This publication supplements DAFI 36-2903, *Dress and Personal Appearance of Department of the Air Force Personnel*, concerning the proper dress and personal appearance required of personnel assigned to Joint Base Elmendorf-Richardson (JBER), Alaska. This supplement applies to all host, associate, and temporary duty (TDY) organizations on Joint Base Elmendorf-Richardson, including Air National Guard (ANG), US Air Force Reserve (USAFR) members and US Space Force (USSF). Refer recommended changes and questions about this publication to the office of primary responsibility (OPR) using the Department of the Air Force (DAF) Form 847, *Recommendation for Change of Product*. Ensure that all records created as a result of processes prescribed in this publication are maintained in accordance with AFI 33-322, *Records Management and Information Governance Program*, and disposed of in accordance with the Air Force Records Disposition Schedule (RDS) located in Air Force Records Information Management System (AFRIMS). The use of the name or mark of any specific manufacturer, commercial product, commodity, or service in this publication does not imply endorsement by the Department of the Air Force.

SUMMARY OF CHANGES

This document has been revised, and the following changes have been made: Updated no-hat no-salute areas on **Table 1.1**. Updated outline wear provisions for arctic clothing. Included the established winter period of 1 September through 30 April as the approved period to wear cold weather gear.

1.2.9.1. **(Added)** There are several areas designated as "no-hat/no-salute" areas on JBER. See **Table 1.1** for a listing of these approved areas.

Table 1.1. Joint Base Elmendorf-Richardson (JBER) Designated "No-Hat/ No-Salute Areas".

Location	Area Description
Building 5955	Patio outside of Wolf's Den Dining Facility
Building 5955	1st floor patio across from Lab Staff Entrance
Building 6974	Patio outside Group Education and Training
Building 604	Patio outside Bioenvironmental Engineering
3 MUNS	6-Mile Munitions Storage Area
3 MUNS	Hillside Munitions Storage Area
3 MUNS	Area B Munitions Storage Area
373 ISRG	Inside gated compound at National Security Agency Alaska
Building 9549	354 OG Det 1., Red Flag Alaska, parking lot and surrounding area
Buildings 6211, 7228, 8288	Government Motor Vehicle Parking Area outside Vehicle Maintenance
Building 6136	Government Motor Vehicle Parking Area outside Ground Transportation
Building 8497	Ambulance bays and loading dock
Building 6230	Loading dock and storage area east of the building
Building 6230	All inside fenced zones of Petroleum, Oils and Lubricants (POL) and liquid oxygen storage or distribution areas.
JBER	All Child Development Centers and Child Youth Program locations
Airfield	The entire controlled movement area of the flight line

5.1.12.4.1. **(Added)** Quilted Thermals*:* Quilted thermal shirts and trousers are functional clothing items worn as an undergarment. While actively engaged in outdoor work areas, quilted thermal shirts are authorized for wear uncovered.

5.1.12.5. 1 **(Added)** The Extended Cold Weather Clothing System (ECWCS) jackets (fleece, wind, soft shell, wet weather, or extreme cold weather) may be worn without the pants; however, the pants must not be worn without the jacket. No mixing and matching of OCP cold weather clothing with the OCP utility uniform. Exception: Level 7 (Parka Jacket) of the ECWCS can be worn with the OCP utility uniform **See attachment 4.**

7.1.11. **(Added)** Established Winter Period: The established winter period JBER is designated as 1 September through 30 April. Paragraphs **7.1.12 through 7.1.16** outline wear provisions for arctic clothing.

7.1.12. **(Added)** USAF Issued Cold Weather Gear: Personnel are authorized to wear Air Force issued cold weather outer garments or commercially procured variants that follow the guidelines list in this instruction. Cold weather items must be consistent with Air Force uniform color and pattern, (including name, rank, and USAF tape configurations). Wear is only authorized during the established winter period.

7.1.13. **(Added)** Arctic Wear: Arctic coveralls/jackets (e.g., Carhartt®) and work gloves are functional clothing items designed for protection from the extreme cold. The gloves can either be coyote brown or black with a small conservative logo. They are authorized for wear only during the established winter period. Arctic coveralls will only be worn in the performance of duties that require a significant level of protection. They will not be worn when traveling to and from work or for extended periods when in the work center.

7.1.13.1. **(Added)** The following extreme cold-weather items (See **Attachment 5**) are authorized when conditions warrant (for example, civil engineers, maintainers on the flight line). Individual commanders approve wear guidelines and may centrally procure and issue for assigned Airmen. Style and colors must not detract from a professional military image.

7.1.14. **(Added)** Polypropylene Socks: Polypropylene socks are authorized for wear during the established winter period. The colors of socks authorized for wear with the OCP uniform are green or coyote brown. Black socks are authorized for wear with the blues uniform.

7.1.15. **(Added)** Unit Initial Cold Weather Gear Issue Guidelines: Due to the extreme temperatures experienced during the winter period at JBER the Logistics Readiness Squadron will be responsible for providing a B-Bag based on member's duty status (full or partial), itemized in **Attachment 2**. Individual units are responsible for funding and outfitting members with specialty cold weather clothing not included in B-Bag (e.g., Carhartt®, cold weather gear, cold weather boots) to allow mission completion.

7.1.16. **(Added)** JBER Unit-Issued Safety and Cold Weather Gear: Individual issued gear is not authorized for off-duty use except in emergencies. Issued gear is intended to facilitate the ability to complete the USAF and base mission. Wearing this gear for off duty purposes adds unnecessary wear and tear and increases replacement costs to the unit. Transiting to and from work or TDY is considered duty for the purposes of this restriction.

7.2.7. **(Added)** Watch Cap. Watch cap may be worn during 1 Sep – 30 Apr in cold weather conditions. When worn, the watch cap will be pulled down snugly on the head; the bottom edge (all) of the cap may be folded to allow proper fit, but not rolled. The back of the cap should run across the nape of the neck and the front of cap should not be touching eyebrows nor higher than center of forehead; hair will not protrude from front of cap. No bunching or sagging. It will be

commercially designed, plain, solid black, or coyote brown knit or fleece/microfiber material. Do not wear rank insignia.

7.2.7.1. **(Added)** Black Watch Cap. When permitted, may be worn with Class A and B uniforms, OCP or PTG.

7.2.7.3. **(Added)** Coyote Brown Watch Cap. When permitted, may be worn with PTG and OCP during established winter period. For additional aircrew guidance please refer to DAFI 36-2903 section 9.6.2.

7.3.8.5. **(Added)** Ski/Face Mask: The black or coyote brown ski/face mask is authorized for wear during the established winter period. The mask portion will be removed when entering any base facility unless specifically authorized by the individual's commander.

7.3.8.6. **(Added)** The Full or Half Face Mask/Balaclava or Hood Fleece 5-way style hats. These items may be coyote brown/black and worn with any OCP and FDU uniform combinations. The Hood Fleece may be worn as a face mask, hood/face mask combination, or as a neck warmer while wearing an OCP outer garment. If worn as a hood, the appropriate headgear must be worn (balaclava/hood fleece is not considered headgear). If watch cap is the chosen headgear, then balaclava/hood fleece color must match.

7.4.1.8. **(Added)** All approved black winter footwear (e.g, Danner, Max Trax ®, or equivalent boots) may be worn with blues during outdoor activities to include when traversing from a vehicle to a building during winter months.

7.4.1.9. **(Added)** Footwear. Appropriate footwear traction devices may be used during outdoor activities to include traversing from a vehicle to a building during icy conditions. Traction devices must either be clear, black or match footwear color. Traction devices must be removed upon entering any building and are not authorized on any aircraft due to potential Foreign Object Debris (FOD) hazard and damage to aircraft. Metal cleats will not be worn on maintenance stands, within 50 feet of fueling, defueling, fuel cell operations or flammable liquids.

7.4.4. **(Added)** Footwear: Winter style footwear (e.g., Muk luk®, Danner, ski, Sorel, or vapor barrier boots) are authorized for wear with the PTG during outdoor activities or when traversing from a vehicle or dormitory to the gym.

9.7.1. **(Added)** Functional Winter Clothing Items: The wear of unit issued specialized winter flight clothing to include black undergarments with the FDU is authorized during the established winter period.

DANIEL C. WERNER, Colonel, USAF
Commander
