Flying Operations

FLYING HOUR MANAGEMENT

COMPLIANCE WITH THIS PUBLICATION IS MANDATORY

ACCESSIBILITY: This publication is available for downloading or ordering on the e-Publishing website at www.e-Publishing.af.mil.

RELEASABILITY: There are no releasability restrictions on this publication.

OPR: *NGB/A3/10O*

Certified by: *NGB/A3/10O* (*Col Todd R. Gibson*)

Supersedes: *ANGI 11-101, 22 March 2021*

Pages: 22

This publication implements Air Force Policy Directive (AFPD) 11-1, Flying Hour Program, by providing guidance to the National Guard Bureau (NGB) staff and Air National Guard (ANG) flying units outlining responsibilities, policies, and procedures for planning, programming, and executing the ANG flying hour program. It also provides guidance and policy for unit level planning and reporting flying-hour execution. This instruction is applicable to all ANG flying organizations including detachments, and associations. Failure to comply with the publication is punishable as a violation of Article 92 of the Uniform Code of Military Justice (UCMJ). The UCMJ does not apply to members of the ANG while in Title 32 status, but ANG members may be subject to an equivalent article under a state military justice code. This instruction recognizes that command authority is exercised by the State Adjutants General; the NGB provides policy and management guidance. Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using the AF Form 847, *Recommendation for Change of Publication*; route AF Form 847s from the field through the appropriate functional chain of command. Ensure all records generated as a result of processes prescribed in this publication adhere to AFI 33-322, *Records Management and Information Governance Program*, and are disposed in accordance with the Air Force Records Disposition Schedule, which is located in the Air Force Records Information Management System.

The authorities to waive wing, unit, delta or garrison level requirements in this publication are identified with a Tier ("T-0, T-1, T-2, T-3") number following the compliance statement.

Submit requests for waivers through the chain of command to the appropriate Tier waiver approval authority, or alternately, to the publication OPR for non-tiered compliance items. The use of the name or mark of any specific manufacturer, commercial product, commodity, or service in this publication does not imply endorsement by the Department of the Air Force.

SUMMARY OF CHANGES

This document has been revised and should be completely reviewed. Changes include changes to execution forecasting, reporting procedures for execution review periods, programming and execution procedures, and flying hour funding.

Chapter 1
PROGRAM OVERVIEW

1.1. Overview. The objective for the Air National Guard (ANG) Flying Hour Program (FHP) is to provide ANG units with flying hour resources to accomplish validated weapon system Volume 1 training requirements, to ensure the highest level of aircrew training and readiness, and to fully execute the approved flying hour program as funded in the President's Budget (PB1.1.2).

1.2. Fiscal year flying-hour Operations and Maintenance (O&M) programs may not be exceeded without NGB A3/10 and FM approval. Likewise, the Transportation Working Capital Fund (TWCF) program and its expense authority may not be exceeded without prior approval and coordination with Headquarters Air Mobility Command Training Resources Branch (AMC A3TR).

1.3. Units must fly within the limits of their specific weapon system Program Element (PE) and schedule missions accordingly to fully execute their approved annual flying hour allocation. Annual allocations may consist of O&M, Overseas Operations (OO), Reimbursable, Foreign Military Sales (FMS), and/or TWCF airlift hours.

1.4. There may be situations during OO or other reimbursable type missions (e.g. Theater Security Package (TSP), Geilenkirchen, etc) when training missions must be accomplished to maintain aviation skill proficiency. In these cases, O&M training hours may be executed at the deployed location provided the mission is scheduled, planned, and executed for the sole purpose of training. Otherwise, all hours flown for deployment, employment, and re-deployment must be charged to the appropriate approved Named Operation or TWCF airlift hours.

1.5. Only missions scheduled in direct support of contingency operations and authorized by the combatant commander will be approved and will only use OO or TWCF flying hours.

1.6. Annual execution forecasts must be realistic and executable and include all operational training, OO, Reimbursable, FMS, and TWCF airlift hours.

1.7. Units supporting Domestic Emergency Responses, whether direct support, prepositioning, or repositioning, will contact NGB A3/10 Flying Hour Team to determine what mission symbol to use.

1.8. NGB A3/10 Flying Hour Team will ensure that each unit is allocated adequate flying hours for aircrew to attain and maintain aviation skills necessary to successfully accomplish AF

mission requirements IAW specific Mission Design Series (MDS) Vol 1/Ready Aircrew Program (RAP) training requirements.

1.9. Units are responsible for planning, scheduling, and executing their entire annual flying hour allocation.

1.10. Wing commanders will ensure that a Flying Hour Working Group (FHWG) is formed, appointed annually, and meets on a regular basis. The FHWG will consist of, as a minimum, representatives from Maintenance Group, Operations Group, Aviation Resource Managers (ARMS), and Comptroller Flight.

1.11. Wings are responsible to ensure the FHWG e-mail org box is updated annually with all current appointed members. This is imperative to ensure wings receive emergent and updated information pertaining to the FHP.

1.11.1. It is required that representation from Operations Maintenance Plans and Scheduling, and ARMS offices participate in all FHWG meetings.

1.11.2. Unless otherwise appointed by the Wing Commander, the Operations Group Commander (OG/CC) or the Air Operations Officer (AO) will chair the FHWG.

1.11.3. FHWG meetings will be held quarterly at a minimum with the option to be more frequent if needed. Meeting minutes will be documented and maintained in operations IAW Record Disposition Schedule.

Chapter 2

ROLES AND RESPONSIBILITIES

2.1. NGB/A3 is the Office of Primary Responsibility (OPR)

2.1.1. NGB/A3O has the responsibility to manage the execution of the ANG FHP.

2.2. NGB/FM, NGB/A4, and NGB/A8 have coordinating responsibilities and are considered Office of Coordinating Responsibility (OCRs), for this instruction.

2.2.1. NGB/FM. Provides Resource Management, Financial Services, and decision support to the FHP.

2.2.2. NGB/A4. Manages the FHP Funding, Weapon System Sustainment (WSS), Depot Level Reparable (DLR), Aviation Petroleum, Oil and Lubricants (AvPOL), etc.

2.2.3. NGB/A8. Responsible for the strategic planning and programming of the FHP.

2.3. Wing/Group Commanders will establish their local FHWG, appoint its members, and ensure compliance with the provisions of this ANGI. The FHWG will consist of:

2.3.1. Operations Groups are responsible for scheduling flying hours within their plan, verifying the accuracy of unit flying hour data, and work with maintenance personnel to ensure corrections are made within 30 days of missions being executed.

2.3.2. ARMS personnel are responsible for maintaining Form 781s, determining the accuracy of all aircraft utilization data on each Form 781, and reconciling any incorrect mission details on the form 781s with maintenance plans and scheduling within the specified time.

2.3.3. Maintenance Plans and Scheduling personnel are responsible for reconciling hours with Operations by ensuring all identified errors are corrected in the local Maintenance Information System (MIS).

2.3.4. Comptroller flight is responsible for providing decision support, analysis, oversight and accountability of all wing resources.

Chapter 3

PROGRAMMING/MODEL DEVELOPMENT

3.1. Programming. NGB/A8 is responsible for programming the overall ANG FHP and then submitting those requirements in the ANG's Program Objective Memorandum (POM) request to the Air Force Corporate Structure. While the ANG FHP receives formal authorization through the National Defense Authorization Act (NDAA) for the fiscal year (FY), the execution of its funding is contingent upon the enactment of the Defense Appropriations Act. Once the Defense Appropriations Act is signed into law, the ANG FHP is expected to fully execute all allocated funding in accordance with the approved budget.

3.1.1. Program Element Monitors (PEMs) and Force Programmers will utilize standard AF methodology and lead command models when developing the ANG FHP, IAW AFI 11-102, *Flying Hour Program Management*. PEMs may validate unique training and mission requirements with NGB/A3 and other functional experts to ensure all requirements and concerns are addressed when developing the ANG FHP.

3.2. Model Development. PEMs and Force Programmers will use lead command models as directed in AFI 11-102. The model will consist of five core components: Force Structure,

Aircrew Data, Requirements, Calculation, and Summary. For operational flying units, the relationship of these components expressed in the mathematical calculation is: force structure determines the total number of pilots, and pilots multiplied by requirements determine the total number of flying hours. For formal training units, the mathematical calculation is: average daily student load multiplied by the average number of hours per student per day, multiplied by the number of training days determines force structure.

Chapter 4

PROGRAM MANAGEMENT

4.1. Management of the FHP is among a flying wing's most important peacetime responsibilities. The goal of the program is to provide the highest level of pilot and aircrew training, proficiency, and mission capability with available resources.

4.2. Program management starts with the initial planning phase and continues through the year of execution including initial distribution, mid-year review and end-of-year (EOY) close out.

4.3. Planning starts approximately nine months before the new FY and continues through the year of execution. During the year of execution, wings must perform hour reconciliation to the approved wing initial hour distribution (also called the FHP Execution Plan) at a minimum of once per month or more frequently if necessary.

4.4. Units should utilize ANG models and unit historic utilization rates for their specific weapon system and include any known adjustments or changes when establishing their annual flying hour requirement. NOTE: When establishing flying hour requirements, wings must take into consideration any deployments, exercises, and conversions that will impact their FHP.

4.5. Planning is the cornerstone to successful flying hour program execution. Accurate long-range planning is extremely important for Headquarters United States Air Force (HQ USAF), Secretary of the Air Force Financial Management (SAF/FM), and NGB/A8/A3/A4, to prepare forecasts for critical programs and commodities. Accurate unit planning is vital to unit funding and mission accomplishment.

4.6. Once unit planning is complete and approved by the unit FHWG, the requirements will be submitted to NGB/A3 Flying Hour Team within the specified time frame using online reporting systems as specified by NGB/A3 Flying Hour Team.

Chapter 5

ALLOCATION/DISTROBUTION PROCESS/FLYING HOUR FUNDING

5.1. Allocation/Distribution Process.

5.1.1. Annual flying-hour requirements are established by the wing's FHWG and then forwarded to NGB/A3 Flying Hour Team for approval and allocation. These requirements must include *all* projected hours required to support training, operational missions, contingency/Air Expeditionary Force (AEF) operations (OO), reimbursable, FMS, and TWCF airlift missions.

5.1.2. The ANG FHP manager will review all wing requirements, verify funding, and coordinate approval with NGB/A3. Following NGB/A3 approval, hours will be allocated/distributed to the wings for execution. It is the wing's responsibility to verify that the approved FHP are correct and support the wing's requirements.

5.1.3. The ANG FHP becomes funded once the National Defense Authorization Act (NDAA) is signed.

5.1.4. Annual allocations may consist of the following categories of flying hours: O&M, TWCF Airlift, OO, and Reimbursable Flying Hours.

5.1.4.1. O&M Direct Funded Hours supports the training hours required to train aircrews to safely operate their aircraft and sustain them in numbers necessary to execute their core tasked mission.

5.1.4.2. Reimbursable flying hours that support Higher Headquarters (HHQ) directed Operations, and other operationally distinct missions must be identified and coordinated with NGB A3/10 Flying Hour Team prior to execution as specified in the Annual Flying Hour Execution Guidance published by AF/A3TR. Flying hours for these missions will be included in the annual allocation/distribution to the units as reimbursable hours.

5.1.4.3. TWCF airlift hours may only be executed by AMC gained aircraft. TWCF hours will be included in the unit annual FY allocation if requested. Maximum TWCF levels are established in agreement with HQ AMC. Over execution must be requested, coordinated and approved prior to airlift by NGB A3/10 Flying Hour Team and HQ AMC/A37TR.

5.2. Flying hour allocations are authorized and adjusted during the fiscal year under the approval of NGB/A3 Flying Hour Team. Units will submit their requests for all allocations and adjustments using the NGB/A3 Flying Hour Team's requested format.

5.2.1. Changes to the allocation will result in parallel changes to unit fly funding.

5.2.1.1. Initial distribution. The initial distribution is provided to units based on an approved and validated requirement prior to the beginning of the FY.

5.2.1.2. The mid-year execution review immediately follows the completion of the first six months of flying in the fiscal year. Units must review, confirm, and request changes (as needed) to their yearly total flying hour requirements and submit those requirements to NGB/A3 Flying Hour Team for approval to execute within 10 days of the specified date.

5.2.1.3. The third quarter execution review immediately follows the completion of flying nine months into the FY, normally the first week of July. Units must review, confirm, and request any changes to their EOY total flying hour requirement, and then submit those requirements to NGB/A3 Flying Hour Team for approval to execute within 10 days of specified date.

5.2.1.4. EOY or fourth quarter adjustments will only be made to support unexpected HHQ flying requirements such as national or state emergencies, natural disasters, or in the case of contingency support.

5.2.2. Once the Initial Command Allocation is approved units are required to fully execute their approved allocated hours.

5.2.3. In order to conserve resources, including aviation fuels, units should not schedule known non-productive sorties within the last week of the fiscal year for the sole purpose of executing their allocation. Effective scheduling should ensure that every sortie has a value-added training objective.

5.3. Flying Hour Funding.

5.3.1. Under the Cost Per Flying Hour (CPFH) construct, funds paid to the Working Capital Funds (WCF) for DLR and Flying Supplies and funding for most AvPol expenditures are centrally managed at NGB/A4PY. A limited amount of FHP funding is approved for issue and utilization on specially designated FHP Government Purchase Card (GPC) accounts.

FHP funding is directly tied to the flying hour allocations authorized by NGB/A3 and actual hours executed during the fiscal year.

5.3.1.1. The central management of WCF expenditures (DLR and Flying Supplies), provide what appears to be 'free issue' for the wings. However, proper stewardship of FHP resources are critical to ensuring resources are available to fund training programs across the enterprise and to protect the FHP in the Future Years Defense Program.

Chapter 6

MISSION IDENTIFICATION NUMBER AND MISSION SYMBOLS

6.1. Mission Identification Number. Mobility Air Forces (MAF) wings only: Overall mission number guidance can be found in the MAF Mission ID Encode/Decode Procedures. The most current Encode/Decode Procedures is located on the ANG FHP SharePoint site (https://intelshare.intelink.gov/sites/ngba310/SitePages/A310O_PRO.aspx?PRO=17).

6.1.1 Relationship of the mission number to the mission symbols for different types of missions. The third character of a mission number has a direct relationship with the mission symbol and assists in determining the correct mission symbol that should be used with the mission number assigned. This association is noticed most when the flying hour data is entered into FMxC2 by the unit's maintenance personnel. The FMXC2 system is set up to prevent the entry of incorrect mission symbols that do not match system presets for mission numbers. Integrated Maintenance Data Systems (IMDS) does not contain these edit features. Incorrect mission number and mission symbol entries directly affect reimbursements for aircraft operations and can lead to serious issues.

6.2. **Aircraft Utilization Code (AUC) / Mission Symbol Guidance (All Units).** Mission symbols are the means of tracking all missions that the Air Force and associated organizations accomplish with the aircraft assigned. Only ANG Mission Symbols from the ANG Master Mission Symbol List should be used on ANG AFTO 781 forms. The ANG Mission Symbol list can be found on the NGB A3/10 FHP SharePoint site. This list is updated frequently.

6.3. For MAF units to determine which mission symbol will be accepted in FMxC2 and match up to the third character of the mission number, consult the FMxC2 AMC Mission Symbol List. AMC mission symbols are not authorized for use on ANG forms. However, this list reflects

what third characters will work with the mission symbol. These characters are listed in the column labeled “3rd position” of the FMxC2 list.

Chapter 7

OO AND HHQ DIRECTED MISSION

7.1. For the purpose of this instruction OO are contingencies and defined as operations directed by AF HHQ with tasking from a gaining MAJCOM.

7.2. All flying hours logged during deployment, employment, and redeployment phases in support of a tasking in an overseas location will be coded with ANG mission symbols for the specific contingency/operation being flown. Airborne spares and staging sorties will also log hours for the specific contingency/operation.

7.2.1. Total Force (TF) Associations exist with two or more differing Air Force component organizations offering unique capabilities.

7.2.1.1. Each component within the association has flying hours programmed to train aircrews accordingly. Flying hours and associated funds are not transferred between components to facilitate training. As such, flying hours are not to be coded for "reimbursement."

7.2.1.2. All agreements to "share aircraft" outside of association processes must include an official change of possession to track the hours. This provides the official documentation and audit trail to cover all requests for reimbursements.

7.3. Any new emerging OO missions must be identified and coordinated with NGB A3/10 Flying Hour Team prior to execution to verify funding and coordinate approval as appropriate.

7.3.1. For OO missions, outside of association processes must include an official change of possession to track the hours. This provides the official documentation and audit trail to cover all requests for reimbursements.

Chapter 8

NON-CONTINGENCY DEPLOYMENTS AND EXERCISES

8.1. Non-contingency deployments and exercises will use O&M training hours unless otherwise instructed by the tasking activity and coordinated with NGB A3/10 Flying Hour Team. These missions may include Chairman Joint Chiefs of Staff (CJCS), Department of Defense (DoD) and Air Force.

8.2. When supporting an exercise, the hours will be considered either O&M or TWCF. If the unit is participating in and receiving training, the hours will be from the unit's O&M training allocation. If the airlift support mission is tasked through the Tanker Airlift Control Center (TACC) as a support mission it will be a TWCF sortie. Unless otherwise directed, refueling missions in support of exercises will be O&M training and coded accordingly using the ANG Master Mission Symbol List.

8.2.1. Use the AMC MAF Mission ID Encode/Decode Procedures to determine compatibility between mission symbols and mission numbers.

8.2.2. Each AMC Mission Identification (ID) number has twelve characters. Only a "funded exercise" will have letter identifiers in the 8th and 9th character positions of the mission ID number. AMC publishes an Exercise and Contingency list that includes mission symbols and 8th & 9th character elements. These listings contain the two letter identifiers that correspond to each Exercise and Contingency with the official name of each event.

8.2.3. Combat Air Forces (CAF) - Fighters, Rescue, and Special Ops participating in exercises will use unit O&M training hours.

Chapter 9

COUNTER DRUG/NARCOTICS (FEDERAL AND STATE) SUPPORT

9.1. CONUS Counter Drug operations in Primary Assigned Aircraft (PAA) will be planned and executed within the wing's O&M flying hour program. These missions will be coordinated and operated under the control of the State Counter Drug office. Counter Drug mission symbols can be found on the ANG Master Mission Symbol List located on the NGB A3/10 FHP SharePoint site.

9.2. OCONUS Counter Drug/Narcotics missions will be flown using AF reimbursable funding. Hours for these operations will be included in the unit reimbursable requirement forecasts and allocations.

Chapter 10

DEFENSE SUPPORT OF CIVILIAN AUTHORITIES (DSCA) (STATE/FEDERAL DIRECTED DOMESTIC OPERATIONS)

10.1. IAW DoDD 3025.18, Defense Support of Civilian Authorities, the following information is provided for managing and documenting flying hour execution for support of civilian authorities in situations of state and/or national disasters or emergencies. These missions are

those in which the main purpose is in direct support of non-military activities such as civil relief, mercy missions, health, communications, public works, and others contributing to the economic and social well-being of the state and nation. These missions may include aerial firefighting, hurricane, tornado, and flood relief, and/or Emergency Medical Assistance Compact (EMAC) supported disaster relief, declared emergencies, or civil disturbance operations. In most cases, these flying hours will be executed by airlift, tankers, operational support, or rescue type aircraft.

10.1.1. Two scenarios will take place to support emergency relief operations:

10.1.1.1. AF Tasked. The call for airlift assistance will be made from a state Joint Operations Center (JOC) or a federal agency e.g., the Federal Emergency Management Agency (FEMA), who may in turn contact the TACC at Scott AFB. TACC will then contact a unit, and the mission will be flown as a TWCF airlift mission and coded according to HQ AMC's direction using an appropriate TWCF mission utilization code. Units will **not** seek reimbursement directly from the state for TACC directed TWCF funded missions.

10.1.1.2. ANG Coordinated. The unit is tasked directly by their state headquarters. The ANG Crisis Action Team (CAT) may expedite the tasking process by coordinating requirements with available resources. Supporting units will fly missions utilizing unit O&M training hours. These missions will be coded as Military Support of Civilian Authorities, IAW DAFMAN 11-401, *Aviation Management*, using T4xx mission symbols from the ANG Master Mission symbol List. Dependent upon the authorities, tasking, and scenario, units will work with NGB to ensure billing and reimbursement is accomplished with the supported state.

10.2. For properly coded/approved DSCA missions, with the assistance of the wing, NGB will seek reimbursement from the tasking agency based upon official rates published by DoD annually.

Chapter 11

TRANSPORTATION WORKING CAPITAL FUND (TWCF)

11.1. TWCF hours provide economic airlift while accomplishing valuable training. TWCF hours are executed while performing Channel, SAAM, exercise, or contingency missions. Execution is validated by flying hour data logged by units via mission symbols downloaded from the REMIS data system daily.

11.2. A portion of the overall ANG airlift flying hour program is identified to support TWCF missions. The ANG does not have its own TWCF funding prior to flying the mission, but it does have an execution authority based on historic TWCF execution levels. The ANG will only receive funding for hours logged accurately with approved, current TWCF mission symbols. TWCF funding only accounts for fuel and not other factors in the CPFH. Note: See A4P Financial Management Guidance for further details.

11.3. TWCF hours are included in the wing's total annual flying hour allocation. Note: Do not reduce O&M allocation to execute TWCF or other types of hours. The official data source for validating TWCF hour execution is the REMIS Flying Hour data which can be obtained on the GCSS data service site located on the AF Portal.

11.4. Units flying TWCF missions must use appropriate TWCF mission symbols for the ANG to receive reimbursement. These symbols are the sole source for identifying and documenting TWCF participation. TWCF mission symbols may begin with the letter "C", "L", "M", "P" or "R".

Chapter 12
REPORTING FLYING HOUR EXECUTION

12.1. Units must use mission symbols from the ANG Master Mission Symbol List. The most current list can be found on the NGB A3/10 FHP SharePoint site. All squadrons hosted by an ANG Wing, either active or reserve, will use symbols from the ANG Master Mission Symbol List when performing a sortie in an ANG owned/possessed aircraft.

12.1.1. ANG squadrons attached to Active Duty or Reserve wings will also use symbols from the ANG Master Mission Symbol List when performing a sortie in an Active or Reserve owned/possessed aircraft.

12.2. Host unit ARMS personnel assigned to operations will ensure that all mission symbols used by their flying squadrons are on the ANG Master Mission Symbol List.

12.3. Units will log flying time IAW DAFMAN 11-401, *Aviation Management.*

12.3.1. The Operations and Maintenance personnel will coordinate and ensure that those symbols used are correctly linked to the appropriate PEC code for their unit/weapon system in the FMXC2 or IMDS data base. This can only be done by reviewing REMIS data.

12.3.1.1. AMC gained units using FMXC2 should refer to DAFI 21-103, AMC Supplement for detailed instructions for tracking, reconciling, and reporting.

12.3.1.2. ACC gained units using IMDS should refer to DAFI 21-103, ACC Supplement.

12.3.2. If an incorrect mission symbol is entered, then an incorrect PEC or incorrect MAJCOM may be credited with the flying hour.

Chapter 13
FLYING HOUR RECONCILIATION

13.1. The Chief of Aircrew Scheduling and Support Division (i.e. Current Operations, Flying Hour Management) is the operations function responsible for verifying the accuracy of unit flying hour data.

13.2. ARMS or Current Operations will determine the accuracy of all aircraft utilization data as recorded on the AFTO 781's or TDY utilization message. Annotate discrepancies on the daily utilization reports/flying hour audit list. The Chief of ARMS or designated representative will sign the validation statement on the daily operational utilization report. ARMS or Current Operations will coordinate with maintenance debriefing to ensure required corrections were made to the database. (Reference AFI 21-103, *Equipment Inventory, Status, and Utilization Reporting).*

13.3. The host unit ARMS office will reconcile the operations records (AFTO 781s) with the host unit A4 Plans & Scheduling Accomplishment Utilization Report (AUR) report. In addition to the normal AUR data, special attention must be made to ensure that the appropriate command PEC has been credited to the time flown in the local data system, IMDS/FMXC2.

13.4. Reconciliation will take place daily IAW DAFI 21-101, *Aircraft and Equipment Maintenance Management*. Reconciliation will also include verification of unit level data entered into FMXC2 or IMDS, Aviation Resource Tool Enterprise Mission Information System (ARTEMIS) and compare with REMIS. Pay special attention to the flying time, mission symbol, and Program Element Code (PEC) when reviewing the REMIS data.

13.5. Maintenance Group personnel are responsible for correcting errors within the allowable timeframe. Errors must NEVER be over 30 days old.

13.6. Unit level data flows from IMDS or FMXC2 systems to the REMIS system, the Air Force System of Record. Once the data has changed and is updated, reconciliation must be re-accomplished. If units cannot make corrections locally then notify the NGB/A4 AVDO to have errors corrected at the command level.

Chapter 14
PROGRAM EXECUTION MEASUREMENT

14.1. The ANG flying hour program is measured in four separate categories: Direct O&M, Reimbursable, TWCF, and OO. Each month a combined report is submitted to Air Staff which details reported all executed ANG flying hours from all ANG flying units in the following categories.

14.1.1. Direct O&M. Hours funded in the Enacted Appropriation to meet all operational training and pilot/aircrew training proficiency requirements.

14.1.2. Reimbursable Hours funded by external agencies such as the National Science Foundation (NSF), FMS, Air Force Special Operations Command (AFSOC) or TSP as identified in Annual HAF/A3TR Flying Hour Program Memorandum.

14.1.3. TWCF. Hours flown in support of TACC tasked airlift missions.

14.1.4. OO. Hours flown in direct support of HHQ tasked operational missions as specified in the Annual Flying Hour Execution Guidance published by AF/A3TR.

Chapter 15
ASSOCIATION AND TOTAL FORCE INTEGRATION

15.1. Descriptions:

15.1.1. Classic Associate: When an ANG unit officially associates with and flies with an active-duty (AD) AF unit on their aircraft, this is called a "Classic Associate" organization. Flying hours are programmed by both commands for their respective aircrew *training* requirements. Flying time is allocated to each unit by their respective command FH manager, and the flying time will be reported on the AFTO 781 using the mission symbols marked as associate mission symbols on the ANG Master Mission Symbol List. The associate mission symbol will have the appropriate ANG PEC assigned to it through IMDS or FMXC2, and that PEC will properly identify the hours as being from the ANG program. ANG crews must use the ANG Master Mission Symbol List when selecting associate symbols for all training and operational missions. Cost of Business sorties will always be logged against the command that owns the aircraft regardless of who flies the mission.

15.1.2. Active Associate: When the AD is associating with an ANG organization and flying ANG aircraft, this is called "Active Associate". Flying hours are programmed by both commands for their respective aircrew *training* requirements. Flying time will be

allocated to each unit by their respective command FH manager. The active duty will report flying hours on the AFTO Form 781 using the designated ANG Associate mission symbol. The Associate ANG mission symbol will automatically link the time flown to the appropriate active-duty PEC, and the active command will automatically get credit for the time flown.

15.1.3. ARC Associate: When the AF Reserve associates with an ANG organization or vice versa, it is called an "ARC Associate". Flying hours are currently programmed by both commands for their respective aircrew training requirements. Flying time is allocated to each unit by their respective command FH manager. The flying hours are reported on the AFTO 781 using the associate mission symbol that has been assigned the appropriate Air Force Reserve Command (AFRC) PEC. PEC will be assigned to the associate mission symbols by HQ AMC/A4 for FMXC2 users, and by the host unit maintenance data system administrator for IMDS users. This is accomplished by IMDS or FMXC2 representatives.

15.2. TFI (Total Force Integration) units and associate units must use their MAJCOMS's flying hours. This is accomplished by logging MAJCOM provided mission symbols. In multi-seat (non-fighter) aircraft, the A-code MAJCOM is charged the flying hours. Exception: If the A-code is utilized to benefit the other component, the benefitting command will be charged the flying hours (e.g., ARC IP is A-code to train AD crew, then AD is charged or vice versa).

Chapter 16
ASSOCIATE PROGRAM GUIDANCE

16.1. During the year of execution all ANG units, including associate organizations, receive an annual allocation based on requirements previously presented by the individual unit to NGB A3/10O for validation. Once validated, their requirements are then allocated and distributed to the unit for execution. Units are then responsible for training their crews and accomplishing their mission with their allocated hours.

16.2. Associating units have two methods for executing their allocations based on how they operate locally. One method is to integrate both organizations into a local flying schedule whereby crews are mixed as needed to accomplish their training and mission, and the other method is to train and operate as two separate organizations. Either way, units will document, track, and report as appropriate on how the hours were executed based on their approved, current

support agreements IAW AFI 25-201, Intra-Service, Intra-Agency, and Inter-Agency Support Agreements Procedures.

16.2.1. CAF Guidance:

16.2.1.1. For CAF associate units flying fighter aircraft for training, the time will be charged by using the appropriate mission symbol for the command that required the sortie to be generated, regardless of the command of the pilot that flew the jet.

16.2.1.2. For CAF associate units flying fighter aircraft for OO missions, the hours will be charged by using the mission symbol for the command that owns and possesses the aircraft.

16.2.1.3. If an associate unit is flying OO missions on aircraft possessed by their host unit, the associate unit should use the associate OO mission symbols regardless of the geographic operating location.

16.2.1.4. Cost of business or non-training sorties. All cost of business and non-training sorties such as FCFs, air shows, depot or ferry flights, etc, will be logged against the command/unit owning/possessing the aircraft, regardless of the individual crew member(s) flying the sortie.

16.2.1.5. Incentive, orientation, familiarization, and indoctrination flights should be charged to the organization/command benefiting from and generating the sortie.

16.2.2. MAF Guidance:

16.2.2.1. For MAF associate units flying training missions, the time will be charged by using the appropriate mission symbol for the command that required the sortie to be generated, regardless of the command of the pilot that flew the aircraft.

16.2.2.2. For MAF associate units flying OO missions on aircraft owned by units other than their primary host unit, they should use the OO mission symbol for the command/unit that owns and possesses the aircraft.

16.2.2.3. If an associate unit is flying OO missions on aircraft possessed by their host unit, the associate unit should use the OO associate symbols regardless of the geographic operating location.

16.2.2.4. Cost of business or non-training sorties. All cost of business and non-training sorties such as FCF's, air shows, depot or ferry flights, etc, will be logged

against the command/unit owning/possessing the aircraft, regardless of the individual crew member(s) flying the sortie.

16.2.2.5. Incentive, orientation, familiarization, and indoctrination flights should be charged to the organization/command benefiting from and generating the sortie.

16.2.2.6. For MAF heavy/multi crewed aircraft, a determination will need to be made in the planning phase of the mission as to which command has the primary requirement to generate the sortie. That command will be charged with the flying time and will assign the appropriate mission symbol for the command to be charged. If in doubt, use the command that the aircraft is assigned to.

16.2.3. Flying hours will be allocated directly to ANG units associating with Active Duty or AFRC units by NGB A3/10 Flying Hour Team. These hours will be programmed by NGB/A8 and funded using the ANG O&M appropriation.

16.2.4. Flying hours will be programmed and allocated to the Active Duty/AFRC associating unit by their respective MAJCOM A3.

JEREMY R. FORD, Colonel
Director, ANG Operations
