BY ORDER OF THE
SECRETARY OF THE AIR FORCE

AIR FORCE MANUAL 13-1 BATTLE CONTROL CENTER (BCC), VOLUME 3

13 MAY 2026

Nuclear, Space, Missile, or Command and Control Operations

OPERATING PROCEDURES BATTLE CONTROL CENTER (BCC)

COMPLIANCE WITH THIS PUBLICATION IS MANDATORY

ACCESSIBILITY: This publication is available for downloading or ordering on the e-Publishing website at **www.e-Publishing.af.mil**.

RELEASABILITY: There are no releasability restrictions on this publication.

OPR: ACC/A3CI — Certified by: AF/A34

Supersedes: AFMAN 13-1 BCCV3, 20 October 2020 — Pages: 74

This publication implements Department of the Air Force Policy Directive (DAFPD) 13-1, *Command and Control (C2) Enterprise*. It establishes guidance for employment of the Battle Control Center (BCC). This publication applies to all civilian employees and uniformed members of the Regular Air Force, Air Force Reserve, and Air National Guard (ANG) performing Battle Management for the Theater Air Control System (TACS) enterprise. It does not apply to the United States Space Force or the Civil Air Patrol. This publication requires the collection and or maintenance of information protected by the Privacy Act of 1974 authorized by Department of Defense Directive (DoDD) 5400.07, *DoD Freedom of Information Act (FOIA) Program*. The applicable System of Records Notice, F011 AF XO A, *Aviation Resource Management System*, is available at: **https://dpcld.defense.gov/privacy/SORNS.aspx**. Ensure all records generated as a result of processes prescribed in this publication adhere to Air Force Instruction (AFI) 33-322, *Records Management and Information Governance Program*, and are disposed in accordance with (IAW) the Air Force Records Disposition Schedule, which is located in the Air Force Records Information Management System. Refer recommended changes and questions about this publication to the office of primary responsibility (OPR) using the Department of the Air Force (DAF) Form 847, *Recommendation for Change of Product*. Route DAF Forms 847, from the field through the appropriate functional chain of command. This publication may be supplemented at any level. See **paragraph 1.4** for specific requirements for coordination prior to certification and approval. The authorities to waive wing (WG) and unit level requirements in this publication are identified with a Tier ("T-0, T-1, T-2, T-3") number following the compliance statement. Submit requests for waivers through the chain of command to the appropriate tier waiver approval authority, or alternately to the publication OPR for non-tiered compliance items. The use of the

name or mark of any specific manufacturer, commercial product, commodity, or service in this publication does not imply endorsement by the DAF. Compliance with Attachment **2 and 3** is mandatory.

SUMMARY OF CHANGES

This updated manual incorporates substantial revisions and should be read in its entirety. Major Changes include updates to BCC operations, crew structures, qualifications/certifications, and administrative processes. Region-specific verbiage has been removed.

Chapter 1

GENERAL INFORMATION

1.1. General. This manual provides considerations for both in-garrison training and contingency operations, as they apply to air and space power functions listed in Air Force Doctrine Publication (AFDP) 1, *The Air Force*. This manual guides the operational readiness and employment of the BCC to conduct tactical Battle Management Command and Control (BMC2) and limited operational control in assigned Area of Responsibility (AOR) or Joint Operations Area (JOAs). Headquarters (HQ) Air Combat Command (ACC) is the lead MAJCOM tasked with organizing, training, and equipping the BCC weapons system. Additional instructions for reference include but not limited to: Air Force Manual (AFMAN) 13-1 GBMC2 Volume 2, *Ground Battle Management Command and Control (GBMC2) Standardization/Evaluation Program,* AFMAN 13-1BCC Volume 1, *Command and Control (BCC) - Training* and AFMAN 13-1BCC Volume 2, *Command and Control (BCC) - Standardization/Evaluation Criteria*.

1.1.1. The Air Force Forces (AFFOR) Operations Squadrons tasked to supply trained and ready forces to the BCC weapons system are designated “Battle Management Control Squadrons” (BMCS). The BCC provides persistent BMC2, tactical C2, Regional Air Defense Commander (RADC)/ Sector Air Defense Commander (SADC) and limited operational battle management to theater-level areas of responsibility. The BCC employs Combined-Joint All Domain Command and Control (C-JADC2) across multiple levels of security (MLS) in support of global combatant commanders (CCDRs) with dynamic, immediate, and tailorable BMC2 capabilities designed to meet the demands of major combat operations, pacing threats, and assigned missions. The BCC will integrate with Advanced Battle Management System (ABMS) technology, advanced sensor capabilities, and tailorable Battle Management Teams (BMTs) to empower the BCC against advanced pacing threats. The BCC’s persistence, resilience, and interoperability with other elements of the TACS make it a key global enabler of distributed and disaggregated pulsed operations in support of Long-Range Kill Chain (LRKC) and Integrated Targeting Cell operations. Reference **Table 1.1**. & **Figure 1.1** below for a complete list of BCC units and ancillary support units to the BCC enterprise.

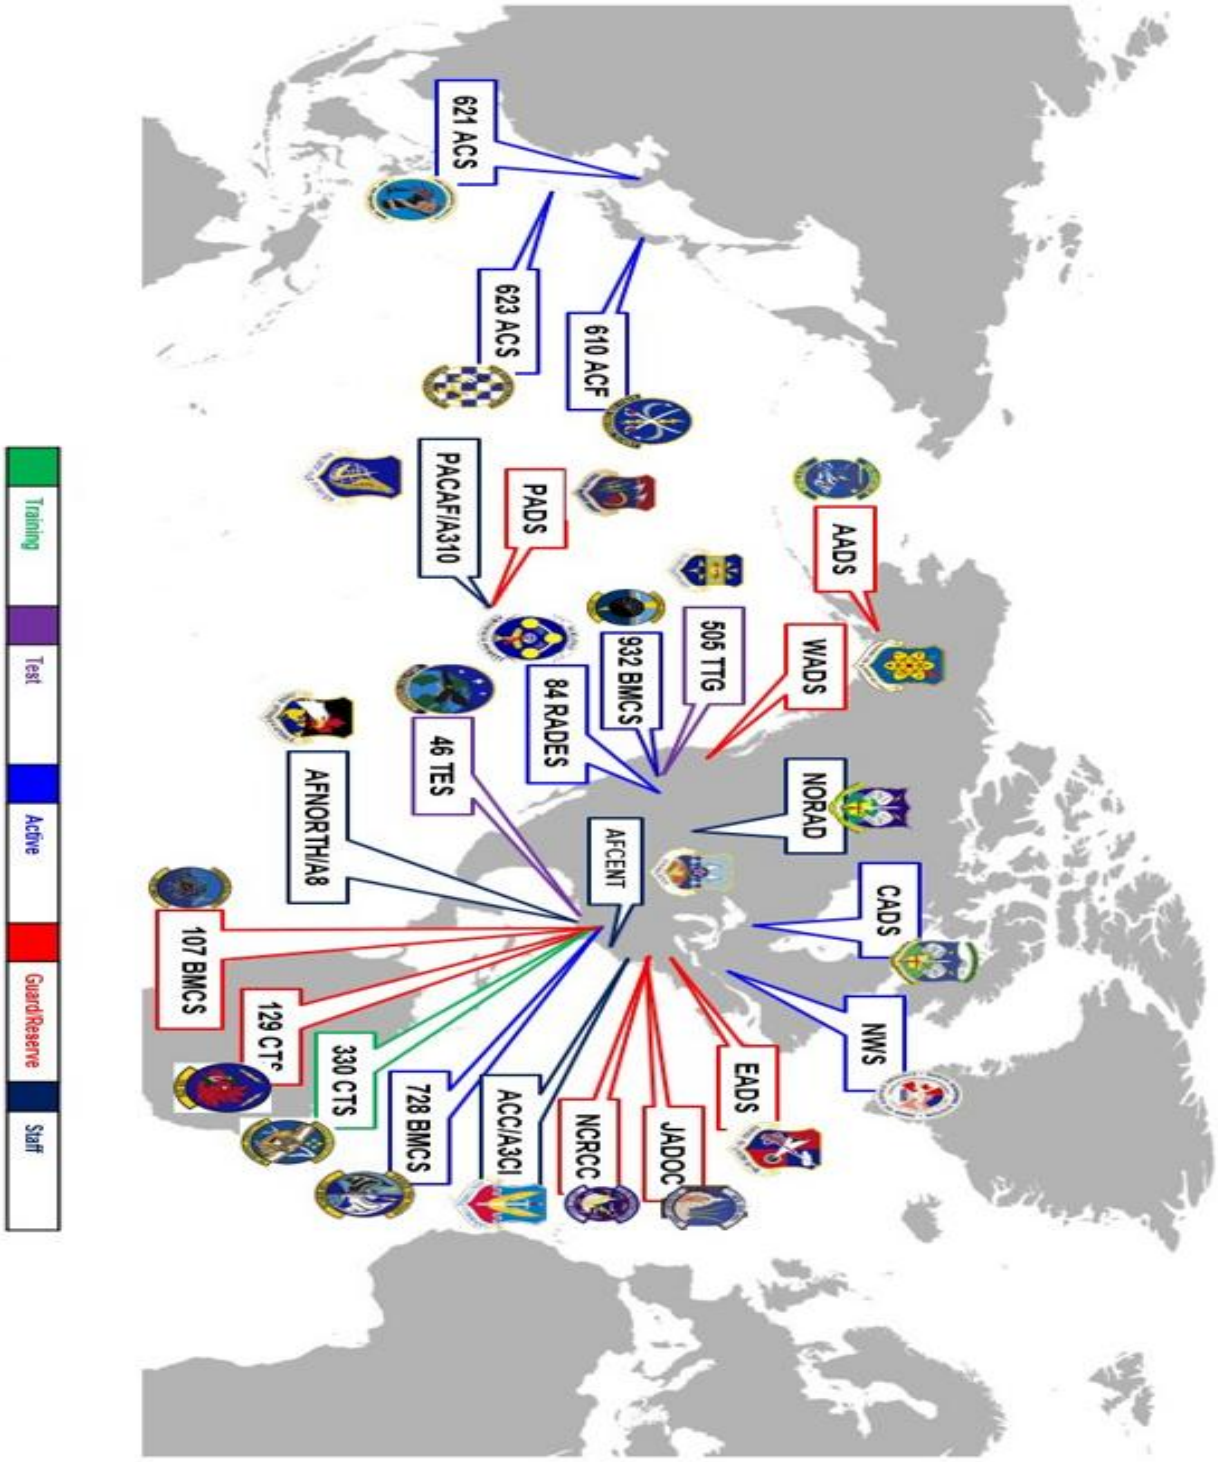

1.1.2. At the time of signing some Operations Squadrons that support BCCs operate under monikers other than BMCS.

Table 1.1. Air Force Forces (AFFOR) Integrated with Battle Control Center (BCC) Enterprise.

Type	Unit	Location
Training	330th Combat Training Squadron (330 CTS)	Robins AFB, GA
	129 CTS[1]	Robins AFB, GA
Active	727 EACS (AFCENT Operations)	Shaw AFB, SC
	728 BMCS	Robins AFB, GA
	Canadian Air Defense Sector	North Bay, Ontario, Canada
	932 BMCS	Beale AFB, CA
	610th Air Control Flight[2] (610 ACF)	Yokota AB, JPN
	621st Air Control Squadron[2] (621ACS)	Osan AB, JPN
	623ACS[2]	Kadena AB, JPN
Test & Support	505th Test Squadron (TS) (Detachment [Det] 2)	Beale AFB, CA
	46 TES	Eglin AFB, FL
	84th Radar Evaluation Squadron (84 RADES)	Hill AFB, UT
Staff	Air Combat Command Command and Control, Intelligence, Surveillance, and Reconnaissance Division (ACC/A3C) (Lead MAJCOM)	Langley AFB, VA
	ACC Training Support Squadron (TRSS)/Det 7	Robins AFB, GA
	Air Force Reserve Command Director of Operations (AFRC/A3/10)	Robins AFB, GA
	National Guard Bureau Director of Operations (NGB/A3/10)	Washington, DC
	North America Aerospace Defense Command (NORAD)[3]	Peterson SFB, CO
	Central Command (CENTCOM)[3]	Shaw AFB, SC
	Air Force Northern (AFNORTH)	Tyndall AFB, FL
	Pacific Air Forces (PACAF)[3]	Joint Base Pearl Harbor-Hickam, HI
Guard/ Reserve	116th Operations Group (116 OG) Det 1	Robins AFB, GA
	National Capital Region Coordination Center (NCRCC)[4]	Washington DC
	Joint Air Defense Operations Center (JADOC)[4]	Joint Base Anacostia-Bolling Washington, DC
	224th Air Defense Sector (ADS)	Rome, NY
	176th ADS	Joint Base Elmendorf-Richardson, AK
	225th Air Defense Sector	Joint Base Lewis-McCord, WA
	169th ADS	Wheeler Army Airfield, HI
	Reserve BCC Group	TBD

Notes:
1. The 129 CTS is both a Formal Training Unit (FTU) and an ANG Unit.
2. The 610 ACF, 623 ACS, & 621 ACS are in the process of converting to Control Reporting Center (CRC) units
3. Currently supported CCDRs..
4. Units are administratively subordinate to the 22th ADS providing defense of the National Capital Region.

Figure 1.1. Battle Control Center (BCC) Enterprise.

1.2. Supplements. NAFs/Service Component Commander (SCC) will route supplements to this volume to the ACC BCC FAM for coordination with ACC/A3C for review, endorsement, and formal coordination with AF/A34 for approval. Supplements will not contain procedures that are contrary to this manual. **(T-2)** After publication, NAF-level supplements are distributed by the issuing NAF to Air Force, Training and Certification Division (AF/A34T), ACC/A3C, CCDR, AFRC Director of Operations (A3/10), and NGB Airfield Operations and Command and Control Forces Division (NGB/A3C) OPRs.

1.2.1. Units will coordinate their supplements with the next higher entity, as applicable, prior to publication. **(T-2)** NGB units will coordinate their supplement with NGB/A3/10 who will forward to ACC/A3C for coordination prior to approval. AFRC units will coordinate their supplement with AFRC/A3/10 who will forward to ACC/A3C for coordination prior to approval. **(T-2)**

1.2.1.1. Supplemental guidance will not be less restrictive than the basic publication but can be more restrictive. **(T-2)**

1.2.1.2. Supplemental guidance will not contradict this manual. **(T-2)**

1.2.2. Additional forms required by MAJCOM supplements are approved and issued as AF Forms if they apply to more than one command and comply with Department of the Air Force Instruction (DAFI) 90-160 *Publications and Forms Management* and DAFMAN 90-161.

1.2.3. Guidance for MAJCOM and unit supplements is provided in DAFI 90-160.

1.3. Waiver Authority.

1.3.1. Waiver authority for requirements of this volume will be IAW DAFMAN 90-161. Waiver requests must come from CCs (or civilian directors) of the affected unit seeking relief from compliance through the command chain up to the appropriate tier approval authority (i.e., Tier 0, 1, 2, 3) (or ACC Combat Integration (ACC/A3CI) if non-tiered). **(T-2)** See DAFMAN 90-161, Table A10.1 for definitions of tier ratings. Sector Commanders are Wing (WG)/Commander (CC) equivalent for waiver authorities.

1.3.2. ACC retains T-2 waiver authority.

1.3.3. Waiver requests may be sent via email or memorandum and must include the items listed in **Table 1.2**.: Required Waiver Information. Approved waivers will be uploaded into the unit's management internal control toolset (MICT) and sent to applicable units Inspector General (IG) for inspection activity review and publication OPR’s situational awareness/filing. **(T-2)**

Table 1.2. Required Waiver Information.

Item #	Information
1	Reference and text of the specific requirement for which the CC or director is requesting a waiver
2	Rationale for the waiver: Explain which of the following three reasons IAW DAFI 90-160 apply and describe why
2a	The cost of compliance creates unacceptable risk to a higher priority task
2b	The expected cost of compliance outweighs the benefit
2c	Personnel cannot comply with the requirement due to a lack of resources (e.g., training, funds, equipment, facilities, guidance or manpower)
3	Time period or circumstance for which the waiver is required **(T-2)**
4	Risk mitigation measures the requesting CC implements during the waiver period **(T-2)**
5	Impact if waiver is disapproved **(T-2)**

1.3.4. WGs will forward a copy of all approved waivers for their units to ACC/A3C. ACC/A3C will forward a copy of all approved waivers to NGB/A3/10, AFRC A3/10, NAFs, and AF Information Operations Division (AF/A39C) as applicable. Units will forward all approved waivers and report all deviations, or exceptions without waiver, through their chain of command to MAJCOM OPR. **(T-2)**

1.3.5. Duration of waivers may be approved for a period not to exceed the requested waiver period or 30 calendar days after the approving CC's tour length, whichever is shorter.

1.3.6. File a copy of approved written waivers with this volume IAW DAFI 90-160.

Chapter 2

ROLES AND RESPONSIBILITIES

2.1. General. This manual establishes the roles and responsibilities, procedures, and guidance applicable to the conduct of operations of the BCC weapon system. Additionally, this manual provides operational guidance to BCC Squadron (SQ)/CC, Director of Operations (DO), operations supervisors, mission crewmembers, and maintenance and/or support personnel (where applicable). This volume, in conjunction with other governing directives, prescribes those procedures applicable to the operation of the BCC under most anticipated circumstances. It is, however, not a substitute for sound judgment on the part of the SQ/CC and/or DO and BCC personnel. Operational procedures not specifically addressed in this, or other accompanying guidance may be implemented if it enhances safe and effective mission accomplishment. The SQ/CC will report deviations performed without waiver, through their command channels, and inform ACC/A3C, within 48 hours, followed by a written report within seven days. **(T-2)**

2.1.1. Crewmembers may perform duties on any set of hardware where operator actions performed are substantively similar to those BMC2 actions performed on their primary system. Like systems include but are not limited to: Battlespace Command and Control Center - AirForce (BC3-AF), Battle Control System - Fixed (BCS-F), Cloud-Based Command and Control (CBC2), Primary Airborne Warning and Control System (AWACS) Display software, and Omniview. SQ/CCs are authorized to determine appropriateness of alternative systems in writing to the MAJCOM Mission Design Series (MDS) Functional Area Manager (FAM) for endorsement and coordination with ACC Flight Management Branch (ACC/A3TB). **(T-2)**

2.1.2. This publication does not provide tactics, techniques, and procedures (TTPs) for employing the BCC from a combat or contingency environment. However, guidance for tactical employment of the BCC can be found in the following: *Air Force Tactics, Techniques, and Procedures* (AFTTP) 3-1.BCC-FVEY, *Tactical Employment – BCC*; AFTTP 3-3.BCC-CUI, *Tactical Employment – BCC*; AFTTP 3-3.TACS, *Combat Aircraft Fundamentals-Theater Air Control System (TACS)*; AFTTP 3-2.17, *Multi-Service Tactics, Techniques, and Procedures for the Theater Air-Ground System, (TAGS) (BMCS)*; AFTTP 3-1.IPE, *Integrated Planning and Execution: (IPE);*AFTTP 3-3.IPE (S/FVEY) *Integrated Planning and Execution*; AFMAN 11-214, *Air Operations Rules and Procedures*, provide TTPs considerations for both training and contingency operations.

2.1.3. Offices of collateral responsibility for this publication are NGB/A3/10, AFRC A3/10, PACAF Operational Support Division (PACAF/A31), applicable CCMD

2.2. Headquarters Air Force (HAF).

2.2.1. AF/A34. Establishes directives and guides the execution and operations of the BCC weapon system.

2.2.2. Air Force Command and Control Division (AF/A34C).

2.2.2.1. Reviews and processes this manual for publication.

2.2.2.2. Reviews MAJCOM supplements to this AFMAN to ensure compliance with basic guidance in this manual.

2.2.2.3. Maintains liaison with HAF organizations, MAJCOM, and career field managers to ensure compliance by all unit supervisory staff and mission crewmembers.

2.2.2.4. Coordinates with HAF organizations and MAJCOM operations functions to ensure guidance in separate AFI and AFMANs conforms to and complies with basic AF guidance contained in this manual.

2.3. ACC Command and Control, Intelligence, Surveillance, and Reconnaissance Division (ACC/A3C).

2.3.1. ACC/A3C is the office of primary responsibility for this volume. ACC will be primarily responsible for establishing administrative processes. Lower echelons of command are primarily responsible for providing overarching guidance and monitoring the applicability and adherence of established operations procedures.

2.3.2. May supplement this manual as necessary and will review NAF, WG, Group (GP), and unit supplements to this manual.

2.3.3. Supplements will be sent to ACC/A3C for coordination prior to submitting for Air Force Deputy Chief of Staff for Operations (AF/A3) approval. **(T-2)**

2.3.4. Convenes conferences and working groups as necessary, to review and improve BCC operational guidance and procedures.

2.3.5. Coordinates and processes applicable DAF Forms 847 through command channels (i.e., GP/CC, CCDRs, and SCCs), and IAW DAFI 90-160, and forward to Air Combat Command Stan/Eval Branch (ACC/A3TV) for processing.

2.3.6. Ensures compliance with AFI and/or AFMANs and technical orders (T.O.s).

2.3.7. Coordinates with safety offices and other government agencies to assist in evaluation and/or determination of safety of flight and/or asset mishaps as requested and to determine and immediately initiate appropriate published corrective actions.

2.3.8. Conducts staff assistance visits to subordinate units at the direction of ACC 3 letter, or higher, and at the request of the SQ/CC. ACC will coordinate through the applicable WG Gatekeeper IAW DAFI 90-302, *The Inspection System of the Department of the Air Force.*

2.3.9. Observes execution of unit missions and/or training events, etc. when feasible, providing applicable feedback.

2.3.10. Provides functional area guidance to subordinate WGs, GPs and/or units.

2.3.11. Addresses time sensitive changes by AF Guidance Memorandum. Coordinates guidance IAW DAFMAN 90-161 with NGB A3/10 or AFRC A3/10 as applicable so that appropriate guidance can be issued seamlessly.

2.4. Groups.

2.4.1. Resolve major operational issues that arise between units within their purview.

2.4.2. Provide staff support and assists units to meet unit type code (UTC), mission capability statements, and missions' essential tasks readiness requirements.

2.4.3. Forward recommended supplements to this manual and any supporting documents to the parent organizations for coordination.

2.4.4. Identify operational shortfalls that adversely affect combat capability through appropriate channels IAW AFI 10-201, *Force Readiness Reporting*.

2.4.5. Review and maintain duty position descriptions for all assigned positions.

2.4.6. Detail a Battle Staff plan IAW NAF/SCC requirements and **chapter 5** of this document.

2.4.7. WG/CCs may delegate any automatically elevated GP level item to the WG A3, but no lower.

2.4.8. For units that do not have a Group or equivalent, the WG level will absorb GP responsibilities. For the purposes of this volume Sector Commanders are considered WG/CC equivalent.

2.5. Squadron Commanders (SQ/CCs).

2.5.1. Ensure BCC crewmembers are equipped, organized, and trained to a Combat Mission Ready (CMR), Basic Mission Capable (BMC), and Basic Qualification (BQ) status. **(T-3)**

2.5.2. Determine the utilization of BMC/BQ members in writing.

2.5.3. Ensure BCC maintenance and support personnel are trained to perform their duties and responsibilities to positively affect operational mission accomplishment IAW the unit's mission capability statement and mission essential tasks readiness requirements. **(T-3)** SQ/CCs will report deviations through the operational chain-of-command. **(T-3)**

2.5.4. Develop local notification and reporting procedures for anomalous activity and possible cyber incidents. These procedures will not contradict AFI 17-203, Cyber Incident Handling. **(T-3)**

2.6. Organization.

2.6.1. ACC Director of Operations (ACC/A3) provides management of their command operations programs and establishes responsibility for implementation of the program as outlined in this manual.

2.6.2. ACC/A3C provides guidance to conduct BCC operations and implements the program as outlined in this manual in coordination with CCDRs and Service Component Commanders safely and efficiently.

2.6.3. NAFs may use CMR and/or BMC augmentees from other CCMDs to support or conduct cross-command program reviews of operations procedures, with coordination and concurrence of the organizations involved (e.g., ACC/A3C, PACAF/A310, AFRC A3/10, and NGB A3/10). Augmentees will use the criteria of the CCMD they are augmenting. Augmentees will be CMR and/or BMC in the MDS of the unit in which they are supporting IAW AFMAN 13-1BCC V1. **(T-3)**

Chapter 3

ORGANIZATION AND MISSION PLANNING

3.1. Employment Planning. The BCC is a service retained asset apportioned by GFMAP processes. The BCC may be employed in support of theater-level CCMD and operational task forces. As a fixed platform, the BCC provides a persistent and tailorable capability through the use of BMTs and MLS access to deliver rapid effects while minimizing logistical costs. The BCC's ability to provide sensor, data, and comm fusion worldwide while maintaining standoff survivability makes it ideally suited for contingency operations and the demands of strategic peer readiness.

3.2. Mission Planning. The SQ/CC will be responsible to organize, train, and equip the unit to execute assigned operations and associated mission planning needs. The SQ/CC may delegate authority to direct the execution of unit operations IAW SQ/CC intent to the DO. The CC and/or DO will ensure that all operations personnel are provided with the requisite support to plan and execute the mission. They will ensure the mission crewmembers and mission planners have no non-operational barriers to mission planning and ensure that every mission is thoroughly planned, briefed, executed, and debriefed. **(T-3)**

3.2.1. The responsibility for the conduct of mission planning is shared between mission crew leads and the designated mission planning cell (MPC) chief. In coordination, they will ensure the BCC is properly prepared for the assigned tasking. **(T-3)**

3.2.2. The CC and/or DO will ensure that the intent of mission planning, whether for an in-garrison daily training event or contingency operations, is to prioritize and focus the efforts of the BCC and the mission crewmembers to meet established objectives. **(T-3)** The CC/DO, directly or through the MPC, will delineate areas of responsibility, fully develop courses of action (COAs), identify required resources, and identify, evaluate, and mitigate risks and/or threats. **(T-3)**

3.3. Mission Planning Cell (MPC). The MPC ensures that mission crewmembers have access to the most current operational and intelligence information for effective mission execution derived from all available sources. **(T-3)** The SQ/CC will activate the MPC in anticipation or receipt of a real-world alert, warning, or execute order.

3.3.1. The MPC should include a chief (Section Lead (SL)/Mission Commander (MC)), and crew representatives consisting of Air Battle Manager (ABM), Weapons Director (WD), Mission System Operator (MSO), Intelligence (INTEL), and other certified positions that the unit uses. The MPC should also be activated for mission training exercises to develop and validate unit planning TTPs. The unit should maintain capacity for an MPC IAW **Table 3.1** as a minimum, however, an MPC can and should be tailored by the SQ/CC for the assigned and anticipated missions.

3.3.2. When activated, the BCC MPC is the single point of contact for the planning, tactical level coordination, briefing, and/or debriefing of tasked completed missions.

3.3.2.1. The MPC is responsible for unit coordination with the Air Operations Center (AOC). The MPC will support the mission crew in any desired coordination with AOC/Combat Operations Division (COD). **(T-3)**

3.3.2.2. When delegated by the Chief of Weapons and Tactics (DCOK) which is more commonly known as the Chief of Weapons and Tactics (DOK/DOW), the MPC is responsible for maintaining and distributing unit/positional standard system profiles.

Table 3.1. Battle Control Center (BCC) Mission Planning Cell (MPC) Manning.

Function	#	Minimum Qualification and/or Certification
MPC Chief	1	13B Advanced School Graduate (WIC, WTI), MC/SL - certified ABM
Deputy MPC Chief	1	Experienced 13B or W1C5X1D
MSO	4	Multi-Tactical Data Link (MTN) Advanced Joint Interoperability (JT-102, SEI-1BB)[1]
ABM/WD	2	Experienced ABM/WD
Intelligence Officer (IO)	1	14NX
Intelligence Non-Commissioned Officer (INCO)	2	1N0X1
Systems Operations	1	17D and/or 1D7

Notes:

1. Prerequisites are IAW AFMAN 13-116 *Tactical Data Link Planning and Operations*.

If necessary, qualified personnel from the mission crew may augment the MPC as required.

MPC may be tailored in size, and/or manning, and/or grade to meet mission requirements.

MPC personnel may also substitute for mission crewmembers if required.

3.4. Intelligence (INTEL). BCC INTEL personnel provide the SQ/CC and mission crew as part of the MPC, accurate, timely intelligence support to enhance operations mission planning to effectively execute assigned missions IAW AFMAN 14-402, *Intelligence Mission Roles, Responsibilities, and Program Management.* MPC INTEL is responsible for, but not limited to the following:

3.4.1. INTEL personnel will be responsible for planning and executing the BCC intelligence functions during all phases of operations to include, but not limited to mission planning, supporting unit theater certification programs, threat analysis, threat training, briefing and/or debriefing support, and after mission reporting through directed channels.

3.4.2. INTEL personnel will ensure the unit is equipped with all intelligence systems, checklists, and reference library required to support operations. **(T-3)**

3.4.3. Guidance for INTEL personnel to organize, train and be evaluated is provided in AFMAN 14-402, as applicable.

3.4.4. If no unit intelligence personnel are assigned and/or available, the SQ/CC and/or DO will initiate a memorandum of agreement for unit INTEL support with the appropriate host WG and and/or GP organization. **(T-3)**

3.4.5. Mission planning, briefing and/or debriefing and reporting guidance should be IAW AFTTP 3-3.IPE, and are tailored by Local Operating Procedures (LOP) and Theater Directives.

3.5. Mission Planning Overview. AFTTP 3-1.IPE and AFTTP 3-3.IPE should be consulted for more in-depth employment and operations planning considerations. When the MPC is not activated, mission crewmembers will accomplish, as a minimum, the following items:

3.5.1. Develop a communication plan and obtain equipment status from the unit Communications Focal Point (CFP) Section. **(T-3)**

3.5.2. Manipulate standard crew profile and perform updates to meet mission requirements. **(T-3)**

3.5.3. Plan sensor, communications, and TDL employment IAW applicable mission objectives, directives, LOPs, checklists and guides. **(T-3)**

3.5.4. Assess impact of equipment limitations and develop COAs to mitigate risk to mission operations. **(T-3)**

3.5.5. Establish BCC mission objectives with the apportioned AOC/Chief of Combat Plans Division (CPD) and/or the appropriate section of the joint air operations plan, master air attack plan, rules of engagement (ROE), air operations directive, air tasking order (ATO), airspace control order (ACO), airspace control plan, operational tasking data link, tactical operational data, special instructions (SPINS), etc.

3.5.6. Perform post mission data analysis and/or reconstruction and archive mission results /lessons learned as required. **(T-3)**

Chapter 4

OPERATIONS

4.1. Battle Control Center (BCC) Mission. When apportioned, the BCC mission is to facilitate theater level distributed BMC2 and decentralized execution of joint or combined air operations on behalf of the Combined Forces Commander (CFC) and/or the Joint Forces Commander (JFC) via the Combined Forces Air Component Commander (CFACC) and/or the Joint Forces Air Component Commander (JFACC). The BCC executes its assigned mission as assigned by the CFACC or JFACC, IAW the joint or combined air operations plan. Additionally, the BCC will support the CFACC or JFACC air operations current planning and execution effort by maintaining a common tactical picture (CTP) for the TACS which contributes to an integrated AOC common operational picture (COP) for senior leaders. The BCC conducts and/or provides the following mission essential functions:

4.2. Doctrinal Missions. BMC2 of counterair and counterland operations, air mobility operations, personnel recovery (PR), force projection, offensive and defensive counter air, and force protection. Guidance to conduct these missions are IAW Air Force Doctrine Publication (AFDP) 3-0, *Operations and Planning;* AFDP 3-01, *Counterair Operations;* AFDP 3-03, *Counterland Operations;* AFDP 3-05, *Special Operations;* AFDP 3-0.1, *Command and Control;* AFDP 3-50, *Personnel Recovery;* AFTTP 3-2.90*, Multi-Service Tactics, Techniques, and Procedures for Personnel Recovery;* AFDP 3-52, *Airspace Control;* AFDP 3-36 *Air Mobility Operations.*

4.3. COMREL. As a key C2 element of the TACS, the BCC is subordinate to the AOC IAW AFTTP 3-1.AOC, (U) *Air Operations Center (AOC)* (S/FVEY) and AFTTP 3-3.AOC, *Combat Fundamentals.* The BCC is responsible for conducting persistent BMC2 of the JOA IAW AFMAN 11-214. The BCC directly supports the JFC and the CFACC or JFACC. The BCC is normally under the operational control of the COMAFFOR and provides, as delegated, battle management and decentralized execution of air operations in an assigned battle management area (BMA) when Tactical Control (TACON) to the JFACC or CFACC.

4.3.1. The BCC is horizontally aligned with the other TACS elements (e.g., E-3G AWACS or CRC, and Tactical Air Control Party C2, but resides at a higher echelon in persistence, capacity, and information fusion, specifically within Echelon 4: Persistent Tactical BMC2 of the Evolved TACS. It also integrates with joint C2 resources (e.g., the Theater Air-Ground System (TAGS)). AFTTP 3-2.17, *Multi-Service Tactics, Techniques, and Procedures for the Theater Air-Ground System (TAGS)* provides integration procedures for each service C2 and airspace management systems.

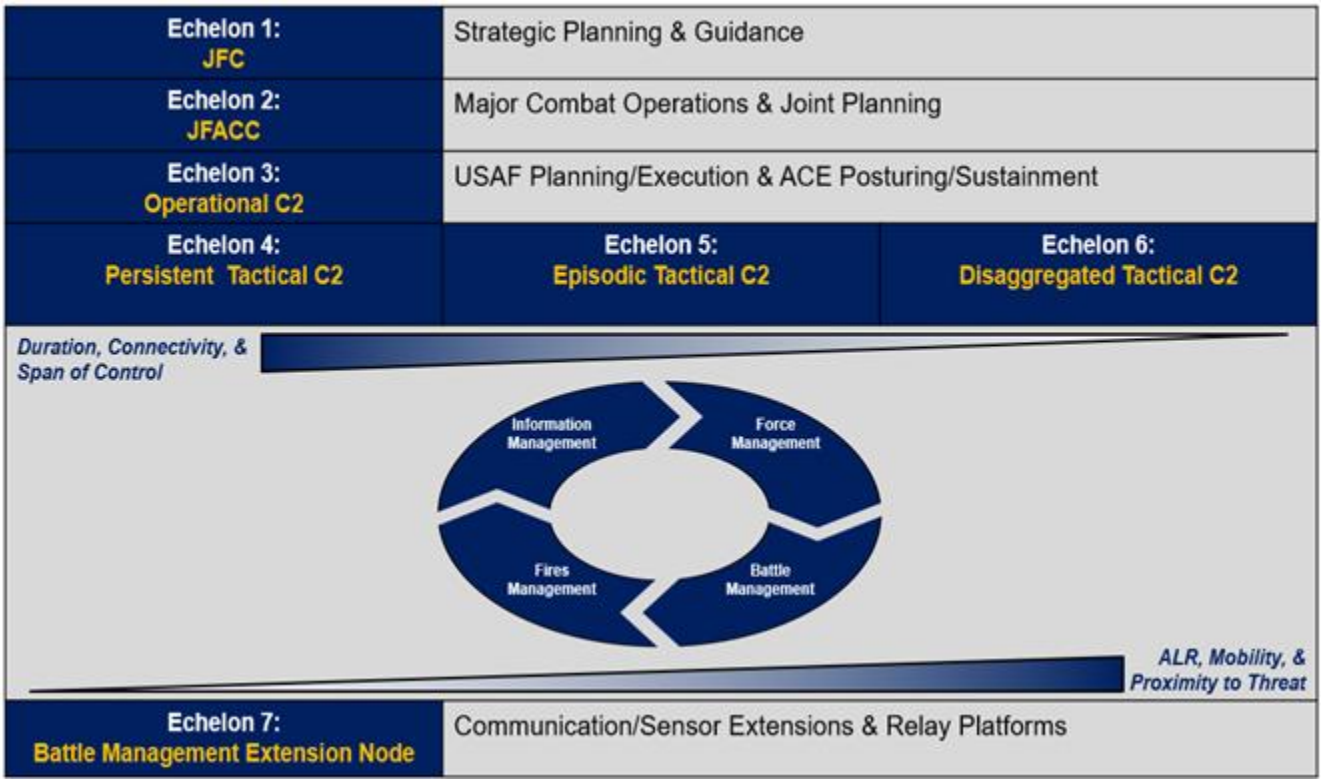

4.3.2. The mission's success is dependent upon operationally configured equipment, systems and assigned personnel in CMR, BMC, or basic qualified status to prosecute the mission. Unit personnel and mission crewmembers will be thoroughly prepared to practice communications and operations security IAW AFMAN 17-1302-O, *Communication Security (COMSEC) Operations*, and AFI 10-701, *Operations Security (OPSEC)*, and be knowledgeable of current friendly and adversary operations information to effectively operate in contested and highly contested environments with fully operational or degraded systems. **(T-3)**

4.3.3. As a fixed entity the BCC will deploy crew members in support of CCDR tasks. CCDRs may exercise Operational Control (OPCON) and/or TACON of mission crews deployed in support of operations while such crews are conducting assigned missions from the weapons system. OPCON and TACON reverts to the members home unit when the mission duty period (MDP) has ended.

4.3.4. Crew members home unit will CCDR retain Administrative Control (ADCON) of all crew members regardless of operational employment status.

4.3.5. For the ANG members supporting T-10 operational employment status, they are ADCON to the 201 Mission Support Squadron, Air National Guard Readiness Center

Figure 4.1. Evolved Theater Air Control System (TACS).

4.4. Battle Management Command and Control (BMC2) Functions. The BCC has the capability to conduct Air Surveillance, Combat Identification, Airspace Management and Tactical Datalink Management, and is evolving to support pulse operations, long range kill chains, and providing coordinated Tac C2 for geographically separated AEWs deployed in an Agile Combat Employment (ACE) construct. The BCC can provide BMC2 of forces across the continuum of control, including assuming the role and responsibilities of RADC or SADC, IAW Joint Publication (JP) 3-01 *Countering Air and Missile Threats*

4.5. Flight Crew Information File (FCIF). The FCIF is multi-volume and available to mission crewmembers, consisting of current information essential to the conduct or mitigation of operations or emergency situations. The read file portion of the FCIF centralizes significant, time sensitive issues and procedures that are to be disseminated to operations personnel. The content and management of the FCIF is prescribed in AFMAN 13-1 GBMC2V2. The MC/SL or senior ranking officer is responsible for ensuring all crewmembers read required read files prior to assuming operational duties.

4.6. Local Operating Procedures (LOP). Each unit will create LOPs which will further define procedures for operations. **(T-3)**

4.6.1. DAFI 90-160, prescribes the paragraph method as the only authorized approach to supplement an AFMAN, therefore supplemented material must be arranged IAW the basic publication it is to supplement. Units may publish guidance in a single, stand-alone local operating instruction (OI) and/or manual instead of supplementing this AFMAN.

4.6.2. The DO will sign the unit's LOP and ensure it is filed in Volume 3 of the FCIF.

4.6.3. The DO will ensure the LOP is reviewed at least every 18 months and certified with a memorandum for record. A dated LOP within 18 months containing the DO signature satisfies this requirement.

4.6.4. Interim changes (ICs) made to the LOP do not cause the LOP to expire and will be formally integrated into the LOP the next 18-month review period. MFRs will not be used to extend an LOP with ICs attached.

4.7. Forms and Logs. This manual prescribes and directs the use of AF Form 4145, *Daily Activity Log* and Air Force Technical Order (AFTO) Form 781, *ARMS Aircrew/Mission Flight Data Document*. Units with access to the Learning Management System, the Patriot Excalibur system, Command and Control Incident Management Emergency Response Application (C2IMERA) or other MAJCOM-approved programs will use the applicable program as the primary system of documentation. **(T-3)** The DO will ensure AF Forms 4145, or locally generated equivalent forms are readily available to meet training and operational requirements in support of BCC daily operations prior to the start of mission operations. **(T-3)**

4.7.1. The MC, DO designee, or senior ranking operator will be responsible for the Daily Activity Log. The form is required to be completed and signed at the completion of each mission crew shift and forwarded to the DO for approval and signature. The Daily Activity Log provides a complete summary of all mission crew operations for a particular shift and is an important tool for data correlation and analysis.

4.7.2. Mission crewmembers will use AF Form 4145 or locally generated equivalent form to brief missions, record mission results, and serve as a record of unit and individual control activities. MC/SL/ABMs will use the form to record all battle management activities conducted and will forward to the SL for review and signature. **(T-3)** WDs will use the form to record all control activities conducted and will forward to the SL for review and signature. **(T-3)** If required by local guidance, the AF Form 4146, *Mission Briefing Guide* or equivalent form will be attached to AF Form 4145 and submitted to the unit Host Aviation Resource Management office, IAW 1C0X2 Guide for Ground Based Radar Air Battle Manager Duties, and DAFMAN 11-401, *Aviation Management*. **(T-3)**

4.7.3. Units should maintain an Operations Logbook for continuity across crews. The intent of the Operations Logbook is to provide detailed continuity to oncoming crewmembers of significant events, system alibis, or activities which present an immediate/near-term impact to operations, open coordination, and/or Commander Critical Information Requirements (CCIRs). The Operations Logbook may be physical or electronic and should be maintained by the MC or DO designated position. At a minimum, the Operations Logbook should maintain the date-time-group when the issue was reported, the name of the individual reporting/logging the information, impacts, Estimated Time of Completion (ETIC)/Estimated Time of Return to Operation (ETRO) or follow-up time.

4.7.4. Operational units will develop and implement an Operational Risk Management (ORM) tool. At a minimum, tools will capture crew readiness, risks to force, and risk to mission. Tools should be completed at every shift change by the oncoming shift and before Start of Exercise (STARTEX) of any exercise or training event.

4.8. Crew Force Management. Proper manning, mission crewmember rest, fatigue management, and duty limitations are factors considered for effective mission crew management. This section prescribes MDP, mission duty hours (MDH), and mandatory rest duration for BCC mission crewmembers. Basic guidance for fatigue management strategies and waiver authority procedures follows:

4.8.1. Mission Duty Period (MDP). MDP will commence when the mission crewmember arrives at the duty location either (physically or via telecommute) for the mission briefing, mission, or other official non-crewmember related duties and ends when the crewmember departs the duty location. The crewmember MDP will not exceed 14 hours.

4.8.1.1. The waiver authority for up to 16 hours is the applicable Group (GP)/CC and may be delegated to the SQ/CC. If delegated and the SQ/CC provides an MDP waiver the SQ/CC will back brief the GP/CC within 48 hours.

4.8.1.2. WG/CCs are the waiver authority for requests above 16 hours.

4.8.1.3. Waivers are to be used on a case-by-case basis and are to be individual in nature. The MC or senior ranking officer will ensure Crew Resource Management (CRM)/ORM is reassessed prior to exceeding any 14-hour MDP. The MC or senior ranking officer will ensure that instances of extended MDP will be annotated/reported, at a minimum detailing authorizing official (i.e., appropriate waiver authority), extenuating circumstances, and crewmember(s) affected.

4.8.1.4. MAJCOM, NGB, AFRC A3/10, and NAFs/SCCs may request reports and details of all waived and modified MDP requests and approvals.

4.8.1.5. A circadian rhythm shift is defined as any MDP start time that will shift the starting time of the crewmembers next MDP forward by 8 or more hours from the start of the last MDP that the crewmember worked regardless of time off between MDPs. (e.g. Capt Fallon’s last worked MDP was from 0800z-1600z on Monday. Capt Fallon’s next MDP is scheduled for 0000z-0800z on Wednesday. Capt Fallon’s Wednesday shift would constitute a circadian rhythm change).

4.8.2. MDH are calculated as those hours within the MDP when a current, qualified/certified mission crewmember performs the assigned mission on position. Briefing, debriefing, and breaks between sitting position count towards MDH. **Table 4.1** prescribes the maximum MDH worked for the prescribed periods. MAJCOM, NGB, and AFRC may request reports and details of all waived and modified MDH requests and approvals.

4.8.3. Crewmember Rest. Rest is compulsory for crewmembers and must be adhered to prior to performing all duties involving operations and consists of a minimum of 10 non-duty hours before the MDP begins. Rest affords the crewmember free time and includes time for meals, transportation, and rest. This time must include an opportunity for at least 8 hours of uninterrupted sleep. Crewmember rest must not begin until post-positional and non-crewmember responsibilities are completed. Each crewmember will individually be responsible to ensure sufficient rest during crewmember rest periods is obtained. The OG/CC may waive all or any part of a crewmember rest period on a case-by-case basis. Standing waivers are not authorized.

4.8.3.1. The assigned MC (or designee) may initiate mission-related communication with official agencies and crew members without interrupting crew rest.

4.8.3.2. MAJCOM, NGB, and AFRC may request reports and details of all waived and modified mission duty hour requests and approvals.

4.8.4. Consumption of Alcohol. Mission crewmembers will not perform operational duties within a minimum of 12 hours of consuming alcohol or other intoxicating substances including, but not limited to, prescribed medication, or if impaired by alcohol or any other intoxicating substance as noted above that would affect one's judgment.

4.8.5. Crew Resource Management (CRM)/Operational Risk Management (ORM). Squadrons must define and implement a CRM/ORM program. While AFMAN 11-290, *Cockpit/Crew Resource Management and Threat & Error Management Program* does not pertain to ground operations, the AFMAN serves as a model for how ground crew programs can be implemented. Details of the squadron ORM program will be found in the LOP, OI, or Unit Supplement to this document.

4.8.6. Crew Scheduling.

4.8.6.1. BCC mission crewmembers should be prepared for surge operations. Worst case scenario for contingency operations places the BCC in surge operations for indefinite periods of time. For Steady-State/In-Garrison Operations, **Table 4.1** below provides guidance for allowable MDP that will not be exceeded. MDP is the total period of time, calculated in accumulative MDH, and begins when the member arrives at the unit to begin their shift and counts continually regardless of time spent on position. The MDP ends once handover is complete with the relieving crewmember at the conclusion of the assigned shift.

4.8.6.2. The SQ/DO will ensure that Duty not Involving Flying (DNIF)/Duty not Involving Controlling (DNIC) cover manning is accounted for when crew schedules are developed. **(T-3)**

Table 4.1. Battle Control Center (BCC) Mission Duty Hour (MDH) Limits.

Mission Duty Hour (MDH) Limits	Comment
No More Than (NMT) 75 MDHs in 7 days	Waivable by SQ/CC
NMT 200 MDHs in 30 days	Waivable by GP/CC / OG/CC
NMT 600 MDHs in 90 days	Waivable by WG/CC
NMT 7 circadian rhythm shifts in 90 days	Waivable by GP/CC / OG/CC
Less than 48hours of non-duty time between circadian rhythm shifts	Waivable by SQ/CC
Note: Waivers will only be granted on a case-by-case basis.	

4.9. Declaring Operational Status. A fully mission capable (FMC) system is the ultimate objective of the maintenance effort. The crew leadership will declare the operational status of the BCC weapons system based on the operational tasking through appropriate reporting channels. For statuses other than FMC the crew leadership will report the estimated time required to return to FMC. Mission capable status is characterized and reported as meeting one of the following. (**Note:** C*rew leadership is normally the SL, but some or all of these responsibilities could be assumed by the MC if an MC is assigned to the crew*). This manual, crew aid checklists, unit, theater contingency LOPs, and SPINS, as applicable, outline the conditions to declare operational status for both contingency and in-garrison operations.

4.9.1. Units will use apportioned CCDR's theater specific guidance for determining operational status of the weapons system. In the absence of directive theater guidance, the minimum operational requirements will be determined by the GP/CC or OG/CC.

4.9.2. **Fully Mission Capable (FMC)** . All mission support systems, subsystems, and components are functioning as designed. FMC provides the capability to fully accomplish 100% of the mission objectives tasked by the CFACC or JFACC or the established in-garrison training objectives without mission degradation or impact.

4.9.3. **Partially Mission Capable** . One or more mission support systems, subsystems, or components are not functioning. Partially mission capable status denotes an ability to accomplish some, but not all, of the established mission objectives tasked by the CFACC or JFACC or the established in-garrison training objectives while experiencing partial mission degradation.

4.9.4. **Non-Mission Capable** . The total inability to accomplish the assigned mission objectives tasked by the CFACC or JFACC or any portion of the established in-garrison training objectives due to failure of mission support systems, subsystems, or components.

4.9.5. **Risk Mitigation** . After thorough risk mitigation IAW AFI 90-802, *Risk Management*, and Air Force Policy Directive (AFPD) 10-24, *Mission Assurance*, crew leadership will determine a COA for the feasibility of continuing mission operations under degraded conditions (e.g., degraded sensors, support equipment, required CMR and/or BMC personnel).

4.10. Operational Status. When determining operational status crew leadership will: ensure the minimum mission equipment needed is available; risk mitigation requirements are met; report status to the CFP (or unit specific equipment/maintenance entity) and higher echelon C2 authority (e.g., AOC) to declare operational status. Prior to declaring operational status, crew leadership will consider the following in combination with specific CCDR and OG/CC guidance:

4.10.1. Previously planned UTCs are on-site and operational to accomplish the tasked mission. **(T-3)**

4.10.2. The crew leadership, regardless of having received a threat assessment by appropriate higher echelon authority (e.g., AOC), will establish acceptable risk to the BCC. **(T-3)**

4.10.3. The crew leadership will update the mission crewmembers with changes as appropriate. **(T-3)**

4.10.4. Once equipment is released to the mission crew, crewmembers will initiate checkout of equipment utilizing mission crew aids, LOPs, and standard operating procedures as appropriate.

4.10.5. Database management, which includes the battle management computer, support databases, and communication systems; will be monitored to provide an accurate digital display and transfer of battle management data and commands.

4.10.6. All mission support equipment (e.g., datalinks, radios, computers, encryption devices) must be available to conduct assigned tasking. **(T-3)**

4.10.7. The BCC has established communications with organizations exercising TACON. In addition, communications are established with all external agencies and units in which the BCC must have immediate communications and datalink connectivity to effect mission operations. **(T-3)**

4.10.8. Readiness and coverage of applicable sensors and radios. **(T-3)**

4.10.9. Calculated ORM score. **(T-3)**

Chapter 5

BATTLE STAFF

5.1. Battle Staff Overview. The Battle Staff is a discretionary complement to the BCC mission crew and functions as operations tempo dictates or as directed by apportioned CCDRs. It provides both operational and unit level administrative support to the mission crew. Battle Staff members are composed of members from the operations, mission support and CC's staff fitting specific rank and certification requirements. Additional Unit Manning Document (UMD) requirements may be levied by the apportioned CCDR to meet operational needs. The WG/CC, in conjunction with the CCDR, is responsible for defining Battle staff roles and functions. The WG/CC may activate the Battle Staff as necessary due to changes in the threat or directed missions from higher headquarters (HHQ) and apportioned CCDRs. The Battle Staff may be activated for an indefinite period. When the Battle Staff is fully formed, the WG/CC determines overall responsibility for the unit's activities and determines which responsibilities are assumed by the Battle Staff and which remain with the mission crew. Units will define applicable Battle Staff in local OIs or supplements. Members of the Battle Staff composition should not be part of the mission crew or responsible for mission crew responsibilities. **(T-3)**

5.1.1. CCDRs with apportioned BCCs should provide or certify specific operational instructions or supplements to this chapter detailing Battle Staff employment, roles, and responsibilities for their operating area.

5.1.2. The Battle Staff is not a Wing Operations Center (WOC) or Crisis Action Team (CAT) and will not assume the duties of or act in place of either.

5.2. Battle Staff Composition. The WG/CC, based on the mission tasking, may tailor the Battle Staff. The WG/CC may also tailor and selectively man positions within the Battle Staff for specific operations. The Battle Staff normally consists of the Battle Commander (BC) and/or DO, IO, Battle Management Superintendent and the CFP. The BC may add additional personnel as the operational mission and support activities dictate. Examples of potential BCC Battle Staff positions include but are not limited to: **(T-3)**

5.2.1. CC/BC. The CC or BC is responsible to the AOC for the unit's overall execution of the mission. In the absence of the CC, the designated BC assumes the duties.

5.2.2. Operations Director. In addition to assuming the role of BC when required, the Operations Director is responsible for providing AOC direction to the mission crew.

5.2.3. IO/INCO. The IO/INCO is responsible for sourcing and receiving operational intelligence assessments and intelligence data and providing intelligence updates to the Battle Staff and the mission crew. The IO/INCO also coordinates with HHQ intelligence sources.

5.2.4. Liaison Officer. The Liaison Officer is primarily responsible for coordination and integration of their service, service partner, governmental, or non-governmental agencies, assets into the contingency mission set including integrated fires control, datalinks, communication, assigned air assets, or any other specifics required for successful mission accomplishment.

5.2.5. Battle Management Superintendent. The Superintendent assists in managing the unit's activities, facilitating the interaction between the Battle Staff, mission crew and mission support functions.

5.2.6. Communications Focal Point (CFP). When employed, the CFP is a consolidation of all support activities within the BCC. The CFP functions in direct support of the unit's operational mission and includes, but is not limited to, maintenance control, telephone administration desk, and traditional network help desk. The CFP collects data from internal and external sources (such as unit work centers, the Defense Information Systems Agency, and Air Force Network Operations). In addition, the CFP monitors and coordinates scheduled and unscheduled maintenance, maintaining visibility of equipment and systems metrics and indicators.

Chapter 6

MISSION CREW PROCEDURES

6.1. Mission Crew Overview. The BCC total mission crew composition will vary depending on the assigned AOR, theater directives, weapons system configuration, and number and type of mission BMAs assigned. **Table 6.1** depicts the minimum baseline manning for a BMT. **Figure 6.1** depicts standard crew structure and may be tailored by the CC/DO but is always determined by the mission tasking and directed by crew leadership. Below is a listing of BMT manning that will exist in all BCCs. The CC and DO may supplement BMTs with additional specialties to meet mission needs. A mission crew consists of two or more BMTs and associated MC (if an MC is required). A mission crew may also contain non-BMT supporting teams (e.g. Non-Kinetic Operations (NKO), Cyber, etc.).

6.1.1. Area of Operations (AOR). Per JP 1 Volume 1, *Joint Doctrine*, AOR is the geographical area associated with a CCMD within which the CCDR has authority to plan and conduct operations. See also CCMD. BCCs are organized, trained, and equipped to support theater level tasks. These tasks are in support of BMC2 effects for a CCDR assigned AOR.

6.1.2. Mission Crew. Mission crews manage an entire AOR made up of multiple BMAs with respect to the scope, scale, and responsibility required of the tasked area. A mission crew is led by an MC and consists of more than one BMT.

6.1.3. Battle Management Areas (BMAs). BMAs are specific areas within an AOR requiring specialized BMC2 of tasked assets. BMAs are defined by a combination of mission scope, scale, or responsibility.

6.1.4. Battle Management Team (BMT). BMTs manage specific BMAs based on the scope, scale, and responsibility required of the tasked area. Details are listed in **Table 6.1**. Augmented BMTs may manage entire AORs considering the scope and scale of the AOR. A BMT is led by an SL and may contain one or more tactical teams.

6.1.5. A tactical team consists of up to two MSOs and WDs led by an ABM.

6.1.6. INTEL (14N/1NO) and Cyber support (17D/1D7) may be added to BMTs as directed by GP/CCs or CCDR needs. Added members will be part of a BMT or tactical team led by a qualified ABM or certified SL/MC.

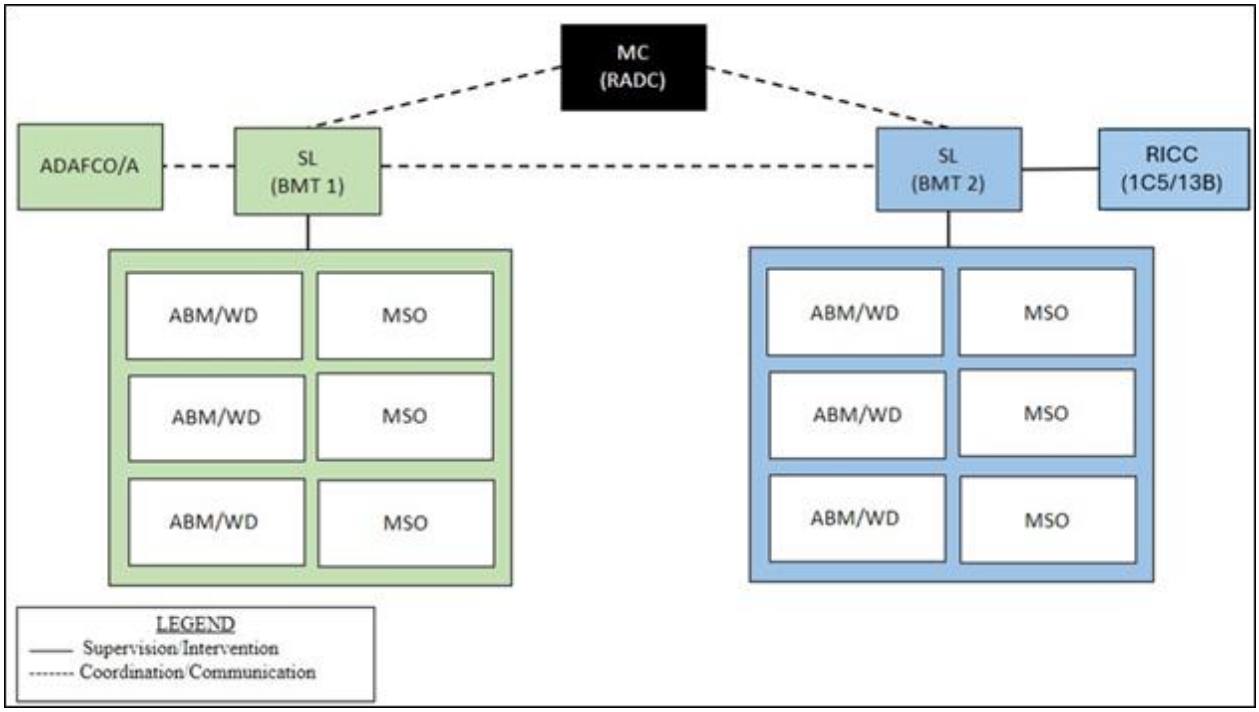

Table 6.1. Battle Management Team (BMT) Manning – Battle Control Center (BCC).

BMT Crew Manning	Personnel
Section Lead (SL)	1
ABM/WD	3
MSO	3
Total	**7**

Notes:
Mission Crews are tailorable to the mission and may consist of additional BMTs based on mission scope, scale, or responsibility. Reference AFTTP 3-3.BCC for additional guidance on crew compositions.

BMTs should consist of 1x ABM, 1x WD and 1xMSO per assigned BMC2 Function (i.e., Force Management, Defensive Counter Air (DCA), Offensive Counter Air (OCA), Dynamic Targeting (DT), Close Air Support (CAS), and/or PR). A single baseline BMT can support up to 2x BMC2 Functions in a geographical area per this table (i.e., Force Management, OCA, & DT).

Figure 6.1. Battle Control Center (BCC) Mission Crew Hierarchy.

6.2. Common Mission Crewmember Responsibilities. Regardless of duty position, mission crewmembers must work synergistically to achieve strategic effects in the battlespace. Common duty responsibilities and tasks are core tasks that each crewmember performs to achieve the stated mission. Crew leadership will task/re-task specific duties on a case-by-case basis to meet current and emerging mission requirements. **(T-3)** Table 6.2 outlines common mission crewmember responsibilities.

Table 6.2. Common Mission Crewmember Responsibilities.

Mission Phase	Mission Phase Responsibility
Mission Planning/Brief	• Extract information from mission planning documents • FCIF annotations • Develop contracts with other crewmembers & external assets • Contribute to mission crew briefing • Assess and communicate member's ORM score
Equipment Setup/Checkout	• Setup OWS IAW checklist • QC mission database • QC equipment status • QC communications
Mission Execution	• Modify/update overlays to ensure accurate CTP • Detect, track, ID, plot & pass information on tracks/overlays within the JOA to ensure an accurate CTP IAW ID/ROE • Perform authentication procedures • Perform positional handover • Follow/execute emergency procedures • Disambiguate sensor data
Reconstruction/Debrief	• Reconstruct mission & chat • Contribute to crew debrief • Contribute to crew developing lessons learned

6.3. Crewmember Specific Responsibilities. In addition to the common responsibilities listed in Table 6.2 crewmembers will have roles and responsibilities specific to their respective qualification/certification, which are listed but are not limited to items in Table 6.3. – Table 6.5.

6.3.1. All crew members will review all relevant operational mission documents to include, but not limited to joint air operations plan, air operations directive, master air attack plan, ROE, ATO, ACO, airspace control plan, operational tasking data link, tactical operational data, and SPINS. Regardless of MPC preparation or training.

6.3.2. **Tracking and Disambiguation** :

6.3.2.1. In this document, the tracking responsibility references the appropriate use of system tools to maintain a usable CTP with respect to sensor returns and symbology. IAW Table 6.2 all qualified crewmembers are responsible for tracking.

6.3.2.2. Disambiguation is the culmination of fusing applicable sensors, guidance, terminology, and data into action that affects the accuracy of the COP and "decision-to-go" or "decision-to-not-go" to the BMT. MSOs are the first line of establishing the validity

of anomalous data in the mission system. The SL is the final authority for resolving anomalous tracks in the system the MSO cannot resolve.

Table 6.3. Battle Management BMT Responsibilities WD, ABM and MSO.

Crew Position	AFSCs	Role/Responsibility
Weapons Director (WD)	1C5D	• Tactical Fluid Control (TFC) of assigned assets and orient/pair shooters[1] • Coordinate with external agencies for posturing, scrambling, and recovery of assigned assets • Coordinate and/or direct CAP placement • Coordinate/pass mission amends • Coordinate Weapons Resource Management (WRM) • Coordinate/direct AAR procedures • Implement Contested Degraded Operations (CDO) comm mitigation measures • Authenticate voice transmissions with assets under control • Ensure all fires requests are coordinated and de-conflicted • Comply with time, vertical and lateral airspace management deconfliction requirements • Perform authentication procedures • Monitor and direct asset posturing, transit, employment, and recovery IAW Theater guidance to include dynamic changes IAW ACE scheme of maneuver for airborne assets.
Air Battle Manager (ABM)	13B	• ABMs can perform the WD duties as noted above and may execute the following when assigned or delegated by Squadron or crew leadership: ○ Lead small teams ○ Interpret/validate electronic ID system returns ○ Coordinate and assign IDs up to HOSTILE ○ Supervise and direct weapons control ○ Identify flexible recovery and launch facilities for assets to aid in dynamic recovery and agile employment within threat timelines (ergo ACE scheme of maneuver). [1]NOTE: ABMs will primarily provide BMC2 of assigned assets and supervision of TFC.
Mission System Operator (MSO)	1C5	• Initiate, modify, and manage the database • Primary for detect, track, ID, plot & pass information on tracks/overlays within the BMA • Establish validity of anomalous system data • Optimize system equipment configuration (C2 System of Record, Sensors, Comm, TDL, Sensor, Sensor filters) • Monitor system performance and coordinate, troubleshoot, & resolve degraded and/or inoperative mission equipment with the SL & Maintenance • Conduct Sensor EA/AP procedures • Coordinate/execute with external agencies for ID and/or voice tell procedures • Perform Mode V interrogations • Monitor auxiliary equipment

		○ Perform TDC duties IAW AFTTP 3-1.IPE ○ Monitor and use TSN/DCN IAW AFTTP 3-1.IPE • Monitor and use external teleconference for other government agency coordination (ex. NOARD DEN with FAA)

Table 6.4. BMT Responsibilities SL and MC.

Crew Position	AFSC	Role/Responsibility
Section Lead (SL)	13B	• Overall readiness & supervision of the mission crew • Direct and supervise mission planning, briefing, and debriefing • Ensure adequate BMT composition for assigned mission • Coordinate with lateral BMC2 agencies & HHQ • Manage communications plan and CDO comm mitigation measures • Supervise the management and status of systems & assigned assets • Coordinate airborne orders and scramble and/or divert alert assets • Execute HOSTILE ID authority or delegate and supervise • Supervise coordination with external agencies for identification of assets ○ Implement/delegate SIGINT ID authority • Allocate and task assets between BMAs • Supervise and manage asset recovery IAW ACE Scheme of maneuver • Direct mission and assigned assets within Acceptable Level of Risk (ALR) within assigned BMAs • Final authority on disambiguation on anomalous sensor data ○ Evaluate and direct ALR changes Allocate and task assets between BMAs NOTE: The SL may delegate accomplishment of any of the tasks above to a qualified ABM under their direct supervision but may not delegate the underlying responsibility.
Mission Commander (MC)	13B	• Lead major combat operations & perform MC duties IAW AFTTP 3-3.IPE • Coordinate with MPC Chief & team leads for mission planning details • Plan and delegate mission authorities (i.e. scramble, alert postures, etc.) • Direct mission and assigned assets within ALR across multiple BMAs ○ Evaluate and direct ALR changes (if not allocated to a higher echelon of command) ○ Allocate and task assets between BMAs • Coordinate with higher headquarters • Perform RADC/SADC responsibilities as assigned by the AADC and delegated by the BC ○ Assume and execute operational authorities as delegated by the JFC/ JFACC/ AOC NOTE: The MC may delegate accomplishment of any of the tasks above to a qualified SL under their direct supervision but may not delegate the underlying responsibility.

Table 6.5. BMT Certification Responsibilities Regional Interface Control Cell (RICC) and MT.

Crew Position	AFSCs	Role/Responsibility
Regional Interface	13B	• Extract information from mission planning documents and the Operational Tasking Data Links (OPTASKLINK)

Control Cell (RICC)	1C5 1C5D	• Assess and plan for platform MTN capabilities and limitations • Coordinate with the SL/MSOs as required to plan, compile, and load the initial build of the TDL • Establish and maintain TDL operations IAW the OPTASKLINK • Monitor, troubleshoot, & resolve TDL issues
Mission Technician (MT)	13B 1C5 1C5D	• Monitor, setup, display, & update sensors & sensor filters • Perform sensor correlation checks, as required • Conduct sensor EA/EP procedures • Monitor auxiliary equipment • Troubleshoot mission systems and sensors • Optimize mission systems and sensors with SL direction • Perform TDC duties IAW AFTTP 3-1.IPE, as required • Perform primary net responsibilities for external agency coordination (ex. Telecommunications Support Network (TSN)/Data Communications Network (DCN), Domestic Event Network (DEN)). • Perform emergency action coordinator (EAC) duties as required and as defined in local unit guidance • Respond to CCDR specific calls for data (ex. NORAD Alert System checks)

6.3.3. **Mission Commander (MC) (Air Force Specialty Code (AFSC) 13BXX)** . The MC responsibilities and authorities will be delegated to the SL in the absence of an MC. The BCC MC will be assigned to the crew when the BCC is assigned RADC/SADC and/or MC IAW AFTTP 3-3.IPE or at the discretion of the CC/DO. An SL can assume SADC responsibilities for assigned BMA. The MC will manage coordination with the AOC/COD. The MC is the final authority for all mission decisions, except as retained by the Battle Staff or RADC as appropriate. The MC is not required on the operations floor for all phases of all missions.

6.3.4. **Section Lead (SL) (AFSC 13B3C)** . The SL will be responsible to the MC (if on the operations floor), or directly to the CC/DO for the overall supervision of a BMT for a designated AOR/BMA or for a functional tasking. **(T-3)** SLs must also be prepared to perform interim-MC duties when performing in support of training/non-RADC missions. **(T-3)** SLs may be assigned to BMTs responsible for specific mission sets: (e.g., BMT-1 for offensive counter air BMT-2 for Force Management). SLs are responsible for the accuracy of the CTP. **(T-3)**

6.3.5. **Air Battle Manager (ABM) (AFSC 13B3C)** . The ABM will be responsible to the SL and may supplement SL supervision of a BMT for a designated AOR/BMA or for a functional tasking. **(T-3)** ABMs must also be prepared to perform interim-SL duties when part of a BMT. **(T-3)**. ABMs may lead small teams with limited operational scope such as 4v4s, Distributed Training Operations Center (DTOC)s, Temporary Flight Restrictions (TFRs), etc. ABMs will also execute any duties delegated by Squadron and/or crew leadership that are within their experience level. **(T-3)**

6.3.6. **Weapons Director (WD), (AFSC 1C5X1D)** . WDs will be assigned to BMTs (i.e., team 1 or 2) as required. **(T-3)** The WD will be responsible to the ABM/SL for mission execution of assigned TFC and tasking. **(T-3)**.

6.3.7. **Mission System Operator (MSO), (AFSC 1C5X1)** . The MSO is responsible to the SL/ABM for high-fidelity (plot level tracking and analysis) tracking of JOA. Additionally, responsible for identifying specific anomalies of interest within the CTP that are ambiguous in nature, externally cued, not classified by doctrine, and/or are violating specific airspace control measures (i.e. TFR, Special Flight Restricted Area (SFRA), etc...) which are to be referred to the SL, or ABM if delegated by the SL for final disambiguation decision.

6.3.8. **Air Defense Artillery Fire Control Officer (ADAFCO)and/or Assistant (ADAFCA)** . As prescribed in US Army techniques publication (ATP) 3-01.7, *Air Defense Artillery Brigade Techniques*, the ADAFCO team (if assigned) will be responsible to the MC and/or SL as appropriate. **(T-3)** The ADAFCO or ADAFCA will coordinate the engagement of air defense artillery units for the defense of designated facilities and/or areas as listed on the JFC's defended asset list. **(T-3)** The ADAFCO is the single point of contact between the U.S. Army's land based air and missile defense fire direction centers, and and/or information coordination central, and the controlling authority (e.g., BCC). **(T-3)** The MC/SL and ADAFCO IAW AFTTP3-1.IPE and ALSA ACC, will coordinate and execute IAW established theater ROE, fire control de-confliction procedures, and weapons control procedures in determining specific air defense artillery engagements. **(T-3)** The ADAFCO and/or ADAFCA team, when employed, will be responsible for, but not limited to:

6.3.8.1. Inform the MC and SL as required of the status and capabilities of the assigned air defense artillery systems. **(T-3)**

6.3.8.2. Ensure the information coordination central holds the appropriate authorities to support the kill chain (e.g., identification matrix execution, hostile declaration, engagement, etc.), and the SL is informed of delegated authorities held at the information coordination central. **(T-3)**

6.3.8.3. When directed by the MC, the ADAFCO and/or ADAFCA will transmit appropriate weapons commands to the fire direction center and/or information coordination central to ensure effective employment of air defense artillery resources. **(T-3)** Coordinate directly with the information coordination central for target assignment. **(T-3)** Conduct close coordination with the SL on all targets in pre-briefed engagement zones. **(T-3)**

6.3.8.4. Monitor air defense artillery engagements of air-breathing threats and theater ballistic missiles (TBMs), and immediately inform the MC and SL of results of weapons engagement to include the number of targets engaged and/or number of targets remaining. **(T-3)**

6.3.8.5. Receive and update all brigade and/or battalion level reports (e.g., surface to air missile status report, engagement summary reports), IAW Field Manual (FM) 6-99, *U.S. Army Report and Message Formats.* **(T-3)**

6.3.8.6. Coordinate with the SL for pending and/or recommend changes in weapons control states and with the MSO and WDs on all unidentified tracks and recommend identification status as received from air defense artillery sources. **(T-3)**

6.4. Certifications.

6.4.1. Certifications are created for the purposes of providing tailored capabilities needed to meet the assigned theater's unique BMC2 needs. Certifications not listed in this manual will be approved by ACC/A3C via the ACC MDS FAM. Units seeking to employ certifications will coordinate syllabi, training, and management documents for the proposed certification to ACC TRSS Det 7 for coordination and the MDS FAM for coordination and endorsement with ACC/A3C. Below are baseline certifications approved for use in the BCC. For additional details on types of certifications reference AFMAN 13-1 BCCV1.

6.4.1.1. Certifications required by CCDRs to accomplish their operational mission will be coordinated via the associated NAF/SCC to the MDS FAM, for awareness of crew limitations, prior to ACC/A3C approval.

6.4.1.2. Certifications will not be evaluated by unit Standardization and Evaluation (CCV) shops or captured on AF Forms 8 *Certificate of Aircrew Qualification*, unless specifically identified in AFMAN 13-1BCCV2. Certifications not covered in volume 2 are the responsibility of the unit's DOT and DCOK shops.

6.4.1.3. The ACC MDS FAM will be coordinated on and included in the development of any new certification for members participating in mission crew operations.

6.4.1.4. The ACC MDS FAM will collect and post all certification materials from units in a common digital file to reduce redundancy across the force.

6.4.2. **Mission Technician (MT) AFSC 13B, 1C5X1, 1C5X1D** . When fielded in a unit, the MT is responsible for tracking mission equipment health, communicating on required nets, and for tasks outlined in **Table 6.5**. AFSC restriction is **T-3** waiverable.

6.4.3. **Regional Interface Control Cell (RICC) AFSC 13B, 1C5X1, 1C5X1D** . When employed, is responsible to the SL or MC. The RICC will be utilized if the BCC is tasked to perform the Regional Interface Control Officer (RICO)/Senior Interface Control Officer (SICO) function by the Joint Interface Control Officer (JICO). The RICC will establish and maintain TDLs and monitor data link effectiveness. **(T-3)** The RICC is responsible to troubleshoot mission equipment malfunctions at the direction of the MC. **(T-3)** The RICC should be afforded every opportunity to attend formal joint TDL courses. **(T-3)** When no RICC is present, the SL or MC will delegate these duties throughout the BMT. If RICC is present, but not otherwise engaged in RICC activities, MSO qualified RICC members may simultaneously assist in BMT functions at the discretion of the SL or MC. The RICC will as a minimum be responsible to perform the responsibilities listed in **Table 6.5**. AFSC restriction is T-3 waiverable.

6.4.4. **Standing Approved Certs** . The following is a list of joint, and functional, certifications employed in the BCC and maintained outside of the BCC community. This list may be modified by request to the ACC MDS FAM.

6.4.4.1. Red Switch Operator (RSO).

6.4.4.2. ADAFCO.

6.4.4.3. RADC/SADC. **Note:** Not to be confused with NORAD Sector's or Sector Commanders.

6.4.4.4. Airborne Non-Kinetic Package Commander (CROW) **Note:** As executed from the ground.

6.4.4.5. JICO.

6.4.4.6. Advanced joint interface control cell (JICC) Operator (AJOC)

CASE A. CUNNINGHAM, Lt Gen, USAF
Deputy Chief of Staff for Operations

Terms

Crewmembers—Members who are assigned, attached, or otherwise conducting operations at any BCC.

Legacy Qualifications—BCC qualifications to include WD, AWO, AST, ST, Interface Control Technician (ICT), MCC, and SD

MAJCOM—Refers exclusively to HQ ACC located on Langley AFB, VA.

Transition—Updating the qualification of the operational unit from legacy qualifications to ABM/MSO qualifications

Wing (WG)/Commander (CC) and Sector Commander—are synonymous throughout this volume. Sector Commanders are recognized as WG/CC Equivalents.

Attachment 2

932ND BATTLE MANAGEMENT CONTROL SQUADRON (932 BMCS)

A2.1. Crew Construct and Employment. The 932 BMCS crew construct and employment is currently undergoing Test and Evaluation by the 505 Test and Training Group, Det 1 to identify operationally suitable crew configurations and employment methods. In the interim, the 932 BMCS will execute operations using the crew construct below as a baseline and further define unit standards to meet operational needs until 932 BMCS training and operation standards are fully incorporated into future versions of AFMAN 13-1BCC V3.

A2.1.1. The 932 BMCS is not required to follow Chapters 3 and 6 of this publication.

A2.1.2. The SQ/CC will publish 932 BMCS OIs covering 932 BMCS execution of at least the items covered in Chapters 3 and 6 of this publication ACC/A3CI will be sent copies of all approved and revised OIs for programming and feedback.

A2.2. Crew Construct. The 932 BMCS combines unique mission equipment and teaming capabilities requiring a unique and diverse crew structure with AFSCs and roles not currently found in other BCCs. See **Table A2.1**., **Table A2.2**, and **Figure A2.1** for details.

Table A2.1. 932 BMCS Baseline BCC Crew Construct.

Duty Position	AFSC	Personnel
Mission Commander (MC)	12S, 13B, 18X	1
Section Lead (SL)	13B	1
Mission Operator (MO)	12S, 13B, 18X	2
Mission System Operator (MSO)	1C5	2
Intelligence Team Lead (ITL)	14N, 18X, 13B	1
Intelligence Threat Manager (ITM)	1N0, 1N1	1
Geospatial Imagery Manager (GIM)	1N1	1
Integrated Fires Operator (IFO)	1N8	2
Total Crew		11

Notes:

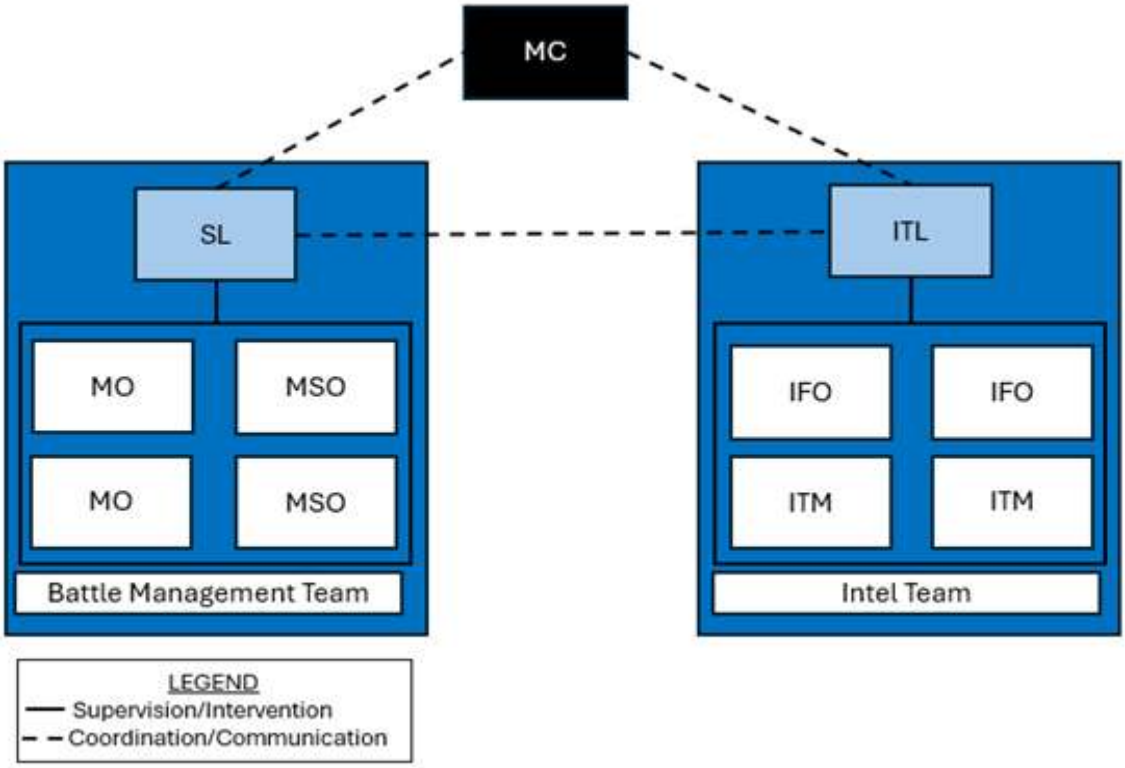

1. This chart represents a baseline 932 BMCS crew. Crew composition, but not all AFSCs. The composition may be tailored by the SQ/CC as required to meet theater directives.

2. AFSC updates require OPR approval.

Table A2.2. 932 BMCS BCC Mission Planning Cell (MPC).

Function	Personnel	Qualification or Certification
MPC Chief	1	Advanced School Graduate, MC or SL
Deputy MPC Chief	1	Experienced MO, SL or ITL
Mission System Operator (MSO)	2	1 MSO should be JT-102 certified
Mission Operator (MO)	2	MO
Intelligence (INTEL)	2	1x ITL/ITM/GIM & 1x 1N8
Notes: This chart represents a baseline MPC. MPCs may be tailored by the SQ/CC as required to meet theater directives.		

Figure A2.1. 932 BMCS Baseline Crew Construct.

Attachment 3

LEGACY BCC QUALIFICATION OPERATIONS

A3.1. Legacy Crew Execution. This attachment will be used for legacy qualification execution and will cease to be used once a unit has completed transitioning to ABM and MSO qualifications.

A3.2. Battle Control Center (BCC) Legacy Mission Crew Composition. The BCC mission crew is the focal point for operations. Supervised by an MCC, the mission crew is tasked to execute the mission on a continuous basis and is manned by a number of personnel, tailored to meet mission requirements. The legacy mission crew will consist of the duty positions identified in **Table A3.1**. **(T-2)** Additionally, the mission crew may have personnel certified to augment and assist the battle management, weapons, and tactical data links functional areas. See **Table A3.1**.

Table A3.1. Combat Mission Crew Composition-CONUS BCC.

COMBAT MISSION CREW COMPOSITION CONUS BCC[1]	
Crew Position	**Crew Total**
Mission Crew Commander (MCC)	2
Mission Technician* (MT)[2, 2c]	2
Senior Director (SD)	2
Air Weapons Officer (AWO)/Weapons Director (WD)	6
Weapons Technician* (WT)[2, 2a]	2
Air Surveillance Officer (ASO)	2
Air Surveillance Technician (AST)	2
Surveillance Technician (ST)	9
Interface Control Watch Officer* (ICWO)[2, 2b]	1
Interface Control Technician (ICT)	2
Total	**30**

Notes:

1. The complexity of mission or additional BMAs may require additional crew members.

2. The "*" denotes a mission certification position. See **paragraph A3.24** for further information.

a. WT will be qualified in a 1C5 duty position (e.g., ST, ICT, AST). **(T-3)**

b. ICWO will be a qualified ICT. **(T-3)**

c. The unit commander will determine the need for MT to maintain a qualification in a 1C5 duty position (e.g., ST, ICT, AST, WD). **(T-3)**

A3.3. Common Mission Crew Duties and Responsibilities.

A3.3.1. While each crew position has specific duties and responsibilities, the following responsibilities are common to all mission crew positions. All mission crew members will:

A3.3.2. Have working knowledge of, and comply with, applicable governing directives and agreements. **(T-3)**

A3.3.3. Conduct internal and external communication and coordination. **(T-3)**

A3.3.4. Attend crew changeover brief. **(T-3)**

A3.3.5. Conduct positional changeover briefs. **(T-3)**

A3.3.6. Conduct mission planning. **(T-3)**

A3.3.7. Conduct expansion procedures. **(T-3)**

A3.3.8. Conduct evacuation procedures. **(T-3)**

A3.3.9. Understand system capabilities and limitations, to include weapons platforms and surveillance assets, and apply them to mission accomplishment. **(T-3)**

A3.3.10. Adhere to COMSEC, information security (INFOSEC), and OPSEC procedures as well as "OPEN LINE" and "SECURE CALL" procedures. **(T-3)**

A3.3.11. Conduct work station and communication system checkout. **(T-3)**

A3.3.12. Report malfunctioning equipment to section supervisor who, in turn, passes information to ASO or AST. **(T-3)**

A3.3.13. Report link issues to section supervisor who, in turn, passes information to ICT. **(T-3)**

A3.3.14. Comply with guidance in positional checklists. **(T-3)**

A3.3.15. Ensure current DD Form 2992, *Medical Recommendation for Flying or Special Operational Duty*, is filed prior to performing any operational duties. **(T-3)**

A3.3.16. Read and initial (either electronically or via hardcopy) local information files prior to performing operational duties. **(T-3)**

A3.4. Mission Crew Commander (MCC) (13B).

A3.4.1. MCC Responsibilities. The MCC is responsible for overall battle management and all operations execution and reporting within the BCC. MCCs will:

A3.4.2. Conduct changeover and exercise briefings. **(T-3)**

A3.4.3. Conduct mission planning with the BS, as required. **(T-3)**

A3.4.4. Ensure shift manning requirements are met. **(T-3)**

A3.4.5. Implement force protection procedures. **(T-3)**

A3.4.6. Execute battle plans and operations orders (OPORDs) and contingency plans (CONPLANs). **(T-3)**

A3.4.7. Coordinate with applicable search and rescue agency as required. **(T-3)**

A3.4.8. Oversee air sovereignty, drug interdiction and contingency operations. **(T-3)**

A3.4.9. Implement ROE. **(T-3)**

A3.4.10. Monitor emergency action board for accuracy and status changes. **(T-3)**

A3.4.11. Implement Dangerous Military Activity (DMA) procedures. **(T-3)**

A3.4.12. Apply applicable directives to include the ATO, ACO, exercise instructions, CONPLAN, OIs, operating standards, and special instructions (SPINS). **(T-3)**

A3.4.13. Oversee the interface with external units via voice communications and data link. **(T-3)**

A3.4.14. Enforce air defense identification zone procedures, special flight restricted area (SFRA) procedures, temporary flight restrictions (TFR) IAW SPINS and Federal Aviation Administration (FAA) Notice to Airmen (NOTAM). **(T-3)**

A3.4.15. Monitor status of assets (e.g., sensors, links, and aircraft). **(T-3)**

A3.4.16. Initiate recall procedures when directed. **(T-3)**

A3.4.17. Ensure personnel safety. **(T-3)**

A3.4.18. Coordinate with HHQ, internal and external agencies. **(T-3)**

A3.4.19. Ensure safety of flight during all phases of the mission. **(T-3)**

A3.4.20. Determine mission capabilities and limitations of operational equipment and approve or disapprove preventive maintenance activities. **(T-3)**

A3.4.21. Interpret weather information and coordinate accordingly. **(T-3)**

A3.4.22. Identify aircraft availability and allocate alert aircraft. **(T-3)**

A3.4.23. Coordinate and/or implement actions to be taken during fire, bomb threat, and natural disaster situations. **(T-3)**

A3.4.24. Monitor status of fire alarm systems. **(T-3)**

A3.4.25. Summon medical assistance as required. **(T-3)**

A3.4.26. Summon assistance during duress or intruder situations. **(T-3)**

A3.4.27. Direct expansion procedures. **(T-3)**

A3.4.28. Direct evacuation procedures. **(T-3)**

A3.4.29. Notify HHQ of commander’s availability and responsible individual. **(T-3)**

A3.4.30. Ensure response to White Pinnacle exercises. **(T-3)**

A3.4.31. Oversee track reporting procedures. **(T-3)**

A3.4.32. Implement aerostat breakaway or derelict airborne objects procedures. **(T-3)**

A3.4.33. Implement defense condition (DEFCON) procedures. **(T-3)**

A3.4.34. Report missile launches. **(T-3)**

A3.4.35. Recommend amber warning and/or flush bases. **(T-3)**

A3.4.36. Scramble alert assets as required. **(T-3)**

A3.4.37. Ensure fidelity drills are coordinated with HHQ. **(T-3)**

A3.4.38. Direct reclassification of tracks. **(T-3)**

A3.4.39. Meet situation report (SITREP) requirements. **(T-3)**

A3.4.40. Coordinate aircraft emergency procedures. **(T-3)**

A3.5. Weapons Section.

A3.5.1. The weapons section is responsible for managing and employing the assigned weapons systems IAW OPORD; ROE; ATO/ACO; SPINS; the Law of War; and applicable guidance and policy. Weapons control procedures and techniques are contained in AFTTP 3-3, *Integrated Planning and Employment (IPE)*; AFMAN 11-214 and local directives. Weapons positions will be SD and AWO/WD. **(T-2)**

A3.5.1.1. Senior Director (SD) (13B). The SD is responsible to the MCC for management of the weapons section, battle management, force employment and status reporting in the assigned operational area. The SD executes aircraft scrambles and commits, target selection, and weapons assignment and supervises the AWO/WD employment of resources. SDs will:

A3.5.1.2. Conduct weapons portion of changeover and exercise briefings. **(T-3)**

A3.5.1.3. Know the performance and ordnance characteristics of all assigned weapons systems. **(T-3)**

A3.5.1.4. Commit assets to counter the threat. **(T-3)**

A3.5.1.5. Assign control of missions to AWO/WD. **(T-3)**

A3.5.1.6. Monitor assigned missions to ensure effective mission accomplishment and flight safety. **(T-3)**

A3.5.1.7. Assign radio frequencies and specific consoles commensurate with mission requirements. **(T-3)**

A3.5.1.8. Coordinate aircraft transfer points where control is passed to other controlling agencies. **(T-3)**

A3.5.1.9. Apply ROE. **(T-3)**

A3.5.1.10. Coordinate aircraft scramble and airborne orders. **(T-3)**

A3.5.1.11. Ensure all missions are briefed and debriefed. **(T-3)**

A3.5.1.12. Apply applicable directives to include the ATO, ACO, exercise instructions, OI, and SPINS prior to sitting on position. **(T-3)**

A3.5.1.13. Ensure that all AWO/WD are aware of existing and forecast weather conditions for the operational area and recovery bases as necessary. **(T-3)**

A3.5.1.14. Coordinate weapons section actions with surveillance and identification (ID) to maintain air picture. **(T-3)**

A3.5.1.15. Monitor status of alert assets. **(T-3)**

A3.5.1.16. Coordinate with adjacent sector SD. **(T-3)**

A3.5.1.17. Perform authentication procedures. **(T-3)**

A3.5.1.18. Be capable of performing all AWO duties. **(T-3)**

A3.5.2. AWO (13B)/Weapons Director (WD) (1C5X1D).

A3.5.2.1. The AWO/WD is responsible to the SD for control of assigned assets. AWO/WD will:

A3.5.2.2. Apply applicable directives to include the ATO, ACO, exercise instructions, CONPLAN, OIs, and SPINS prior to sitting on position related to assigned tasks. **(T-3)**

A3.5.2.3. Initiate unknown cowboy calls at appropriate DEFCON. **(T-3)**

A3.5.2.4. Initiate unknown rider calls at appropriate DEFCON. **(T-3)**

A3.5.2.5. Perform authentication procedures. **(T-3)**

A3.5.2.6. Implement safe passage procedures. **(T-3)**

A3.5.2.7. Pre-brief and debrief mission with aircrew to the maximum extent. **(T-3)**

A3.5.2.8. Pass significant weather forecasts, observations, and altimeter setting to aircrew upon check-in as appropriate. **(T-3)**

A3.5.2.9. Pass engagement orders. **(T-3)**

A3.5.2.10. Ensure expeditious fighter positioning for mission tasking. **(T-3)**

A3.5.2.11. Assist aircrews in maintaining lateral confines of airspace and airspace control measures IAW AFMAN 11-214 and local procedures and letters of agreement. **(T-3)**

A3.5.2.12. Maintain tracking of assigned aircraft and non-participating aircraft, which can potentially affect flight safety. Provide accurate and timely stranger point-outs. **(T-3)**

A3.5.2.13. Ensure an orderly flow of aircraft for recovery to other control agencies. **(T-3)**

A3.5.2.14. Inform the SD of conditions or situations that may affect mission completion or aircraft safety. **(T-3)**

A3.5.2.15. Know procedures for aircraft scrambles, target selection and weapons assignment. **(T-3)**

A3.5.2.16. Evaluate the air defense threat situation and take timely defensive action. **(T-3)**

A3.5.2.17. Inform other AWO/WD of any actions taken that may affect their control actions. **(T-3)**

A3.5.2.18. Provide tactical information to aircrews that may affect mission accomplishment. **(T-3)**

A3.5.2.19. Obtain pilot weather reports (PIREP) and relay to the SD. **(T-3)**

A3.5.2.20. Ensure flight safety with overall mission requirements. **(T-3)**

A3.5.2.21. Provide navigational and emergency assistance. **(T-3)**

A3.5.2.22. Ensure completion of all appropriate logs and forms. **(T-3)**

A3.5.2.23. Know the performance and ordnance characteristics of all assigned weapons systems. **(T-3)**

A3.5.2.24. Know airspace management requirements and procedures. **(T-3)**

A3.5.2.25. Conduct all radio/telephone (R/T) IAW AFTTP 3-3.IPE and Operation Noble Eagle communication guidelines. **(T-3)**

A3.5.2.26. Maintain accurate air picture by updating computer information to include commits, recommits, initiates, reinitiates, and track repositioning. **(T-3)**

A3.5.2.27. Coordinate with surveillance section, air traffic control (ATC), and control agencies as required. **(T-3)**

A3.6. Air Picture Management (APM) Section.

A3.6.1. APM encompasses the functions of surveillance, ID, and tactical data links. The APM section is responsible for the detection, tracking, ID, and classification and reporting of air objects and maintaining assigned portion of the MTN and integrating other source data into a single air picture. This section also directs the optimum configuration of sensors for effective radar coverage and information sharing.

A3.6.1.1. Air Surveillance Officer (ASO) (13B). The ASO manages all functions within the APM section. The ASO is responsible to the MCC for the maintenance and quality of the BCC's air picture and tactical data link employment. ASO will:

A3.6.1.2. Conduct surveillance portion of changeover and exercise briefings. **(T-3)**

A3.6.1.3. Supervise the collection, display and dissemination of surveillance data. **(T-3)**

A3.6.1.4. Monitor and report equipment status through the CFP. **(T-3)**

A3.6.1.5. Ensure the surveillance section manning is adequate to meet mission requirements. **(T-3)**

A3.6.1.6. Ensure operations and maintenance personnel are apprised of outages or equipment degradation. **(T-3)**

A3.6.1.7. Assess and coordinate requirements for sensor augmentation and/or gap coverage. **(T-3)**

A3.6.1.8. Direct APM section's expansion procedures. **(T-3)**

A3.6.1.9. Coordinate and deconflict frequency assignments for the surveillance section, as required. **(T-3)**

A3.6.1.10. Ensure preventive maintenance actions are deconflicted with operational mission activities. **(T-3)**

A3.6.1.11. Manage sensor and track validation procedures. **(T-3)**

A3.6.1.12. Know radar characteristics and optimize radar presentation (e.g., error free, correct settings). **(T-3)**

A3.6.1.13. Conduct electronic attack/electronic protection (EA/EP) procedures. **(T-3)**

A3.6.1.14. Coordinate radar site setting changes with FAA. **(T-3)**

A3.6.1.15. Monitor auxiliary equipment. **(T-3)**

A3.6.1.16. Perform radar correlation checks. **(T-3)**

A3.6.1.17. Perform Change Data Order function on applicable tracks, as required. **(T-3)**

A3.6.1.18. Monitor current air picture to ensure tracks are detected, updated, and reported. **(T-3)**

A3.6.1.19. Execute the OPORD and/or CONPLAN. **(T-3)**

A3.6.1.20. Coordinate and perform E-3 operations. **(T-3)**

A3.6.1.21. Recognize emergency aircraft and accomplish reporting procedures. **(T-3)**

A3.6.1.22. Read and interpret weather data and determine effect on radars and air picture. **(T-3)**

A3.6.1.23. Recognize and report degraded sensor performance. **(T-3)**

A3.6.1.24. Recognize and report potential node outages and significant gaps in coverage, to include dual site outages. **(T-3)**

A3.6.1.24.1. Coordinate with ICT to perform track data coordination (TDC). **(T-3)**

A3.6.1.24.2. Serve as network control station (NCS) for track management communications when designated. **(T-3)**

A3.6.1.24.3. Supervise the resolution of duplicate tracks, dual designations, category conflicts and ID conflicts. **(T-3)**

A3.6.1.24.4. Ensure transmission of change data orders to resolve environment and ID conflicts. **(T-3)**

A3.6.1.24.5. Coordinate use and effects of data filters. **(T-3)**

A3.6.1.24.6. Monitor and coordinate effects of participant or link node losses. **(T-3)**

A3.6.1.24.7. Coordinate the use and transmission of reference points, lines, and areas. **(T-3)**

A3.6.1.24.8. Coordinate and supervise local fidelity drills to meet mission requirements. **(T-3)**

A3.6.1.24.9. Know governing military standards and HHQ directives. **(T-3)**

A3.6.1.25. Make required public announcements. **(T-3)**

A3.6.2. Air Surveillance Technician (AST) (1C5X1). The AST is responsible to and assists the ASO with the management of all air surveillance functions. The AST is responsible for the operational conduct of the enlisted personnel in the section and assists the ASO in the accomplishment of duties and responsibilities. ASTs will:

A3.6.2.1. Conduct surveillance portion of changeover and exercise briefings, as required. **(T-3)**

A3.6.2.2. Set up, display, and update radar filters, as required. **(T-3)**

A3.6.2.3. Monitor, update, and report radar status. **(T-3)**

A3.6.2.4. Analyze and report unusual presentations (e.g., EA, weather, and transient interference) to the appropriate agencies. **(T-3)**

A3.6.2.5. Assign geographic areas to all STs. **(T-3)**

A3.6.2.6. Optimize radar presentation (e.g., error free, correct settings). **(T-3)**

A3.6.2.7. Supervise sensor and track validation procedures. **(T-3)**

A3.6.2.8. Conduct EA/EP procedures. **(T-3)**

A3.6.2.9. Coordinate radar site setting changes with FAA. **(T-3)**

A3.6.2.10. Manage identification friend or foe (IFF) interrogation (Mode IV/V) process. **(T-3)**

A3.6.2.11. Monitor auxiliary equipment. **(T-3)**

A3.6.2.12. Coordinate expansion. **(T-3)**

A3.6.2.13. Perform radar correlation checks. **(T-3)**

A3.6.2.14. Coordinate with ICT to perform TDC. **(T-3)**

A3.6.2.14.1. Serve as NCS for track management communications when designated. **(T-3)**

A3.6.2.14.2. Supervise the resolution of duplicate tracks, dual designations, category conflicts and ID conflicts. **(T-3)**

A3.6.2.14.3. Ensure transmission of change data orders to resolve environment and ID conflicts. **(T-3)**

A3.6.2.14.4. Coordinate use and effects of data filters. **(T-3)**

A3.6.2.14.5. Monitor and coordinate effects of participant or link node losses. **(T-3)**

A3.6.2.14.6. Coordinate the use and transmission of reference points, lines, and areas. **(T-3)**

A3.6.2.14.7. Coordinate and supervise local fidelity drills to meet mission requirements. **(T-3)**

A3.6.2.14.8. Know governing military standards and HHQ directives. **(T-3)**

A3.6.2.15. Be capable of performing all ST duties. **(T-3)**

A3.6.2.16. Make required public announcements. **(T-3)**

A3.6.2.17. Manage overlays and global areas. **(T-3)**

A3.6.2.18. Manage use of doctrine IAW unit directives. **(T-3)**

A3.6.2.19. Supervise section communications on DEN. **(T-3)**

A3.6.3. Surveillance Technician (ST) (1C5X1). The ST is responsible to the ASO or AST for track detection, initiation (active and passive), investigation and classification, track maintenance and reporting for all airborne objects within the assigned surveillance area. STs will:

A3.6.3.1. Detect tracks and perform active and passive tracking procedures. **(T-3)**

A3.6.3.2. Manually initiate track symbology as required. **(T-3)**

A3.6.3.3. Maintain track continuity and drop tracks as required. **(T-3)**

A3.6.3.4. Correlate data/track reports from multiple sources. **(T-3)**

A3.6.3.5. Perform voice-tell as assigned. **(T-3)**

A3.6.3.6. Report suspicious track activity. **(T-3)**

A3.6.3.7. Monitor and report track characteristics. **(T-3)**

A3.6.3.8. Recognize and report emergency aircraft situations. **(T-3)**

A3.6.3.9. Perform Mode IV/V interrogations. **(T-3)**

A3.6.3.10. Notify the ASO or AST of identification investigation status. **(T-3)**

A3.6.3.11. Adhere to identification criteria IAW ROE. **(T-3)**

A3.6.3.12. Classify tracks IAW directives. **(T-3)**

A3.6.3.13. Perform authentication procedures. **(T-3)**

A3.6.3.14. Coordinate with external agencies to implement aerospace control measures. **(T-3)**

A3.6.3.15. Perform safe passage IAW directives. **(T-3)**

A3.6.3.16. Make appropriate public announcements. **(T-3)**

A3.6.3.17. Interpret, correlate, and/or report flight plan information. **(T-3)**

A3.6.3.18. Utilize the DEN IAW established procedures. **(T-3)**

A3.6.3.19. Conduct briefings as required. **(T-3)**

A3.6.4. Interface Control Cell (ICC). The ICC is a subset of the APM section and is responsible for planning and executing their assigned sector of the MTN. The ICC coordinates with the AOC JICC or JICO for planning and execution functions that cross sector boundaries or impact the regional portion of the mission. The ICC also coordinates with the APM and Weapons sections for information exchange requests. A minimum of one interface control technician on duty is required to be certified as an ICWO. See **paragraph A3.7.3** for ICWO description.

A3.6.5. Interface Control Technician (ICT) (1C5X1). The ICT is responsible to the ICWO for accomplishment of link management and TDC functions to include ensuring the clarity, accuracy, currency, and quality of track data displayed on the mission system. ICTs will provide:

A3.6.5.1. Link management. **(T-3)**

A3.6.5.2. Manage assignment of functional network roles. **(T-3)**

A3.6.5.3. Recommend or implement MTN corrective actions when disruptions occur. **(T-3)**

A3.6.5.4. Ensure Link 16 operations are entered into the Link 16 network deconfliction server. **(T-3)**

A3.6.5.5. Initiate, maintain, and terminate data links. **(T-3)**

A3.6.5.6. Manage activation and deactivation of relays and changes of Joint Tactical Information Distribution System (JTIDS) Unit (JU) transmit mode. **(T-3)**

A3.6.5.7. Manage and use required COMSEC material. **(T-3)**

A3.6.5.8. Evaluate link performance and report operational effectiveness to ICWO. **(T-3)**

A3.6.5.9. When directed, perform network control functions as data network control station (DNCS) for Link 16. **(T-3)**

A3.6.5.10. Direct subordinate unit changes to the DNCS for Link 11. **(T-3)**

A3.6.5.11. Manage and direct subordinate unit changes to parameters for interface data links. **(T-3)**

A3.6.5.12. Coordinate changes to link configuration to meet information exchange requirements. **(T-3)**

A3.6.5.13. Execute Link 11/11B data link reference point changes. **(T-3)**

A3.6.5.14. Monitor the exchange of link messages and track data. **(T-3)**

A3.6.5.15. Ensure operations comply with required transmission restrictions. **(T-3)**

A3.6.5.16. TDC. **(T-3)**

A3.6.5.17. Coordinate with ASO or AST for accuracy, currency, and quality of track data and air picture. **(T-3)**

A3.6.5.18. Monitor the exchange of track data and related actions. **(T-3)**

A3.6.5.19. Ensure resolution of interface anomalies (e.g., dual designations, duplicate tracks, and identification or category conflicts). **(T-3)**

A3.6.5.20. Transmit change data order to resolve environment and identity conflicts as required. **(T-3)**

A3.6.5.21. Coordinate the use of data filters. **(T-3)**

A3.7. Mission Certifications.

A3.7.1. Mission certifications complement, augment, or assist the mission crew as needed. ACC will provide a framework for mission certifications; however, management of the certification program to include the attendant training and documentation requirements is the responsibility of the SQ/CC. The following are the mission certifications for the Continental United States (CONUS) BCCs:

A3.7.2. Mission Technician (MT). The MT is responsible to the MCC for monitoring and facilitating overall mission execution; the MT is also responsible for internal and external operational reporting to include emergency action messages (EAMs).

A3.7.2.1. Emergency Action Coordinator (EAC). If employed, the EAC is responsible to the MCC unless otherwise tasked by the BS. EACs will:

A3.7.2.2. Create, receive, validate, and disseminate EAMs and quick reaction messages (QRM) IAW NORAD Instruction (NORADI) 10-4, *NORAD Emergency Action Procedures*. **(T-3)**

A3.7.2.3. Notify MCC of received HHQs report requests. **(T-3)**

A3.7.2.4. Receive, disseminate and report status of action (SOA). **(T-3)**

A3.7.2.5. Ensure Engagement Authority display reflects current status. **(T-3)**

A3.7.2.6. Maintain event logs. **(T-3)**

A3.7.2.7. Coordinate with HHQ, internal and external agencies. **(T-3)**

A3.7.2.8. Respond to HHQ exercises, if tasked. **(T-3)**

A3.7.2.9. Respond to NORAD Alert System checks. **(T-3)**

A3.7.2.10. Perform authentications. **(T-3)**

A3.7.3. Interface Control Watch Officer (ICWO). The ICWO is responsible for ICC operations and active management of the MTN operations. The ICWO supervises ICC personnel during planning, management, and execution of the MTN. The ICWO monitors the overall quality of the MTN, directs actions to resolve problems, dynamically adjusts the MTN, interfaces to meet changing information exchange requests, and manages associated voice circuits.

A3.7.4. Weapons Technician (WT). The WT performs non-controller functions in the weapons section that may include executing scramble orders, tracking and updating weapons status displays, using chat, updating and assisting the SD and AWO/WD as required.

A3.8. Alaska and Hawaii Battle Control Centers

A3.8.1. **Pacific Air Defense Sector (PADS) Mission** . The PADS provides air sovereignty and air defense of the Hawaii Air Defense Region (HADR) and the Guam Air Defense Region (GADR) under the direction of the 613th Air Operations Center (613 AOC). It executes defensive counterair, interdiction, and counter drug operations in support of Indo-Pacific Command (INDOPACOM). The PADS fuses all-source sensor and intelligence data into a common operational air picture and disseminates integrated tactical warning information and attack assessment. The 169th Air Defense Squadron (169 ADS) operates the Hawaii Battle Control Center to conduct the PADS mission.

A3.8.2. **Alaskan Battle Control Center (ABCC) Mission** . Provides air sovereignty and air defense of the Alaska operational area by executing defensive counterair, interdiction and counterdrug operations in support of NORAD/Northern Command (NORTHCOM) and/or INDOPACOM. The ABCC is subordinate to the 611th Air Operations Center (611 AOC) and supports continuation of operations when directed or required for time critical execution. The ABCC fuses all-source sensor and intelligence data into a common operational air picture and disseminates integrated tactical warning information and attack assessment. The 176th Air Defense Squadron (176 ADS) provides manning for tactical C2 operations. The 611 AOC provides manning for the Alaskan NORAD Region (ANR) BS.

A3.8.3. **Hawaii Battle Control Center/Pacific Air Defense Sector (PADS) Organization** .

A3.8.3.1. The PADS is comprised of two separate but complementary elements: the BS and the mission crew. The BS manages the air battle and functions as the conduit for the exchange of C2 information between the PADS and HHQ. The mission crew performs the functions of battle management, weapons control, surveillance, identification, tactical data link management and airspace management.

A3.8.3.2. BS. The BS is a complementary element to the mission crew. The air defense director (ADD) may form the BS as necessary based on changes in the threat or directed missions from HHQ. The BS may be activated for an indefinite period and each BS position must be capable of sustained operations **(T-3)** The ADD may also tailor and selectively man positions within the BS for specific operations. The BS is responsible for:

A3.8.3.3. Executing homeland defense, air defense, and air sovereignty missions. **(T-3)**

A3.8.3.4. Coordinating the employment of assigned assets with HHQ. **(T-3)**

A3.8.3.5. Translating operational-level plans into tactical-level orders for mission crew execution. **(T-3)**

A3.8.3.6. Coordinating with the mission crew. **(T-3)**

A3.8.3.7. Disseminating tactical-warning and attack assessment information to HHQ. **(T-3)**

A3.8.3.8. Performing real-time battle management in support of the mission crew. **(T-3)**

A3.8.4. BS Composition. The BS may be tailored by the ADD to accomplish the assigned mission. Based on the mission tasking, the BS can consist of any combination of ADD, DO, joint asset control officer (JACO)/joint asset control officer technician (JACOT), IN, EAC, weapons and tactics officer, fighter officer (FO). **Note:** The BS may require augmentation from outside the ADS.

A3.8.4.1. Air Defense Director (ADD). The ADD is the senior ranking officer no lower than the rank of Lieutenant Colonel. ADDs will:

A3.8.4.1.1. Coordinate and implement homeland defense, air defense, air sovereignty, and aerospace control and warning through employment of the forces assigned or made available. **(T-3)**

A3.8.4.1.2. Coordinate tactical action with HHQ and task appropriate assets through the BS to the mission crew. **(T-3)**

A3.8.4.1.3. Exercise tactical control of all BS members. **(T-3)**

A3.8.4.2. Intelligence officer or non-commissioned officer (IN). INs will:

A3.8.4.2.1. Advise the BS and mission crew on the threats to the HADR or GADR. **(T-3)**

A3.8.4.2.2. Interface, coordinate and integrate intelligence data from all available intelligence sources to include HHQ and AOCs. **(T-3)**

A3.8.4.2.3. Receive and relay all intelligence reports and other intelligence items to HHQ and other organizations as required. **(T-3)**

A3.8.4.2.4. Review intelligence data, characteristics and capabilities of potential threats. **(T-3)**

A3.8.4.2.5. Prepare and present tailored, intelligence threat updates, reports, threat analysis, and situation briefings for operations personnel. **(T-3)**

A3.8.4.2.6. Conduct studies of enemy forces and prepare intelligence reports and scenarios that realistically represent those forces. **(T-3)**

A3.8.4.2.7. Plan and conduct training of operations personnel regarding intelligence matters. **(T-3)**

A3.8.4.2.8. Maintain current situation maps, warning displays, local database, and the intelligence library. **(T-3)**

A3.8.4.3. Fighter Officer (FO). The FO is responsible to the ADD through the DO for direction and recommendations for the use of assigned fighter and tanker resources, using applicable operations plans and ADD direction to ensure appropriate fighter and tanker employment. The FO ensures applicable OPLANs and CONPLANs are carried out by fighter and tanker units and tracks the combat readiness of assigned fighter units. **(T-3)**

A3.8.5. PADS Mission Crew Composition and Manning**.** The mission crew is the focal point for the conduct of weapons, surveillance, and identification functions in the HADR. Supervised by the MCC, the mission crew is tasked to support the INDOPACOM/PACAF mission on a continuous basis and is manned by the duty positions listed in **Table A3.2**. The mission crew can be tailored to mission requirements. Manning is based on personnel assigned to the approved unit manning document. The 169th ADS Director of Operations (169 ADS/DO) determines manning requirements to cover day-to-day operations, periods of increased readiness, and exercises. **Table A3.2** identifies the combat mission crew composition of the Hawaii BCC.

Table A3.2. Combat Mission Crew Composition–Hawaii BCC.

COMBAT MISSION CREW COMPOSITION **HAWAII BCC[1]**	
Crew Position	**Crew Total**
MCC[3]	2
MT[5,6]	2
SD[3]	2
AWO/WD[2]	4
WT[5]	3
ASO/AST[2,3]	2
ST	6
ICO/ICT[2]	1
JACOT[2,4,5]	1
Cyberspace Duty Officer (CDO)	1
IN	1
TOTAL	**25**
Notes: 1. The complexity of mission or additional BMAs may require additional crew members. Augmentation of the mission crew comes either from the unit's administrative and operations staff or from other crews within the unit. 2. 13Bs can function as the technician associated with the qualification. 3. The complexity of additional events and involvement of other government agencies may require additional supervisory crew members (e.g., MCC, SD, AST) as well as additional operators for weapons, surveillance and ID. 4. Mission crew personnel man these BS positions. 5. Mission certification position. See **paragraph A3.24.** for further information. 6. The unit commander will determine the need for MT to maintain a qualification in a 1C5 duty position. **(T-3)**	

A3.9. Alaskan Battle Control Center (ABCC) Organization.

A3.9.1. The ABCC is a weapons system as described in the ACC Battle Control Center system concept. The ABCC is comprised of those elements described in the enabling concept below. Since the ABCC and 611 AOC are collocated, the AOC commander conducts the ANR/DO functions. See AFMAN 13-1AOCV3 for further information.

A3.9.2. Crew Manning. Manning of the ABCC is based on the personnel assigned through the approved unit manning document. The 176 ADS DO determines manning requirements. It will

cover day-to-day operations and periods of increased readiness and exercises **(T-3)** Table A3.3 depicts the combat mission crew composition for the Alaska BCC.

Table A3.3. Combat Mission Crew Composition, Alaska BCC.

COMBAT MISSION CREW COMPOSITION ALASKA BCC[1]	
Crew Position	**Crew Total**
MCC	2
MT[2,4]	2

WT[2,3]	2
ASO/AST[5]	2
ST[5]	6
ICO/ICT[5]	2
EAC[2]	2
CDO	1
TOTAL	**25**

Notes:

1. The complexity of mission or additional BMAs may require additional crew members.

2. Mission certification position. See **paragraph A3.24** for further information.

3. WT will be qualified in a 1C5 duty position (i.e., ST, ICT, or AST). All CMR WD's are able to perform the duties of WT. **(T-3)**

4. The unit commander will determine the need for MT to maintain a qualification in a 1C5 duty position (i.e., ST, ICT, AST or WD). **(T-3)**

5. Crew member(s) that may be certified to perform EAC duties. NORADI 10-4 requires two EAC capable personnel on duty.

A3.10. Alaska and Hawaii Battle Control Center (BCC) Mission Crew Composition. The BCC mission crew is the focal point for operations. Supervised by an MCC, the mission crew is tasked to execute the mission on a continuous basis and is manned by a number of personnel, tailored to meet mission requirements. The PADS mission crew consists of the duty positions identified in **Table A3.2** and the ABCC mission crew consists of the duty positions identified in **Table A3.3**. Duties and responsibilities of the PADS and ABCC mission crews are described in subsequent sections. Additionally, the mission crew will have personnel certified to augment and assist the battle management, weapons, and tactical data links functional areas. See **paragraph A3.24** for certification positions.

A3.11. Common Mission Crew Duties and Responsibilities.

A3.11.1. The Alaska and Hawaii BCCs share common crew qualifications and certifications. The following duties and responsibilities are common to all mission crew positions. All mission crew members will:

A3.11.2. Have working knowledge of applicable governing directives and agreements. **(T-3)**

A3.11.3. Comply with applicable governing directives and agreements. **(T-3)**

A3.11.4. Conduct internal and external communication and coordination. **(T-3)**

A3.11.5. Attend crew changeover brief. **(T-3)**

A3.11.6. Conduct thorough positional changeover briefs. **(T-3)**

A3.11.7. Perform sound security practices. **(T-3)**

A3.11.8. Conduct mission planning. **(T-3)**

A3.11.9. Conduct evacuation procedures. **(T-3)**

A3.11.10. Understand system capabilities and limitations to include weapons platforms and surveillance assets; apply to mission accomplishment. **(T-3)**

A3.11.11. Adhere to COMSEC, INFOSEC, and OPSEC procedures to include “OPEN LINE and SECURE CALL” procedures. **(T-3)**

A3.11.12. Conduct console and communication system check-out. **(T-3)**

A3.11.13. Report malfunctioning equipment to section supervisor who, in turn, passes information to the ASO or AST. **(T-3)**

A3.11.14. Report link issues to section supervisor who, in turn, passes information to the ICO or ICT. **(T-3)**

A3.11.15. Comply with guidance in positional checklists. **(T-3)**

A3.11.16. Read and initial (either electronically or via hardcopy) local information files prior to performing operational duties. **(T-3)**

A3.12. Mission Crew Commander (MCC) (13B).

A3.12.1. The MCC is responsible to the BC for all operations execution and reporting within the BCC. MCCs will:

A3.12.2. Mission plan with the BS. **(T-3)**

A3.12.3. Ensure shift manning requirements are met. **(T-3)**

A3.12.4. Implement force protection procedures. **(T-3)**

A3.12.5. Coordinate with rescue coordination center and request assistance as required. **(T-3)**

A3.12.6. Oversee effective air sovereignty, drug interdiction, and contingency operations. **(T-3)**

A3.12.7. Implement ROE. **(T-3)**

A3.12.8. Monitor emergency action board for accuracy and status changes. **(T-3)**

A3.12.9. Coordinate and direct DMA procedures. **(T-3)**

A3.12.10. Apply and execute applicable directives to include the ATO, ACO, exercise instructions, CONPLAN, OPORDs, and SPINS. **(T-3)**

A3.12.11. Oversee the interface with airborne early warning and external units via voice communications and tactical data links. **(T-3)**

A3.12.12. Monitor status of assets (e.g., sensors, links, and aircraft). **(T-3)**

A3.12.13. Ensure sound COMSEC practices in operations. **(T-3)**

A3.12.14. Initiate recall procedures when directed. **(T-3)**

A3.12.15. Ensure personnel safety and cleanliness of facility. **(T-3)**

A3.12.16. Coordinate with HHQ and internal and external agencies. **(T-3)**

A3.12.17. Ensure safety of flight during all phases of the mission. **(T-3)**

A3.12.18. Determine mission capabilities and limitations of operational equipment, approve or disapprove maintenance. **(T-3)**

A3.12.19. Interpret weather information and coordinate accordingly. **(T-3)**

A3.12.20. Identify aircraft availability and allocate alert aircraft. **(T-3)**

A3.12.21. Coordinate and implement actions taken during fire, bomb threat, or natural disaster situations. **(T-3)**

A3.12.22. Monitor status of fire alarm systems. **(T-3)**

A3.12.23. Summon medical assistance as required. **(T-3)**

A3.12.24. Summon assistance during duress and or intruder situations. **(T-3)**

A3.12.25. Conduct evacuation procedures. **(T-3)**

A3.12.26. Notify HHQ of commander's availability and responsible individual. **(T-3)**

A3.12.27. Ensure response to HHQ exercises, if tasked. **(T-3)**

A3.12.28. Oversee track reporting procedures. **(T-3)**

A3.12.29. Execute derelict airborne objects procedures. **(T-3)**

A3.12.30. Implement DEFCON procedures. **(T-3)**

A3.12.31. Report and record missile launches. **(T-3)**

A3.12.32. Recommend amber warning and/or flush bases. **(T-3)**

A3.12.33. Assume BS responsibilities when BS is not formed. **(T-3)**

A3.12.34. Scramble and/or commit fighters IAW theater SPINS. Keep BS informed of scramble and/or commit status. **(T-3)**

A3.12.35. Ensure fidelity drills are coordinated with HHQ. **(T-3)**

A3.12.36. Direct reclassification of tracks. **(T-3)**

A3.12.37. Execute aircraft emergency procedures. **(T-3)**

A3.12.38. Ensure operations logbook and records are maintained. **(T-3)**

A3.12.39. Ensure proper information is passed for effective operational reporting. **(T-3)**

A3.12.40. Operate and monitor communications equipment. **(T-3)**

A3.12.41. Make required public address (PA) announcements. **(T-3)**

A3.12.42. Be familiar with red switch coordination. **(T-3)**

A3.13. Weapons Section. The weapons section is responsible for managing and employing the assigned weapons systems IAW OPORD, ATO, ACO, SPINS and/or other governing publications. Weapons control procedures and techniques are contained in AFTTP 3-3.IPE, AFMAN 11-214, and local directives. Weapons positions will be SD and AWO/WD. **(T-2)**

A3.14. Senior Director (SD) (13B).

A3.14.1. The SD is responsible to the MCC for management of the weapons section, battle management, and force employment. The SD executes aircraft scrambles and commits, target selection, weapons assignment, and supervises the AWO/WD employment of resources. The SD will be a qualified and current AWO. **(T-3)** SDs will:

A3.14.2. Know the capabilities and limitations characteristics of all assigned weapons systems. **(T-3)**

A3.14.3. Commit air defense weapons to counter the threat. **(T-3)**

A3.14.4. Assign control of missions to AWO/WD. **(T-3)**

A3.14.5. Monitor assigned missions to ensure effective mission accomplishment and flight safety. **(T-3)**

A3.14.6. Assign radio frequencies and specific consoles commensurate with mission requirements. **(T-3)**

A3.14.7. Coordinate aircraft transfer points where control is passed to other controlling agencies. **(T-3)**

A3.14.8. Apply ROE. **(T-3)**

A3.14.9. Coordinate aircraft scramble and airborne orders. **(T-3)**

A3.14.10. Ensure all missions are briefed and debriefed. **(T-3)**

A3.14.11. Apply applicable directives to include the ATO, ACO, exercise instructions, CONPLAN, and SPINS. **(T-3)**

A3.14.12. Ensure that all AWO/WD are aware of existing and forecast weather conditions for the operational area and recovery bases as necessary. **(T-3)**

A3.14.13. Coordinate weapons section actions with surveillance and identification to maintain air picture. **(T-3)**

A3.14.14. Monitor status of alert assets. **(T-3)**

A3.14.15. Coordinate with adjacent sector SD. **(T-3)**

A3.14.16. Perform authentication procedures. **(T-3)**

A3.14.17. Ensure safety of flight. **(T-3)**

A3.14.18. Be capable of performing all AWO/WD duties. **(T-3)**

A3.15. Air Weapons Officer (AWO)/Weapons Director (WD) (13B/1C5D).

A3.15.1. The AWO/WD is responsible to the SD for the control of assigned aircraft. AWO/WD will:

A3.15.2. Apply applicable directives to include the ATO, ACO, exercise instructions, CONPLAN, and SPINS prior to sitting on position. **(T-3)**

A3.15.3. Perform authentication procedures. **(T-3)**

A3.15.4. Implement safe passage procedures. **(T-3)**

A3.15.5. Pre-brief and de-brief mission with aircrew to the maximum extent possible. **(T-3)**

A3.15.6. Pass significant weather forecasts, observations, and altimeter setting to aircrew upon check-in as appropriate. **(T-3)**

A3.15.7. Pass engagement orders. **(T-3)**

A3.15.8. Ensure expeditious fighter positioning for mission tasking. **(T-3)**

A3.15.9. Assist aircrews in maintaining lateral confines of airspace and airspace control measures IAW AFMAN 11-214 and local procedures and letters of agreement. **(T-3)**

A3.15.10. Maintain tracking of assigned aircraft and non-participating aircraft, which can potentially affect flight safety. Provide accurate and timely stranger point-outs. **(T-3)**

A3.15.11. Ensure an orderly flow of aircraft for recovery to other control agencies. **(T-3)**

A3.15.12. Inform the SD of conditions or situations that may affect mission completion or aircraft safety. **(T-3)**

A3.15.13. Coordinate aircraft scrambles, target selection, and weapons assignment. **(T-3)**

A3.15.14. Know the capability of rapidly evaluating the air defense threat situation and taking timely defensive action. **(T-3)**

A3.15.15. Inform other AWO/WD of any actions taken that may affect their control actions. **(T-3)**

A3.15.16. Provide tactical information to aircrews that may affect mission accomplishment. **(T-3)**

A3.15.17. Obtain PIREP and relay them to the SD. **(T-3)**

A3.15.18. Ensure flight safety with overall mission requirements. **(T-3)**

A3.15.19. Provide navigational and emergency assistance. **(T-3)**

A3.15.20. Ensure completion of all appropriate logs and forms related to assigned tasks. **(T-3)**

A3.15.21. Know the capabilities and limitations characteristics of all assigned weapons systems. **(T-3)**

A3.15.22. Know airspace management requirements and procedures. **(T-3)**

A3.15.23. Use operational brevity code words, proper R/T techniques, and communications discipline. **(T-3)**

A3.16. Air Picture Management (APM) Section. APM encompasses the functions of surveillance, ID, and tactical data links. The APM section is responsible for the detection, tracking, ID, and classification and reporting of air objects and maintaining assigned portion of the MTN and integrating other source data into a single air picture. This section also directs the optimum configuration of sensors for effective radar coverage and information sharing.

A3.17. Air Surveillance Officer (ASO) (13B).

A3.17.1. If employed, the ASO manages all operational functions within the surveillance section and fulfills the prerequisite for MCC. The ASO is responsible to the MCC for the maintenance and quality of a single integrated air picture. ASO will:

A3.17.2. Coordinate with interface control section. **(T-3)**

A3.17.3. Supervise the timely and accurate collection, display, and dissemination of surveillance data. **(T-3)**

A3.17.4. Monitor and report equipment status through job control. **(T-3)**

A3.17.5. Ensure the surveillance section manning is adequate to meet mission requirements. **(T-3)**

A3.17.6. Ensure MCC and maintenance personnel are aware of outages or equipment degradation. **(T-3)**

A3.17.7. Coordinate data reduction products during normal duty hours. **(T-3)**

A3.17.8. Produce data reduction products during periods other than normal duty hours. **(T-3)**

A3.17.9. Assess and coordinate requirements for sensor augmentation and gap coverage. **(T-3)**

A3.17.10. Coordinate and de-conflict frequency assignments for the surveillance section as required. **(T-3)**

A3.17.11. Ensure preventive maintenance actions are deconflicted with operational mission activities. **(T-3)**

A3.17.12. Manage sensor and track validation procedures. **(T-3)**

A3.17.13. Know radar characteristics and optimize radar presentation. **(T-3)**

A3.17.14. Conduct EA/EP procedures. **(T-3)**

A3.17.15. Conduct Mode IV/V checks. **(T-3)**

A3.17.16. Monitor auxiliary equipment. **(T-3)**

A3.17.17. Perform radar correlation checks. **(T-3)**

A3.18. Air Surveillance Technician (AST) (1C5X1).

A3.18.1. The AST is responsible to the MCC with the management of all air surveillance functions. The AST is responsible for the administrative and operational conduct of the enlisted personnel in the APM section. The AST is responsible for the entire air picture including track

validation, classification, and datalinks. In the absence of an ASO, the AST performs all their responsibilities. In addition, AST will:

A3.18.2. Monitor radar messages counts. **(T-3)**

A3.18.3. Set up, display, and update radar filters as required. **(T-3)**

A3.18.4. Monitor, update, and report radar status. **(T-3)**

A3.18.5. Analyze and report unusual presentations (e.g., EA, weather, and transient interference) to the appropriate agencies. **(T-3)**

A3.18.6. Assign surveillance areas to all STs. **(T-3)**

A3.18.7. Supervise sensor, track validation and classification, and datalink procedures. **(T-3)**

A3.18.8. Conduct EA/EP procedures. **(T-3)**

A3.18.9. Conduct Mode IV/V checks. **(T-3)**

A3.18.10. Monitor auxiliary equipment. **(T-3)**

A3.18.11. Perform radar correlation checks. **(T-3)**

A3.18.12. Be capable of supervising all ST duties. **(T-3)**

A3.19. Surveillance Technician (ST) (1C5X1).

A3.19.1. The ST is responsible to the ASO or AST for track detection, initiation (active and passive), investigation and classification, track maintenance and reporting for all airborne objects within the assigned surveillance area. In addition to the duties and responsibilities in **paragraph A3.16.**, STs will:

A3.19.2. Detect tracks and perform active and passive tracking procedures. **(T-3)**

A3.19.3. Manually initiate track symbology as required. **(T-3)**

A3.19.4. Maintain track continuity and drop tracks as required. **(T-3)**

A3.19.5. Correlate data and track reports from multiple sources. **(T-3)**

A3.19.6. Perform voice-tell as assigned. **(T-3)**

A3.19.7. Report suspicious track activity. **(T-3)**

A3.19.8. Monitor and report track characteristics. **(T-3)**

A3.19.9. Recognize and report emergency aircraft situations. **(T-3)**

A3.19.10. Perform Mode IV/V interrogations. **(T-3)**

A3.19.11. Notify the ASO or AST of identification investigation status. **(T-3)**

A3.19.12. Adhere to identification criteria IAW ROE. **(T-3)**

A3.19.13. Classify tracks IAW directives. **(T-3)**

A3.19.14. Perform authentication procedures. **(T-3)**

A3.19.15. Coordinate with external agencies to implement aerospace control measures. **(T-3)**

A3.19.16. Perform safe passage IAW directives. **(T-3)**

A3.19.17. Make appropriate public announcements. **(T-3)**

A3.19.18. Interpret, correlate, and report flight plan information. **(T-3)**

A3.19.19. Communicate on the DEN. **(T-3)**

A3.19.20. Conduct the ST portion of changeover and exercise briefings. **(T-3)**

A3.20. Interface Control Cell (ICC). The ICC is responsible to the ASO or AST for developing and maintaining their assigned sector of the MTN. The BCC ICO or ICT(s) coordinate with the AOC JICO for planning and execution functions that cross sector boundaries or impact the regional portion of the MTN.

A3.21. Interface Control Officer (ICO) (13B).

A3.21.1. The ICO, if employed, is responsible to the MCC for supervision and management of ICC operations. The ICO supervises all link management issues within the MTN, including clarity, accuracy, currency, and quality of track data displayed on the mission system. ICO will:

A3.21.2. Supervise link management and TDC. **(T-3)**

A3.21.3. Transmit or coordinate the transmission of change data orders. **(T-3)**

A3.21.4. Recommend changes to surveillance based on MTN situation. **(T-3)**

A3.21.5. Manage MTN participant's surveillance scheme (e.g., track production area [TPA], mutual support, and track by exception). **(T-3)**

A3.21.6. Manage and direct the use of filters. **(T-3)**

A3.21.7. Coordinate and manage the execution of fidelity drills. **(T-3)**

A3.21.8. Coordinate with HHQ for tactical operations data (TACOPDAT) and OPTASK LINK issues. **(T-3)**

A3.21.9. Manage data forwarding. **(T-3)**

A3.21.10. Assign and manage forwarding units, including standbys. **(T-3)**

A3.21.11. Supervise communications to support link and track management. **(T-3)**

A3.21.12. Designate or perform TDC. **(T-3)**

A3.21.13. Manage MTN contingency procedures for loss of part or all links. **(T-3)**

A3.21.14. Approve and direct crypto key changes. **(T-3)**

A3.21.15. Ensure all link operations comply with HHQ directives. **(T-3)**

A3.21.16. Ensure current link information is available to all BCC personnel. **(T-3)**

A3.21.17. Manage assignment of functional network roles. **(T-3)**

A3.21.18. Know content of governing military standards and HHQ directives. **(T-3)**

A3.21.19. Ensure Link 16 operations are entered into the Link 16 network deconfliction server. **(T-3)**

A3.21.20. Manage activation and deactivation of relays and changes of JU transmit mode. **(T-3)**

A3.21.21. Manage and use COMSEC material required for ICC operations. **(T-3)**

A3.21.22. Evaluate tactical link performance and up channels data for operational assessment. **(T-3)**

A3.21.23. Supervise and perform changes to serial and internet protocol (IP) configurations. **(T-3)**

A3.21.24. Direct subordinate unit changes to the DNCS for Link 11. **(T-3)**

A3.21.25. Manage and direct subordinate unit(s) changes to parameters for interface data links. **(T-3)**

A3.21.26. Supervise the local resolution of interface anomalies. **(T-3)**

A3.21.27. Monitor and coordinate effects of data filters. **(T-3)**

A3.22. Interface Control Technician (ICT) (1C5X1).

A3.22.1. The ICT is responsible to the MCC for ICC operations. The ICT is responsible for the operational conduct of the enlisted personnel in the ICC and assists the ICO in the accomplishment of their duties. The ICT is responsible for all link management issues within the MTN and ensures the clarity, accuracy, currency, and quality of track data displayed on the mission system. ICT facilitates the resolution of dual track designation and identification conflicts. ICTs will perform the following:

A3.22.1.1. Supervisory. **(T-3)**

A3.22.1.2. Oversee or perform the link management and TDC. **(T-3)**

A3.22.1.3. Transmit or coordinate the transmission of change data orders. **(T-3)**

A3.22.1.4. Recommend changes to the surveillance based on MTN situation. **(T-3)**

A3.22.1.5. Direct MTN participant's surveillance scheme (e.g., TPA, mutual support, and track by exception). **(T-3)**

A3.22.1.6. Coordinate and direct the use of filters. **(T-3)**

A3.22.1.7. Coordinate the execution of local fidelity drills. **(T-3)**

A3.22.1.8. Coordinate with HHQ for TACOPDAT and OPTASK LINK issues. **(T-3)**

A3.22.1.9. Manage data forwarding. **(T-3)**

A3.22.1.10. Assign and manage forwarding units. **(T-3)**

A3.22.1.11. Establish communications to support link and track management. **(T-3)**

A3.22.1.12. Implement and manage MTN contingency procedures for loss of part or all links. **(T-3)**

A3.22.1.13. Approve and direct cryptologic key changes. **(T-3)**

A3.22.1.14. Ensure all link operations comply with HHQ directives. **(T-3)**

A3.22.1.15. Ensure current link information is available to all BCC personnel. **(T-3)**

A3.22.2. Link management. **(T-3)**

A3.22.2.1. Manage assignment of functional network roles. **(T-3)**

A3.22.2.2. Implement MTN corrective actions when disruptions occur to ensure the effective and efficient exchange of information. **(T-3)**

A3.22.2.3. Ensure Link 16 operations are entered into the Link 16 network deconfliction server. **(T-3)**

A3.22.2.4. Initiate, maintain, and terminate data links. **(T-3)**

A3.22.2.5. Manage activation and deactivation of relays and changes of JU transmit mode. **(T-3)**

A3.22.2.6. Manage and use COMSEC material required for ICC operations. **(T-3)**

A3.22.2.7. Evaluate link performance and up channels operational effectiveness. **(T-3)**

A3.22.2.8. Perform net control station duties for data link coordination nets. **(T-3)**

A3.22.2.9. Coordinate and perform changes to serial and IP configurations. **(T-3)**

A3.22.2.10. Direct subordinate unit changes to the DNCS for Link 11. **(T-3)**

A3.22.2.11. Manage and direct subordinate unit changes to parameters for interface data links. **(T-3)**

A3.22.2.12. Coordinate changes to link configuration to meet information exchange requirements. **(T-3)**

A3.22.2.13. Execute Link 11 data link reference point changes. **(T-3)**

A3.22.2.14. TDC. **(T-3)**

A3.22.2.15. Establish and maintain voice communications with all link participants. **(T-3)**

A3.22.2.16. Perform as NCS for track management communications when designated. **(T-3)**

A3.22.2.17. Monitor the exchange of link messages and track data. **(T-3)**

A3.22.2.18. Ensure the effective flow of data and clarity of the tactical picture. **(T-3)**

A3.22.2.19. Supervise the resolution of interface anomalies. **(T-3)**

A3.22.2.20. Supervise the resolution of dual designations. **(T-3)**

A3.22.2.21. Supervise the resolution of duplicate tracks. **(T-3)**

A3.22.2.22. Supervise the resolution of identification conflicts. **(T-3)**

A3.22.2.23. Supervise the resolution of category conflicts. **(T-3).**

A3.22.2.24. Ensure transmission of change data orders to resolve environment and ID conflicts. **(T-3)**

A3.22.2.25. Coordinate and implement use of data filters. **(T-3)**

A3.22.2.26. Monitor effects of data filters. **(T-3)**

A3.22.2.27. Monitor and coordinate effects of participant or link node losses. **(T-3)**

A3.22.2.28. Coordinate the use and transmission of reference points, lines, and areas. **(T-3)**

A3.22.2.29. Coordinate and supervise local fidelity drills to meet mission requirements. **(T-3)**

A3.22.2.30. Know governing military standards and HHQ directives. **(T-3)**

A3.22.2.31. Use COMSEC material required for ICC operations. **(T-3)**

A3.23. Cyberspace Duty Officer (CDO) (17X/1D7/1B).

A3.23.1. If a CDO is assigned, he/she will be responsible for providing, protecting and maintaining command and control, communications, computer, and information (C4I) systems. **(T-3)** The CDO must consider cyber security implications for all BCC related mission systems to include: radios, radars, C4I systems, networks, telecommunications systems, satellite systems, and automation used in multiple classified and unclassified environments. **(T-3)** The CDO will:

A3.23.2. Direct local cyberspace incident response team(s). **(T-3)**

A3.23.3. Coordinate with applicable external cyberspace organizations, to include 1st Air Force Warfighter Communications and Cyber Systems (1AF/A6), NORAD-NORTHCOM joint cyber cell, assigned cyber protection teams, network operations security center, and the other battle control centers' cyberspace personnel. **(T-3)**

A3.23.4. Provide expertise in defensive cyber operations planning and execution, in conjunction with appropriate authorities and according to DoW defense in depth strategies for networks and systems. **(T-3)**

A3.23.5. Provide commander INFOCON status and impact to systems; make recommendations for local changes to INFOCON, to include tailored response options; apprise commander of INFOCON changes at HHQ locations. **(T-3)**

A3.24. Mission Certifications.

A3.24.1. Mission certifications augment or assist the mission crew as needed. ACC and PACAF will provide a framework for mission certifications; however, management of the certification program to include the attendant training and documentation requirements is the responsibility of the SQ/CC. The following are the mission certifications for the Alaska and Hawaii BCCs:

A3.24.2. Mission Technician (MT). The MT is responsible to the MCC for monitoring and facilitating overall mission execution, internal and external operational reporting to include EAM, supervising operational conduct of the enlisted personnel on the operations floor, and assisting the MCC in the accomplishment of his or her duties. **(T-3)** See **paragraph A3.12** for MCC specific duties.

A3.24.3. Emergency Action Coordinator (EAC) (1C5X1). If employed, the EAC is responsible to the MCC unless otherwise directed by the chief of combat operations (CCO). EACs will:

A3.24.3.1. Create, receive, validate, and disseminate EAMs and QRMs IAW NORADI 10-4. **(T-3)**

A3.24.3.2. Notify MCC or CCO of received EAMs and/or QRMs. **(T-3)**

A3.24.3.3. Receive, disseminate, and report SOA IAW NORADI 10-4. **(T-3)**

A3.24.3.4. Ensure emergency action display reflects current status. **(T-3)**

A3.24.3.5. Maintain event logs. **(T-3)**

A3.24.3.6. Coordinate with HHQ, internal and external agencies. **(T-3)**

A3.24.3.7. Respond to HHQ exercises, if tasked. **(T-3)**

A3.24.3.8. Respond to NORAD Alert System checks. **(T-3)**

A3.24.3.9. Perform authentications. **(T-3)**

A3.24.4. Weapons Technician (WT). The WT performs non-controller functions in the weapons section that may include executing scramble orders, tracking and updating weapons status displays, using chat, updating Air/Event Information Sharing System and assisting the SD and AWO/WD as required.

A3.24.5. Joint Asset Control Officer (JACO)/Joint Asset Control Officer Technician (JACOT) (13B/1C5X1). The JACO/JACOT is responsible to the ADD through the DO. The JACO/JACOT will advise the ADD on assigned sensor assets and functions as the sector's Ground Environment Resources Manager **(T-3)** The JACO/JACOT will ensure the sector's operations and CONPLANs are carried out by ground environment units and provides the BS AWACS employment recommendations. **(T-3)**

A3.25. PACAF THEATER AIR CONTROL SYSTEM (TACS) UNITS. USAF TACS elements in Japan consist of 5th Air Force Air Defense Liaison Element (5AF/ADLE), the 610th Air Control Flight, and the 623 ACS. The USAF TACS element in Korea is the 621 ACS.

A3.26. Air Defense Liaison Team (ADLT). ADLTs are responsible for coordination with Japanese Air Self Defense Forces counterparts to ensure efficient operations. ADLTs are also responsible for coordination with US air and air defense artillery (ADA) within the Japan Air Defense Ground Environment system, using the ATO and ACO developed by the 613 AOC. When activated by HHQ, the ADLT is operationally responsible to the 613th AOC Chief, Combat Operations (613 AOC/COD) (US).

A3.27. Air Defense Liaison Element (ADLE). The ADLE functions as the RICC for the operational reporting requirements supporting US and bi-lateral operations in and around Japan. The ADLE is responsible for management of operations including employment planning and coordination with US and Japanese C2 agencies.

A3.28. Regional Interface Control Cell (RICC). Will execute data link operations in Japan as directed by the AOC JICC **(T-3)**

A3.29. Sector Interface Control Cell (SICC). The SICC is responsible to the Japan Regional Interface Control Cell (RICC) at 5th Air Force Director of Operations (5AF/A3) ADLE for developing and maintaining the MTN in the southwest sector of Japan. The SICC will report directly to the theater JICC when working MTN missions outside the Japan AOR. **(T-3)**

A3.30. Forward Interface Control Cell (FICC). Will execute and deploy IAW UTC as directed by 613 AOC/JICC. **(T-3)** When activated, the FICC is operationally subordinate to the SICC or theater JICC when working MTN missions outside the Japan AOR.

A3.31. Tactical Data Link Node (TDLN). The TDLN is responsible to the nearest SICC or RICC for the execution of daily data link operations. TDLN personnel will ensure link equipment is operational and take corrective action on equipment or data links as required. **(T-3)**

A3.32. Mission Crew Duties and Responsibilities.

A3.32.1. The following duties and responsibilities are common to all crew duty positions. Units identify specific duties and responsibilities for individual or unique mission sets.

A3.32.2. Conduct mission planning.

A3.32.3. Lead or attend crew briefs.

A3.32.4. Conduct thorough positional changeover brief.

A3.32.5. Read and initial (either electronically or via hardcopy) local information files prior to performing operational duties.

A3.32.6. Lead or attend crew debrief.

A3.33. Mission Commander (MC) (13B). The MC is responsible for supervising all aspects of the mission when integrated with a crew. If a mission does not require an MC, a SL will assume those responsibilities **(T-3)** Only a certified MC will lead joint or combined forces missions **(T-3)** The MC will plan, coordinate, brief, execute and debrief joint or combined force employment packages. **(T-3)**

A3.34. Section Lead (SL) (13B). The SL is responsible to the MC for assignment of allocated weapons and for coordinating and directing activities. The SL must be a certified ABM. **(T-3)**

A3.35. Senior Battle Management Operator (SBMO) (1C571). The SBMO is typically a Senior Non-Commissioned Officer (SNCO). The SBMO is responsible to the MC and/or SL as directed to ensure the effective operation of the crew. The SBMO will be a certified 1C5 **(T-3)** Units will develop local positional certification requirements. **(T-3)**

A3.36. Battle Management Operator (BMO) (1C5X1). The BMO is responsible to the SL/WD/ABM as directed, and is responsible for facilitating effective mission execution. The BMO will be a certified 1C5. **(T-3)** Units will develop local positional certification requirements. **(T-3)**

A3.37. Air Battle Manager (ABM)/Weapons Director (WD) (13B/1C5X1D). The ABM/WD is responsible for providing appropriate BMC2 to aircraft operating in their AOR.

A3.38. Interface Control Officer (ICO) (13B/1C5X1[D]). The ICO is responsible for supervision and management of ICC operations. The ICO supervises all link management functions within the MTN, and is responsible for the clarity, accuracy, currency and quality of track data displayed on the mission system. **(T-3)**

A3.39. Interface Control Technician (ICT) (1C5X1). The ICT is responsible to the ICO for ICC operations. The ICT is responsible for all link management issues with the MTN, ensuring the clarity, accuracy, currency and quality of track data displayed on the mission system. **(T-3)**

A3.40. Missile Assignment Officer (MAO). The MAO is a normally a US Army officer responsible to the SL for the engagement of threats by ADA systems within the system. The MAO will be the liaison between the commander, Air Defense (AD) brigade, and the MC. **(T-3)**

A3.41. Intelligence Officer/NCO (IN) (14N/1N0X1). If assigned or attached, IN will advise the crew on AOR threats, provide intelligence updates as required and coordinate during planning, execution and debrief phases of contingency and exercise operations. **(T-3)** IN will also maintain current situation maps, local database and intelligence library as well as receiving and relaying intelligence reports to HHQ as required. **(T-3)**

A3.42. Computer Systems Operator (1D7X). If assigned or attached, they maintain BCS-K/BC3 system consoles, communication systems and support equipment IAW established local OI/procedures.
