Pages: 19

This instruction implements Air Force Policy Directive (AFPD) 91-2, *Safety Programs.* It establishes mishap prevention program requirements, assigns responsibilities for program elements and contains program management information. This instruction applies to all Eglin Air Force Base (AFB) activities. Tenant units will comply with requirements as stated in host-tenant support agreements and as specified in this instruction. 96 TW/Safety (96 TW/SE) is **the approval authority for waivers and exceptions to this instruction.** Supplements to this publication must be routed to 96 TW/SE for coordination prior to certification and approval. Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using the AF Form 847*, Recommendation for Change of Publication*; route AF Forms 847 from the field through the appropriate functional's chain of command. Ensure that all records created as a result of processes prescribed in this publication are maintained IAW Air Force Manual (AFMAN) 33-363, *Management of Records*, and disposed of IAW Air Force Records Information Management System (AFRIMS) Records Disposition Schedule (RDS).

SUMMARY OF CHANGES

This document is substantially revised to update procedures and office symbols; must be completely reviewed. Major changes include clarification of 96th Test Wing Safety roles and responsibilities and updates to organizations, directives, prescribed forms and office symbols.

1.2. Vision. The vision of the 96 TW Safety Program is to instill a commander-centric/ proactive safety and risk management culture that (1) minimizes all mishaps and (2) supports 96 TW mission objectives.

1.2.4. **(Added) Mission.** The mission of the 96 TW/SE is to promote and enhance total safety awareness and practices during all on- and off-duty activities through education and training of 96 TW personnel and through participation in the design and test of weapon systems.

1.8.15.17. Commanders and supervisors establish a process that requires contract requirements generators to coordinate Performance Work Statements (PWS), Statements of Work (SOW), Statement of Objectives (SOO), etc., through 96 TW/SE for inclusion of the industrial and explosives safety requirements.

1.8.16.22. The 96 TW/CC awards Safety Well Done recognition at the Wing level for military, civilian, and contractor personnel IAW the 96 TW/SE process guide.

1.8.17.4. **(Added)** Establish a process to ensure all 96 TW contract documents [PWSs, SOWs, SOOs, Requests for Proposal (RFP), etc.] are coordinated through 96 TW/SE for inclusion of safety requirements. Ensure coordination has been accomplished prior to accepting the documents from the requirements generator. Any changes made to the safety section must be coordinated through 96 TW/SE for approval. The requirements for coordination of documents are: if contractor will be working or residing on Eglin AFB or Eglin property; if contractor will be working on government equipment; and if contractor operations could impact the safety and health of government personnel/property or the public.

1.8.21.7. Ensure that a process is in place for items being purchased on the government purchase card (GPC) or AF Form 9, that may affect the safety and health of employees, are coordinated through 96 TW/SEG for inclusion of product safety requirements. See **Attachment 23** for a sample listing of equipment/machinery. **NOTE:** No matter what purchasing document or funding avenue is used to acquire the products, documents must be coordinated through the host safety office for the protection of government personnel and property. E-mail the following items to 96 TW/SEG **96TW.SEG.OccupationalSafety@us.af.mil** for review: (1) details of the item to be purchased; (2) manufacturer's specifications of the item to be purchased and (3) how the item will be used by personnel.

2.1. Structure of 96 TW Safety Office. 96 TW/SE contains five divisions to manage the US Air Force Mishap Prevention Program. The three traditional divisions of Flight Safety (SEF), Occupational Safety (SEG), and Weapons Safety (SEW) perform duties as defined in AFI 91-202, *The US Air Force Mishap Prevention Program,* and AFI 91-204, *Safety Investigations and Reports*. The Systems Safety element (SES) fulfills the requirements of AFI 91-205, *Nonnuclear Munitions Safety Board,* and the AFMC supplement by providing Systems Safety engineering to the Air Force weapons acquisition process. The Test and Range Safety element (SEU) fulfills the requirement of AFI 91-202 AFMC Supplement and AFTCI 91-202, *AFTC Test Safety Review Policy,* by providing risk analysis and risk mitigation on testing and training operations using the Eglin AFB test ranges.

2.2.2.8. **(Added)** Units requiring a weapons safety program which lacks a local full-time and fully qualified weapons safety manager or equivalent will send a memorandum of appointment for primary and alternate Additional Duty Weapons Safety Representatives (ADWSR) to 96TW/SEW; see **Attachment 21** for an example. ADWSRs should be highly qualified and preferably non-commissioned officers in a career field applicable to the explosives operations of the unit or civilians with equivalent experience. Units with a local full-time and fully qualified weapons safety manager or equivalent are responsible for managing and training their own ADWSRs.

2.6.3. **(Added)** The 96th Civil Engineer Group, Environmental Division (96 CEG/CEV) serves as executive secretary for the councils covering the first and third quarters of each fiscal year, at which the environmental division briefing is included. The 96 TW/SE serves as executive secretary for the councils covering the second and fourth quarters of each fiscal year.

3.13.1.1. **(Added)** Commanders will direct 96 TW unit Contracting Officer Representatives (COR) that are required to monitor performance of contractor weapons operations of any kind (explosives, DEW, etc.) to attend specialized training by 96 TW/SEW no later than 90 days from initial assignment of COR responsibilities. Training for tenant CORs will be provided IAW the terms and conditions of the host-tenant support agreement.

7.1. Program Management. The purpose of the 96 TW Aviation Safety Program is to equip the 96 TW with policy, tools, analyses, and reviews to ensure 96 TW plans and executes flight operations in the safest manner possible consistent with mission requirements.

7.2.3. **(Added)** The Flight Safety Division (96 TW/SEF) will:

7.2.3.1. **(Added)** Supervise the work of United States Department of Agriculture Animal and Plant Health Service Wildlife Services (USDA-APHIS-WS) biologists hired in support of the BASH Program.

7.2.3.2. **(Added)** Participate in all flight-related test approval briefs.

7.2.4. **(Added)** Squadron Assigned Flight Safety Officers will:

7.2.4.1. **(Added)** Ensure 96 TW/SEF is notified immediately of all mishaps and other unusual occurrences involving 96 TW aircraft.

7.2.4.2. **(Added)** Ensure aircrews are aware of proper procedures for reporting aircraft mishaps and other unusual occurrences.

7.2.4.3. **(Added)** Assist in investigating and reporting 96 TW mishaps, when required.

7.2.4.4. **(Added)** Maintain liaison with 96 TW/SEF in all matters involving flight safety.

8.5.7. Establish a safety bulletin board that is readily accessible to employees and post safety-related materials. The safety bulletin board will include, as a minimum, an AFVA 91-209, *Air Force Occupational Safety and Health Program;* U.S Dept. of Labor Form CA-10, *What an employee should do when injured at work* (if civilians assigned to unit); blank AF Forms 457, *USAF Hazard Report;* the unit's Mishap Notification Procedures, the unit's appointed primary and alternate USRs with phone numbers, and the Wing Commander's published safety policy letter.

9.2. 96TW weapons safety personnel will. Maintain a minimum security clearance of at least SECRET and have access to all facilities and operations involving 96 TW weapons activities.

9.3. Refer to AFMAN 91-201, *Explosives Safety Standards*, EAFB Sup_1. For additional installation unique explosives safety guidance.

9.4.3. Serve as the single authority delegated responsibility by the installation commander for designating explosives vehicle inspection points and suspect vehicle areas and publishing vehicle delivery routes for explosives cargo. Designations will be coordinated with representatives from logistics, operations, fire department, and security forces and be reviewed annually.

9.4.5. Serve on the Joint Checklist Working Group and review source data packages for all munitions and munitions components new to Eglin AFB. Approve all Explosive Ordnance Disposal (EOD) safe handling and recovery procedures (SHARP).

9.4.6. Participate as required in the Installation Development Council, Airfield Operations Board, Outdoor Activities Committee, Traffic Safety Committee, Space Management Committee, and the Range Configuration and Control.

9.4.6.1. **(Added)** Coordinate on all environmental impact statements, reviews, studies, plans, or Base Civil Engineer (BCE) work requests which involve explosives, explosives quantity- distance arcs, unexploded ordnance, or DEW.

9.4.8.2. Publish a formal instruction designating locations for explosives-loaded aircraft parking, loading/unloading, concurrent servicing, hung ordnance response, gun clearing, and aircraft arm/de-arm.

9.4.8.8. Review and approve or disapprove requests for disassembly or modification of munitions items in coordination with 96 TW/SES.

9.4.8.11. Serve as the single authority delegated responsibility by the installation commander for issuing explosives facility licenses and publishing licensing procedures and requirements in the base supplement to AFMAN 91-201.

9.4.8.14. Attend pertinent Safety Review Boards and Test Approval Briefs. Publish a formal instruction assigning responsibilities and establishing procedures for acquisition and review of source data necessary to ensure safe and efficient hazard classification, inspection, storage, transportation and disposal of new munitions and munitions components.

9.4.9. Serve as the data steward for all explosives safety related objects (e.g., quantity-distance buffer zones, explosives transport routes) in the installation geographic information system.

9.5. Weapons safety program requirements at Eglin AFB apply to all units which own, handle, use, transport, or store explosives, missiles, or directed energy weapons. Coordinate all requests for exceptions to explosives safety criteria with 96 TW/SEW prior to submission to higher headquarters.

9.5.1. Tenant units with full-time explosives safety personnel will prepare and submit explosives site plans and Unexploded Ordnance (UXO) explosives safety submissions (ESS) through 96 TW/SEW.

9.5.5. **(Added)** Unit Weapons Safety Representatives (WSR) will:

9.5.5.1. **(Added)** Keep the unit commander informed on weapons safety matters and serve as the primary interface between the unit and 96 TW/SEW.

9.5.5.2. **(Added)** Be familiar with all the unit's explosive and/or directed energy operations and the locations of these operations.

9.5.5.3. **(Added)** Maintain a Weapons Safety Program Management Book as specified in the 96 TW Weapons Safety Program Management Book.

9.5.5.4. **(Added)** Disseminate weapons safety information, cross tells, and educational material throughout the unit.

9.5.5.5. **(Added)** Identify which unit personnel must work with explosives and ensure they receive weapons safety training before assuming such duties and refresher training at least every 15 months thereafter.

9.5.5.6. **(Added)** Review weapons safety and explosives transport lesson plans for currency prior to submitting to 96 TW/SEW for annual review.

9.5.5.7. **(Added)** Annually review unit explosives facility licenses and request changes or renewals as required.

9.5.5.8. **(Added)** Conduct and document a minimum of one spot inspection per month. Supervisors should accompany the WSR during the spot inspection. Spot inspections may consider any subject within the unit's responsibility (e.g., explosive operations, licensed facilities, training documentation, explosive transport vehicles). Retain documentation of all spot inspections conducted since the last annual safety inspection.

9.5.5.9. **(Added)** Ensure locally written instructions (e.g., publications, procedures, checklists, training plans) are developed as needed for operations involving weapons, explosives, missiles, or directed energy weapons and are reviewed by 96 TW/SEW before implementation and prior to making any changes. Annual review can be requested during the annual unit weapons safety inspection.

9.5.5.10. **(Added)** Publicize the available weapons safety awards and encourage supervisors to submit eligible personnel.

9.5.5.11. **(Added)** Maintain copies of approved unit explosives site plans, monitor compliance with any associated compensatory measure, and review the necessity for exceptions to weapons safety requirements.

9.5.5.12. **(Added)** Maintain a record of weapons safety mishaps and hazard reports within the unit and report to 96 TW/SEW any weapons safety hazards that cannot be corrected internally.

9.5.5.13. **(Added)** Identify which unit personnel must transport explosives and ensure they receive required training IAW AFMAN 91-201 and DoD 4500.9-R, *Defense Transportation Regulation*, before assuming such duties and refresher training every two years.

9.7. Nuclear Surety. The 96 TW Nuclear Surety Program is intended to ensure compliance with applicable nuclear surety requirements by all personnel involved in the research, design, development, testing, acquisition, operation, maintenance, or modification of nuclear weapons, related systems or subsystems, or nuclear certified items (NCI) or nuclear certified equipment (NCE). Nuclear surety oversight also applies to 96 TW personnel responsible for responding to potential contingencies (e.g., SAFE HAVEN) or emergencies involving nuclear weapons or nuclear weapons components.

9.7.1. **(Added)** The oversight of nuclear weapons related material (NWRM) is outside the scope of this instruction and will be conducted IAW AFI 20-110, *NWRM Management*.

9.7.2. **(Added)** 96 TW/SEW will:

9.7.2.1. **(Added)** Serve as the 96 TW OPR for nuclear surety.

9.7.2.2. **(Added)** Advise the 96 TW staff on pertinent nuclear surety issues.

9.7.2.3. **(Added)** Serve as the 96 TW Liaison for NCE to AFTC/SE.

9.7.2.4. **(Added)** Monitor unit nuclear surety compliance; train unit nuclear surety representatives and NCI monitors; participate in developing plans and procedures to support contingencies or emergencies involving nuclear weapons or nuclear weapons components; investigate and report nuclear accidents, incidents, and deficiencies.

9.7.3. **(Added)** 96 TW group commanders or directors will:

9.7.3.1. **(Added)** Ensure sufficient NCI monitors are appointed to provide adequate oversight and accountability for all NCI owned or possessed. NOTE: The organizational level for appointment and the number of NCI monitors required is at the discretion of the group commander or director.

9.7.3.2. **(Added)** Send NCE lists with a memo to 96 TW/SEW documenting completion of annual NCE inventories and any noted discrepancies NLT 15 August.

9.7.4. **(Added)** NCI Monitors will:

9.7.4.1. **(Added)** Send a copy of their appointment memo to 96 TW/SEW and attend training as scheduled by 96 TW/SEW no later than 90 days from initial appointment.

9.7.4.2. **(Added)** Establish access to the Master Nuclear Certification List (MNCL).

9.7.4.3. **(Added)** Maintain a list of all unit-serviced NCI.

9.7.4.4. **(Added)** Validate the certification status and configuration of unit-serviced NCE IAW AFI 63-125, *Nuclear Certification Program*.

9.7.4.5. **(Added)** Conduct annual hands-on inventories of NCE IAW AFI 63-125. Verify legibility of identification information (e.g., data plate, information plate, appropriate markings) and that the information matches the MNCL listing.

9.7.4.6. **(Added)** Notify 96 TW/SEW when deficiency reports (e.g., MDR, AFTO-22) are processed for NCI.

9.7.4.7. **(Added)** Request approval from 96 TW/SEW for all add-ons or modifications to any unit-serviced NCI. Approval by Vehicle Management is also required for any vehicles which are nuclear certified.

9.7.4.8. **(Added)** Request approval from 96 TW/SEW for NCI use-restrictions or decertifications.

9.7.4.9. **(Added)** Notify 96 TW/SEW promptly if a nuclear surety deficiency (DULL SWORD) is suspected, an unauthorized modification to NCI is discovered, or of any other unusual occurrence involving NCI.

9.11.2. 96 TW/SEW will provide refresher training to WSRs in conjunction with the annual unit program management assessment and inspection. Refresher training will focus on pertinent changes made to the weapons safety standards.

9.11.3. Unit commanders will ensure weapons safety training is conducted for pertinent personnel by either ADWSRs, supervisors, or other designated unit trainers. Ensure lesson plans are developed for weapons safety training to include the minimum essential elements listed at **Attachment 22** (Added). The Air Force Munitions Explosives Safety Training CBT may be used to fulfill most of the training; however, the CBT must be supplemented with training on local conditions and requirements. Units will submit lesson plans to 96 TW/SEW for review prior to implementation and annually thereafter. Any lesson plan changes or additions made by the OPR after initial approval must be re-coordinated with 96 TW/SEW.

9.11.7. **(Added)** Drivers who must transport explosives cargo over roads accessible by the public (e.g., outside of the Eglin AFB, Duke, or 7th SFG(A) Cantonments) require initial and bi-annual refresher training that satisfies DoD, DOT, and EPA. WSRs may consult 96 TW/SEW regarding training requirements and potential training providers.

11.1.5.1. **(Added)** Independently conducted Safety Studies developed by 96 TW/SES in support of USAF Non-Nuclear Munitions Safety Board (NNMSB) mission will incorporate MIL-STD-882 systems-level hazard analysis or safety assessment reports as appropriate.

11.2.5.8.3. **(Added)** Program Manager/Directors, and functional managers of Eglin's associate/tenant organizations responsible for research and development, acquisition, test and evaluation of weapon systems/munitions are responsible for the following:

11.2.5.8.3.1. **(Added)** Ensure program managers/developmental engineers and project/test engineers obtain and provide timely, complete and accurate technical information, including qualification and test plans and reports to 96 TW/SES in order to perform detailed safety studies and/or assess the design safety levels for assigned weapon/munitions systems and/or energetic materials or devices.

11.2.5.8.3.2. **(Added)** Facilitate timely exchange of data and information between 96 TW/SES systems safety engineers, Systems Engineering Integrated Product Teams, and weapon/systems designers (e.g., contractors). Ensure timely communication of programmatic/design changes affecting critical safety functions and/or design safety levels are provided to 96 TW/SES systems safety engineers.

11.2.5.8.3.3. **(Added)** Resource and support USAF NNMSB proceedings, including timely satisfactory resolution of assigned NNMSB action items. Eglin AFB Form 391 (located on the AF e-publishing website at: **http://static.e-publishing.af.mil/production/1/eglinafb/form/eglinafb391/eginafb391.pdf**. Will be used to officially record the status of actions assigned by the USAF NNMSB until final close-out.

11.2.5.8.3.4. **(Added)** Resource and support testing of weapon system/munition, energetics materials/devices in need of obtaining explosive hazard classification.

11.2.6.4. **(Added)** The 96 TW/SES will provide systems safety engineering assistance and technical management services IAW applicable signed AFTC and AFLCMC Center Level Agreement (CLA). In addition, 96 TW/SES provides the technical and administrative support needed by the USAF NNMSB to carry out its mission IAW AFI 91-205, *Nonnuclear Munitions Safety Board*. As applicable, assistance may include the following:

11.2.6.4.1. **(Added)** Assign a trained systems safety engineer to support Eglin's associate/tenant organizations. This engineer (not collocated) will represent program managers/project engineers for all systems safety matters and be an integral member of the Systems Engineering Integrated Product Team.

11.2.6.4.2. **(Added)** Assists in developing systems safety design requirements for use in acquisition program documentation and/or requirements documents (System Requirement Document, Systems Engineering Plan, etc.). Development and incorporation of safety requirements, design criteria, safety design and performance, test, and analysis criteria for weapons systems/munition will be accomplished IAW Chapter 6 of AFI 91-205. Ensure adequate design safety requirements are planned, programmed and executed in appropriate development and production contracts.

11.2.6.4.3. **(Added)** Evaluate contractor performance relative to contract systems safety requirements.

11.2.6.4.4. **(Added)** Conduct systems analyses and related safety performance tests to characterize hazards associated with developmental munitions considering design maturing designs to assure hazards are adequately controlled and if needed residual risks are properly identified and characterized.

11.2.6.4.5. **(Added)** Perform independent safety studies and/or analyses to obtain USAF NNMSB approval for live flight test and/or design safety certification for AF operational use.

11.2.6.4.6. **(Added)** Provide technical assistance for Insensitive Munitions (IM) regarding insertion of IM technology into weapon designs, development and approval of IM test plans, and official test scoring of IM tests as part of the NNMSB Insensitive Munitions Technical Working Group (IMTWG).

11.2.6.5. **(Added)** Systems safety engineering support and technical management services for organizations outside the established Eglin AFB host-associate/tenant agreements and/or AFTC/ AFLCMC/EB CLA are addressed below.

11.2.6.5.1. **(Added)** Systems safety engineering and NNMSB technical arm consultation/ assistance will be provided on a special case to Foreign Military Sales (FMS) AFLCMC/EB programs, other AFMC product/logistics centers and to other MAJCOMs, as requested by the organizations involved or as directed by higher authority. Support to FMS programs will be in accordance with the scope and depth prescribed in AFI 91-205. The services may involve the full range of technical support, including participation in program activities and preparation of safety study reports to obtain NNMSB approval/certification. In such cases, a Statement of Capability (SOC) will be prepared to resource (fund) the specialized safety engineering efforts.

11.2.6.5.2. **(Added)** The SOC will be prepared by 96 TW/SES, at the start of the project, and will address specific services to be provided along with corresponding manpower and/or travel funding estimates to complete the project. Renewal of SOC will be requested at the beginning of each fiscal year to complete the project, if needed. Inputs from other 96 TW personnel participating in the project will be solicited and/or included, as appropriate.

11.2.8.2. **(Added)** 96 TW Systems Safety Engineers/Systems Safety Managers (SSE/SSM) shall provide systems safety engineering assistance to the 96 TW test and evaluation mission to include:

11.2.8.2.1. **(Added)** Provide trained systems safety engineers to serve as members of Safety Review Boards (SRB), the aircraft modification (T-2) Configuration Control Board (CCB), and the Test Approval Brief (TAB) as needed.

11.2.8.2.2. **(Added)** Support for T-2 CCB will be limited to the weapon/munitions system(s) to be tested and related airborne test instrumentation and/or specialized stores fixtures.

11.2.8.2.3. **(Added)** Conduct design safety assessments of test hardware utilized for weapons/munitions during testing that could conceivably put 96 TW resources (aircraft, personnel, and facilities) at risk. This assistance is provided as requested and on a case-by-case basis, provided accurate and complete technical information is available and provided to 96 TW/SES.

11.7.1. **(Added)** The 96 TW/SES will provide technical and administrative support to the USAF NNMSB as specified in AFI 91-205 and AFMC Supplement thereto. Support includes the following:

11.7.1.1. **(Added)** Provide an individual to serve as Executive Secretary, NNMSB.

11.7.1.2. **(Added)** Arrange regular and special meetings of the NNMSB as directed by its chairperson.

11.7.1.3. **(Added)** Schedule and conduct, on behalf of Eglin's associate/tenant organizations program offices, the necessary NNMSB advisory, flight test approval, and design safety recommendations for operational use at the appropriate points in the development cycle.

11.7.1.4. **(Added)** Act as special NNMSB consultant to other AFMC product and logistics centers and to other MAJCOMs, as requested by the organizations involved or as directed by higher authority. Such consultation services could involve the full range of technical support, including participation in program activities and preparation of safety study reports on which NNMSB certification is based.

11.7.1.5. **(Added)** Execute all Executive Secretary responsibilities specified in the NNMSB's Standard Operating Procedures documented in AFI 91-205 and related AFMC supplement.

11.7.1.6. **(Added)** As applicable, the USAF NNMSB provides, for the Eglin's associate/tenant organizations, the functions equivalent to a Systems Safety Group as required in AFI 91-202 and AFMC Supplement thereto.

11.8. (Added) Hazard Classification. The 96 TW/SES will issue Interim Hazard Classification (IHC) and process final hazard classification (FHC) IAW TO 11A-1-47 for Eglin's associate/tenant organizations responsible for research and development, acquisition, test and evaluation of weapon systems/munitions as required. IHCs are valid for a year from date of issue; as such the program/project managers/test engineers are responsible to notify 96 TW/SES at least 30 days prior to expiration of IHC, if renewal of IHC will be required. IHCs are intended only for the developmental phase of a weapon program and as such, use of these interim documents in lieu of long-term FHC efforts are prohibited by DoD and DOT policy. 96 TW/SES does not process IHCs or FHCs for items under the purview of the AFLCMC/EBH hazard classifier. In addition to the above 96 TW/SES will:

11.8.1. **(Added)** Develop IHCs to support movement of test assets during the developmental phase of munitions acquisition.

11.8.2. **(Added)** Provide technical review and recommendations of hazard classification test plans and actions relevant to the pursuit of FHCs.

11.8.3. **(Added)** Consolidate and summarize relevant test data and information and produce a comprehensive final hazard classification package for submittal into the FHC approval process. Submit FHC packages and responses to queries and requests for additional information as the FHC package moves through the approval process.

11.8.4. **(Added)** Provide Technical Data Package (TDP) support IAW EAFBI 91-206, *Munitions Source Data*, as required to facilitate the movement and storage of test assets on 96 TW facilities. Coordinate TDP reviews and provide approval of final TDP packages as required.

13.3.4.7. **(Added)** Immediately report to the Eglin Command Post by telephone any unusual occurrence, breach of safety, or hazardous condition. Follow-up within 24 hours with a written report to 96 TW/SE for appropriate action.

13.3.6. **(Added)** The responsibility for test and range safety rests with 96 TW/SE and specifically with the 96th Test Wing Test and Range Safety Division (96 TW/ SEU). 96 TW/SEU will:

13.3.6.1. **(Added)** Participate in Integrated Product Teams, Design Reviews, Technical Interchange Meetings, and Test Planning Working Groups as related to test/range safety issues in conjunction with units/components of the Air Force Life Cycle Management Center (AFLCMC) and other services, nations or organizations.

13.3.6.2. **(Added)** Provide approval and technical guidance and perform design evaluations of technical data related to the Flight Safety System (FSS)/Flight Termination System (FTS) for units/components of AFLCMC and other services, nations or organizations. The technical data includes contractor designs, design changes, RCC Document 319 waivers/deviation requests, analyses, test plans/procedures and test reports for FSSs/FTSs used with weapons that are required to have an approved FSS/FTS for testing at Eglin AFB.

13.6.2.2. **(Added)** Flight Safety System/Flight Termination System approval, as required, is either stated in the Safety Annex or issued as a separate memorandum.

13.3.6.3. **(Added)** Perform evaluations of aerodynamic capabilities technical data including contractor analyses and report on weapon systems' range safety data and footprints for testing at Eglin AFB for units/components of AFLCMC and other services, nations or organizations.

13.7.4. **(Added)** All tests covered by a 96 TW test/training directive are reviewed IAW the AFTCI 91-202 and any 96 TW supplement. 96 TW/SEU will prepare the appropriate documentation to support the test. Upon publication of documentation and approval through the Test Approval Brief, if required, the test is approved to start testing. Approval may be withdrawn upon the determination that a hazardous condition exists that was not previously anticipated, a failure of a safety device has occurred, or failure of test personnel to follow required safety criteria.

EVAN C. DERTIEN,
Brigadier General, USAF
Commander

USR—Unit Safety Representative

WSR—Weapons Safety Representative

Attachment 21 (Added)

SAMPLE USR/WSR APPOINTMENT MEMORANDUM

A21.1. (Added) Sample USR/WSR Appointment Memorandum.

Figure A21.1. (Added) Sample USR/WSR Appointment Memorandum.

Letterhead

Day Month Year

MEMORANDUM FOR 96 TW/SE

FROM: Unit Office Symbol/CC

SUBJECT: Appointment of Additional Duty Unit Safety Representative (USR) or Weapons Safety Representative (WSR)

SSgt John Doe is hereby appointed to be the (Primary or Alternate) USR (or WSR) for the (unit name). SSgt Doe has been directed to contact your office to receive USR (or WSR) training within the next 30 days.

JANE DOE, Major, USAF
Commander

Attachment 22 (Added)

MINIMUM WEAPONS/EXPLOSIVE SAFETY TRAINING PLAN REQUIREMENTS

A22.1. (Added) Purpose. This outline provides minimum elements to meet explosive safety training requirements.

A22.1.1. **(Added)** Cardinal Principle.

A22.1.2. **(Added)** Risk Management.

A22.1.3. **(Added)** Fire Fighting Guidance.

A22.1.4. **(Added)** HERO/EMR.

A22.1.5. **(Added)** Emergency Procedures.

A22.1.6. **(Added)** Mishap Reporting.

A22.1.7. **(Added)** Storage of Explosives.

A22.1.7.1. **(Added)** Fire Symbol/Chemical Signs.

A22.1.7.2. **(Added)** Licensed Locations.

A22.1.7.3. **(Added)** Sited Locations.

A22.1.8. **(Added)** Transportation of Explosives.

A22.1.8.1. **(Added)** Placard Requirements.

A22.1.8.2. **(Added)** Load Stability.

A22.1.9. **(Added)** Handling of Explosives.

A22.1.9.1. **(Added)** Static electricity hazards.

A22.1.9.2. **(Added)** Personnel Limits & Explosives Limits.

A22.1.10. **(Added)** Unit Specific Information.

A22.1.10.1. **(Added)** Identify Unit Munitions/Explosives Family Groups (e.g., general purpose bombs, flare, missiles, cartridges, small arms).

A22.1.10.1.1. **(Added)** Describe associated explosives hazards.

A22.1.11. **(Added)** Identify Compensatory Measures required to avoid violations (if any).

A22.1.12. **(Added)** Review local written instructions used for explosives operations.

A22.1.13. **(Added)** Identify non-explosives hazards that may impact explosives operations on base (if any).

Attachment 23 (Added)

THE 96TW/SE SAFETY COORDINATION REQUIREMENTS LIST

A23.1. (Added) The 96TW/SE Safety Coordination Requirements List.

Figure A23.1. (Added) The 96TW/SE Safety Coordination Requirements List.

(THIS IS A SAMPLE OF GPC PURCHASES AND DOES NOT REFLECT AN ALL-INCLUSIVE LIST)
Eyewash Stations (permanently installed, portable and eyewash bottles)
Confined Space Equipment
Vehicles, Tugs, Tow Trucks, Tractors, etc.
Golf Carts, Gators (Slow Moving Vehicles)
Forklifts
Trailers
Maintenance Stands
Manually-Propelled and Self-Propelled Mobile Work Platforms
Aerial Lifts (Articulating and extendible boom lifts, vehicle-mounted elevating or rotating work platforms, scissor lifts, Manlifts)
Scaffolding
Ladders
Fall Protection equipment
Woodworking Machines of all kinds
Boring Machines
Broaching Machines
Drilling Machines
Lathes
Milling Machines
Metal Heat Treating and Non-thermal Treating Equipment
Welding Equipment
Bending and Forming Machines
Hydraulic and Pneumatic Presses
Manual Presses
Shearing and Punching Machines

Forging Machinery and Hammers
Material Handling Equipment
Agriculture Machinery and Equipment
Highway Maintenance Equipment
Power Tools
Overhead Cranes/hoists
Personal Protective Equipment listed in AFI 91-203, chap 14
Pressure Washers
Lasers
Any equipment/machinery that will be permanently attached to the facility
