CAREER FIELD EDUCATION AND TRAINING PLAN (CFETP)
CONTRACTING
Series 1102

Table of Contents

PART I **4**

PREFACE **4**

ABBREVIATIONS AND TERMS EXPLAINED **7**

SECTION A – GENERAL INFORMATION **16**

1.0. Purpose. 16
2.0. Uses. 16
3.0. Coordination and Approval. 16
4.0. Responsibilities. 16

SECTION B – CAREER PROGRESSION AND INFORMATION **20**

1.0. Occupational Series Description. 20
1.1. Duties and Responsibilities. 20
2.0. Types of Contracting. 20
2.1. Operational Contracting. 21
2.2. Systems Contracting. 21
2.3. Enterprise Contracting. 21
2.4. Classified Contracting. 22
3.0. Skill and Career Field Progression Information. 22
3.1. Enterprise Leader Track. 23
3.2. Functional Expert/Leader Track. 23
3.3. Tactical/Basic Level (GS-07 to GS-12, or Equivalent). 26
3.4. Operational/Intermediate Level (GS-13 to GS-14, or Equivalent). 31
3.5. Strategic/Advanced Level (GS-14 to GS-15, or SES). 36

SECTION C – PROFICIENCY TRAINING REQUIREMENTS **42**

SECTION D – RESOURCE / TRAINING CONSTRAINTS **42**

1.0. Centrally Funded DAU Training Authorizations. 42
2.0. DoD Acquisition Workforce Development Account for Tuition Assistance (TA). 42

PART II **43**

SECTION A – COURSE TRAINING STANDARD (CTS) **43**

1.0. Purpose. 43

2.0. Qualitative Training. 43

3.0. Documentation of Training 44

4.0. Training Approaches. 44

SECTION B – TRAINING COURSE INDEX **45**

SECTION C – SUPPORT MATERIALS **45**

SECTION D – MAJCOM UNIQUE REQUIREMENTS **50**

Attachment 1: QUALITATIVE REQUIREMENTS **51**

PART I

PREFACE

1.0. Welcome to the 1102 Contracting career field! The collective group of contracting senior leaders and career field team are committed to each 1102, from initial entry into the career field to retirement or departure. Uniting the contracting career field's deliberate development of its 1102s with each 1102 successfully demonstrating the competencies and tasks outlined in this plan will ensure Department of the Air Force (DAF) Contracting continues its proud tradition of growing a technically proficient contracting workforce.

2.0. What does it mean to be an 1102?

2.1. Who We Are. The 1102 job series is an exciting, challenging, and rewarding career field. Technical development for an 1102 is unique compared to other DAF specialties. In order to guarantee the proficiency of civilian contracting personnel charged with ensuring the integrity of the acquisition process, 1102 personnel develop specific technical skills through a combination of training, certification, and years of on-the-job experience. 1102s gain experience through a myriad of developmental opportunities, including operational/installation, systems, logistics/sustainment, research and development, test and evaluation, enterprise sourcing, contingency operations, staff/policy/pricing/contract data specialist positions, career broadening, and civilian development.

2.2. Who We Support. 1102s work closely with the mission partners they support to determine how to best satisfy each unit's requirements, while complying with the governing laws, regulations, and policy. Relationship building between contracting organizations and mission partners is critical to developing a well-defined, thoughtful requirements package and acquisition strategy. As mission-focused business leaders, 1102s should look for opportunities to both teach and train mission partners early and often. Teaching in this context refers to the responsibility 1102s have to advise mission partners where and how their funds have been spent in the past, whereas training involves educating mission partners on how their support is vital to find a fiscally responsible solution to meet DAF requirements. Contracting involvement during the planning cycle is critical; engaging early in the acquisition process can help avoid rework and create significant savings in the long run.

2.3. How We Grow. The 1102 career field is dynamic; as such, 1102s must continue to stay abreast of regulatory changes, policy updates, and command directives, and one way to do that is through meeting mandatory continuous learning requirements. Devoting daily time to learning and staying alert to changes in the profession is crucial to developing critical thinking and professional skills.

2.4. DoD Contracting Competency Model. Above all, 1102s should become familiar with and embrace our career field's guiding principles in paragraph 2.5. These guiding principles are derived from the DoD Contracting Competency Model and encompass the Office of Personnel Management's (OPM) professional competencies and the Executive Core Qualifications (ECQs),

found on the OPM website. As contracting professionals, 1102s should incorporate these principles into their daily tasks—all in support of our nation and our profession.

2.5. DAF Contracting Guiding Principles.

- Skills and Roles
- Contract Principles
- Standards of Conduct
- Regulatory Compliance
- Situational Assessment
- Team Dynamics
- Communication and Documentation

3.0. Career Field Education and Training Plan (CFETP) Goals and Structure. The goals of the CFETP are to:

3.0.1. Outline the education and training available for 1102s to develop proficiency.

3.0.2. Communicate the career development opportunities available to 1102s.

3.0.3. Provide occupational tasks and competencies that enable 1102s and their supervisors to jointly build a personalized career path to success.

3.0.4. Identify major resource constraints that impact full implementation of the desired career field training processes.

3.1. Applicability. This CFETP was developed in accordance with the requirements in Department of the Air Force Manual (DAFMAN) 36-2689 Training Program and Department of the Air Force Policy Directive (DAFPD) 36-26. This CFETP applies to 1102s who support the United States Air Force and United States Space Force.

3.2. CFETP Structure. The CFETP consists of two (2) parts which supervisors may use to plan, manage, and control training within the occupational series.

3.2.1. Part I is subdivided into four sections and provides information necessary for overall management of the occupational series:

Section A explains how individuals at all levels may utilize the plan.
Section B identifies career progression information, duties and responsibilities, training strategies, and career field paths.
Section C is reserved for future use.
Section D identifies resource constraints such as funds, manpower, equipment, and facilities.

3.2.2. Part II is also subdivided into four sections and provides information on 1102 training:

Section A identifies Course Training Standards, training objectives, available in-residence or correspondence courses, and the Acquisition Professional Development Program (APDP) Contracting Professional Certification requirements.
Section B is reserved for future use.

Section C identifies available support materials which may be utilized to assist with 1102 training.
Section D is reserved for any future Major Command (MAJCOM)/ Field Command (FLDCOM) or other unique requirements.

4.0. Revisions and Feedback Guidance. The Department of the Air Force Career Field Manager (AFCFM) for contracting will conduct an annual review process of this CFETP to ensure its contents remain relevant for effective 1102 development. When future editions are released, this section will provide guidance on how to integrate the new CFETP with older versions and define which task lists supervisors should utilize for their personnel. Feedback on potential improvements to the CFETP should be routed to saf.aq.mla.df.saf-aqcx@us.af.mil.

ABBREVIATIONS AND TERMS EXPLAINED

ACO. Administrative Contracting Officer. The individual authorized, by contracting warrant, to administer contracts in accordance with Federal Acquisition Regulation part 42 duties and responsibilities.

AFDW. Air Force District of Washington. AFDW is a Direct Reporting Unit to the Chief of Staff of the Air Force and is responsible for generating strategic enterprise sourcing solutions and greater operational capacity for the Headquarters Air Force mission. AFDW headquarters is located at Joint Base Andrews, MD.

AFICC. Air Force Installation Contracting Center. AFICC is a Principal Subordinate Unit under Air Force Installation and Mission Support Center (AFIMSC) and is responsible for generating strategic enterprise sourcing solutions and greater operational capacity for the Air Force combat support mission. AFIMSC is one of the centers under Air Force Materiel Command. AFICC headquarters is located at Wright-Patterson Air Force Base, OH.

AFIMSC. Air Force Installation and Mission Support Center. One of the centers under Air Force Materiel Command, the AFIMSC is the single organizational entity in the Department of the Air Force providing intermediate-level installation and mission support capabilities to all Air Force and Space Force installations, major commands, and direct reporting units. AFIMSC headquarters is located at Joint Base San Antonio (JBSA) – Lackland, TX.

AFISRA. Air Force Intelligence, Surveillance and Reconnaissance Agency. AFISRA provides multisource Intelligence, Surveillance and Reconnaissance products, applications, capabilities, and resources, to include cyber and geospatial forces and expertise. AFISRA headquarters is located at Lackland Air Force Base, TX.

AFLCMC. Air Force Life Cycle Management Center. One of the centers under Air Force Materiel Command, the AFLCMC is the single center responsible for total life cycle management of Air Force weapon systems. AFLCMC headquarters is located at Wright-Patterson Air Force Base, OH.

AFMC. Air Force Materiel Command. AFMC conducts research, development, test, and evaluation, and provides acquisition management services and logistics support necessary to keep Air Force weapon systems ready for war. AFMC supports nine host bases and is responsible for the Air Force's medical and test pilot schools. AFMC headquarters is located at Wright-Patterson Air Force Base, OH,

AFNWC. Air Force Nuclear Weapons Center. One of the centers under Air Force Materiel Command, AFNWC ensures safe, secure, and effective nuclear capability for the warfighter. The center is responsible for the entire scope of nuclear weapons support functions for two-thirds of the nuclear triad. AFNWC headquarters is located at Kirtland Air Force Base, NM.

AFRCO. Air Force Rapid Capabilities Office. The AFRCO reports directly to the Under Secretary of the Air Force. AFRCO rapidly develops and fields critical warfighting capabilities

by leveraging innovative acquisition and technology approaches. The AFRCO works across the Department of the Air Force, the Department of Defense, and with industry partners to respond to evolving operational requirements. AFRCO headquarters is located in Washington D.C.

AFRL. Air Force Research Laboratory. One of the centers under Air Force Materiel Command, AFRL is the Air Force's only organization wholly dedicated to leading the discovery, development, and integration of warfighting technologies for air, space, and cyberspace forces. AFRL accomplishes its mission through eight technology directorates, the 711th Human Performance Wing, the Air Force Office of Scientific Research, and a central staff. AFRL headquarters is located at Wright-Patterson Air Force Base, OH.

AFSC. Air Force Sustainment Center. One of the centers under Air Force Materiel Command, the AFSC is the single center responsible for sustainment of Air Force weapon systems. AFSC headquarters is located at Tinker Air Force Base, OK.

AFTC. Air Force Test Center. One of the centers under Air Force Materiel Command, AFTC conducts developmental test and evaluation of air, space, and cyber systems, and provides timely, objective, and accurate information to decision makers. The AFTC supports military services, other United States (U.S.) Government agencies and international partners, in addition to operating the U.S. Air Force Test Pilot School. AFTC headquarters is located at Edwards Air Force Base, CA.

APDP. Acquisition Professional Development Program. The Air Force's implementation of the Defense Acquisition Workforce Improvement Act, which was established to ensure career development within designated acquisition, technology, and logistics career fields.

BtB. Back-to-Basics. The Department of Defense (DoD) BtB initiative improves how the DoD equips and empowers its acquisition workforce. BtB modernizes the Defense Acquisition Workforce Improvement Act certification framework by reducing the amount of required certification training and empowering the employee to select job-centric, specialized training at the point-of-need. Required training is streamlined and supplemented by role-specific training that allows civilians to meet acquisition workforce needs. See Defense Acquisition Workforce Improvement Act definition.

CCFT. Contracting Career Field Team. The group of career field specialists, personnelists, and/or support personnel at Air Force Personnel Center who are responsible for day-to-day operation of the Contracting Career Field Program. They conduct all Force Development processes for the career field, in compliance with Department of the Air Force personnel policies issued by AF/A1 (Air Force Manpower, Personnel and Services) and career field management policies issued by the contracting functional authority.

CD. Civilian Development. Formerly Civilian Developmental Education, the Department of the Air Force (DAF) CD program is central to the DAF's Civilian Leadership Development continuum that spans a civilian's professional career. The programs included in the CD portfolio prepare civilian employees from the DAF, its sister services, and allied nations for positions of greater responsibility. Emphasis in these programs includes leadership, military doctrine, and

aerospace power. CD is broken down into various categories based on the competencies gained through the program. These categories are Professional Military Education (PME) (which includes Primary Developmental Education (PDE), Intermediate Developmental Education (IDE), and Senior Developmental Education (SDE)), Academic, Fellowships, Experiential Assignment/Program, and Leadership Seminars/Short Courses. See Part II, Section C for *Civilian Development (CD) Offerings & Eligibility*.

Certification. A formal indication of a person's ability to perform a task up to the required proficiency level. Back-to-Basics is the framework for the foundational Contracting Professional Certification.

Certification Official. For the 1102 career field, the certification official for specific tasks is the supervisor, contracting officer and/or commander-approved trainer. See Part I, Section A, paragraph 4.0 for roles and responsibilities.

CFM. Career Field Manager. The Department of the Air Force (DAF) focal point for the designated career field within a functional community. Serves as the primary advocate for the career field, addressing issues and coordinating functional concerns across various staffs. Responsible for the career field policy and guidance. Must be appointed by the Functional Manager and hold the grade of Colonel/ General Schedule (GS)-15 (or equivalent) for officer and DAF civilian specialties, and the grade of Chief Master Sergeant for enlisted airmen. DAF Contracting's CFM for officers and civilians is the Chief of Force Development Division and for enlisted is the Chief of Enlisted Policy.

CL. Continuous Learning. Department of Defense (DoD) requires each acquisition workforce member to earn 80 CL points within a two-year period DoD Instruction (DoDI) 5000.66 *Defense Acquisition Workforce Education, Training, Experience, and Career Development Program*. As a rule of thumb, 1 point equates to one hour of course time or other event participation. To count towards CL requirements, the training or event must be directly acquisition related. Notably, 1102 civilian employees may request credit for up to 20 CL points per year for Career Field Education and Training Plan related on-the-job experiential activities. See Part II, Section C for the *USD(A&S) CL Credit Guide.*

COCO. Chief of the Contracting Office. The contracting official one level below the Senior Contracting Official (SCO) or their deputies, unless specifically prohibited, or as designated by the SCO.

COP. COPPER CAP Program. The COPPER CAP program is a civilian developmental program designed to develop well-qualified, high-potential, and highly motivated individuals to occupy full performance level positions in the contracting career field. The entry level for the program begins at either General Schedule (GS)-07 or GS-09. The target grade is GS-12 for all COPPER CAP interns. The minimum training period is typically three (3) years, though exceptions may exist (see Part II, Section C for a link to AFI 36-130 *Civilian Career and Developmental Programs*).

Core Task. A task identified as a minimum qualification requirement within a Department of the Air Force specialty. These tasks exemplify the essence of the career field—the foundation for mission performance. 1102s shall demonstrate proficiency on all core tasks indicated in Attachment 1.

Credentials. Defense Acquisition University credentials provide the knowledge and associated skills to perform job-centric, niche, and/or emerging functions in the Department of Defense (DoD) acquisition environment. They are intended to enhance specific skills, improve performance in your workplace and to support Continuous Learning your career. Whether you manage capability requirements, acquire services/systems, or sustain capabilities, earning credentials can build your competence, confidence, and value to your organization and the DoD.

Currency. Maintaining proficiency in the acquisition occupational series as demonstrated by meeting Department of Defense and Department of the Air Force Continuous Learning (CL) standards and performing acquisition duties. See the CL definition.

DACM. Director of Acquisition Career Management. The single point of contact in a component, designated to act on behalf of the Service Acquisition Executive, with authority to manage the integrated execution and oversight of acquisition workforce education, training, and career development. SAF/AQH is the Department of the Air Force DACM, on behalf of the Department of the Air Force Service Acquisition Executive for space and non-space programs.

DAFFARS. Department of the Air Force Federal Acquisition Regulation Supplement. Department of the Air Force-specific supplemental acquisition regulations to the Federal Acquisition Regulation.

DAU. Defense Acquisition University. Provides mandatory, assignment specific, and continuing education courses for acquisition personnel within the Department of Defense.

DAWIA. Defense Acquisition Workforce Improvement Act. Signed into law in November 1990, DAWIA requires the Secretary of Defense, acting through the Under Secretary of Defense (Acquisition & Sustainment), to establish education and training standards, requirements, and courses for the civilian and military acquisition workforce. It was further updated by the Fiscal Year 2020 National Defense Authorization Act. As of 01 February 2022, the contracting career field has a one level Contracting Professional Certification with multiple credentials to provide just-in-time, job-centric training. See the BtB definition.

DCMA. Defense Contract Management Agency. The Department of Defense (DoD) component that works directly with Defense suppliers to help ensure that DoD, federal, and allied Government supplies, and services are delivered on time, at projected cost, and meet all performance requirements. Before contract award, DCMA provides advice and information to help construct effective solicitations, identify potential risks, select the most capable contractors, and write contracts that meet the needs of our mission partners in DoD, Federal and allied Government agencies. After contract award, DCMA monitors contractors' performance and management systems to ensure that cost, product performance, and delivery schedules are in compliance with the terms and conditions of the contracts.

DE. Developmental Education. An array of educational opportunities comprised of professional and specialized education programs, research and doctrinal studies, fellowships, and graduate-level studies. DE spans a member's entire career and provides the knowledge and abilities needed to develop, employ, and command air, space, and cyberspace forces.

DEDB. Developmental Education Designation Board. An annual board convened for active duty officers and civilians competing for resident Intermediate Developmental Education and Senior Developmental Education. Chaired by the AF/A1 (Air Force Manpower, Personnel and Services), the DEDB determines school assignments for selected active duty officers below the grade of colonel or colonel-select as well as for selected General Schedule (GS)-15 and below civilians.

DFARS. Defense Federal Acquisition Regulation Supplement. Department of Defense-specific supplemental acquisition regulations to the Federal Acquisition Regulation.

DPCAP. Defense Pricing, Contracting, and Acquisition Policy. Previously known as Defense Pricing and Contracting, and prior to that, Defense Procurement and Acquisition Policy, DPCAP is responsible for pricing and contracting policy matters across the Department of Defense. It executes statute, executive order, and policy through the timely update of the Federal Acquisition Regulation and Defense FAR Supplement and issuance of memoranda and guidance.

DT. Development Team. The contracting career field DT is comprised of contracting senior leaders and is led by SAF/AQC. The DT meets annually and provides guidance on development plans, provides advice/feedback on policy issues affecting the workforce, provides vectors to workforce members, and endorses candidates for Civilian Development. The DT's mission is to prepare future Department of the Air Force (DAF) Contracting leaders to meet the challenges of shaping the DAF through appropriate training, education, and experience.

EWI. Education With Industry. A competitively selected non-degree program which sends civilians and officers on a 10-month Permanent Change of Station tour with a selected company to learn leading-edge technology and management processes. Through EWI, civilians and officers develop an understanding of a particular industry and are better able to interpret Department of the Air Force needs through its perspective.

FA. Functional Authority. FAs are designated general officers or members of the Senior Executive Service serving as deputy chiefs of staff or assistant secretaries appointed by the Secretary of the Air Force to provide oversight and functional advisory services related to functional communities. SAF/AQ is the FA for Department of the Air Force Acquisition.

FAR. Federal Acquisition Regulation. Provides uniform acquisition policies and procedures for use by all Government executive agencies. The FAR is available at the General Services Administration website, https://acquisition.gov/far/index.html.

FLDCOM. Field Command. The United States Space Force level of command below Headquarters U.S. Space Force and directly above Deltas. The three field commands are Space Operations Command, Space Systems Command, and Space Training and Readiness Command.

FM. Functional Manager. Senior leaders, designated by the appropriate Functional Authority, who provide day-to-day management responsibility over specific functional communities at the Major Command, field operating agency, direct reporting unit, or air reserve component level. While they should maintain an institutional focus regarding resource development and distribution, FMs are responsible for ensuring their specialties are equipped, developed, and sustained to meet the functional community's mission as well as encourage force development opportunities in order to meet future needs of the total Department of the Air Force (DAF) mission. The FM for DAF Contracting is SAF/AQC.

FMS. Foreign Military Sales. The portion of United States security assistance authorized by the Foreign Assistance Act of 1961 and the Army Export Control Act. The recipient provides reimbursement for defense articles and services transferred from the United States.

FY. Fiscal Year. For the United States Government, the 12-month period covering 1 October to 30 September.

IDE. Intermediate Development Education. IDE programs are operational level Professional Military Education (PME) programs that continue the development and education of mid-career civilians and officers to prepare them to take on increased leadership, managerial, and supervisory roles. Program eligibility requirements for civilians vary. See the CD and PME definitions and Part II, Section C for a link to *Civilian Development (CD) Offerings and Eligibility*.

IDP. Individual Development Plan. A document used to record short- and long-range career goals, the specific competencies, knowledge, skills, and abilities necessary to meet current objectives, and training, education, and other professional development strategies used to develop the desired competencies. The individual development plan assists in making civilian performance more effective in present and future positions and is used for civilians below the executive level. 1102s are required to use MyVector to develop their IDP unless an exception applies.

MAJCOM. Major Command. The level of command below Headquarters Air Force and directly above Numbered Air Forces. The Air Force is organized on a functional basis in the United States (U.S.) and a geographical basis overseas. The functional MAJCOMs are Air Combat Command, Air Education and Training Command, Air Force Global Strike Command, Air Force Materiel Command, Air Force Reserve Command, Air Force Special Operations Command, Air Mobility Command, and Air National Guard. The geographic MAJCOMs are U.S. Air Forces in Europe and Air Forces Africa and Pacific Air Forces.

MTL. Master Task Listing. Created from Attachment 1 of the Career Field Education and Training Plan, a MTL is an organization-specific listing of tasks on which 1102s in training should demonstrate proficiency.

OC. Occupational Competencies. A set of competencies required of all personnel within a specific workforce category (a group of functions requiring similar work, i.e., contracting). They describe technical/functional skills, knowledge, abilities, behaviors, and other characteristics needed to successfully perform that function's mission. A competency identifies behaviors and other attributes and the knowledge, skills and abilities that define successful job performance. Competencies are important because they are the stepping stones for civilian development and for the achievement of personnel success and the Department of the Air Force mission.

OCS. Operational Contract Support. The process of planning for and obtaining supplies, services, and construction from commercial sources in support of joint operations. OCS is a multi-faceted joint activity executed by the geographic combatant commanders and subordinate joint force commanders. OCS includes the ability to plan, orchestrate, and synchronize the provision of contract support integration, contracting support, and contractor management.

OPR. Office of Primary Responsibility. The primary office responsible for a given task.

OSD. Office of the Secretary of Defense. The principal staff element of the Secretary of Defense in the exercise of policy development, planning, resource management, fiscal, and program evaluation responsibilities. OSD includes the immediate offices of the Secretary and Deputy Secretary of Defense, Under Secretaries of Defense, Assistant Secretaries of Defense, General Counsel, Director of Operational Test and Evaluation, Assistants to the Secretary of Defense, Director of Administration and Management, and such other staff offices as the Secretary establishes to assist in carrying out assigned responsibilities.

PCIP. Premier College Intern Program. The Premier College Internship Program targets civilians who are full-time college students and are seeking a dynamic career with the Air Force Civilian Service. The intent of the internship program is two-fold: provide a meaningful internship experience and allow the unit to determine if the Premier College Intern (PCI) will be a good candidate for the COPPER CAP Program. PCIs will have the opportunity to access special projects using cutting edge technology, while under the mentorship of senior managers. Participants will experience a 3-day Symposium to introduce them to the Department of the Air Force, Air Force Civilian Service, networking, and training. This 10-12 week paid internship will occur during the summer after their sophomore or junior year (minimum 60 credit hours completed). Upon graduation and program requirement completion, a PCI may be non-competitively converted to further developmental positions.

PCO. Procuring Contracting Officer. The individual authorized to enter into, administer, and/or terminate contracts and make related determinations and findings. PCOs are the only individuals who may obligate the Government and execute the contract.

PDE. Primary Developmental Education. PDE programs are tactical level Professional Military Education (PME) programs that introduce civilian employees to the Department of the Air Force and Department of Defense missions and prepare them for future leadership, managerial, and supervisory roles. Program eligibility requirements vary. See the CD and PME definitions, and Part II, Section C for a link to *Civilian Development (CD) Offerings and Eligibility*.

PEO. Program Executive Officer. A military or civilian official who has responsibility for directing several Major Defense Acquisition Programs and for assigned major system and non-major system acquisition programs.

PM. Program Manager. An acquisition manager designated with responsibility for, and authority to, accomplish program objectives for development, production, and sustainment to meet the user's operational needs. The PM is accountable for credible cost, schedule, and performance reporting to the Milestone Decision Authority.

PME. Professional Military Education. Educational opportunities to increase knowledge and understanding of the military profession. There are three levels of PME: Primary Developmental Education (PDE), Intermediate Developmental Education (IDE), and Senior Developmental Education (SDE), each of which are targeted at different audiences depending on grade. In-residence versions of each course are typically held at Maxwell Air Force Base, but there are also distance learning options available. Civilians can apply for the courses via the annual Civilian Development (CD) call or can self-enroll (with supervisor support) via distance learning. There are other equivalent courses offered by our sister services and DoD that can count for IDE and SDE credit as well. See the PDE, IDE, SDE, and CD definitions.

PO. Program Office. The office of the Program Manager and the Government team responsible for program management. The central point of contact for a program involving industry, Government agencies, and other activities participating in the systems acquisition process. Often called a System Program Office, or SPO, in systems contracting.

Recent Graduates Program. The Recent Graduates Program affords developmental experiences in the Federal Government intended to promote possible careers in the civil service to individuals who have recently graduated from qualifying educational institutions or programs. To be eligible, applicants must apply within two years of degree or certificate completion (except for veterans precluded from doing so due to their military service obligation, who have up to six years after degree completion to apply). Successful applicants are placed in a dynamic, developmental program with the potential to lead to a civil service career in the Federal Government. The program lasts for one year (unless the training requirements of the position warrant a longer and more structured training program).

SAF/AQC. Deputy Assistant Secretary (Contracting), Assistant Secretary of the Air Force (Acquisition, Technology, and Logistics). The office responsible for overseeing all aspects of contracting for the Department of the Air Force. This encompasses oversight and direction for contracting operations, support to operational, enterprise, and systems acquisition programs, development of contracting guidance and procedures, support for contracting business systems, and workforce development and management of the contracting career field.

SAF/AQH. Acquisition Career Management. The office is responsible for the oversight and execution of statutory training, professional credentialing, continuous learning, and career development for acquisition personnel across 14 career fields and seven functional areas in the Air Force and Space Force.

SAIO. Space Acquisition and Integration Office. SAIO provides acquisition solutions to Space Operations Command, while also supporting two Combatant Commands and the United States Space Force's Space Training and Readiness Command while these agencies work to establish their own acquisition capability.

SDA. Space Development Agency. SDA is a direct reporting unit of the United States Space Force and operates out of two Space Operations Centers at Redstone Arsenal, AL and Grand Forks Air Force Base, ND. Its mission is to quickly deliver needed space-based capabilities to the joint warfighter to support terrestrial missions through development, fielding, and operation of the National Defense Space Architecture. SDA headquarters is located at the Pentagon, Washington, D.C. with additional work performed in Chantilly, VA.

SDE. Senior Developmental Education. SDE programs are strategic level Professional Military Education programs that provide for the deliberate development of senior civilian and officer leaders. These programs provide a more strategic perspective that will prepare senior civilians and officers to lead organizations and programs to achieve results in the Joint, inter-agency and multi-national environments. Program eligibility requirements vary for civilians. See the CD definition and Part II, Section C for a link to *Civilian Development (CD) Offerings and Eligibility*.

SME. Subject Matter Expert. A subject matter expert is an individual who exhibits the highest level of expertise in performing a specialized job, task, or skill within an organization.

SpRCO. Space Rapid Capabilities Office. The SpRCO reports to the Commander, United States (U.S.) Space Force. SpRCO rapidly develops and delivers innovative, space-based solutions to address critical warfighter needs and emerging threats. SpRCO works in close collaboration with the U.S. Space Force, other government agencies, and industry partners, to create streamlined acquisition processes and prioritizes speed and agility in delivering vital space capabilities. SpRCO headquarters is located at Kirtland Air Force Base, New Mexico.

SSC. Space Systems Command. The Space Systems Command is the United States (U.S.) Space Force's space development, acquisition, launch, and logistics field command. Headquartered at Los Angeles Air Force Base, California, SSC is responsible for developing, acquiring, and sustaining space systems while also managing access to and operations of the nation's space launch ranges, including but not limited to those at Cape Canaveral Space Force Station, Vandenberg Space Force Base, and other geographically diverse locations that support U.S. space launch activities.

USD (A&S). Under Secretary of Defense (Acquisition and Sustainment). The principal staff assistant and advisor to the Secretary of Defense and Deputy Secretary Defense for all matters concerning acquisition, technology, and logistics. The primary responsibilities of the USD (A&S) include supervising Department of Defense (DoD) acquisition, establishing policies for DoD acquisitions, establishing policies for DoD logistics, maintenance, and sustainment support, and establishing DoD policies for maintenance of the defense industrial base of the United States.

SECTION A – GENERAL INFORMATION

1.0. Purpose. This Career Field Education and Training Plan (CFETP) is a roadmap to success in the Contracting career field. It's designed to help commanders, directors, training managers, supervisors and, most importantly, 1102s—plan and navigate their contracting career. It lays out the training and development that 1102s need to become proficient and effective contracting professionals. It also provides information for 1102s to support their discussions with supervisors and trainers. This CFETP has several purposes:

1.1. Identify requirements for certification and recommend training for each phase of an 1102's career.

1.2. Provide references to training courses, training materials, and other useful career resources.

1.3. Convey career development opportunities which 1102s and supervisors may use to help shape an 1102's career.

2.0. Uses. This plan is a guide that may be used by unit commanders and directors, unit training managers, supervisors, trainers, and 1102s. Paragraph 4 below explains the responsibilities of individuals involved in the development of 1102s.

3.0. Coordination and Approval. The Deputy Assistant Secretary (Contracting) at SAF/AQC is the approval authority for changes to the CFETP.

4.0. Roles and Responsibilities. The following training responsibilities are assigned to each Department of the Air Force organizational level in accordance with the CFETP and Department of the Air Force Manual 36-2689 Training Program.

4.1. SAF/AQ. SAF/AQC will monitor the progress of contracting training course development (entry, transition, and supplemental) and eliminate roadblocks preventing timely course development. SAF/AQH works in support of SAF/AQC and is responsible for the establishment of training policy to support the entire contracting career field.

4.2. Career Field Manager (CFM). The CFM will conduct an annual review of the CFETP and approve any changes to the CFETP. Recommended changes to the CFETP should be forwarded to the CFM in accordance with Part I, Preface, paragraph 4.0.

4.3. Implementation. Several stakeholders play important roles in implementing this CFETP.

4.3.1. Commanders/Directors or Chiefs of the Contracting Office (COCOs). Squadron commanders, directors, or COCOs should:

4.3.1.1. Recommend 1102s accomplish formal and unit follow-on training, as specified in this CFETP, commensurate with the 1102's experience and contracting knowledge.

4.3.1.2. Create an organization specific Master Task Listing (MTL) from Attachment 1 of the CFETP and add any contracting tasks/competencies not already included that would help prepare an 1102 for success in their organization. COCOs may further delegate the creation of an 1102 MTL to the Deputy Director, Director of Business Operations (DBO), or PKX Resource Manager (RM) or Plans, Programs, Policy (PKP) Chief.

4.3.1.3. Collaborate with their DBO or deputy director, supervisors, Unit Training Manager (UTM), PKX RM, PKP Chiefs, trainers, and other SMEs to create their MTL. Assess MTLs annually.

4.3.1.4. Establish a local training program that provides 1102s training commensurate with experience levels and workload types.

4.3.1.5. Establish language to include in the employee's and supervisor's Performance/Contribution Plan to set the expectation for tracking and assessing training and development progress.

4.3.1.6. Ensure AFICC OL/MAJCOM staff is informed of formal training shortfalls to ensure timely correction and redirection of formal training emphasis.

4.3.2. PKX RM/ PKP Chiefs/ UTM. PKX RMs/ PKP Chiefs/ UTMs implement and manage training programs, policies, and procedures as directed by higher headquarters, commanders, directors, and base training offices. PKX RMs/ PKP Chiefs/ UTMs should:

4.3.2.1. Have a working knowledge of the CFETP.

4.3.2.2. Educate personnel and their supervisors on how to use the CFETP.

4.3.2.3. Ensure personnel attend required training to achieve the requirements of the position to which they are assigned.

4.3.2.4. Assist commanders/directors with the development of an organization specific MTL and ensure supervisors work with each employee to develop an Individual Development Plan (IDP) in MyVector unless an exception applies.

4.3.2.5. Be cognizant of each 1102's progress in accordance with their IDP.

4.3.3. Supervisors. Supervisors should:

4.3.3.1. Have a working knowledge of the CFETP.

4.3.3.2. Educate subordinates on how to use the CFETP.

4.3.3.3. Review the CFETP and IDP with each subordinate within 30 days of assignment and bi-annually (at a minimum) to coincide with the normal feedback cycle to ensure that career-long training and education remains a focus. The review should identify specific tasks from

the organization specific MTL related to the 1102's current position and should establish a plan to obtain the applicable training.

4.3.3.4. Ensure each employee has developed an IDP in MyVector unless an exception applies (e.g. supervision of foreign national without access to the MyVector system). Incorporate applicable MTL tasks into the 1102's IDPs and monitor the 1102's progress towards achieving their IDP goals. Once specific tasks are assigned, ensure the training goals are captured within the short-term goals section of the IDP. See Part II, Section C for a link to the I*ndividual Development Plan (IDP).*

4.3.3.5. Pass on experience, expertise, and mentorship by direct involvement with those in need of or seeking development.

4.3.3.6. Ensure subordinates attend required training to achieve the requirements of the position to which the subordinate is assigned.

4.3.3.7. Assist commanders/directors with the development of an organization specific MTL and ensure each subordinate has an IDP.

4.3.3.8. Document an 1102's demonstration of proficiency in organization-specific tasks on the IDP.

4.3.3.9. Maintain a Supervisor's Employee Work Folder (also known as the "971 folder") for each 1102 and include a section for training records. Supervisors can obtain the member's Civilian Career Brief from both Acquisition Career Management System (ACMS), and ACQNow, and should review both versions to ensure accuracy and consistency. See Part II, Section C for a link to the *Civilian Career Brief Acquisition Career Management System (ACMS)* and *Civilian Certification Records (ACQNow).*

4.3.3.10. Transfer the Employee Work Folder to the gaining supervisor when an employee moves to a different organization on the same base. In all other cases, including transfers to another installation or agency, destroy the Employee Work Folder after 60 days. See Part II, Section C for a link to Department of the Air Force Instructions 36-129 *Civilian Personnel Management and Administration,* section 8.4.

4.3.4. Trainers. Trainers will plan, conduct, and document training. They are selected based upon their experience and ability to provide instruction to 1102s. A supervisor may also serve as a trainer. Trainers should utilize the AF Contracting Central "Learning Center," "Knowledge Center," "Pricing Center of Excellence," and webinars for training materials, templates, and other resources highlighted in Part II, Section C of the CFETP.

4.3.5. 1102s in Training. 1102s are responsible for their career development. This CFETP serves as a training guide for navigating the contracting career field. Successful management of professional growth for 1102s requires completion of the mandatory Contracting Professional Certification and Continuous Learning training, familiarization with this guide, and active participation in other training and developmental opportunities. Reviewing the

CFETP will help 1102s understand the contracting career field and the opportunities available for learning and advancement.

SECTION B – CAREER PROGRESSION AND INFORMATION

1.0. Occupational Series Description. The 1102 contracting career field includes positions that perform, supervise, manage, or develop policies for the procurement of supplies, services, construction, or research and development (R&D) using negotiation procedures, the evaluation of contract price proposals, and the administration, termination, and close out of contracts. The work requires knowledge of the statutes and regulations, business and industry practices, milestone management, risk management, and key attributes of well-defined requirements.

1.1. Duties and Responsibilities. While most duties and responsibilities are position-specific, 1102s efforts generally include:

1.1.1. Soliciting, evaluating, negotiating, and awarding contracts with commercial organizations, educational institutions, nonprofit organizations, and state, local or foreign Governments

1.1.2. Administering contracts by ensuring compliance with terms and conditions, including resolution of problems concerning the obligations of the parties

1.1.3. Responding to protests, equitable adjustments, and claims

1.1.4. Terminating contracts by analyzing, negotiating, and settling claims and proposals

1.1.5. Analyzing and evaluating cost or price proposals and accounting system data

1.1.6. Planning, establishing, or reviewing contracts, programs, policies, or procedures

1.1.7. Formulating and administering policies and procedures to promote achievement of Federal socioeconomic goals, such as those affecting small business, labor surplus areas, and disadvantaged business firms

1.1.8. Developing acquisition strategies and directing or managing procurements

1.1.9. Providing staff advisory services in one or more of the specializations in the 1102 series

1.1.10. Contracting for emergency/contingency support

1.1.11. Closing out contracts in a timely manner

2.0. Types of Contracting (i.e., Contracting Mission Areas). There are several broad contracting mission areas that 1102s support: Operational, Systems, and Enterprise, along with the subcategories within them and other niche areas. Each mission area plays a key role in the success of the overall Department of the Air Force (DAF) mission, and experience in multiple mission areas helps expand the breadth of an 1102's Knowledge, Skills, and Abilities (KSAs).

2.1. Operational Contracting. Operational contracting provides timely, effective, and efficient cradle-to-grave contract support to meet the needs of installation commanders, deployed commanders, and resident, tenant, and supported units. Operational contracting units may be designated as a squadron (CONS), flight (CONF), division (PZI), or another organizational entity designed to meet local needs. Subordinate elements of an operational contracting unit may be contracting flights, contracting branches, or other organizational components determined locally. An operational contracting assignment should provide an 1102 with opportunities to experience the full spectrum of contracting from pre-solicitation to closeout as well as the three main contracting areas of commodities, services, and construction.

2.2. Systems Contracting. Systems contracting includes the acquisition, development, and maintenance of existing and future weapon systems, space, and missile systems. Throughout a systems assignment, an 1102 should seek to learn the complexities of the job, such as the role of contracting in the overall acquisition environment, acquisition strategy, appropriate contract types, political influences, contract pricing, contract negotiations, source selections, multi-functional team participation, and much more.

2.2.1. Systems Acquisition. Systems acquisitions span six "enterprises": aircraft; armament; command and control; business and enterprise systems (carried out by Air Force Life Cycle Management Center (AFLCMC) directorates located at Wright-Patterson, Eglin, Maxwell Air Force Base (AFB) Gunter Annex, Hanscom AFBs, and Air Force Rapid Capabilities Office (AFRCO) in Washington D.C); nuclear (carried out by Air Force Nuclear Weapons Center (AFNWC) directorates primarily located at Kirtland, Hill, and Hanscom AFBs); and space acquisitions (carried out by Space Systems Command (SSC) at Los Angeles AFB, the AFRCO in Washington D.C., and Space Rapid Capabilities Office (SpRCO) at Kirkland AFB). The bulk of contract activity at these centers includes major source selections, complex engineering change proposals, and major modifications and upgrades to existing systems. Other unique opportunities within systems acquisition include Foreign Military Sales (FMS) and joint systems procurements. Systems acquisition is primarily an Air Force Material Command (AFMC) responsibility, except for SSC which is aligned to Space Force.

2.2.2. Systems Sustainment. Sustainment is the maintenance of existing weapon systems, space, and missile systems. Sustainment provides worldwide support of fielded United States (U.S.) Air Force (USAF), FMS, and joint systems, to include spare parts, repair, and maintenance and modification of systems, equipment, and software. This work is accomplished primarily by the Air Force Sustainment Center's three Air Force logistics complexes at Hill, Robins, and Tinker AFBs. Contracting professionals in this environment typically work in Integrated Product Teams (IPT) organized around commodity groups (e.g., landing gear) or product directorates (e.g., C-17 aircraft). The primary focus of this activity is readiness and supportability. Contracting systems are intricately integrated with a host of logistics and supply systems. Sustainment contracting is primarily an AFMC responsibility.

2.3. Enterprise Contracting. Enterprise contracting supports the greater DAF enterprise, meaning its acquisitions have application to multiple organizations and mission areas. It includes Enterprise Sourcing, R&D and Test and Evaluation (T&E) Contracting.

2.3.1. Enterprise Sourcing. Several DAF units provide enterprise sourcing services geared towards supporting the Department of the Air Force in a centralized manner. These organizations provide a great opportunity to gain experience in larger acquisition processes in a shorter amount of time. Enterprise sourcing units are focused on strategic support of specific systems or commodities for the DAF, such as architect and engineering services, construction, and information technology systems or services. The mission focus of each activity is unique to the mission partners of these organizations. Examples of enterprise sourcing units include, but are not limited to: 338 ESS at Joint Base San Antonio (JBSA)-Randolph, TX; 763 Enterprise Sourcing Squadron (ESS) at Scott AFB, IL; 764 ESS at Ramstein AB, Germany; 765 Enterprise Sourcing Flight (ESF) at Hurlburt Field, FL; 766 ESS at Joint Base Pearl Harbor- Hickam, HI; 767 ESF at Barksdale, LA; 771 ESS at Wright-Patterson AFB, OH; 772 ESS at JBSA-Lackland, TX; 773 ESS at JBSA-Lackland, TX; 774 ESS at Offutt AFB, NE; AMIC at Joint Base Langley-Eustis, VA; Air Force District of Washington (AFDW) Contracting (AFDW/PK) at Joint Base Andrews, MD; and Space Acquisition Integration Office (SAIO) at Peterson Space Force Base (SFB), CO. Enterprise contracting experience may also be gained through working on individual enterprise sourcing contracts or within specialized flights.

2.3.2. Research and Development (R&D) Contracting. Provides advanced study and development effort to identify and enhance technologies having military application. The labs work in concert with program offices, universities, and other agencies to identify and advance high potential opportunities. The focus of the labs is exploration and advancement of the state of the art in promising technologies. Lab contracting is uniquely a responsibility of Air Force Research Lab (AFRL), a subcomponent of AFMC.

2.3.3. Test and Evaluation Contracting. Provides full range of support to Air Force ranges and installations. The test centers work with laboratories, product centers, sustainment centers, and operational commands to support developmental and operational test of new and modified systems and emergent technologies. The focus of these centers is to evaluate performance capabilities and operational suitability of systems and equipment. Test and Evaluation contracting focuses on supporting the test mission partner and ensuring that test facilities and equipment meets the needs of the mission partner. Test activities often support joint, FMS, and commercial mission partners. Test installations fall under the Air Force Test Center (AFTC) at Edwards AFB and include Arnold Engineering Development Center and the Air Force Flight Test Center, both of which are AFMC activities.

2.4. Classified Contracting. Spanning across the mission areas, classified 1102 positions provide support to highly classified programs and activities. Specialized security clearances are required to work in this environment, limiting the speed and flexibility of assigning 1102s to these organizations. Due to the nature of the acquisitions and the national security implications, both contracting processes and acquisition flexibilities may be different than typical contracting offices.

3.0. Skill and Career Field Progression Information. Career progression can vary substantially among 1102s due to a variety of factors including performance quality, personal goals, types of contracting experience, geographic mobility, and continuing education.

Progression is further influenced by proactively taking ownership of one's career and aligning personal aspirations with organizational needs. In general, there are two (2) career tracks (published as the "DAF Contracting Civilian Career Roadmaps") within the 1102 career field: 1) The Enterprise Leader track; and 2) The Functional Expert/Leader track.

3.1. Enterprise Leader Track. The Enterprise Leader Track enables 1102s who aspire to pursue DAF Contracting Senior Leadership positions to plan their career. This track emphasizes depth and breadth of experience both within and beyond one's primary functional area, and typically requires geographic mobility, supervisory experience, and completion of professional military education. See Figure 1 below.

3.2. Functional Expert/Leader Track. The Functional Expert/Leader Track enables 1102s who aspire to lead as technical Subject Matter Experts (SMEs) to plan their career. This track prioritizes depth of technical knowledge, development of functional expertise, and focuses on increasing institutional memory. See Figure 2 below.

Figure 1: Contracting Civilian Career Roadmap for Enterprise Leaders

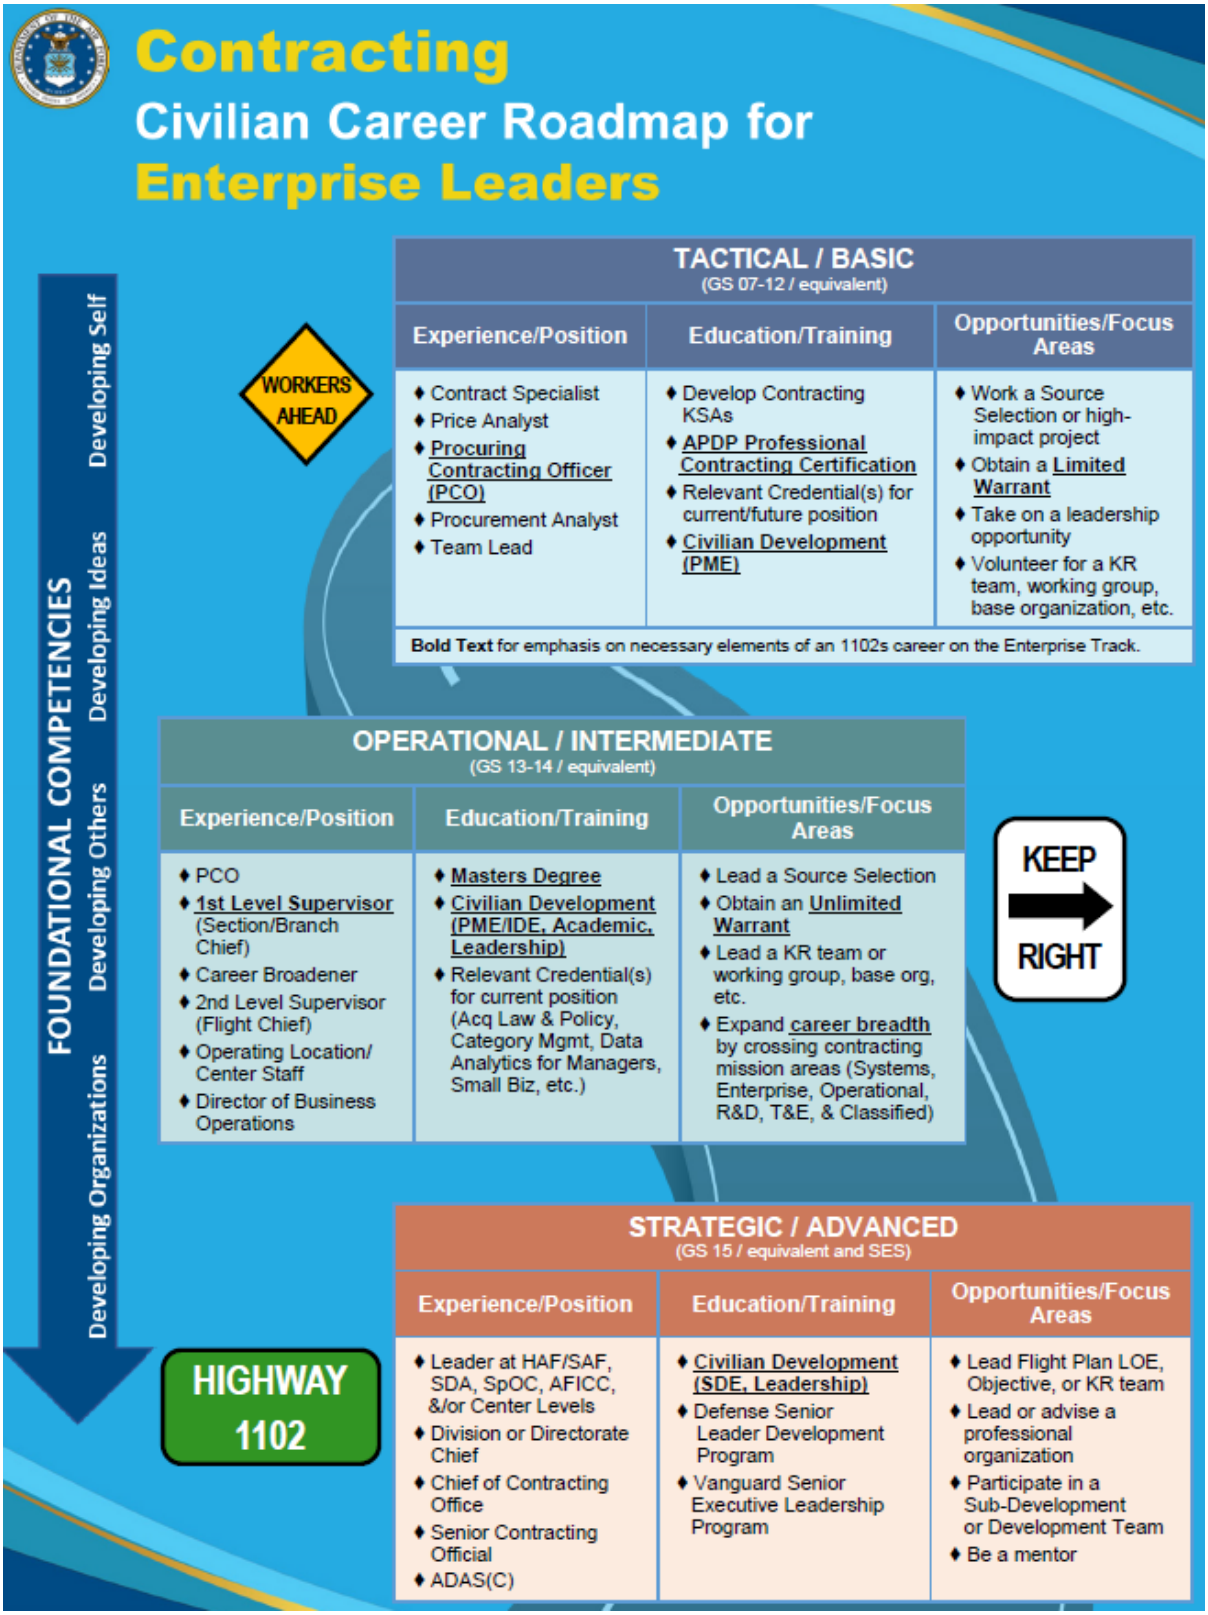

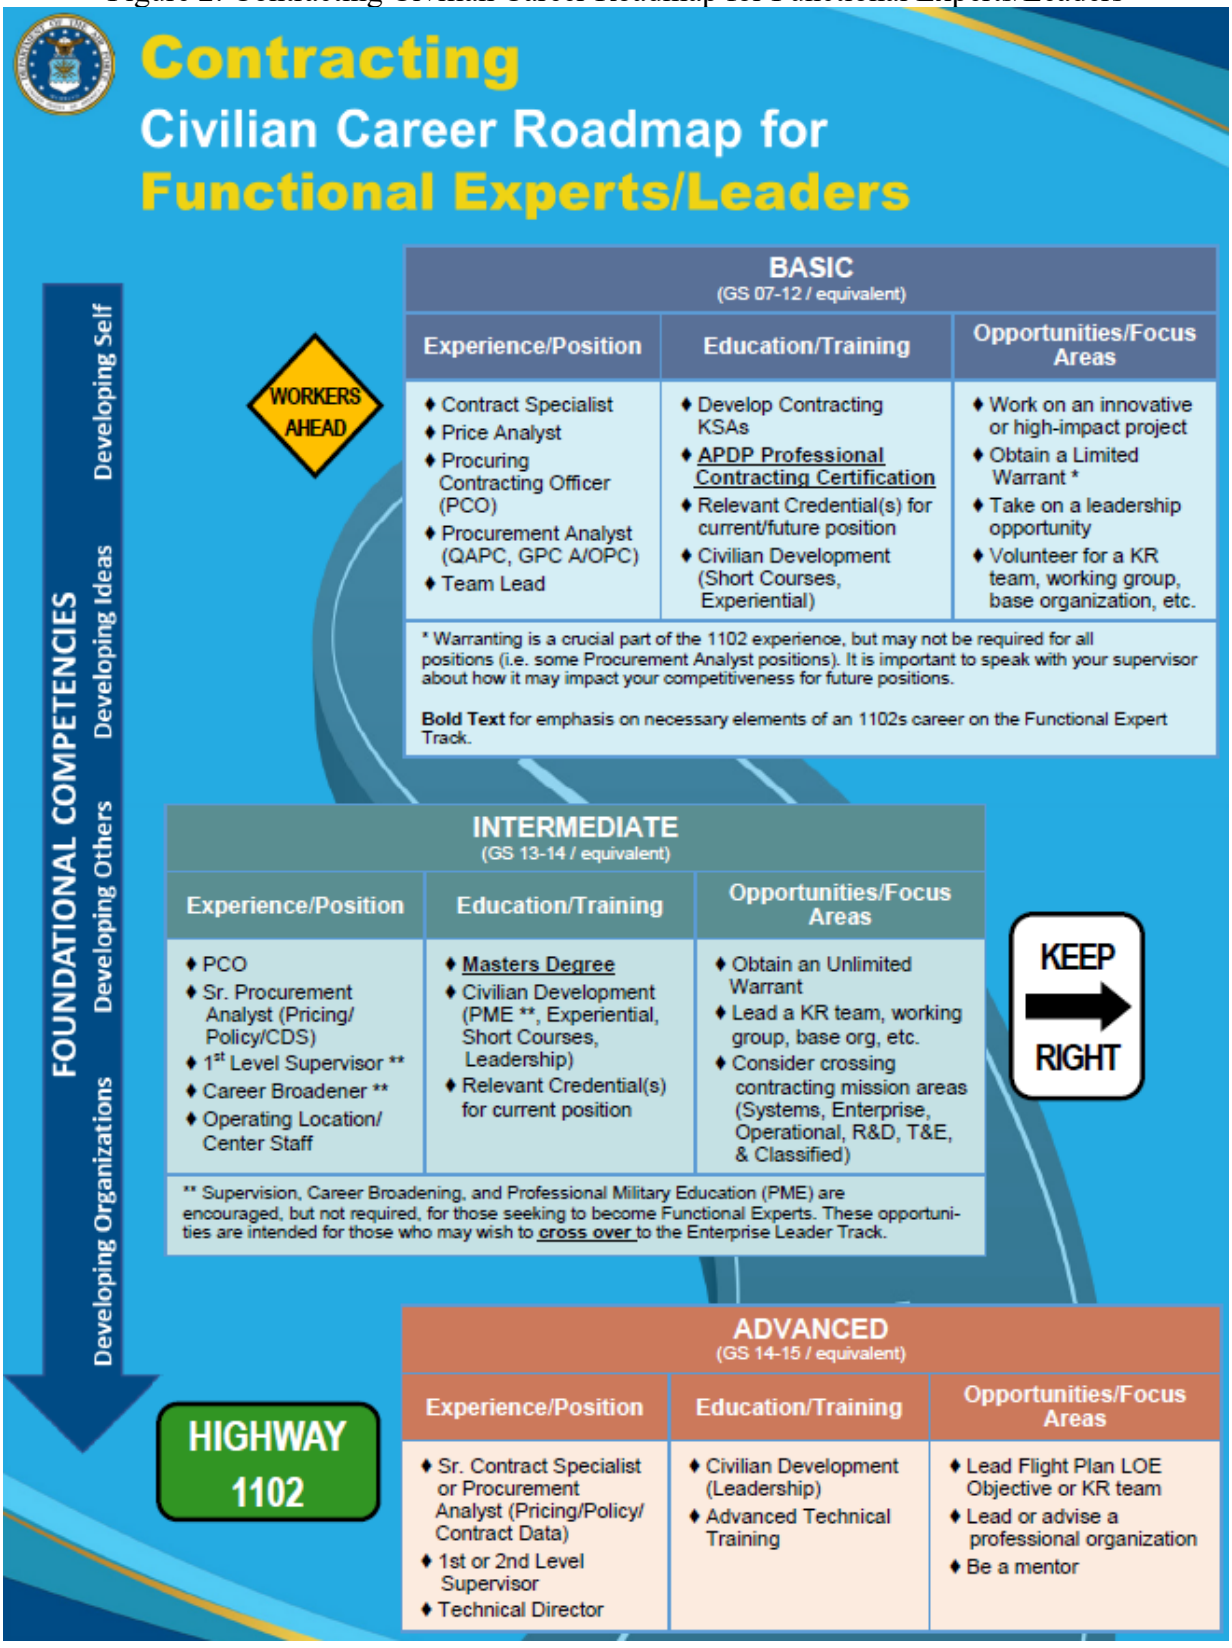

Figure 2: Contracting Civilian Career Roadmap for Functional Experts/Leaders

3.2.1. In the sections that follow, both career tracks will be discussed in terms of the competencies, experience/positions, education/training, and opportunities/focus areas available at the Tactical/Basic, Operational/Intermediate, and Strategic/Advanced levels.

3.3. Tactical/Basic Level (General Schedule (GS)-07 to GS-12, or Equivalent). Initial contracting assignments should establish and build depth of knowledge and technical expertise within the career field. As shown in Figures 3 and 4 below, the Enterprise Leader and Functional Expert/Leader tracks are very similar as 1102s develop initial technical skills and competencies needed for either track, although specific areas of emphasis may differ.

Figure 3: Tactical/Basic Roadmap for Enterprise Leaders

TACTICAL / BASIC (GS 07-12 / equivalent)		
Experience/Position	**Education/Training**	**Opportunities/Focus Areas**
♦ Contract Specialist ♦ Price Analyst ♦ **Procuring Contracting Officer (PCO)** ♦ Procurement Analyst ♦ Team Lead	♦ Develop Contracting KSAs ♦ **APDP Professional Contracting Certification** ♦ Relevant Credential(s) for current/future position ♦ **Civilian Development (PME)**	♦ Work a Source Selection or high-impact project ♦ Obtain a **Limited Warrant** ♦ Take on a leadership opportunity ♦ Volunteer for a KR team, working group, base organization, etc.
Bold Text for emphasis on necessary elements of an 1102s career on the Enterprise Track.		

Figure 4: Basic Roadmap for Functional Experts/Leaders

BASIC (GS 07-12 / equivalent)		
Experience/Position	**Education/Training**	**Opportunities/Focus Areas**
♦ Contract Specialist ♦ Price Analyst ♦ Procuring Contracting Officer (PCO) ♦ Procurement Analyst (QAPC, GPC A/OPC) ♦ Team Lead	♦ Develop Contracting KSAs ♦ **APDP Professional Contracting Certification** ♦ Relevant Credential(s) for current/future position ♦ Civilian Development (Short Courses, Experiential)	♦ Work on an innovative or high-impact project ♦ Obtain a Limited Warrant * ♦ Take on a leadership opportunity ♦ Volunteer for a KR team, working group, base organization, etc.
* Warranting is a crucial part of the 1102 experience, but may not be required for all positions (i.e. some Procurement Analyst positions). It is important to speak with your supervisor about how it may impact your competitiveness for future positions. **Bold Text** for emphasis on necessary elements of an 1102s career on the Functional Expert Track.		

3.3.1. Experience and Positions. The tactical level is subdivided into entry and journeyman levels.

3.3.1.1. Entry Level. COPPER CAPs and all other individuals on targeted developmental positions are considered entry level contracting personnel and are required to be on

training/development plans. Commanders, directors, and/or supervisors should enable entry level 1102s to gain experience and should work to involve new 1102s in the entire mission of the organization. 1102s at this level should develop their knowledge, skills, and abilities through appropriate on-the-job experience and robust self-study. This foundational knowledge will provide the bedrock for the remainder of an 1102's contracting career.

3.3.1.2. Journeyman. After gaining basic competencies, skill, and confidence during their initial time in contracting, an 1102 will continue to gain experience to broaden and deepen their understanding of the contracting career field. 1102s at this level will gain a general understanding of team and institutional leadership and develop firsthand experience in contracting by independently working on various procurement tasks.

3.3.1.3. Position Types and Focus. For both the Enterprise Leader and Functional Expert/Leader tracks, positions include: contract specialist, price analyst, procuring contracting officer, procurement analyst, and team lead. Functional experts may take on additional procurement analyst roles such as quality assurance program coordinator, government purchase card agency/organization program coordinator, or contract data specialist. For those on the Enterprise Leader track, additional emphasis is placed on the procuring contracting officer position. In order to obtain the necessary depth and breadth of experience, 1102s will execute their role in one or more types of contracting listed in paragraph 2 of this Section.

3.3.2. Education and Training. Education and training are fundamental needs and ongoing requirements within the contracting career field. The below areas should help new 1102s focus on the right skills and knowledge for this point in their career.

3.3.2.1. Contracting Knowledge, Skills, and Abilities. Entry level and journeyman 1102s will develop KSAs through several avenues, including technical task training and self-study/practice of the guiding principles and professional competencies outlined in the Department of Defense (DoD) Competency Model.

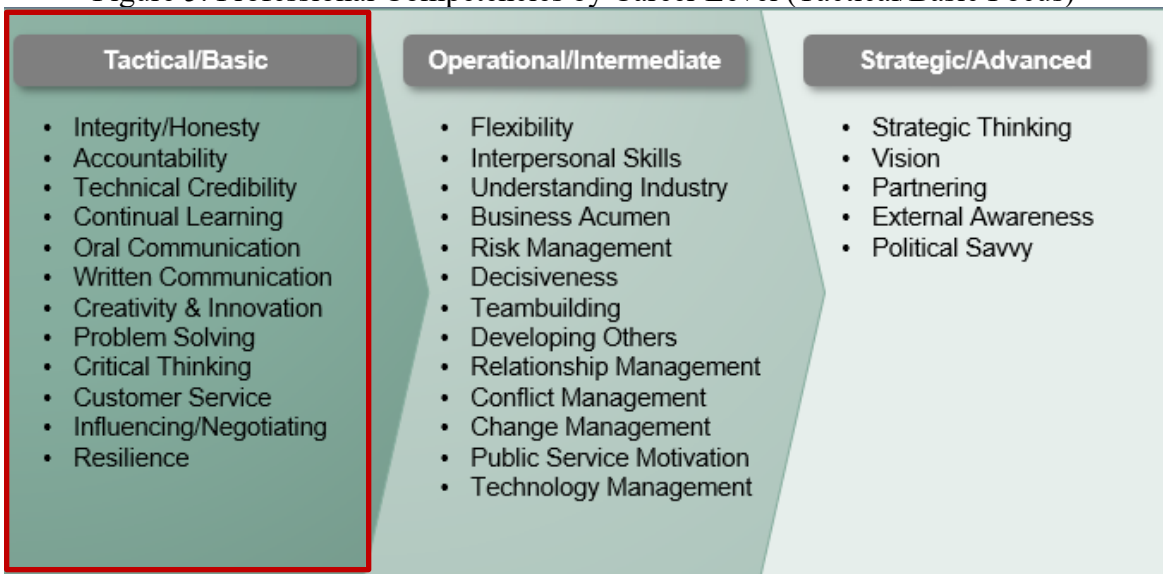

3.3.2.1.1. Technical Task Training. Technical task training is largely performed on-the-job using locally developed formal training plans. See Part II, Section A for more information about the qualitative training task list that can be used as a template and tailored by location and/or contracting mission area. The DoD Competency model is structured around technical tasks based on phase of the acquisition, and most formal training plans are structured similarly.

3.3.2.1.2. Mission-Focus. Entry level and journeyman 1102s should familiarize themselves with the overall DAF mission and the mission they support. Developing relationships with mission partners and understanding the "Why Behind the Buy" is critically important.

3.3.2.1.3. Guiding Principles and Professional Competencies. The DoD Competency Model contains both guiding principles and professional competencies that apply regardless of acquisition phase. Entry level and journeyman 1102s should read and understand the guiding principles and begin developing professional competencies. Proficiency in the professional

competencies will develop over time; 1102s at the entry level and journeyman level are not expected to have mastery in all competencies at this point in their career. At the Tactical/Basic level, primary focus should be on the competencies shown on the left side of Figure 5.

Figure 5: Professional Competencies by Career Level (Tactical/Basic Focus)

3.3.2.2. Acquisition Professional Development Program (APDP) Contracting Professional Certification. All personnel working in contracting-coded positions must earn their Contracting Professional Certification within 3 years of being assigned to the position per DoD Instructions (DoDI) 5000.66, *Defense Acquisition Workforce Education, Training, Experience, and Career Development Program.* Therefore, all entry level and journeyman employees must give proper attention to achieving certification within the three-year period. 1102s meet their certification and training requirements by completing Defense Acquisition University (DAU) certification courses (or by completing approved equivalent courses) and a certification exam.

3.3.2.2.1. DAU Courses. DAU provides a full range of certification, credential, and non-credential courses to support the position requirements, career goals and professional development of the acquisition workforce. 1102s may obtain the Contracting Professional Certification by taking all courses within the required curriculum (e.g. CON 1100V, CON 1200V, CON 1300V, and CON 1400V), and passing the Contracting Professional Certification exam (i.e. CON 3990V). Trainees may sign up for DAU certification courses at the ACQNow website (CON 1100V, 1200V, and 1300V) or DAU Virtual Campus (CON 1400V). See Part II, Section C for a link for *Registration for DAU Certification Courses*.

3.3.2.2.2. Mission Ready Contracting Officer (MRC-103) Course. An alternative way to fulfill the requirements for CON 1100V, CON 1200V, CON 1300V and CON 1400V is via MRC-103. The course is available to new officers and new civilians entering the contracting career field (64PX or 1102). Course curriculum includes the DAF business environment, applicable laws, and regulations, and "hands on" lab exercises using applicable contract

writing systems. Trainees may sign up for MRC-103 at the Air Force Institute of Technology (AFIT) website (see Part II, Section C for a link to the *Registration for the Air Force Institute of Technology (AFIT) Mission Ready Contracting Officer (MRC-103) Course).* Note that 1102s must still pass the Contracting Professional Certification exam (i.e. CON 3990V) following MRC-103 to obtain the certification.

3.3.2.2.3. Continuous Learning (CL). In accordance with DoDI 5000.66, all members of the acquisition workforce are required to earn 80 Continuous Learning Points (CLPs) every 2 years. In accordance with the *USD(A&S) Continuous Learning (CL) Credit Guide* a minimum of 20 CLPs must be from formal training or academic education. In addition to the initial certification courses listed above, DAU offers a wide range of continuous learning modules online to meet specific training needs of the acquisition professional. There are many ways to earn CLPs, as outlined in the *USD (A&S) Continuous Learning (CL) Credit Guide*, dated 14 November 2024. DAF Contracting personnel are required to record CLPs using the online ACQNow system. See Part II, Section C for links to the *USD(A&S) Continuous Learning (CL) Credit Guide* and to Register for DAU CL and Credential Courses.

3.3.2.2.3.1. DAU Credential Program. Once contracting professionals have obtained their Contracting Professional Certification, the credentials program provides in-depth, specialized training on the techniques relevant to each member's current job, and provides tools and strategies needed to execute the various roles and responsibilities performed by the DAF Contracting Workforce. The *SAF/AQC Contracting Credential Policy Memorandum*, dated 26 November 2024 details recommended credentials by contracting mission area and by functional area. Supervisors should encourage 1102s to fulfill CL requirements with credentials that are most applicable to their current duties. See Part II, Section C for a link to the *SAF/AQC Contracting Credential Policy Memorandum.*

3.3.2.3. Civilian Development (CD). Civilian Development is an annual portfolio of development opportunities designed to help employees build knowledge, skills, and abilities for higher-level positions. A call goes out in January, employees nominate themselves, receive endorsements from their supervisory chain and then compete at higher levels for the opportunities they selected. Previous job performance, accomplishments, and leadership potential are typically factored into each nomination and selection. Entry level 1102s will not be able to apply for most Civilian Development (CD) opportunities until they have at least two years of federal service (required for nearly all opportunities).

3.3.2.3.1. Types of CD. CD opportunities are categorized as Academic, Fellowships, Experiential Assignment/Program, Leadership Seminars/Short Courses, and in-residence Professional Military Education (PME). The type of civilian development an 1102 should complete is dependent on the career track the member pursues. Those pursuing the Enterprise Leader track should consider short leadership development courses and in-residence PME. Those pursuing the Functional Expert/Leader track should consider short leadership development and experiential courses. Short courses currently include the Defense Civilian Emerging Leader Programs (DCELP) and the Developing Supervisor Course. See Part II, Section C for a link to the *Civilian Development (CD) Offerings and Eligibility*.

3.3.2.3.2. Professional Military Education. PME includes Primary Developmental Education (PDE), Intermediate Developmental Education (IDE), and Senior Developmental Education (SDE). Courses are offered both in-residence (during the CD application cycle) and through distance learning (available through Air University outside of CD application cycle). Squadron Officer School (SOS) is the appropriate PME program at the tactical/basic level. While SOS is generally the appropriate PME for this level, high-performing GS-12s demonstrating strong leadership potential may want to consider IDE opportunities, such as Air Command and Staff College (ACSC). The decision to pursue an IDE at this level should be made in consultation with supervisors and leadership, considering the individual's career trajectory and performance. 1102s may apply for it in-residence during the CD application cycle, or via distance learning through Air University outside of the CD application cycle.

3.3.3. Opportunities And Focus Areas. Exploring contracting opportunities at the tactical/basic level can provide 1102s with a unique chance to hone their skills and advance their career. By seeking out and taking advantage of these opportunities, 1102s can gain practical experience, build a strong reputation within their field, and position themselves for future growth and advancement. These opportunities will vary depending on the organization's mission needs and individual short- and long-term goals.

3.3.3.1. Contracting Officer (CO) Warrants. Mastering the Federal Acquisition Regulation (FAR) and its supplements Defense Federal Acquisition Regulation Supplement (DFARS) and Department of the Air Force Federal Acquisition Regulation Supplement (DAFFARS) is essential for all 1102s, especially those pursuing a limited warrant – a significant step for career progression and is particularly crucial for Enterprise Leaders. To be eligible, 1102s must have a minimum of two years of contracting experience (for warrants over the simplified acquisition threshold), a Contracting Professional Certification, and meet any organization specific requirements. The warrant process demands self-motivation, requiring diligent self-study, practical application, and on-the-job experience to cultivate sound decision-making skills. Depending on the warrant level sought, the process may involve assessments, interviews, or boards. Once an 1102 feels confident in their ability to make ethical and compliant contracting decisions, they should proactively discuss warrant opportunities with their supervisor. See Part II, Section C for a link to DAFFARS Mandatory Procedures (MP) 5301.603-90 *Selection, Appointment, and Termination of Appointment of Contracting Officers*.

3.3.3.2. Special Projects and Initiatives. Engaging in special projects and initiatives is a vital step for 1102s to broaden their skillset, expand their professional network, increase their visibility within the organization, and make meaningful impacts to both the contracting enterprise and their own career development. Those on either the Enterprise Leader or Functional Expert/Leader tracks are encouraged to participate in DAF Contracting initiatives, such as joining a SAF/AQC or Major Command (MAJCOM)/ Field Command (FLDCOM)/ Direct Reporting Unit (DRU) initiative. They can also look for leadership opportunities in working groups, on-base organizations, or other high-impact projects. Both Enterprise Leaders and Functional Leader/Experts benefit from a diverse range of experiences; therefore, Enterprise Leaders should actively pursue source selection opportunities, while

Functional Leader/Experts should target innovative efforts, recognizing that exposure to both areas enhances professional development for all.

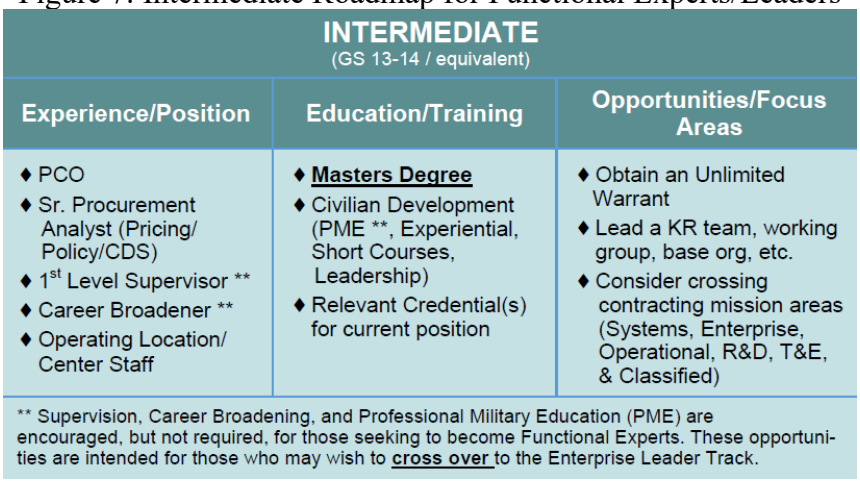

3.3.3.3. Mentoring. 1102s at all levels should make it a priority to seek advice from more experienced DAF leaders who have rich insights from their many years of experience and are often excited to coach and mentor other professionals. 1102s can request a mentor through MyVector. When seeking this opportunity, 1102s should have questions prepared, have a vision/plan for the next 5-10 years (CD, career broadening, separation, retirement, etc.), and have a biography and resume ready. Prior to meeting a mentor or coach, 1102s should contemplate how they may be viewed by the mentor (i.e., consider the perspective of others when evaluating personal performance) and anticipate the types of questions the mentor may ask, such as career aspirations, work values, unique knowledge, skills, or abilities, and preferred types of work and learning.

3.4. Operational/Intermediate Level (GS-13 to GS-14, or Equivalent). The operational/intermediate level is characterized by an increase in responsibility and authority through senior positions and leadership opportunities. 1102s at this level in their career will generally transition from being technical specialists to subject matter experts, leaders and/or supervisors that shape efficient and effective business decisions and work cohesively with multi-functional teams to create synergistic results. 1102s at this level should devote time to training, coaching and mentoring less experienced members of the contracting profession, particularly those in the tactical level of development, while increasing their depth and breadth of experience. Figures 6 and 7 show the differences in emphasis between the Enterprise Leader and Functional Expert/Leader tracks.

Figure 6: Operational/Intermediate Roadmap for Enterprise Leaders

OPERATIONAL / INTERMEDIATE (GS 13-14 / equivalent)		
Experience/Position	**Education/Training**	**Opportunities/Focus Areas**
♦ PCO ♦ **1st Level Supervisor** (Section/Branch Chief) ♦ Career Broadener ♦ 2nd Level Supervisor (Flight Chief) ♦ Operating Location/ Center Staff ♦ Director of Business Operations	♦ **Masters Degree** ♦ **Civilian Development (PME/IDE, Academic, Leadership)** ♦ Relevant Credential(s) for current position (Acq Law & Policy, Category Mgmt, Data Analytics for Managers, Small Biz, etc.)	♦ Lead a Source Selection ♦ Obtain an **Unlimited Warrant** ♦ Lead a KR team or working group, base org, etc. ♦ Expand **career breadth** by crossing contracting mission areas (Systems, Enterprise, Operational, R&D, T&E, & Classified)

Figure 7: Intermediate Roadmap for Functional Experts/Leaders

INTERMEDIATE (GS 13-14 / equivalent)		
Experience/Position	**Education/Training**	**Opportunities/Focus Areas**
♦ PCO ♦ Sr. Procurement Analyst (Pricing/ Policy/CDS) ♦ 1st Level Supervisor ** ♦ Career Broadener ** ♦ Operating Location/ Center Staff	♦ **Masters Degree** ♦ Civilian Development (PME **, Experiential, Short Courses, Leadership) ♦ Relevant Credential(s) for current position	♦ Obtain an Unlimited Warrant ♦ Lead a KR team, working group, base org, etc. ♦ Consider crossing contracting mission areas (Systems, Enterprise, Operational, R&D, T&E, & Classified)
** Supervision, Career Broadening, and Professional Military Education (PME) are encouraged, but not required, for those seeking to become Functional Experts. These opportunities are intended for those who may wish to **cross over** to the Enterprise Leader Track.		

3.4.1. Experience and Positions. At the operational/intermediate level of an 1102's career, 1102s should expand upon their depth and breadth of experience. 1102s should continue to execute one or more type of contracting described in 2.0 of this Section. Often, this diversity of experience can be gained at a single installation to the extent that the 1102 actively pursues varied experiences, assignments in different flights/sections or offices, and contractual arrangements or mission areas that they have not yet mastered. The operational/intermediate level is further outlined below.

3.4.1.1. Enterprise Leaders. At the operational/intermediate level, 1102s should increase their technical knowledge as contracting officers with Unlimited Warrants and gain experience by crossing contracting mission areas. They should also hone their supervisory and leadership skills in 1st and 2nd level supervisory roles (section/flight/branch chiefs and directors of business operations); they may also work on operating location/center staff. This track also encourages 1102s to pursue career broadeners and key career positions. Several of these unique opportunities are described below.

3.4.1.1.1. Director of Business Operations (DBO). Not all organizations have DBO positions, but when utilized, a DBO acts as the squadron's/organization's senior civilian in contracting. The DBO is the unit's subject matter expert in contracting and civilian matters. The DBO acts on behalf of the commander/director in non-military matters with responsibility for the efficient management and technical direction of the squadron or organization. The DBO may also serve as the unit's competition advocate, clearance authority, and/or small business specialist.

3.4.1.1.2. Career Broadening. The contracting career broadening program is an integral part of the DAF's leadership development framework. It is designed to build functional and institutional competencies while enhancing leadership perspective and diversity of thought. Career broadening assignments, although of relatively short duration (36 months), are sufficiently complex and demanding to increase and broaden experience. Career broadening opportunities exist at SAF/AQC, on the Contracting Career Field Team, and in other select organizations in the field. See Part II, Section C for a link to the *Career Broadening Program.*

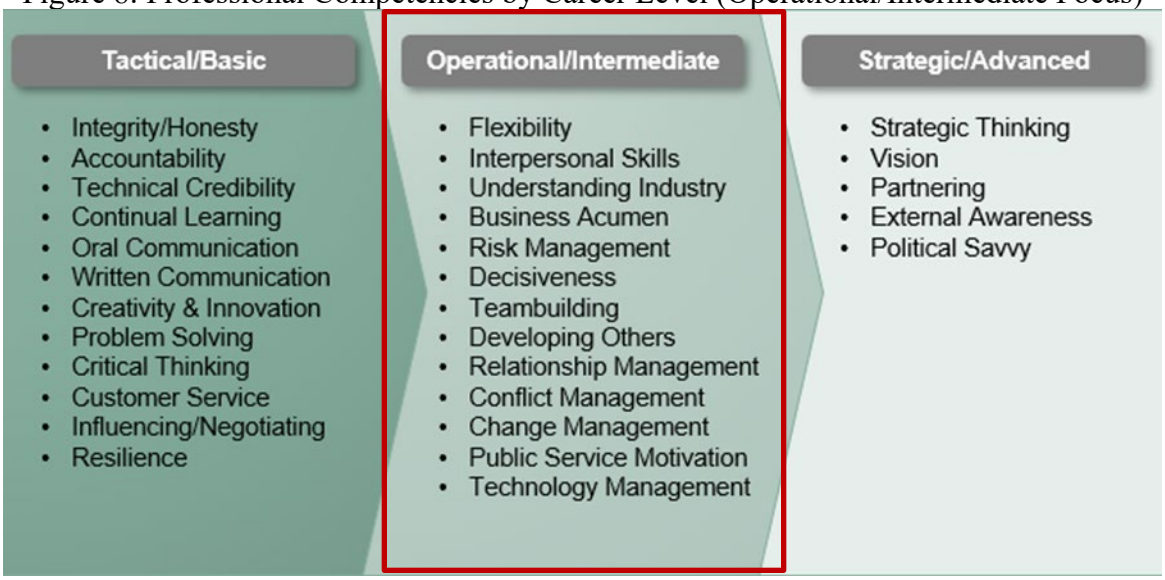

3.4.1.1.3. Key Career Positions (KCPs). KCPs are broadly defined as specific, career field-identified, GS-13 to GS-15 (or equivalent) positions, which are a subset of career field centrally managed positions that are used to develop critical AF leadership competencies. Contracting KCPs have been identified as positions that are developmental in nature and provide critical experience that prepares an individual for advancement to a position of greater leadership responsibility. The primary focus is to provide current mid-/senior level AF employees with specific knowledge, skills, and abilities identified as crucial in developing employees for higher levels of functional and/or organizational responsibility. See Part II, Section C for a link to *Key Career Position Program*.

3.4.1.2. Functional Experts/Leaders. Within the Functional Expert/Leader track, 1102s should increase their technical knowledge as Procuring Contracting Officials (PCOs) and may also gain experience as senior procurement analysts, specializing as cost/price analysts, policy reviewers, or contract data specialists. Each of these roles prioritize development of in-depth expertise in a specific functional area. Supervision and career broadening are encouraged, but not required, for those seeking to become Functional Expert/Leaders. In general, those opportunities are intended for those who may wish to cross over to the Enterprise Leader track in the future. It is important for 1102s to note that while this reflects standard Air Force contracting guidance, organizations with a highly competitive candidate pool may establish additional criteria to further differentiate among candidates.

3.4.2. Education and Training. Continuing formal and informal education and training at the operational/intermediate level of career progression is crucial for staying up to date with regulatory changes, as well as for developing new skills. Leadership training can be particularly valuable at this stage, as it can help individuals take on more responsibility and advance their careers. The below areas should help operational/intermediate level 1102s focus on the right things at this point in their career.

3.4.2.1. Contracting Knowledge, Skills, and Abilities. In general, 1102s at the operational/intermediate level work at high levels of proficiency and are considered subject matter experts in technical contracting topics. As shown in Figure 8 below, 1102s will now shift focus to the DoD Competency Model professional competencies shown in the middle of the figure. Functional Experts/Leaders may not require as high proficiency in competencies related to leading others, but it will be dependent on the position. All 1102s in either track will have developed high proficiency in the tactical/basic competencies and continue to demonstrate them.

Figure 8: Professional Competencies by Career Level (Operational/Intermediate Focus)

3.4.2.2. Formal Education. Once at the operational/intermediate level, a master's degree is essential for 1102 professional development on both the Enterprise Leader track and the Functional Expert/Leader track. A master's degree hones the ability to think critically and strategically and provides advanced knowledge and skills. It also opens new career opportunities and prepares individuals for more complex tasks and responsibilities.

3.4.2.3. APDP Training. 1102s at the operational/intermediate level will already have achieved Contracting Professional Certification, so focus turns to continuous learning and credentials. 1102s may also earn CLPs by taking non-credential contracting and leadership courses to fulfill their continuous learning requirements.

3.4.2.3.1. Continuous Learning. 1102s must continue to accumulate a minimum of 80 CLPs every 2 years to maintain their professional development. In accordance with the *USD(A&S) Continuous Learning (CL) Credit Guide* a minimum of 20 CLPs must be from formal training or academic education. CL opportunities should be aligned to training that is relevant to one's job responsibilities. See Part II, Section C for links to the *USD(A&S) CL Credit Guide*, as well as the link to the Registration for *DAU Continuous Learning (CL) & Credential Courses.*

3.4.2.3.2. DAU Credential Program. Credentials offer specialized knowledge and skills that are applicable to specific roles within the acquisition environment. The *SAF/AQC Contracting Credential Policy Memorandum*, dated 26 November 2024 details recommended credentials by contracting mission area and by functional area. Supervisors should encourage 1102s to fulfill CL requirements with credentials that are most applicable to their current duties. See Part II, Section C for a link to the *SAF/AQC Contracting Credential Policy Memorandum*.

3.4.2.4. Civilian Development. At the operational/intermediate level, new CD opportunities open up to 1102s.

3.4.2.4.1. Types of CD. Those on the Enterprise Leader track are recommended to complete academic programs (such as earning a degree or completing the Strategic Thinker's Program), and leadership development short courses. In-residence PME is also categorized as a CD opportunity. Many of the leadership short courses are directed to the GS-14/15 and equivalent level, with fewer available for GS-13 and equivalent (such as Supervisor as a Leader Course). Those on the Functional Expert/Leader track are recommended to focus on experiential opportunities (such as Education with Industry or the Executive Leadership Development Program) and leadership development short courses. To streamline the CD application process and avoid potential delays, all 1102s, regardless of career track, should create and regularly update their MyVector profile and resume. See Part II, Section C for a link to the complete list of *Civilian Development (CD) Offerings and Eligibility*.

3.4.2.4.2. Professional Military Education. Individuals on the Enterprise Leader track (or on the Functional Expert/Leader track who intend to cross over to the Enterprise Leader track in the future) should complete grade appropriate PME. IDE is the appropriate PME for 1102s at this level; it currently includes Air Command & Staff College (ACSC), as well as sister service and DoD equivalent schools. While IDE is generally appropriate for 1102s at this level, exceptionally high-performing GS-13s demonstrating strong leadership potential may consider Senior Developmental Education (SDE) opportunities when eligible as an alternative (i.e. Air War College (AWC)). The decision to pursue SDE at the GS-13 level should be made in consultation with supervisors and leadership, considering the individual's career trajectory and performance. 1102s may apply for in-residence IDE or SDE during the CD application cycle, or via distance learning through Air University outside of the CD application cycle.

3.4.3. Opportunities and Focus Areas. Career development opportunities are important for individuals at all stages of their career progression, as they provide opportunities for growth, learning, and advancement. At the tactical level, career development opportunities were focused on gaining hands-on experience and building foundational skills, but at the operational/intermediate level, they shift towards more advanced skills and leadership development.

3.4.3.1. CO Warrants. 1102s in the Enterprise Leader track are expected to pursue unlimited warrants, and those on the Functional Expert/Leader track are encouraged to do so. Some Functional Experts/Leaders (such as cost/price analysts and contract data specialists), while not required to have warrants, would still benefit greatly from prior experience with an unlimited warrant. To obtain an unlimited warrant, 1102s complete a warrant board, typically composed of senior contracting and acquisition officials. The warranting process is intentionally rigorous, as every CO has a professional responsibility to make wise and ethical decisions that are backed by business acumen and critical thinking, all in support of the warfighter. The process ensures that only qualified individuals are granted the authority to obligate the Government. See Part II, Section C for a link to DAFFARS MP 5301.603-90 for *Selection, Appointment, and Termination of Appointment of Contracting Officers.*

3.4.3.2. Special Projects and Initiatives. At the operational/intermediate level, the focus of special projects and initiatives shifts to leadership. 1102s are highly encouraged to use the insight gained at the tactical level to assist them in leading source selections teams or other high-impact projects. DAF Contracting initiatives, such as joining or leading a SAF/AQC or MAJCOM/FLDCOM/DRU initiative, can provide 1102s with the opportunity to use their unique experience and insights to make a significant impact at the enterprise level.

3.4.3.3. Mentoring and Training. 1102s should continue seeking advice from more experienced DAF leaders through mentoring. At this point in their career, 1102s will also be poised to offer mentoring to newer 1102 mentees. Beyond formal/informal mentoring, 1102s should build their training skills to learn how to adapt to the diverse learning needs of the junior workforce. Targeted training and development efforts can help tactical level employees refine their abilities, address skill gaps, and take on more complex responsibilities. By investing in the growth of the junior workforce, leaders can unlock their full potential, increase productivity, and enhance overall performance. See Part II, Section C for a link to *Vectoring & Mentorship* resources.

3.4.3.4. Professional Associations. Participating in professional associations can also provide specific learning opportunities. Affiliation with a professional association, especially one that focuses on contracting or acquisition, may support and further an 1102's professional growth. These associations can provide networking opportunities for 1102s to engage with industry and enable discussion of regulatory changes, best practices, and smart business decisions. Professional associations related to the contracting career series may include but are not limited to National Contract Management Association (NCMA), National Property Management Association (NPMA), and Institute for Supply Management (ISM). See Part II, Section C for professional association resources.

3.5. Strategic/Advanced Level (GS-14 to GS-15, or Equivalent for Functional Expert/Leader track and GS-15 or Equivalent to Senior Executive Service (SES) for Enterprise Leader track). The strategic level of contracting careers is marked by a significant increase in responsibility and authority, as 1102s transition from subject matter experts and leaders to executives who shape long-term strategies and business decisions. At this level, 1102s are expected to provide resources, training and tools needed to implement strategic plans. As senior leaders, 1102s should also devote time coaching and mentoring less experienced members of the contracting profession, particularly those in the operational/intermediate levels of development.

Figure 9: Strategic/Advanced Roadmap for Enterprise Leaders

STRATEGIC / ADVANCED (GS 15 / equivalent and SES)		
Experience/Position	**Education/Training**	**Opportunities/Focus Areas**
♦ Leader at HAF/SAF, SDA, SpOC, AFICC, &/or Center Levels ♦ Division or Directorate Chief ♦ Chief of Contracting Office ♦ Senior Contracting Official ♦ ADAS(C)	♦ **Civilian Development (SDE, Leadership)** ♦ Defense Senior Leader Development Program ♦ Vanguard Senior Executive Leadership Program	♦ Lead Flight Plan LOE, Objective, or KR team ♦ Lead or advise a professional organization ♦ Participate in a Sub-Development or Development Team ♦ Be a mentor

Figure 10: Advanced Roadmap for Functional Experts/Leaders

ADVANCED (GS 14-15 / equivalent)		
Experience/Position	**Education/Training**	**Opportunities/Focus Areas**
♦ Sr. Contract Specialist or Procurement Analyst (Pricing/Policy/ Contract Data) ♦ 1st or 2nd Level Supervisor ♦ Technical Director	♦ Civilian Development (Leadership) ♦ Advanced Technical Training	♦ Lead Flight Plan LOE Objective or KR team ♦ Lead or advise a professional organization ♦ Be a mentor

3.5.1. Experience and Positions. The strategic level features positions that carry broad and significant responsibility and authority. At the senior leadership level, 1102s will focus on leading and directing exceptionally complex and multi-tiered contracting and acquisition operations.

3.5.1.1. Geographic Mobility. For those 1102s willing and able to be geographically mobile there may be even more opportunities to achieve breadth and depth in career experiences. Effective civilian force development depends upon filling high-level positions with highly qualified 1102s who have a variety of work experiences. When applying for an 1102 position, this depth and breadth of experience may be the factor that makes an 1102 the best qualified for selection. This often becomes increasingly true as 1102s reach the strategic/advanced level.

3.5.1.2. Enterprise Leaders. At this level, individuals may hold positions such as Division or Directorate Chief (including in Staff roles), Chief of Contracting Office, Senior Contracting Official (SCO), or Associate Deputy Assistant Secretary (Contracting (DAS(C)). These positions range from GS-15 (or equivalent) to SES and can be anywhere from Program Offices up to Headquarters Air Force/Secretary of the Air Force (HAF/SAF). Enterprise leaders are responsible for developing and implementing strategic contracting plans, policies, and procedures that align with the organization's mission and goals. They are also responsible for providing expert guidance and support to other members of the contracting

career field, and to foster a culture of continuous improvement and innovation within the organization. Below are several unique opportunities at the strategic/advanced level.

3.5.1.2.1. Headquarters (HQ) Staff. An assignment on above-the-wing/delta and center-level staff typically provides a more strategic view of DAF Contracting, rich experiences to develop and enhance critical thinking skills, and a variety of unique challenges. Staff 1102s will be asked to develop courses of action and recommendations for DAF Contracting's senior leaders. Staff opportunities may be available with Combatant Commands, HQ Air Force (SAF/AQC), HQ AFMC, HQ Air Force Installation Contracting Center (AFICC), and HQ SSC.

3.5.1.2.2. Senior Contracting Official. A SCO is responsible for overseeing the contracting process for a MAJCOM, FLDCOM, or Direct Reporting Unit. SCOs are tasked with developing and implementing contracting strategies, policies, and procedures, and ensure compliance with relevant laws, regulations, and best practices. SCOs may be selected from a pool of Senior Executive Service members, officers (Lieutenant Colonel/Colonels), or civilians (GS-15s or equivalent).

3.5.1.2.3. Senior Executive Service Members. An SES member plays a critical role in overseeing the contracting process for the Department of the Air Force. These leaders possess well-honed executive skills and share a broad perspective on Government and a public service commitment. Within the contracting career field, SES members are responsible for developing and implementing contracting strategies, policies, and procedures that align with the Department's strategic goals and comply with relevant laws and regulations. As 1102s, SESs are assigned as the Associate DAS(C), or a SCO for one of the command or center-level DAF Contracting organizations (e.g., AFMC, SSC, AFLCMC, Air Force Sustainment Center (AFSC), or AFRCO).

3.5.1.3. Functional Experts/Leaders. At this level, individuals may hold positions such as senior contract specialist, senior procurement analyst (including specialization as cost/price analyst, policy, or contract data specialist), 1st or 2nd level supervisor over other functional experts, or technical director. These positions are typically GS-14 (or equivalent) but may go as high as GS-15 (or equivalent) depending on the position. Functional Experts/Leaders can assume roles at the squadron, division, MAJCOM, or HAF/SAF levels. These positions are responsible for providing technical subject matter expertise and guidance to their organizations, while fostering a culture of continuous improvement and innovation. Below are several unique opportunities on the Functional Expert/Leader track.

3.5.1.3.1. Technical Director. The role of a technical director can vary depending on the specific type of contract or program, but generally involves providing technical expertise, guidance, and recommendations to the contracting team, program managers, and engineering staff to ensure that technical requirements are accurately defined. The technical director must have a strong understanding of the FAR, DFARS, and DAFFARS, as well as industry best practices, and must be able to communicate effectively with both technical and non-technical stakeholders. Within contracting, technical directors are generally assigned to center or MAJCOM-level organizations (e.g. AFMC, AFLCMC, AFICC, AFNWC, AFRL,

AFSC, AFTC, or AFRCO). Technical director positions may also be available in other organizations.

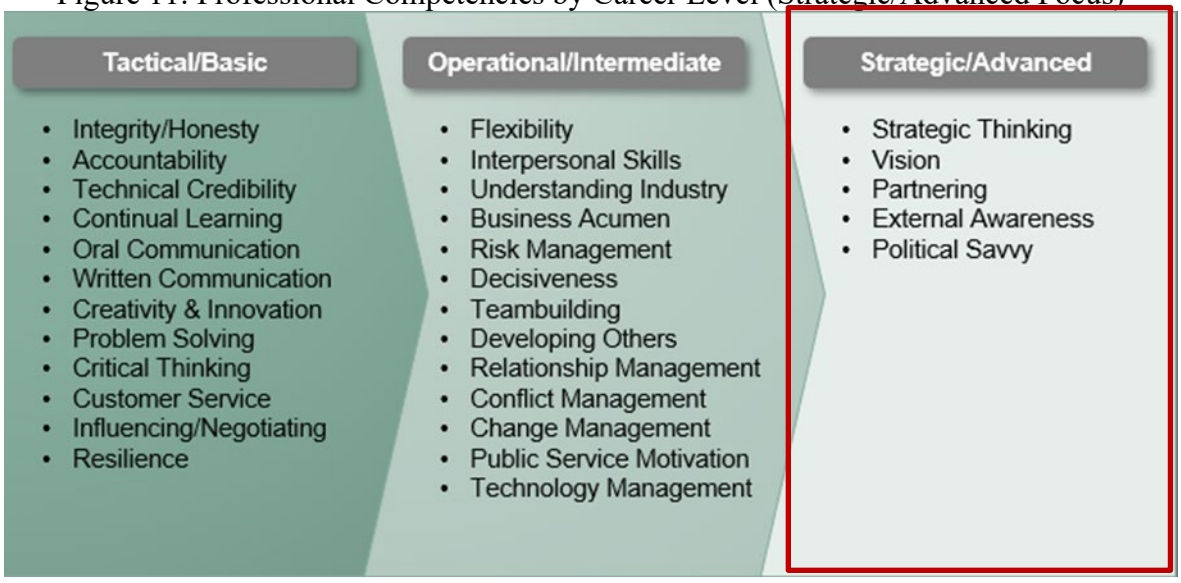

3.5.1.3.2. Senior Procurement Analysts. Senior procurement analysts are subject matter experts in a variety of specialty areas, such as cost/price, policy, or contract data. They develop and implement policies related to these areas and are responsible for ensuring that procurement activities are aligned with the mission and objectives of the DAF. These positions are available in squadrons/divisions, command or center-level DAF Contracting organizations, and up to HAF/SAF levels.

3.5.1.3.3. Senior Contract Specialists. Some organizations within AFMC, AFRCO, SpRCO, and SSC have non-supervisory senior contract specialists (also called Principal PCOs) who act as subject matter experts on contractual matters for the organization (and typically carry a PCO workload). They are relied upon for their breadth of experience in various contracting mission areas. These positions are typically available in squadron/division to center levels.

3.5.2. Education and Training. Education and training are ongoing requirements which continues when 1102s reach the strategic/advanced level.

3.5.2.1. Contracting Knowledge, Skills, and Abilities. At this point in an 1102's career, individuals have honed professional competencies at the tactical/basic and operational/intermediate levels, demonstrating high proficiency. As shown in Figure 11 below, 1102s will now shift focus to the DoD Competency Model professional competencies shown in the right of the figure, which are tied to leading the enterprise at the strategic level. While Functional Experts/Leaders may not be in positions of enterprise leadership, they will still need to exhibit strategic thinking and other advanced competencies that contribute to the success of the organization's mission.

Figure 11: Professional Competencies by Career Level (Strategic/Advanced Focus)

3.5.2.2. APDP Training. 1102s at the strategic/advanced level have been certified for many years and are familiar with the CL requirements. Functional Experts/Leaders may consider credentials in relevant technical areas.

3.5.2.3.1. Continuous Learning . 1102s must continue to accumulate a minimum of 80 CLPs every 2 years to maintain their professional development. In accordance with the *USD(A&S) Continuous Learning (CL) Credit Guide* a minimum of 20 CLPs must be from formal training or academic education. See Part II, Section C for links to the *USD(A&S) CL Credit Guide,* as well as the link to *Registration for DAU Continuous Learning (CL) & Credential Courses.*

3.5.2.3.2. DAU Credential Program. Credentials will apply mainly to those on the Functional Expert/Leader track at the strategic/advanced level. The *SAF/AQC Contracting Credential Policy Memorandum*, dated 26 November 2024 details recommended credentials by contracting mission area and by functional area. See Part II, Section C for a link to the *SAF/AQC Contracting Credential Policy Memorandum.*

3.5.2.4. Civilian Development. At the strategic/advanced level (in this case, only applicable to GS-14 to GS-15, or equivalent), some new CD opportunities become available to 1102s.

3.5.2.4.1. Types of CD. Those on the Enterprise Leader track are recommended to complete leadership development short courses and select fellowships. In residence PME is also categorized as a CD opportunity. Enterprise Leaders may also be eligible for other strategic courses, such as the Defense Senior Leader Development Program or the Vanguard Senior Executive Leadership Program, etc. Those on the Functional Expert/Leader track are recommended to focus on leadership development short courses. See Part II, Section C for a link to the complete list of *Civilian Development (CD) Offerings and Eligibility*.

3.5.2.4.2. Professional Military Education. Individuals on the Enterprise Leader track (or on the Functional Expert/Leader track who intend to cross over to the Enterprise Leader track in the future) should complete grade appropriate PME. SDE is the appropriate PME for 1102s at this level; it currently includes Air War College, as well as sister service and DoD equivalent schools. 1102s may apply for it in-residence during the CD application cycle, or via distance learning through Air University outside of the CD application cycle.

3.5.3. Opportunities and Focus Areas. Breadth and/or depth of participation and leadership involvement should expand for 1102s at the strategic/advanced level.

3.5.3.1. Special Projects and Initiatives. At the strategic/advanced level, the focus of special projects and initiatives shifts to championing DAF Contracting initiatives. This may mean leading a MAJCOM/FLDCOM/DRU initiative or ensuring DAF initiatives are properly communicated to DAF Contracting organizations.

3.5.3.2. Development Team (DT) or Sub-Development Team (Sub-DT). Depending on position, individuals may now be part of the DAF Contracting Development Team, which is led by SAF/AQC and meets at designated times each year to discuss the civilian contracting

workforce. Those not participating in the DT may volunteer for Sub-DT opportunities, which discuss lower-graded members of the civilian contracting workforce. Members typically serve on the Sub-DT for a 2-year period.

3.5.3.3. Mentoring. As senior leaders, it is essential to provide guidance and mentoring to less experienced professionals to help grow the next generation of mission focused business leaders. To be an effective mentor, it is important to understand the mentee's career aspirations, work values, unique knowledge, skills, and abilities, as well as their preferred types of work and learning. Provide mentees with the tools and resources they need to succeed. By fostering a culture of mentorship and coaching, we can ensure the continued success and growth of the DAF Contracting community. See Part II, Section C for a link to *Vectoring & Mentorship* resources.

3.5.3.4. Professional Associations. At the strategic level, 1102s should consider pursuing leadership and advisory roles within a professional association, especially one that focuses on contracting or acquisition. Pursuing leadership opportunities ensures that the government perspective is represented when developing professional standards. See Part II, Section C for professional association resources.

SECTION C – PROFICIENCY TRAINING REQUIREMENTS

This section is reserved for future use. See Part I Section B of the Career Field Education and Training Plan for 1102 training courses and qualitative training tasks/competencies.

SECTION D – RESOURCE / TRAINING CONSTRAINTS

1.0. Centrally Funded DAU Training Authorizations. These authorizations are governed by the 2019 SAF/AQH policy memo, "Prioritization of Defense Acquisition University Training." See Part II, Section C for a link to the *Prioritization of Defense Acquisition University (DAU) Training Policy Memorandum* and other resources associated with overcoming resource or training constraints.

2.0. Department of Defense (DoD) Acquisition Workforce Development Account (DAWDA) for Tuition Assistance (TA). In accordance with 10 U.S.C. 1705, the DAWDA was established to provide funds for the recruitment, training, and retention of DoD acquisition personnel. Eligible civilians may use the DAWDA to pay for education and training courses, to include TA. Funding does not cover acquisition certification courses/programs (i.e., DAU and Professional Military Education courses). All Department of the Air Force Contracting acquisition coded civilian employees (0301, 1101, 1102, 1103, and 1105), regardless of pay grade, may request TA through the Contracting Career Field Team. See Part II, Section C for a link to *Tuition Assistance* resources.

2.1. Eligibility. DAWDA funds may be used by all civilians if they are assigned to an acquisition-coded position under Acquisition Professional Development Program, if they are either certified to the level required for the position, or are within the allowable grace period, and if they are current with Continuous Learning requirements. TA is not available for 1102s on term or temporary positions.

2.2. Funding Management and Limitations. TA funds are centrally managed by SAF/AQH with funding levels determined by employee classification. For COPPER CAPs, funding covers 100% tuition up to $35,000 per fiscal year per person. For non-COPPER CAP permanent civil service employees assigned to acquisition coded positions with 36 months of DoD civilian acquisition experience, funding covers 75% tuition up to $8,000 per fiscal year per person. Funding is limited to courses that are required to complete Career Field Team-approved education plans meeting SAF/AQH and contracting career field TA guide priorities. TA will not be provided for courses which are an education level equal to or lower than a degree already attained. Funding does not cover additional fees such as books, course materials, the costs of student TDY or vicinity travel, parking, or any indirect fees not directly related to instruction of the course (such as miscellaneous fees charged by the university). TA is not guaranteed until the individual's request is approved. The individual assumes all financial responsibility should TA be denied. See Part II, Section C for a link to *Tuition Assistance* resources.

PART II

SECTION A – COURSE TRAINING STANDARD (CTS)

1.0. Purpose. 1102s in training may demonstrate the desired learning outcomes contained in this CTS. The desired learning outcomes are provided in Attachment 1.

2.0. Qualitative Training. Attachment 1 contains the qualitative tasks, knowledge, and competencies recommended for 1102s. Commanders/directors will create unit specific Master Task Lists (MTLs), using Attachment 1 as a template and tailoring it as appropriate, to ensure 1102s learn and comprehend the tasks and competencies recommended for contracting professionals in the Department of the Air Force (DAF) and Department of Defense environments. At a minimum, unit/contracting office MTLs should include all core tasks indicated in column 2 of the qualitative requirements list. Units/offices should tailor their MTLs to match the unique tasks/competencies recommended for the 1102's current position. For example, operational contracting units may focus on simplified acquisition procedures, base construction, base operating services, aircraft maintenance, and other contracting actions that can be taught through on-the-job training. Additionally, units/offices will utilize the "Proficiency Code Key", included and defined in Attachment 1 to this document, to populate column 4 of unit specific MTLs.

2.1. Column 1. Task, Knowledge, and Technical References. This column lists the tasks and knowledge recommended for 1102s to become proficient in the contracting profession. It also provides Technical References (TR) for each task and knowledge area.

2.2. Column 2. Core Tasks. This column identifies with an "X" those tasks and knowledge from Column 1 that are considered core tasks to the contracting career field. All tasks identified as "core" in Attachment 1 of the Career Field Education and Training Plan (CFETP) should be included in the organization's 1102 MTL.

2.3. Column 3. Documentation of Training. This column is used by supervisors and commander approved unit trainers to record proficient demonstration of tasks and knowledge identified by the MTL.

2.4. Column 4. Proficiency Codes. This column indicates the proficiency level that should be demonstrated by the 1102 in training in order for the supervisor or commander-approved trainer to document completion of the task or knowledge area. Units (or branches/sections, if delegated by the Chief of the Contracting Office) are responsible for placing proficiency codes in column 4 at the time of unit/contracting office MTL creation. The proficiency codes annotated with an asterisk in column 4 are part of the Mission Ready Contracting Officers Course (MRC-103) curriculum and have been taught to the proficiency level indicated; therefore, supervisors may take that into account when training and documenting those tasks for 1102s who have attended MRC-103, or MRC-103 equivalent courses. See Attachment 1 for definitions and examples of proficiency codes.

3.0. Documentation of Training (Attachment 1). The CFETP should be utilized as part of each unit's training program. Supervisors or commander-approved trainers are responsible for confirming that an 1102's training goals are documented in the 1102's Individual Development Plan (IDP). 1102s are required to use MyVector to complete IDPs, unless an exception applies. Supervisors should identify specific tasks from the organization-specific MTL related to the 1102's current position and should establish a plan to obtain the applicable training. 1102s should incorporate the MTL tasks into the short-term goals section of their IDPs. The supervisor is responsible for maintaining their subordinates' training records and reviewing those training records during feedback sessions.

4.0. Training Approaches. Training methodologies will vary based on trainer and the employee's strengths, weaknesses, interests, learning preferences, experience levels, and other factors. Supervisors/managers, contracting officers, and/or designated trainers should collaborate with the 1102 in training to determine how to blend the 1102's preferences to ensure the purpose of the training – the 1102's learning – is properly accomplished. Supervisors/managers, contracting officers, and/or designated trainers are encouraged to see Part II, Section C for training materials related to contracting, career development, leadership, and other topics.

4.1. Trainers should consider:

4.1.1. Goals of the training session (i.e., new skills, new techniques for old skills, knowledge).

4.1.2. Experience level, preferred learning modes, and demographic of audience.

4.1.3. Budget constraints.

4.1.4. Time available or allocated for training.

4.1.5. Resources/materials available (i.e., space, training materials).

4.2. Training methodologies may include, but are not limited to:

4.2.1. On-the-job (hands on) training with extensive supervisor and peer feedback.

4.2.2. Classroom or instructor led training (supported by personal experiences).

4.2.3. Interactive sessions that include quizzes, small group discussions, case studies, question and answer sessions, role playing scenarios, and/or demonstrations.

4.2.4. Computer based training such as Defense Acquisition University's online scenario based "games."

4.2.5. DAF Contracting webinars and training material. See Part II, Section C for a link to *Webinar Training* and the *Training Portal*.

SECTION B – TRAINING COURSE INDEX

This section is reserved for future use. See Part I Section B of the Career Field Education and Training Plan for 1102 training courses.

SECTION C – SUPPORT MATERIALS

QUALITATIVE REQUIREMENTS LIST KEY	
COLUMN 1	**Task, Knowledge, and Technical References.** This column lists the tasks, competencies, and knowledge necessary for 1102s to perform duties at the various levels of the contracting profession. It also provides technical references (TR) that support the requirement for each task or competency.
COLUMN 2	**Core Tasks.** This column identifies with an "X", those tasks and competencies from Column 1 that are considered core tasks to the contracting career field.
COLUMN 3	**Documentation of Training.** This column is used by supervisors and commander-approved unit trainers to record completion of tasks and competencies identified by the CFETP, as well as any tasks a supervisor considers necessary for an 1102's duty positions.
COLUMN 4	**Proficiency Codes.** This column indicates the proficiency level that should be demonstrated by the 1102 in training in order for the supervisor or commander-approved unit trainer to document completion of the task/competency. Also see the Proficiency Code Key below.

PROFICIENCY CODE KEY (COLUMN 4)		
	SCALE VALUE	**DEFINITION**
TASK PERFORMANCE LEVELS	1	Can do simple parts of the task. Needs to be told or shown how to do most of the task. (EXTREMELY LIMITED)
	2	Can do simple parts of the task. Needs help only on hardest parts. (PARTIALLY PROFICIENT)
	3	Can do all parts of the task. Needs only a spot check of completed work. (COMPETENT)
	4	Can do the complete task completely and accurately. Can tell or show others how to do the task. (HIGHLY PROFICIENT)
*TASK KNOWLEDGE LEVELS	a	Can name parts, tools, and simple facts about the task. (NOMENCLATURE)
	b	Can determine step by step procedures for doing the task. (PROCEDURES)
	c	Can identify why and when the task must be done and why each step is needed. (OPERATING PRINCIPLES)
	d	Can predict, isolate, and resolve problems about the task. (ADVANCED THEORY)
**SUBJECT KNOWLEDGE LEVELS	A	Can identify basic facts and terms about the subject. (FACTS)
	B	Can identify relationship of basic facts and state general principles about the subject. (PRINCIPLES)
	C	Can analyze facts and principles and draw conclusions about the subject. (ANALYSIS)
	D	Can evaluate conditions and make proper decisions about the subject. (EVALUATION)

* A task knowledge scale value may be used alone or with a task performance scale value to define a level of knowledge for specific task. (Examples: b and 1b)

** A subject knowledge scale value is used alone to define a level of knowledge for a subject not directly related to any specific task, or for a subject common to several tasks.

EXAMPLE
Select a character proficiency code from the task performance levels, task knowledge levels, and the subject knowledge levels identified above.

For example, a task with a proficiency code of "**2aB**" reflects:

2 Can do simple parts of the task. Needs help only on the hardest parts. (PARTIALLY PROFICIENT)
a Can name parts, tools, and simple facts about the task. (NOMENCLATURE)
B Can identify relationship of basic facts and state general principles about the subject. (PRINCIPLES)

Note: An editable version of task/competency list is hosted at Air Force Contracting Central's Force Development page.

	1. Tasks, Knowledge and Technical References (TR)	2. Core Tasks	3. Certification/Documentation of Training			4. Proficiency Codes.
			Training Start	Training Complete	Supervisor Initials	
1	Understand the 64P (officer), 6C (enlisted), and GS-1102 (civilian) career paths TR: 64P CFETP, GS-1102 CFETP, 6C CFETP					
1.1	Understand career development opportunities and how those opportunities are linked to contracting's senior leader requirements	X				
2	Understand ethical standards of conduct TR: Listed below					
2.1	Understand the DAF Contracting Guiding Principles TR: DoD Contracting Competency Model	X				C
2.2	Describe ethical standards of conduct TR: DoD 5500.7 Joint Ethics Regulation	X				B
2.3	Describe improper business practices and conflicts of interest TR: FAR part 3 and subpart 9.5	X				B
3	Understand the branches of the Government and the acquisition mission TR: https://www.whitehouse.gov/government/, AF Contracting Central Knowledge and Learning Centers					
3.1	Define the roles and responsibilities of the branches of the Government within the procurement process	X				A
3.2	Identify the roles and responsibilities of the DoD Staff, Air Force Secretariat, and MAJCOMs within the acquisition process	X				A
3.3	Understand the DoD and DAF Contracting Missions	X				A
3.4	Understand the significance of the role of contracting in conducting business for the DoD					B
3.5	Identify private and public sectors and the differences between the two in terms of acquisitions					
4	Understand the Federal Acquisition Regulation (FAR) system TR: FAR parts 1 and 2, DFARS parts 1 and 2, DAFFARS parts 1 and 2					
4.1	Understand the guiding principles for the FAR System	X				B
4.2	Identify the organization and arrangement of the FAR System	X				B
4.3	Identify the policy pertaining to the definitions of words and terms	X				B
4.4	Explain the steps in the rulemaking process and how the FAR and its supplements are administered and updated					A
4.5	Identify the general policy for authorizing deviations from the FAR					A
4.6	Identify the FAR Supplements	X				B
4.7	Understand supplementing guidance to the FAR (e.g., DFARS Program Guidance and Information (PGI), DAFFARS Mandatory Procedures (MP) and DAF policy memoranda)	X				B
5	Understand chain of command and authorities related to contracting TR: FAR subparts 1.6 and 1.7, FAR part 3, and supplements					
5.1	Understand chain of command, command authority, base authority, and contracting officer authority	X				A

5.2	Understand an unauthorized commitment and what steps are required to ratify the action	X				A
5.3	Understand the Constitutional and statutory authority for contracting	X				B
5.4	Understand how contracting authority is delegated within the Department of the Air Force					B
5.5	Identify the different types of contracting authority					B
5.6	Understand the purpose of legal office reviews and which documents require legal reviews prior to release	X				
5.7	List the individuals responsible for meeting the Federal Acquisition Regulation System vision					B
5.8	Understand the Government's methods of overseeing acquisition					B
6	Understand the benefits and principles of building and sustaining successful teams so that you will be able to use business knowledge, analysis, and strategies efficiently as an active participant on the acquisition team TR: FAR part 1					
6.1	Understand why teamwork is important within DoD and DAF	X				A
6.2	List the key success factors for effective team building					A
6.3	Identify members of the Acquisition Team and describe the roles of each					B
6.4	Understand how contracting professionals add value to the team					B
6.5	Identify the characteristics of effective communication					A
7	Understand the statutory and regulatory principles of contracting TR: FAR parts 17, 22 and 25					
7.1	Identify the essential elements of a contract (e.g., offer and acceptance)					B
7.2	Understand the statutes, regulations, court and administrative rulings, and other guidance that define the procurement system					B
7.3	Understand the Economy Act and how a need can be met through interagency acquisition TR: FAR subsection 17.502-2					B
7.4	Identify the applicability and policy of Contract Disputes (formerly known as the Contract Disputes Act of 1978)					B
7.5	Understand the requirements for Contracts for Materials, Supplies, Articles, and Equipment Exceeding $15,000 (formerly known as the Walsh Healey Act) TR: FAR subpart 22.6					B
7.6	Understand the requirements of the Fair Standards Labor Act TR: FAR subpart 22.10					B
7.7	Identify the purchasing restrictions set forth by 10 U.S.C. 2533a (the "Berry Amendment") on end products or components not grown, reprocessed, reused, or produced in the U.S. TR: DFARS subsection 225.7002-1					
7.8	Identify the acquisitions categories not subject to the restrictions of 10 U.S.C. 2533a (the "Berry Amendment") TR: DFARS subsection 225.7002-2					

8	Understand the role of the contracting officer and contracting organizations TR: FAR parts 1 and 4					
8.1	Understand the roles and responsibilities of contracting organizations and contracting personnel	X				B
8.2	Identify the qualifications and role of the contracting officer	X				B
8.3	List different types of contracting officers	X				B
8.4	Understand the policies and procedures pertaining to contract execution					B
8.5	Understand how to anticipate and respond to mission partner expectations					C
8.6	Identify the areas that require mission partner education					B
8.7	Understand Determination and Findings (D&F) authorities and responsibilities TR: FAR subpart 1.7	X				A
9	Understand the role contracting plays in avoiding and detecting fraud in the acquisition environment TR: FAR part 3					
9.1	Recognize actions to avoid fraud, waste, and abuse	X				A
9.2	Understand the difference between unethical behavior and fraud	X				A
9.3	Identify fraud indicators	X				B
9.4	Give examples of fraud, waste, and abuse you may have come across in your career					
10	Understand the role Air Force Office of Special Investigations (AFOSI) plays in contracting TR: https://www.osi.af.mil/					
10.1	Understand the mission of AFOSI as it relates to contracting (e.g., fraud, counterintelligence, etc.)					A
10.2	Understand how to contact AFOSI to report criminal activity or suspicious activity that could be considered criminal activity	X				1b
11	Understand the role Army Criminal Investigation Command (CID) plays in procurement investigations in the deployed environment TR: http://www.cid.army.mil/					
11.1	Understand the mission of Army CID as it relates to contracting					
11.2	Understand how to contact Army CID to report contract fraud					
12	Understand Contract File Documentation TR: FAR part 4					
12.1	Understand the purpose of the contract file	X				B
12.2	Identify regulatory directions concerning file documentation					B
12.3	Create and organize a contract file (paper or electronic) given a number of contract-related documents					1a
12.4	Write clear and well-documented memoranda for record (MFR) for the contract file TR: AFH 33-337 (Tongue and Quill)	X				

13	Understand contract closeout procedures TR: FAR parts 4 and 42					
13.1	Identify the time standards associated with closing out contract files					A
13.2	Identify the process associated with closing out contract files					A
13.3	Identify what constitutes a physically complete contract file					A
13.4	Identify when a contracting office may use the quick closeout procedure					A
14	Understand the importance of different contract codes and how to find correct codes TR: FAR subpart 4.6					
14.1	Understand the uniform reporting requirements for the Federal Procurement Data System-Next Generation (FPDS-NG)					B
14.2	Identify the required codes used in an acquisition					2c
14.3	Complete an FPDS Contract Action Report (CAR)	X				
15	Understand the requirements for publicizing contract actions TR: FAR part 5					
15.1	Identify the policies and procedures pertaining to synopses of proposed contract actions	X				2aB
15.2	Identify the policies and procedures pertaining to the solicitation and receipt of proposals and information					2aB
15.3	Identify the policies and procedures pertaining to the synopses of contract awards	X				2aB
15.4	Identify the policies and procedures pertaining to the dissemination of contract award information (i.e., contract award distribution)					2B
15.5	Publicize a contract action	X				2aB
16	Understand competition requirements TR: FAR part 6					
16.1	Identify the policy and procedures that are to be used to promote and provide for full and open competition	X				B
16.2	Identify the policies for use of sealed bidding and competitive proposals	X				B
16.3	Identify the policy and procedures for providing for full and open competition after exclusion of sources	X				B
16.4	Identify the policy, procedures, and statutory authorities for contracting without providing for full and open competition	X				B
16.5	Understand the seven circumstances permitting other than full and open competition	X				A
16.6	Understand the format of adequate sole source justifications	X				A
16.7	Understand where to find the *Other Than Full and Open Competition Justification and Approval Preparation Guide and Template* (both simplified acquisitions and non-simplified acquisitions) TR: DAFFARS part 5306 and AFCC Knowledge Center					
16.8	Review a sole source justification for sufficiency	X				

16.9	Understand the posting requirements for a justification and approval					
16.10	Understand competition requirements when soliciting using Simplified Acquisition Procedures	X				A
16.11	Understand the economic role the contractor industrial base plays in Government acquisition					A
16.12	Understand the role of the Competition Advocate					A
16.13	Understand the requirements of the Competition in Contracting Act (CICA)					B
17	Understand the requirements of acquisition planning TR: FAR part 7, and supplements					
17.1	Understand the policies and procedures pertaining to acquisition plans					A
17.2	Understand the purpose and requirements of acquisition planning					B
17.3	Understand the general requirements of Acquisition Strategy Panels (ASPs) TR: DAFFARS subsection 5307.104-92					
17.4	Understand acquisition planning documentation available (i.e., ASP Secretariat and ACE)					
17.5	Understand the policies related to the performance of inherently Governmental functions TR: FAR subpart 7.500					
17.6	List the examples of functions considered to be inherently Governmental functions TR: FAR section 7.503					
17.7	Understand who provides a written determination (to the contracting officer) that none of the functions to be performed by a contractor are inherently Governmental and when it is required TR: FAR section 7.503(e)					
17.8	Determine when a written acquisition plan is required and the elements of a written acquisition plan					B
17.9	Understand acquisition planning documentation available for "Other Contracting" (e.g., Streamlined Acquisition Strategy Summary (SASS)) TR: FAR part 7, DFARS part 207, DAFFARS 5307.104-92					
17.10	Understand when to use a Streamlined Acquisition Strategy Summary (SASS) TR: FAR Part 7, DFARS 207, DAFFARS subsection 5307.104-92					
17.11	Understand the types of advice, and their financial implications, needed to determine appropriate business arrangements					B
17.12	Identify factors and considerations impacting a smart business arrangement					B
17.13	Identify factors to consider when deciding to solicit for lease, purchase, or both					B
17.14	Understand the lease versus buy decision and what documentation is required TR: DAFFARS subpart 5307.4					B
17.15	Understand motivational terms and conditions to manage risk					A
17.16	Understand the differences between bundling and consolidating requirements for procurement TR: FAR section 7.107					
18	Understand the order of priority for mandatory sources of supplies and services TR: FAR Part 8					

18.1	Identify the order of priority for mandatory sources of supplies and services TR: FAR section 8.002	X				2bB
18.2	Identify the supplies or services which must be procured from or through other mandatory sources (e.g., public utility services, leased motor vehicles, etc.) TR: FAR section 8.003					
19	Understand the role GSA schedules play in contracting TR: FAR parts 8 and 38					
19.1	Describe the roles of the General Services Administration					B
19.2	Describe when and how to use GSA Schedules in different situations	X				B
19.3	Identify how GSA Advantage fulfills requirements of the FAR					B
20	Understand the concepts of responsibility or non-responsibility of a prospective contractor TR: FAR part 9					
20.1	Understand the general standards of responsibility for prospective contractors. TR: FAR subsection 9.104-1					
20.2	Understand when to include special standards of responsibility in solicitations TR: FAR subsection 9.104-2					B
20.3	Identify who is responsible for determining the responsibility of prospective subcontractors TR: FAR subsection 9.104-4					
20.4	Understand when the contracting officer shall review the Federal Awardee Performance and Integrity Information System (FAPIIS), (available at www.fapiis.gov) TR: FAR subsection 9.104-6	X				B
20.5	Understand the procedures for determining whether prospective contractors and subcontractors are responsible TR: FAR section 9.105	X				B
20.6	Identify when a pre-award survey is normally required TR: FAR section 9.106					
20.7	Explain how to access the System for Award Management (SAM) Exclusions and determine if a contractor is debarred, suspended, proposed for debarment, or otherwise ineligible TR: https://sam.gov/and FAR 9.404	X				2aB
20.8	Understand the effect of the debarment, suspension, or proposal for debarment listing for contractors seeking business with the Government TR: FAR section 9.405					B
20.9	Identify the causes for debarment TR: FAR subsection 9.406-2					B
20.10	Identify the procedures for debarment and how long a debarment generally does not exceed TR: FAR subsections 9.406-3 and 9.406-4					B
20.11	Identify the causes for suspension TR: FAR subsection 9.407-2					B
20.12	Identify the procedures for suspension and understand the temporary nature of suspensions TR: FAR subsections 9.407-3 and 9.407-4					B

21	Understand the process of conducting market research TR: FAR parts 10 and 8					
21.1	Describe the policy requirements for conducting market research TR: FAR section 10.001	X				2aC
21.2	Describe the procedures and techniques for conducting market research, including spend analysis TR: FAR section 10.002	X				2aC
21.3	Assess a market research report to determine if its content is sufficient for the size and complexity of the acquisition TR: FAR section 10.002					
21.4	Assess a market research report (for services) and determine if its content is sufficient for the size and complexity of the acquisition TR: DFARS PGI section 210.070					
21.5	Describe how industry engagement, such as industry days and reports may support market research					
22	Understand agency needs, requirements documents, and purchase request (PR) packages TR: FAR part 11					
22.1	Identify the policy for describing agency needs	X				B
22.2	Determine if a purchase request and requirements documents are adequate for procurement	X				1aB
22.3	Identify the procedures for reviewing and correcting deficiencies in a purchase request TR: DFARS PGI section 211.7001	X				A
22.4	Review a Military Interdepartmental Purchase Request (MIPR) for accuracy					A
22.5	Review the sufficiency of a mission partner's specifications for procurement TR: FAR section 11.201					
22.6	Review a statement of work (SOW) for clarity and sufficiency TR: MIL-HDBK-245D, FAR subpart 8.4, and supplements					A
22.7	Review a performance work statement (PWS) for clarity and sufficiency, and ensure performance objectives are adequate					A
22.8	Describe a compliant contract line item number structure	X				A
22.9	Review a brand name justification and approval (J&A) for sufficiency TR: FAR section 11.104	X				A
22.10	Describe when liquidated damages should be included in solicitations and contracts TR: FAR section 11.501					
22.11	Describe the purpose of liquidated damages and how liquidated damages rates are determined TR: FAR sections 11.501 and 11.502					
23	Understand how to determine if an acquisition is commercial and recognize the benefits of a commercial acquisition TR: FAR part 12					
23.1	Identify the general policies for acquisition of commercial items	X				B
23.2	Determine if a requirement is commercial or non-commercial	X				B

23.3	Understand the benefits and challenges of procuring commercial off-the-shelf items, modified commercial items, nondevelopmental items, services "of a type," and Government-unique items					B
23.4	Review and determine if a contractor's commercial item determination (CID) is adequate					A
23.5	Explain when a CO determination regarding a CID is necessary					A
24	Understand Simplified Acquisition Procedures (SAP) TR: FAR part 13					
24.1	Identify the procedures for making simplified acquisitions	X				1A
24.2	Identify the policies and procedures pertaining to actions at or below the micro-purchase thresholds	X				B
24.3	Identify the policies and procedures pertaining to simplified acquisition methods	X				B
24.4	Prepare and issue a request for quotation (RFQ)					
24.5	Prepare and issue an amendment to a RFQ					
24.6	Prepare a statement of price reasonableness that properly supports the basis for contract award					
24.7	Determine terms and conditions, including special contract requirements applicable to the acquisition					A
24.8	Explain other methods of procurement that can be used if SAP is not appropriate					B
25	Understand the proper use of the GPC TR: FAR part 13 and AFI 64-117					
25.1	Identify the micro-purchase threshold and how it applies to acquisition	X				B
25.2	Describe the GPC program and the roles and responsibilities outlined in the program					A
25.3	Describe the single purchase, monthly, and funding limits					A
25.4	Describe how to resolve billing errors and disputes					
25.5	Understand the GPC log					
25.6	Understand the Agency Organization Program Coordinator’s (A/OPC) responsibility for GPC program surveillance					A
26	Understand when and how to use Sealed Bidding TR: FAR part 14					
26.1	Identify the policies and procedures pertaining to the use of sealed bidding					B
26.2	Identify the policies and procedures pertaining to the solicitation of bids					B
26.3	Identify the policies and procedures pertaining to the submission of bids					B
26.4	Identify the procedures for the receipt, handling, opening, and disposition of bids including mistakes in bids, and subsequent award of contracts					B
27	Understand how to properly execute a contract award and notice of award TR: FAR parts 14 and 15					

27.1	Identify the regulatory requirements for notification of award to awardees and unsuccessful vendors/offerors	X				B
27.2	Describe the procedures for preparing and documenting an award	X				A
27.3	Identify the correct method for processing post-award mistakes					A
27.4	Prepare and award a purchase order	X				1aA
28	Understand the requirements of a post-award conference and how to conduct debriefings TR: FAR parts 15 and 42					
28.1	Identify the policies and procedures for notification and debriefing offerors					B
28.2	Explain the process and procedures for a post-award conference					B
28.3	Understand unique subcontracting aspects					B
28.4	Describe the process of conducting different types of debriefings					B
29	Understand the concept of best value acquisition TR: FAR parts, 1, 13, and 15					
29.1	Define the term best value	X				B
29.2	Describe the criteria used to select the optimal best value technique					B
29.3	Describe the best value factor and rating system					A
30	Understand the concepts and flow of a source selection TR: FAR part 15					
30.1	Understand where to find DAF Source Selection templates and training materials TR: DAFFARS MP 5315.3 and AF Contracting Central SharePoint					
30.2	Understand differences between source selections under FAR parts 13 and 15					
30.3	Identify the policies and procedures for selection of a source or sources in competitive negotiated acquisitions					B
30.4	Describe the roles and responsibilities of the Source Selection Team (SST) TR: DFARS subpart 215.300					
30.5	Describe the roles and responsibilities of the Source Selection Authority (SSA) TR: DFARS subpart 215.300					
30.6	Describe when a Source Selection Advisory Council (SSAC) is required, what the SSAC's roles and responsibilities are, and who comprises the SSAC TR: DFARS subpart 215.300					
30.7	Describe the roles and responsibilities of the Source Selection Evaluation Board (SSEB) TR: DFARS subpart 215.300					
30.8	Understand the limitations on use of non-Government advisors in source selections TR: DFARS subpart 215.300					
30.9	Understand the roles and responsibilities of the program management/requirements office TR: DFARS subpart 215.300					

30.10	Understand the best-value continuum (i.e., tradeoff source selection process and lowest price technically acceptable (LPTA)) TR: DFARS subpart 215.300					
30.11	Describe the importance of protecting Source Selection Information (SSI) and what actions must be taken to protect SSI					
30.12	Recognize a source selection plan that is consistent with public law, regulations, policy, and other guidelines TR: DFARS subpart 215.300					
30.13	Create a source selection plan					
30.14	Describe the relative importance of evaluation factors					B
30.15	Describe procedures to evaluate factors (price related, non-price related, and technical)					aA
30.16	Describe how to evaluate a contractor's past performance and how to access this information in the Contractor Performance Assessment Reporting System (CPARS)					aA
30.17	Identify techniques to evaluate other terms and conditions					aA
30.18	Determine terms and conditions, including special contract requirements applicable to the acquisition, that are appropriate for the acquisition to comply with laws and regulations (e.g., method of financing, Government property, intellectual property, OCI, and specialty metals)					A
30.19	Understand what is required if only one offer is received in response to a competitive solicitation TR: DFARS section 215.371					
30.20	Describe the need for a technical evaluation of proposals and who should provide the evaluation					B
30.21	Describe awarding with or without discussions					B
30.22	Decide whether to hold discussions based on results of the evaluation					A
30.23	Define the term “competitive range” and describe how it is used					B
30.24	Describe the process for final proposal revisions TR: DFARS subpart 215.300					
30.25	Describe the process for documenting final evaluation results TR: DFARS subpart 215.300					
30.26	Describe when a comparative analysis should be conducted and documented TR: DFARS subpart 215.300					
30.27	Describe the contents of the Source Selection Decision Document (SSDD) and its releasability TR: DFARS subpart 215.300					
31	Understand when and how to use contracting by negotiation TR: FAR part 15					
31.1	Describe some of the acquisition processes and techniques that may be used to design competitive acquisition strategies suitable for the specific circumstances of the acquisition					A
31.2	Describe the different contract areas that are subject to negotiation					A

31.3	Understand the utility of a draft request for proposal (RFP)					
31.4	Describe how to prepare a RFP					2b
31.5	Understand the importance of a clear linkage between the requirements and evaluation factors in a RFP TR: DFARS subpart 215.300					
31.6	Describe how to prepare an amendment to a RFP					2b
31.7	Issue an amendment to a request for proposal RFP					
31.8	Describe how and when to host a pre-proposal conference/site visit					A
31.9	Identify the policies and procedures for unsolicited proposals					A
31.10	Describe how to handle late proposals, modifications, and cancellations					A
32	Understand different aspects of a negotiation TR: FAR part 15 and 27					
32.1	Describe the process for conducting negotiations					1bA
32.2	Recognize when fact-finding is appropriate					A
32.3	Identify the steps in conducting negotiations					A
32.4	Recognize various negotiation techniques and styles					A
32.5	Identify buyer and seller motivations					A
32.6	Prepare for negotiations / discussions / awards by reviewing audit and technical reports, performing cost and/or price analysis (or reviewing price analysts' reports), and developing pre-negotiation position to include identifying potential trade-offs					1bA
32.7	Identify the policies and procedures pertaining to Patents, Data, and Copyright					A
33	Understand how to evaluate a contractor's proposal using price-related, non price-related factors, cost principles, and cost analysis techniques TR: FAR parts 15, 29, 30, and 31; DFARS section 215.404; 10 U.S.C. 2306a and 41 U.S.C. chapter 35					
33.1	Define key terms used in contract pricing					B
33.2	Understand basic principles of contract pricing					B
33.3	Define certified cost and pricing data					B
33.4	Understand the exceptions to certified cost or pricing data					
33.5	Describe when a Certificate of Current Cost or Pricing Data is required					
33.6	Describe proposal analysis techniques					B
33.7	Understand methods to determine reasonableness of price					
33.8	Identify preferred price analysis techniques					

33.9	Identify other information used to support price analysis					A
33.10	List factors that affect price comparability					A
33.11	Identify price-related and non-price related factors					
33.12	Recognize the importance of documenting contract negotiations (i.e., PNM, SSEB Report, or other summary document)	X				A
33.13	Describe the DoD policy for developing a pre-negotiation profit or fee objective on negotiated contract actions when cost or pricing data is obtained TR: DFARS subsection 215.404-4					
33.14	Understand the use of the DD Form 1547 whenever a structured approach to profit analysis is required TR: DFARS PGI subsection 215.404-70					
33.15	Describe the weighted guidelines method of profit analysis TR: DFARS subsection 215.404-71					
33.16	Understand where to find weighted guidelines (WGL) training materials TR: Air Force Contracting Central SharePoint -> Learning Center					
33.17	Describe procedures to evaluate cost-related factors					A
33.18	Describe methods used to determine reasonableness of cost					B
33.19	Understand the purpose of conducting cost analysis					B
33.20	Determine when to use cost analysis to evaluate proposals					B
33.21	Recognize the importance of cost analysis					A
33.22	Identify the requirements of 10 U.S.C. 2306a, Cost or Pricing Data - Truth in Negotiations, and 41 U.S.C. chapter 35, Truthful Cost or Pricing Data.					A
33.23	Identify the general rules pertaining to Cost Accounting Standards (CAS) administration					A
33.24	Identify when a contract or subcontract is subject to CAS					A
33.25	Identify the applicability of the cost principles and procedures to various types of contracts and subcontracts					A
33.26	Identify the cost principles and procedures pertaining to contracts with commercial organizations					A
33.27	Identify the policies and procedures relating to cost allowability					A
33.28	Determine when a cost is allowable, unallowable, or allowable with restrictions					A
33.29	Identify the policies and procedures pertaining to taxes					A
33.30	Identify the required content of a price negotiation memorandum (PNM)					A
33.31	Understand where to find PNM templates and training materials TR: Air Force Contracting Central SharePoint -> Knowledge Center -> Contracting Templates					
33.32	Draft a price negotiation memorandum (PNM) that includes the required content and documents the negotiation process					

33.33	Develop positions on pricing-related contract terms and conditions to aid in developing the Government's position					
34	Understand what constitutes defective pricing and the remedies available to the Government TR: FAR subsection 15.407-1					
34.1	Describe what constitutes defective pricing					A
34.2	Describe the remedies available to the Government when defective pricing is discovered					A
35	Understand the appropriate contract type or agreement that would properly apportion expected risk TR: FAR part 16					
35.1	Identify the policies and procedures pertaining to selecting contract types					B
35.2	Identify the policies and procedures pertaining to fixed-price contracts	X				B
35.3	Identify the policies and procedures pertaining to cost-reimbursement contracts					B
35.4	Identify the policies and procedures pertaining to incentive contracts					B
36	Understand the appropriate Fixed-Price contract type that would properly apportion expected risk TR: FAR subpart 16.2					
36.1	Explain each type of fixed-price contract	X				B
36.2	Describe the policies and procedures pertaining to fixed-price contracts					B
37	Understand the appropriate Cost-Reimbursement contract type that would properly apportion expected risk TR: FAR subpart 16.3					
37.1	Define each type of cost-reimbursement contract					B
37.2	Describe the policies and procedures pertaining to cost-reimbursement contracts					B
38	Understand when to use Indefinite-delivery indefinite-quantity contracts (IDIQs), agreements, and other special contracting methods TR: FAR parts 16 and 17, DAFFARS subpart 5316.5					
38.1	Describe alternative methods of acquiring recurring requirements					B
38.2	Identify the policies and procedures for making award of indefinite-delivery contracts	X				B
38.3	Describe the requirement to obligate funds when awarding an IDIQ TR: DAFFARS MP section 5316.504					
38.4	Understand how determinations for requirements contracts estimated to exceed a certain dollar amount (including all options) must be approved TR: DAFFARS section 5316.503					
38.5	Understand the limitation on single award IDIQ contracts TR: DAFFARS section 5316.504					
38.6	Describe how to place an order against an IDIQ contract	X				C

38.7	Understand fair opportunity requirements for orders placed under multiple-award contracts (MACs) TR: FAR section 16.505 paragraph (b)					
38.8	Identify the policies and procedures pertaining to time-and-materials (T&M), labor-hour (LH), and letter contracts (elements, approval, definitization)					B
38.9	Understand when Determination and Findings (D&F) are required when using time-and-materials (T&M), labor-hour (LH), and letter contracts TR: DFARS section 216.601 and DAFFARS section 5316.601 paragraph (d)					
38.10	Identify the policies and procedures for undefinitized contract actions (UCAs) or letter contracts					B
38.11	Identify the policies and procedures for establishing and using different types of agreements					B
38.12	Describe how to set up a Blanket Purchase Agreement (BPA)					
38.13	Describe how to place and document BPA calls					
38.14	Describe the key distinguishing difference between multi-year contracts and multiple year contracts TR: FAR section 17.103					B
38.15	Describe the uses for multi-year contracts TR: FAR subsection 17.105-1					
38.16	Identify the policies and procedures for the use of options					B
38.17	Understand the authority and requirements for use of the option to extend services clause TR: FAR 52.217-8					
38.18	Identify available acquisition flexibilities					A
38.19	Identify emergency acquisition flexibilities					A
38.20	Describe procedures and processes supporting interagency acquisitions (D&F requirements) and approvals for assisted acquisitions TR: DFARS subpart 217.5 and DFARS subpart 217.7					
39	Understand the requirements for and reasoning behind Small Business Programs TR: FAR part 19					
39.1	Determine when a procurement should be reserved or set-aside for small business concerns	X				B
39.2	Explain the process to set-aside a procurement under the 8(a), HubZone, SDVOSB, and WOSB categories	X				B
39.3	Identify the policies that provide preference for small business concerns					B
39.4	Identify the unit's small business advocate and the local SBA office	X				
39.5	Describe small business size standards and how to verify the size of prospective awardees	X				C
39.6	Prepare a DD Form 2579	X				1b
39.7	Explain what a Certificate of Competency is and what it is used for					A
39.8	Describe the Small Business Subcontracting Program and its requirements					A

39.9	Describe price evaluation preference for HUBZone small business concerns					A
39.10	Assist small business concerns in understanding how to do business with the Government, identifying contracting opportunities, and responding to small business inquiries regarding payment delays or problems					A
39.11	Review and determine if a contractor's small business subcontracting plan is adequate					A
40	Understand how labor rates affect contracts and correctly navigate the Department of Labor's Labor Rate web page TR: FAR part 22					
40.1	Identify the policies and procedures for the application of labor laws to Government acquisitions					B
40.2	Define prevailing wages					B
40.3	Describe the applicability of labor rates on different types of contracts					B
41	Understand the importance and the laws affecting environmental issues in Government Contracting TR: FAR part 23					
41.1	Identify the acquisition policies and procedures for protecting and improving the quality of the environment					B
41.2	Identify the acquisition policies and procedures for supporting the Government program for ensuring a drug-free workplace					B
42	Understand the procedures for processing solicitation responses TR: FAR part 24					
42.1	List the procedures for safeguarding quotes, proposals, and bids	X				B
42.2	List the procedures for processing timely and late offers					B
42.3	Identify the requirements for conducting oral presentations					B
42.4	Identify the policies and procedures pertaining to protection of privacy and freedom of information	X				B
42.5	Respond to pre-award inquiries by taking the appropriate action to resolve questions					B
43	Understand foreign acquisition rules TR: FAR part 25, DFARS subpart 225.73, and DoD 5105.38-M, *Security Assistance Management Manual*					
43.1	Identify the policies and procedures pertaining to foreign acquisition					A
43.2	Describe how the U.S. Government's agreement to sell defense articles and services to foreign Governments or international organizations through Foreign Military Sales (FMS) is documented TR: DFARS section 225.7301					
43.3	Understand when to use an International Agreement Competitive Restrictions (ICAR) document rather than a FAR 6.302-4 J&A TR: DFARS subsection 206.302-4 and DAFFARS subsection 5306.302-4					

43.4	Understand the procedures for preparing solicitations and contracts that include FMS TR: DFARS section 225.7301					
43.5	Understand the preparation of a Letter of Offer and Acceptance (LOA) TR: DFARS section 225.7302					
43.6	Understand how to price acquisitions for FMS TR: DFARS section 225.7303					
43.7	Understand the concept of offset costs when doing business with a foreign Government or international organization TR: DFARS subsection 225.7303-2 and section 225.7306					
44	Understand socioeconomic programs TR: FAR part 26					
44.1	Identify the policies and procedures pertaining to other socioeconomic programs					A
45	Understand the history, mission, and roles of DFAS TR: http://www.dfas.mil/pressroom/aboutdfas.html					
45.1	Explain the roles and responsibilities of DFAS					A
46	Understand the payment process in Government contracting TR: FAR part 32 and AFI 64-117					
46.1	Recognize contractual payment or accounting terms and conditions					A
46.2	Identify the policies relating to the payment clause	X				A
46.3	Describe the different types of contract financing and the policies and procedures pertaining to them					B
46.4	Identify invoice and payment procedures	X				B
46.5	Show how to identify invoices/payments in WAWF and myInvoice	X				B
46.6	Identify request for assignment of claims					
46.7	Recognize the types of commercial financing and their implications for contract administration					A
46.8	Recognize the types of non-commercial item financing					A
46.9	Describe the process for approving a contractor's request for payments to include final vouchers under cost reimbursement contracts, progress payments, performance-based payments, or commercial financing					
46.10	Understand the use of the Air Force Government-wide Purchase Card (GPC) program TR: AFI 64-117					
47	Understand fiscal law and funds management TR: FAR part 32, DFARS part 232, and DAFFARS part 5332					
47.1	Describe the Anti-Deficiency Act (ADA)	X				B
47.2	Describe the Bona Fide Need rule	X				B
47.3	Describe appropriations in terms of time, purpose, and amount	X				B
47.4	Describe the split funding of contracts (i.e., severable services contracts)					B

47.5	Understand when fixed-price contracts may be incrementally funded					
47.6	Understand when the Limitation of Government's Obligation clause (DFARS 252.232-7007) is required in solicitations and contracts					
47.7	Understand when the Limitation of Cost clause (FAR 52.232-20) is required in solicitations and contracts					
47.8	Understand when the Limitation of Funds clause (FAR 52.232-22) is required in solicitations and contracts					
47.9	Understand when the Availability of Funds clause (FAR 52.232-18) is required in solicitations and contracts					
47.10	List the appropriation types (i.e., O&M, procurement, etc.), codes, and lifecycle of each	X				B
48	Understand the claims, disputes, and alternative dispute resolution processes TR: FAR Part 33 and supplements, DFARS subsection 243.204-71					
48.1	Understand terms particular to FAR subpart 33.2					B
48.2	Identify the applicability of Contract Disputes (formerly known as the Contract Disputes Act)					B
48.3	Identify the policies relating to initiating a claim					A
48.4	Identify when a contractor shall provide a certification statement for a claim					
48.5	Identify the policies relating to disputes and contractor’s claims					A
48.6	Identify the policy relating to the contracting officer’s final decision					A
48.7	Identify the policy relating to Alternative Dispute Resolution					A
48.8	Identify when a contractor shall provide a certification statement for an equitable adjustment					
48.9	Understand the differences between a claim and a request for equitable adjustment					
49	Understand how to handle a protest from a contractor TR: FAR part 33 and supplements					
49.1	Identify the definitions of "day," "filed," and "interested party" for the purpose of filing a protest					A
49.2	Identify the policies and procedures pertaining to protests					A
49.3	Identify actions that may be protested					A
49.4	Understand the differences between protests to GAO and COFC					A
50	Understand the contracting categories, transactions, and missions associated with the various contracting environments TR: FAR parts 34 and 35					
50.1	Define the major categories of acquisition (supplies, services, construction, major systems, sustainment, and research and development contracting)	X				A
50.2	Identify the different types of transactions entered into by the Government					A

51	Understand the concepts and uses for Construction, A&E Services, and Simplified Acquisition of Base Engineering Requirements TR: FAR parts 36 and 28					
51.1	Identify basic facts and terms relating to contracting for Construction					A
51.2	Describe the contracting office's interface and collaboration with the civil engineering office	X				A
51.3	Describe Invitation for Bids (IFB) procedures TR: FAR part 14 and section 36.213					B
51.4	Describe RFP procedures TR: FAR part 15 and section 36.214					B
51.5	Describe the requirement for material submittals TR: AF Form 3000, FAR 52.236-5, DAFFARS subpart 5336.90					
51.6	Describe how to plan and conduct a site visit and issue minutes TR: FAR section 36.523 and Supplements, FAR 52.236-27, Alt I					
51.7	Identify the policies and procedures for obtaining financial protection against losses under contracts					A
51.8	Describe the purpose for and application of liquidated damages TR: FAR section 36.206					A
51.9	Describe the requirement for progress schedules					A
51.10	Describe progress payments based on percentage of completion TR: FAR 52.232-5 and FAR section 32.103					
51.11	Identify basic facts and terms about contracting for Architect and Engineering (A&E) Services TR: FAR subpart 36.6 and section 36.702					A
51.12	Identify basic facts and terms about Simplified Acquisition of Base Engineering Requirements (SABER)					A
51.13	Identify basic facts and terms about Multiple Award Construction Contracts (MACC)					A
51.14	Describe the Wage Rate Requirements (Construction) (formerly known as the Davis-Bacon Act) and payroll administration TR: FAR subsection 22.403-1, and FAR sections 22.404 and 22.406					A
51.15	When a contract is modified, describe when a contracting officer shall obtain the consent of surety and which standard form shall be used TR: FAR subsection 28.106-5					
51.16	Describe the impact of providing GFP to contractors TR: FAR part 45					B
52	Understand the concepts of Service contracts and the Service Contract Labor Standards (formerly known as the Service Contract Act) TR: FAR part 37					
52.1	Define service contract					B
52.2	Identify types of services (i.e., custodial, maintenance, BOS, food service, etc.)					A
52.3	Describe different terms associated with services					B

52.4	Understand special requirements approval documents in support of service requirements TR: DAFI 63-138 *Acquisition of Services*					
52.5	Describe statutory requirements of the Service Contract Labor Standards (formerly known as the Service Contract Act)					A
52.6	Describe the purpose for wage determinations in contracts and how they are managed within the contract					A
52.7	Identify the policies and procedures pertaining to acquiring IT and utility services					A
53	Understand the importance of contract administration and the different organizations and personnel that support contract administration TR: FAR parts 1, 42, 46, and 47					
53.1	Describe the role of Defense Contract Management Agency (DCMA)					B
53.2	Describe the duties and responsibilities of an Administrative Contracting Officer (ACO)					A
53.3	Describe which functions should be delegated to DCMA					A
53.4	Describe the procedures for delegating contract administration to DCMA					
53.5	Plan for contract administration regarding delegating administrative functions; designating, training and managing contracting officer representatives (CORs); and formally establishing all contract administration responsibilities					
53.6	Understand the designation, assignment, and responsibilities of a Contracting Officer Representative (COR) TR: DAFFARS MP subsection 5301.602-2 paragraph (d)					
53.7	Understand where to find and use the COR tracking tools (JAM & SPM) TR: https://piee.eb.mil/xhtml/unauth/home/login.xhtml					
53.8	Determine appropriate Quality Assurance procedures					A
53.9	Describe monitoring, inspection, and acceptance criteria					A
53.10	Identify when a stop-work order should be used and its potential impact					A
53.11	Describe procedures for developing, reviewing, and reporting contractor past performance					
53.12	Identify the policies and procedures pertaining to transportation					
53.13	Describe what a Contract Deficiency Report (CDR) is and how to resolve a CDR in Electronic Document Access (EDA)					
53.14	Administer contracts by monitoring COR feedback, contractor performance, and enforcing contractor compliance with contract requirements					
53.15	Understand forward pricing rate agreements (FPRAs) for billing purposes and administer cost accounting standards to ensure contractor's compliance					A
53.16	Understand when and how to request a pre-award survey from DCMA					
54	Understand contractor performance assessments (contract administration) TR: FAR parts 42 and 46					
54.1	Identify the nature and purpose of contract administration					A

54.2	Identify the key personnel involved in the contract administration process					A
54.3	Identify the process of resolving a contract administration problem					A
54.4	Resolve contract performance problems by gathering facts, determining remedies, and initiating remedial actions in order to find and provide a solution					A
54.5	Identify which types of contract delays are compensable					A
54.6	Identify which types of contract delays are excusable					A
54.7	Identify which types of contract delays are neither excusable nor compensable					A
54.8	Identify the policies and procedures pertaining to contract quality requirements					A
54.9	Identify the policies and procedures pertaining to Government contract quality assurance					A
54.10	Describe the training requirements for Government Quality Assurance Personnel (i.e., CORs)					A
54.11	Identify the policies and procedures relating to acceptance					A
54.12	Identify the policies and procedures relating to warranties (e.g., determination for inclusion of warranty) TR: DFARS subpart 246.7					A
54.13	List remedies available for commercial and non-commercial contracts					A
54.14	Ensure past performance evaluation is initiated to ensure documentation of performance including contracting officer input					A
55	Understand what a modification is, when to execute a modification, and how to execute a modification TR: FAR parts 43, 48, 50, and 53					
55.1	Identify the general rules and guidance pertaining to contract modifications	X				A
55.2	Identify different types of modifications	X				A
55.3	Describe contract scope and authorities for modifications	X				A
55.4	Identify the policies and procedures pertaining to change orders (priced and unpriced)					A
55.5	Identify the policies and procedures for the use of option solicitation provisions and contract clauses					A
55.6	Identify the policies and procedures pertaining to the use of value engineering					A
55.7	Identify the value engineering contract clauses					A
55.8	Define terms particular to FAR subpart 50.1 (i.e., extraordinary contractual actions)					A
55.9	Identify the authority provided by Public Law 85-804 (Indemnification)					A
56	Understand the policies and procedures surrounding subcontracting TR: FAR part 44					
56.1	Identify the policies and procedures for consent to subcontracts or advanced notification of subcontracts, and review, evaluation, and approval of contractor's purchasing system					A
56.2	Describe when a subcontracting plan is required					

57	Understand the process of using Government property TR: FAR parts 45 and 51, and the DAU Guidebook for Contract Property Administration					
57.1	Identify the policies and procedures pertaining to the use of Government property (e.g., GFP, GFM, etc.)					B
57.2	Identify the policies and procedures pertaining to contractor use of Government sources					B
58	Understand the elements of a solicitation and when to amend it TR: FAR part 52					
58.1	Define solicitation	X				B
58.2	Identify the three types of solicitations	X				A
58.3	Identify the characteristics of a commercial solicitation	X				A
58.4	Identify the characteristics of a non-commercial solicitation					A
58.5	Identify when an amendment or cancellation to a solicitation is appropriate					A
58.6	Describe how provisions are prescribed and how to include them in a solicitation					A
59	Understand the different remedies the Government can use in different situations TR: FAR parts 49 and FAR section 12.403 (Commercial)					
59.1	Understand the general principles relating to the termination of contracts	X				A
59.2	Understand the principles pertaining to termination for convenience					A
59.3	Understand the principles pertaining to termination for default					A
59.4	Identify the requirements for terminating commercial contracts for cause or convenience					A
59.5	Identify the requirements for contract termination forms and formats					A
59.6	Identify the applicable delinquency notices relating to terminating contracts					A
59.7	Determine the adequacy and appropriate remedies for a termination for cause on a commercial contract					A
60	Identify the different forms for commercial and non-commercial actions TR: FAR part 53					
60.1	Describe the Uniform Contract Format and commercial contract formats	X				B
60.2	Understand the order of precedence for the Uniform Contract Format and the commercial contract order of precedence TR: FAR part 53 and 52.212-4					
60.3	Identify the forms used for contracts, modifications, and other contract-related events (e.g., SF1449, SF 1442, SF 26, SF 30, DD 254, etc.)					
61	Understand the Uniform Procurement Instrument Identification Numbering system TR: DFARS subpart 204.70					
61.1	Describe the Uniform Procurement Instrument Identification Numbering system	X				B
62	Understand the concept of Strategic Sourcing TR: AFPEO/CM Services Launchpad					

62.1	Identify the goals of strategic purchasing/sourcing					A
62.2	Describe what a supply chain is					A
62.3	Describe strategic sourcing 7- Step process					A
62.4	Identify where to access strategic sourcing contract vehicles and their guides for use					
62.5	Understand DAF Category Management program and category structure. TR: AFPEO/CM Services Launchpad					
63	Understand actions unique to sustainment contracting TR: Listed below					
63.1	Describe contracting for engineering services TR: FAR part 36 & DAFI 63-138					
63.2	Describe public/private partnerships TR: 10 USC 2464, 10 USC 2466 and DoDI 4151.21					
63.3	Describe contracting for aircraft repairs TR: FAR subpart 47.1 and DFARS subpart 217.71					
63.4	Describe contracting for programmed depot maintenance (PDM) TR: 10 USC 2460					
63.5	Describe the DoD Spare Parts Breakout Program TR: DFARS section 217.7506, and DAFI23-101_DAFGM2024-01					
63.6	Describe the 50/50 Government/contractor depot maintenance directive TR: 10 USC 2466					
63.7	Describe the core depot-level maintenance capability directive TR: 10 USC 2464					
63.8	Describe performance-based logistics TR: DAFPAM 63-128					
63.9	Describe working capital funds and their uses TR: 10 USC 2208					
64	Understand actions unique to systems contracting TR: Listed below					
64.1	Describe the role of configuration control boards (CCBs) TR: DoDI 5000.02					
65	Understand actions unique to R&D contracting TR: Listed below					
65.1	Describe Broad Agency Announcement (BAA) and Program Research and Development Announcement (PRDA) procedures TR: FAR section 35.016					
65.2	Describe Small Business Innovative Research (SBIR) procedures TR: 15 USC 638					
65.3	Describe Small Business Technology Transfer (STTR) procedures TR: 15 USC 638					

65.4	Describe Grants and Assistance instruments TR: DoDD 3210.6-R					
65.5	Describe Other Transactions (OTs) for prototypes TR: 10 USC 2371					
66	Understand the concept and execution of the Air Expeditionary Force (AEF) and the duties of CCOs in deployed environments TR: AFCCPERP					
66.1	Understand the current deployment tempo for AF Contracting personnel	X				B
66.2	Describe the concept of the Air Expeditionary Force and how it affects the contracting environment	X				B
66.3	Identify what is expected of the CCO in a deployed environment					B
66.4	Describe the impact contracting officers make in support of deployed operations	X				B
67	Understand Nonappropriated Funds (NAF) contracting TR: AFMAN 34-201, DAFMAN 64-119, AF 2209, AF 2640, AF 2641					
67.1	Describe servicing contracting office responsibilities					A
67.2	Describe NAF Custodian responsibilities and authorities					A
68	Understand the Federal budget process TR: DAFI 65-601 volumes 1, DoD 7000.14-R volume III chapter 6					
68.1	Describe the DoD and AF budget cycles					A
68.2	Describe the different situations in which the Anti-Deficiency Act, Misappropriations Act, and Bona Fide Need Rule apply					B
68.3	Summarize the roles of the Government's Branches in the budget process					B
69	Understand the different contract writing systems, their interfaces with other systems, and how to use them TR: Contract writing system User's Guide					
69.1	Describe the contract writing system and its purpose	X				B
69.2	Name some of the different types of contract writing systems used by the DAF					A
69.3	Prepare a solicitation in the contract writing system	X				2aB
69.4	Prepare a purchase order in the contract writing system	X				2aB
69.5	Describe the interfaces between the contract writing system and other systems (i.e., DEAMS, EDA, FPDS, and WAWF)					A
70	Understand the role of DCAA TR: https://www.dcaa.mil/, FAR subpart 42.1					
70.1	Describe DCAA's organizational structure					A
70.2	Identify the different types of audits					A
70.3	Describe the role DCAA plays in contracting					A

71	Understand the DoD contractor's perspective in doing business with the Government TR: Professional experience					
71.1	Explain the relationship between a contractor and the Government contracting team	X				A
72	Understand Operational Contract Support (OCS) planning TR: Joint Publication (JP) 4-10					
72.1	Prior to assignment in a joint environment, complete the Joint OCS Planning and Execution Course (JOPEC)					
72.2	Read/understand Joint Publication (JP) 4-10 OCS					
72.3	Understand what JCASO is and their role in OSC					
72.4	Understand the concept of Lead Service for Contracting (LSC)					
72.5	Understand the concept of Lead Service for Contract Coordination (LSCC)					
72.6	Understand the roles of the Operational Contract Support Integration Cell (OSCIC)					
72.7	Complete the NATO Contracting Course					
72.8	Understanding NATO, the NATO Support Agency (NSPA), and Operational Logistics Support Partnership (OLSP)					
72.9	Understand plans and planning (OPORDS, PLANORDS, CONOPS, EXORDS)					
72.10	Learn how to write Master Scenario Event List (MSEL) and how to write injects					
72.11	Understand how to manage Synchronized Pre-Deployment Operational Tracker (SPOT) and Joint Asset Material Management System (JAMMS)					
72.12	Develop and update OCS-related command guidance, instructions, and policy					
72.13	Adjudicate contract support among Service components when planning and conducting active operations to ensure a fair share of available contracting capability					
72.14	Manage and develop agendas for periodic command logistics procurement support boards (CLPSB)					
72.15	Participate in component Joint Acquisition Review Boards (JARB) as an observer and subject matter expert					
72.16	Maintain the common operating picture of contracting activity within the staff, component, interagency, international organization, and non-Governmental organization areas of responsibility					
72.17	Assist offices of security cooperation and security cooperation office defense attaches (SCO/DAT) in the development of contract requirements and the tasking of contracting support activities to meet those requirements					
72.18	Ensure OCS is included in headquarters and component exercise scenarios and story lines, and document exercise mission scenario events					
72.19	Provide OCS-related training and staff assistance (statements of work, independent cost estimates, etc.) to HQ staff and components					
72.20	Engage with JCASO for additional technical and operational support to potentially stand up the JTSCC or lead Service for contracting					

72.21	Represent CCDR in Joint Staff J4, OSD (DPC and ADUSD-PS), and interagency OCS related coordination and forums					
72.22	Coordinate with Department of State representatives to mitigate contracting issues that involve embassy support of DoD personnel and DoD programs					
72.23	Understand, and in some cases coordinate, the use of acquisition cross-Service agreements as an alternative to contracting					
72.24	Monitor ongoing humanitarian assistance construction project coordination involving the engineer and logistics staff activities, and assist with the designation of component support for projects and compliance with completion schedule					
72.25	Understand joint plan development and the review cycle, including component supporting plan development, CCDR plan development, and JCS review and approval					
72.26	Understand military campaign planning and execution as it passes through progressive stages of operations					
73	Understand the importance of performance appraisals/reports and employee incentives					
73.1	Define the importance of performance appraisals/reports and how they are linked to promotions for officers, enlisted, and civilians					B
73.2	Describe the role of the supervisor in the performance appraisal/report process					B
73.3	Explain the AF required feedback timeframes for officers, enlisted, and civilians					B
74	Understand the availability and utility of productivity enhancing tools TR: Listed below					
74.1	Understand how to use Microsoft Outlook (e.g., email, tasks, calendar, contacts, out of office replies, encryption, distro lists, etc.) TR: https://usaf.percipio.com/search?q=microsoft					
74.2	Understand how to use Microsoft Excel (e.g., basic formulas, creating charts, freeze panes, autofill functions, headers/footers, sort/filter data, conditional formatting, creating drop-down lists, VLOOKUP function, PivotTables, slicers, password protection, macros, etc.) TR: https://usaf.percipio.com/search?q=microsoft					
74.3	Understand how to use Microsoft Word (e.g., track changes, custom margins, creating table of contents, headers/footers, page numbers, mail merge, macros, etc.) TR: https://usaf.percipio.com/search?q=microsoft					
74.4	Understand how to use Microsoft PowerPoint (e.g., applying themes, backgrounds, cropping pictures, using bullets/indentation, slide transitions, headers/footers, slide numbers, flow charts, organizational charts, etc.) TR: https://usaf.percipio.com/search?q=microsoft					
74.5	Understand how to access various research/knowledge tools (i.e., AF Library, AF Learning Center, DAU ACC, DAU Acq Now, DAFFARS Library, Policy sites, Acquisition.gov, DAF Tactics, Techniques and Procedures, AF Contracting Central, etc. etc.)					
75	Unit specific tasks/competencies may be added here.
