Pages: 14

This publication supplements Air Force Pamphlet (AFPAM) 10-243, *Augmentation Duty*. It applies to military members assigned to Kirtland Air Force Base (KAFB). Individuals assigned to associate units on KAFB and in the surrounding areas, who are not listed as designated members of the Augmentation Review Board (ARB), may volunteer for augmentation duty taskings with approval from their Supervisors/Commanders. This publication does not apply to Air Force Reserve Command (AFRC). This publication does not apply to Air National Guard (ANG). Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using the AF Form 847, *Recommendation for Change of Publication*; route AF Forms 847 from the field through the appropriate functional chain of command. This publication requires the collection and/or maintenance of information protected by the Privacy Act of 1974 authorized by Title 10, U.S.C., 8013 and E.O. 9397 (SSN), as amended. The applicable System of Records Notice Number (SORN) is F036 AF A, 1 AFMC B, *Biographical Data and Automated Personnel Management System* (January 22, 2009, 74 FR 4013), and is located at **https://dpcld.defense.gov/Privacy/SORNsIndex/DOD-Component-Notices/Air-Force-Article-List/**. Ensure that all records created as a result of processes prescribed in this publication are in accordance with (IAW) Air Force Instruction (AFI) 33-322, *Records Management and Information Governance Program*, and disposed of IAW Air Force Records Information Management System (AFRIMS) Records Disposition Schedule (RDS).

SUMMARY OF CHANGES

This document has been substantially revised and needs to be completely reviewed. Major changes include: "In an effort to streamline KAFB's Augmentation Program, and to ensure a more robust order of business, real world and exercise requirements have been addressed separately; and a new process has been implemented that will standardize exemption and augmentation requests as well as provide program continuity.

1. The KAFB Augmentation Duty Program (ADP) . Is established to provide a uniform system for identifying, training and placing augmentee personnel to meet all installation-level augmentation needs. The intent is to help local Commanders make the best possible use of existing resources to meet all requirements that support base plans.

1.1. **(Added) Mission (KAFB General Assumptions).**

1.1.1. **(Added)** Units will support augmentation requests/requirements as outlined in wartime scenario and/or exercise plans. Since KAFB has diverse mission partners at various levels of Department of the Air Force organization, an O-6 Commander or organization's highest rank Commander on installation shall be able to work ADP execution directly with 377th Air Base Wing (ABW) Vice Commander (CV). For the purposes of this supplement references to units also may mean any Department of the Air Force (DAF) organizations on KAFB.

1.1.2. **(Added)** Augmentation Program Coordinators (APC) will fill personnel requirements from internal resources (within reason) before seeking augmentation support through the Augmentation Program.

1.1.3. **(Added)** Unit core tasks/manning needs, under each plan, will consider plan specific assumptions.

1.1.4. **(Added)** Some plans may be implemented simultaneously; therefore, avoid multi-tasking individuals for augmentation requirements.

1.1.5. **(Added)** Programs are based on reasonable worst-case scenarios. **Note:** extreme situations may require additional unexpected augmentation support.

1.1.6. **(Added)** Civilian employees may or may not be available under all plans to assist with core tasks.

1.1.7. **(Added)** Implementation of more than a single plan at one time may require prioritization of augmentation requirements for fill action.

1.1.8. **(Added)** This supplement is directed specifically at real world, wartime responses in support of augmentation duty in regards to base level plans. **Paragraph 11** of this supplement identifies items for this supplement that are waived or changed for installation level exercises and/or non-contingency operations.

2. Responsibilities. KAFB specific responsibilities.

2.1. **(Added) ADP Director, 377th Force Support Squadron (FSS) Commander (CC).**

2.1.1. **(Added)** Central point of contact (POC) for the ADP Function or Team Chiefs and Group ADP Monitors (normally the Group Superintendents).

2.1.2. **(Added)** When ADP requirement and tasking issues arise, the ADP Function or Team Chiefs and Group ADP Monitors will elevate them to the ADP Director for resolution.

2.1.3. **(Added)** Evaluates the performance of the ADP on an annual basis.

2.1.4. **(Added)** Ensures ADP Function or Team Chiefs are offering timely and appropriate training to augmentees.

2.2. **(Added) Augmentation Review Board (ARB).**

2.2.1. **(Added)** Any/all units supporting the KAFB Augmentation Program have one voting member on the ARB (the CC or designate). ABW CV is the Chairperson of the ARB. Advisors to the ARB (non-voting members) are: 377 ABW Installation Deployment Office (IDO), 377 FSS Manpower Office (FSM), 377 FSS Military Personnel Flight (FSP), and 377 ABW Inspector General Inspections Office (IGI).

2.2.2. **(Added)** The ARB will meet annually, or as needed, to review requirements, approve any new requirements and/or exemptions, allocate/reallocate requirements to fill augmentation requests, and resolve any issues requiring attention.

2.2.3. **(Added)** The ARB approves and prioritizes ADP requirements/requests.

2.2.4. **(Added)** In the event of a tie, the Chairperson (377 ABW/CV) will carry the vote.

2.3. **(Added) Augmentation Working Group (AWG).**

2.3.1. **(Added)** Any/all units supporting the KAFB Augmentation Program will appoint a primary and an alternate Unit Augmentation Monitor (UAM) as their respective POC. These appointees are the voting members of the AWG. All Group ADP Monitors (usually the Group Superintendents) are also voting members. The ADP Director (377 FSS/CC or designate) is the Chairperson of the AWG. Advisors to the AWG (non-voting members) are: all APC Team Chiefs, 377 FSS/FSM, and 377 FSS/FSP.

2.3.2. **(Added)** The AWG will meet annually, or as needed, to review requirements, make recommendations to the ARB regarding new requirements and/or exemptions, allocation/re-allocation of requests to fill augmentation requirements, and to forward to the ARB any issues requiring higher level attention.

2.3.3. **(Added)** In the event of a tie, the ADP Director (377 FSS/CC or designate) will carry the vote.

2.4. **(Added) ADP Manager (APM) (377 FSS/FSM).**

2.4.1. **(Added)** Works directly for the ADP Director in all matters concerning the ADP.

2.4.2. **(Added)** Coordinates annual review of ADP Function or Team requirements and group tasking allocations.

2.4.3. **(Added)** Schedules meetings and produces ADP agendas and meeting minutes.

2.4.4. **(Added)** Forwards validated requests for exemptions and/or additional requirements to the AWG for recommendation/non-recommendation and to the ARB for approval/disapproval.

2.4.5. **(Added)** Addresses all requests with the AWG prior to presenting them to the ARB.

2.4.6. **(Added)** Ensures all unresolved items from both the AWG and previous ARBs are brought before the ARB for resolution.

2.4.7. **(Added)** Facilitates AWG and ARB meetings.

2.5. **(Added) APCs/Team Chiefs.**

2.5.1. **(Added)** Coordinate ADP augmentee events in their respective functions.

2.5.2. **(Added)** Schedule, conduct and document augmentee training.

2.5.3. **(Added)** Provide a quarterly (or as needed) ADP training schedule to appropriate tasked Unit Commanders/designates. See **paragraph 6.1** for specific details on scheduling training.

2.5.4. **(Added)** Document training on an AF Form 2426, *Training Request and Completion,* or a training certificate, to provide a written record of training to the individual and his/her UAM.

2.5.5. **(Added)** Provide a list of augmentee training no-shows to respective UAM, Group ADP Monitor, or other POC as specified by the respective unit.

2.5.6. **(Added)** Work with 377 FSS/FSM to validate augmentee requirements.

2.5.7. **(Added)** Ensure all augmentees have received the equipment necessary to perform their augmentee duties.

2.5.7.1. **(Added)** The unit being augmented will fund and issue conventional purpose, personal wear clothing items (i.e., steel-toed boots, work gloves, parkas, rain gear, personal reflective belts, non-industrial hats) required for performance of augmentee duties.

2.5.7.2. **(Added)** Special purpose, professional-type clothing and equipment ("pro equipment") such as reflective vests, industrial hats, special purpose boots and gloves, tools or toolboxes, aprons, coveralls, non-prescription eye protection, etc. will be provided by the ADP Function or Team Chief for common-use by augmentees.

2.5.8. **(Added)** Maintain an up-to-date listing of all augmentees assigned to their teams and coordinate augmentee requirements with the appropriate unit UAMs.

2.5.9. **(Added)** Report unavailable individuals, vacancies, and augmentee problems to the ADP Director and tasked UAM for appropriate action.

2.5.10. **(Added)** Activate ADP augmentees using an Installation Commander's Directive (ICD), E-mail, or other approved activation communication document.

2.6. **(Added) Group ADP Monitors (normally the Group Superintendents).**

2.6.1. **(Added)** Represent their Group Commanders by providing management oversight of the ADP requirements within their groups.

2.6.2. **(Added)** Are voting members of the AWG, and will attend AWG meetings.

2.6.3. **(Added)** Serve as the central POC for their UAMs.

2.6.4. **(Added)** Forward augmentee issues to the ADP Director for resolution.

2.6.5. **(Added)** Are responsible for cross-filling ADP requirements when a specific unit within their group cannot fill its ADP tasking. This may include substituting members of another unit within their group. When no member of the group can fill an ADP tasking, the Group ADP Monitor will prepare a Group Commander-signed ADP tasking reclama letter addressed to the 377 ABW/CC, 377 ABW/CV and 377 FSS/CC (ADP Director).

2.6.6. **(Added)** Monitor their unit's ADP augmentee requirements.

2.7. **(Added) Manpower Office (377 FSS/FSM).**

2.7.1. **(Added)** Reviews and validates all exemption requests, including both standard exemptions (see definition in **paragraph 8.2** **(Added)**) and vacancy exemptions, and processes them through the AWG and ARB for final approval/disapproval.

2.7.1.1. **(Added)** Vacancies will be validated by comparing an organization's personnel manning document(s) against the Unit Manpower Document (UMD). Double or triple billeted position numbers that create vacancies will not be counted unless they are an authorized action (i.e., a double billeted position created when a gain is placed against an impending loss).

2.7.1.2. **(Added)** Validation of exemptions will also include verifying that an organization does not get credited for both a standard exemption and a vacancy exemption for the same position.

2.7.2. **(Added)** Validates all manpower requirements for each ADP Function or Team (see **paragraph 4.2.5 (Added)**) for both real-world operations and exercises.

2.7.3. **(Added)** Ensures all ADP requirements are distributed to the respective groups by using the "Fair-Share Quotient Formula" method as follows:

2.7.3.1. **(Added)** Determine the organizations total number of E-6 and below and O-3 and below authorized positions. Subtract all approved exemptions (see **paragraph 2.7.1 (Added)**). The remaining number equates to the unit's available positions.

2.7.3.2. **(Added)** Divide the unit's number of available positions for assignment as augmentees (see **paragraph 2.7.3.1 (Added)**) by the total number of available positions on base for augmentee positions. Multiply the resulting number by the number of validated augmentee positions. This result equals the number of augmentees the unit will provide to the program.

2.7.4. **(Added)** Revalidate all requirements, exemptions and allocations on an annual basis.

2.7.4.1. **(Added)** The annual revalidation begins on 1 October every year (at the start of a new fiscal year). The changes will be presented for review by the AWG in November/December, and for approval at an ARB in December/January.

2.7.4.2. **(Added)** Out of cycle revalidations may be requested as needed, when based on significant changes to a unit's baseline numbers. Such revalidation efforts must be approved by the ARB.

2.8. **(Added) Squadron/Group/Wing Commanders (i.e., the level at which a unit is tasked through the augmentation program).**

2.8.1. Appoint an APC/Team Chief for each ADP Function or Team assigned to their organization (applicable to augmented units only).

2.8.2. **(Added)** Appoint a Unit APC to administer personnel assigned to their team, and to communicate projected changes in augmentee availability.

2.8.3. **(Added)** Appoint augmentees to the ADP Function or Teams. Ensure augmentee selectees are able to serve a minimum of 1 year after becoming fully qualified. ***NOTE:*** Security Forces augmentees, if required, will only be assigned in the grades of E-6 and below due to the nature of the duties required to be performed under Security Forces Senior Non-commissioned Officer (SNCO)/Noncommissioned Officer (NCO) direct leadership.

2.8.4. **(Added)** Ensure their unit has an adequate number of alternate ADP augmentees that are qualified and able to replace a primary augmentee. Identify a replacement for any augmentee who is due to Permanent Change of Assignment (PCA), Permanent Change of Station (PCS), or is deemed to be unavailable for any other reason.

2.8.5. **(Added)** Release augmentees for ADP duty when tasked by the Installation Commander.

2.8.6. **(Added)** Release augmentees for scheduled ADP training. ADP training is essential for augmentees to attain and maintain position qualification. ADP training appointments are *MANDATORY APPOINTMENTS*; all no-shows are documented and briefed to KAFB senior leadership and tasked Unit Commanders.

2.8.7. **(Added)** Ensure the UAM complies with the procedures outlined in this supplement.

2.9. **(Added) Unit Augmentation Monitors (UAMs).**

2.9.1. **(Added)** Ensure augmentees are identified, selected, and notified of their responsibility to fulfill tasked ADP commitments.

2.9.2. **(Added)** Ensure replacement personnel are trained before the incumbent departs.

2.9.3. **(Added)** Work with their respective Group ADP Monitor to provide a permanent replacement if an augmentee receives a profile or notice for an extended Temporary Duty (TDY).

2.9.4. **(Added)** Review an individual's status on the ADP program with the Squadron Commander prior to their assignment to fill Unit-Type Code (UTC) or TDY requirements.

2.9.5. **(Added)** If the member will be absent, TDY, or on leave for an extended period of time (more than 30 days), notify both the APC/Team Chief and the ADP Director.

2.10. **(Added) Unit Deployment Managers (UDMs).**

2.10.1. **(Added)** Work with UAMs to ensure appropriate APC/Team Chiefs are notified prior to ADP augmentees going on extended TDYs (more than 30 days).

2.10.2. **(Added)** Relay information received from Concept Briefings pertinent to ADP augmentees (Concept Briefings notify Team Chiefs if a unit requires augmenting).

2.11. **(Added) ADP Augmentees** .

2.11.1. **(Added)** Perform ADP duties IAW this supplement.

2.11.2. **(Added)** Augmentees are obligated to serve a minimum of 1 year after becoming fully qualified.

2.11.3. **(Added)** Coordinate with their Unit ADP Monitor and ADP Function or Team Chief regarding all leaves, TDYs, or other situations rendering them unavailable to perform ADP augmentee duties.

3.2. All 377 ABW units will participate and provide augmentees per this pamphlet and as specified by the ARB. Mission Partners are highly encouraged to support KAFB's ADP and should provide agreed-upon augmentees in accordance with this pamphlet. Reference section 8 of this pamphlet for exemptions to ADP participation, execution, and requirements.

3.4. **377 ABW Vice Commander (377 ABW/CV) serves as the installation ADP OPR** .

3.7. Units will consider local plan requirements when determining augmentation needs. Each plan supported will be evaluated individually for augmentation requirements, considering general, local, and plan specific assumptions.

4.2.1. Once augmentation sourcing is determined, the ADP Manager will notify the tasked organizations, who will within 10 duty days provide the appropriate APC with required information regarding each selected augmentee. The APC will provide the augmentees UAM with any essential information, and will outline any necessary training.

4.2.2. The augmented unit's APC will schedule the augmentees it is provided, for any initial training required, and arrange for the augmentee to be issued any needed equipment/supplies, etc. To avoid conflicts, the appropriate APC will ensure all augmentees training (either initial or follow-on) is fully coordinated with augmenting units (see **paragraph 6.1**).

4.2.3. UAMs will track the status of their augmentees to ensure availability for augmentation requirements.

4.2.5. **(Added)** A unit will request approval to establish an augmentation requirement through the AWG and then the ARB.

4.2.5.1. **(Added)** If approved for submission, the request will be forwarded to the 377 FSS/FSM for validation.

4.2.5.2. **(Added)** If the Manpower Office determines the augmentation support request is valid, the requirement will be forwarded to the AWG for review and submission to the ARB for action.

4.2.5.3. **(Added)** If the Manpower Office determines the requirement is not valid, the request will be returned, with appropriate rationale, to the command function involved.

4.2.5.4. **(Added)** The command function involved will be responsible for resolving any issues regarding the request with the Manpower Office, or for elevating the issue to the AWG for resolution and/or action by the ARB.

4.2.5.5. **(Added)** If disapproved, the request will be returned, with appropriate rationale, to the requesting unit.

5.6. Because AFMAN 36-2100, *Military Utilization and Classification*, provides that enlisted personnel in the rank of Amn to SMSgt cannot perform duty outside of their Controlled Air Force Specialty Code (CAFSC) for more than 130 days annually, and to ensure individual augmentees can be rotated on a regular basis so they do not exceed the 130 day cap, identify the need for a sufficient number of augmentees to accommodate lengthy augmentation requirements. Extensions to the 130 day cap must be approved by the Major Command (MAJCOM).

5.7. Personnel identified as augmentees will remain assigned to their augmentation duty unless/until replaced in writing.

5.7.1. **(Added)** To ensure necessary stability and continuity, an augmentee should have a minimum of 12 months retainability from the date augmentation training is completed. Selecting individuals for augmentee duty who will not be able to remain in the Augmentation Program for at least one year will cause problems with augmentee training, utilization, and replacement.

5.7.2. **(Added)** Augmenting units must coordinate actions such as PCS, PCA, TDY, medical or administrative disqualification, and placement on a UTC tasking, with the affected APC.

5.7.3. **(Added)** The ADP requirement does not move with the individual when he/she is reassigned. If an individual is assigned to an ADP Function or Team, and moves to a new unit (PCA action), the losing unit must continue to fill the ADP requirement, as the requirement is allocated to the group or unit and not to a specific person.

6.1. The APC will coordinate with augmenting units to schedule both initial and refresher training for augmentees. To allow for necessary adjustments to existing duty schedules, a minimum of 14 calendar day notice is required when notifying trainees of training requirements.

8. (Added) Requesting Exemptions.

8.1. **(Added)** Units will consider local plan requirements when determining appropriate exemptions from participation in the ADP. Each plan supported will be evaluated individually for appropriate exemptions, considering general, local, and plan specific assumptions. Units will also consider their "core" tasks (functions which must continue to be performed even during a contingency) and manning needs under each plan when determining appropriate exemptions.

8.2. **(Added)** If requested by the unit, and subsequently validated by the Manpower Office (see **paragraph 2.7.1 (Added)**), the following are classified as standard exemptions: Executive Officer, Trainer, UDM, deployable UTCs from the current Air Expeditionary Force (AEF) cycle which contain an Air Force World-Wide UTC Summary (AFWUS) code of 'DP' or 'DW' (not 'DX'), personnel performing Honor Guard duties, and vacant authorizations/positions within the requesting organization.

8.3. **(Added)** Mission related exemption requests will be reviewed and considered on a case-by-case basis. O-6 Commanders or organization's highest rank Commander on installation determine mission related exemptions. These Commanders will forward to 377 ABW/CV for information, and to 377 FSS/FSM for record and update of Fair Share if required.

8.4. **(Added)** A squadron will request an exemption from the Augmentation Program through 377 FSS/FSM.

8.4.1. **(Added)** If the Manpower Office determines the exemption is valid, the request will be reviewed by the next scheduled AWG, and submitted to the subsequent ARB (usually held within 30 days of the AWG) for action.

8.4.2. **(Added)** If the Manpower Office determines the exemption is not valid, the request will be returned within 30 days, with appropriate rationale included, to the command function involved.

8.4.3. **(Added)** The command function involved will be responsible for resolving any issues regarding the request with the Manpower Office, or elevating the issue to the AWG for resolution and/or action by the ARB.

9. (Added) Conflict Resolution.

9.1. **(Added)** APCs and UAMs should work hand-in-hand to ensure augmentation requirements are being met. For example, if a unit is tasked to provide three augmentees for the Search and Recovery Team, but the Search and Recovery APC doesn't receive some or all of the augmentees, he/she should work directly with the augmenting UAM to obtain the required augmentees.

9.1.1. **(Added)** Any conflicts which cannot be resolved at that level should be reported to the augmenting Unit Commander. In most cases, conflicts should be resolved at this level.

9.1.2. **(Added)** If a conflict cannot be resolved at that level, it will be elevated to the AWG and ARB for resolution.

9.2. **(Added)** A unit which can no longer support some or all of its augmentation requirements (called an opt-out) will notify the 377 FSS/FSM. Manpower will notify the 377 ABW/CV who must approve the opt-out.

9.2.1. **(Added)** If the opt-out is approved, the Manpower Office will determine a revised fair share (see **paragraph 2.7.3 (Added)**).

9.2.2. **(Added)** The revision will need to be presented to the AWG for consideration. The AWG will forward their recommendation to the ARB for final approval/disapproval.

10. (Added) Use of Augmentees.

10.1. **(Added)** During a contingency, the augmented unit may call up needed augmentees.

10.2. **(Added)** Augmented unit Commanders may consult with the APM for fair share requirements as approved by the ARB.

10.3. **(Added)** Prior to requesting augmentation, the augmented Commander must consider all other means (i.e., using internal resources and requesting Individual Mobility Augmentee (IMA), Reserve or Guard support).

10.4. **(Added)** It is imperative that the augmented Commander request the use of augmentees as soon as possible to minimize the impact on augmentees and their units.

10.5. **(Added)** Only the Installation Commander has the authority to approve augmentee call-ups. ADP Team or Function activations are accomplished using an ICD which will be routed to the Installation Commander by the APC Function or Team Chief requesting the augmentees.

10.5.1. **(Added)** Full recall: Augmentees will report to their units for accountability upon release of the activation ICD. Immediately after sign-in, augmentees report to their APC/Team Chief.

10.5.2. **(Added)** Limited recall: Augmentees will report to their units for accountability upon release of the activation ICD. Immediately after sign-in, augmentees will standby for ADP activation and reporting instructions from their UAM.

10.6. **(Added)** Squadron Commanders may excuse an ADP augmentee from ADP duties or training in the event of extenuating circumstances that would preclude an ADP Function or Team member from fulfilling his/her one year obligation after becoming qualified (i.e., pending legal action, personal problems, selection for extended TDY). If the Commander does not have a replacement, the Commander will elevate the fill action to the Group ADP Monitor to provide a replacement.

11. (Added) Variations for Exercises. Items identified in this paragraph are applicable to planned exercise activities and non-contingency operations only.

11.1. **(Added)** The APC/Team Chief will staff the ICD, E-mail or memo completely through the augmented unit and Group Commanders, and the 377 ABW/CC for final approval and release.

11.1.1. **(Added)** The activation ICD, E-mail, or memo must provide all augmenting units a minimum of 14 calendar day advance notice of the planned activation date to ensure maximum augmentee availability and participation.

11.1.2. **(Added)** An advance copy of the draft ICD, E-mail, or memo and AF Form 1768, *Staff Summary Sheet*, will be provided to the 377 FSS/CC (ADP Director) to ensure augmentees can be identified in a timely manner for planned activation.

11.2. **(Added)** UAMs will contact supervisors to verify release of augmentees for training, exercises, and contingencies. Immediately elevate availability problems to the Squadron Commander.

11.2.1. **(Added)** UAMs will notify the APC/Team Chiefs and Group ADP Monitors as soon as they know that personnel assigned will be unavailable for ADP duty.

11.2.2. **(Added)** When no member of the unit can fill an ADP requirement, the Unit Commander will notify, in writing, their Group Commander, Group ADP Monitor and 377 FSS/CC (ADP Director).

11.3. **(Added)** Should a mission-related scheduling conflict arise between the squadron and APC/Team Chief regarding augmentee duties, attempts will be made to resolve such conflicts at the lowest level of authority. The applicable Group ADP Monitor, representing his/her Group Commander, is the final decision authority in these cases.

11.4. **(Added)** During non-contingency operations (such as special events), the augmented Unit Commander must request the use of augmentees through the augmented Group Commander. The Group Commander forwards the request to the 377 ABW/CV for approval. The APM provides 377 ABW/CV the fair share requirements as approved by the ARB. A minimum of 14 calendar days advance notice must be given to the augmenting unit.

11.5. **(Added)** For exercise or training call-ups, the ADP Director will send the request to the 377 Mission Support Group (MSG)/CC who, in turn, will obtain the call-up approval from the 377 ABW/CC. APC/Team Chief will thoroughly justify and document all recalls. The APC/Team Chief will contact the augmenting units using the "Go-to Person List" provided by the APM as the POC for augmentee notification of training or exercise-related recalls. An E-mail will also be sent to the leadership of each augmenting organization notifying them that the program is activated for “XXX” requirement.

11.5.1. **(Added)** All units tasked to provide augmentees will be given as much notice as possible, but at least a minimum of 14 calendar day notice, that augmentees will be required. This is to minimize the impact on day-to-day unit mission requirements.

11.5.2. **(Added)** ADP call-up without recall: ADP Function or Teams may be notified to report for their particular duties via an ICD without initiating a Wing recall. Under these circumstances, the affected ADP Function or Team Chief will obtain approval from the Installation Commander to call-up ADP augmentees through the ADP Director. Once approved, the ADP Function or Team Chief will initiate and route an ICD, E-mail, or memo to activate their team. After activation release, they will contact the augmenting unit's "Go-to Person", who will in turn, notify the augmentee to report for ADP duties. Upon notification, augmentees will report to their respective APC/Team Chief and notify their normal work center of their status.

11.6. **(Added)** ADP duty will take precedence over ordinary leave and will be de-conflicted with the 377 ABW Exercise Calendar, managed by 377 ABW/IGI. For advanced planning purposes, dates for all exercise events requiring ADP participation will be locked in 90 days prior to the event and leaves can be taken based on the event dates as scheduled at that time. Should a change in the event dates occur within 90 days of the event, the augmenting unit CC will make every effort to fill any vacancies caused by the shift in dates. However, if unable to comply, the slot may go unfilled and the exercise will continue with a shortage.

11.7. **(Added)** When a member is unable to perform their augmentee duty, the member's Unit Commander will provide the ADP Director with a memo, in writing, stating the validated reason for the absence (not required if the 14 calendar day notification was not provided).

11.8. **(Added)** If a Commander excuses a member from augmentee duty, the Commander will provide an alternate (not required if the 14 calendar day notification was not provided). If the Commander does not have an alternate, then the Commander will elevate the shortage to the Group ADP Monitor to provide the alternate from another unit within the group.

11.9. **(Added)** APCs/Team Chiefs will closely monitor activation and/or training attendance, and report no-shows.

JASON F. VATTIONI, Colonel, USAF
Commander
