4T0X1, MEDICAL LABORATORY SPECIALTY

CAREER FIELD
EDUCATION AND TRAINING PLAN

ACCESSIBILITY: Publications and forms are available on the e-Publishing website at www.e-publishing.af.mil for downloading or ordering.

RELEASABILITY: There are no releasability restrictions on this publication.

SUMMARY OF CHANGES: This is a complete revision that should be reviewed in its entirety. Major changes include the elimination of career development courses (CDCs) from this AFSC.

CAREER FIELD EDUCATION AND TRAINING PLAN
4T0X1 MEDICAL LABORATORY

PART I

Preface

1. This Career Field Education and Training Plan (CFETP) is a comprehensive education and training document that identifies life-cycle education and training requirements, training support resources, and minimum core task requirements for this specialty in accordance with DAFMAN 36-2689, *Training Program*. The CFETP will provide personnel a clear career path to success and will instill rigor in all aspects of career field training. **NOTE:** Civilians occupying associated positions will use Part II to support duty position qualification training.

2. The CFETP consists of two parts. Supervisors plan, manage, and control training within the specialty using both parts of the plan.

2.1. Part I provides information necessary for overall management of the specialty.

2.1.1. Section A – General information explains the purpose of the CFETP and how everyone will use the plan.

2.1.2. Section B – Career Progression and Information identifies career field progression information, duties and responsibilities, training strategies, and career field path.

2.1.3. Section C – Skill Level Training Requirements associates each skill level with specialty qualifications (knowledge, education, experience, training, and other).

2.1.4. Section D – Resource Constraints indicates resource constraints (if any). Some examples are funds, manpower, equipment, and/or facilities.

2.1.5. Section E – Transitional Training identifies transition training guide requirements (if any) for SSgt through MSgt.

2.2. Part II is used by supervisors and trainers at the unit level to identify, plan, and conduct training commensurate with the overall goals of this plan.

2.2.1. Section A – Specialty Training Standards identifies the Specialty Training Standard (STS). It includes duties, tasks, and Technical References (TRs) to support requirements for on-the-job training, Air Education and Training Command-conducted training, core tasks, wartime tasks, and if used, correspondence courses. At the end of each STS is a list of TRs.

2.2.2. Section B – Job Qualification Standards contains any Job Qualification Standard (JQS) tables when SEIs are identified.

2.2.3. Section C – Course Objective List contains information about the Course Objective List (COL) and training standards supervisors will use to determine if an Airman has satisfied training requirements.

2.2.4. Section D – Support Material identifies available support materials. An example is a Qualification Training Package (QTP) that may be developed to support proficiency training requirements.

2.2.5. Section E – Training Course Index identifies a training course index supervisors can use to determine resources available to support training. Included in this section are both

mandatory and optional courses.

2.2.6. Section F – MAJCOM Unique Requirements identifies Major Command (MAJCOM) unique training requirements supervisors can use to determine additional training required for the associated qualification needs. Training for Air Reserve Component (ARC) personnel are identified in this section.

2.2.7. Section G – Documentation of Training outlines the format and documentation required to maintain a MyTraining Record.

3. Using guidance provided in the CFETP will ensure individuals in this specialty receive effective and efficient training at the appropriate points in their career. This plan serves as a training tool to enable our Health Services Managers to accomplish current mission requirements in garrison and during contingency operations.

Abbreviations/Terms Explained

Air Education and Training Command (AETC). Conducts basic training for all Air Force (AF) enlisted personnel, produces skilled flying and ground personnel, and trains many of the world's military forces. Along with basic military and technical training, AETC provides other types of training, such as aircrew transitional, special, advanced, lateral, and survival training.

Air Force Career Field Manager (AFCFM). The Air Force focal point for the designated career field within a functional community. Serves as the primary advocate for the career field, addresses issues and coordinates concerns across functional communities. Responsible for developing, updating, and maintaining career field policies and regulations.

Air Force Job Qualification Standard/Command Job Qualification Standard (AFJQS/CJQS). A comprehensive task list describing a particular job type or duty position. Supervisors use these to document task qualifications. The tasks on AFJQS/CJQS are common to all persons serving in the described duty position.

Air Force Specialty (AFS). A group of occupations (with the same title and code) that require common qualifications.

Air Reserve Component (ARC). The Air Reserve Component consists of the Air Force Reserve and Air National Guard services.

Career Field Education and Training Plan (CFETP). The CFETP is the primary document used to identify life-cycle education and training requirements. It serves as a road map for career progression and outlines requirements that should be satisfied at appropriate points throughout the career path. The CFETP also specifies the mandatory task qualification requirements for award and maintenance of an AFSC. Deployment Unit Type Code task requirements can be identified with a symbol to assist commanders in prioritizing training. Use the CFETP to plan, conduct, evaluate, and document training. (See DAFMAN 36-2689).

Certification. A formal indication of an individual's ability to perform a task to required standards. Tasks in the Specialty Training Standard with the "^" annotated in column 2 requires a third-party certifier to verify the member can perform the task.

Competency Assessment. Additional training exceeding requirements with emphasis on present or future duty assignments. Synonymous with proficiency training.

Comprehensive Medical Readiness Program (CMRP). Recurring training necessary to

maintain skills of a fully qualified individual to adequately perform the mission and related duties required in peacetime and wartime. The CMRP program is outlined in DAFI 41-106, *Air Force Medical Readiness Program*, chapter 4.

Core Task. A task that the AFCFM identifies as minimum qualification requirements within an AFSC, regardless of duty position for a particular skill level across the AFSC.

Course Objective List. A publication, derived from initial/advanced skills course training standard, identifying the tasks and knowledge requirements, and respective standards provided to achieve a 3, 5, and 7-skill level in this career field. Supervisors use the course objective list to assist in conducting graduate evaluations in accordance with DAFMAN 36-2689, *Training Program*.

Enlisted Development Team (EDT). Team of career field leaders that evaluate personnel records for deliberate development opportunities and key leadership roles.

Enlisted Specialty Training. A mix of formal training (technical school) and informal training (on- the-job) to qualify and upgrade Airmen in each skill level of a specialty.

Correspondence Training. Additional training via computer, paper text, interactive video, or other necessary means to supplement training.

Go/No-Go. The "Go" is the stage at which a trainee has gained enough skill, knowledge, and experience to perform the tasks without supervision; meets the task standard. "No-Go" is the stage at which the trainee has not gained enough skill, knowledge, and experience to perform task without supervision and does not meet task standard.

Initial Skills Training. A formal resident course that results in the 3-skill level award for that AFSC.

Major Command Functional Manager (MFM). MFMs are appointed field representatives who provide accurate, up-to-date information to enhance decisions made by the AFCFM. MFMs are command focal points providing guidance, information, and support within the command on enlisted issues. Additionally, MFMs advise MAJCOM Surgeons General on utilization of resources and personnel within their respective command.

Master Task Listing (MTL). Document maintained within a work center coded to identify all tasks performed for each duty position.

Master Training Plan (MTP). A comprehensive training plan for a work center. It must include the MTL, Qualification Training Package (QTP), AFJQS, task breakdowns, commercial publications, and any other document that supports training (as applicable).

Medical Education and Training Campus (METC). A Defense Health Agency (DHA) Tri-Service campus located on Fort Sam Houston, TX in the city of San Antonio. METC is a state-of-the-art DoD healthcare education campus where enlisted medical personnel are trained.

Medical Laboratory Technician (MLT) Certification. A professional credential that validates a member's knowledge and skills in performing laboratory tests. It is required for 5-skill level upgrade.

MyTraining system. A replacement for the Air Force Training Record (AFTR) and Total Force Training Record (TFTR). MyTraining is integrated into MyLearning applications with migrated data from legacy systems. MyTraining provides a one-stop-shop to record all learning, whether

in a specialized training or education program, on the job or off-duty, or even training with another military service.

Occupational Analysis Report (OAR). A formal report from collecting and analyzing factual data on the tasks and/or knowledge performed by Air Force career fields. This data provides personnel and training decision-makers with factual and objective job information, which enables them to justify and/or change personnel utilization policies and programs, refine and maintain occupational structures, and establish, validate, and adjust testing and training programs.

On-the-Job Training (OJT). Hands-on, "over-the-shoulder" training conducted to certify personnel in both upgrade (skill-level award) and job qualification (duty position certification training).

Phase II. A continuation of a formal resident course training that provides Airmen with realistic hands-on clinical experience before beginning OJT at the permanent duty location.

Proficiency Training. Additional training, either in-residence, exportable advanced training courses, or OJT, provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade.

Programmatic Accreditation. Accreditation through an agency in order to gain certification or a license within a specialty.

Qualification Training (QT). Actual hands-on task performance training designed to qualify an individual in a specific duty position. This portion of the dual channel OJT program occurs both during and after the upgrade training process. It is designed to provide the performance skills required to do the job.

Qualification Training Package (QTP). An instructional package designed for use at the unit to qualify, or aid qualification, in a duty position or program, or on a piece of equipment. It may be printed, computer based, or in other audiovisual media.

Resource Constraints. Resource deficiencies, such as money, facilities, time, manpower, and equipment, that preclude desired training from being delivered.

Special Experience Identifier (SEI). A three number code that identifies unique skills not otherwise identified in a personnel data system.

Skills Training. A formal course which results in the award of a skill level.

Specialty Training. The total training process used to qualify Airmen in their assigned specialty.

Specialty Training Requirements Team (STRT). Team comprised of AFCFM, MFMs, and subject matter experts (SME) that determine present training requirements to the AETC Training Pipeline Manager and the AETC Training Manager.

Specialty Training Standard (STS). A component of the CFETP that describes an AFS in terms of tasks and knowledge an Airman within that specialty may be expected to perform or to know on the job. An STS identifies the training provided to achieve a 3, 5, or 7 skill level within an enlisted AFS. It further serves as a contract between AETC and the functional user to show which of the overall training requirements for an AFSC are taught in formal schools and correspondence courses.

Standard. An exact value, a physical entity, or an abstract concept, established and defined by authority, custom, or common consent to serve as a reference, model, or rule in measuring quantities or qualities, establishing practices or procedures, or evaluating results. A fixed quantity or quality.

Third Party Certification. An evaluation of completed training conducted by the task certifier and is only required when directed by the AFCFM.

Total Force. All collective Air Force components (active, reserve, guard, and civilian elements) of the United States Air Force.

Trainer. A trained and qualified person who teaches Airmen to perform specific tasks through OJT methods. Also, includes equipment that the trainer uses to teach Airmen specified tasks.

Unit Type Code (UTC). A five-character alphanumeric code that identifies and categorizes a specific military deployment capability.

Upgrade Training (UGT). Mandatory training which leads to attainment of a higher level of proficiency.

Utilization and Training Workshop (U&TW). A forum of MAJCOM AFSC functional managers, SMEs, and AETC training personnel that determine career progression and training requirements. This is the team that will assist the AFCFM to finalize the new CFETP prior to coordination for publication.

Wartime Course. An accelerated training course, consisting of wartime tasks, that is activated during times of war to expeditiously provide units with necessary personnel.

Wartime Tasks. Tasks that must be taught when training courses are accelerated in a wartime environment. Wartime tasks are identified in the specialty training standard with an asterisk (*) in column 2 and will be taught in the 3-level course when the wartime courses have been activated.

Section A – General Information

1. Purpose of the CFETP. This CFETP provides information necessary for the AFCFM, MFMs, commanders, training managers, supervisors, trainers, and certifiers to plan, develop, manage, and conduct an effective career field training program. The plan outlines the training individuals should receive to develop and progress throughout their careers. This plan identifies initial skills, upgrade, qualification, advanced, and proficiency training.

1.1. Initial Skills training is the AFS-specific training a member receives upon completion of Basic Military Training or upon retraining into this specialty for award of the 3-skill level. For this AFSC, Phase-1 technical training is conducted by the Medical Education and Training Campus (METC) at JBSA Fort Sam Houston, TX. This is followed by Phase-2 technical training at an established Medical Treatment Facility with oversight from the 937th Training Group.

1.2. Upgrade Training identifies requirements for mandatory courses, task qualifications, and if used, correspondence courses for award of the 5-, 7-, and 9-skill levels.

1.3. Qualification Training is actual hands-on task performance training designed to qualify an Airman in a specific duty position. This training program occurs both during and after the upgrade training process. It is designed to provide the performance skills/knowledge required to do the job.

1.4. Advanced training is formal specialty training used for selected Airmen that exceeds initial skills training.

1.5. Proficiency Training is additional training, either in-residence or online web based advanced training courses, or OJT, provided to personnel to increase their skills and knowledge beyond the minimum requirements for upgrade.

1.6. The CFETP has several purposes.

1.6.1. Serves as a management tool to plan, manage, conduct, and evaluate a career field training program. Also, it helps supervisors identify training at the appropriate point in an individual's career.

1.6.2. Identifies task and knowledge training requirements for each skill level in the specialty and recommends education/training throughout each phase of an individual's career.

1.6.3. Lists training courses available in the specialty, identifies sources of training, and the training delivery method.

1.6.4. Identifies major resource constraints that impact full implementation of the desired career field training program.

2. Uses of the CFETP. The CFETP will be used by MFMs and supervisors at all levels to ensure comprehensive and cohesive training programs are available for everyone in the specialty.

2.1. Each Service branch owns its training requirements. Therefore, in joint effort with designated tri-service representatives, METC personnel will develop and revise formal training requirements and initial skills training to users. Requirements are documented in Part II of the CFETP. AETC training development personnel will develop/revise non-METC courses, non-resident, field, and online training.

2.2. MFMs will ensure their training programs complement the CFETP's mandatory, initial, upgrade, and proficiency requirements. OJT, resident training, contract training, or exportable courses can satisfy identified requirements. MAJCOM-developed training to support this AFS must be identified for inclusion into the plan and must not duplicate existing training.

2.3. Unit Training Managers (UTM) and supervisors manage and control progression through the career field by ensuring members complete the mandatory training requirements for upgrade specified in this CFETP and supplemented by their MAJCOM. The lists of courses in Part II will be used as a reference to support training.

3. Coordination and approval of the CFETP. The AFCFM is the approval authority for this CFETP and coordinates through required agencies for ultimate publishing on Air Force e-pubs. In addition, the AFCFM will initiate an annual review of this document to ensure currency and accuracy. MAJCOM representatives and AETC training personnel will identify and coordinate on the career field training requirements. They will submit, through proper channels, initial and subsequent changes to the CFETP.

Section B – Career Field Progression and Information.

4. Specialty Description. The following information incorporates the latest changes to the Department of the Air Force Enlisted Classification Directory.

4.1. 4T0X1 (Medical Laboratory) Apprentice, Journeyman, and Craftsman, specialty

summary. Tests and analyzes specimens of human origin and other substances by established scientific laboratory techniques to aid in diagnosing, treating, and preventing diseases or to support medical research. Supervises medical laboratory activities. Related DoD Occupational Subgroup: 131100.

4.1.1. Performs hematological tests and urinalysis. Accomplishes standardized qualitative and quantitative evaluation of erythrocytes, leukocytes, and thrombocytes. Examines stained blood smears microscopically and refers any abnormal cells to superiors. Performs coagulation studies on human blood and plasma. Performs chemical, macroscopic, and microscopic urine specimen examinations.

4.1.2. Performs chemical analysis. Analyzes human material or other products submitted to the laboratory, using photometric, calorimetric, titrimetric, radioisotope, or any other chemical or physical procedure applicable to clinical chemistry. Calibrates and maintains all instruments. Makes necessary calculations and reports data to superiors. Reviews all chemistry procedures to ensure current procedures are used.

4.1.3. Performs blood bank duties. Draws and processes blood aseptically by standardized techniques. Completely types donor and recipient blood, assists in cross matching blood to establish donor-recipient compatibility, reporting any abnormal reactions to immediate supervisor. Prepares blood derivatives. Accomplishes all techniques required for blood transfusion services.

4.1.4. Performs microbiological and serological tests. Conducts procedures to isolate and identify bacteria by gross and microscopic examination, staining, biochemical and immunological procedures, or any other determination of growth characteristics. Performs sensitivity tests on pathogenic bacteria. Assists in identifying viruses and fungi. Applies parasitological techniques to recover and identify parasites. Applies standard serologic tests for identifying antibodies specific to diseases.

4.1.5. Accomplishes general medical laboratory duties. Conducts bacteriological and chemical examination of food products, water, dairy products, and sewage incidental to preventive and veterinary medicine programs. Takes all necessary precautions to maintain safe conditions in laboratory for both laboratory and hospital personnel. Performs preventive maintenance procedures on laboratory equipment. Performs and evaluates laboratory quality control procedures. Prepares reagents for use in test performance.

4.1.6. Performs medical laboratory functions. Assists medical officers and allied scientists in research assignments in broad pathology field. Prepares tissue for electron microscopy. Directs toxicology procedures performance incident to aerospace pathology and forensic medicine programs. Assists in epidemiological investigations. Assists biological warfare officer in developing procedures for detecting bacteriological agents incident to biological warfare.

4.1.7. Plans, organizes, directs, coordinates, and evaluates medical laboratory activities (Craftsman and Journeyman only). Composes local medical laboratory regulations. Applies continuous effective internal quality control of all medical laboratory departments. Advises superiors regarding status and adequacy of equipment, supplies, personnel training, and operating efficiency. Coordinates with other activities, agencies, and organizations. Resolves problems about operating medical laboratory activities. Inspects medical laboratory activities. Furnishes deficiency reports and outstanding accomplishments to superiors. Interprets

inspection findings and recommends corrective actions.

4.2. 4T090 Superintendent and Chief Enlisted Manager (CEM). Manages all medical laboratory activities including those related to histopathology in support of patient care, medical research, and military public health. Related DoD Occupational Subgroup: 131100

4.2.1. Plans and organizes laboratory activities. Composes local medical laboratory regulations. Advises superiors regarding status and adequacy of equipment, supplies, personnel training, and operating efficiency. Coordinates with other activities, agencies, and organizations.

4.2.2. Directs medical laboratory activities. Resolves problems about operating medical laboratory activities. Ensures supply and equipment availability. Applies continuous and effective internal quality control of all medical laboratory departments.

4.2.3. Inspects and evaluates medical laboratory activities. Inspects of medical laboratory activities. Furnishes deficiency reports and outstanding accomplishments to superiors. Interprets inspection findings and recommends corrective action. Supervises laboratory work area maintenance according to good laboratory techniques, taking precautions to maintain safe conditions for both hospital and laboratory personnel. Evaluates laboratory quality control program effectiveness.

4.2.4. Performs medical laboratory functions. Assists medical officers and allied scientists in research assignments in broad pathology field. Prepares tissue for electron microscopy. Directs toxicology procedures performance incident to aerospace pathology and forensic medicine programs. Assists biological warfare officer in developing procedures for detecting bacteriological agents incident to biological warfare.

5. Skill Level and Career Progression. Adequate training and timely progression from the apprentice through the superintendent skill level play an important role in the AF's ability to accomplish its mission. It is essential everyone involved in training must do their part to plan, manage, and conduct an effective training program. The guidance provided in this part of the CFETP will ensure members receive viable training at appropriate career points.

5.1. Apprentice, 3-Skill Level.

5.1.1. 4T031, Medical Laboratory. Initial skills training in this specialty consists of the tasks and knowledge training provided in the 3-skill level resident courses: Medical Laboratory Apprentice Phase I located at Medical Education and Training Campus (METC), JBSA Fort Sam Houston TX, and Medical Laboratory Apprentice Phase II conducted at designated medical treatment facilities (MTFs). The decision to train specific tasks and knowledge items in the initial skills courses is based on a review of OSR data, training requirements analysis data, and 4T0X1 SME input. Task and knowledge training requirements are identified in the STS in Part II, Section A of this CFETP. Members must complete **both** initial skills courses (Phase I and Phase II) to be awarded AFSC 4T031. At the conclusion of the Medical Laboratory Apprentice Course Phase II, attendees will challenge the American Society for Clinical Pathology (ASCP) Medical Laboratory Technician (MLT) certification examination. Personnel that fail to obtain the MLT certification at the end of the apprentice course will have 15 months from that graduation date to re-challenge and pass the examination. Award of the MLT certification is required for award of AFSC 4T051, waiverable only by the 4T AFCFM.

Grandfather Clause: Members who were awarded the 5-skill level prior to April 2022 are not required to obtain MLT certification for any 4T0X1 skill level or the 4T090 skill level.

5.2. Journeyman, 5-Skill Level.

5.2.1. 4T051, Medical Laboratory. Upgrade training to the 5-skill level in this specialty consists of the following requirements:

(1) The member possesses AFSC 4T031 for a minimum of 12 months.

(2) The member is awarded and maintains MLT certification (see grandfather clause in Part I, paragraph 5.1.1. of this CFETP).

(3) The member completes all STS core tasks specified by a "5" in column 2 of the STS, and all STS tasks for the assigned duty position.

(4) The member is recommended by the supervisor and approved by the unit commander according to AFMAN 36-2100, *Military Classification, Technical Training, and Retraining*. Qualification training is initiated anytime members are assigned duties they are not qualified to perform.

Once upgraded to the 5-skill level, a journeyman will maintain proficiency by completing all competency assessments required or specified by command or local policies. The SrA will attend Airman Leadership School after reaching 48 months total Air Force military service or after being selected for promotion to SSgt. Individuals will use specified study references listed in the Weighted Airman Promotion System (WAPS) catalog to prepare for the Specialty Knowledge Test (SKT) portion for promotion under WAPS. Members should consider continuing education toward a CCAF degree in Medical Laboratory Technology. Obtaining national certification as a Medical Laboratory Technician (MLT) is mandatory. Personnel that fail to obtain the MLT certification at the end of the apprentice course will have 15 months from that graduation date to re-challenge and pass the examination. Award and maintenance of the MLT certification is required to maintain AFSC 4T051, waiverable only by AFCFM.

5.3. Craftsman, 7-Skill Level.

5.3.1. 4T071, Medical Laboratory. Upgrade training to the 7-skill level in this specialty consists of the following requirements:

(1) The member possesses AFSC 4T051 for a minimum of 12 months.

(2) The member is a Staff Sergeant or Staff Sergeant select.

(3) The member completes all STS core tasks specified by a "7" in column 2 of the STS, and all STS tasks for the assigned duty position.

(4) The member was awarded and maintains MLT certification (see grandfather clause in Part I, paragraph 5.1.1. of this CFETP).

(5) The member is recommended by the supervisor and approved by the unit commander according to AFMAN 36-2100, *Military Classification, Technical Training, and Retraining*. Qualification training is initiated anytime members are assigned duties they are not qualified to perform.

A laboratory craftsman can be expected to fill various supervisory and management positions within the laboratory such as noncommissioned officer in charge of the laboratory or a department. In addition, they may develop work schedules for subordinate personnel and ensure necessary manning levels are maintained during hours of laboratory operations. 7-levels should

take courses or obtain added knowledge on management of resources and personnel. Continued academic education through CCAF and higher degree programs is encouraged.

5.4. Superintendent, 9-Skill Level. Upgrade training to the 9-skill level in this specialty consists of the following requirements:

(1) The member possesses AFSC 4T071 or 4T072 for a minimum of 5 years.

(2) The member is a Senior Master Sergeant.

(3) The member was awarded and maintains MLT or HT certification (see grandfather clause in Part I, paragraphs 5.1.1. and 5.1.2. of this CFETP).

(4) The member is recommended by the supervisor and approved by the unit commander according to AFMAN 36-2100, *Military Classification, Technical Training, and Retraining*.

To be awarded AFSC 4T090, an individual must be a SMSgt and meet any other requirement specified in AFMAN 36-2100, *Military Utilization and Classification*. Members can expect to fill positions such as Superintendent of Laboratory Services or various staff positions within a medical group such as Squadron Superintendent. Additional training in the areas of budget, manpower, resources, and personnel management should be pursued through continuing education.

6. Training Decisions. This portion of the CFETP is about training decisions for members and supervisors to ensure progression and attainment of fully qualified technicians.

6.1. 3-Skill Level (Initial) Training. The 3-skill level is usually accomplished through formal training as follows:

6.1.1. 4T031, Medical Laboratory. The Medical Laboratory Apprentice training is divided into two courses. Phase I is conducted at the Medical Education Training Campus (METC) at JBSA ft Sam Houston, and Phase II is the clinical experience conducted at one of multiple operational Military Training Facilities in the CONUS. This program (Phase I and Phase II together) meets the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) guidelines for medical laboratory technician training. The initial skills program provides Airmen the needed education, motivation, and training skills necessary to become 3-skill level apprentices. Active-duty students are selected by Air Force recruiting or 2AF accessions at JBSA Lackland AFB TX. ANG or AFRES members are selected using those internal processes. Any active duty retrainees are selected by the Air Force Personnel Center (AFPC) retraining office. Program graduates are awarded AFSC 4T031.

6.2. 5-Skill Level. The 5-skill level training decisions are made by supervisors at the member's unit based on the following guidance. There are no formal courses required for upgrade to the 5-skill level.

6.2.1. 4T051, Medical Laboratory. 5-level core tasks can be satisfied as the trainee demonstrates by performing the procedure relevant to the task. If not already acquired, the member should schedule testing for MLT certification. Task knowledge levels are used alone when the task is not performed in the current duty position, and appropriate documentation is annotated on the AF Form 623A, On-The-Job Training Record Continuation Sheet or electronic equivalent.

6.3. 7-Skill Level. The 7-skill level training decisions are made by supervisors at the member's

unit. There are no formal courses required for upgrade to the 7-skill level.

6.3.1. 4T071, Medical Laboratory. 7-level core tasks can be satisfied as the trainee demonstrates by performing the procedure relevant to the task. The member should start completing requirements for the CCAF degree or other associate degree in preparation for career advancement.

6.4. 9-Skill Level. To qualify for the 9-skill level, Airmen must have an associate degree (requirement to sew on SMSgt), sew-on SMSgt, and complete in-resident SNCOA. A superintendent is a Senior Enlisted Leader (SEL) and can expect to fill positions such as Flight Chief, Superintendent, Functional Manager, and various staff positions. Additional training in the areas of resources, leadership skills, and management should be pursued through continuing education. Completion of higher degree programs is highly recommended.

7. College Credits and degree programs. CCAF programs must include some off duty education to complete the electives portion of a degree program. Members should consult with their local education office for how this can be accomplished.

7.1. Community College of the Air Force (CCAF). Members are automatically enrolled in CCAF upon completion of Basic Military Training (BMT). CCAF provides the opportunity to obtain an associate in applied science degree in Medical Laboratory Technology. Completion of initial skills training in the Medical Laboratory Apprentice Phase I and Phase II courses currently satisfies the technical education and the program elective requirements for a CCAF degree. Additional off-duty education is a personal choice that is encouraged for all. Individuals desiring to become an AETC Instructor must possess as a minimum an associate degree or should be actively pursuing an associate degree. The 4T031 Apprentice Phase I and Phase II courses provide college credits towards a CCAF associate degree. Members and supervisors should consult the CCAF catalog for all requirements for award of the degree.

8. Enlisted Medical Badge. Signifies the member's skill level. DAFI 36-2903, *Dress and Personal Appearance of Air Force Personnel,* provides guidance on the wear of the occupational badge.

8.1. Basic Enlisted Medical Badge. Authorized for wear after award of the 3-skill level. Students graduating from Medical Laboratory Apprentice Phase II are awarded this initial badge as part of their graduation ceremony.

8.2. Senior Enlisted Medical Badge. Authorized for wear after award of the 7-skill level.

8.3. Master Enlisted Medical Badge. Authorized for wear after award of the 9-skill level.

9. Career Field Path. The 4T0X1 Career shows general rank requirements for each training and career progression area. See Figures 9.1 and 9.2 regarding career progression and position opportunities.

Education And Training Requirements	Grade Requirements		
	Rank	Average Promotion	Earliest Sew-on
Basic Military Training			
Apprentice Technical School (3-Skill Level) - Med Lab Apprentice Phase I. - Med Lab Apprentice Phase II.	Amn A1C	6 Months 16 Months	
Upgrade To Journeyman (5-Skill Level) - Completion of all duty position training requirements. - Certification of all core tasks and duty position requirements. - Award and maintenance of the MLT certification. - 12 months in the 3-skill level.	Amn A1C SrA	2.5 Years (to SrA)	22 Months
Airman Leadership School (ALS) - Must be a SrA with 48 months' time in service or SSgt select. - Resident graduation is a prerequisite for SSgt sew-on (AD Only).			
Upgrade To Craftsman (7-Skill Level) - Minimum rank of SSgt or SSgt select - Complete all duty position training requirements. - Certification of all core tasks and duty position requirements. - Maintenance of the MLT certification. - 12 months in the 5-skill level.	SSgt	5 Years	3 Years
Noncommissioned Officer Academy (NCOA) - Must be a TSgt or TSgt select. - Resident graduation is a prerequisite for MSgt sew-on (AD Only).	TSgt MSgt	10 Years 14.5 Years	5 Years 8 Years
USAF Senior NCO Academy (SNCOA) - Must have completed NCOA in residence (AD Only). - Must have completed SNCOA correspondence. - Must be a SMSgt select. Selected MSgts also eligible. Completion is a prerequisite for SMSgt sew-on (AD Only).			
Upgrade To Superintendent (9-Skill Level) - Minimum rank of SMSgt.	SMSgt	17.5 Years	11 Years
Upgrade to Chief Enlisted Manager (4T000) - Selected for promotion to CMSgt. - Developmental Education.	CMSgt	21 Years	14 Years

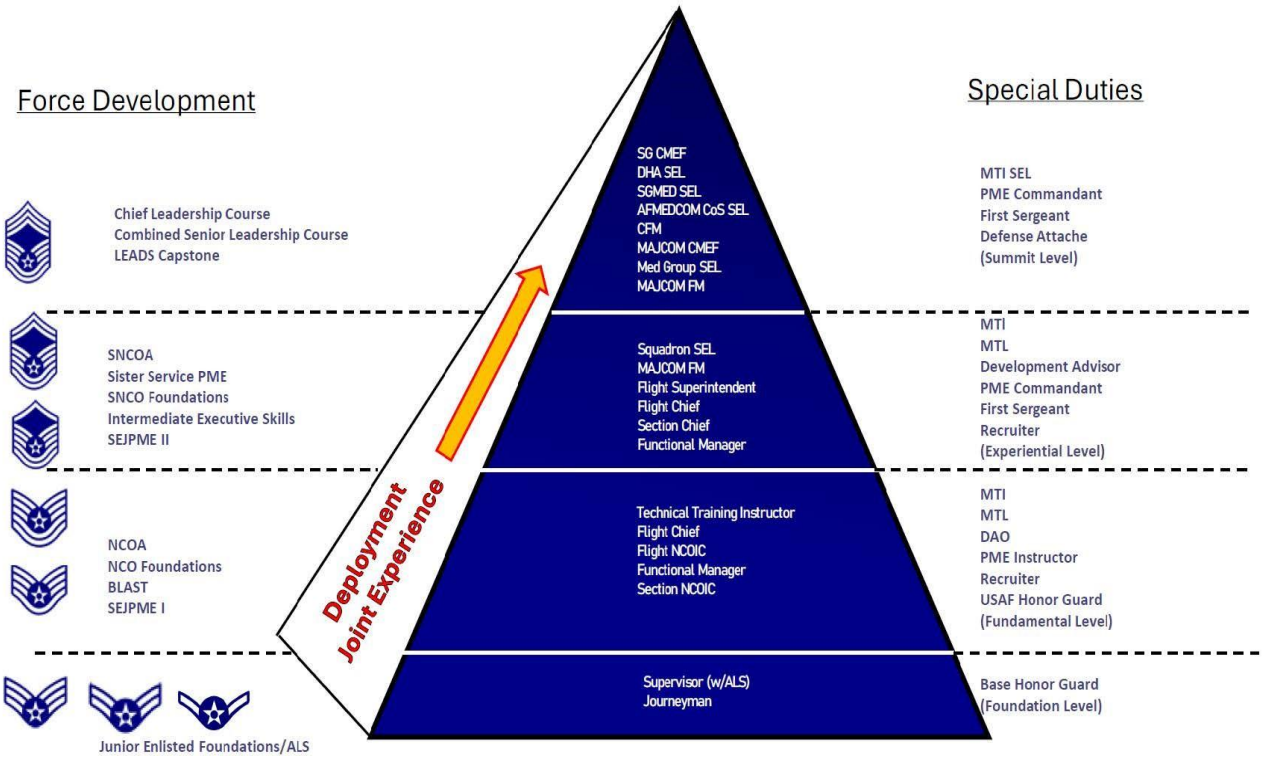

Figure 9.2, Medical Enlisted Career Pyramid

Section C – Skill Level Training Requirements

10. Purpose. Skill level training requirements in this career field are defined in terms of task and knowledge requirements. This section outlines the specialty qualification requirements for each skill level in broad, general terms and establishes the mandatory requirements for entry, award, and retention of each skill level. The specific task and knowledge training requirements are identified in the STS at Part II, Section A of this CFETP.

11. Specialty Qualifications Requirements.

11.1. Medical Laboratory Apprentice (4T031)

11.1.1. Knowledge. Knowledge is mandatory of hematology, urinalysis, clinical chemistry, microbiology, blood banking, immunology, medical terminology, medical ethics applicable to performing medical laboratory procedures, medical laboratory management and medical administrative principles, pathology and histopathology fundamentals, and routine equipment maintenance.

11.1.2. Education. For entry into this specialty, completion of high school or college courses in algebra, chemistry and biological sciences (e.g. anatomy and physiology, botany, general biology, microbiology, zoology, etc.) is mandatory.

11.1.3. Training. For award of AFSC 4T031, completion of the Medical Laboratory Apprentice Course Phase I and Phase II is mandatory.

11.1.4. Experience. Other than completion of clinical training as part of the Medical

Laboratory Apprentice Phase II, no other experience is mandatory for award of AFSC 4T031.

11.1.5. Training Sources/Resources. For AFSC 4T031, completion of Medical Laboratory Apprentice/Phase I course and Medical Laboratory Apprentice/Phase II course satisfies the knowledge and training requirements specified in the specialty qualification section.

11.1.6. Implementation. Entry into AFSC 4T031 initial skills training is accomplished by scheduling non-prior service students from basic training (active duty, ANG, or AFRES) or by approved retraining from any AFSC.

11.1.7. Other Entry Requirements. For entry into this specialty, members must have pass color vision, as defined by getting a 55 or better on the Cone Contrast Test (CCT), or correctly identifying at least 10 of 14 Ishihara Plates (PIP). CCT should be primary testing choice, but PIP is acceptable if CCT is not available at testing site. Members must also have a physical profile series factor (PULHES) as defined in DAFMAN 48-123, *Medical Examinations and Standards*. For award and retention of AFSC 4T031, members must maintain local network access IAW AFI 17-130, *Cybersecurity Program Management,* and DAFMAN 17-1301, *Computer Security (COMPUSEC)*.

12. Journeyman Specialty Qualifications.

12.1. Medical Laboratory Journeyman (4T051).

12.1.1. Knowledge. In addition to the knowledge required for a 3-level, the following subjects are mandatory: increased knowledge of safety and health hazards; professional conduct; routine equipment maintenance; general management principles; general laboratory cleanliness; and increased knowledge of principles and procedures in the areas of hematology, clinical chemistry, urinalysis, microbiology, parasitology, blood banking, immunology, and specimen collection, processing, and shipment.

12.1.2. Education. There are no additional educational requirements beyond those defined for the apprentice level.

12.1.3. Training. No mandatory AETC training courses are required for upgrade, but members must maintain MLT certification.

12.1.4. Experience. Qualification and in possession of AFSC 4T031. Also, experience in performing functions in urinalysis, hematology, bacteriology, serology, and chemistry.

12.1.5. Training Sources/Resources. Supervisors provide oversight and guidance of upgrade training of the airmen to the 5-skill level. The airmen in upgrade training are evaluated by supervisors and documented in MyTraining.

12.1.6. Implementation. Entry into 5-skill level upgrade training is initiated immediately after arrival at first permanent duty station. Requirements for the 5-skill level are listed in Part I, section B of this CFETP.

13. Craftsman Specialty Qualifications.

13.1. Medical Laboratory Craftsman (4T071). Qualification in and possession of AFSC 4T051. Also, experience performing or supervising functions such as work normally performed in a routine clinical laboratory (class A dispensary or hospital); specialty performance of tests or technical supervisory experience in clinical chemistry, bacteriology, toxicology, or virology at class A, class B, or analogous laboratory; or combination of foregoing types of experience.

13.1.1. Knowledge. In addition to the knowledge required for a 3-level, the following subjects are mandatory: increased knowledge of safety and health hazards; professional conduct; routine equipment maintenance; general management principles; general laboratory cleanliness; and increased knowledge of principles and procedures in the areas of hematology, clinical chemistry, urinalysis, microbiology, parasitology, blood banking, immunology, and specimen collection, processing, and shipment.

13.1.2. Education. N/A

13.1.3. Training. N/A

13.1.4. Experience. Qualification and in possession of AFSC 4T051. Also, experience in performing functions in urinalysis, hematology, bacteriology, serology, and chemistry.

13.1.5. Training Sources/Resources. Supervisors provide oversight and guidance of upgrade training of the airmen to the 7-skill level. The airmen in upgrade training are evaluated by supervisors and documented in MyTraining.

13.1.6. Implementation. Entry into 7-skill level upgrade training starts on the first day of the promotion cycle once selected for promotion to the rank of SSgt. In the case of SSgt retrainees (if applicable), UGT starts upon award of the 5-skill level. Requirements for the 7-skill level are listed in Part I, section B of this CFETP:

14. Superintendent Level (9-skill level) Specialty Qualifications

14.1. Knowledge. Knowledge of overall administrative, logistical, managerial, and technical laboratory activities is mandatory.

14.2. Education. Completion of an associate degree in medical laboratory technology or a histopathology related degree is highly encouraged. Completion of additional degrees in medical laboratory or management-related fields of study is also encouraged.

14.3. Training. There are no formal training requirements.

14.4. Experience. For award of AFSC 4T090, qualification in and possession of AFSC 4T071 or AFSC 4T072 for a minimum of 5 years is mandatory.

14.5. Implementation. The 9-skill level is awarded when the member meets requirements for the 9-skill level listed in Part I, section B of this CFETP.

Section D – Resource Constraints

There are no resource constraints for this AFSC. This area is reserved.

Section E – Transitional Training Guide

There are no transitional training requirements. This area is reserved.

Part II

Section A – Specialty Training Standards

1. Implementation. The 4T0X1 STS will be used for technical training.

2. Purpose. As prescribed in DAFMAN 36-2689, these STS documents include columns as follows:

2.1. Column 1. Task, Knowledge, and Technical Reference. These are most common tasks,

knowledge, and Training References (TRs) necessary for Airmen to perform duties in the 3-, 5-, and 7-skill level. Number task statements sequentially (i.e., 1.1, 1.2, 2.1). For the purposes of this CFETP, the term "technical reference" is synonymous with "training reference".

2.2. Column 2. Core Tasks. Identifies any specialty-wide training requirements for 5 or 7 skill level, and if the task must be certified when signed off (indicated by "^"). An asterisk (*) in this column indicates it is a wartime task.

2.3. Column 3. Certification for OJT. These columns are used to record completion of tasks and knowledge training requirements. Use the automated MyTraining system to formally document technician qualifications.

2.4. Column 4. Proficiency codes used to indicate training/information provided. These are the formal training and correspondence course requirements for this specialty. These columns show the proficiency (by skill level and course) to be demonstrated on the job by the graduate, based on training on the task/subject knowledge listed in the STS.

3. Qualitative Requirements. Before each STS, this table contains the proficiency code key used to indicate the level of training and knowledge provided by resident training, career development courses, and other courses.

4. Documentation. Use the MyTraining site to document all technician qualifications. Document and certify completion of training. As a minimum, complete the following columns in Part 2 of the CFETP: training start date (day, month, and year), training complete date (day, month, and year), trainee initials, trainer initials, and certifier initials (when required).

4.1. Transcribing to new CFETP. Transcribing documentation to a new CFETP is an administrative function, not a reevaluation of training. Upon publication of a new CFETP, transcribe in accordance with DAFMAN 36-2689.

4.2. Documenting Career Knowledge. The supervisor identifies STS technical/training references that the trainee requires for career knowledge and ensures, as a minimum, that trainees cover the mandatory items in DAFMAN 36-2689.

4.3. Decertification and Recertification. When a supervisor determines an Airman is unqualified on a task previously certified for the duty position, the supervisor deletes certification. Appropriate remarks pertaining to the reason for decertification are entered on the AF Form 623a, *On-The-Job Training Record Continuation Sheet*. Refer to DAFMAN 36-2689. Begin recertification if required.

4.4. Performance Standard. Tasks are trained and qualified to the "Go" level.

5. Promotion Testing. The STS is a guide for development of promotion tests used in the Weighted Airman Promotion System. Senior Noncommissioned Officers with extensive practical experience in their career fields develop Specialty Knowledge Tests (SKTs). The tests sample knowledge of STS subject matter areas judged by test development team members as most appropriate for promotion to higher grades. Questions are based upon study references listed in the *Enlisted Promotions Reference and Requirements Catalog*.

6. Recommendations. Identify inadequacies and recommend changes to this training standard through channels at 937 TRG/TGE, 2931 Harney Road, Fort Sam Houston, TX 78234-7674 or use the Customer Service Information Line at DSN 420-1080 or Commercial (210) 808-1080) to report your findings.

BY ORDER OF THE SECRETARY OF THE AIR FORCE

OFFICIAL

JOHN J. DEGOES, MD
Lieutenant General, USAF, MC, SFS
Surgeon General

QUALITATIVE REQUIREMENTS

Proficiency Code Key		
	Scale Value	**Definition: The individual**
Task Performance Levels	1	Can do simple parts of the task. Needs to be told or shown how to do most of the task. (Extremely Limited)
	2	Can do most parts of the task. Needs only help on hardest parts. (Partially Proficient)
	3	Can do all parts of the task. Needs only a spot check of completed work. (Competent)
	4	Can do the complete task quickly and accurately. Can tell or show others how to do the task. (Highly Proficient)
**Task Knowledge Levels	a	Can name parts, tools, and simple facts about the task. (Nomenclature)
	b	Can determine step by step procedures for doing the task. (Procedures)
	c	Can identify why and when the task must be done and why each step is needed. (Operating Principles)
	d	Can predict, isolate, and resolve problems about the task. (Advanced Theory)
**Subject Knowledge Levels	A	Can identify basic facts and terms about the subject. (Facts)
	B	Can identify relationship of basic facts and state general principles about the subject. (Principles)
	C	Can analyze facts and principles and draw conclusions about the subject. (Analysis)
	D	Can evaluate conditions and make proper decisions about the subject. (Evaluation)

Explanations

* Performance and knowledge tasks with an asterisk (*) in column 2 are trained during war time

** A subject knowledge scale value is used alone to define a level of knowledge for a subject not directly related to any specific task, or for a subject common to several tasks. A task knowledge scale value may be used alone or with a task performance scale value to define a level of knowledge for a specific task. (Example: b and 1b)

^ This mark is used in column 2 to indicate the task must be certified when signed off.

\- This mark is used alone instead of a scale value to show that no proficiency training is provided in the course or CDC.

X This mark is used alone in the course columns to show that training is required but not given due to limitations in resources.

NOTE: When column 2, Core tasks, includes the numbers 5 or 7, this task is a requirement for 5-skill level or 7-skill level upgrade respectively

		Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	(1) Phase I	(2) Phase II	(1) Course	(2) CDC	(1) Course	(2) CDC
7.7. Review Self-Assessment Program	**7**						**-**	**-**	**-**	**-**	**-**	**-**
7.8. Interpret Clinical Laboratory Improvement Program (CLIP)	**7**						**-**	**-**	**-**	**-**	**-**	**-**
8. TRAINING												
8.1. Evaluate Personnel to Determine Need for Training	**7**						**-**	**-**	**-**	**-**	**-**	**-**
8.2. Plan OJT	**7**						**-**	**-**	**-**	**-**	**-**	**-**
8.3. Supervise OJT	**7**						**-**	**-**	**-**	**-**	**-**	**-**
8.4. Prepare Job Qualification Standards (JQS)	**7**						**-**	**-**	**-**	**-**	**-**	**-**
8.5. Design Work Center Specific Training	**7**						**-**	**-**	**-**	**-**	**-**	**-**
8.6. Conduct Work Center Specific Training	**7**						**-**	**-**	**-**	**-**	**-**	**-**
8.7. Counsel Trainees on their Progress	**7**						**-**	**-**	**-**	**-**	**-**	**-**
8.8. Monitor Qualification and Competency Effectiveness	**7**						**-**	**-**	**-**	**-**	**-**	**-**
8.9. Maintain Training Records	**7**						**-**	**-**	**-**	**-**	**-**	**-**
8.10. Evaluate Effectiveness of Training Programs	**7**						**-**	**-**	**-**	**-**	**-**	**-**
8.11. Recommend Personnel for Training	**7**						**-**	**-**	**-**	**-**	**-**	**-**
9. MEDICAL LABORATORY ADMINISTRATION												
9.1. Laboratory Information System												
9.1.1. Preanalysis phase	*****						**B**	**-**	**-**	**-**	**-**	**-**
9.1.2. Perform preanalysis phase							**-**	**2b**	**-**	**-**	**-**	**-**
9.1.3. Analysis phase	*****						**B**	**-**	**-**	**-**	**-**	**-**
9.1.4. Perform analysis phase							**-**	**2b**	**-**	**-**	**-**	**-**
9.1.5. Post analysis	*****						**B**	**-**	**-**	**-**	**-**	**-**
9.1.6. Perform post analysis							**-**	**1b**	**-**	**-**	**-**	**-**
9.2. Medical Terminology							**A**	**-**	**-**	**-**	**-**	**-**
9.3. Laboratory mathematics	*****						**2b**	**-**	**-**	**-**	**-**	**-**
9.4. Pipettes and Glassware	*****						**2b**	**-**	**-**	**-**	**-**	**-**
9.5. Workload reports												
9.5.1. Compile	**5**						**-**	**-**	**-**	**-**	**-**	**-**

11.3. Phlebotomy												
11.3.1. Perform neonatal												
11.3.1.1. Capillary							**-**	**2c**	**-**	**-**	**-**	**-**
11.3.1.2. Venous							**-**	**2c**	**-**	**-**	**-**	**-**
11.3.1.3. Newborn screening							**-**	**2c**	**-**	**-**	**-**	**-**
11.3.2. Perform pediatric							**-**	**2c**	**-**	**-**	**-**	**-**
11.3.3. Perform adolescent							**-**	**3c**	**-**	**-**	**-**	**-**
11.3.4. Adults												
11.3.4.1. Capillary							**B**	**-**	**-**	**-**	**-**	**-**
11.3.4.2. Perform capillary	*						**2b**	**3c**	**-**	**-**	**-**	**-**
11.3.4.3. Perform venous	*						**2b**	**3c**	**-**	**-**	**-**	**-**
11.3.5. Perform geriatric							**-**	**3c**	**-**	**-**	**-**	**-**
12. IMMUNOLOGY (SEROLOGY)												
12.1. Immunology principles	*						**B**	**-**	**-**	**-**	**-**	**-**
12.2. Syphilis							**B**	**-**	**-**	**-**	**-**	**-**
12.3. Infectious mononucleosis							**B**	**-**	**-**	**-**	**-**	**-**

1. Tasks, Knowledge And Technical References	2. Core Tasks	3. Certification For OJT					4. Proficiency Codes Used To Indicate Training/Information Provided					
		A	B	C	D	E	A 3 Skill Level		B 5 Skill Level		C 7 Skill Level	
		Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	(1) Phase I	(2) Phase II	(1) Course	(2) CDC	(1) Course	(2) CDC
12.4. Rheumatoid							**B**	**-**	**-**	**-**	**-**	**-**
12.5. Rubella							**B**	**-**	**-**	**-**	**-**	**-**
12.6. Hepatitis							**B**	**-**	**-**	**-**	**-**	**-**
12.7. Beta HCG							**B**	**-**	**-**	**-**	**-**	**-**
12.8. HIV							**B**	**-**	**-**	**-**	**-**	**-**
12.9. Viral studies to include												
12.9.1. Cytomegalovirus (CMV)							**B**	**-**	**-**	**-**	**-**	**-**
12.9.2. Respiratory syncytial virus (RSV)							**B**	**-**	**-**	**-**	**-**	**-**
12.9.3. Human T-cell lymphotropic virus (HTLV)							**B**	**-**	**-**	**-**	**-**	**-**
12.9.4. Varicella zoster virus (VZV)							**B**	**-**	**-**	**-**	**-**	**-**
12.10. Rapid identification testing							**B**	**-**	**-**	**-**	**-**	**-**
12.11. Immunology Procedures												
12.11.1. Perform syphilis testing							**-**	**-**	**-**	**-**	**-**	**-**
12.11.2. Perform mononucleosis testing							**-**	**3b**	**-**	**-**	**-**	**-**
12.11.3. Perform rheumatoid testing							**-**	**-**	**-**	**-**	**-**	**-**
12.11.4. Perform qualitative beta HCG	**5***						**b**	**3b**	**-**	**-**	**-**	**-**
12.11.5. Perform quantitative beta HCG							**-**	**3b**	**-**	**-**	**-**	**-**
12.11.6. Rapid identification testing							**B**	**-**	**-**	**-**	**-**	**-**
12.11.7. Perform Rapid identification testing	*						**2b**	**3b**	**-**	**-**	**-**	**-**
12.12. Operate and maintain equipment							**-**	**-**	**-**	**-**	**-**	**-**
13. BLOOD BANK/ IMMUNOHEMATOLOGY												
13.1. Immunohematology fundamentals							**B**	**-**	**-**	**-**	**-**	**-**
13.2. Blood grouping and typing												
13.2.1. ABO grouping							**B**	**-**	**-**	**-**	**-**	**-**
13.2.2. Rh typing							**B**	**-**	**-**	**-**	**-**	**-**
13.2.3. Indirect Antiglobulin test							**B**	**-**	**-**	**-**	**-**	**-**
13.2.4. Direct Antiglobulin test							**B**	**-**	**-**	**-**	**-**	**-**
13.2.5. Antibody identifications												

1. Tasks, Knowledge And Technical References	2. Core Tasks	3. Certification For OJT					4. Proficiency Codes Used To Indicate Training/Information Provided					
		A	B	C	D	E	A 3 Skill Level		B 5 Skill Level		C 7 Skill Level	
		Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	(1) Phase I	(2) Phase II	(1) Course	(2) CDC	(1) Course	(2) CDC
13.2.5.1. Elution/absorption/adsorption							**B**	**-**	**-**	**-**	**-**	**-**
13.2.5.2. Pre-warm/cold agglutinins technique							**B**	**-**	**-**	**-**	**-**	**-**
13.2.6. Antibody titers							**B**	**-**	**-**	**-**	**-**	**-**
13.3. Transfusion services												
13.3.1. Routine compatibility testing							**B**	**-**	**-**	**-**	**-**	**-**
13.3.2. Rh Immune Globulin (RhIG) eligibility							**B**	**-**	**-**	**-**	**-**	**-**
13.3.3. Prenatal workup							**B**	**-**	**-**	**-**	**-**	**-**
13.3.4. Newborn workup							**B**	**-**	**-**	**-**	**-**	**-**
13.3.5. Transfusion reaction workups							**B**	**-**	**-**	**-**	**-**	**-**
13.3.6. Blood or components for issue							**B**	**-**	**-**	**-**	**-**	**-**
13.3.7. Blood or component receipt/storage							**B**	**-**	**-**	**-**	**-**	**-**
13.3.8. Selection of nongroup specific components							**B**	**-**	**-**	**-**	**-**	**-**
13.3.9. Red cell antigen screening							**B**	**-**	**-**	**-**	**-**	**-**
13.3.10. Transfusion service records							**B**	**-**	**-**	**-**	**-**	**-**
13.3.11. Documentation and maintenance							**B**	**-**	**-**	**-**	**-**	**-**
13.3.12. Blood Bank information system							**B**	**-**	**-**	**-**	**-**	**-**
13.3.13. Fetal maternal hemorrhage testing							**B**	**-**	**-**	**-**	**-**	**-**
13.4. Donor service procedures												
13.4.1. Active donor rosters							**A**	**-**	**-**	**-**	**-**	**-**
13.4.2. Donor service records							**A**	**-**	**-**	**-**	**-**	**-**
13.4.3. Donor screens	*						**A**	**-**	**-**	**-**	**-**	**-**
13.4.4. Donor phlebotomy	*						**A**	**-**	**-**	**-**	**-**	**-**
13.4.5. Walking Blood Bank	*						**A**	**-**	**-**	**-**	**-**	**-**
13.4.6. Donor blood processing							**A**	**-**	**-**	**-**	**-**	**-**
13.4.7. Blood or components preparation							**A**	**-**	**-**	**-**	**-**	**-**
13.4.8. Blood or components shipment							**A**	**-**	**-**	**-**	**-**	**-**
13.5. Perform blood grouping and typing procedures												
13.5.1. ABO grouping	5^*						**2b**	**2c**	**-**	**-**	**-**	**-**

1. Tasks, Knowledge And Technical References	2. Core Tasks	3. Certification For OJT					4. Proficiency Codes Used To Indicate Training/Information Provided					
		A	B	C	D	E	A 3 Skill Level		B 5 Skill Level		C 7 Skill Level	
		Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	(1) Phase I	(2) Phase II	(1) Course	(2) CDC	(1) Course	(2) CDC
13.5.2. Rh typing	**5^***						**2b**	**2c**	**-**	**-**	**-**	**-**
13.5.3. POCT Blood Typing	**5***						**2b**	**-**	**-**	**-**	**-**	**-**
13.6. Perform atypical antibody studies												
13.6.1. Indirect Antiglobulin test	*						**2b**	**2c**	**-**	**-**	**-**	**-**
13.6.2. Direct Antiglobulin test	*						**2b**	**2c**	**-**	**-**	**-**	**-**
13.7. Antibody identifications							**2b**	**2c**	**-**	**-**	**-**	**-**
13.8. Antibody titers							**2b**	**2b**	**-**	**-**	**-**	**-**
13.9. Perform transfusion service procedures												
13.9.1. Routine compatibility testing	**5***						**2b**	**2c**	**-**	**-**	**-**	**-**
13.9.2. Rh Immune Globulin (RhIG) eligibility							**2b**	**2c**	**-**	**-**	**-**	**-**
13.9.3. Prepare blood or components for issue	**5***						**b**	**2c**	**-**	**-**	**-**	**-**
13.9.4. Issue blood or components	**5***						**b**	**2c**	**-**	**-**	**-**	**-**
13.9.5. Receive/store blood or components	**5***						**b**	**2c**	**-**	**-**	**-**	**-**
13.9.6. Select nongroup specific components	**5***						**2b**	**2c**	**-**	**-**	**-**	**-**
13.9.7. Screen red cell antigen							**b**	**2c**	**-**	**-**	**-**	**-**
13.9.8. Maintain transfusion/donor service records							**b**	**2b**	**-**	**-**	**-**	**-**
13.10. Perform fetal maternal hemorrhage testing							**-**	**2b**	**-**	**-**	**-**	**-**
13.11. Donor service procedures												
13.11.1. Maintain active donor records	**5**						**b**	**-**	**-**	**-**	**-**	**-**
13.11.2. Maintain donor service records	**5**						**b**	**-**	**-**	**-**	**-**	**-**
13.11.3. Screen donors	**5***						**2b**	**-**	**-**	**-**	**-**	**-**
13.11.4. Perform donor phlebotomy	**5***						**2b**	**-**	**-**	**-**	**-**	**-**
13.11.5. Perform Walking Blood Bank procedures	**5***						**2b**	**-**	**-**	**-**	**-**	**-**
13.11.6. Process donor blood	**5**						**b**	**-**	**-**	**-**	**-**	**-**
13.11.7. Prepare blood or components	**5**						**a**	**-**	**-**	**-**	**-**	**-**
13.11.8. Ship blood or components	**5**						**a**	**-**	**-**	**-**	**-**	**-**
13.12. Operate and maintain equipment							**-**	**-**	**-**	**-**	**-**	**-**
14. HEMATOLOGY												

1. Tasks, Knowledge And Technical References	2. Core Tasks	3. Certification For OJT					4. Proficiency Codes Used To Indicate Training/Information Provided					
		A	B	C	D	E	A 3 Skill Level		B 5 Skill Level		C 7 Skill Level	
		Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	(1) Phase I	(2) Phase II	(1) Course	(2) CDC	(1) Course	(2) CDC
14.1. Hematology fundamentals	*						**B**	**-**	**-**	**-**	**-**	**-**
14.2. Microscope principles	*						**B**	**-**	**-**	**-**	**-**	**-**
14.3. Hematology procedures												
14.3.1. White blood cell manual estimates (WBC)							**B**	**-**	**-**	**-**	**-**	**-**
14.3.2. Red blood cell manual estimates (RBC)							**B**	**-**	**-**	**-**	**-**	**-**
14.3.3. Hemoglobin							**B**	**-**	**-**	**-**	**-**	**-**
14.3.4. Hematocrit							**B**	**-**	**-**	**-**	**-**	**-**

17.22. Perform Molecular and Polymerase Chain Reaction (PCR) testing	5						-	2c	-	-	-	-
17.23. Operate and maintain equipment							-	-	-	-	-	-
18. SPECIMEN SHIPMENT												
18.1. International Air Transport Association (IATA) Compliance for Hazardous Material	*						B	-	-	-	-	-
18.2. Toxicology Specimens							-	-	-	-	-	-
18.3. Ship Microscopic Slides							-	-	-	-	-	-
18.4. Ship Wet Specimens							-	-	-	-	-	-
18.5. Prepare and process specimen for shipment	*						b	-	-	-	-	-
18.6. Validate specimen requirements with reference laboratory							-	-	-	-	-	-
18.7. Transcribe reference laboratory results							-	-	-	-	-	-

Technical Reference (TR) Source Summary for STS 4T0X1, Medical Laboratory
List of commercial and government publications

Note. Most commercial training references are typically listed in the following format: Author(s), year of publication, title, edition (if applicable), and publisher. Some non-government publications published by organizations are updated quite often, and these may not include edition numbers, year of publication, or an author. Government publications are listed per that department's naming convention. Later or earlier editions of the same publications are acceptable after evaluation. For the purposes of this CFETP, the terms "Technical Reference" and "Training Reference" (TR) are synonymous. Since the number of TRs are excessive, they are all listed here by section and will not be repeated in the actual STS table. For each section of this STS, these TRs apply to all skill levels.

Section 1. Career Ladder Progression
AFI 1-1, *Air Force Standards*
AFI 41-102, *Air Force Medical Expense and Performance Reporting System (MEPRS) for fixed Military and Dental Treatment Facilities*
AFI 41-104, *Professional Board and National Certification Examinations*
AFH-1, *Airman*
AFMAN 36-2100, *Military Classification, Technical Training, and Retraining*
AFMS Flight Path
AFPD 41-1, *Healthcare Programs and Resources*
AFPD 44-1, *Medical Operations*
Department of the Air Force Enlisted Classification Directory (DAFECD)
AFDP-1, *Air Force Doctrine Publication 1*
A Profession of Arms: Core Values (Air Force Doctrine, Blue Book)
The Enlisted Force Structure (Air Force Doctrine, Brown Book)
The Joint Team (Air Force Doctrine, Purple Book)
DAFI 36-2688, Community College of the Air Force
CCAF Catalog
DAFMAN 36-2689, *Training Program*

Section 2. Medical Readiness
American Red Cross BLS for Healthcare Providers
DAFI 41-106, *Medical Readiness Program*
Textbook of Diagnostic Microbiology, 7th Edition Mahon, C. and Lehman, D. 2022. Elsevier.

Section 3. AF Occupational Safety and Health (AFOSH) Program
AFI 44-108, *Infection Prevention and Control Program*
AFI 90-821 Hazard Communication (HAZCOM) Program
DAFI 48-145 *Occupational and Environmental Health Program*
DAFI 91-202, *The Department of the Air Force (DAF) Mishap Prevention Program*
DAFMAN 91-203 *Air Force Occupational Safety, Fire, and Health Standards*
Linne & Ringsrud's Clinical Laboratory Science: Concepts, Procedures, and Clinical Applications. 2019. Turgeon, M. 2019. Elsevier.
GP 17-A3, Clinical Laboratory Standards Institute (CLSI) Clinical Laboratory Safety

Section 4. Professional and Patient Relationships
AFI 44-102, *Air Force Medical Expense and Performance Reporting System (MEPRS) for fixed Military and Dental Treatment Facilities*

Section 5. Medical Materiel Procedures
DAFI 41-230, *Medical Logistics Support*
DHA-PI 6430.08, *Medical Logistics Order Management*

Section 6. Supervision
AFH 1, *Airman*
AFMAN 36-2100, *Military Classification, Technical Training, and Retraining*
AFI 36-2406, *Officer and Enlisted Evaluations Systems*
AFI 36-2502, *Enlisted Airman Promotion and Demotion Programs*
DAFI 36-2685, *Total Force Enlisted Developmental Education*
DAFI 36-2907, *Adverse Administrative Actions*
DAFI 90-5001, *Integrated Resilience*

Section 7. Management
AFI 38-101, *Manpower and Organization*
DAFI 41-106, *Medical Readiness Program*
DAFI 90-302, *Inspection System of the Department of the Air Force*
DHA-PI 1100.01, *Guidance for Manpower Program*
DODI 6440-02, *Clinical Laboratory Improvement Program (CLIP)*

Section 8. Training
Department of the Air Force Enlisted Classification Directory (DAFECD)
AFMAN 36-2100, *Military Utilization and Classification*
ASCP Editorial Board, 2022. ASCP BOC Study Guide 7th Edition: MLS-MLT Clinical Laboratory Examinations
DAFMAN 36-2689, *Training Program*

Section 9. Medical Laboratory Administration
29 CFR 1910.134, *Respiratory Protection*
42 CFR, Part 493, *Laboratory Requirements*
AFI 41-102, *Air Force Medical Expense and Performance Reporting System (MEPRS) for fixed Military and Dental Treatment Facilities*
AFI 90-821, *Hazard Communication (HAZCOM) Program*
College of American Pathologists (CAP) Regulations (current checklist)
DAFI 48-145 *Occupational and Environmental Health Program*
DAFI 90-160, *Publications and Forms Management*
Linne & Ringsrud's Clinical Laboratory Science: Concepts, Procedures, and Clinical Applications. 2019. Turgeon, M. 2019. Elsevier; Phlebotomy, 5th Edition. Warekois, R., Robinson, R. and Primrose, P. 2019. Elsevier.
OSHA Pub 3111, *Hazard Communication Guidelines for Compliance*

Section 10. General Anatomy and Physiology
Anatomy & Physiology for the Prehospital Provider, 2nd Ed. Elling, B. and Elling K.M. 2014. Jones & Bartlett Learning
Linne & Ringsrud's Clinical Laboratory Science: Concepts, Procedures, and Clinical Applications. 2019. Turgeon, M. 2019. Elsevier
Phlebotomy, 5th Edition. Warekois, R., Robinson, R. and Primrose, P. 2019. Elsevier.

Section 11. Collect Blood Specimens
Clinical & Laboratory Standards Institute (CLSI) Guidelines; Phlebotomy, 5th Edition. Warekois, R.,

Robinson, R. and Primrose, P. 2019. Elsevier.

Section 12. Immunology (Serology)
Clinical Immunology, Principles and Practice. Rich, R. R. et al. 2018. Elsevier. Clinical Immunology and Serology: A Laboratory Perspective, 5th Edition. Miller, L. and Dorrestey, C. 2021. F.A. Davis.

Section 13. Blood Bank/Immunohematology
AABB Technical Manual (current edition)
AFI 44-105, *Air Force Blood Program*
DoDI 6480.04, *Armed Services Blood Program Operational Procedures*
Joint Trauma System Clinical Practice Guide, Whole Blood Transfusion (CPG ID: 21)
Modern Blood Banking & Transfusion Practices, 7th Edition. Harmening, D. 2019. F.A. Davis.

Section 14. Hematology
Hematology in Practice, 3rd Edition. Ciesla, B. 2019. F.A. Davis. Urinalysis and Body Fluids, 7th Edition. Strasinger, S. and Di Lorenzo, M. 2021. F.A. Davis.

Section 15. Clinical Biochemistry
AFMES Toxicology Submission Guidelines
Clinical & Laboratory Standards Institute (CLSI) Guidelines
Clinical Laboratory Chemistry, 2nd edition. Sunheimer, R. 2018. Pearson
Phlebotomy, 5th Edition. Warekois, R., Robinson, R. and Primrose, P. 2019. Elsevier

Section 16. Urinalysis Procedures
Hematology in Practice, 3rd Edition. Ciesla, B. 2019. F.A. Davis
Urinalysis and Body Fluids, 7th Edition. Strasinger, S. and Di Lorenzo, M. 2021. F.A. Davis

Section 17. Microbiology Procedures
Clinical Immunology and Serology: A Laboratory Perspective, 5th Edition. Miller, L. and Dorrestey, C. 2021. F.A. Davis
Medical Parasitology: A Self-Instructional Text. 2020. Leventhal, R. and Cheadle, R. 2020. F.A. Davis
Textbook of Diagnostic Microbiology, 7th Edition. Mahon, C. and Lehman, D. 2022. Elsevier

Section 18. Specimen Shipment
AFMES Toxicological Shipping Guidelines
AFRSSIR Specimen Collection Instructions
International Air Transport Association (IATA) Dangerous Goods Regulation (DGR)
Phlebotomy, 5th Edition. Warekois, R., Robinson, R. and Primrose, P. 2019. Elsevier.
The Joint Pathology Center (JPC) Contributor's Manual
The Joint Pathology Center (JPC) Instructions to Contributors

Section B – Course Objective List

7. Resident Courses. If a written copy of the course objective list is required, contact physical medicine training at DSN 420-5932 or write to 382 TRS/XYAE, 2931 Harney Road, Fort Sam Houston TX 78234-2532. A copy will be sent to you as soon as possible.

8. Career Development Courses. There are no CDCs for these specialties. This area is reserved.

Section C – Support Material

There are currently no support material requirements. This area is reserved.

Section D – Training Course Index

9. Purpose. This section of the CFETP identifies training courses available for the specialty, as well as courses under revision and those courses that are projected to be implemented. Refer to the ETCA website for more information on the courses listed in this section.

9.1. Air Force In-Resident Courses.

Course Number	Course Title	Training Location
L5AQJ4T031 01AA	Medical Laboratory Apprentice Phase I	JBSA-Fort Sam Houston, TX
L5ABO4T031 02AC	Medical Laboratory Apprentice Phase II	Various MTFs

9.2. Air Force Career Development Courses. N/A. There are no CDCs for these AFSCs.

9.3. Exportable Courses. N/A. There are no exportable courses for these AFSCs.

9.4. Courses under Development/Revision. The following courses are projected to be implemented based on this CFETP.

Course Number	Course Title	Training Location
L5AQJ4T031 01AB	Medical Laboratory Apprentice Phase I	JBSA-Fort Sam Houston, TX
L5ABO4T031 02AD	Medical Laboratory Apprentice Phase II	Various MTFs
L5AZO4T0X1 00BA	Frozen Blood Course	Travis AFB, CA
L5AZO4T0X1 00AA	Expeditionary Blood Transshipment Course	Travis AFB, CA
L7AZO4T0X1 00CA	Mobile Blood Operations Course	MTT Various OCONUS locations
L5AZO4T0X1 00DA	Apheresis Course	JBSA Lackland AFB, TX

9.5. Readiness related courses. The following readiness courses are available for members in funded authorizations that are postured into the relevant standard UTCs.

Course Number	Course Title	Training Location
L3ATP4XX3X 00AA	Expeditionary Medical Readiness Course (EMRC)	JBSA Camp Bullis, TX

NOTE: Initial medical readiness training, per DAFI 41-106 chapter 4, is provided in the Expeditionary Medical Readiness Course (EMRC) in conjunction with the course of initial entry to the medical AFSC. EMRC is conducted by the 937th Training Group, JBSA Ft Sam Houston Texas. Continued Medical Readiness training for the individual is the responsibility of each member's unit.

Section E – MAJCOM-Unique Requirements

There are currently no MAJCOM-unique requirements. This area is reserved.

Section F – Documentation of Training

10. Work Center Training Plans. The purpose of this section is to provide guidelines to document the training of enlisted medical personnel. Training documentation helps to assess readiness capability as well as individual strengths and weaknesses. It also aids compliance with all The Joint Commission, Accreditation Association for Ambulatory Health Care, and Health Services Inspections, and other regulatory requirements as applicable. Many work centers have a Master Task Listing (MTL), a list containing all the tasks that are to be trained in a work center, and a Duty Task List (DTL), a listing containing all the tasks to be trained on in a duty position. Duty sections have a Master Training Plan (MTP) and includes this CFETP along with AF Forms 797 and 1098. The supervisor creates the MTL, DTL, and MTP.

11. MyTraining. The successor system to AFTR and TRTR. Refer to your unit training manager (UTM) for the most current policies and guidance on training documentation. MyTraining is integrated into MyLearning applications with migrated data from legacy systems. MyTraining provides a one-stop shop to record all learning, whether it occurs in a specialized training or education program, on the job or off-duty, or even training with another military service. The MyTraining components are managed by the supervisor.

12. Documentation of Training. The purpose of this section is to provide guidelines and examples of proper documentation on the many forms used in training physical medicine and orthotic personnel. Training documentation helps to assess mission capability and readiness, individual strengths and weaknesses, resources needed to support quality patient care and defines requirements for individual career progression.

12.1. AF Form 797 is be used to record training for tasks that are not otherwise documented in the CFETP.

12.2. AF Form 1098 is used to list mandatory training requirements that may vary from facility to facility. At a minimum, these requirements should be reviewed on an annual basis and updated as required.

12.3. Qualification Training Progress Records were developed to enhance OJT. They provide the trainer with a breakdown of task performance skills to aid in performance evaluation. The evaluation of each task results in either a satisfactory or unsatisfactory score.

12.4. AF Form 623a. Use the AF Form 623a to document all progress of individual training. Document the start and completion dates of unit orientation and reference the date of the orientation checklist. In addition, document the member's entry into upgrade training, initial evaluation results, and periodic evaluations of training progress. Information on extensions, waiver requests, or breaks in training should be clearly documented. Document any decertification proceedings, to include dates, reasons for decertification, and other applicable information. Accomplish an initial evaluation when a new member arrives to the unit or when the member changes duty positions. Document all other actions pertaining to training IAW DAFMAN 36-2689. **NOTE:** Consult with your UTM regarding MyTraining and how to use the application to document training.
