TORNADO WARNING AND SHELTER INFORMATION

The 42 ABW Base Command Post will issue Tornado Watches/Warnings upon notification from Base Weather.

Tornado Watch: Issued when the potential exists for the development of tornadoes.

Tornado Warning: Issued when a tornado is occurring or expected to occur within 10 minutes and is expected to pass within 5 Nautical Miles (NM) of Maxwell AFB or Gunter Annex. The Command Post will use the Installation Notification and Weather System via computers, e-mails, and mobile devices, and the Secondary Crash Net to update personnel of the weather situation. Siren Activation: The Alert Warning Signal (3 to 5 minutes steady tone sounded over the base siren system) means a tornado is imminent – the path is within 5 NM of Maxwell AFB or Gunter Annex or path is within 10 minutes of arriving. Personnel must take immediate protective actions.

ONCE YOU HEAR THE ALERT SIGNALS

Take shelter immediately in an interior, preferably windowless, room such as a storage closet or restroom. The shelter area for this building is:

If you have any questions, refer to your Emergency Management Guidebook, ask your Unit Control Center, or Unit Emergency Management (EM) Representative.
