CAREER FIELD EDUCATION AND TRAINING PLAN CAREER ENLISTED AVIATORS AFSC CEA

PART I

Preface

1. This Career Field Education and Training Plan is a comprehensive education and training document that identifies life-cycle education/training requirements, training support resources and minimum core task requirements for this specialty. The CFETP provides personnel a clear career path to success and instills rigor in all aspects of career field training. At unit level, supervisors and instructors use Part II to identify, plan, and conduct training commensurate with the overall goals of this plan.

2. The CFETP consists of two parts and six attachments:

2.1. Part I provides information necessary for the overall management of the CEA career field and is divided into four sections. Section A - General Information; Section B - Career Progression Information; Section C - Skill Level Training Requirements; Section D – Resource Constraints; some examples are funds, workforce equipment, and facilities. *Note:* The *Air Force Enlisted Classification Directory* (AFECD) and *AFMAN 36-2100 Military Utilization and Classification contain the specialty descriptions.*

2.2. Part II includes information regarding training requirements and is divided into six sections. Section A- identifies the Specialty Training Standard (STS) and includes duties, tasks, technical references to support training, AETC conducted training, and correspondence course requirements. Section B- contains the course objective list and training standards supervisors will use to determine if Airmen satisfy training requirements. Section C identifies available training support materials. Section D- identifies a training course index that is used to determine resources available to support training. Included here are both mandatory and optional courses. Sections E and F identify MAJCOM unique training resource requirements. **Attachment 1** of the CFETP defines the qualitative requirements for successful completion of Undergraduate Flying Training. **Attachments 2 through 6** list all training line items required for CEAs to be awarded a 3-skill level.

2.3. Figure 1 provides a visual depiction of the CEA career field path. This chart provides a timeline for achieving additional qualifications such as instructor, evaluator, and Formal Training Unit (FTU) assignment. Lastly, the chart identifies leadership opportunities within the squadron, group, wing, MAJCOM, and HQ/USAF.

ABBREVIATIONS/TERMS EXPLAINED

Note: The abbreviations and terms below have been identified as commonly used within all Career Enlisted Aviator specialties.

Advanced Instructor Course (AIC). A formal instructor course to provide advanced academic, simulator, and flight training with a focus on building and developing tactical, technical, and instructional expertise. The overall vision is to generate elite tacticians to develop instructional methodology, codify technical expertise, and establish instructional continuity within the specialty.

Air Force Career Field Manager (AFCFM). Representative appointed by the respective HQ USAF Deputy Chief of Staff or Under Secretariat, to ensure assigned AF specialties are trained and utilized to support AF mission requirements.

Air Force Force Generation (AFFORGEN). A 24-month cycle composed of four, six-month readiness phases that ensure a sustainable force offering of Airmen and airpower to the Joint Force. The four AFFORGEN phases align with the Joint Staff's three phase model. AFFORGEN phases are: Available to Commit, Reset, Prepare, and Certify.

Air Force Form 8/8A (AF Form 8/8A) ***Certificate of Aircrew Qualification*****.** The source document to record the aircrew evaluation and verify the qualification of an aircrew member. The AF Form 8/8A is used to record aircrew maintaining qualification in a single aircraft. The AF Form 8/8A is used to record aircrew maintaining universal or multiple qualifications IAW 11-202V2, *Aircrew Standardization and Evaluation Program.*

Air Force Specialty Code (AFSC). An alphanumeric combination used to identify an Air Force Specialty (AFS). Officer AFSCs consists of four characters and/or digits. Airmen AFSCs consist of five characters and/or digits. When more specific identification of position requirements and individual qualifications is needed, alpha prefixes and suffixes are used with the numerical codes.

Air Reserve Component (ARC). Air National Guard and Air Force Reserve units.

Aircrew Graduate Evaluation Program (AGEP). A survey completed by FTU graduates and conducted in accordance with AETCI 36-2621, *Flying Training Course Publications Development*. Feedback gathered through the AGEP is used to ensure AETC formal flying training course graduates meet customer requirements. The AGEP goal is to provide training program managers and senior leaders a comprehensive assessment of training effectiveness and areas of improvement.

Aircrew Training System (ATS). A system wherein a civilian contractor provides academic, simulator and other designated aircrew training methods. ATS courses are listed in the applicable AFMAN 11-2 MDS-Specific, Volume 1 or the Education and Training Course Announcement (ETCA) website (https://etca.randolph.af.mil).

Airman Leadership School (ALS). ALS is a resident Community College Air Force (CCAF)-affiliated program that consists of 192 curriculum hours. The curriculum prepares Senior Airmen and Guardians to be professional, war-fighting Airmen and Space Professionals who can supervise and lead work teams as an all-domain joint warfighting professional to support the employment of an Air and Space power.

Basic Aircraft Qualification (BAQ). Applies to an aircrew member who has satisfactorily completed IQT and is qualified to perform aircrew duties in the unit aircraft. The member must perform at the minimum frequency necessary to meet the most recent sortie and flight standards set for that weapon system in the applicable AFMAN 112MDS Volume 1.

Basic Military Training (BMT). Training provided to non-prior service (NPS) Airmen to affect an orderly transition from civilian to military life.

Basic Mission Capable (BMC). An aircrew member who has satisfactorily completed IQT and MQT, is qualified in some aspect of the unit mission, but does not maintain MR/CMR status. The aircrew member must be able to attain full qualification to meet operational taskings within 30 days, or in accordance with the applicable AFMAN 11-2MDS Volume 1.

Career Enlisted Aviator (CEA). An enlisted aircrew member that is highly trained to conduct various roles and capabilities in support of USAF and joint multi-domain mission sets. A CEA maintains requirements to possess any of the 1A1XX specialties.

Career Enlisted Aviator Center of Excellence (CoE). Located at Joint Base San Antonio-Lackland, TX and

provides aircrew candidates basic aviation skills and training to prepare Airmen for IQT at formal training units.

Career Enlisted Aviator Fundamentals Course (CEAFC). An enlisted undergraduate flying training course which prepares enlisted personnel for a career in aviation. The knowledge presented in the course includes physiological, survival, aircrew mission, anti-hijacking and anti-terrorism, aircrew coordination, aircrew training, basic aerodynamics, aircraft publications, safety, and flight medicine. This course screens for the ability to handle the rigor of aircrew duties prior to entering costly follow-on training.

Career Enlisted Aviator Senior Leader Course (CEASLC). A course that proactively prepares TSgt and MSgt CEAs for future roles as Operations Superintendents and Squadron SELs. This course focuses on transitioning NCOs and SNCOs into operational leaders with an understanding of strategic aircrew management. CEASLC covers the unique attributes of effectively managing CEAs and prepares airmen for operational leadership roles at, and above, the squadron level. Course content is presented in a guided group discussion format for all 1A/1U AFSCs on Operational and Strategic Competencies, Strategic Structure, Force Management and Career Field Mapping.

Career Enlisted Aviator Staff Course (CEASC). A course that prepares SNCOs selected for duties in Key Development and Key Leadership Positions at the NAF, MAJCOM, AFPC, or HAF. Course material is focused on strategic level aircrew management programming and executive level communication.

Career Field Education and Training Plan (CFETP). A CFETP is a comprehensive core training document that identifies life-cycle education and training requirements. It also provides training support resources and minimum core task requirements for a specialty, aims to provide personnel a clear career path and instill a sense of industry in career field training.

Chief Master Sergeant Leadership Course (CLC). CLC, located on Maxwell-Gunter AFB, AL, is a resident program that consists of 80 classroom hours. The CLC is designed to prepare Chiefs for their initial CMSgt roles and responsibilities, primarily targeting Chiefs serving at the squadron level. This course provides Chief Master Sergeants the education to bridge strategic vision into tactical execution. Throughout the program, the CLC emphasizes critical thinking and an enterprise-level view in order to educate, inspire, and develop Chief Master Sergeants who effectively lead, manage, and mentor lethal and ready organizations. Chiefs will attend the CLC within two years of receiving their promotion line number. Chiefs will continue to build on foundational leadership competencies invaluable to fly, fight, and win across the full-spectrum of conflict and all domains of military power.

Combat Mission Ready (CMR). An aircrew member who has satisfactorily completed IQT, MQT, and maintains qualification and proficiency in the command or unit combat mission.

Community College of the Air Force (CCAF) Academic Programs. Airmen are automatically enrolled in CCAF upon completion of basic military training. CCAF provides the opportunity to obtain an Associate in Applied Science (AAS) Degree.

Continuation Training (CT). The continuation training program provides crew members with the volume, frequency, and mix of training necessary to maintain proficiency in the assigned certification/qualification level.

Core Task. A task identified by the AFCFM as a minimum qualification requirement within an AFS or duty position. Core Tasks for the AFS can be either task or knowledge-based and are the STS line items fundamental to meeting these core competencies. Each MAJCOM is responsible for developing the minimum standard to which each core task will be trained. Core skills (or knowledge) must be trained, maintained, and certified, regardless of duty position/location and are based upon skill level.

Course Objective Lists (COL). A publication derived from the initial and advanced skills course training standard (CTS), identifying the tasks and knowledge requirements, and respective standards provided to achieve a 3-, 5-, or 7- skill level in this career field. Supervisors use the COL to assist in conducting graduate evaluations.

Course Training Standard (CTS). A training standard identifying the training members will receive in a specific course.

Crew Resource Management (CRM). The effective use of all available resources—people, weapon systems, facilities and equipment, and the environment by individuals or crews to accomplish an assigned mission or task safely and efficiently. The term “CRM” will be used to refer to the training program, objectives, and key skills directed to this end.

Enlisted Joint Professional Military Education I (EJPME I). This certificate course is designed to help educate

and prepare enlisted leaders assigned to joint organizations or those going to joint assignments. Upon completion of the course, students will be better prepared to: operate or work in a joint environment or organization; lead members of multiple Services; and contribute to joint mission success.

Enlisted Joint Professional Military Education II (EJPME II). This certificate course is designed to build upon the material presented in the EJPME I course. This certificate course is designed to educate and prepare enlisted leaders assigned to joint organizations to successfully support activities; lead members of multiple Services; and better understand operating in a joint environment.

Enlisted Undergraduate Flying Training (E-UFT). A formal school course that results in the award of a 3-skill level AFSC. CEA Initial Skills Training consists of Undergraduate Flying Training (CEAFC and SERE), Graduate Flying Training (also referred to as IQT) in a specific MDS aircraft and an AF Form 8/8A, Certificate of Aircrew Qualification to earn the award of a 3-skill level AFSC.

Evaluator Aircrew member. A highly qualified and experienced instructor qualified in a particular crew position that is selected and designated in writing by the SQ/CC or OG/CC to administer flight evaluations to CEAs in that crew position.

Exportable Training (ET). Additional training via computer, paper, interactive video, or other necessary means to supplement training.

Formal Training Unit (FTU). A unit whose principal mission is to conduct IQT in accordance with a MAJCOM certified syllabus that result in a crew position qualification in a MDS aircraft.

Initial Qualification Training (IQT). Graduate Flying Training required to qualify aircrew for basic aircrew duties in an assigned crew position for a specific aircraft, without regard for the unit's operational mission (Example: C-130J Loadmaster). IQT also occurs during the upgrade training process (Example: Instructor upgrade qualification). It is designed to provide the performance skill/knowledge training required to perform a MDS mission or act in a higher qualification.

Instructional System Development (ISD). A deliberate, orderly, but flexible process for planning, developing, validating, implementing, and reviewing instructional programs. Ensures personnel are provided the skills necessary for successful job performance, with fiscal responsibility in mind.

Instructor Aircrew (IXX). A crewmember trained and authorized to instruct other CEAs in crew position(s) for which they are certified/qualified.

Junior Enlisted Foundations Course 300 (JEFC300). JEFC300 bridges the gap between tech school and Airman Leadership School. The course provides students with the foundational skills and knowledge needed to conform to standards, customs and courtesies, and offers guidance to help enhance the students' focus on becoming highly efficient career field and 5-skill level agents. The JEFC300 empowers Airman to reflect on their behaviors in relation to the Airmen Leadership Qualities. It facilitates the journey to developing supervisory and leadership skills, developing the competency of leading individuals and teams, and understanding the guardrails and guidelines of supervision.

Lead Command. A MAJCOM is responsible for an assigned weapons system. Lead Commands establish advocacy for designated weapon systems during their life cycle and clarify responsibilities for all using and supporting organizations. They provide primary input into the purpose of developing and maintaining a force structure with a balance of complementary capabilities.

Major Command (MAJCOM) Functional Manager (MFM). Primary focal point and liaison between the MAJCOM/NAF/DRU and HQ USAF on all matters relating to the aircrew career fields and aviation resource management within the command. This includes, but is not limited to, responsibility for the aircrew training programs, coordination on aircrew resource allocations, and managing education, training, and resources for a specific career field(s) for their organization. A Functional Manager's scope may include all CEAs within a MAJCOM/NAF/DRU, MWS, or MDS.

Major Weapons Systems (MWS). Several like Mission Design Series (MDS) comprise a Major Weapons System (MWS) category (e.g., the bomber MWS is comprised of the B-1, B-2, and B-52 MDSs).

Mission Design Series (MDS). A term used to identify a specific aircraft designation. (Example: UH-1N)

Mission Qualification Training (MQT). Training required to qualify crewmembers in an assigned crew position for a specific MDS to perform the command or unit mission. MQT often results in a CMR or MR certification/status. CEAs are awarded a 5-skill level upon completion of MQT.

Mission Ready (MR). An aircrew member who has satisfactorily completed IQT, MQT, and maintains qualification and proficiency in the command or unit operational mission.

Noncommissioned Officer Academy (NCOA). The NCOA course is a resident Community College of the Air Force (CCAF) affiliated course that consists of 196 hours of classroom instruction delivered over 25 academic days. The overall goals of NCOA are to develop the leadership capability of NCOs with relevant and solution-focused leadership attributes to successfully lead teams, strengthen their organizations culture, solve problems collaboratively, and expand their understanding of the Air Force's role in joint operations to achieve national strategic objectives. The NCOA meets these goals by providing the best academic program possible through the delivery of outcome-based objectives related to the curriculum areas of Team Leadership, Joint Warfighting, and Strategic Thinking. A self-study version of the NCOA program is available through Air University's Global College of PME to facilitate EPME completion for Air National Guard and Air Force Reserves members for whom resident attendance may not be possible.

Noncommissioned Officer Foundations Course 500 (NCOFC500). NCOFC500 replaces the base level NCO Professional Enhancement Seminar and will be a prerequisite for the Noncommissioned Officer Academy. The course provides students with the skills and knowledge needed to lead by setting the example. It also enhances the students' capacity to continually advance factors that shape organizational culture, offer guidance that empowers students to reflect on their behaviors in relation to the Airmen Leadership Qualities and facilitate students' comprehension of techniques that contribute to establishing robust networks. The NCOF500 assists students in grasping the connection between attention to detail, establishing impactful communication and fostering a culture of trust. It promotes the realization that asking the appropriate questions involves understanding how to utilize the answers effectively.

Operational Flying Duty Accumulator (OFDA). Aggregate months of flying duty performed under competent orders while serving in assignments in which flying skills are maintained in the performance of assigned duties.

Resource Constraints. Resource deficiencies, such as money, facilities, time, workforce, and equipment that preclude desired training from being accomplished.

Retraining. An Air Force objective to balance the career force of each AFSC as needed. The retraining program allows individual airmen a choice of career fields from which to pursue an Air Force career and provides a method to return Airmen disqualified from their current AFSC to a productive status.

Senior Noncommissioned Officer Academy (SNCOA). SNCOA provides professional military education to prepare SNCOs to strengthen organizational leadership strategies and leverage national, military and airpower strategies. Additionally, SNCOs will understand strategic competition and how integrated deterrence is important to national security. SNCOA is 195 hours of guided discussion, experiential exercises, individual and group research, formal lecture and concludes with a wargame scenario. The course deliberately prepares and advances SNCOs to think critically & strategically and be relevant in their operating environment. Students who complete this course are prepared for increased leadership responsibility in the joint, combined and interagency operating environment.

Senior Noncommissioned Officer Foundations Course 700 (SNCOFC700). SNCOFC700 replaces the base level SNCO Professional Enhancement Seminar and will be a prerequisite for the Senior Noncommissioned Officer Academy. The course provides students with the foundational skills and knowledge needed to develop, advise, and lead teams successfully, and facilitates technical expertise for transitioning from first-line supervisors and trainers to leaders of teams. The SNCOFC700 assists students in engaging in strategic leadership at the 9-skill level, offering a rich arsenal of influence tactics for changing people's viewpoints and behaviors. It assists students in learning how to build and maintain social relationships to maximize their informal power and influence in an organization. The course goes beyond managing into a proactive stance that will take the organization forward.

Specialty Training Standard (STS). An AF publication that describes an AFSC in terms of tasks and knowledge an airman in that specialty may be expected to perform or to know on the job. It further serves as a contract between AETC and the functional user to show which of the overall training requirements for an AFSC are taught in formal schools and correspondence courses.

Standard. An exact value, a physical entity, or abstract concept, that the appropriate authority, custom, or common consent sets up and defines to serve as a reference, model, or rule in measuring quantities or qualities, developing practices or procedures, or evaluating results. A fixed quantity or quality.

Subject Matter Expert (SME). An individual qualified in a particular specialty and who is consulted with their subject matter expertise or knowledge of the specialty.

Survival, Evasion, Resistance, and Escape Training (SERE). Conducts preparedness training as part of a supporting or supported force to survey areas for evasion, recovery corridors, contact sites, potential cache site establishment, areas of interest and physical infrastructure.

Syllabus. Published outline of training required to achieve the proficiency specified in the course training standards for a specific course. It prescribes the course content, instructions to conduct the training, and the approximate time necessary to successfully complete all requirements. A formal syllabus may be published to include IQT, MQT, CT, and other aircrew training as determined by the training command, MAJCOM, or unit. (Formal and standardized syllabus are used primarily in AETC formal or developed courses.)

Total Force (TF). All collective Air Force components (active duty, reserve, guard, and civilian elements) of the United States Air Force.

Unit Type Code (UTC). Compose the basic building blocks used in joint force planning and force packaging methodology. UTCs may contain both manpower and equipment details, only manpower force elements, or required equipment only. Air Force planners use UTCs to document total personnel and logistics requirements needed to support operational planning and execution activities. (See AFFORGEN)

Unqualified [Crew Position] (UXX). Students in upgrade training for the duties of a specific crew position and must be supervised by an instructor.

Upgrade Training (UGT). Mandatory training that leads to attainment of a higher qualification or certification.

Utilization and Training Workshop (U&TW). A forum consisting of the AFCFM, MFMs, SMEs, and AETC training personnel who determine career field training requirements.

Weapons System Training Package (WSTP). An instructional course that includes IQT, MQT, and CT designed for use at the unit to qualify or aid qualification in a duty position, program, or on a piece of equipment. The WSTP may be printed, computer based, flying, simulator, or other audiovisual material.

SECTION A - General Information

1. Purpose

This CFETP provides information necessary for the AFCFM, MFMs, commanders, training managers, supervisors, and instructors to plan, develop, manage, and conduct an effective and efficient career field training program. This plan outlines training CEAs must receive to develop and progress throughout their aviation career. For the purpose of this CFETP, training is divided into three areas: E-UFT, IQT, and MQT. The E-UFT phase is the AFS specific training a CEA candidate receives via the Enlisted Training Model upon entry into the Air Force or upon retraining into the CEA career field. The CEA CoE and, as required, the 558th Flying Training Squadron (FTS), are the E-UFT segments for all TF CEA candidates in the AFS awarding process; all training thereafter is considered graduate level training. SERE training is normally completed prior to IQT. CEAs may postpone SERE training until MQT; however, if required, it is a prerequisite for attaining MR/CMR certification. After E-UFT, CEAs attend IQT culminating with a successful AF Form 8/8A and award of a 3-skill level. Finally, CEAs enter the MQT phase, that may also culminate in an additional AF Form 8/8A and unit commander certification, award of the 5-skill level, and designated as MR/CMR. MQT can be completed in conjunction with an IQT syllabus at a FTU or within their assigned operational unit. The award of a 7-skill level is automatically awarded when assigned to a Unit Manning Document in a 7-level position or IAW grade requirements (unless previously qualified 7-level in another CEA specialty) and the 9-skill level after promotion to SMSgt. **Note:** The conventional On-the-Job Training (OJT), UGT, and CT construct does not apply to the CEA career field.

The CFETP has several purposes:

1.1. Serves as a management tool to plan, manage, conduct, and evaluate a career field training program.

1.2. Identifies task and knowledge training requirements and recommends education and training for each skill level and phase of an individual's career in the AFS.

1.3. Lists training courses available in the specialty, identifies sources of training, and the training medium.

1.4. Identifies major resource constraints that impact full implementation of the desired career field training program.

2. Uses

The CFETP will be used by MFMs and supervisors at all levels to ensure comprehensive and cohesive training programs are available and/or instituted for all Airmen in the specialty.

2.1. AETC training personnel will develop and revise formal resident, non-resident, field, and ET based on requirements established by the user and documented in Part II of the CFETP. The lead command MFM will coordinate with the AFCFM to develop acquisition strategies for obtaining resources needed to provide the identified training.

2.2. MFMs will ensure their flight training programs compliment the CFETP, mandatory E-UFT, IQT, and MQT requirements. MAJCOM-developed training to support the AFSC must be identified for inclusion in this plan and must not duplicate available training resources.

2.3. All CEA Airmen will complete mandatory training requirements specified in this plan. The list of courses in Part II will be used as a reference to support training.

2.4. Personnel serving as CEAs are exempt from maintaining OJT, DAF Form 623, *Individual Training Record Folder.* Training is documented IAW AFMAN 11-202V1, *Aircrew Training*, AFMAN 11-2MDSV1 (*Aircrew Training, MDS specific*), IQT syllabi, or other weapons system training guidance. AF Form 8/8A certifies an Aircrew Qualification and flight evaluations are administered by flight examiners. Qualification on the AF Form 8/8A eliminates the requirement to document STS items in this CFETP.

3. Coordination and Approval

The AFCFM is the approval authority. MFMs and AETC training managers will identify and coordinate on the career field training requirements. The AFCFM will initiate an annual review of this document and coordinate with AETC and MFMs to ensure currency and accuracy. Training managers will send applicable inputs/changes to CEA MFMs via CRM when initiated annually. CEA MFMs will then consider inputs/changes to be routed to HQ USAF/A3TS at AF.A3.TS@us.af.mil when requested.

SECTION B - Career Progression and Information

4. Specialty Descriptions This information supplements the AFECD. AFSC specific descriptions can be found in the AFECD. Duties and Responsibilities:

4.1 1A1X2 Mobility Force Aviator (MFA) MFAs are experts in conducting inter and intra-theater airlifts of personnel and materiel, as well as planning and executing theater air refueling for fixed-wing aircraft as Loadmasters, Flight Engineers and Boom Operators, specializing in Rapid Global Mobility and Global Reach mission execution. Additionally, MFAs conduct ground refueling operations, serve as refuel panel operators, refueling supervisors, and concurrent servicing supervisors. Their primary role during mission planning involves calculating Takeoff and Landing Data (TOLD) to ensure safe and optimal aircraft performance at departure and arrival airfields. They are also responsible for determining aircraft climb, cruise, and descent performance parameters, while frequently accounting for factors, such as operation from unprepared surfaces, inclement weather, and obstacle avoidance. MFAs may also be responsible for cargo/passenger loading and unloading activities, computes aircraft weight and balance, and performs aircrew functions and other mission specific qualification duties to include the airdrop of personnel and equipment/cargo. During pre-flight and post-flight inspections, MFAs ensure the adequacy of cargo documentation, execute normal and emergency procedure checklists, and operate and monitor engine, hydraulic, fuel, pneumatic, and other aircraft systems controls throughout all phases of ground and flight operations, performing in-flight refueling aircrew functions and activities according to flight manuals, checklists, and United States Air Force publications. MFAs execute a wide range of critical tasks, including combat offloads, airdrop operations, Forward Arming and Refueling Point (FARP) support, tactical NVG (Night Vision Goggles) low-level flight, and air refueling. Their duties include, but are not limited to, the coordination of post-mission aircraft maintenance and servicing requirements during enroute stops and upon returning to the home station.

4.2 1A1X3 Special Mission Aviator (SMA) Special Mission Aviators (SMA) are tasked with a diverse array of responsibilities across various aircraft types, including fixed-wing, rotary-wing, and tilt-rotor encompassing Special Operations, Close Air Support, Combat Search and Rescue, Personnel Recovery, Nuclear Security, and Domestic Security. They serve as Flight Engineers, Loadmasters, and Aerial Gunners. In potentially hostile environments, Special Mission Aviators (SMAs) execute a wide range of critical tasks, including combat offloads, airdrop operations, Forward Arming and Refueling Point (FARP) support, tactical NVG (Night Vision Goggles) low-level flight, air refueling, infiltration/exfiltration missions, alternate insertion/extractions, aerial gunnery, and respond to emergency procedures. Moreover, SMAs manage aircraft radios, operate communication equipment, and fulfill joint airdrop inspector duties, ensuring mission success across diverse operational situations. Their duties include, but are not limited to, conducting pre- and post-flight inspections, cargo and personnel on/offloading, monitoring aircraft systems, servicing aircraft in remote locations, and contributing significantly to mission planning efforts.

4.3 1A1X4 Multi-domain Operations Aviator (MOA) Multi-domain Operations Aviators (MOAs) specialize in electromagnetic spectrum operations (EMSO), airborne communications, datalinks, radar systems, and kinetic strikes, including terminal guidance of munitions, as systems operators and airborne network systems administrators on various Command, Control, Communications and Computers Intelligence, Surveillance and Reconnaissance (C4ISR) platforms. Serving as mission crewmembers on airborne platforms or remotely piloted aircraft (RPA), MOAs gather, record, display, and distribute mission information. They utilize airborne sensors to acquire, track, and monitor airborne, maritime, and ground objects to interpret computer-generated displays and alarms for safe mission execution. MOAs are responsible for the maintenance and operation of mission equipment, electronic attack (EA), and electronic protection (EP) equipment to optimize the performance of airborne and ground systems. MOAs quickly field, integrate and operationalize new airborne equipment and capabilities. Additionally, MOAs support other airborne and ground entities by distributing and relaying operational target and identification data. They monitor aircraft and weapons systems status to ensure efficient airpower application and respond to emergency procedures onboard aircraft when necessary. MOAs are experts in troubleshooting to repair airborne and ground-based systems to manage operating and maintenance functions. MOAs maintain operational inspection maintenance

records and documents while addressing infrequent equipment operation and in-flight maintenance issues. Their duties include, but are not limited to, pre-flight, in-flight, and post-flight operations, including operating, maintaining, repairing, and testing airborne communication systems, electro-optical sensor systems, and computer systems.

4.4 1A1X8 Executive Mission Aviator (EMA) EMAs are integral to safe and reliable executive airlift operations in support of military and civilian leaders, including the President, Vice President, Secretary of Defense, Chairman of the Joint Chief of Staff, First Lady, Congressional Delegations, and Combatant Commanders. Trained in diverse aircrew roles such as Flight Attendant, Flight Engineer, and Communication Systems Operator, EMAs undertake a spectrum of responsibilities crucial to flight operations. Their duties include, but are not limited to, executing mission planning and coordination of in-flight meals, passenger service, and comfort requirements, managing luggage and passenger loading, executing normal and emergency procedure checklists, operating and monitoring engine, hydraulic, fuel, and other aircraft systems throughout all phases of ground and flight operations as well as maintaining and operating voice and data communications networks onboard a variety of airborne platforms.

5. Training Decisions

The CFETP uses a building block approach (simple to complex) to encompass the entire spectrum of training requirements for the CEA specialty. This CFETP was developed to include life cycle (day one through retirement) training requirements for this specialty. The spectrum includes a strategy for when, where, and how to meet the training requirements. The strategy must be apparent and affordable to reduce duplication of training and eliminate a disjointed approach to training.

5.1. Enlisted Undergraduate Flying Training. Initial physiological training will be conducted at the CEAFC. The STS is used to align common core training across all 1A1XX/ Sub-IDs. Award of the 3-level will be earned by successful completion of IQT and initial AF Form 8/8A.

6. Community College of the Air Force (CCAF) Academic Programs

CCAF provides the opportunity to obtain an Associate in Applied Science (AAS) Degree. Enrollment in CCAF occurs upon completion of BMT. All CCAF accredited E-UFT courses award credit towards applicable AAS Degree to that specialty. See the CCAF General Catalog, located on the Air University website for program details regarding the AAS degree at: https://www.airuniversity.af.edu/Barnes/CCAF/. Additionally, see the Air Force Virtual Education Center website regarding AAS degree progress at: https://afvec.us.af.mil/afvec. In addition to its associate degree programs, CCAF offers the following certifications and degree opportunities:

6.1. CCAF Instructor Certification. The CCAF offers the CCAF Instructor Certification to qualified instructors who teach CCAF collegiate-level credit-awarding courses at a CCAF affiliated school. The CIC is a professional credential that recognizes the instructor's extensive faculty development training, education, and qualification required to teach a CCAF course. It also formally acknowledges the instructor's practical teaching experience. Qualified CCAF instructors who meet CIC Program requirements are eligible. Once instructors leave CCAF instructor duty, they are no longer eligible for the CIC program.

6.2. Instructor of Technology & Military Science Degree. This program is offered to enlisted members who are assigned to CCAF affiliated schools teaching CCAF degree-applicable courses. Applicants must complete three semester hours of CCAF-approved instructor methodology coursework and hold their career field related CCAF degree or equivalent civilian college degree before registration.

6.3. Trade Skill Certification. When a CCAF student separates or retires, a trade skill certification is awarded for the primary occupational specialty. The College uses a competency-based assessment process for trade skill certification at one of four proficiency levels: Apprentice, Journeyman, Craftsman/Supervisor, or Master Craftsman/Manager. All are transcribed on the CCAF transcript.

6.4. Degree Requirements. All Airmen are automatically entered into the CCAF program. Refer to the CCAF General Catalog for the applicable degree program that applies to your CEA specialty. Prior to completing an associate degree, the 5-skill level must be awarded and the following requirements in the CCAF General Catalog.

6.4.1. For current AFSC Sub–ID Degree Requirements, please visit the below link to read the CCAF General Catalog: https://www.airuniversity.af.edu/Portals/10/CCAF/documents/2022-2024_CCAF_General_Catalog- Change1.pdf

6.4.2. Additional off-duty education is a personal choice that is encouraged for all. Individuals desiring to become an Air Education and Training Command Instructor should be actively pursuing an associate degree. A degreed faculty is necessary to maintain accreditation through the Southern Association of Colleges and Schools.

6.5. Assignments. See Talent Marketplace for current list of CEA assignment locations.

6.5.1. Talent Marketplace https://myvector.us.af.mil/myvector/Talentmarketplace/Home.

6.5.2. Air Force Reserve: https://afmilpers.us.af.mil/RMVSNet40/SelectVacancies.aspx.

6.5.3. Air National Guard: https://intelshare.intelink.gov/sites/ngbhr/careers/SitePages/State-Unit%20Vacancies.aspx

7. Career Field Flow Charts

7.1. The flow outlined in Figure 1 and courses in Tables 2 through 10 represent the formal training courses required for personnel entering and becoming fully qualified in the CEA AFSC. A focus on experience and competency early in their careers will help CEAs chart and achieve many of their individual and professional Air Force career goals. Consequently, education, training and experience should complement one another to develop Airmen with theoretical and practical mastery of aviation management principles. The career path charts in Figure 1 and Tables 2 through 10 display CEA career progression with multiple paths and developmental opportunities within these specialties. The locations, course lengths, and titles are MDS dependent, and are subject to change. Changes will be updated in the Education Training Course Announcement (ETCA) by the course owner.

7.2. The course flow has been developed and agreed upon by the MFMs to minimize days students are awaiting training and to ensure survival training is typically completed prior to AFSC award—minimizing the impact of not having the prerequisites completed before entering weapons system training.

7.3. Personnel graduating from the E-UFT FTU Preparatory courses at the CEA CoE and the 558th FTS are awarded AFSC 1A11X and are temporarily authorized to wear the Basic Aircrew Member Badge. CEA candidates are not authorized to continue wear of the Airman Aircrew Badge if they fail to complete IQT or disqualified prior to 18 months of aviation service IAW AFMAN 11-402, *Aviation and Parachutist Service Aeronautical Ratings and Badges.*

Table 1. Enlisted Education and Training Path

Enlisted Education and Training Path								
Education and Training Requirements	**GRADE REQUIREMENTS / AVERAGES**							
	Rank	Earliest Sew-on	Air Force Average	MFA Average	SMA Average	EMA Average	MOA Average	High Year of Tenure (HYT)
Basic Military Training School (BMTS)								
Undergraduate Flying Training	Amn	6 months						
Graduate Flying Training (3-Skill Level) **Upgrade To Journeyman (5-Skill Level)**	A1C	10 months						
Completion of Mission Qualification Training or MR/CMR Status **Junior Enlisted Foundations Course 300 (JEFC300)**** **Airman Leadership School (ALS)*** - Resident graduation is a prerequisite for SSgt sew-on (RegAF Only)	SrA	28 months	3 years	3 years	3 years	3 years	3 years	10 years
Upgrade To Craftsman (7-Skill Level) - 12 months Fully Mission Qualified (6 months for retrainees)	SSgt	3 years	5.10 years	4.42 years	4.86 years	4.24 years	4.36 years	20 years
NCO Foundations Course 500 (NCOFC500)** **NCO Academy (NCOA)*** - Must be a TSgt or TSgt-select to attend (SSgts may attend if all class seats have not been filled) Resident graduation is a prerequisite for MSgt sew-on (RegAF Only)	TSgt	5 years	8.83 years	8.84 years	9.48 years	8.57 years	8.39 years	22 years
SNCO Foundations Course 700 (SNCOFC700)** **Senior NCO Academy (SNCOA)*** Must be a SMSgt, SMSgt select, or Non-selects to SMSgt across AFSCs	MSgt	8 years	13.82 years	14.42 years	14.22 years	14.12 years	14.28 years	24 years
Upgrade to Superintendent (9-Skill level) - Minimum rank of SMSgt	SMSgt	11 years	17.88 years	16.82 years	18.49 years	18.72 years	16.82 years	26 years
Chief Leadership Course (CLC) -Required for re-enlistment and development opportunities -Must be a CMSgt or CMSgt Select to attend - Completed SNCO Academy (RegAF Only)	CMSgt	14 years	21.00 years	20.12 years	20.36 years	21.25 years	19.88 years	30 years

*ARC personnel may satisfy EPME requirements via Distance Learning
**Will become prerequisite courses for EPME in FY25

Data reflects Promotion cycle 23E5-9. MFA averages include 1A0, 1A1, and 1A2. SMA averages include 1A2 and 1A9. EMA averages include 1A1, 1A3, and 1A6. MOA averages include 1A3 and 1U0.

SECTION C – Skill Level Training Requirements

8. Purpose

Skill level training requirements in this career field are defined in terms of task and knowledge requirements. This section outlines the specialty qualifications requirements for each skill level in broad, general terms and establishes the mandatory requirements for entry, award, and retention of each skill level. The specific task and knowledge training requirements are identified in the STS and the Course Objective List Part II, Section A and B of this CFETP.

9. Skill Level Training.

9.1. Apprentice 3-Level Training.

9.1.1. Specialty Qualification.

9.1.1.1. Knowledge. Knowledge requirements for awarding of the 3-skill level are satisfied by completing the CEAFC, the Sub-ID specific E-UFT course at the CEA CoE and/or the 558th FTS and completing MDS-specific IQT with a successful AF Form 8/8A.

9.1.1.2. Education. For entry into this specialty, completion of high school courses in science, technology, engineering, and mathematics are desirable.

9.1.1.3. Training. For award of the 1A13X, individuals must meet mandatory requirements listed in specialty description in AFECD. Completion of the CEAFC is mandatory for pipeline and non-prior aviation service cross training students. Completion of the necessary E-UFT courses at the CEA CoE and/or the 558th Flying Training Squadron and IQT with a successful AF Form 8/8A is mandatory for award of the 3-skill level AFSC.

9.1.1.3.1. Qualification for aviation service according to AFMAN 11-402.

9.1.1.3.2. Eligibility for a Secret security clearance minimum. Some specialties require eligibility for a Top-Secret security clearance according to AFMAN 16-1405, *Air Force Personnel Security Program.*

9.1.1.3.3. Completion of SERE and Water Survival Training Course(s) is mandatory for all CEAs performing in-flight duties.

9.1.1.4. Training Sources. Completion of an appropriate E-UFT course at the CEA CoE within the 344th Training Squadron satisfies the knowledge and training requirements specified in the specialty qualification section (above) for continued flight training. Completion of the first AF Form 8/8A awards the 3-skill level.

9.1.1.5. Implementation. Entry into training is accomplished by initial accessions from BMT or approved retraining from any AFSC. After graduation from E-UFT, IQT begins when the individual enters formal flight training. Thereafter, in-unit or formal upgrade training is initiated anytime an individual is assigned duties they are not qualified to perform.

9.2. Journeyman 5-Level Training.

9.2.1. Specialty Qualification. All qualifications for the 3-skill level apply to the 5-skill level requirements.

9.2.2. Knowledge. Knowledge requirements for awarding the 5-skill level are satisfied after completing MQT that results in commander's MR/CMR certification and or a successful Mission Qualification AF Form 8/8A, as required.

9.2.3. Education. To assume the rank of SSgt, the individual must be a graduate of ALS.

9.2.4. Training. The following training is mandatory for the award of the 5-skill level: Complete unit level MQT that results in MR/CMR certification and or a successful Mission Qualification AF Form 8/8A.

9.2.5. Experience. Qualification in and possession of a 3-skill level. In addition, the individual must complete requirements as listed in the applicable MAJCOM aircrew training directives, IQT with a successful AF Form 8/8A, and MQT.

9.2.6. Training Sources. Refer to Part II, Section D, Training Course Index.

9.2.7. Implementation. Entry into upgrade training is initiated when an individual possesses the 3-skill level. Qualification training is initiated anytime an individual is assigned duties they are not qualified to perform.

9.3. Craftsman 7-Level Training.

9.3.1. Specialty Qualification.

9.3.2. Knowledge. In addition to knowledge required for the 5-skill level and other qualifications as listed above an individual must possess the knowledge and skills necessary to supervise personnel.

9.3.3. Education. To assume the grades of SSgt and MSgt, individuals must be graduates of the ALS and NCOA, respectively. Reference DAFI 36-2670, *Total Force Development*.

9.3.4. Training. There is no requirement for in-residence 7-skill level training for all CEA career fields. However, minimum rank of SSgt and recommendation by the supervisor still apply.

9.3.5. Experience. Qualification in and possession of 5-skill level. Also, 12 months fully mission qualified.

9.3.6. Training Sources. Refer to Part II, Section D, Training Course Index.

9.4. Superintendent 9- Level Training.

9.4.1. Specialty Qualification

9.4.2. Knowledge. In addition to knowledge required for the 7-skill level qualification, an individual must possess advanced skills and knowledge of concepts and principles in the effective leadership of CEAs in multiple disciplines and management of assigned resources.

9.4.3. Education. Completion of SNCOA (RegAF – In-Residence, ARC – In-Residence or DL) commensurate with rank requirements. Additionally, award of the CCAF AAS degree or an associate degree or higher from a nationally or regionally accredited academic institution, if not already earned, is recommended.

9.4.4. Training. Must hold the rank of SMSgt and have supervisor's recommendation for award of the 9-skill level (RegAF only).

9.4.5. Experience. Qualification in and possession of a 7-skill level. Also, experience managing advanced operations and maintenance of aircraft mission systems.

Section D - Resource Constraints

10. Purpose

This section identifies known resource constraints that preclude optimal/desired training from being developed or conducted, including information such as cost and workforce. Narrative explanations of each resource constraint and an impact statement describing what effect each constraint has on training are included. Also included in this section are actions required, office of primary responsibility, and target completion dates. Resource constraints will be reviewed and updated at least annually.

11. Apprentice 3-Level Training

CEAs train and qualify on USAF MDS aircraft via IQT and MQT. IQT quotas are programmed via the Aircrew Training Distribution Requirements (ATDR) process outlined in DAFI 11-412, *Aircrew Management*. Rated officer production programming is accomplished using the ATDR process. ATDR is programmed two fiscal years prior to the year-of-execution as part of the Program Objective Memorandum (POM) and Future Years Defense Program (FYDP) build.

12. Journeyman 5-Level Training

CEAs train and certify as MR/CMR via a MQT program completed at the FTU or in their assigned operational unit. MQT throughput is determined by the USAF Flying Hour Program (FHP).

13. Craftsman 7-Level Training

There is no requirement for in-residence 7-skill level training for all CEA career fields. However, minimum rank of SSgt and recommendation by the supervisor still apply.

Director, Training and Readiness

PART II

SECTION A – Specialty Training Standards (STS)

1. Implementation

This STS will be used for technical training provided by AETC for classes beginning October 2024.

2. Purpose

As prescribed in DAFMAN 36-2689, *Enlisted Force* Development, and this STS.

2.1. List in column 1 (Task, Knowledge, and Technical Reference) the most common tasks, knowledge, and technical references (TR) necessary for airmen to perform duties at the 3-skill level AFSC in the CEA Specialty ladder of the Aircrew Operation Career Field. These are based on the analysis of the duties in AFECD.

2.2. Column 2 (Standard) shows formal training and correspondence course requirements as described in the ETCA website at: https://usaf.dps.mil/teams/app10-etca/SitePages/home.aspx?isdlg=1 and the career knowledge provided by the correspondence course. There are no Career Development Courses listed for this AFSC.

2.3. Qualitative requirements contained in Attachment 1 defines the proficiency code key used to indicate the level of training and knowledge provided by resident training and career development courses.

2.4. Utilized as a guide for development of promotion tests used in the Weighted Airmen Promotion System (WAPS). Specialty Knowledge Tests (SKTs) are developed at the USAF Occupational Measurement Squadron by SNCOs with extensive practical experience in their career fields. The tests sample knowledge of STS subject matter areas judged by test development team members to be most appropriate for promotion to higher grades. Questions are based on study references listed in the WAPS study catalog. Individual responsibilities are in AFMAN 36-2664, *Personnel Assessment Program*.

SECTION B – Course Objective List

3. Measurement

Each objective is indicated as follows: W indicates task or subject knowledge, which is measured using a written test, PC indicates required task performance which is measured with a performance check, and PC/W indicates separate measurement of both knowledge and performance elements using a written test and a performance progress check.

4. Standard

The minimum passing score on written examinations is 85% to match aircrew standards outlined in the 11-202V2 regarding periodic testing examinations. Standards of performance measurement are indicated in the objective and delineated on the individual progress checklist. Instructor assistance is provided and needed during the progress check, and students may be required to repeat all or part of the behavior until satisfactory performance is attained.

5. Proficiency Level

Most task performance is taught to the "1a" proficiency level which means the students can do simple parts of the task but needs to be told or shown how to do most of the task (extremely limited) or to a "2b" proficiency level which means the students can do most parts of the task but does need assistance on the hardest parts of the task (partially proficient). The student can also determine step-by-step procedures for doing the task.

6. Advanced Course Skills

Note: There are no advanced courses for CEAFC or FTU Preparatory Courses.

SECTION C – Support Material

7. Support Materials

Note: There are currently no support material requirements.

SECTION D – Training Course Index

8. Purpose

This section of the CFETP identifies training courses available for the specialty and shows how the courses are used by each MAJCOM in their career field training programs.

Table 2. MFA Air Force In-Residence Courses

COURSE NUMBER	COURSE TITLE	LOCATION
L3AQ1A112 01AA	Career Enlisted Aviator Fundamentals Course - Undergraduate Flying Training	JBSA-Lackland AFB, TX

SECTION E – MAJCOM Unique Requirements

1. Air National Guard (ANG)

1.1. Purpose. This section applies to all CEA assigned to ANG units.

1.2. Proficiency Training.

1.2.1.1. Upon completion of the IQT, ANG CEAs require a minimum number of training days to become MR/CMR and obtain operational proficiency as outlined in the most recent Ready Aircrew Program (RAP) Tasking Message/MDS Vol 1. The number of days required for a member to attain CMR may be adjusted accordingly by the ANG CEA CFM as required to meet all necessary requirements identified in the MDS Vol 1 and applicable AFIs/supplements.

Table 11. ANG MR Training Days

Sub-ID	Days
1A1X2G/H	250
1A1X2L	250
1A1X2C/D/N	250
1A1X3B/E/F	365
1A1X4F	365
1A1X8A	240

1.2.2. CMR, as defined in the RAP tasking message/MDS Vol 1, and proficiency training will include TDY travel to accomplish training when not available at home station.

1.2.2.1. ANG may hire Airmen who are not previously qualified CEAs into the EMA specialty upon CFM approval. Approval will be codified on a Memorandum of Agreement, authored by the ANG and must be renewed each fiscal year.

SECTION F – MAJCOM Unique Resource Requirements

NOTE: There are currently no MAJCOM unique resource requirements.

Attachment 1
Qualitative Requirements

THIS BLOCK FOR IDENTIFICATION PURPOSES ONLY		
NAME OF TRAINEE		
PRINTED NAME *(Last, First Middle Initial)*	INITIALS *(Written)*	SSAN
PRINTED NAME OF CERITFYING OFFICAL AND WRITTEN INITIALS		
N/I	N/I	
N/I	N/I	
N/I	N/I	
N/I	N/I	
N/I	N/I	
N/I	N/I	

QUALITATIVE REQUIREMENTS

PROFICIENCY CODE KEY		
	SCALE VALUE	DEFINITION: The Individual
TASK PERFORMANCE LEVELS	1	Can do simple parts of the task. Needs to be told or shown how to do most of the task. (EXTREMELY LIMITED)
	2	Can do most parts of the task. Needs help only on hardest parts. (PARTIALLY PROFICIENT)
	3	Can do all parts of the task. Needs only a spot check of completed work. (COMPETENT)
	4	Can do the complete task quickly and accurately. Can tell or show others how to do the task. (HIGHLY PROFICIENT)
**TASK KNOWLEDGE LEVELS	a	Can name parts, tools, and simple facts about the task. (NOMENCLATURE)
	b	Can determine step by step procedures for doing the task. (PROCEDURES)
	c	Can identify why and when the task must be done and why each step is needed. (OPERATING PRINCIPLES)
	d	Can predict, isolate, and resolve problems about the task. (ADVANCED THEORY)
***SUBJECT KNOWLEDGE LEVELS	A	Can identify basic facts and terms about the subject. (FACTS)
	B	Can identify relationship of basic facts and state general principles about the subject. (PRINCIPLES)
	C	Can analyze facts and principles and draw conclusions about the subject. (ANALYSIS)
	D	Can evaluate conditions and make proper decisions about the subject. (EVALUATION)

EXPLANATIONS

** A task knowledge scale value may be used alone or with a task performance scale value to define a level of knowledge for a specific task. (Examples: b and 1b)

*** A subject knowledge scale value is used alone to define a level of knowledge for a subject not directly related to any specific task, or for a subject common to several tasks.

- This mark is used alone instead of a scale value to show that no proficiency training is provided in the course.

x This mark is used alone in course columns to show that training is required but not given due to limitations in resources.

6.1	Weather	-
6.1.1	Atmosphere Principles	A
6.1.2	Physics Principles	A
6.1.3	Weather Report Interpretation	A
6.1.4	Extract Weather Report	2b
6.1.5	Interpret Weather Report	2b
6.1.6	Crew Resource Management related to Atmosphere and Weather	B
6.1.7	Weather Related Mishap and Safety Investigations	B
6.2	Navigation	-
6.2.1	NAVAID Identification and Principles	A
6.2.2	Extract Terminal and En-route NAVAID Information	2b
6.2.3	Interpret Terminal and En-route NAVAID Information	2b
6.2.4	Determine Position Orientation	2b
6.2.5	Terminal and En-route Procedures	A
6.2.6	Rendezvous Procedures	A
6.2.7	Determine Aircraft Position	2b
6.2.8	Determine Latitude / Longitude	2b
6.2.9	Extract General Navigation Information from Electronic Flight Bag (EFB)	2b
6.2.10	Interpret General Navigation Information from Electronic Flight Bag (EFB)	2b
6.3	Mission Planning	-
6.3.1	Mission Planning	A
6.3.2	Pre-Mission Briefings	A
6.3.3	Mission Responsibility	A
6.3.4	Mission Funds	A
6.3.5	Mission Forms	A
6.3.6	Complete Mission Forms	2b
6.3.7	Compute Resources Required for the Mission	2b
6.3.8	Perform Mission Planning	2b
6.3.9	Identify AFTO IMT 781 Series Forms	2b
7	**NETWORK OPERATIONS**	-
	References: 1X-XXX-1

Attachment 6
1A1X8- Executive Mission Aviator
Tasks, Knowledge, and Technical References

	Task	Standard
1	**AEROSPACE PHYSIOLOGY**	-
2	**CAREER ENLISTED AVIATOR 101**	-
3	**AIRCRAFT FUNDAMENTALS**	-
4	**WEIGHT & BALANCE/ TAKEOFF AND LANDING DATA (TOLD)**	-
5	**AIRFIELD OPERATIONS**	-
6	**MISSION PLANNING**	-
7	**NETWORK OPERATIONS**	-
8	**EXECUTIVE MISSION AVIATOR 101**	-
	References: CEA CFETP, AFH1, AFECD, AFMAN 11-2E-XXX V1, 1X-XXX-1, T.O. 1X-XXX-1-1, AFH 11-203 V1, ACP 121/125/131/135/167(J), T.O. 1C-XXX-1	
8.1	Executive Mission Aviator Information	-
8.1.1	Executive Mission Aviator Duties and Qualifications	A
8.2	Distinguished Visitor Aircraft	-
8.2.1	Aircraft Orientation	A
8.3	Computers	-
8.3.1	Computer Systems	B
8.3.2	Computer Networking	B
8.3.3	Perform Computer Networking/ Troubleshooting	2b
8.4	Communication Systems	-
8.4.1	Systems	B
8.4.2	Voice Tell	A
8.4.3	Effects of Weather	A
8.4.4	Anti-Jam Systems	A
8.4.5	Radio/ Telephone Procedures	A
8.4.6	Perform Standard Radio/ Telephone Procedures	2b
8.5	Electronics	-
8.5.1	Basic Electronics	A
8.5.2	Wave Propagation	A
8.5.3	Cooling Systems	A
9	**PASSENGER/ MEAL PROCEDURES**	-
	References: AFI 34-1201, DAFI 36-2903, AFMAN 11-2EA V3, Assorted Cookbooks, Assorted Culinary Textbooks, Assorted Online Culinary Resource Sites	
9.1	General Activities	-
9.1.1	Manners/Etiquette/Protocol	A
9.2	Meal Activities	-
9.2.1	Mission Menus	A
9.2.2	Prepare Mission Menus	2b
9.2.3	Create Menu Options	2b
9.2.4	Plan Menus According to Passenger Count	2b
9.2.5	Ensure Menus Correlate with Passenger Likes/Dislikes List	2b
9.2.6	Shopping Requirements	A
9.2.7	Requirements for Wet Ice/Dry Ice/Potable Water/Lavatory at each Ground Stop with Appropriate Agencies	A
9.2.8	Complete Pre-Mission Shopping Requirements	2b

9.2.9	Transportation for En-Route Meal Shopping Trips with Other Agencies	A
9.2.10	Passengers with Special Dietary Considerations	A
9.2.11	Acquire Food and Beverages During En-Route Shopping Trips	A
9.2.12	Meals	B
9.2.13	Prepare Meals	2b
9.2.14	Demonstrate Basic Culinary Skills	2b
9.2.15	Food Groups/Dietary Restrictions/Special Diets/Selecting Food Items	A
9.2.16	Food Safety/Sanitation	B
9.2.17	Demonstrate Food Safety and Sanitation	2b
9.2.18	Food Storage	A
9.2.19	Food Preservation Techniques	A
9.2.20	Pack Coolers/Gray Ghosts	2b
9.2.21	Prepare/Organize/Store Food In Accordance with Applicable Health/Safety Codes	2b
9.2.22	Label Food Items For Storage	2b
9.2.23	Inventory/Store Food/Fleet Items	2b
9.2.24	Perform Overnight Food Storage to Include Refrigeration and Freezing	2b
9.2.25	Galley Equipment	A
9.2.26	Operate Galley Equipment	2b
10	**MISSION PLANNING**	-
	References: T.O. 1C-XXX-1, Foreign Clearance Guide, AFMAN 11-2EA V3	
10.1	Mission Planning	-
10.1.1	Mission Responsibilities	A
10.1.2	Fleet Supplies	A
10.1.3	Manually Load all Mission required items	A
10.1.4	Coordinate Aircraft Loading with Supporting Agencies	2b
10.1.5	Acquire/Review Mission Itineraries	2b
10.1.6	Itinerary Changes with Aircraft Commanders (ACs)/Mission Contacts	2b
10.1.7	Conduct Pre-Mission Planning with Appropriate Agencies	A
10.1.8	Coordinate Pre-Mission Tasks with Crew	2b
10.1.9	Perform Advance Meal Preparations	2b
10.1.10	Assign/Delegate Tasks to Crew Members	2b
10.1.11	Catered Meals with Appropriate Agencies	A
10.1.12	Coordinate Wet/Dry Ice Acquisition En-route for Multi-Day RONs with Appropriate Agencies	A
10.1.13	Mission Expense Reports	A
10.2	Post Mission	-
10.2.1	Inventory Aircraft Supplies Post- Mission	2b
10.2.2	Perform End Of Mission Aircraft Fleet/Inventory	2b
10.2.3	Complete Post-Mission Debriefs	2b
10.2.4	Order/Replenish Fleet Supplies	2b
11	**EMERGENCY PROCEDURES**	-
	References: T.O. 1C-XXX-1, AFMAN 11-2EA V3	
11.1	Emergency Procedures & Safety	-
11.1.1	Perform Aircraft Inspection	2b
11.1.2	Secure Aircraft Cabin	2b
11.1.3	Basic First Aid Familiarization	A
11.1.4	Perform Announcements	2b
11.1.5	Emergency Procedures	2b
