Provide as much information on the casualty as possible.

1.1.10. **(Added)** When available, the following information should be provided: name, grade of the casualty; date, time and location where casualty occurred; circumstances involving incident; source of information (eyewitnesses, family members, friends, etc.); name, location, and a way of contacting the person making the report.

1.6. **FSS/MSS Commander Responsibilities.**

1.6.12.1. **(Added)** Will recall Casualty Augmentation Support Team (CAST) as necessary, to assist in the event of an active duty casualty or mass casualties. CAST members will be released at the discretion of the Casualty Assistance Representative (CAR).

Active Duty (AD)—Full-time duty in the active Military Service of the United States. This includes members of Reserve components serving on active duty or full-time training duty, but does not include full-time National Guard duty. AD for Air National Guard is always performed in a Title 10, United States Code (U.S.C.) federal status. Active duty includes active duty for training and active duty other than for training.

Casualty—Any person who is lost to the organization by having been declared dead, duty status— whereabouts unknown (DUSTWUN), missing, ill, or injured.

Casualty Assistance Representative (CAR)—The person at the Air Force installation responsible for reporting deaths and assisting survivors.

Casualty Augmentation Support Team (CAST)—A group of individuals trained in casualty reporting, notification, and assistance procedures that help the CAR and other casualty personnel. The size of the team is at the FSS/MSS commander's discretion and depends on the size and mission of the installation it serves.

Casualty Status—Used to classify a casualty for reporting purposes. There are six casualty statuses: deceased, DUSTWUN, missing, very seriously ill or injured (VSI), seriously ill or injured (SI), or not seriously ill or injured (NSI).

Death Certificate (Military)—The official DD Form 1300, *Report of Casualty*, published by Headquarters, United States Air Force. The DD Form 1300 is used to provide an official record of the death of a military member. The form may be used in place of a civilian death certificate when proof of death is necessary. Government agencies and most commercial life insurance companies use the DD Form 1300 as the basis for paying benefits. It may be used to facilitate the cashing of bonds or in the settlement of any other claim in which proof of death is required.

Deceased—A casualty status applicable to a person who is either known to have died, determined to have died on the basis of conclusive evidence, or declared to be dead on the basis of a presumptive finding of death. The recovery of remains is not a prerequisite to determining or declaring a person deceased.

Defense Casualty Information Processing System (DCIPS)—DCIPS is an electronic system used in the collection and management of Casualty data and to produce the "*Report of Casualty*" DD Form 1300 and other documents and reports.

Defense Casualty Information Processing System-Casualty Reporting (DCIPS-CR)—The web-based application that provides CARs the ability to record, store, and submit casualty information.

Defense Casualty Information Processing System (DCIPS)—Forward—The client-based application that provides field locations the ability to record, store, and submit casualty information.

Duty Status—Whereabouts Unknown (DUSTWUN)—A transitory status, applicable only to military personnel, that is used when the responsible commander suspects the member may be a casualty whose absence is involuntary, but does not feel sufficient evidence currently exists to make a definite determination of missing or deceased.

Installation Commander—The individual responsible for all operations performed by an installation.

Mortuary Affairs Officer—Plans and executes all mortuary affairs programs. Provides guidance to facilitate the conduct of all mortuary programs and to maintain data (as required) pertaining to the search for, recovery, identification, preparation, and disposition of remains of persons for whom the Services are responsible by status and Executive Order. Serves as the central clearing point for all mortuary affairs and monitors the deceased and missing personal effects program.

Next of Kin (NOK)—The person most closely related to the casualty is considered primary NOK for disposition of remains, personal effects, and the release of records to secondary NOK and third parties. The un-remarried surviving spouse is primary NOK. The term surviving spouse does not include one who obtained a divorce from the decedent (at any time). Other NOK and interested parties are recognized in the following order:

a. Natural and adopted children in order of seniority. *Includes step children and illegitimate children if acknowledged by the member or so determined by a court. The age of majority is 18 years. The rights of minor children, with the exception of disposition of remains, shall be exercised by their surviving parent or legal guardian.

b. Parents, in order of seniority, unless legal exclusive (sole) custody was granted to a person by reason of a court decree or statutory provision.

c. Blood or adoptive relative who was granted legal custody of the person by court decree or statutory provision.

d. Brothers or sisters of legal age in order of seniority.

e. Grandparents in order of seniority.

f. Other relatives in order of relationship to the member according to civil laws. Seniority of age will determine control when persons are of equal degree of relationship (e.g. parents or siblings).

g. Persons standing in loco parentis to the decedent. Seniority of age will determine control when the persons are of equal relationship.

h. Remarried surviving spouse. The term remarried surviving spouse does not include one who obtained a divorce from the decedent or who remarried before a finding of death.

*__NOTE:__ Indicates relationship for possible benefits and entitlements determination.

Not Seriously—Ill or Injured (NSI)—The casualty status of a person whose illness or injury requires medical attention may or may not require hospitalization, and medical authority classifies as less severe than SI.

Seriously Ill or Injured (SI)—The casualty status of a person whose illness or injury requires medical attention, and medical authority declares that death is possible, but not likely within 72 hours, and/or the severity is such that it is permanent and life-altering.

Very Seriously Ill or Injured (VSI)—The casualty status of a person whose illness or injury is such that medical authority declares it more likely than not that death will occur within 72 hours.

Virtual Record of Emergency Data (vRED)—The vRED serves as the official document required by law (Title 10, U.S.C., Sections 1475 - 1480 and 2271; and Title 44, U.S.C., Section 3101) to designate beneficiaries for Death Gratuity Pay and unpaid pay and allowances in the event the servicemember dies.
