCC) and to provide guidance and instruction to the munitions organizations operating within Hill Air Force Base (AFB), Munitions Storage Area (MSA) I and II areas regarding Munitions Control functions. Ensure that all records created as a result of processes prescribed in this publication are maintained in accordance with (IAW) Air Force Instruction (AFI) 33-322, *Records Management and Information Governance Program*, and disposed of IAW the Air Force Records Information Management System (AFRIMS) Records Disposition Schedule (RDS). Refer recommended changes and questions about this production to the office of primary (OPR) responsibility using Air Force (AF) form 847, *Recommendation for Change of Publication.*

SUMMARY OF CHANGES

Office of Primary Responsibility (OPR) from OO-ALC to 75 ABW/XP has been changed along with minor editing updates.

1. Consolidated Munitions Control Center (CMCC) Chief.

The area of responsibility for the CMCC Chief covered in this instruction is limited to the operational oversight of Munitions Control operations being performed in the Hill AFB MSA I & II along with MSA III Oasis Complex. The primary purpose for this position is to verify individual unit compliance with all applicable Air Force instructions with regard to Munitions Control activities and provide operational coordination between assigned units under control of the CMCC and those units with unescorted MSA access. The CMCC Chief should not be tied directly to any workload in MSA, therefore, to ensure objectivity the position will be established under the 75th Air Base Wing (ABW) Plans and Programs office (75 ABW/XPM).

2. CMCC Chief shall:

2.1. Ensure effective and functioning CMCC MSA Command and Control (C2) operations are in-place with appropriate numbers of qualified people assigned to the CMCC.

2.2. Seek resolution for any MSA area issues that individual units cannot solve.

2.3. Verify 75th ABW Civil Engineering Squadron (75 CES) is performing annual igloo earth covering depth checks.

2.4. Verify operational units have sufficient access to Secure Internet Protocol Network (SIPRNET) and Non-secure Internet Protocol Network (NIPRNET) and required communications capability within the CMCC.

2.5. Verify Munitions Control perform quarterly alarm checks of facilities with intrusion detection systems (IDS) installed.

2.5.1. Verify operational units are protecting munitions.

2.6. Review and coordinate on all local checklists affecting MSA operations.

2.7. Verify Munitions Control personnel use prescribed technical data and locally developed checklists as applicable.

2.8. Verify MSA I & II key and lock custodians are appointed by the owning Squadron Commander/Director as required.

2.9. Verify enforcement of procedures for key and lock control for Munitions Facilities.

2.9.1. Conduct MSA I & II semi-annual key and lock audits as the disinterested party.

2.9.2. Verify Munitions Control personnel are controlling keys to munitions facilities.

2.10. HAFB's Internal Locking Device (ILD) point of contact with Department of Defense (DoD) Navy Facilities Engineering Systems Command (NAVFAC) ILD key & lock program office.

2.11. Verify applicable explosives site plan data and maps are available in the CMCC. Source data is maintained by 75 ABW Weapons Safety (75 ABW/SEW) and 75 ABW Civil Engineering Group (75 CEG).

2.12. Develop/maintain consolidated Emergency Action Checklists (EACs) governing munitions operations during severe weather or electrical storms, explosive incidents/accidents, increased security conditions, contingency support and New Strategic Arms Reduction Treaty (NST) inspections are coordinated through 75 ABW/SEW and applicable Unit Quality Assurance offices as required.

2.12.1. Plan, schedule and oversee semi-annual MSA I & II area fire drills and coordinate with HAFB Installation Fire Department Inspectors prior to fire drill initiation.

2.12.2. Create/maintain after-action reports for CMCC units.

2.13. Verify Munitions Control personnel notify the local Safety Office, Explosives Ordnance Disposal (EOD), Hill Fire, Hill Command Post and Major Command (MAJCOM) munitions staff (or equivalent) in the event of an explosive or munitions mishap or incident.

2.14. Verify CMCC personnel are tracking/monitoring job status/delays, significant difficulties and vehicles.

2.15. Verify CMCC personnel are tracking/monitoring changes to fire symbol, hazard symbol, Controlled Item Identification Code (CIIC), or the storage of classified munitions to include daily/weekly 100% fire symbol verification in Hill AFB GeoBase Fire Symbol Tracking System (FSTS) for all MSA operational and storage facilities.

2.15.1. FSTS focal point/administrator for all MSA FSTS users.

2.15.1.1. Coordinates FSTS operational issue with 75 ABW/SEW & 75 CES GeoBase administrator(s) as required.

2.16. Develops and coordinates written entry control procedures and performs Controlled Area Monitor/Resource Protection Program Management security duties for the CMCC, MSA I & II.

2.17. Coordinate on Entry Authorization Lists (EALs) for visiting units needing access into the CMCC, MSA I & II areas.

2.17.1. Approval authority for all CMCC, MSA I & II photography requests.

2.17.2. Coordinates/approves EALs for MSA I & II Free Zone construction contractors/projects.

2.17.3. Approves Free Zone requests for MSA I & II construction projects.

2.18. Approval authority on MSA I & II areas unescorted access requests by signing the AF Form 2586, *Unescorted Entry Authorization Certificate*.

2.18.1. Limit delegation of Controlled Area access authority for areas T (MSA I) and U (MSA II).

2.19. Manage the CMCC, MSA I & II vindicator system.

2.19.1. The vindicator system along with a 4-digit PIN will be used for access into the CMCC and MSA I & II areas.

2.19.2. Re-key MSA I to Flight Line access gates (106V, 107V, 108V, 109V & 111V) quarterly.

2.19.3. Conduct quarterly validations on the vindicator system to ensure MSA I & II personnel with unescorted privileges continue to use their access.

2.19.4. Maintains stringent oversight of all personnel with unescorted MSA I & II access.

2.20. Act as the single point-of-contact to facilitate resolution of Headquarters Air Force (HAF)/MAJCOM-level instructions when HAF/MAJCOM instructions are in conflict. The CMCC Chief will work with affected flight chief and/or unit commander as required to resolve conflicts as required.

2.21. Act as single point of contact for work orders pertaining to maintenance of 75 ABW/XP owned facilities, roads and grounds within the MSA I & II areas.

2.21.1. Ensure a snow removal plan for MSA I & II is in place.

2.21.1.1. Assign owner/user MSA I & II gates snow removal duties.

2.21.2. Ensure MSA I & II vegetation control contract is in place and vegetation is maintained.

2.22. Be appointed as the CMCC Security Manager and will:

2.22.1. Maintain completed AF Form 1109s *Visitor Register Logs* for the CMCC and MSA I & II for one year.

2.22.2. Maintain completed Standard Form (SF) 701 *Activity Security Checklist* for the CMCC for one year.

2.22.3. Ensure CMCC assigned personnel annually complete Phase I & II Security Education and Motivation Training. Completed certificates will be kept in the CMCC Resource Protection Program Binder.

2.22.4. The CMCC Security Manager will not perform any personnel security actions or any other security manager functions other than those listed above.

2.23. Be appointed as the CMCC and MSA Resource Protection Program Monitor (RPPM).

2.23.1. Conduct annual MSA I & II RPPM surveys with Security Forces.

2.24. Maintain and approve the unescorted entry authorization listing for CMCC access.

3. Unit Munitions Control Elements shall:

3.1. Plan, coordinate, direct, and control all munitions activities for their respective units.

3.2. Manage unit MSA I & II keys and locks.

3.3. Maintain map(s) showing the entire munitions storage area(s), primary and alternate explosives routes, evacuation route(s), and sited explosives locations outside the MSA (e.g., aircraft parking locations, hot cargo pads, railheads, munitions holding areas, etc.).

3.4. Use EAC's to include war/contingency plan execution notification, crash, fire, spill response, severe weather and explosive mishaps. Units will work with CMCC Chief and base agencies to develop local EAC (Fire Dept, Security Forces, etc.).

3.5. Facility Status: Use Theater Integrated Combat Munitions System (TICMS) and Hill AFB GeoBase FSTS to validate fire/hazard symbol, Net Explosive Weight (NEW), Risk category and CIIC.

3.6. Track NEW for operating locations, holding areas, and facilities storing assembled complete round munitions on trailers with bulk stored assets must be computed and tracked using Hill AFB GeoBase FSTS and TICMS as applicable.

3.6.1. Will notify via telephone Hill Fire and Security Forces for munitions storage structure status changes in the event FSTS is not available.

3.7. Notify the Fire Department of any hazard class division 1.1 explosives movements outside the MSA areas.

3.8. Attend unit daily or weekly maintenance operations scheduling meetings to update munitions support requirements as needed.

3.9. Maintain awareness of other unit explosive operations in the MSA I & II areas to include:

3.9.1. Description of Operation.

3.9.2. Location of explosive operation.

3.9.3. Crew size.

3.9.4. Status: In-progress, on-hold, etc.

4. Hill AFB MSA Operational Units:

Table 1 identifies the operational units within Hill AFB MSA I & II areas and the respective CMCC representative unit responsible for fulfilling munitions control Emergency Management notifications for that organization to include facility status as outlined in Paragraph 3.5 and Paragraph 3.6 as required.

4.1. Detachment 1 86th Fighter Weapons Squadron (86 FWS) Weapon System Evaluation Program (WSEP) and Air Force Material Command/Air Force Test Center/Specialized Management (AFMC/AFTC/SM) munitions control programs listed in this instruction are not managed by the CMCC but rather in-house by their respective organization. However, the CMCC maintains MSA I & MSA II Controlled Area safety/security controls over these units.

Table 1. Operational Units and CMCC Units.

Operational Units	CMCC Unit
388 MXS	388 MUNS
419 MXS	388 MUNS
86 FWS (WSEP)	388 MUNS
309 MMXG	309 MMXG
309 CMXG	309 MMXG
309 MXSG	309 MMXG
649 MUNS	649 MUNS
AFMC/AFTC/SM	649 MUNS
775 CES/CED (EOD)	649 MUNS

DANIEL L CORNELIUS, Colonel, USAF
Commander
