Supersedes: 8 FWI16-1404, 5 November 2024

Pages: 63

This instruction applies to all 8th Fighter Wing (FW) units, associate units, and contractors assigned to, or visiting an 8th Fighter Wing unit. This includes tenant agencies on Kunsan Air Base (KAB) that have not specifically notified the Chief, Information Protection (CIP) in writing of non- participation. This Operating Instruction (OI) outlines unit Information Protection program requirements. It prescribes appointment procedures and responsibilities for Unit Security Assistants (SAs) and the Top-Secret Control Officer (TSCO); authority to classify, downgrade, and declassify classified information; marking classified information; and conducting end-of-day security checks. Also, it explains actions to be taken pertaining to security violations; access, dissemination, accountability of classified information; transmission of classified material; disposal/destruction procedures; security education program; and conduct of semiannual self-inspections. It further addresses procedures and policies of the Personnel Security, Industrial Security and some portions of the Physical Security Program. Ensure that all records generated as a result of processes prescribed in this publication adhere to Air Force Instruction (AFI) 33-322, *Records Management and Information Governance Program*, and are disposed in accordance with the Air Force Records Disposition Schedule, which is located in the Air Force Records Information Management System. Refer recommended changes and questions about this publication to the office of primary responsibility (OPR) using the DAF Form 847, Recommendation for Changes of Publication; route DAF Forms 847 from the field through the appropriate functional chain of command.

SUMMARY OF CHANGES

This publication has been substantially revised and needs to be completely reviewed. It has been designed to replace individual unit security operating instructions.

Chapter 1—DUTIES AND RESPONSIBILITIES. 4

1.1. Unit Security Assistants (SA). 4

1.2. Security Container Custodian(s). 5

1.3. Individual Supervisors and Coworkers. 5

1.4. Unit Commanders or Agency Chiefs. 6

1.5. 8 FW Commander (CC) & 8 FW Deputy Commander (CD). 6

1.6. Chief, Information Protection (CIP). 6

Chapter 2—ADMINISTRATION 7

2.1. Appointment of Security Assistant (SA). 7

2.2. Appointment of Security Container Custodians. 7

2.3. Information Protection Training. 7

2.4. Annual Assessment – LIPME. 9

2.5. Annual Security Self-Inspection. 10

Chapter 3—INFORMATION SECURITY (INFOSEC) PROGRAM 11

3.1. Classification and Marking Classified Materials. 11

3.2. Classification Authorities. 11

3.3. Classification Challenges. 11

3.4. Marking Information. 11

3.5. Storage and Safeguarding of Classified Information. 12

3.6. Top Secret Control Accounts (TSCA). 14

3.7. Storage. 14

3.8. Classified Destruction and Reproduction. 19

3.9. Classified Reproduction Procedures. 20

3.10. Classified Transmission and Transportation. 22

3.11. Utilizing Phone and Fax for Classification Transmission. 24

3.12. Security Incidents. 27

Chapter 4—PERSONNEL SECURITY PROGRAM (PERSEC) 30

4.1. In-Processing Members. 30

4.2. Out-Processing Members. 31

4.3. Personnel Security Investigation (PSI) Types. 32
4.4. PSI Initiation/Process Requirements..... 34
4.5. Interim Security Clearance Procedures..... 36
4.6. CE Procedures..... 36
4.7. Foreign Travel Reporting..... 37
4.8. DISS Access Requirements. 38
4.9. DISS Visit Request Procedures. 39
Chapter 5—INDUSTRIAL SECURITY PROGRAM (INDUSEC) 40
5.1. Classified Contract Preparation and Execution. 40
5.2. DD Form 254 Preparation..... 40
5.3. Integrated Visitor Group. 40
5.4. Prime Contractor Responsibility..... 42
5.5. Administration. 42
Chapter 6—INFORMATION SECURITY (INFOSEC) ANNUAL AWARDS PROGRAM 43
6.1. Purpose..... 43
6.2. Responsibilities. 43
6.3. Eligibility. 43
6.4. Nomination Categories. 44

Attachment 5—EMERGENCY PROTECTION, REMOVAL 57
Attachment 6—CLASSIFIED CONFERENCE/MEETING CHECKLIST 60
Attachment 7—REQUEST FOR NATIONAL SECURITY INVESTIGATION 62

Chapter 1

DUTIES AND RESPONSIBILITIES.

1.1. Unit Security Assistants (SA).

1.1.1. Provide advice and assistance to the commander/agency chief and unit personnel on security matters and recommend improvement measures. The SA is the primary point of contact for the 8th Fighter Wing Information Protection Office (8 FW/IP). All IP security-related questions should be answered through the assigned Unit SA. This ensures the SA is abreast of any issues pertaining to their area of responsibility.

1.1.2. Establishes the IP Program within their unit by keeping a continuity book and/or electronic files on the TEAMS page with the following information:

1.1.2.1. Table of Contents.

1.1.2.2. Unit SA & Security Container Custodian Appointment Letters.

1.1.2.3. Internal Security Operating Instruction (OI).

1.1.2.4. Classified Equipment Listing.

1.1.2.5. Last 2 Local Information Protection Evaluation (LIPME) Reports.

1.1.2.6. Last two (2) Unit SA Meeting Minutes.

1.1.2.7. A Self-Inspection/Program Review.

1.1.2.8. A Current Defense Information Security Systems (DISS) Roster

1.1.2.9. Unit Training Plan Documentation.

1.1.3. The Primary SA should conduct a self-inspection within 30 days of appointment. This self-inspection is utilized to provide an overview of the unit's IP program. This self-inspection will not count towards the self-inspection requirements in this publication.

1.1.4. Ensures internal security operating procedures are tailored as necessary, annotated in unit operating instructions, disseminated to unit personnel, and implemented.

1.1.5. Ensures all security training requirements, identified in **paragraph 2.3** of this instruction, are conducted and documented.

1.1.6. Conducts and monitors annual self-inspections.

1.1.7. Reviews and processes challenges to classification decisions and notifies originators of improperly marked classified documents through coordination with 8 FW/IP.

1.1.8. Attends semiannual SA meetings hosted by 8 FW/IP. The alternate SA will attend in the absence of the primary SA. **Note:** If the primary or alternate SAs cannot attend, a suitable unit representative must attend.

1.1.9. Ensures unit personnel are informed of their Unit Security Assistant's physical work locations via email and flyers posted throughout the unit.

1.1.10. Ensures security incidents are reported to 8 FW/IP by the end of the first duty day from discovery.

1.1.11. Monitors preliminary inquiries and formal investigations of security incidents for sufficiency and timeliness.

1.1.12. Manages Unit DISS roster and ensures security clearance data is effectively tracked.

1.1.13. Directs unit personnel to complete security clearance investigations and periodic reinvestigations every five years for both Secret and Top Secret.

1.1.14. Maintains proper accountability of the following items:

1.1.14.1. Secret Internet Protocol Router (SIPR) Lock Boxes.

1.1.14.2. Classified Profession Areas (CPA) and/or Secure Rooms.

1.1.14.3. Open Secure Storage Areas (OSSA) (If applicable).

1.1.14.4. Classified Reproduction and Destruction Equipment **(**i.e., Shredders, Copiers, Disintegrators, Fax Machines, etc.)

1.1.14.5. Assigned Classified Computer Systems

1.1.14.6. Unit SA's will utilize the 8 FW Classified Equipment Listing Format located on the TEAMS page. The SA will forward new and revised listings to 8 FW/IP when changes occur or on a minimum annual basis.

1.1.15. Develops and exercises the unit-specific emergency protection, removal, and destruction plan IAW **paragraph 3.8.3**.

1.1.16. Provides a CPA listing for security-in-depth determination and risk assessment to be conducted by 8 FW/IP. This listing will identify all areas within the unit/agency by building and room number to include locations where classified security containers and/or SIPR terminals are present, and spaces where classified briefings and discussions occur.

1.1.17. Ensures CPA risk assessment memorandum is posted within each designated CPA Room.

1.2. Security Container Custodian(s).

1.2.1. Ensures all documentation and Automated Data Processing (ADP) media under their control, to include courtesy stored material, is properly marked, stored and safeguarded IAW Executive Order (EO) 13526, *Classified National Security Information*; Information Security Oversight Office (ISOO) Directive Number 1, *Classified National Security Information;* DoDM 5200.01V1-3_DAFMAN 16-1404V1-3, *Air Force Information Security Program*. Refer to Paragraph 4..

1.3. Individual Supervisors and Coworkers.

1.3.1. Continually monitor and evaluate personnel with clearances for indicators that may signal matters of personal concern that could potentially affect National Security IAW DoDM 5200.02, *Procedures for the DoD Personnel Security Program (PSP)*, Section 11, *Continuous Evaluation (CE) and Reporting Requirements*.

1.3.2. Report to the unit commander/agency chief or SA of any conduct or information that may affect a person's trustworthiness, reliability or loyalty (i.e., drug use, alcohol abuse, excessive indebtedness, criminal conduct, etc.)

1.3.3. Ensure security taskings (i.e., end-of-day security checks) (Standard Form (SF) 701 *Activity Security Checklist*) are conducted correctly, timely and annotated as required.

1.3.4. Report security violations to the Unit SA, immediate supervisor, or commander/agency chief immediately upon discovery or notification.

1.4. Unit Commanders or Agency Chiefs.

1.4.1. Responsible for ensuring a viable Information Protection (IP) program within their areas of responsibility.

1.4.2. Appoint Primary & Alternate SA as well as security containers custodians, and Secure Room or OSSA Custodians.

1.4.3. Completes AF 2583, *Request for Personnel Security Action* for each cleared person assigned, to designate by signature, classified level eligibility has been verified, and access is granted.

1.4.4. Initiates CE on assigned personnel, when warranted.

1.4.5. Reviews TEMPEST and risk assessments conducted by Wing Cybersecurity Office (WCO) and 8 FW/IP for removable and wireless media violations.

1.4.6. Appoints Inquiry Official (IO) for security incidents occurring within unit/agency. Then reviews security incident reports to make a determination for final disposition based on IO, Staff Judge Advocate (SJA) and 8 FW/IP recommendations.

1.4.7. Reviews LIPME reports and endorses final corrective actions for deficiencies.

1.4.8. Ensures unit contractors comply with industrial security requirements outlined in **Chapter 5** of this instruction.

1.5. 8 FW Commander (CC) & 8 FW Deputy Commander (CD).

1.5.1. Provides oversight of Information Protection by ensuring security controls, safeguards, and countermeasures are established through application of risk management principles, as appropriate. The 8 FW/CC has delegated this responsibility to the 8 FW/CD.

1.6. Chief, Information Protection (CIP).

1.6.1. Executes IP on behalf of the 8 FW/CC and 8 FW/CD as the 8 FW Security Manager.

1.6.2. Provides oversight and direction to applicable Group (GP) and Squadron (SQ) Commanders, Agency Chiefs, Unit SAs, Security Container Custodians and Security Specialists assigned to 8 FW/IP.

Chapter 2

ADMINISTRATION

2.1. Appointment of Security Assistant (SA).

2.1.1. Unit CC or Agency Chiefs will notify 8 FW/IP in writing, upon appointment of a new SA. All local templates, forms, visual aids, and training materials referenced in this OI are maintained on the 8 FW/IP TEAMS page. Unit SAs can request access to this page by contacting 8 FW.IP. Primary SA must be in the grade of E-5/civilian equivalent or above. The Assistant SA must be in the grade of E-4/civilian equivalent or above. Both positions require AT LEAST 6 months' retainability. Any organization unable to meet these appointment requirements must obtain a waiver from the CIP.

2.1.2. Unit SAs must possess a clearance equivalent to the highest level of information held by the unit.

2.1.3. SAs will accomplish training requirements identified in **Attachment 3.** Once requirements have been completed, new SA will forward all certifications to 8 FW/IP and schedule one-on-one training. All training should be completed within 15 days of appointment.

2.2. Appointment of Security Container Custodians.

2.2.1. Unit CC or Agency Chiefs will notify 8 FW/IP in writing, upon appointment of a new Security Container Custodian (SCC). At least one primary and alternate custodian will be appointed to maintain oversight of each Secure Room, OSSA, and Classified Security Container. There are no specific rank requirements for custodians, but they must have current security clearance eligibility at the same level or higher of the material appointed over and require AT LEAST six months' retainability.

2.2.2. Security Container Custodians will accomplish required training identified on the TEAMS page. Once requirements have been completed, the new custodian will forward all certifications to Unit SA and attend a quarterly IP training class. All training should be completed within 90 days of appointment.

2.3. Information Protection Training. The Unit SA will be listed on the unit's in-processing checklist, and each assigned individual (i.e., U.S. Military, U.S. Civilian, DOD Contractor, and Local national employee) should immediately process through the Unit SA. The following items will be either conducted or reviewed by the Unit SA.

2.3.1. Initial/Annual/Refresher Information Security Training. The 8 FW/IP Training Program covers all training requirements outlined in DoD and DAF instructions and consists of Initial Indoctrination Training, Annual Refresher, and Continuous Security Education Refresher Training (CSERT). Selected personnel will require additional focused training based on job responsibilities (e.g., courier, derivative classifiers, security container custodians, etc.).

2.3.2. Initial/Indoctrination Training. Newly assigned personnel will receive initial information security orientation training. Cleared personnel will review this operating instruction, be administered an open-book test and pass the test with a minimum score of 80%. Un-cleared personnel will review a training brief (available in both English and Korean language), and no test is required. All training material is located on the TEAMS page. Document training for both cleared and un-cleared personnel so it is available for review during evaluations and inspections.

2.3.3. Annual Refresher Training. Baseline Annual Refresher Training is accomplished through the MyLearning and is available on the Air Force Portal. All assigned personnel must complete the Cyber Awareness Challenge, Protecting Sensitive Information, Controlled Unclassified Information (CUI) and Operations Security (OPSEC) courses as part of annual Total Force Awareness Training Requirements. Unit SAs may document this training either through maintaining a copy of personnel course completion certificates or obtaining a unit status report from the Unit Training Manager (UTM)/Unit Deployment Manager (UDM) from MyLearning.

2.3.4. Derivative Classification Training. All personnel with access to classified information system(s), responsible for generating or reproducing classified information and/or designated by their commander/agency chief to make derivative classification decisions must complete initial derivative classification training. The initial training course can be accessed on the Center for Development of Security Excellence (CDSE) Security Awareness Hub website. Unit SAs are required to either maintain a copy of the current training certificate on hand or log training completion via database and track expiration.

2.3.5. Derivative Classification Refresher Training. All personnel are required to complete this training annually following completion of the initial training course. The refresher training course is available on CDSE Security Awareness Hub website (**https://securityawareness.dcsa.mil/index.html**) or complete the training provided by DoD.

2.3.6. North Atlantic Treaty Organization (NATO) Awareness Briefing. All cleared personnel must receive the NATO Awareness Briefing and acknowledge receipt via signed memorandum upon in- processing their unit/agency of assignment. The Unit SA will keep signed memorandums for all assigned personnel on file. The briefing and acknowledgement template are available on the TEAMS page.

2.3.7. Annual and Refresher Training (CSERT). Unit commanders/agency chiefs must have active security education programs. As a minimum, this must include a local annual training plan to ensure all assigned personnel are effectively trained on standards identified by DoDM 5200.01V1-3_DAFMAN 16-1404V1-3, *Air Force Information Security Program*.

2.3.8. Local CSERT Training: 8 FW/IP has established a CSERT plan available on the 8 FW/IP SharePoint page. The site provides topics and training PowerPoint slides for distribution and review on a monthly basis that fulfill the DAFMAN requirements. The slides are designed to be disseminated via e-mail using the voting and tracking function on e-mail to annotate unit personnel's receipt and review of the message. By utilizing these functions, the Unit SA can easily retrieve the original message sent and display the status of all personnel for each month.

2.3.9. Although the 8 FW CSERT plan is the preferred refresher training method to be utilized, Unit SAs may utilize unit-specific methods to cover the training items, i.e., briefings at Commander's Calls or other training forums. The goal of the refresher training program is for 100% of assigned personnel to receive the training, regardless of the method used.

2.4. Annual Assessment – LIPME.

2.4.1. A LIPME will be conducted on an annual basis for ALL units that process, or store classified material on Kunsan AB. At a minimum, Annual Assessment consists of the following:

2.4.1.1. Unit Training Program.

2.4.1.2. Security Related Paperwork & Forms (available on the TEAMS page.)

2.4.1.3. PERSEC Requirements.

2.4.1.4. Reproduction, Destruction & Classification Management Procedures.

2.4.1.5. The INFOSEC Program Manager (ISPM) may cover other relevant areas at the discretion of the CIP.

2.4.2. Within 30) duty days of the LIPME, a report will be provided to the Unit Commander, Agency Chief, and SAs detailing the areas evaluated and all relevant findings. Unit Commanders/Agency Chiefs must review and coordinate on all evaluation reports. Reports will be maintained in the SA's continuity binder. Assessments will be conducted annually on activities or units that **do not** store classified information.

2.4.3. Evaluation reports with findings will require a written reply from the Unit Commander/Agency Chief addressing all program findings. Units will have 90 calendar days from the date of the LIPME to provide an initial response. The response must indicate if the discrepancy has been corrected or a projected date of completion for items that cannot be sufficiently corrected within thirty 30 days. Follow-up responses will be submitted to 8 FW/IP every 30 days until the deficiency is corrected.

2.4.4. A follow-up review will be conducted by 8 FW/IP within 120 days of the annual LIPME to ensure corrective actions/measures have been taken on noted discrepancies. If discrepancies are noted during the follow-up review, a formal report from the CIP will be sent to the appropriate GP/CC and the SQ/CC or Agency Chief. If no discrepancies are noted during the follow-up review, an informal report from the ISPM will be forwarded to the Unit CC or Agency Chief closing the matter.

2.4.5. A second follow-up review will be conducted within 30 days of the initial follow-up review to address corrective measures/actions on noted discrepancies identified during the initial follow-up.

2.4.5.1. If discrepancies have not been addressed during this review, a formal report from the CIP will be sent to the 8 FW/CD, appropriate GP/CC and SQ/CC or Agency Chief. If no discrepancies are noted during the follow-up review, a formal report will be forwarded to the GP/CC and SQ/CC or Agency Chief closing the matter.

2.5. Annual Security Self-Inspection.

2.5.1. The Unit SA will ensure the Information Security (INFOSEC), Personal Security (PERSEC), and Industrial Security (INDUSEC) programs for their responsible unit/agency meet all Headquarters Air Force (HAF), PACAF, and 8th FW compliance standards. The 8 FW/IP Self Inspection Worksheet will be used to fulfill this requirement. This checklist is available on the TEAMS page.

2.5.2. Unit SAs will complete the Self Inspection utilizing the Worksheet NLT 6 months after the unit's annual LIPME review. Unit SAs will submit this worksheet to the 8 FW/IP Office NLT 15 days after completion. Upon submitting the worksheet, Unit SAs will notify 8 FW/IP and the Unit/CC or Agency Chief if the inspection uncovered findings and appropriate corrective actions to resolve them.

Chapter 3

INFORMATION SECURITY (INFOSEC) PROGRAM

3.1. Classification and Marking Classified Materials. All personnel in the DoD are personally and individually responsible for providing proper protection to classified information under their custody and control.

3.1.1. DAF policy is to identify, classify, downgrade, declassify, mark, and destroy classified information and material consistent with national policy.

3.2. Classification Authorities.

3.2.1. All 8 FW personnel will execute Original Classification, Derivative Classification, Downgrading, and Declassification action in strict accordance with DoDM5200.01_DAFMAN 16-1404 Vol 1.

3.2.2. **Note:** Kunsan Air Base (KAB) does not have any assigned Original Classification Authorities (OCAs). Therefore, all classification occurring at KAB is derivative.

3.3. Classification Challenges. All personnel must challenge classification decisions they believe are improper. Process all challenges through the Unit SA to 8 FW/IP

3.3.1. A challenger involves an objectively reasonable doubt about the level of classification; personnel will safeguard the information at the higher level of classification pending a final determination by the original OCA

3.4. Marking Information.

3.4.1. All classified information and Controlled Unclassified Information (CUI) - including physical documents, electronic media, and working papers - must be marked in strict accordance with DoDM 5200.01 Vol 2_DAFMAN 16-1404, Vol 2. Holders of improperly marked classified documents are responsible for contacting the document originator to obtain the correct markings.

3.4.2. Classified Publications: Any classified publications (e.g., local regulations, guides, plans, and similar documents) must be coordinated through 8 FW/IP prior to publication. 8 FW/IP coordination must be reflected in Section II of the AF Form 673, *Air Force Publication/Form Action Request*, as applicable.

3.4.3. Unmarked Peripherals: Automated Data Processing Equipment (ADPE) peripherals that do not store classified information (e.g., monitors, scanners, and printers without internal memory) will not be marked. Questions concerning the storage capability of peripherals must be coordinated through the Wing Cybersecurity Office (WCO).

3.4.4. Annual Derivative Classification Tracking: The Unit SA or Security Container Custodian must track and document the number of new documents derived from classified material within their Area of Responsibility (AOR) during a consecutive 2-week period each year in April. Unit SAs will collect this data, maintain it in their Unit SA continuity files, and report the final numbers to 8 FW/IP.

3.4.5. For compact discs (CDs/DVDs) utilize a permanent marker to identify the highest classification and a content summary title directly on the CD/DVD. **Note:** SF 706s or SF 712s are placed on the CD/DVD case or holding sleeve not the CD/DVD itself.

3.4.6. Each work-center is responsible for understanding proper marking procedures and ensuring all classified materials are marked properly before storing them in their assigned security containers.

3.5. Storage and Safeguarding of Classified Information.

3.5.1. Classified Processing Areas (CPA). Any area that stores classified information, processes classified information, or houses classified discussion/briefings must be designated as a CPA. Designated CPAs are the only areas on Kunsan AB authorized to process classified information. **Note:** An OSSA is considered to be a CPA but is referred to separately due to requiring more stringent physical security, engineering and 8 FW/CD approval to be certified.

3.5.1.1. CPA(s) are considered active if any are true:

3.5.1.1.1. Any classified security container is open.

3.5.1.1.2. Any classified information/equipment is exposed.

3.5.1.1.3. Any classified briefing/discussion is occurring within the CPA.

3.5.1.1.4. Any SIPR terminal is connected to the network **(Note:** This is irrespective of whether one is logged into SIPRNET or not**.)**

3.5.1.2. All classified information/equipment within an active CPA must be positively controlled to maintain security requirements and therefore cannot be left in an active configuration while unmanned. Additionally, positive entry control of personnel must be established. Local Nationals (i.e., Republic of Korea citizens) and non-cleared personnel are prohibited from entering an active CPA. **Note:** Cipher Locks, Card, Automated Entry Control Systems (AECS), or Swipe Card Readers are considered a physical security enhancement tool but are not an authorized mechanism to secure an unmanned active CPA.

3.5.1.3. Electronic Devices (i.e., cell phones, Personal Digital Assistant (PDA)s, radios, devices with wireless capability to include smart watches and Google Glass, or any other devices that can transmit or record) are prohibited from entering any OSSA or active CPA. All cleared personnel are responsible for being alerted to detect these items and immediately report violations.

3.5.1.4. Designated CPAs while not in an active configuration are treated as a normal working space like areas/offices not designated as CPAs.

3.5.1.5. Personnel operating within an active CPA are required to ensure the CPA Electronic Device Warning Visual Aid available on the TEAMS page, is visibly posted on the exterior of entrances to CPAs while classified processing/discussion is in progress.

3.5.1.6. Personnel controlling entry to active CPAs will verbally remind personnel and verify that electronic and/or wireless devices are not introduced. Personnel will be afforded the opportunity to remove devices from their person/belongings and leave devices outside of the CPA.

3.5.1.7. Prohibited electronic/wireless devices discovered within an active CPA will be immediately powered off, confiscated and removed from the CPA. Refer to **paragraph 3.5** of this instruction for details.

3.5.1.8. TEMPEST/Emission Security (EMSEC) assessments must be conducted on all CPAs housing AIS, communications systems, or cryptographic equipment. The WCO is responsible for conducting, recording and filing assessment results as well as developing countermeasures for all KAB CPAs.

3.5.1.9. 8 FW/IP is responsible for conducting security-in-depth risk assessments for all CPAs. Security-in-depth assessments include the following:

3.5.1.9.1. The 8 FW/IP office determining that CPA's security program consists of layered and complementary security controls sufficient to deter and detect unauthorized entry and movement within the area.

3.5.1.9.2. Results of assessments are logged on a consolidated CPA Risk Acceptance report submitted to the 8 FW/CD for concurrence and/or endorsement. The assessment is submitted to the 8 FW/CD on an annual basis or as needed when significant updates occur.

3.5.1.10. The Unit SA is responsible for monitoring all CPAs within their organization for any significant changes (i.e., structural modifications, office layout redesigns, and addition of AIS) and notifying 8 FW/IP of occurrence. Requests for additional CPAs are forwarded to 8 FW/IP to coordinate a joint inspection with 8 CS/WCO for certification. Additionally, removal of an established CPA also requires an 8 FW/IP and WCO joint inspection.

3.5.1.10.1. 8 FW/IP will coordinate with the WCO to conduct inspections and once the area meets all requirements, the CPA will be added to the CPA listing.

3.5.1.11. All electronic media being connected to a DAF system must receive prior approval from the WCO before use. The Unit SA will immediately notify 8 FW/IP and the WCO when an unauthorized device is connected to a Non-Classified Internet Protocol Router Network (NIPRNet) or SIPRNet enabled system.

3.5.2. Safeguarding: All DAF personnel who work with CUI or classified information are personally responsible for taking proper precautions to ensure unauthorized individuals do not gain access to such information.

3.5.2.1. Refer to procedures outlined in **paragraph 5.1.2** of this instruction for details on allowing authorized access to classified materials. Follow procedures outlined in DoDM 5200.01V3_DAFMAN 16-1404V3 for additional information on protecting classified information outside of a storage container.

3.5.2.2. Whenever handling classified materials outside of an approved storage container or CPA, it must always be under continuous observation and control. When not actively using a classified document, either turn it face-down or use the appropriate cover sheet.

3.5.2.2.1. Use SF 703, *Top Secret (Cover Sheet)* (Orange Colored) for Top Secret (TS) documents.

3.5.2.2.2. Use SF 704, *Secret (Cover Sheet)* (Red Colored) for Secret (S) documents.

3.5.2.2.3. Use SF 705, *Confidential (Cover Sheet)* (Blue Colored) for Confidential (C) documents.

3.5.2.2.4. Classified information or material will not be removed from officially designated CPAs during non-duty hours, such as taking it to an individual's quarters for personal convenience. Do not release overnight to any agency that does not have adequate storage facilities.

3.5.3. All requests for removing Secret (S) and Confidential (C) material from designated CPAs during non-duty hours for work at home will be submitted through 8 FW/IP. HQ PACAF/IP has final approval authority.

3.5.4. Any approved request must be maintained in the owning Unit's SA continuity files. Procedures addressing safekeeping, storage, and arrangements to pick up the classified in case of emergency must be developed in writing and incorporated into unit operating instruction (OI) procedures.

3.6. Top Secret Control Accounts (TSCA). The Unit/CC or Agency Chief formally establishes the TSCA by letter. Maintain this letter with the account and provide a copy to 8 FW/IP. 8 FW/IP will provide training for all Top-Secret Control Officers (TSCO) NLT 45 days after appointment. Recurring TSCO training will be conducted by request from the TSCO. TSCO are responsible for training all personnel within their unit that work directly with TS materials. All training will be documented with the type of training and date conducted.

3.6.1. Top Secret Inventories:

3.6.1.1. The Unit/CC or Agency Chief will designate officials to conduct annual inventories for all TS material in the account and to conduct inventories whenever there is a change in TSCOs. **Note:** Annual inventories will be conducted in the month of January and when there are TSCO changes.

3.6.1.2. The inventory official must be someone other than the appointment TSCO, meeting the proper security clearance requirements.

3.6.1.3. Only the Secretary of Air Force (SECAF) and SAF/AA may authorize the removal of Top Secret (TS) information from designated work areas for residential use. All requests for removal of TS material from designated work areas for this purpose must be routed through 8 FW/IP.

3.6.1.4. Refer to DoDM 5200.01v3_DAFMAN 16-1404v3, for further guidance on the requirements surrounding the protection of TS materials.

3.7. Storage. All classified material, when not under direct surveillance of an authorized person, will be stored in a GSA Approved Security Container or Secure Room/OSSA to prevent unauthorized access or compromise.

3.7.1. Unit/CCs or Agency Chiefs will establish procedures for use and storage of classified network equipment. The Tactical Local Area Network Encrypt (TACLANE) or cabinet must stay in the original location as reported in Emissions Security Assessment (TEMPEST).

3.7.1.1. Procedures must be reviewed, and a physical security survey must be accomplished by the ISPM. This is normally accomplished along with the TEMPEST inspection.

3.7.2. Do not store or place classified material in desk drawers, file cabinets, or anything other than a General Services Agency (GSA) Approved Security Container or certified OSSA.

3.7.3. Under no circumstances will funds, weapons, medical items, controlled drugs, precious metals, or any other item of value be stored in the same security container with classified material. Refer to DAFI 31-101, *Base Defense Operations,* for additional information.

3.7.4. Each Security Container and OSSA will be marked labeled with the unit and number (i.e., CES-1, SFS-2, MDG-3, etc.). Unit SAs assign these numbers when Containers or OSSAs are put into service.

3.7.4.1. Non-permanent marking/labeling is highly recommended to facilitate reassignment within or outside the unit. Place the marking on either the top-front or left/right side-front of the security container. The purpose of this marking is to be able to positively identify security containers in the event of a disaster (i.e., fire, or other natural disasters, etc.). An example of this format can be found on the TEAMS page.

3.7.5. Security Container Custodian**:** Serviceability, operational visual inspections, and contents of the Security Container or OSSA are the responsibility of the custodian.

3.7.5.1. Custodians must maintain an inventory of all classified documents, equipment, and material in the Security Container or OSSA. The inventory listing will be unclassified and maintained within the Security Container or OSSA and marked appropriately. The Security Container Custodian responsible for the security container or OSSA will be listed first on the SF 700, *Security Container Information*.

3.7.5.2. List other unit personnel possessing the combination to a Security Container or OSSA on the SF 700 *Security Container Information*. The form accommodates listing 4 personnel. If more personnel have knowledge of the combination, utilize a continuation sheet or Entry Authorization List (EAL) containing the same information as required on the SF 700 (i.e., rank, name, contact information, etc.) The EAL should be readily available inside or near the applicable Container or OSSA. **Note:** The Unit/CC or Agency Chief is responsible for the classified holdings in the unit and does not need to be on the access letter.

3.7.5.3. When personnel not listed on the SF 700 require access to the Container or OSSA a credential/clearance access level verification must occur through DISS. Also, a valid clearance verification memorandum endorsed by the Unit SA, Unit/CC, or Agency Chief. In addition to these requirements, a need-to-know must be verified.

3.7.5.3.1. An individual “vouching” for another’s clearance access level is not an approved method for providing access to classified information.

3.7.5.4. Visitors not listed on the EAL will be tracked/logged via AF 1109, *Visitor Register Log*. Unit SA’s will maintain forms for a minimum of 90 days. **Note*:*** Logging visitors IS NOT required when personnel are accessing a sanitized/inactive CPA housing a secured security container. In the case of OSSAs, it is highly recommended that all personnel not on the EAL are logged, even when the OSSA is in a sanitized configuration.

3.7.6. Container/OSSA Lock Combinations: Restrict combinations for classified storage containers to appropriately cleared personnel who are authorized access to the classified material stored therein.

3.7.6.1. Record and seal combinations to security containers on part 2 of SF 700 and store in a separate safe. Mark SF 700, Part 2, with the highest classification level of contents maintained in the container. Mark at top, bottom, front and back.

3.7.6.2. Appointed Security Container or OSSA Custodians are responsible changing combinations to Container and/or OSSA door locks and must accomplish during the following instances:

3.7.6.2.1. When placed into use (i.e., remove the factory setting of 50-25-50.)

3.7.6.2.2. When personnel no longer require access due to a lengthy Temporary Duty (TDY), Terminal Leave, Permanent Change of Status (PCS), Retirement, or disciplinary action.

3.7.6.2.3. When it is subjected to compromise**.**

3.7.6.2.4. When maintenance is performed by someone other than the custodian.

3.7.6.2.5. At a minimum, on a biannual basis.

3.7.6.2.6. When placed out of service or transferred to another unit/agency (i.e., before transferring to another unit, ensure the combination has been reset to the factory setting of 50-25-50.)

3.7.7. Operational Visual Inspection (OVI): An OVI will be accomplished on all security containers or OSSAs utilizing DoDM 5200.01v3_DAFMAN 16-1404v3, Appendix 2 to Enclosure 3, *Operational Visual Inspection Checklist*, available on the TEAMS page. An OVI is required to be conducted every 5 years but should also be conducted upon appointment of a new primary custodian. Upon completion of the checklist, custodians are required to keep a hard copy of the form in the locking drawer of the container or posted on the interior of the secure storage room door. Forward a scanned copy of the completed OVI to 8 FW/IP for filing.

3.7.7.1. Security Container OVI discrepancies will be immediately reported to 8 FW/IP and the determination will be made if GSA-certified locksmith maintenance or assessment is required. If a locksmith is needed, the unit/agency will initiate a work request to 8th CES Customer Service for the maintenance/assessment.

3.7.7.2. Locksmith. CES/Locksmith will be immediately notified of security container lockouts and repairs needed affecting the function of securing classified information. Although a locksmith may have a security clearance, they will not be allowed access to classified materials while performing repair or maintenance on security containers. Whenever a locksmith is performing any type of repair or maintenance on a classified container, the locksmith will be under constant surveillance by the container custodian or other authorized representative. Whenever possible, remove all classified from the security container before a locksmith performs repair or maintenance.

3.7.7.2.1. Locksmith conducted maintenance/assessments will be logged on the Optional Form 89, *Maintenance Record for Security Containers/Vault Doors* (OF 89) which replaces the Air Force Technical Order (AFTO) Form 36, *Maintenance Record for Security Type Equipment*. Maintain all records of security container and OSSA door maintenance, repairs, and inspections while the container is in use. The AFTO Form 36 can be destroyed if there is no record of maintenance on the security container. **Note:**

Classified contents of containers determined to be unserviceable will be relocated to another GSA certified container for storage.

3.7.8. Opening and Closing of Security Containers & OSSAs: Authorized personnel will use the SF 702, *Security Container Check Sheet,* to record each opening, closing, and checking of security containers and OSSAs. Completed SF 702s are required to be kept on hand for 90 days.

3.7.8.1. Use a new SF 702 at the beginning of the month for each security container (i.e., 1 Jan - 31 Jan, 1 Feb - 28 Feb, etc.) In instances where containers are infrequently opened, a single SF 702 may be used to annotate multiple months as long as the delineation in months is clearly marked on the form.

3.7.8.2. The only item to be posted on the side of the classified security container besides a container label is the SF 702.

3.7.9. End-of-Day Security Checks: Each OSSA and CPA (i.e., work-center storing classified material) will establish procedures to perform end-of-day checks. All end-of-day checks will be annotated on the SF 701*, Activity Security Checklist.*

3.7.9.1. As a minimum, section leaders will ensure the last person departing the CPA for the day conducts the end-of-day checks. Only cleared personnel are authorized to conduct these checks. Units are responsible for ensuring newly assigned personnel are familiar with procedures.

3.7.9.2. On weekends, wing down-days or holidays, the SF 701 will be annotated with N/A and initialed on the following duty day. The column may be highlighted in lieu of using N/A.

3.7.9.3. Work centers operating on a continuous operational basis are only required to annotate the SF 701 on the last shift when operations are suspended.

3.7.9.4. Completed SF 701s are required to be kept on hand for 90 days.

3.7.9.5. End-of-Date Security Checks Procedures:

3.7.9.5.1. Conduct a check of the security container(s) by turning the dial on the lock to ensure the combination is reset and attempting to open the container by handle. **Note**: Annotation of the SF 702 is not required due to the container check being annotated on the SF 701.

3.7.9.5.2. Conduct a check of “common use” areas (e.g., bookshelves, file cabinets, tables, etc.)

3.7.9.5.3. Ensure there is enough room on all sides of the security container to conduct a visual inspection during the end-of-day security check. Do not store items on top of the classified security container.

3.7.9.5.4. Check computer(s)/printer(s) authorized to process classified information as well as SIPR lock box(s) and TACLANE, ensuring all removable hard drive(s), Cryptographic Ignition Key (CIK)s, documents, etc., are properly secured.

3.7.9.5.5. Close and secure windows (If applicable).

3.7.9.5.6. Secure the room/area.

3.7.9.5.7. Annotate the SF 701.

3.7.10. Specific OSSA Requirements: The 8 FW/CC has delegated authority to certify/decertify Secure Rooms, OSSAs and Bulk Storage Areas of classified information to the 8 FW/CD. **Note:** This does not include the authority to certify/decertify Sensitive Compartmented Information Facilities (SCIF) or Special Access Program Facilities (SAPFs).

3.7.10.1. Organizations will notify 8 FW/IP, in writing of all Secure Rooms, OSSAs and Bulk Storage Areas requirements. This request will be signed by the Unit/CC or Agency Chief. The written request must contain the need for the Secure Room, OSSAs and Bulk Storage Area to include the respective building and room numbers. A layout of the facility will be submitted along with the request package.

3.7.10.2. Secure Rooms or OSSAs will **NOT** be approved for convenience. 8 FW/IP and 8 CES personnel will inspect all new and modified Secure Rooms or OSSAs to ensure both Physical Security (PHYSEC) and relevant construction standards are met IAW DoDM 5200.01v3_DAFMAN 16-1404v3. Results of the inspection will be documented in writing.

3.7.10.3. The 8 FW/CD, through the recommendation of the 8 FW/IP CIP approves, in writing, the use of Secure Room or OSSA to store classified information. The requesting organization maintains the original approved package and displays the certificate on the inside back of Secure Room or OSSA door.

3.7.11. Determination of Approval for Secure Rooms or OSSAs will be based upon a physical construction evaluation conducted by 8 CES and an evaluation of the supplemental protection methods conducted by 8 FW/IP. 8 FW/IP and 8 CES must recertify the structural integrity of secure rooms/OSSAs, even if they were previously built to standards prior to utilization. Proposed structural modifications made to certified Secure Rooms or OSSAs must be coordinated with 8 FW/IP and 8 CES for evaluation. 8 FW/IP and 8 CES must recertify in writing the structural integrity of secure rooms/OSSAs that have been modified. The 8 FW/CD must re-approve in writing the use of these rooms and OSSAs to store classified information.

3.7.11.1. Organizations must notify 8 FW/IP in writing when a Secure Room or OSSA is no longer needed. **Note:** Unit's will NOT maintain these CPAs if there is no discernable need to maintain them.

3.7.12. Intrusion Detection System (IDS). IDS is required for all Secure Rooms or OSSAs. 8 SFS/S5 (Physical Security) is the POC for all IDS related issues to include IDS installs, certification, and maintenance. Refer to DoDM 5200.01v3_DAFMAN 16-1404v3 Appendix 1 to Enclosure 3 *Physical Security Standards*.

3.7.12.1. During periods of IDS malfunction, the Owner/User (Unit/CC) **MUST** ensure the relocation of classified materials to a suitable temporary storage area (i.e., Safe, Secure Room, or OSSA). If this cannot be accomplished, Owner/User personnel MUST provide continuous physical surveillance of the unprotected area until the IDS is repaired.

3.7.13. Unique Situations. In the event an unplanned aircraft carrying classified lands at Kunsan AB the 8 FW/IP office will be contacted for storage guidance. If the aircraft is transporting SCI or material that cannot be removed from the aircraft, the Defense Force Commander (DFC) will provide the level of security requested by the aircraft commander or senior Defense Courier Service (DCS) representative.

3.8. Classified Destruction and Reproduction.

3.8.1. Destruction. Commanders/agency chiefs will ensure classified information is destroyed by authorized means and appropriately cleared personnel in accordance with the methods and procedures prescribed in DoDM 5200.01v3_DAFMAN 16-1404v3 and this publication.

3.8.2. The Unit/CC and Agency Chief will designate the second Wednesday in April and October of each year for the unit's annual classified "clean-out day".

3.8.2.1. Unit SAs must coordinate with the Unit/CC or Agency Chief approximately 20 to 30 days out to establish a specific date. All classified materials being retained and no longer warranted or needed for mission requirements will be purged and destroyed on the first duty-day back to work.

3.8.2.2. During the annual clean-out day, each piece of classified material will be reviewed and the determination to retain or destroy will be made. All classified messages that are to be retained will be marked with date and initials in the top right corner. Check with the 8 FW History Office before destroying information which may be of historical value. Directorates, units and staff agencies are encouraged to continuously audit classified holdings throughout the year and destroy as necessary. Results of the classified records clean out day will be provided to 8 FW/IP annually no later than 15 February of the current year.

3.8.2.3. When disposing of classified materials, first determine the material is no longer required and provide protection throughout destruction process. Classified is "destroyed" when the contents are no longer recoverable from the residue of the destruction process. Only one of the following methods are authorized when destroying classified information:

3.8.2.3.1. Shredding.

3.8.2.3.2. Burning.

3.8.2.3.3. Melting.

3.8.2.3.4. Chemical Decomposition.

3.8.2.3.5. Pulping/Pulverizing.

3.8.2.4. All shredders or disintegrators used to destroy classified material must be certified by 8 FW/IP. Send all memorandums requesting certification to 8 FW/IP. **Note:** Only National Security Agency (NSA) approved equipment may be used. Certification Memorandum format and NSA listing are available on the TEAMS page.

3.8.2.4.1. Post the destruction equipment certification memorandum on a conspicuous location on the device. Re-certification is required upon relocation of the equipment, major repair or replacement of blades/cutting devices.

3.8.2.4.2. Post an Authorized for Classified Destruction visual aid, or a similar product (computer generated product) on the shredder. This visual aid can be found on the TEAMS page.

3.8.2.4.3. Post an OI on or in immediate proximity of the shredder where users can view before use. The 8 FW/IP has developed OIs which can be found on the TEAMS page.

3.8.2.4.4. Always use a "secure volume" when shredding classified. This is accomplished by shredding unclassified material having the same characteristics as the classified (i.e., color, texture, etc.) along with classified materials.

3.8.2.5. Electronic Media. Removable computer media such as CD/DVD disks or classified hard drives must be sanitized using appropriate computer software prior to destruction. This software must meet the criteria of Air Force Systems Security Instruction (AFSSI) 5020, *Remanence Security*, Chapters 4 through 8. For authorized software, contact your Unit Cyber Security Liaison (CSL). Should physical destruction of computer media be appropriate, refer to DoDM 5200.01v3 DAFMAN 16-1404v3.

3.8.2.6. The destruction of TS information requires 2 cleared individuals meeting security clearance eligibility requirements (at least one must be a TSCO). Record destruction using one of the following:

3.8.2.6.1. AF Form 143, *Top Secret Register Page*.

3.8.2.6.2. AF Form 310, *Document Receipt and Destruction Certificate*.

3.8.2.7. The destruction of Secret and Confidential information requires 1 cleared individual meeting security clearance eligibility requirements. The individual acts as their own witness and no receipts are required, unless they are specified by unique Special Access Program (SAP) requirements. Contact specific Special Security Officers (SSOs) for additional information.

3.8.3. Each Unit or Agency maintaining classified materials is responsible for developing protection, removal, and destruction procedures in the event of an emergency. Develop procedures by addressing what actions personnel will initiate in the case of fire, natural disaster, civil disturbance, terrorist activity, and enemy action. Refer to **Attachment 5 -** Emergency Protection, Removal and Destruction of Classified Material Instructions Template as a guide. The plan should be directive in nature and leave **NO DOUBT** as to what actions should be performed.

3.8.3.1. Post a copy of this plan with each Security Container (i.e., Safe, Secure Room, or OSSA) for which the specific unit is responsible.

3.8.3.2. This plan will be exercised routinely to test procedures. Materials should be on-hand to complete the destruction/removal process. (e.g., boxes, brown nylon filament tape, permanent markers, shredders, sledgehammers, barbeque grills, trash cans, lighter fluid, etc.)

3.9. Classified Reproduction Procedures.

3.9.1. Copiers. Classified reproduction will only be conducted on approved copiers. Unit SAs must coordinate with the WCO & 8 FW/IP prior to seeking approval of a copier to reproduce classified information.

3.9.1.1. Copiers must be purchased by the requesting unit absent of any type of information storage device (i.e. hard drive) for it to be considered for approval to reproduce classified information. At no time will a leased copier or a copier that has been connected to the NIPRNET be used for classified reproduction. Additionally, the equipment must be located in an area where it is under continuous observation or in a room capable of being

locked. Classified reproduction equipment will not be kept in hallways, closets, or empty rooms.

3.9.1.2. Unit CCs or Agency Chiefs must approve any copiers under their control that will reproduce classified information and designate a primary/alternate copy monitor to exercise reproduction authority.

3.9.1.3. Personnel who have been designated to reproduce classified material will be familiar with the following procedures:

3.9.1.3.1. The reproduction process requires 2 appropriately cleared individuals for TS and 1 cleared individual for Secret and Confidential information. **Note:** Do not reproduce TS information without the written consent of the originating activity or higher authority.

3.9.1.3.2. When reproduction is complete, check the machine to ensure that the original and all copies are removed.

3.9.1.3.3. Check the last copy to ensure it is complete. If it is not complete, remove the portion remaining in the machine.

3.9.1.3.4. To clear the image from the copier drum, at least three blank sheets will be run through the copying machine after reproducing classified.

3.9.1.3.5. Protect and destroy the blank copies as classified waste.

3.9.1.3.6. Annotate the classified reproduction log.

3.9.1.3.7. Unit SAs are responsible for security control and development of copying procedures for each approved copier under their purview. They will ensure the following documents are posted near any approved reproduction equipment items:

3.9.1.3.7.1. Reproduction Authority Letter.

3.9.1.3.7.2. Security Control Measures.

3.9.1.3.7.3. Copying & Latent Image Clearing Procedures.

3.9.1.3.7.4. Unit SAs will ensure a copy of all documentation associated with each approved copier is maintained within their Unit Security Assistant Program files on the TEAMS page.

3.9.1.3.8. Any copiers not cleared for reproducing classified material must have a notice prohibiting reproduction.

3.9.2. Printers. Classified reproduction will only be conducted on approved printers. The WCO is the approval authority for printers to be utilized with classified AIS. Unit SAs must coordinate with 8 FW/IP and receive WCO approval prior to the unit purchasing a new printer or configuring an existing printer to be utilized for classified reproduction.

3.9.2.1. Printers associated with media processing classified information must be protected at the highest level commensurate to the information processed. Securing entire printers utilized with classified AIS in most commonly used GSA approved security containers is infeasible. As a result, the 8th Communications Squadron Commander (8 CS/CC) has conducted a risk assessment to determine local procedures

to prevent classified information processed on the printers from being maliciously recovered when not positively controlled and reduce the risk to an acceptable level.

3.9.2.1.1. All approved printers will have a copy of the risk acceptance memorandum and clearing procedures visual aid attached to or in the immediate vicinity of the printer. This product is available through the 8 CS/WCO.

3.9.2.2. Personnel reproducing classified material via printer will be familiar with the following procedures:

3.9.2.2.1. Check the machine when reproduction is complete to ensure that all copies are removed.

3.9.2.2.2. Check the last printed page to verify it is complete. If it is not complete, verify missing pages do not remain in the machine.

3.9.2.2.3. Upon completion of printing process for the day, the printer ink drum must be cleared.

3.9.2.2.4. Print at least 3 blank sheets to clear any remanence.

3.9.2.2.5. Protect and destroy the blank copies used for clearing as classified waste.

3.9.2.2.6. Turn printer off, disconnect from classified AIS (i.e. Universal Serial Bus/Local Area Network (USB/LAN) cable), unplug power from the wall, and plug power back in **(Leave LAN/USB unplugged until next use).**

3.9.2.3. Any printers not cleared for reproducing classified material must have a notice prohibiting reproduction.

3.9.3. Reproduction Equipment Security Checks. Unit SAs will ensure inspections of reproduction equipment are included as part of End-of-Day Checks to ensure no classified material remains in or near it. Facilities, which operate on a 24-hour basis, will check the equipment once every 24 hours. Annotate these checks on the SF 701.

3.10. Classified Transmission and Transportation.

3.10.1. Individuals transmitting or transporting classified information are responsible for ensuring the intended recipients are authorized access, have a need to know, and have the capability to store classified information. Information may only be transmitted in accordance with DoDM 5200.01 v3_DAFMAN 16-1404v3 and this OI.

3.10.2. Mail Transmission Procedures. Unit CCs or Agency Chiefs designate assigned unit personnel in writing to the 8 CS/Official Mail Center who are responsible for receipt of U.S. Registered, Certified, and First-Class Mail. Atypically, personnel with this responsibility are assigned to the Unit's Commander's Support Staff (CSS).

3.10.2.1. Protect all U.S. Registered, Certified, and First Class marked "Return Service Requested" mail addressed to DoD organizations and approved cleared contractor facilities on base as classified until determined unclassified. **Note:** Only individuals with U.S. security clearances are authorized to receipt for U.S. Registered Mail.

3.10.2.2. The Official Mail Center is responsible for distributing Registered and Certified parcels to the appropriate unit designee upon verification of the individual(s) authorization

and ensures the recipient completes the parcel transfer log. Include the following information in the log:

3.10.2.2.1. The date “classified” mail was received from the Official Mail Center.

3.10.2.2.2. Package container number.

3.10.2.2.3. The name, date, and signature of the individual receipting for the mail.

3.10.2.3. The initial recipient will distribute the “classified” parcel to the appropriate section/element within the unit. Each individual handling the parcel will sign the log to ensure chain of custody integrity, until the final recipient receives the package. Store classified packages within a GSA certified security container, until the intended mail recipient receipts for the package.

3.10.2.4. Retain copies of classified receipt logs for 2 years.

3.10.2.5. The final recipient of a classified package must complete AF Form 310 and return to the sender within 30 days (CONUS) or within 45 days (OCONUS). The final recipient will retain the AF Form 310 receipts for 2 years.

3.10.3. Mailing Out-Going Classified Packages. Each person mailing (via US postal channels) classified material is responsible for ensuring the material is marked, wrapped, addressed, mailed correctly, proper receipts attached, protected, and secured until its final disposition.

3.10.3.1. TS Information. TS will NEVER be mailed through any postal channel. Units **MUST** use an authorized courier service for transportation or an approved secure communications systems approved by the National Security Agency (NSA) for transmitting messages.

3.10.3.2. Secret Information. Use the U.S. Postal Service (USPS) registered mail service to send SECRET information. Before sending USPS registered mail to the CONUS, ensure it remains in U.S. postal channels at all times. **Note:** There are no other mailing options to send Secret information.

3.10.3.2.1. Individuals must not execute waiver of indemnity. You cannot waive the signature; a signature must be obtained at destination’s end. This is to ensure the classified is receipted for and protected at the destination.

3.10.3.2.2. Anytime you send someone a classified package, ensure that person will be on the other to sign the receipt for the package and the correct address is obtained.

3.10.3.2.3. Secret information will be wrapped or packaged in 2 opaque envelopes or containers, sealed with brown nylon reinforced tape. The wrapping or packaging will be strong enough to provide protection in transit, prevent breaking out of the container, conceal all classified characteristics, and permit detection of tampering.

3.10.3.2.4. The Inner Envelope or Package will contain the official government address of the receiving activity **(Note:** you may also add "Attention To:" of the individual you are sending the package to) and an official government return address.

3.10.3.2.5. The overall classification of the contents will be marked on the top and bottom, front and back, of the inner package or container. If additional warning notices apply, they will also be placed on the inner wrapper or envelope.

3.10.3.2.6. AF Form 310 will be completed and placed in the inner package or attached to it.

3.10.3.2.7. The Outer Envelope or Package must show the complete address of the receiving activity and return address of the sender. There will be no markings on the outer envelope or package, indicating the classification of the contents.

3.10.3.2.8. After ALL the above actions are completed, hand-carry the classified materials to 8 CS Official Mail Center, Bldg. 1058, DSN 782-4661, for further processing. Official Mail personnel will attach proper receipts and mail the materials. Ensure receipts are obtained by the sender for accountability purposes and maintain for 2 years.

3.10.3.3. Confidential Information. Process the same way for Secret information as outlined above.

3.10.3.3.1. An AF Form 310 is not required for Confidential information, unless its use is prescribed by an approved Special Access or Advanced Program.

3.10.4. Individuals will immediately notify the applicable Unit SA in any case where classified information is improperly sent or received.

3.11. Utilizing Phone and Fax for Classification Transmission.

3.11.1. Verbal Discussions.

3.11.1.1. Personnel will utilize either Secure Terminal Equipment (STE), Secure Voice Over Internet Protocol (SVOIP) or other authorized secure communication equipment.

3.11.1.2. Personnel will adhere to relevant encryption procedures for said equipment.

3.11.1.3. While using equipment, ensure unauthorized personnel are not within hearing range of your voice.

3.11.1.4. Ensure the person on the other end of the line has the proper security clearance eligibility to receive the message.

3.11.2. Fax.

3.11.2.1. Unit SAs must coordinate with the 8 FW Cybersecurity Office (WCO) and 8 FW/IP for approval of all classified facsimiles under their control, to authorize their use and designate monitors.

3.11.2.1.1. Personnel will follow the applicable encryption procedures for the equipment that they are utilizing.

3.11.2.1.2. Prior to transmitting, call the receiving office to ensure an authorized person is available to receive the transmission.

3.11.2.1.3. Personnel will remain with the fax machine until the transmission or reception is complete.

3.11.3. Transmission Through Classified Meetings/Briefings. The 8 FW Classified Conference/Meeting Checklist (**Attachment 6**) must be followed when hosting a classified briefing in a room other than one previously cleared for such meetings, (i.e., designated CPA.)

If there becomes a need to utilize a room for these purposes on a regular basis call 8 FW/IP to properly certify the requested room as a CPA.

3.11.3.1. Before the meeting, verify personnel are cleared to the highest level of classified that will be discussed, and have a need to know. The Unit SA will check DISS (or Successor System) to verify the individual's security clearance.

3.11.3.2. Post a guard at the entrance of the room. The guard will maintain outer security of the room and be vigilant of unauthorized personnel attempting to gather information.

3.11.3.3. Post signs stating "Please Knock" when classified work/briefings are being accomplished in an area, unless it is a Secure Room or OSSA. Do not use signs stating, "Classified Work in Progress Knock before Entering." This may bring unwanted attention.

3.11.3.4. Inform the speaker and audience a classified briefing is in progress and to maintain a normal conversational voice tone when talking classified information. Electronic equipment will not be allowed into the room where classified is discussed (Electronic equipment is prohibited in the room IAW **paragraph 3.5.1.3**.). Note taking should be discouraged.

3.11.3.5. During breaks, ensure classified is gathered and handled accordingly. After the conclusion of the briefing, conduct a sweep of the room. Recover all classified information and immediately place all information in a secure container.

3.11.3.6. Contact 8 FW/IP for guidance regarding classified meetings outside of U.S. Government facilities or cleared U.S. contractor facilities with an appropriate facility security clearance.

3.11.4. Transporting (Hand-Carrying) Classified Information on KAB.

3.11.4.1. When classified material is hand-carried on base (outside an activity), a briefcase or comparable item may serve as the outer wrapper. The inner envelope will be marked with the classification of the information, to include the unit address. Office symbol or similar identifying marking may be placed on the outer packaging; **DO NOT** mark with level of classification.

3.11.4.2. Supervisor's verbal authorization is required prior to an individual hand-carrying classified information to activities on the installation. Courier authorization designation letters are not required, unless the courier will be entering an Entry Control Point (ECP) on the installation, where the materials are subject to search (e.g., Controlled Areas, Restricted Areas, facility entry points during increased Force Protection Conditions, etc.).

3.11.4.3. Use a local courier authorization designation letter (for on-base use only) signed by the Unit/CC, Agency Chief, or Unit SA. The courier authorization designation letter replaces the DD Form 2501, *Courier Authorization*, and is valid for 1 year or when authorizing officials and courier changes (e.g., PCS, PCA, position changes, etc.) The letter exempts classified materials being hand-carried from examination. The Authorization Designation Letter format is available on the TEAMS page.

3.11.4.4. When emergency situations occur during local operational readiness exercises, real world contingencies, or increased Force Protection Conditions (FPCON) (e.g., relocation of Wing, Group, or Unit Control Centers (UCC), etc.), individuals do not need

to be in possession of a local courier authorization designation letter when transporting or relocating classified information.

3.11.4.5. Personnel carrying classified material between buildings on KAB will not deviate from their route between departure and arrival points. Stops for unofficial business (e.g., conversations, snacks, mailbox check, etc.) are strictly prohibited.

3.11.5. Transporting (Hand-Carrying) Classified Information Off KAB.

3.11.5.1. The Unit SA must be notified prior to any off-base hand-carry of classified materials.

3.11.5.2. All personnel transporting classified material off the installation must have a completed DD Form 2501, (issued by 8 FW/IP) and Courier Authorization Letter signed by the Unit/CC or Agency Chief.

3.11.5.3. The Unit/CC, Agency Chief, or Unit SA will approve the hand-carry of classified information off the installation. Only the Unit/CC or Agency Chief can authorize the hand carrying of classified materials aboard commercial airline flights. **Note:** The U.S. Postal Service is the primary and most secure means of transmitting classified information.

3.11.5.4. The Unit SA will brief each person hand-carrying classified material on their responsibilities. The briefing must include emergency procedures and security practices while in possession of the classified material. The Unit SA will prepare a courier designation letter and exemption notice that facilitates passage of material through the Federal Aviation Administration passenger screening points. Both the Courier Designation Letter and Exemption Notice format are available on the TEAMS page.

3.11.5.4.1. Advance coordination should be made with airline and departure terminal officials and, when possible, with intermediate transfer terminals when your mode of travel is by air.

3.11.5.4.2. All personnel on TDY orders that are required to carry classified material must have the statement, “Travelers are authorized to carry classified material” in the Remarks Section of DD Form 1610, *Request and Authorization for TDY Travel of DoD Personnel*. Unit SAs will coordinate and sign all TDY orders for individuals requesting authorization to transport classified off KAB.

3.11.5.4.3. When carrying classified information over international borders, the courier must have identification and an authorization letter meeting the requirements of DoDM 5200.01v3_DAFMAN 16-1404v3. The authorization letter will be written in English and if possible, in the language of the countries through which the courier is traveling. Verify courier requirements prior to departure with the DoDD 4500.54-E, *DoD Foreign Clearance Program.*

3.11.5.4.4. Classified material being hand-carried by a courier must be inventoried; the courier’s Unit SA shall retain a copy of the inventory, and the courier shall carry a copy. **Note:** Do not open, display or otherwise open in public places.

3.11.5.4.5. When classified material is transported, it must be prepared in such a manner as to not arouse suspicion. Classified material shall be enclosed in 2 opaque, sealed envelopes, wrappings, or containers, durable enough to properly protect the material from accidental exposure and facilitate detection of tampering.

3.11.5.4.6. The inside envelope should be marked front, back, top and bottom with the highest classification level of the contents. The outer envelope or single container shall not bear a classification marking or any other unusual marks that might invite special attention to the fact that the contents are classified.

3.11.5.4.7. The classified material is not, under any circumstances, to be left unattended. During overnight stops, U.S. military facilities, embassies or cleared U.S. contractor facilities must be used. **Note:** Classified material shall not be stored in hotel safes or hotel rooms.

3.11.5.4.8. Upon return, the courier must immediately return all classified material or produce a receipt signed by the destination Unit SA/Security Officer for any material not returned.

3.11.6. In-Transit Overnight Classified Repositories on KAB.

3.11.6.1. 8th Fighter Wing Command Post, Bldg 1305, 8 FW/CP, DSN 782-6000 (Top Secret/Secret/Confidential).

3.11.6.1.1. If personnel are TDY on an Official Visit, they may use the above storage location or they may store their classified with the agency being visited, provided the agency can store classified material to the appropriate level. In the event an individual arrives with SCI, contact 8 FW/SSR personnel immediately**.** At no time will SCI material be stored in a non-SCI approved facility.

3.11.6.1.2. Secret material stored in a GSA-approved security container placed on a pallet and in a controlled in-transit area on the flight line during in-processing for deployment is authorized. The Owner/User maintains full responsibility until the classified is loaded on the aircraft or custody is transferred via DD Form 1907, *Signature and Tally Record*.

3.12. Security Incidents.

3.12.1. ANYONE discovering a security incident will take control of the situation or material and safeguard it until the responsible custodian or other official regains proper custody

3.12.2. Immediate Actions:

3.12.2.1. Immediately secure unsecured/unattended classified material by maintaining personal control, cover the material to avoid potential compromise and contact the Unit SA, Safe Custodian, Supervisor, Unit CC, Agency Chief. Additionally, personnel must notify the 8 FW/IP Office at DSN: 782-1585/1586.

3.12.2.2. Take the following immediate action if a suspected security incident involves an AIS:

3.12.2.2.1. Disconnect LAN access to the component.

3.12.2.2.2. Lock the Computer System under current user login.

3.12.2.2.3. DO NOT shut down or unplug the power to the computer.

3.12.2.2.4. When 8 CS receives notification of a suspected security incident involving AIS, they will immediately notify 8 FW/IP of the incident prior to sanitizing said AIS hardware/software to safeguard against the loss of potential evidence.

3.12.2.3. All personnel must be alert and report discovery of electronic/wireless device(s) within a CPA. Reports can occur at any level within the chain of command but should be funneled to the Unit SA and subsequently the 8 FW/IP Office.

3.12.2.4. 8 FW/IP in consultation with the Unit/CC or Agency Chief and the 8 CS/WCO determines whether a security incident should be initiated and the disposition of the device. Government devices may be confiscated to determine if they're contaminated with classified information. If it is suspected a personal device is contaminated with classified information, request the individual surrender it. If the individual refuses to surrender the device, the Unit/CC or Agency Chief will consult with 8th Fighter Wing Legal Office (8 FW/JA) on how to resolve the issue.

3.12.2.5. A DD Form 2817-1 *Evidence Custody/ Property Tag* will be provided to the owner, for accountability purposes if a government or personal device is confiscated. Personnel will be informed on the process of retrieving the device**.**

3.12.2.6. Between 1700 to 0700 hours, when the Unit SA or other personnel identified within the Chain of Command cannot be contacted, notify the 8 FW/Command Post (CP) at DSN: 782-6000, who will in-turn contact 8 FW/IP personnel

3.12.2.7. The Unit/CC or Agency Chief must report suspected security incidents occurring within their area of responsibility to 8 FW/IP by the end of the first duty day of discovery.

3.12.3. The responsible Unit/CC or Agency Chief will appoint an Inquiry Official (IO) to ascertain the circumstances surrounding the security incident within 2 duty days from the discovery of the incident and will inform 8 FW/IP of the appointment in writing via the template available on the TEAMS page. 8 FW/IP will provide the Unit SA the assigned incident number.

3.12.3.1. IOs will not be less in rank or grade than the person(s) involved with the incident, will not be the assigned primary or alternate Unit SA, and will not be persons assigned to 8 FW/IP. The inquiry official must be a disinterested member not associated with the activity (i.e., section/element, etc.) where the security incident occurred.

3.12.3.1.1. Regardless of the rank or grade involved, it is highly recommended that IOs be in the grade of E-7 or above when incidents do not warrant a higher grade. Additionally, IOs must be cleared to the highest level of information involved. **Note:** 8 FW/CC or CD will appoint IOs for incidents involving personnel in the grade of O-6.

3.12.3.2. All IOs will contact 8 FW/IP within two duty days of appointment to schedule a briefing from 8 FW/IP prior to initiating the inquiry.

3.12.3.3. IOs must complete the preliminary inquiry and forward results to 8 FW/IP, within 10 duty days of receiving the IP brief. Requests for extensions must be in writing from the Unit/CC or Agency Chief and forwarded for approval to the CIP. **Note:** The extension date will not exceed 10 calendar days from the original inquiry completion date.

3.12.3.4. IOs contact the Unit SA to verify through DISS all personnel related/involved in the inquiry have the appropriate security clearance eligibility. The IO will then draft a report that:

3.12.3.4.1. Determines and reports the facts.

3.12.3.4.2. Determines whether or not classified information was actually or potentially lost or compromised.

3.12.3.4.3. Characterize the incident as either a security infraction or security violation

3.12.3.4.4. Recommend actions to prevent future incidents.

3.12.3.4.5. IOs will not recommend punitive action against identified members.

3.12.3.5. IOs will complete preliminary reports utilizing the format provided by 8 FW/IP and available on the TEAMS page.

3.12.3.5.1. IOs will coordinate a draft report with 8 FW/IP for a technical review, before finalizing report.

3.12.3.5.2. The 8 FW/IP will then submit the IO report and 8 FW/IP Technical Review to the commander/agency chief to approve, endorse, and close the inquiry.

3.12.3.6. In instances where commander/agency chief seeks administrative or punitive action against culpable individual(s) because of the incident, forward the IO report and 8 FW/IP Technical Review to 8 FW/JA for legal review prior to closing the incident.

3.12.3.7. The Unit/CC or Agency Chief will complete the Incident Closure Letter when closing an incident. The closure letter will outline if an actual, potential or suspected loss or compromise occurred or did not occur and whether further investigation is needed; any corrective actions implemented to prevent further similar occurrences; any administrative, disciplinary or punitive action taken against individual(s) responsible for the violation if warranted.

3.12.3.8. Once the Unit/CC or Agency Chief's incident closure letter is completed and forwarded to 8 FW/IP, the incident will be closed, and all associated paperwork will be hard-copy and electronically filed within the 8 FW/IP Office.

Chapter 4

PERSONNEL SECURITY PROGRAM (PERSEC)

4.1. In-Processing Members. All military and DoD civilians assigned to the unit must be properly owned in DISS to ensure complete accountability of unit personnel. Unit SA must process all gaining unit members within 15 days of arrival.

4.1.1. SAR Code Verification. Before updating DISS, the Unit SA will verify the required clearance level against the Security Access Requirement (SAR) code listed on the Unit Manpower Document (UMD) IAW DoDM 5200.02_DAFMAN 16-1405.

4.1.2. Annual SAR Code Review. Every May, Unit/CCs or Agency Chiefs, in coordination with the Unit SA, will conduct a SAR Code review to determine the accuracy of position coding, eliminate unnecessary access requirements, and adjust SAR codes as needed.

4.1.2.1. If no changes are needed, the unit commander will acknowledge and confirm this via email to 8 FW/IP.

4.1.2.2. To request formal changes to SAR codes, the Unit SA will submit an Authorization Change Request (ACR) to the 8th Force Support Squadron/Manpower Office (8 FSS/FSM), routed through 8 FW/IP for coordination.

4.1.3. Top Secret (SAR Code 5) Reporting. Every December and June 8 FSS/FSM will provide 8 FW/IP a report detailing all SAR Code 5 changes. This report must include:

4.1.3.1. The number of additional, new, and upgraded SAR Code 5 positions.

4.1.3.2. Job titles or position numbers.

4.1.3.3. Mission requirement justifications.

4.1.3.4. The number of downgrades using a one-for-one exchange.

4.1.4. Unit/CCs or Agency Chiefs with position designation authority are required to determine the position sensitivity using the Office of Personnel Management (OPM) Position Designation Tool (PDT) for each civilian position. Non-Sensitive is no access, Non-Critical Sensitive is Secret access, and Critical Sensitive is Top Secret Access. This should be properly accomplished before filling the position. Contact the Civilian Personnel Office (CPO) if any changes need to be made.

4.1.4.1. Once the UMD has been verified, any member who does not require access will just be assigned to DISS with no access (except for Korean Nationals due to not being registered). For members requiring access to Confidential or above, the following criteria must be met before access is granted.

4.1.4.2. The individual possesses a valid security clearance investigation at or above the SAR code requirement. Verify clearance level in DISS. **NOTE:** If the member requires a higher-level clearance that they currently are not eligible for, please follow the guidance in **paragraph 4.4** below to initiate a new investigation.

4.1.4.3. Determine whether a CE report was established on the individual from their last duty assignment. If so, coordinate actions with 8 FW/IP.

4.1.4.4. The individual has an official need-to-know.

4.1.4.5. The individual will sign a new SF 312, *Classified Information Nondisclosure Agreement (NDA)* when they are due for a reinvestigation. This can be verified in DISS. If member does not have a current SF 312, initiate actions to complete through DISS and forward the SF 312 to the 8 FW/IP Office for proper mailing.

4.1.4.6. The individual has completed initial indoctrination INFOSEC IP Security Training. Training is outlined in the Kunsan Basic Plan and can be accessed on the TEAMS page. The Unit SA will document this training.

4.1.4.7. The individual has an AF Form 2583, *Request for Personnel Security Action*, signed by the Unit/CC or Agency Chief designating the proper access.

4.1.4.8. Initiate the AF Form 2583; to designate by signature, the individual's classified access level eligibility has been verified and is needed to perform assigned duties. Unit SAs will maintain a copy of the completed form for the duration of access and for review during evaluations and inspections.

4.1.4.9. In addition to the above criteria, ensure the individual has been appropriately in-briefed and trained IAW applicable instructions prior to granting access to any other levels (i.e. SAP, NATO, Nuclear, etc.).

4.2. Out-Processing Members.

4.2.1. When a member has a Permanent Change of Station (PCS) or transfer to another unit, the assigned Unit SA will go into DISS and remove access and ownership to allow the next unit to own.

4.2.2. For members PCSing, the Unit SA must evaluate the member's assignment documentation to ensure the member meets the required investigation needed for the new assignment. If the member must have a new investigation, follow procedures in **paragraph 4.4**. **Note:** Failure to accomplish security requirements could result in delay in receiving orders and/or cancellation of the assignment.

4.2.3. Members are processing for Personnel Reliability Program (PRP) assignments. When a member fulfills a PRP assignment, the DAF Form 286, *Personnel Reliability Program (PRP) Qualification/Certification Action*, has a section for Unit SAs to complete. To complete, the Unit SA must have the members' previous SF86 *Questionnaire for National Security Positions* for review. The SF86 review will be against the 13 Adjudicative Guidelines. If no derogatory information prevents members from being assigned, the Unit SA may select Recommend. If there is derogatory information, the Unit SA will inform Unit/CC and get final decision whether the member should be recommended or not.

4.2.3.1. If member does not have the previous SF86 available for review, the member will have to complete a new hardcopy form for review.

4.2.3.2. For military members that are PCSing, separating, or retiring, the Unit SA will email 8 FW/IP to verify DISS actions and to clear member for Virtual Military Professing Flight (vMPF) out-processing.

4.2.3.3. The Unit SA will ensure an AF Form 2587, *Security Termination Statement*, is being accomplished for those members separating or retiring. Do not debrief individuals who depart on TDY, PCS, or PCA unless required by a special access program. This form can be sent to 8 FW/IP to be filed for the required 2 year period.

4.2.3.4. Ensure personnel with SCI access are out processed by their respective SSR prior to debrief of collateral access. If the SSR allows members to transition in status, do not debrief the member, only out process and notify 8 FW/IP.

4.2.4. Suitability determinations returned as a "No Determination Made (NDM)" will be forwarded to the 8 FW/IP. 8 FW/IP will send the NDM case file to the appropriate suitability adjudicator, assigned by the Unit/CC, to process for a local determination IAW with the Kunsan Local Agency Adjudication Guide. After determination is complete, send the Certificate of Investigation (COI) and Form 79A, *Report of Agency Adjudicative Action on OPM Personnel Investigations,* back to 8 FW/IP and place a copy in the member's personnel file. 8 FW/IP will upload the information into DISS to process for a final adjudication.

4.2.4.1. Unit CCs or Agency Chiefs will delegate, in writing, a primary and alternate agency adjudicator (E-6/civilian equivalent) and forward the appointment letter to 8 FW/IP Office. Agency adjudicators will have at a minimum, a favorable determination based on the results of a **TIER 3**.

4.2.4.2. Agency adjudicators will register in the Security, Training, Education and Professionalization Portal (STEPP) through the **Defense Security Service website** and complete the Introduction to Suitability Adjudications for the DoD course/exam within 30 days after appointment. Training certificates will be forwarded to 8 FW/IP.

4.3. Personnel Security Investigation (PSI) Types.

4.3.1. **TIER 1** with Childcare Coverage (Previously [CNACI]). Childcare **TIER 1**'s are conducted by OPM and are required for all contractors & civilian employees entering government employment and assigned to non-sensitive positions working in childcare and youth services positions. There are no PR requirements for this investigation unless the member has had a 2 year break from federal service. The Unit SA, CPO, and Human Resources Office (HRO) must identify on the AF Form 2583 if childcare coverage is required for the position being filled. The AVS will make all favorable determinations for **TIER 1**, and the determination will be updated in the Central Verification System (CDS)

4.3.1.1. Childcare positions require additional paperwork to be submitted with the **TIER 1** investigation. The member will be required to fill out a SF-86C, *Special Agreement Check (SAC)* and identify where they lived for the last 5 years. Any states identified will need to be cross referenced to identify additional requirements. The SAC must be completed every 5 years or when the member is new to the agency.

4.3.1.2. The hiring agency must ensure that the following questions are asked in addition to the OF 306 *Declaration for Federal Employment* for any childcare position applications. **Note:** The question form must state that the form is being signed under penalty of perjury. In addition, a false statement rendered by an employee may result in adverse action up to and including removal from Federal service.

4.3.1.2.1. Have you ever been arrested for or charged with a crime involving a child? And, if so, provide a description of the case disposition.

4.3.1.2.2. Have you ever been asked to resign because of or been decertified for a sexual offense? And, if so, provide a description of the case disposition.

4.3.1.3. If an applicant answers “yes” to either question, the below items are the mandatory disqualification or discretionary criteria to use for employment process. **Note:** If an applicant answers “no” to both questions and later is found to have items addressed below, follow the Kunsan Local Agency Adjudication Guide procedures for falsification.

4.3.1.4. Mandatory Disqualifying Criteria. Any conviction for a sexual offense, a drug felony, a violent crime, or a criminal offense involving a child or children.

4.3.1.4.1. Discretionary Criteria

4.3.1.4.1.1. Acts that may tend to indicate poor judgment, unreliability, or untrustworthiness in working with children.

4.3.1.4.1.2. Any behavior; illness; or mental, physical, or emotional condition that in the opinion of a competent medical authority may cause a defect in judgment or reliability.

4.3.1.4.1.3. Offenses involving assault, battery, or other victim abuse, regardless of age of the victim.

4.3.1.4.1.4. Evidence or documentation of substance abuse dependency.

4.3.1.4.1.5. Illegal or improper use, possession, or addiction to any controlled or psychoactive substances, narcotic, cannabis, or other dangerous drug.

4.3.1.4.1.6. Sexual acts, conduct, or behavior that, because of the circumstances in which they occur, may indicate untrustworthiness, unreliability, lack of judgment, or irresponsibility in working with children.

4.3.1.4.1.7. A wide range of offenses such as arson, homicide, robbery, fraud, or any offense involving possession or use of a firearm.

4.3.1.4.1.8. Evidence that the individual is a fugitive from justice.

4.3.1.4.1.9. Evidence that the individual is an illegal alien who is not entitled to accept gainful employment for a position.

4.3.1.4.1.10. A finding of negligence in a mishap causing death or serious injury to a child or dependent person entrusted to their care.

4.3.2. **TIER 3** (Previously ANACI and NACLC). Tier 3 PSIs are conducted by OPM and are required for military and civilian employees’ initial Secret security clearance or assignment to noncritical sensitive positions. **Note:** There is a PR requirement every 5 years and a new investigation must be accomplished if member has had a 2 year break of federal service.

4.3.3. **TIER 5** (Previously SSBI). **TIER 5** PSIs are required for access to Top Secret, SCI and assignment to special (positions requiring access to SCI) or critical sensitive positions. There is a PR requirement every 5 years and a new investigation must be accomplished if member has had a 2 year break of federal service.

4.3.3.1. A SAC is required on the following categories of individuals associated with the subject of a TIER 5:

4.3.3.1.1. A spouse or cohabitant

4.3.3.1.2. Immediate family members, 18 years old or older, who were born outside of the United States.

4.3.3.1.3. If a marriage occurs after completion of the **TIER 5**, submit a Spouse SAC using SF 86 *Certification* (SF 86C), to OPM. Keep one copy for the authorized requester's suspense file.

4.3.4. A member who will be separating or retiring within 12 months of the PR due date, is not authorized to accomplish a reinvestigation. The Unit SA will make sure the member has proper approvals for the discharge and inform the 8 FW/IP Office so members can be properly tracked until separation.

4.4. PSI Initiation/Process Requirements.

4.4.1. The Unit SA will complete an 8 FW Form 1, Request for National Security Investigation, showing the proper investigation type (identified in **paragraph 4.3**) no earlier than 9 days from the previous investigation closed or CE date (whichever is latest). The Unit SA will sign/date and send completed form to 8 FW/IP with any documentation.

4.4.1.1. Any upgrades to a Top Secret will need to have supporting documentation (e.g., PCS orders, Assignment RIP, or UMD Position Number).

4.4.1.1.1. Members applying for a school or assignment where package requests applicant to complete a TS investigation. Unless submittal instructions specifically state that the member must have an investigation processed via the National Background Investigation Services (NBIS), they will provide a hard copy SF86 with signature/date for the package. If member is selected for the school or assignment, the Unit SA may proceed to have member complete the actual NBIS.

4.4.2. The 8 FW/IP Office will process the 8 IP Form 1, *Investigation Request Form*, and the Unit SA will initiate the member's clearance in NBIS. An email will be sent to the members via NBIS, and a follow-up email will be sent to the members and the Unit SA. NBIS will provide detailed instructions for completion of SF 85, *Questionnaire for Non-Sensitive Positions* or the SF 86 within the Electronic Application (e-APP). Personnel must submit their required investigation questionnaire, via e-APP, within thirty 30 days from receiving this email.

4.4.2.1. CPO for U.S. civilian employees and HRO for Non-Appropriated Fund employees will accomplish all investigative processes for any **TIER 1** investigations, to include childcare investigations. CPO/HRO will complete 8 FW Form 1 and forward to 8 FW/IP for any **TIER 3** or higher investigations and ensure proper supporting documentation is provided for initiation (i.e., OF-306, *Declaration for Federal Employment*, applicant's resume, etc.).

4.4.3. Once the member submits their PSI, the Unit SA will conduct all reviews and send any corrections back to the member to complete. After final approval, 8 FW/IP will forward to OPM. All investigations and interviews are conducted by OPM, and the DCSA Adjudicated Vetting Services (AVS) is the designated authority to grant, suspend, deny, or revoke personnel security eligibility.

4.4.3.1. Electronic fingerprints will be completed on all initial investigations to include all members that have not had a previous investigation conducted by OPM, on any previous investigations where the results are not shown or were unclassifiable, and all childcare positions. Some childcare positions will require additional state fingerprints. All fingerprint appointments will be scheduled via email notification from **8FW.IP.InfoProtection@us.af.mil**.

4.4.3.2. Individuals completing a PSI questionnaire must specify any circumstances that would make them unavailable for a subject interview within 60 calendar days of the date the form is transmitted. Detailed information regarding the period in which the individual will be unavailable such as date, location, and duration should be provided to the 8 FW/IP Office prior to submitting a **TIER 3/5**.

4.4.4. In order for Defense Counterintelligence and Security Agency (DCSA) AVS to make an eligibility determination for an investigation, sometimes additional information is sent to the member as a Request for Information (RFI) to resolve certain issues, allowing the adjudicator to make a final determination. The member has thirty 30 days to provide a response to the RFI.

4.4.4.1. If the member cannot provide a response in the 30-day requirement, the member can request a 30, 60, or 90-day extension through the Unit/Cc or Agency Chief. Second extension requests must have GP/CC approval, and third extension requests must have the 8 FW/CD approval. All extension request approvals must be sent to the 8 FW/IP Office to forward for processing and can be in a memorandum or email format.

4.4.5. Any member who does not complete the required PSI before the anniversary date of their previous PSI will have their NIPRNET and SIPRNET suspended until completion to meet IT requirements IAW DAFMAN 17-1301, *Computer Security (COMPUSEC)*. If submission requirements were out of the control of the member, the Unit/CC or Agency Chief may request a waiver.

4.4.5.1. Waivers must be submitted within 10 duty days of suspension notification. Once a suspension is placed in effect, a waiver request will not be accepted. Waiver authority for NIPRNET access is delegated to 8 CS/CC and waiver authority for classified access is 8 FW/CD. Waiver requests must be routed through 8 FW/IP and include a statement of reasonable risk. This policy applies to 8 FW and tenant units with access to classified information to include but not limited to the KAB NIPRNET and SIPRNET domains.

4.4.5.1.1. Inbound personnel without a valid investigation may be granted NIPRNET access not to exceed 60 days. This allows for submission of investigation paperwork. At no time will SIPRNET access be given until an Interim clearance has been granted and an open investigation is reflected in DISS.

4.4.6. Conditional Grants. DCSA AVS will provide certain members showing good faith efforts to resolve derogatory investigative issues (i.e. financial irresponsibility) a conditional grant to allow continuous clearance access while abiding by a special agreement.

4.4.6.1. Any member provided a conditional grant must acknowledge receipt within 10 days of notification. The member's commander must ensure they are continually monitored until the conditions have been appropriately removed.

4.5. Interim Security Clearance Procedures.

4.5.1. In some emergency situations, a person being assigned to a sensitive position requires access to classified information prior to completion of a required investigation. Commanders may grant interim security clearance for Secret and TS classified access after the following process has been completed.

4.5.1.1. Minimum requirements for interim Secret eligibility are as follows:

4.5.1.1.1. Acceptable proof of citizenship and favorable review of Federal Bureau of Investigation (FBI) Criminal History Report (Fingerprint results).

4.5.1.1.2. Favorable review of a completed SF 86.

4.5.1.1.3. Favorable review of local files check, accomplished via AF Form 2583.

4.5.1.1.4. The PSI is showing in "Open" status in DISS.

4.5.1.2. Minimum requirements for interim TS eligibility are as follows:

4.5.1.2.1. Favorable completion of all requirements cited for interim Secret.

4.5.1.2.2. Favorable completion of a NAC (Shown in DISS).

4.5.1.2.3. If the member does not have a previous investigation meeting NAC requirement, 8 FW/IP will add the extra investigation Code "6" to the member's initial **TIER 5** investigation.

4.5.2. Unit/CCs or Agency Chief and the member sign a memorandum providing interim access and forwards to the 8 FW/IP Office for file.

4.5.2.1. The Unit SA will then grant interim access in DISS. Once the PSI has been properly adjudicated, DISS will automatically update from the interim to the proper access.

4.5.3. When TS access is required for urgent operational reasons (i.e. deployment), the Unit Deployment Manager (UDM) will request approval from the gaining deployed Unit/CC, if Interim TS access can be used. If allowed, the Unit SA will follow one-time/short duration access requirements.

4.5.3.1. Access must not exceed 180 days and is limited to specific, identifiable information. Access will be removed immediately when no longer required, at the conclusion of the authorized period of access, upon notification from the granting authority, or after 180 days from when access is granted, whichever comes first.

4.6. CE Procedures. Commanders, Supervisors, Unit SAs, First Sergeants and other applicable personnel, to include oneself, have a responsibility to ensure the continued trustworthiness of all cleared personnel and must report all issues IAW DoDM 5200.02_DAFMAN 16-1405. Under the CE program, there are 2 reporting categories.

4.6.1. DCSA AVS CE Report. This is a downward report from DCSA AVS identifying an issue that a member must respond in each timeframe.

4.6.1.1. 8 FW/IP will send all DCSA AVS CE Reports to the appropriate Unit SA to process with detailed instructions. These reports must be processed within 30 days. Unit/CCs must determine if the member should retain classified access or not while issue(s) are being reviewed for closure.

4.6.2. Local CE Report. This is a report from the local assigned unit to DCSA AVS informing them of a potential incident involving one of the 13 Adjudicative Guidelines.

4.6.2.1. The Unit SA will provide 8 FW/IP all reportable incidents that fall under the 13 Adjudicative Guidelines, within 72 hours of notification of the issue. Unit/CCs must determine if the member should retain classified access or not while issue(s) are being reviewed for closure.

4.6.2.2. The 8 FW/IP office will review the daily Security Forces (SF) blotter and any other available resources (i.e. Drug Demand Reduction Center, Legal, etc.) and send out CE notices to the appropriate Unit SA.

4.6.3. To properly close an issue on any reportable item, the unit must provide any of the following documentation, if it pertains to the process of that issue for the adjudicator to evaluate.

4.6.3.1. AFOSI reports of investigation, civil, police, or child advocacy reports.

4.6.3.2. SF incident or complaint reports and SSO reports.

4.6.3.3. Summaries of facts to substantiate any unfavorable information, to include a complete reference to the source of the information.

4.6.3.4. Summaries of unfavorable information file entries.

4.6.3.5. Medical or mental health summaries which indicate impairment of the individual's judgment or reliability and summaries of actions by mental health providers.

4.6.3.6. Reports showing the date of successful completion of a rehabilitation program, progress in a rehabilitation program, or the date termed a rehabilitative failure.

4.6.3.7. Summaries or actual reports of administrative, punitive or disciplinary actions to include Letters of Counseling, Admonishment, Reprimand, Article 15, Uniform Code of Military Justice (UCMJ), or courts-martial orders, bankruptcy petitions, discharge orders, or copies of letters of indebtedness.

4.6.3.8. Orders or written notification advising the status and location of individuals placed within retraining, on appellate leave, or rehabilitation or confinement status.

4.6.4. DCSA AVS will provide all final adjudicative decisions for each issue. If DCSA AVS decides to take action against a member's security clearance (i.e. revoke, deny), due process procedures outlined in DoDM 5200.02_DAFMAN 16-1405 will be followed.

4.6.5. If any member is shown to have SCI access, the 8 FW/IP will forward information to the local SSR to process. The SSR will forward any derogatory information they receive to 8 FW/IP as well.

4.7. Foreign Travel Reporting. All cleared personnel must report any foreign leisure travel to the SA prior to going. **Exception:** Members do not need to report any official travel or any travel throughout the Republic of Korea or to/from any U.S. State or U.S. territory.

4.7.1. Members must provide their Unit SA the date of departure, return date, type of travel (i.e. leisure) and location(s). Each travel location will be identified with an entrance and exit date for that location, if multiple locations are traveled to for same trip. The Unit SA will then import said information into DISS.

4.7.2. Upon their return, members will brief their Unit SA and provide any official or unofficial contacts while in the travel location(s). When reporting this information to their Unit SA, members should try to relay said foreign contact's first/last name, country of citizenship, and address if at all possible. **Note:** This is applicable to all official/unofficial foreign contact made while at their travel location(s).

4.7.2.1. Official Contacts. The member's organizational leadership will inform the member on when official contacts constitute reporting.

4.7.2.2. Unofficial Contacts. Any unofficial contact with a known or suspected Foreign Intelligence Entity (FIE) and any continuing association with a known foreign national that involves bonds of affection, personal obligation, or intimate contact; or any contact involving the exchange of personal information. **Note**: If a member makes an unofficial contact while on official travel, they must ensure to report the contact to their Unit SA within 5 days of return. Their Unit SA will enter information into DISS and add contact info under "Official Trip for Non-DoD Purposes".

4.7.2.2.1. The reporting of limited/casual public contact with foreign nationals is not required (i.e. hotel staff, public conversation with no exchange of personal info, etc.)

4.7.3. The Unit SA will debrief the members and have said member contact OSI if there were any suspicious contacts with individuals of any nationality while traveling and when:

4.7.3.1. Illegal or unauthorized access is sought to classified or otherwise sensitive information.

4.7.3.2. Individuals are concerned that they may be the target of exploitation by a foreign entity.

4.7.4. The Unit SA will enter a debrief date in DISS which will save the travel information and submit the record as final.

4.7.4.1. If emergency circumstances preclude full compliance with pre-travel reporting to the Unit SA, the member, at minimum, must verbally advise their supervisor and chain of command of the foreign travel prior to departure and provide a full DISS report to their Unit SA NLT 5 business days of return.

4.8. DISS Access Requirements.

4.8.1. 8 FW personnel are granted access to DISS for the following purposes:

4.8.1.1. Providing a proper owning/servicing relationship to members.

4.8.1.2. Verifying eligibility/determining access to classified information.

4.8.1.3. Other required processes identified in local training of their service members, employees, and visitors. **Note:** There are no other authorized uses of this system.

4.8.2. Member(s) must be appointed in writing by their Unit/CC or Agency Chief.

4.8.3. Member(s) must complete the Identifying & Safeguarding Personally Identifiable Information (PII) via **CDSE Security Awareness Hub** and the Cyber Awareness course via MyLearning.

4.8.4. Member(s) must have a completed DD Form 2962 *Personnel Security System Access Request.*

4.8.5. Once all requirements have been met, SA must forward information to 8 FW/IP for process.

4.8.6. Unauthorized DISS Actions. The following DO NOT DO list is not all inclusive, but users must ensure all actions are for official purposes. Any unauthorized activity is monitored by Defense Manpower Data Center (DMDC) and could permanently remove your access or open a security incident.

4.8.6.1. Querying system for your OWN record or any other record not for official purposes (i.e. celebrities, political figures, etc.).

4.8.6.2. Providing printouts or taking a screenshot of DISS data. **Note:** The Unit SA may use the DISS memorandum to provide for a member if security clearance information is needed. The letter is located on the TEAMS page.

4.8.6.3. Sharing of username, password, Common Access Card (CAC), or associated Personal Identification Number (PIN) numbers to access the system.

4.8.6.4. Allowing non-cleared individuals to access the system.

4.8.6.5. Leaving the application databases unsecure while logged in.

4.8.6.6. Allowing others to view screens that do not have authorization.

4.8.6.7. Entering test/dummy Social Security Numbers (SSNs) into the system.

4.8.6.8. Knowingly entering false/inaccurate information into the system.

4.9. DISS Visit Request Procedures.

4.9.1. The Unit SA is responsible for sending unit personnel visit requests to contractor facilities or locations where security clearance eligibility is required. This will be accomplished by entering a visit request, through DISS, to the appropriate Signature Management Office (SMO).

4.9.1.1. Personnel who intermittently visit the same facility throughout the year may request the duration of their visit for one year.

4.9.2. For those units that have classified contracts, a visit request must be accomplished, and a copy sent to the 8 FW/IP Office for file.

Chapter 5

INDUSTRIAL SECURITY PROGRAM (INDUSEC)

5.1. Classified Contract Preparation and Execution. The Unit SA will notify 8 FW/IP when classified defense contractors are assigned to work within their unit.

5.1.1. When contractor procurement requests are prepared for classified contracts, the unit's Quality Assurance Evaluation (QAE) System, Program, or Project Manager will identify program unique security requirements in solicitations and contract documents, to include drafting and incorporating program specific security classification guidance into the DD Form 254, *DoD Contract Security Classification Specification*.

5.1.2. QAE will coordinate contractual security specifications with the procuring contracting office and responsible security program disciplines:

5.1.2.1. Unit SA.

5.1.2.2. 8 FW/IP Industrial Security Program Manager (ISPM).

5.1.2.3. 8 CS (COMSEC, TEMPEST, and/or COMPUSEC).

5.1.2.4. 8 OSS (SCI and/or OPSEC).

5.1.2.5. Office of Primary Responsibility (OPR) or Functional.

5.1.3. The QAE must work in concert with the contracting officer, ISPM, security program disciplines and/or functional OPRs to develop the Visitor Group Security Agreement (VGSA) local security requirements. 8 FW/IP ISPM serves as the technical OPR for the development and preparation of the VGSA. VGSAs will be reviewed and signed by the Chief, Information Protection (CIP) and the lead contractor site representative to ensure contractors are aware of their security requirements and responsibilities.

5.2. DD Form 254 Preparation.

5.2.1. The QAE prepares an initial draft of the DD Form 254 *DoD Contract Security Classification Specification* for each classified contract and coordinates with the ISPM, Unit SA, Contracting Officer, and other security disciplines affected under the terms of the solicitation/contract to ensure accuracy. Once the initial review is completed, the requesting QAE incorporates the necessary changes and forwards the final DD Form 254 to the contracting officer for subsequent approval and signing.

5.2.2. Only the Contracting Officer or their designee (delegated in writing) certifies the DD Form 254 by signing Block 16e.

5.2.3. The AF Activity will review the DD Form 254 and applicable security classification guides every 2 years to ensure accuracy and currency. When changes are necessary, the contract will be modified if appropriate and revised guidance is issued.

5.3. Integrated Visitor Group. DoD contractors who are performing classified contract operations with access to classified information and occupy office space in the unit for more than 90 days are classified as integrated visitors' groups.

5.3.1. Integrated Visitor Groups will operate in accordance with DoDM 5200.01V1-3_DAFMAN 16-1404V1-3 and supplemental guidance thereto, which is applicable under the terms of the executed VGSA developed and produced by the 8 FW/IP. The VGSA will cover how the contractor will handle, generate, process, and store classified information while performing duties at KAB. The 8 FW/CD has designated the 8 FW/IP CIP as the authorized cognizant security representative for KAB. Contractor's "access" is limited to "need-to-know" contract specific classified performance information.

5.3.2. The Unit SA must ensure the contractor only accesses classified, sensitive, CUI, and applicable equipment that are specified on the DD Form 254.

5.3.3. The Unit SA must immediately notify 8 FW/IP ISPM when DoD contractors are performing classified contract operations.

5.3.4. All integrated contractor personnel must in-process with 8 FW/IP for clearance verification/validation and records review prior to performing the terms of the contract.

5.3.5. Integrated visitor groups will use existing DAF security program related plans (i.e., OPSEC, Program Protection, AIS, etc.) procedures, OIs, and educational/training materials that both meet the intent of and satisfy relevant National Industrial Security Program Operating Manual (NISPOM) requirements.

5.3.6. The Unit SA will ensure contractors are integrated in the unit's initial and annual refresher INFOSEC, PERSEC, and INDUSEC Program security training and will ensure said training is appropriately documented.

5.3.7. Contractors requiring access into PL-3 Restricted Areas or PL-4 Controlled Areas must complete the Unit's Security Education and Motivation/Escort Official Phase I (initial) and Phase II (annual) training to include Restricted Area Badge (RAB) training. Unit SAs will ensure training is appropriately documented.

5.3.8. The Unit SA must ensure the contractors are included in the unit's semiannual security self- inspection to ensure classified operations are complied with and they are abiding by contract security requirements. See **paragraph 2.5** for semiannual self-inspection procedures.

5.3.9. DoD contractors located on or visiting DAF installations in support of a classified contract must comply with DoD 5220.22-M, Chapter 6, Section 1, *Visit Requirements*.

5.3.9.1. The Unit SA is the unit's authorizing/approval authority for incoming/outgoing Visitor Authorization Letters (VAL) or similar requests for Integrated Visitor Groups and all unit personnel. VAL requests for all contractor visits to the organization will be forwarded from the Integrated Visitor Group's home security office to the Unit SA.

5.3.9.2. The Unit SA is responsible for verifying the contractor's security clearance and maintaining current visit requests on file.

5.3.9.3. QAEs receiving VAL requests directly from contractors will send the requests to the Unit SA before any contractors are allowed access to classified information.

5.3.9.4. The Unit SA will provide a copy of the VAL to the 8 FW/IP office.

5.3.10. Integrated Visitor Groups must report adverse information and suspicious contacts to 8 FW/IP through the applicable Unit SA. Adverse information or suspicious contact reports will be maintained in the visitor group's file for a period of 2 years.

5.3.11. Integrated Visitor Groups must report the loss, compromise or suspected compromise of classified information to 8 FW/IP via their Unit SA.

5.3.12. The QAE will notify 8 FW/IP in writing when contractual services and/or performance has been completed or terminated.

5.4. Prime Contractor Responsibility. Prime contractors are responsible for ensuring their on-base subcontractors are knowledgeable of and comply with the applicable security requirements as identified in contracts and/or contracting documents. Prime contractors complete DD Forms 254 on subcontractors.

5.4.1. Prime contractors supporting classified efforts must include a provision in each on-base subcontract that requires subcontractors to contact the installation commander or designee to execute a separate and/or independent VGSA prior to beginning on-base operations.

5.5. Administration. The ISPM, Unit SA and Integrated Visitor Group are required to establish a 6 part folder and maintain the following documentation. **Note:** The SA must ensure the ISPM receives the required documentation. This will be maintained on the applicable Unit's SA TEAMS page at a minimum.

5.5.1. Signed copy of the DD Form 254 and any revisions, to include attachments.

5.5.2. Signed copy of the VGSA.

5.5.3. Current listing of the key on-base management officials or representatives.

5.5.3.1. This will include the name of the contractor, building number where they routinely work, and their primary duty-phone number.

5.5.4. Copy of the last annual program review.

5.5.5. Copies of the last 2 unit's semiannual security self-inspection reports.

5.5.6. Copy of Contractor's VAL (**Note:** In addition, the Unit SA will maintain a copy of each outgoing/incoming VAL generated by or directed to the integrated visitor group).

Chapter 6

INFORMATION SECURITY (INFOSEC) ANNUAL AWARDS PROGRAM

6.1. Purpose.

6.1.1. Enhances the visibility of IP Professionals and contributions to the 8 FW mission.

6.1.2. Recognizes and encourages superior achievement and performance.

6.1.3. Generates supervisory awareness and support for DAF's IP Program.

6.2. Responsibilities.

6.2.1. The 8 FW/CIP will:

6.2.1.1. Monitor the awards program and ensure it is conducted in an objective manner.

6.2.1.2. Convene a board to select award winners and notify the applicable Unit/CC or Agency Chief of final winners.

6.2.1.3. Provide all winners with a certificate and/or plaque to be presented by or on behalf of 8 FW/CD at the first Security Assistant's Meeting following the selection.

6.2.1.4. Ensure all units with eligible personnel are afforded the opportunity to participate.

6.2.1.5. Ensure adequate publicity is given to the awards program.

6.3. Eligibility. Nominees must have been assigned duties as a Unit SA or Safe Custodian at KAB or a participating tenant unit during the period for which they are nominated (a minimum of 6 months assigned to duties.) The following paragraphs outline the requirements which must be met before one of these categories is submitted for nomination during the award period.

6.3.1. Unit SA(s) must:

6.3.1.1. Met all training requirements within 6 months of being assigned.

6.3.1.2. Have attended, or ensured unit representation, for both bi-annual security assistant meetings throughout the year.

6.3.1.3. Have an NBIS rejection rate lower than 50% for the year based on a minimum of 10 initiations. **Note:** If the unit had less than 10 initiations, these criteria will not apply.

6.3.1.4. Have NOT had any security incidents where the nominee was directly or indirectly culpable as determined by the inquiry report.

6.3.1.5. Have no more than 2 findings identified during Annual Assessments (LIPME).

6.3.1.6. Have no more than 2 missing annual deliverables (i.e. SAR Code Review, 311 Data Call, Annual Classified Cleanout) as required by the 8 FW/IP Office.

6.3.2. Safe Custodian(s) must:

6.3.2.1. Have met all training requirements within six months of being assigned.

6.3.2.2. Have NOT had any security incidents where the nominee was directly or indirectly culpable as determined by the inquiry report.

6.3.2.3. Have no more than one finding identified during Annual Assessments (LIPME).

6.3.3. Personnel are submitted in the following categories (**Table 6**):

6.4. Nomination Categories.

Table 6. Nomination Categories.

CATEGORY	APPOINTED POSITION	AWARD
Security Manager	Security Assistant	8 FW Security Manager of the Year
Security Assistant	Safe Custodian	8 FW Security Assistant of the Year

6.5. Nomination Procedures. Nominations may originate at any level but will be submitted by the Unit/CC or Agency Chief. Units will be limited to 1 nominee per category, per calendar year.

6.5.1. Submit nominations on AF Form 1206, *Nomination for Award*, single-spaced bullet format, 6 lines maximum. When completing the form, leave the SSN blank. The nominees' accomplishments are judged based upon performance during the period for which the person is nominated. The period shall begin 1 January and end 31 December of each calendar year.

6.5.2. Forward the nomination package to 8 FW/IP by 15 January for the proceeding calendar year.

6.6. Selection Board. 8 FW/IP is responsible for selection of board members. The board will consist of a mixture of 3 General Schedule (GS)-11 or higher civilians and/or Senior Non-Commissioned Officer/Company Grade Officer (SNCOs/CGO)s. The board president will be the CIP; the other members will come from the 8 FW/WSA or units throughout the 8 FW. Board members will evaluate nominees' packages, score packages using objective criteria, and rank order the nominees according to score. The CIP will combine the rank order scores to determine overall winners.

Chapter 7

OPERATION SECURITY (OPSEC)

7.1. Operations Security. Operations Security (OPSEC) is the protection of operations resulting from the identification and subsequent elimination or control of intelligence indicators susceptible to hostile exploitation. OPSEC is the process of denying adversaries information about friendly capabilities. Identifying, controlling, and protecting indicators associated with Critical Information (CI), even though they may not be classified, which provide a "tip-off" that an operation or activity will occur. These are known as the Essential Elements of Friendly Information (EEFI).

7.1.1. Definitions

7.1.1.1. Critical information Items. Critical information and Indicators (CIIL) are types or categories of information concerning a plan, project, or activity that if acquired by any means, may jeopardize successful execution of an operation. CIs are guides that tell you what information needs protection. There are key questions about friendly capabilities, intentions, operations, or other activities likely to be asked by an opposing decision maker in competitive situations. Refer to AFI 10-701, *Operations Security (OPSEC)*, for additional information.

7.1.2. Intelligence indicator. An item of possible intelligence value that, when properly interpreted, can provide information about capabilities and intentions.

7.1.3. All 8 FW personnel must use OPSEC in all activities, whether on/off base. Safeguard all EEFI and alleviate divulging sensitive information to those who do not have a positive need to know.

7.1.4. The 8 FW has a 100% shred policy, all documents containing CI should be destroyed by shredding when those documents are no longer required. Additionally, whenever discussing classified or sensitive information ensure that secure means are utilized, (i.e., SIPRNet, SVOIP, etc.)

7.2. Responsibilities.

7.2.1. Unit SAs will brief all newly assigned personnel on OPSEC and familiarize their personnel with the 8 FW Critical Information and Indicator List (CIIL) and individual unit’s CIIL (if applicable.)

JOHN G. J. DELION, Col, USAF
Commander

OFFICIAL LETTER HEAD

DD-MMMMM-YYYY

MEMORANDUM FOR 8 FW/IP

FROM: 8 ORG/CC

SUBJECT: Unit Security Assistant (SA) Appointment Letter

1. IAW 8 FW 16-1400 *Information Protection Program*, the below listed personnel have been appointed as Security Assistants:

ROLE	RANK	NAME	EMAIL	DSN	DEROS
PRIMARY	SSGT+	FIRST MI. LAST	FIRST.LAST@US.AF.MIL	782-1111	MMM-YY
ALTERNATE	SSGT	FIRST MI. LAST	FIRST.LAST@US.AF.MIL	782-1111	MMM-YY

2. In association with their duties as Unit SAs, the above listed personnel are delegated the following roles and responsibilities:

a. Access/Management of the Defense Information System for Security (DISS) and the National Background Investigation Services (NBIS) programs.
b. Authority to appoint Custodians for classified containers & open storage rooms/vaults.
c. Access to the Unit Manning Documents *UMD) and Unit Manpower Personnel Rosters (UMPR) to validate clearance access levels
d. Authorization to pick up derogatory information files from the 8 FW/IP Office.
e. Authority to issue DD Form 2501, *Courier Authorization,* cards to authorized/vetted unit personnel for transportation of classified information/equipment.
f. Authority to sign as the coordinating/approving official on the AF Form 2586, *Unescorted Entry Authorization Certificate*.

3. This memorandum supersedes all previous letters, same subject. Once selected, SAs will accomplish all required training within fifteen (15) calendar days of appointment. The Primary SA is responsible for routing a new appointment letter if any personnel change occurs.

FIRST MI. LAST, RANK, USAF
DUTY TITLE

Attachment 3

UNIT SECURITY ASSISTANT (SA) TRAINING

A3.1. Unit SA Appointment Letter: Ensure your SA Appointment Letter is current and accurately reflects all required personnel.

A3.2. DD Form 2962 Completion:

A3.2.1. Complete DD Form 2962.

A3.2.2. Sections 5 and 6 of the DD Form 2962 can be completed by either an appointed Unit SA or the 8 FW/IP office.

A3.3. Required Computer Based Training (CBTs):

A3.3.1. Complete all necessary CBTs through the CDSE Security Awareness Hub.

A3.3.2. Provide copies of each completed course certificate listed on the CDSE site, along with your Cyber Awareness certificate, and the signed DD Form 2962 to the 8 FW/IP Office via email (**8fw.ip.infoprotection@us.af.mil**).

A3.4. Account Creation (8 FW/IP Action): The 8 FW/IP office will create your Defense Information System for Security (DISS) and National Background Investigative Service (NBIS) accounts.

A3.5. One-on-One Training Scheduling: The 8 FW/IP office will contact you directly to schedule your mandatory one-on-one training appointment.

Attachment 4

SECURITY ASSISTANT CONTINUITY BINDER

A4.1. Section 1, Information Security.

A4.1.1. Tab A – Appointment Letters & Training Certificates

A4.1.2. Tab B – Unit Security Assistant Training Slides

A4.1.3. Tab C – Clear and Un-Clear Personnel Training Log

A4.1.4. Tab D – Unit Security Operating Instructions

A4.1.5. Tab E – Open Storage Room/Vault Request (Initial request/justification letter, structural and alarm survey from 8th CES and Physical Security survey from 8 SFS.)

A4.1.6. Tab F – Approval Memorandums for Open Storage Room/Vault

A4.1.7. Tab G – GSA Safes, Printers & Shredders Location List

A4.1.8. Tab H– Unclassified Inventory List of Safe/Room/Vault Contents

A4.1.9. Tab I – Quarterly Security Assistant Meeting Minutes (Last four copies)

A4.1.10. Tab J – Miscellaneous

A4.2. Section 2, Personnel Security.

A4.2.1. Tab A – Clearance Investigation Request Form

A4.2.2. Tab B – Copy of UMD and Unit Manning Personnel Roster (UMPR)

A4.2.3. Tab C – Current Periodic Reinvestigation Report (within the last 45 days)

A4.2.4. Tab D – Annual SAR and/or Top Secret (TS) Revalidation Review (Last 2 years)

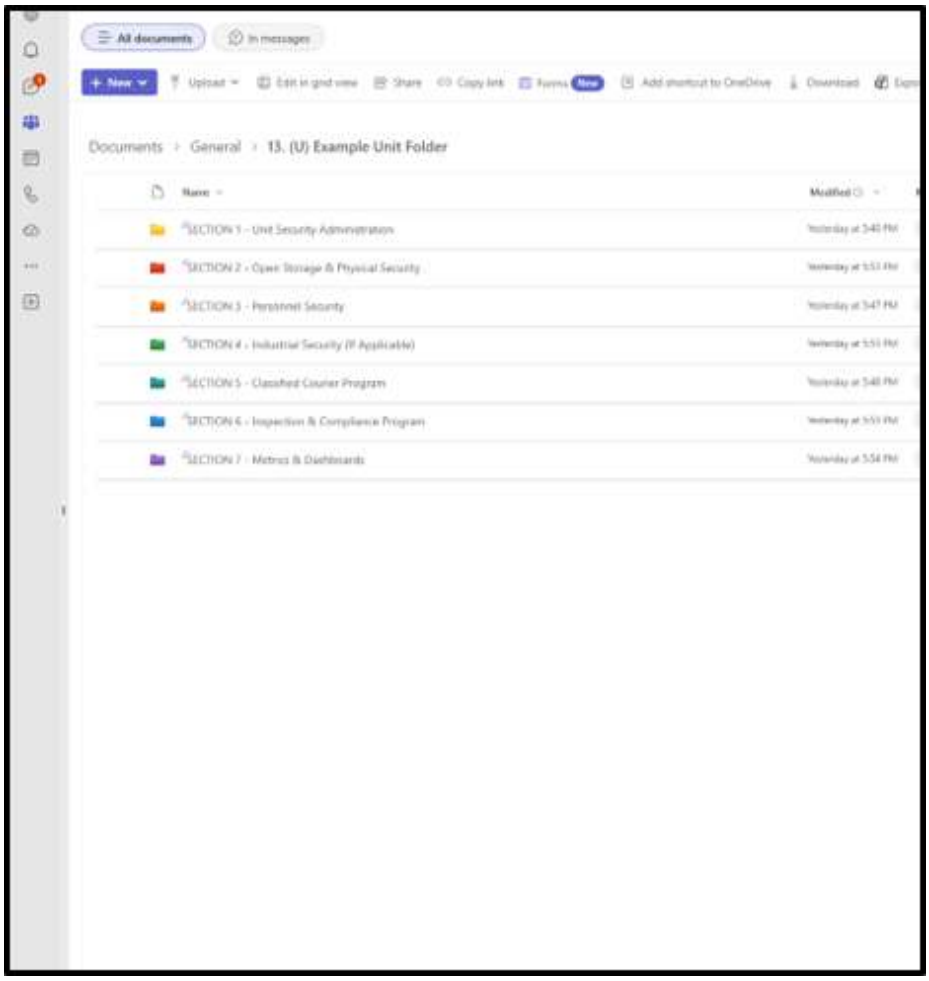

A4.2.5. Tab E – AF Form 2583, *Request for Personnel Security Action*, for Interim Security Clearance and Access to Classified (Retain the AF Form 2583 until the member PCS)

A4.2.6. Tab F – AF Form 2587, *Security Termination Statement* (Retain for two years)

A4.3. Section 3, Industrial Security.

A4.3.1. Tab A – Industrial Security Folder (Includes DD Form 254, *Department of Defense Contract Security Classification Specification*, Visit Group Security Agreement (VGSA), On-site Security POC, 8 FW annual self- assessment report and DISS Visit Request)

Attachment 5

EMERGENCY PROTECTION, REMOVAL

AND DESTRUCTION OF CLASSIFIED MATERIAL INSTRUCTIONS TEMPLATE

A5.1. Threat. (Note: This is only a guide/template. Unit SA personnel must be direct and specific with respect to how unit personnel will react in an emergency situation. E)

A5.2. Natural Disasters. Kunsan Air Base experiences severe snowstorms and rainstorms.

A5.3. Man-Made Disasters. Civil disturbance, terrorism, and enemy action. Kunsan Air Base is susceptible to civil disturbances from outlying communities. Terrorism is a threat that could be experienced at any military installation at any time. The threat of terrorist action increases with the level of the local Force Protection Condition (FPCON). The Defense Condition (DEFCON) increases with the increased threat of enemy action.

A5.4. Limiting Factors. The 8th Operations Support Squadron manages the central emergency destruction facility for the base, located in Bldg. 1305. This facility houses a SEM ® disintegrator (mechanical pulverizer). For routine use and training, contact 8 OSS/Intel at 782-7907. This single central destruction facility is not capable of destroying all classified material within the time criteria specified by this plan. As a result, units must effectively plan and acquire enough routine and emergency destruction equipment to execute this plan.

A5.5. Execution.

A5.5.1. PHASE I (Emergency Protection.) Phase I will be implemented in the event of fire, natural disaster, bomb threat, civil disturbance, or in the case of an increased terrorist threat.

A5.5.1.1. Fire, Natural Disaster, or Bomb Threat.

A5.5.1.1.1. Secure material in approved security containers if time and safety permit. When personal safety is in jeopardy, evacuate the area and post individuals (who will you direct to take care of this action; how will they secure the facility, emergency notifications to Security Forces if needed, etc.?) to control entry and emergency access (owner/user are responsible for the protection of their classified and facilities--Security Forces will not be used for this function).

A5.5.1.1.2. Allow only responding emergency crews to enter the facility (Fire Department, Medical Services, Security Forces, etc.). Classified custodians may enter the facility to account for the unsecured classified materials after the area is declared safe. (What actions do you want the custodians to perform after the area is declared safe, i.e., ensure classified is accounted for; report missing classified, report damage, debrief emergency personnel when they inadvertently review classified materials, etc.)

A5.5.1.1.3. No entry to the facility will be allowed, until all classified material is accounted for (how will you accomplish security of the building until the area is declared safe?).

A5.5.1.2. Civil Disturbance or Increased Terrorist Threat.

A5.5.1.2.1. Post personnel in classified storage areas (specify what classified storage areas people will be posted and the actions they need to take, etc.), if the situation warrants. Posted personnel must be knowledgeable of procedures to request emergency assistance. Armed guards are not required.

A5.5.1.2.2. Prepare for the initiation of Phase II. Phase II is implemented when the possibility of conflict increases.

A5.5.2. PHASE II (Precautionary Destruction.)

A5.5.2.1. Segregate all classified into "mission essential" and "non-mission essential" categories.

A5.5.2.2. Retain mission essential classified material. Destroy non-mission essential classified material using routine classified destruction methods (specify where the material should be destroyed, locations of shredders, what destruction receipts are required, etc.).

A5.5.2.3. Prepare for PHASE III.

A5.6. PHASE III (Emergency Destruction.)

A5.6.1. PHASE III actions will be initiated upon the determination an imminent threat exists of the installation being overrun. The effect of premature destruction is considered inconsequential when measured against the compromise of classified information.

A5.6.2. Each unit will predesignate (let assigned personnel know where the unit's predesignated location will be) a location for the emergency destruction of classified material and procure or manufacture sufficient equipment to accomplish the destruction process (i.e., modified trash cans, BBQ grill, etc.) (all of these materials should be purchased and on-hand in the event of an emergency—SAs should ensure personnel know where the supplies are stored, etc.). If time does not permit you to use predesignated material, immediate destruction will be accomplished in any available container.

A5.6.3. Top-Secret material holders must have the capability to destroy all holdings within one hour.

A5.6.4. Secret and Confidential material holders must destroy the materials within two hours.

A5.6.5. No destruction records are required under emergency destruction procedures.

A5.7. Notification.

A5.7.1. The 8 FW Command Post will implement this plan by order of the installation commander or higher authority.

A5.7.2. The 8 FW Emergency Operations Center (EOC) will likely be formed during situations warranting implementation of any destruction phases and will ensure all units are notified as well as track progress (who are the designated EOC representatives, who are the designated UCC members; what do you want them to do, who and how do they report, how do you get hold of them, etc.).

A5.7.3. Any senior individual present in an area containing classified material that determines there is a sufficient threat, may implement any portion of this plan.

A5.8. Preparation Instructions.

A5.8.1. Assign classified material one of the following priorities.

A5.8.1.1. Priority One: Top-Secret

A5.8.1.2. Priority Two: Secret.

A5.8.1.3. Priority Three: Confidential.

A5.8.2. **(Develop in-depth checklists to implement this plan)** Post the checklists in the first file of the security container-locking drawer or on the primary entrance to secure rooms/OSSA, and bulk storage rooms.

A5.9. Taskings. (This section is only a guide--this is where you can list the tasks you want your people to accomplish)

A5.9.1. 8 FW/IP. Maintain this plan IAW applicable directives.

A5.9.2. 8 FW Command Post. Ensure notification is made upon implementation of this plan.

Attachment 6

CLASSIFIED CONFERENCE/MEETING CHECKLIST

Figure A6.1. Classified Conference Meeting Checklist.

CLASSIFIED MEETING/BRIEFING/CONFERENCE CHECKLIST		
The Unit Security Assistant (SA) is responsible for all items listed below unless the Unit/CC or Agency Chief has delegated the responsibility to another individual.		
PRE-MEETING PREPARATION		**CHECK**
1.1.	Determine subject of meeting and highest level of classification. **Note: Special Handling/Access, NATO, CNWDI, etc.)**	☐
1.2.	Determine meeting location. **Note: USG or Cleared Contractor Facility**	☐
1.3.	Determine if entire meeting will be classified or will be limited to classified sessions.	☐
1.4.	Select a meeting location that provides good physical control of the meeting room and perimeter.	☐
1.5.	Determine where classified material will be stored before, during, and after the meeting. Determine who will be responsible for the material.	☐
1.6.	Determine who will be responsible for managing classified material storage.	☐
1.7.	Determine if classified notes will be permitted. **If YES, establish storage and distribution procedures.**	☐
1.8.	Identify Potential Attendees.	☐
1.9.	Determine whether any foreign attendees/representatives will attend. **IF YES, arrange for an official information release for both unclassified and classified information from the FDO. Note: Any U.S. Citizen that represents a foreign interest is a foreign representative.**	☐
1.10.	Announce the meeting on a need-to-know basis. **Note: email, phone, etc.**	☐
1.11.	Establish Routing for Attendee Visit Requests.	☐
1.12.	Verify Security Clearances via DISS and establish need-to-know.	☐
1.13.	Establish a method to identify attendees for entry/re-entry **Note: control roster(s), badges, etc.**	☐
1.14.	Establish an assessment process for personal items to prevent unauthorized items from entering the meeting area. **Note: briefcases, backpacks, purses, etc.**	☐
1.15.	Identify equipment to be used/ensure it is authorized for classified use.	☐
1.16.	Identify any special communication requirements. **Note: STE (if required).**	☐
PRE-MEETING INSPECTION		**Initials**
2.1.	Ensure all doors, windows, and other openings are closed before the classified briefing begins. First-floor windows and windows on doors shall be covered to prevent visual access. Windows on other floors that allow visual access should also be covered.	
2.2.	Conduct a visual check of walls, ceilings, & floors for suspicious objects. **Note: holes, openings, exposed wires, recording devices, etc.**	☐
PRE-MEETING INSPECTION		**Initials**
2.3.	If you are not familiar with area, request the building manager be present.	☐
2.4.	Check all physically accessible areas.	☐

2.5.	Check, touch, and lift if possible the following items/areas to look for anything out of the ordinary such as possible recording devices. **Note: Trash containers, fire extinguishers, tables, desks, chairs, curtains, pictures, any items on walls/windows, and circuit breaker boxes.**	☐
DURING THE MEETING		**Initials**
3.1.	Prevent unauthorized entry by posting appropriately cleared DAF employees outside the meeting area, or lock entrances to control access.	☐
3.2.	Ensure conversations within the meeting room/area cannot be heard by un-cleared personnel outside the area.	☐
3.3.	Identify and verify security clearance of attendees that have been verified through DISS. **Note: On-hand rosters, lists, visit requests, messages, etc.**	☐
3.4.	Implement a check of all personal items. Look for unauthorized, unusual, or suspicious items. **Note: If an attendee denies the inspection, the item shall not accompany the attendee past the entry control point (ECP).**	☐
3.5.	Ensure personal electronic devices (PEDs) are not allowed within areas where classified information is discussed, briefed, or processed. No**te: cellular phones, radios, tape recorders, or other devices that can transmit or record, etc.**	☐
3.6.	If classified note taking is permitted, brief attendees on proper safeguarding, marking, and transmission requirements prior to the start of the classified portion of the meeting/briefing.	☐
3.7.	Identify the highest level of each classified session to the attendees.	☐
3.8.	Remind attendees that classified briefing portions should not be discussed freely once the meeting is finished.	☐
3.9.	Remind attendees that discussing classified information outside the designated classified areas is prohibited.	☐
3.10.	Remind attendees about their responsibility to protect classified information.Ensure all classified meeting material is properly marked.	☐
3.11.	Ensure classified cover sheets are affixed to the front of classified material.	☐
3.12.	Ensure AIS equipment used to process or project classified information is approved for classified use.	☐
3.13.	Protect classified materials during any breaks.	☐
3.14.	Follow established procedures for protection and storage of classified material at all times.	☐
3.15.	Maintain all electronic records in the approved electronic records management repository; this includes the classified repository on the SIPRNET.	☐
3.16.	Identify all attendees upon reentry from breaks, etc.	☐

Attachment 7

REQUEST FOR NATIONAL SECURITY INVESTIGATION

CUI

REQUEST FOR NATIONAL SECURITY INVESTIGATION

AUTHORITY: DoDM 5200.01_DAFMAN 16-1405_DAFGM2024-01
PRINCIPAL PURPOSES: To identify security clearance, special access programs, and eligibility requirements.
ROUTINE USES: To request personnel security clearance investigation, continued vetting requirements, and to record special access program authorization. SSN is used for position identification of the individual and records.
DISCLOSURE IS VOLUNTARY: Failure to provide information and SSN could result in individuals not receiving access to required information in order to perform their duties.

I. IDENTIFYING INFORMATION

1. NAME (LAST, FIRST, MIDDLE)	2. ORGANIZATION
3. GRADE	**4. SSN**
5. DEROS	**6. GOVERNMENT EMAIL**
7. DATE OF BIRTH	**8. PLACE OF BIRTH (CITY, STATE, and COUNRY)**

II. SECURITY CLEARANCE and CONTINUED VETTING (CV) REQUIRMENTS

8. INVESTIGATION REQUIREMENT	9. MOST RECENT INVESTIGATION CLOSE DATE
☐ Tier 1 National Agency Check and Inquiries (NACI)	
☐ Tier 3 Initial Secret Investigation	10. MOST RECENT CONTINUOUS VETTING DATE
☐ Tier 3R Secret Reinvestigation/Continuous Vetting	
☐ Tier 5 Initial Top Secret Investigation	NOTE: Top Secret upgrade requires attachment of Assignment RIP, Orders w/required TS Clearance, or UMD showing Top Secret requirements.
☐ Tier 5R Top Secret Reinvestigation/Continuous Vetting	

III. REQUESTING UNIT SECURITY ASSISTANT

11. DATE	12. GRADE, NAME and TITLE of REQUESTER	13. SIGNATURE

IV. ADDITIONAL REMARKS

202509, Version 1 8 FW/IPO
