TORNADO SAFETY RULES

WHEN A TORNADO WATCH IS ANNOUNCED. Conditions are favorable for a tornado to form. Expect heavy rains, hail, and high winds.

1. Keep the radio/television on and listen for the latest weather information. If power fails, use battery-powered radio.

2. Keep watching the sky especially from the west or southwest.

WHEN A TORNADO WARNING IS ANNOUNCED. A tornado has been sighted in the area. Scott AFB will only sound the Base Siren System when a tornado threatens the base. The surrounding communities will sound their sirens when a tornado warning is issued by the National Weather Service for St. Clair County.

1. Seek protection immediately! There are no designated severe weather shelters on Scott AFB. Mobile home residents should take refuge in Bldg 4001, Base Supply. Do not remain in mobile homes during a tornado warning. Personnel utilizing the FAMCAMP area may take refuge in the concrete bath house, Bldg 6400.

2. Go to your basement. If your home has no basement, take cover under heavy furniture on the ground floor in the center part of the house or in a small room on the ground floor that is away from outside walls and windows. As a last resort, go outside and lie flat in the nearest ditch, excavation, culvert, or ravine.

3. **DO NOT TRY TO OUTRUN A TORNADO IN YOUR CAR!** Find a safe place and get out of your car. Take cover under an overpass, in a ditch, culvert, excavation, or ravine. As a last resort, lie in the nearest depression.

4. Avoid auditoriums and gymnasiums with large, poorly supported roofs.

5. Shopping Malls - go to a designated protective shelter, not a parked car.

6. Office Buildings - go to an interior hallway on the lowest floor, away from doors or windows.

7. Disaster Supplies. Prepare for several days without outside help. Prepare for damage to phone, electricity, water, and natural gas lines.

- First aid kit
- Food and bottled water
- Other items such as camping supplies
- Flashlights
- Battery operated radio
- Spare batteries
