BY ORDER OF THE COMMANDER
EGLIN AIR FORCE BASE (AFMC)

DEFENSE EXPLOSIVES SAFETY REGULATION 6055.09_AIR FORCE MANUAL 91-201

AIR FORCE MATERIAL COMMAND Supplement

EGLIN AIR FORCE BASE Supplement

13 November 2024

Safety

EXPLOSIVES SAFETY STANDARDS

COMPLIANCE WITH THIS PUBLICATION IS MANDATORY

ACCESSIBILITY: This publication is available for downloading or ordering on the e-Publishing website at www.e-Publishing.af.mil.
RELEASABILITY: There are no releasability restrictions on this publication.

OPR: 96 TW/SEW

Certified by: 96 TW/SE (Col Vincent J. Chioma)

Supersedes: DESR6055.9_AFMAN91-201_AFMCSUP_ EGLINAFBGM2023-01, 27 June 2023

Pages: 8

This instruction establishes responsibilities for mishap prevention in handling, storing, transporting, identifying, and controlling explosives and hazardous materials in accordance with Air Force Policy Directive (AFPD) 91-2, *Safety Programs* in conjunction with corresponding Department of Defense (DoD), Air Force, and AFMC directives. It applies to all activities assigned, attached, TDY or tenant that handle or transport explosives to include Air Force Reserve, Air National Guard, and Civil Air Patrol. The requirements of this instruction pertaining to contractors will be included in the terms and conditions of the contract. This publication will not be supplemented. Waivers to guidance in this publication must be submitted through 96 TW/SEW in accordance with DESR 6055.09_AFMAN 91-201, *Explosive Safety Standards*, General Information, Section 1.4. Policy. Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using the AF Form 847, *Recommendation for Change of Publication*; route AF Form 847s from the field through the appropriate functional chain of command. Ensure that all records created as a result of processes prescribed in this publication are maintained in accordance with (IAW) AFI 33-322, *Records Management and Information Governance Program* and disposed of in accordance with Air Force Records Information System (AFRIMS) Records Disposition Schedule (RDS).

SUMMARY OF CHANGES

This revision reflects extensive changes due to criteria and updated guidance in DESR 6055.09_AFMAN 91-201, *Explosive Safety Standards,* and must be completely reviewed.

1. Reference. DESR 6055.09_AFMAN 91-201, *Explosive Safety Standards*.

The changes below to DESR 6055.09_AFMAN91-201_DAFGM2023-01, are effective immediately.

V1.1 **(Added-EGLINAFB)** For the following operations, comply with the more stringent requirements in either this publication or DoD 4145.26M, DoD Contractors' Safety Manual for Ammunition & Explosives (AE): heat-conditioning of explosives; tasks involving exposed explosives, propellants, or pyrotechnics; AE loading or disassembly and associated tasks (e.g. screening, blending, melting, pressing); ground-fired weapons tests to include testing of ammunition or devices for small arms.

V1.E5.2.1.12.1. **(Added-EGLINAFB)** Requests for development of new ESPs by 96 TW/SEW must be made in writing by unit Commanders/Directors.

V1.E5.2.1.6. **(Added-EGLINAFB)** Tenant units with full-time weapons safety personnel must prepare and submit explosives site plans through the 96 TW Weapons Safety Office (96 TW/SEW).

V1.E6.T1. **(Added-EGLINAFB)** For this table, the term "MSA Commander" means no less than the responsible squadron commander or squadron civil service director. The authority reserved for an MSA Commander in this table is inherently governmental and cannot be delegated or performed by a contractor.

V1.E6.8.2. **(Added-EGLINAFB)** Explosives samples, substances, subassemblies, and other such items acquired, produced, and stored without DoD, DOT, or DOE hazard classifications are not permitted to traverse any roadway accessible to the public either on or off the installation until the necessary DoD, DOT, or DOE hazard classification is assigned.

V1.E6.12.1.1. **(Added-EGLINAFB)** Units with a full-time qualified weapons/explosives safety manager (WSM) (e.g., 33 FW, 53 WG, NAVSCOLEOD) will coordinate all locally written unit instructions (e.g., publications, SOPs, checklists) dealing with explosives with their unit WSM or equivalent; Publication or modification does not require coordination with 96 TW/SEW.

V1.E6.12.4. **(Added-EGLINAFB)** Prior to working with newly developed or test munitions for the first time, hands-on personnel (e.g., munitions handlers, weapons load crews, EOD, etc…) must receive a briefing on the safety features and handling requirements from someone knowledgeable of the features and requirements.

V1.E6.12.6. **(Added-EGLINAFB)** During the research, development, test and evaluation (RDT&E) of new munitions, only preliminary munitions data may be available. Preliminary munitions data must not be used for developing procedures until it has been processed according to EAFBI 91-206, Munitions Source Data.

V1.E6.12.7. **(Added-EGLINAFB)** In those cases where procedures in approved TOs must be modified to achieve test objectives, the project manager and development agency must coordinate the proposed modification(s) in accordance with Technical Order 00-5-1 and AFTCI 63-101_20-101.

V1.E6.13.6. **(Added-EGLINAFB)** Include procedures for receiving, and disseminating lightning watches, warnings, advisories and conducting evacuations.

V1.E6.14.1. **(Added-EGLINAFB)** New or test munitions must only be uploaded or downloaded on aircraft by personnel trained and certified IAW DAFI 21-101, *Aircraft and Equipment Maintenance Management*, AFMAN 21-206, *Aircraft Armament Systems Management*, and any supplements thereto.

V1.E6.14.4. **(Added-EGLINAFB)** The Munitions Accountable Supply Officer (MASO) for the 96th Maintenance Squadron (96 MXS) must notify 96 TW/SEW within 30 days of establishing any new munitions custody accounts (i.e., AF Form 68) to ensure personnel receive applicable explosives safety training.

V1.E6.20.5. **(Added-EGLINAFB)** Certification loading using munitions that are not inert is discouraged, must be coordinated beforehand through 96 TW/SEW, and must be directly supervised by at least two certification officials.

V1.E6.20.10. **(Added-EGLINAFB)** Disassembly and Modification of Munitions or Explosives. All munitions or explosives to be modified or disassembled in any way on the Eglin reservation other than that authorized by technical order (TO), or time compliance technical order (TCTO) must be processed IAW DAFMAN 21-201, *Munitions Management*; AFI 63-101/20-101, *Integrated Life Cycle Management*; and as follows, except as outlined in paragraph V1.E6.20.10.7. of this supplement.

V1.E6.20.10.1. **(Added-EGLINAFB)** The responsible requesting agency must submit proposals for modification or disassembly of munitions to 96 TW/SE by memorandum. The proposal must include the following information if applicable:

V1.E6.20.10.1.1. **(Added-EGLINAFB)** 96th Test Wing (96 TW) project number, JON, or appropriate development program authorization.

V1.E6.20.10.1.2. **(Added-EGLINAFB)** Explosive formulation and weight, detailed drawings or sketches, number of explosives components, fuze type, initiation sequence, etc.

V1.E6.20.10.1.3. **(Added-EGLINAFB)** Details in instrumentation packages (if required) and complete installation instructions for modification.

V1.E6.20.10.1.4. **(Added-EGLINAFB)** Revised or new technical information for the modified items such as hazard classification data and information on the safe handling, storage, tie-down procedures, transportation, use, and disposal.

V1.E6.20.10.2. **(Added-EGLINAFB)** 96 TW/SEW will review the proposed modification or disassembly to determine if it can be safely performed at 96 TW using Air Force capabilities. 96 TW/SES will coordinate on the proposed modification or disassembly to ensure that system safety is not degraded to a level unacceptable for testing at 96 TW. An information copy of approved proposals will be forwarded to the Munitions Flight (96 MXS/MXMW); Quality Assurance (96 MXG/MXQ); EOD (96 CES/CED); and the unit performing the modification. Before disapproving a proposal, 96 TW/SEW will coordinate with the requesting agency to find an alternate solution to accomplish basic mission requirements.

V1.E6.20.10.3. **(Added-EGLINAFB)** Once a modification is approved by 96 TW/SEW, other agencies may assist in modification when it is within their capabilities and provided, they have the necessary training qualifications and explosive certifications.

V1.E6.20.10.4. **(Added-EGLINAFB)** Those munitions which will be modified and which, as a result of the modification, will interface in some way with an aircraft (such as a change in aerodynamic stability or required aircraft power for a special package) must be treated as Class II modifications, and the procedures of AFMCI 21-126, *Temporary 2 (T-2) Modification of Aerospace Vehicles*, will apply.

V1.E6.20.10.5. **(Added-EGLINAFB)** When it is anticipated that the disassembly of munitions for failure analysis might be necessary, requirements will be addressed in the test directive.

V1.E6.20.10.6. **(Added-EGLINAFB)** The unit performing modifications must notify the requesting agency when the modification is completed. Following the completion of each project, the test engineer must provide written guidance to Maintenance Supervision (96 MXS/MXM) for the disposition of any unexpended munitions. This action is necessary to preclude significant hazards should a modified munitions item be inadvertently substituted for a standard item. Assets subjected to temperature treatment, vibration, or impact testing (regardless of stock-listed status) are considered unserviceable and will not be eligible for issue or redistribution.

V1.E6.20.10.7. **(Added-EGLINAFB)** Exception: The requirements above do not apply to munitions maintenance daily operations or munitions treated as Class II modifications under DoDI 5000.89_DAFI 99-103, *Capabilities-Based Test and Evaluation*; AFMCI 21-126, or change orders and modifications in the acquisition of new munitions that are the responsibilities of the pertinent contracting officer, or Air Force Research Laboratory (AFRL/MN) for munitions items identified as EMPTY, DRILLED, or DUMMY. Disposition of empty, drilled, or dummy munitions must be accomplished as required in paragraph V1.E6.20.10.6. of this supplement.

V1.E6.24.6. **(Added-EGLINAFB)** Static Display Munitions (SDM). Units must coordinate all plans for permanent (i.e., greater than 90 days) displays of SDM with 96 TW/SEW and in

accordance with procedures in DAFMAN 21-201 and AFI 84-103*, Department of the Air Force Heritage Program*.

V1.E6.28.4. **(Added-EGLINAFB)** The pre-training notification must provide at least one hour's notice and include the location for training.

V1.E6.42.19. **(Added-EGLINAFB)** Rental vehicles are prohibited for the transport of placarded types or quantities of hazardous materials as cargo except as stipulated in the Defense Transportation Regulation (DTR) 4500.9-R-Part II.

V1.E6.42.26.2. **(Added-EGLINAFB)** Explosives transported off-base using a flatbed truck or similar open equipment must be completely covered by a tarpaulin IAW the DTR.

V1.E6.42.41. **(Added-EGLINAFB)** All plans for marshaling explosives for transportation by air at Eglin AFB must be coordinated with the Air Terminal Manager (96 LRS/LGRDA) and with 96 TW/SEW.

V1.E10.3.2.2. **(Added-EGLINAFB)** Submit requests to omit fire symbols to Fire Prevention Services (96 CES/CEFP) after coordination with 96 TW/SEW.

V1.E10.3.2.3.4. **(Added-EGLINAFB)** Personnel who make a fire symbol change must promptly report the change to the 96 CES Emergency Communications Center (ECC) except for units with a Munitions Control or equivalent function which will relay their fire symbol changes to the ECC.

V1.E10.3.2.3.6.3. **(Added-EGLINAFB)** Coordinate such requests IAW paragraph V1.E10.3.2.2. of this supplement.

V1.E10.3.4.8. **(Added-EGLINAFB)** Activities using the flightline explosives loading/unloading and arm/de-arm areas on Eglin AFB and Duke Field must comply with EAFBMAN 91-202, *Designation of Combat Aircraft Parking Areas, Explosives Loading/Unloading Areas, and Arm/De-arm Areas*.

V1.E10.6.6.1. **(Added-EGLINAFB)** Units must notify 96 CES/CEFP and 96 TW/SEW prior to fire drills at munitions storage areas and any other explosives facilities. Explosives facilities outside designated munitions storage areas must conduct fire drills at least annually. Exception: facilities issued an explosives license will conduct fire drills at the discretion of the responsible unit commander. For purposes of semi-annual fire drills, munitions storage areas (MSA) at Eglin AFB are defined as locations that contain multiple explosives locations, have received site approval from the DoD Explosives Safety Board, and provide munitions services for a variety of users. At Eglin AFB, that specifically applies to the following three MSAs:

V1.E10.6.6.1.1. **(Added-EGLINAFB)** Eglin Main MSA. This area encompasses facilities operated by the Air Force, Navy, and contractor personnel on behalf of 96 TW, 33 FW, NAVSCOLEOD, AFRL/RW, AFLCMC (Raytheon), and the Air Force SEEK EAGLE program.

V1.E10.6.6.1.2. **(Added-EGLINAFB)** Duke Field MSA. This area encompasses facilities operated by the Air Force, Army, and contractor personnel on behalf of 919 SOW, 492 SOW, 7 SFG(A), 6 RTB, and 406th Army Field Support Brigade.

V1.E10.6.6.1.3. **(Added-EGLINAFB)** C-74A MSA. This area encompasses facilities operated by 96 RN on behalf of 96 TW, AFRL/RW, and the Army Aviation and Missile Research Development and Engineering Center.

V1.E10.6.6.1.4. **(Added-EGLINAFB)** Because the explosives operations of each unit at MSAs are in proximity and hazard all the others, semi-annual drills should be coordinated so that personnel from all affected units benefit from the training. Personnel at explosives locations other than the three specified MSAs are encouraged to conduct fire drills in coordination with the Base Fire Chief; however, Fire Department response is only required for MSAs.

V1.E10.6.17.3. **(Added-EGLINAFB)** Explosives facilities outside designated munitions areas that contain exposed (e.g., bare, raw, propellant, etc.) explosives must display a notice at the facility entrance directing that flame-producing devices be placed in designated containers before entering the facility or be turned over to the entry controller.

V2.E5.5.3.3. **(Added-EGLINAFB)** Notify 96 TW/SEW immediately when earth cover is discovered to be less than 2 feet in depth.

V4.E5.23.3.5. **(Added-EGLINAFB)** Unpackaged AGM-88B missiles have an assigned fragment distance of 400 feet. Unpackaged AGM-88C and AGM-88F missiles have a fragment distance of 800 feet.

V5.E3.2.10.6.4. **(Added-EGLINAFB)** Ground-burst, and hand grenade simulators must be employed into an approved enclosure (e.g., sandbags stack, bias ply tractor tires) unless the risks from open use have been specifically accepted in writing by the responsible unit commander. Contact 96 TW/SEW for recommended enclosure specifications. The use of non-explosive battle noise generators (e.g., bird scare cannons, electronic blast cabinets, etc.) instead of ground-burst or hand grenade simulators is highly recommended.

V5.E3.2.10.7. **(Added-EGLINAFB)** Approvals for training and exercises employing explosives on the Eglin Reservation, ranges, and test areas must be coordinated IAW AFTCI 91-202, *Air Force Test Center Safety Review Policy*, and scheduled and managed IAW EAFBI 13-200, *Eglin Range Mission Scheduling and Control*. Coordination requirements for training with military working dogs are in section V1.E6.28.4. of this supplement. For all other local training or exercises (e.g., WIT, ORI, etc.) involving explosives, coordinate with 96 TW/SEW for requirements and approval by the responsible commander.

V6.E3.6.1.4.1.3. **(Added-EGLINAFB)** 96 TW/SEW is the only organization authorized to issue explosives storage licenses on Eglin AFB and the Eglin AFB Reservation.

V6.E3.6.1.4.5.6.1. **(Added-EGLINAFB)** If 100-feet cannot be met for GOV/POV parking, use of a lesser distance must be coordinated with 96 TW/SEW, approved by 96 CES/CEFP, and annotated on the explosives license.

V6.E3.6.1.4.6. **(Added-EGLINAFB)** Each unit requesting an explosives license must submit a completed unsigned electronic copy of AF Form 2047 to 96 TW/SEW. 96 TW/SEW will coordinate the license with 96 CES/CEFP, Security Forces Resource Protection, and the MASO. Once coordination is complete, the requesting organization must deliver one original AF Form 2047 signed by the certifying official to 96 TW/SEW. A copy of the final AF Form 2047 will be posted on the 96 TW Safety SharePoint site. Electronic coordination will be provided to the requester and must be posted with the approved license or additionally retained in the unit weapons safety book.

V6.E3.6.1.4.23.2. **(Added-EGLINAFB)** Units storing less than 1000 rounds of class/division 1.4 small arms ammunition must notify 96 CES/CEFP and 96 TW/SEW by memo of the type, quantity, and location of items being stored. Storage must comply with the requirements of this publication and will be subject to inspection.

V7.E6.4. **(Added-EGLINAFB)** Inspection of Munitions Residue, Scrap Metal, and Packing Materials.

V7.E6.4.1. **(Added-EGLINAFB)** Responsibilities. Activities generating munitions residue, scrap metal, and associated packing material must establish internal procedures necessary to prevent material potentially presenting an explosive hazard (MPPEH) from being sold or otherwise transferred or released to unauthorized persons and must strictly enforce the provisions of DoDI 4140.62, Material Potentially Presenting an Explosive Hazard; DAFMAN 21-201; and TO 11A-1-60, *Inspection of Reusable Munitions Containers and Scrap Material Generated From Items Exposed to or Containing Explosives*.

V7.E6.4.2. **(Added-EGLINAFB)** Sale of Scrap from DLA Disposition Services (DLADS). A 100 percent inspection of the entire lot of material being delivered is required if any live ammunition, explosives, or dangerous chemicals are found during the loading of scrap materials from the DLADS yard. DLADS must notify 96 TW/SEW and request the generating activity to perform the inspection. If the generating activity cannot be determined, DLADS will request EOD inspection assistance from 96 CEG.

V7.E6.4.3. **(Added-EGLINAFB)** Control of Scrap on Ranges.

V7.E6.4.3.1. **(Added-EGLINAFB)** All scrap metals generated from explosives operations on Eglin AFB ranges will be cleared from the ranges according to AFMAN 13-212V1, *Range Planning and Operations*.

V7.E6.4.3.2. **(Added-EGLINAFB)** 96th Range Group must control access to the central collection and storage area at Test Area B-4 and will:

V7.E6.4.3.3. **(Added-EGLINAFB)** Ensure that only munitions scrap metals inspected and identified as being free of explosives (i.e., Material Documented as Safe) by EOD or a qualified UXO technician are stored in these areas.

V7.E6.4.3.4. **(Added-EGLINAFB)** Maintain these areas, keep fences in good condition, and ensure the areas are adequately secured and marked with signage to prevent inadvertent access and preserve the chain of custody.

V7.E6.4.3.5. **(Added-EGLINAFB)** Ensure qualified inspectors sign a DLA Form 1367, Shipment Receipt/Delivery Pass, furnished by DLADS for each load of scrap metals removed from the central collection and storage areas. DLA Form 1367 must contain the statement, "I certify that the scrap metal listed hereon has been inspected by me or by a qualified munitions inspector under my supervision and, to the best of my knowledge and belief, contains no material of an explosive nature."

MARK A. MASSARO
Brig Gen, USAF
Commander
