Pages: 20

This FAFBI provides guidance on executing the Augmentation Support Program at Fairchild AFB, WA in accordance with AFPAM 10-243, *Augmentation Duty*. This instruction applies to all Air Force uniformed personnel (Active Duty, Air Force Reserve and Air National Guard) and civilians. Ensure that all records created as a result of processes prescribed in this publication are maintained in accordance with AFI 33-322, *Records Management and Information Governance Program*, and disposed of in accordance with the Air Force Records Disposition Schedule (RDS). Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using AF IMT 847, *Recommendation for Change of Publication*; route AF IMT 847s through the requester's chain of command. This publication may not be supplemented. This publication requires the collecting and maintaining of information protected by the Privacy Act of 1974. Authorities to collect and maintain the records are Title 10 United States Code (U.S.C.), Section 8013. System of Records Notice Numbers, F036 HQ AFPC, Military Personnel Records Systems and F036 HQ AFPC Q, Personnel Data System (PDS); 18 U.S.C. 922 note, Unlawful Acts note referring to the Brady Handgun Violence Prevention Act; 28 U.S.C. 534 note, Judiciary and Judicial Procedures, note referring to the Uniform Federal Crime Reporting Act; 42 U.S.C. 10601 et seq., Crime Victims Fund; and Amendment to Lautenberg, 18 U.S.C. 922(d) (9) Unlawful Acts; DoD Directive 7730.47, Defense Incident-Based Reporting System (DIBRS); Air Force Instruction 31-203, Security Forces Management Information System; and E.O. 9397 (SSN); Title 10 U.S.C. 9013, Secretary of the Air Force; delegation by; Department of Defense Instruction (DoDI) 5200.02, DoD Personnel Security Program (PSP); 10 U.S.C. 9831, Custody of Departmental Records and Property; AFI 33-332, Air Force Privacy and Civil Liberties Program; and Executive Order 9397 (SSN), as amended, Numbering System For Federal Accounts Relating

To Individual Persons. The System of Records Notices (SORN) that applies are F036 HQ AFPC, Military Personnel Records Systems and F036 HQ AFPC Q, Personnel Data System (PDS); F031 AF SF B, Security Forces Management Information System (Electronic Records); and F032 AF CE G, Automated Civil Engineer System Records (June 23, 2011, 76, FR, 36903) and are available at **https://dpcld.defense.gov/privacy/SORNS.aspx**.

SUMMARY OF CHANGES

This document has been significantly revised and needs to be completely reviewed. Some changes include:

Updated 1.3.6. Exempt Manpower: Those assigned members who cannot be used as Augmentation Support. Members may be considered exempt for one of four reasons: 1) Air Force Instruction or Air Mobility Command Instruction expressed prohibition against use for augmentation duties; 2) Medical profile or prohibition against performing specific duty; 3) Deemed as mission essential by functional owner and validated by 92 ARW/CD or, 4) Personnel who are either deployed or TDY and are thus incapable of being used for Augmentation support.

Removed 2.12. **The 92d Security Forces Squadron Unit Security Manager (92 SFS/USM) will:** Conduct a security background check and clearance check. If the augmentee has a proper security clearance, the USM will annotate the type of clearance on the "Request for Annual Record Review for Augmentee duties" memorandum, which is maintained in the augmentation folder.

Added 2.12. **Unit Security Managers (USM) will:** Conduct a clearance check on members selected for augmentation training prior to sending them to initial/refresher augmentation training. If the augmentee has a proper security clearance, the USM will annotate the type of clearance on the "Request for Annual Record Review for Augmentee Duties" memorandum, which is maintained in the augmentation folder.

Removed 2.13. **The 92d Security Forces Squadron Reports and Analysis Section (92 SFS/S5R) will:** Conduct an installation records check on all newly assigned augmentee personnel and when augmentees attend recurring training. This information will be annotated on the "Request of Records for Augmentee Duties" memorandum, which is maintained in the augmentation folder.

Updated 2.6.4. Notify the SFS Augmentation Program Manager within 24 hours of an SF augmentee change. A fully trained SF augmentee must be available for duty prior to replacing an individual already assigned to the program. **Note: The required number of SF augmentees must be available at all times regardless of leave, medical issues, temporary duty assignments, or deployment. Through normal out-processing procedures (i.e., TDYs, leave, deployments, etc.), the Unit Augmentee Monitor should be notified in order to account for personnel in case the need arises for an augmentation recall.**

Added 2.8.6. Conduct an installation records check in the Air Force Justice Information System (AFJIS) on all newly assigned augmentee personnel and when augmentees attend initial/recurring training. This information will be annotated on the "Request of Records for Augmentee Duties" memorandum, which is maintained in the augmentation folder.

Updated 2.8.8. Initiate an exercise recall for augmentee support twice per year. The intent of these exercises will be met by all planned exercises done throughout the year where augmentation support is needed. It is recommended, but not required, to conduct additional no-notice, telephonic, notification/accountability only exercises to assess the strength of the Augmentation force should contingent needs arise. These must be scheduled through 92 SFS/CC who will get WG approval.

Documentation of the results of these exercises can be kept in proof folders.

Updated 3.2.2.3. If 92 ARW augmentees will be utilized during a planned or contingency recall, the DFC or designated representative will ensure the 92 ARW/CC or 92 ARW/CD is notified and approves said recall.

Added 3.2.2.4. If 141 ARW augmentees will be utilized during planned or contingency recall, the DFC or designated representative will ensure the 92 ARW/CC or 92 ARW/CD is notified and approves said recall. Personnel from the 141 ARW must be on Title 10 orders to perform duties as augmentees.

Updated **Table A2.1**. SF Augmentee Requirement.

Updated A2.2.1. An annual review will be conducted by the 92 SFS/S3O, 92 FSS/FSM, and the 92 MSG/SEL in order to validate posting requirements and Unit Manpower Document (UMD) authorizations. 92 SFS/S3O personnel will determine the number of required augmentees, based on the number of required posts with two shifts per post at 12 hours each shift.

Updated A2.2.2. Augmentee distribution in the 92 ARW will be determined by the 92 FSS/FSM personnel utilizing the 92 ARW Augmentation Calculation Spreadsheet. An 80-percent manned factor of authorization in the grades of E-6 and below will be utilized to determine the fair-share requirements. Exempt units will include 92 ARW/CP (Command Post), 92 ARW/ATC (Base Operations & Air Traffic Controllers), 92 ARW/Safety, 92 ARW/HG (Honor Guard), 92 CES/CED (EOD), 92 FSS/FSDA (Airman Leadership School Cadre), and 92 SFS.

Added A2.2.2.1. Due to increased manpower restraints and exemptions (para **1.3.6**-**1.3.7**), when available, distribution of augmentation support for the 92 MXG (Maintenance Group) will be capped at three (3) augmentees for contingencies while in FPCON A/B and ten (10) augmentees for contingencies while in FPCON C/D during the months of April – September. Additionally, when available, distribution of augmentation support for the 92 MXG will be capped at five (5) augmentees for contingencies while in FPCON A/B and ten (10) augmentees for contingencies while in FPCON C/D during the months of October – March.

Chapter 1

EXECUTION

1.1. Concept of Operations. An identified and trained pool of Augmentation Support will be available to allocate to previously approved and validated functional areas at the direction of the 92d Air Refueling Wing Commander (92 ARW/CC). The 92d Air Refueling Vice Wing Commander (92 ARW/CD) administers the program and provides operational direction. Groups provide trained personnel to fulfill assigned augmentation commitments when activated. Requirement owners provide periodic training courses to enable Groups to satisfy their Augmentation Support commitments. Requirement owners request activation of Augmentation Support through 92 ARW/CD, who validates the requirement and activates the Augmentation Support. Upon activation of a validated Augmentation Support requirement, Group points of contact provide required manpower to the requirement owners.

1.2. Primary Mission Essential Function (PMEF): The PMEF of this program is to train, equip, and properly use assigned Augmentation Support personnel to provide force protection support and crisis action team (CAT) support for temporary or short-term workload surges during wing-level exercises, peacetime, wartime contingencies, or emergency situations/scenarios. The number of personnel needed to augment the security forces is based upon the amount required to meet the most demanding situation and will only be activated after the Security Forces Squadron Commander (SFS/CC) has exhausted the squadron's personnel resource pool. Close coordination between the security forces and supporting units will be established to ensure there are no shortfalls in providing augmentee replacements.

1.3. Definitions and Assumptions.

1.3.1. Augmentee: A member trained to perform an additional function outside of normal duty areas. Augmentees are assigned to support validated Augmentation Support tasks, as required.

1.3.2. The 92 ARW has several augmentee requirements throughout the wing. These positions include: CAT Admin, Cargo Deployment Function (CDF), Personnel Deployment Function (PDF) and the Snow Removal Team. The CDF is internally augmented through 92d Logistics Support Squadron manpower, the PDF is internally augmented through 92d Force Support Squadron manpower, and the snow removal team is internally augmented through 92d Civil Engineer Squadron manpower. The training and responsibilities for these augmentee positions will not be covered in this document and each unit responsible for providing the function will provide training internally to the augmentee members. The CAT Admin function is augmented through a maximum of 2 members from the 92d Wing Staff Agencies, 2 members from the 92d Medical Group and 4 members from the 92d Communication Squadron which is made up of 2 knowledge operators and 2 client systems technicians. This manpower is tailored to the specific situation. The 92d Wing Plans (XP) coordinates directly with the wing staff agencies, medical group, and communications squadron for training and staffing the CAT Admin positions as required. The remainder of this document will primarily focus on the 92d Security Forces Augmentation requirement since it is the wing's most robust augmentee requirement that is not internally controlled within a single unit.

1.3.3. Augmentation Support Requirement: A validated Wing-level task that can be performed by a member holding any Air Force Specialty Code (AFSC) after undergoing appropriate training and

equipping. Tasks requiring specific AFSCs and detailed training and or experience should not be validated as Augmentation Support requirements.

1.3.4. Requirement Owner: The functional agency point of contact (POC) responsible for mission accomplishment of the Augmentation Support requirement. For example, SFS is the requirement owner for SF Augmentees. Requirement owners will exercise operational supervision over augmentees when activated, are responsible for providing periodic training opportunities, and will validate augmentees' certification in any required skills. Requirement owners will keep a database to track names of trained personnel.

1.3.5. Assigned Manpower: For the purpose of Augmentation Support tasking calculations, only Technical Sergeants and below are considered in a unit's assigned manpower pool.

1.3.6. Exempt Manpower: Those assigned members who cannot be used as Augmentation Support. Members may be considered exempt for one of four reasons: 1) Air Force Instruction or Air Mobility Command Instruction expressed prohibition against use for augmentation duties; 2) Medical profile or prohibition against performing specific duty; 3) Deemed as mission essential by functional owner and validated by 92 ARW/CD or, 4) Personnel who are either deployed or TDY and are thus incapable of being used for Augmentation support.

1.3.7. Available Manpower: Defined as the assigned manpower, minus the exempt manpower, for each squadron or group.

1.3.8. Augmentation Support Tax: Defined as the overall percentage charged to each group to meet the total number of validated Wing-level Augmentation Support requirements. The Augmentation Support tax is calculated by dividing the total number of personnel needed to support all validated Augmentation Support requirements by the total available Wing-level manpower pool. [(Augmentation Support requirements) / (Wing Available) = Augmentation Support Tax]

1.3.9. Group-Level Augmentation Support Task: Will be defined by multiplying the Wing-level Augmentation Support Tax by the available manpower pool for each group. [(Augmentation Support Tax) x (Group Available) = Group Task]

1.3.10. Augmentation Support Task Matrix: The Augmentation Support Task Matrix is a refined break out of the group responsibilities toward each individual validated Augmentation Support requirement. This matrix allows group POCs to assign specific Augmentation Support tasks to their respective squadrons.

1.3.11. Standing Augmentation Support Requirement: A standing Augmentation Support requirement is approved for activation at any time by the 92 ARW/CC. A standing Augmentation Support requirement grants the requirement owner permission to call up assigned augmentees without having to go through a separate activation approval for each use and should be granted to owner's who have short duration recurring requirements. The 92 ARW/CD will limit the number of standing Augmentation Support requirements to a minimum to ensure manpower activations are not abused.

Chapter 2

RESPONSIBILITIES

2.1. The 92d Air Refueling Wing (92 ARW): The 92 ARW/CC has appointed the 92 ARW/CD as the Fairchild AFB Augmentation Program Office of Primary Responsibility.

2.2. The Fairchild AFB Augmentation Program Manager will be the 92 ARW/CD. They will also be responsible for ensuring that there are adequate personnel available for augmentation requests from any agency on FAFB to meet the needs of outlined contingencies. The 92 ARW/CD has appointed the 92 SFS/CC as the 92 Air Refueling Wing Defense Force Commander (92 ARW/DFC), an installation augmentation program manager for the day-to-day overall administration of the installation's program.

2.3. The 92d Logistics Readiness Squadron Commander (92 LRS/CC) will fund and budget for designated augmentee equipment as outlined below:

2.3.1. Plate Carrier / IOTV.

2.3.2. Kevlar helmet.

2.3.3. Gas mask for weapons qualifications.

2.4. Defense Force Commander (DFC) will:

2.4.1. Ensure security forces augmentees are provided with the equipment listed in **Table A4.1**.

2.4.2. Approve all program elements dealing specifically with SF Augmentation personnel.

2.4.3. Determine the number of SF augmentees required IAW the 92 ARW Installation Defense Plan. Approval will be obtained from the 92 ARW/CD.

2.4.4. Request augmentees when necessary to activate SF augmentees to provide force protection support for temporary or short-term workload surges during 92 ARW-level exercises, peacetime, wartime contingencies or emergency situations/scenarios when security forces personnel resources have been exhausted.

2.4.5. Appoint a 92 SFS Augmentation Program Manager in writing.

2.5. All 92 ARW group or squadron commanders will:

2.5.1. Ensure their augmentees report to duty with the basic uniform/clothing items normally issued by the unit and/or funded by the Air Force (e.g. cold/wet weather gear, thermal shirt and thermal pants, gloves). See **Table A4.1** [92 SFS Augmentee Equipment List.

2.5.2. Appoint a Unit Augmentee Monitor in writing. Unit commanders are responsible for ensuring their units meet the requirements of this instruction. Recommend commanders utilize their Unit Deployment Managers as their Unit Augmentee Monitor. **Note: Augmentee Monitor duties may be consolidated among squadrons at their group commander's discretion.**

2.6. Unit Augmentee Monitors will:

2.6.1. Provide the SFS Augmentation Program Manager and the CAT Director and 92 ARW/XPD with his or her on- and off-duty contact information as well as that of any alternates and notify the SFS Augmentation Program Manager of any change in Augmentee Monitor personnel or contact

information. All Unit Augmentee Monitors will provide a Master Arming Roster Memorandum (MARM) to SF program manager.

2.6.2. Assist Squadron and Group Commanders in the selection of members for SFS Augmentation Program who are E-6 and below or O-1/O-2 and who are not on a profile; have at least twelve (12) months' retainability upon augmentee assignment; possess at least a favorable T3 (Secret) background investigation; have no record of conviction of criminal domestic violence under the Lautenberg Amendment; are able to qualify on appropriate weapons systems; and, do not have established retirement or approved separation dates.

2.6.3. Coordinate the release of augmentees for recalls and training. Maintain required quantity of trained and available augmentees and replacement augmentees. Report shortfalls to the Augmentation Program Manager. Inform Security Forces Training of any members placed on DNA status.

2.6.4. Notify the SFS Augmentation Program Manager within 24 hours of an SF augmentee change. A fully trained SF augmentee must be available for duty prior to replacing an individual already assigned to the program. **Note: The required number of SF augmentees must be available at all times regardless of leave, medical issues, temporary duty assignments, or deployment. Through normal out-processing procedures (i.e., TDYs, leave, deployments, etc.), the Unit Augmentee Monitor should be notified in order to account for personnel in case the need arises for an augmentation recall.**

2.6.5. Coordinate directly with SFS Augmentation Program Manager to schedule SF augmentees to qualify to Group A standards for initial and annual weapons qualification.

2.6.6. All Unit Augmentee Monitors who provide SF augmentees will work with the SFS Augmentation Program Manager to provide a MARM for SFS Augmentation Program to ensure proper arming.

2.6.7. All Unit Augmentee Monitors who provide SF augmentees will immediately inform the SFS Augmentation Program Manager whenever any of their SF augmentees are placed on Do Not Arm (DNA) status.

2.6.8. Coordinate with 92d Medical Group (92 MDG) to ensure a medical record check has been conducted and no existing physical and mental concerns exists preventing an augmentee from being armed with a weapon.

2.7. The 92 SFS Training Section (S3T) will:

2.7.1. Coordinate and monitor the Security Forces Augmentation Program for the installation.

2.7.2. Provide initial training and annual recertification training in basic SF duties and responsibilities to all assigned augmentation personnel. Training classes will be conducted on an as- needed basis for a five-day period. During training, augmentee personnel will receive training on all applicable use-of-force rules. Refer to Attachment #3 for the list of training tasks.

2.7.3. Inform the unit providing augmentees of all equipment they are required to provide to their augmentee personnel.

2.8. The 92 SFS Augmentation Program Manager will:

2.8.1. Determine local training requirements and record them on an AF Form 797, *Job Qualification Standard (JQS) Continuation/Command JQS*. Maintain an individual augmentation personnel data folder for each person assigned. The folder should (optional) consist of:

2.8.1.1. White label (upper left corner denoting Last Name, First Name, MI, Rank, Sq).

2.8.1.2. SF Augmentee Personal Information Sheet (first section).

2.8.1.3. Request for Annual Record Review for Augmentee Duties (second section).

2.8.1.4. AF Form 797 for Augmentees (third section).

2.8.1.5. Twenty Five Question Test Sheet (fourth section).

2.8.1.6. AF Form 522, *USAF Ground Weapons Training Data* (fifth section).

2.8.1.7. DD Form 2760, *Qualification To Possess Firearms or Ammunition* (sixth section)

2.8.2. Coordinate with 92 MDG to ensure a medical record check has been conducted and no existing physical and mental concerns exists preventing an augmentee from being armed with a weapon.

2.8.3. Maintain a locally devised electronic database containing, as a minimum, the name, grade, unit of assignment, date trained as augmentee, weapons qualifications, and other information needed to track the training status.

2.8.4. Coordinate with supporting units on a monthly basis or as needed to make sure there are no changes to their augmentation program.

2.8.5. Coordinate with the 92 SFS/CC and supporting units when necessary to activate SF augmentees to provide force protection support for temporary or short-term workload surges during 92 ARW-level exercises, peacetime, wartime contingencies, or emergency situations/scenarios when security forces personnel resources have been exhausted.

2.8.6. Conduct an installation records check in the Air Force Justice Information System (AFJIS) on all newly assigned augmentee personnel and when augmentees attend initial/recurring training. This information will be annotated on the "Request of Records for Augmentee Duties" memorandum, which is maintained in the augmentation folder.

2.8.7. Reserve the right to conduct random background checks through the Washington Law Enforcement Telecommunications System, in addition to AFJIS, to verify augmentee eligibility.

2.8.8. Initiate an exercise recall for augmentee support twice per year. The intent of these exercises will be met by all planned exercises done throughout the year where augmentation support is needed. It is recommended, but not required, to conduct additional no-notice, telephonic, notification/accountability only exercises to assess the strength of the Augmentation force should contingent needs arise. These must be scheduled through 92 SFS CC who will get WG approval. Documentation of the results of these exercises can be kept in proof folders.

2.9. The 92d Security Forces Squadron Operations Superintendent (92 SFS/S3O) will: Ensure Flight Chiefs post augmentation personnel commensurate with their training and the Post Priority Chart (PPC) IAW the Integrated Defense Plan (IDP).

2.10. The 92 SFS Flight Chiefs/Flight Commanders will: Ensure augmentation personnel are posted commensurate with their duty position qualification requirements IAW AFI 36-2646 and receive continuous and applicable On-the-Job Training while assigned to their element. Provide the SFS Augmentation Program Manager with feedback concerning each individual's performance and training needs.

2.11. The 92d Security Forces Squadron Combat Arms Section (92 SFS/S4C) will:

2.11.1. Provide all weapons training and qualifications IAW AFI 31-117, *Arming and Use Of Force by Air Force Personnel*, and AFI 36-2654, *Combat Arms Program*. The NCOIC, Combat Arms, will coordinate directly with the SFS Augmentation Program Manager for firing dates and requirements and will include augmentation personnel firing in the ammunition forecasts. Combat Arms personnel will forward augmentation personnel's AF Forms 522 to the 92 SFS Augmentation Program Manager.

2.11.2. Ensure all augmentees, at a minimum, are qualified with the M-4 rifle. Personnel assigned as augmentees will qualify annually with the rifle to meet the requirement in DoDD 5210.56, *Carrying of Firearms and the Use of Force by DoD Personnel Engaged in Security, Law and Order, or Counterintelligence Activities*.

2.11.3. Have at a minimum two days each quarter set aside specifically to qualify augmentees on the M-4 rifle in conjunction with scheduled SF augmentee training classes.

2.11.4. Allocate ammunition for the fiscal year commensurate with the number of augmentees determined from the Augmentee Review Board.

2.12. Unit Security Managers (USM) will: Conduct a clearance check on members selected for augmentation training prior to sending them to initial/refresher augmentation training. If the augmentee has a proper security clearance, the USM will annotate the type of clearance on the "Request for Annual Record Review for Augmentee Duties" memorandum, which is maintained in the augmentation folder.

2.13. Augmentation Personnel will:

2.13.1. Adhere to all applicable instructions, orders, and standards pertaining to SF personnel, as identified on AF Form 797 and trained during initial and annual training. It is the responsibility of (12) months retainability upon augmentee assignment. Personnel who have established retirement or approved separation dates will not be selected as augmentees. Be between the grades of E-1 thru E-6 inclusive, or O-1/O-2. Trained augmentees should remain in the program for a minimum of one year after initial training.

2.14.3. Be qualified with the M-4/M-16 and a means of Less Than Lethal (LTL) force (i.e. baton, taser, etc.).

2.14.4. Attend initial SF Augmentee Training class conducted by 92 SFS/S3T and annual recurring training.

2.14.5. Have the physical and mental stamina to perform SF duties.

2.14.6. Not be pending courts-martial or disciplinary action, be on the control roster, or have an unfavorable information file.

2.14.7. Not have been convicted of a criminal offense.

2.14.8. Not have been identified as an alcohol or substance abuser.

2.14.9. Not have a profile that would prevent them from performing augmentee duties (must be medically cleared).

2.14.10. Immediately notify their Unit Augmentee Monitor of any changes in their duty status (TDY, medical profiles, etc.) affecting their ability to perform SF duties. Augmentation personnel will provide both the SFS Augmentation Program Manager and their Unit Augmentee Monitor with current home telephone number and address and will update all personal information as needed. All personal information will be safeguarded IAW AFI 33-332, *Air Force Privacy and Civil Liberties Program.*

2.14.11. Be under the operational control of 92 SFS/S3O while performing duties. Individuals will address all concerns through the appropriate SF chain of command, vice their normal operational chain of command in their regular unit of assignment.

2.14.12. Perform duties as Installation Entry Controller, External Response/Fire Team member, Close Boundary Sentry, Traffic Control Point, Cordon Guards and Law Enforcement-related personnel.

2.14.13. Ensure they have all required equipment and when recalled report for duty with this equipment.

2.14. Requirement Owners will:

2.14.1. Be responsible for providing training to potential augmentees as required. POCs should be available to schedule training and respond to inquiries as required.

2.14.2. Provide any specialized equipment that may be required to perform the Augmentation Support task. Validated requirements with POCs are listed in **Table A4.1**. (**Attachment 4**) when provided.

2.14.3. Formally request activation of Augmentation Support through their Group commander and the 92 ARW/CD. Standing approval to use Augmentation Support can also be requested and granted for other functions as well. Requirement owners will maintain a database documenting the names and units of trained augmentees.

2.15. Associate Units: The 336th Training Group and 141st Air Refueling Wing may provide personnel for augmentee duty on an as-available basis. Provided personnel will be used to offset the Augmentation Support tasks levied against 92 ARW groups. Augmentation Support requirements filled by associate units will be limited to those that require little or no advance training (just in time training). As soon as Augmentation Support requirements become known, 92 ARW/CD will contact 336 TRG/CD and/or 141 ARW/CC to determine the level of support available from 336 TRG and/or 141 ARW. All remaining associate units may be approached to provide personnel for augmentee duty by 92 ARW/CD; however no standing requirement to support is established by this instruction.

Chapter 3

RECALL PROCEDURES

3.1. Augmented Activation/Recall: Only the 92 ARW/CC, 92 ARW/CD, or delegated representative can authorize recall of Augmentation Personnel.

3.2. Recall Procedures. In the event of an augmentation personnel recall, the following is the chain of events and responsibilities of each person:

3.2.1. The DFC requests from the 92 ARW/CD the number of augmentation personnel required to maintain security posture needed in response to an event or threat.

3.2.2. There are two scenarios where the 92 ARW could activate an Augmentee Recall, planned and contingency. A Planned recall is a scheduled exercise with a pre-identified and coordinated request for augmentee support, and a Contingency recall is an unscheduled/emergency request for augmentee support.

3.2.2.1. Planned: If the CAT is activated, the DFC or SF CAT Representative will make the request to the 92 ARW/CC or 92 ARW/CD. Group commanders or their CAT representatives will notify their unit commanders to send the required number of qualified SF augmentation personnel to Bldg. #2071/SFS. Augmentation personnel will report to the SFS Augmentation Program Manager as soon as possible, but NLT two hours after notification. The SFS Augmentation Program Manager will direct personnel to the appropriate location for posting.

3.2.2.2. Contingency: The DFC or designated representative makes the emergency request to the 92 ARW/CC or 92 ARW/CD to recall augmentee personnel. Once approved, the DFC or designated representative will work with 92 ARW/CP to notify Group CCs and initiate the recall. Follow the same reporting instructions in **para 3.2.2.1** above.

3.2.2.3. If 92 ARW augmentees will be utilized during a planned or contingency recall, the DFC or designated representative will ensure the 92 ARW/CC or 92 ARW/CD is notified and approves said recall.

3.2.2.4. If 141 ARW augmentees will be utilized during planned or contingency recall, the DFC or designated representative will ensure the 92 ARW/CC or 92 ARW/CD is notified and approves said recall. Personnel from the 141 ARW must be on Title 10 orders to perform duties as augmentees.

3.2.3. Group commanders will contact the 92 ARW/CD as soon as all required personnel have been notified to report to the 92 SFS. Unit Augmentation Monitors will send a roster of names and ranks of the qualified augmentation personnel recalled to the 92 SFS Augmentee Program Manager or designated representative no later than 30 minutes after notification to recall.

3.2.4. Upon receiving the rosters from the Unit Augmentation Monitors, the SFS Augmentation Program Manager or designated representative will double-check qualifications of the augmentation personnel. Conflicting issues will be worked through the Unit Augmentation Monitor.

3.3. Standby Procedures. In the event augmentees are placed on standby, they will be readily available for a recall until further notice.

3.3.1. **Telephone Standby Procedures.** In the event augmentees are placed on 6-ring standby, they will comply with all of the above including: Augmentees will ensure they can be reached by phone within (6) rings, and will have duty gear with them at all times if issued.

3.3.2. Augmentees will not consume any alcohol for the duration of 6-ring standby.

CHESLEY L. DYCUS, Colonel, USAF
Commander

MSG—Mission Support Group

MXG—Maintenance Group

OG—Operations Group

OPR—Office of Primary Responsibility

PSI—Personnel Security Investigation

RDS—Records Disposition Schedule

SF—Security Forces

SALUTE—Size, Activity, Location, Uniform, Time, Equipment

SFA—Security Forces Augmentee

SITREP—Situation Report

UIF—Unfavorable Information File

UPRG—Unit Personnel Records Group

Attachment 2

92D AIR REFUELING WING SECURITY FORCES AUGMENTEE PERSONNEL REQUIREMENT.

A2.1. Augmentee Personnel Requirement. In accordance with the 92 ARW Plan 31-1, 92 SFS Augmentation Personnel are required for the most demanding situations. In order to have enough personnel available, there must be augmentees trained. The numbers listed below show the number of qualified augmentees each organization must be prepared to support. Units will need to train more than the minimum number required to ensure they can meet their required tasking regardless of leave, medical issues, temporary duty assignments, or deployment.

A2.2. Determining Augmentee Personnel Requirement.

A2.2.1. An annual review will be conducted by the 92 SFS/S3O, 92 FSS/FSM, and the 92 MSG/SEL in order to validate posting requirements and Unit Manpower Document (UMD) authorizations. 92 SFS/S3O personnel will determine the number of required augmentees, based on the number of required posts with two shifts per post at 12 hours each shift.

A2.2.2. Augmentee distribution in the 92 ARW will be determined by the 92 FSS/FSM personnel utilizing the 92 ARW Augmentation Calculation Spreadsheet. An 80-percent manned factor of authorization in the grades of E-6 and below will be utilized to determine the fair-share requirements. Exempt units will include 92 ARW/CP (Command Post), 92 ARW/ATC (Base Operations & Air Traffic Controllers), 92 ARW/Safety, 92 ARW/HG (Honor Guard), 92 CES/CED (EOD), 92 FSS/FSDA (Airman Leadership School Cadre), and 92 SFS.

A2.2.2.1. Due to increased manpower restraints and exemptions (para **1.3.6**-**1.3.7**), when available, distribution of augmentation support for the 92 MXG (Maintenance Group) will be capped at three (3) augmentees for contingencies while in FPCON A/B and ten (10) augmentees for contingencies while in FPCON C/D during the months of April – September. Additionally, when available, distribution of augmentation support for the 92 MXG will be capped at five (5) augmentees for contingencies while in FPCON A/B and ten (10) augmentees for contingencies while in FPCON C/D during the months of October – March.

A2.2.3. The 92 ARW will provide a minimum or 40 to a maximum of 60 augmentees and will identify and appoint personnel to meet this requirement. Personnel from the 92 ARW must be on Title 10 orders to perform as augmentees.

A2.2.4. The number of augmentees is determined by the 92 SFS Post Priority Chart requirements during increased FPCON Charlie and Delta, potential real-world contingency deployments, and current available manning of the 92 SFS. Units should ensure that the number of augmentees trained account for Leave, TDY, and personal emergencies. The number of augmentees is primarily determined for an 801X contingency.

Table A2.1. SF Augmentee Requirement.

[redacted]	April - September		October - March	
	Augmentee Requirement		Augmentee Requirement	
Unit	Contingencies while in FPCON A/B	Contingencies while in FPCON C/D	Contingencies while in FPCON A/B	Contingencies while in FPCON C/D
92 FSS	2	6	6	18
92 LRS	2	5	6	7
92 CS	5	6	11	13
92 CONS	1	1	4	4
92 CES	22	25	0	0
92 WSA	3	3	4	4
92 MDG	1	1	1	1
92 OG	1	3	3	3
92 MXG	3	10	5	10
Total	40	60	40	60

Attachment 3

92 SFS AUGMENTATION TRAINING SCHEDULE.

A3.1. The following table shows the required subjects in which all SF augmenters will be trained.

Table A3.1. [92. SFS Augmentee Training Topics, Part 1.

JOB QUALIFICATION STANDARD CONTINUATION/COMMAND JQS

CRITICAL TASK	TASK NUMBER	TASKS, KNOWLEDGE AND TECHNICAL REFERENCES	CERTIFICATION				
			START DATE	COMPLETION DATE	TRAINEE'S INITIALS	TRAINER'S INITIALS	CERTIFIER'S INITIALS IF REQUIRED
☐	1.	RECALL PROCEDURES: (W/O) Identify and explain facts and procedures related to recall procedures. TR: 92 ARW PLAN 31-1 IDP, SFI 31-1 V3	20210201	20210205			
☐	2.	PRACTICE WEAPONS SAFETY AND APPLY CONCEPTS OF USE OF FORCE: (W/O) Identify, explain and perform loading, clearing, and turn-in procedures for the M-4 and M-16 rifle. AFMAN 31-129	20210201	20210205			
☐	3.	INSTALLATION ENTRY REQUIREMENTS: (W/O/P) Identify, explain and perform facts and procedures related to the subject. TR: AFI 31-101, 92 ARW Plan 31-1 Integrated Defense Plan (IDP), SFI 31-1 V3	20210201	20210205			
☐	4.	IDENTIFICATION CHECKS: (W/O/P) Identify and explain facts and procedures related to the subject TR: AFI 36-3026, IDP 31-1, SFI 31-1 V3	20210201	20210205			
☐	5.	SPOKANE TRANSIT AUTHORITY: (W/O/P) Identify, explain, and perform entry requirements associated with the STA bus entering the base. TR: 92 ARW PLAN 31-1 IDP	20210201	20210205			
☐	6.	EMERGENCY GATE PROCEDURES: (W/O/P) Identify, explain and perform entry requirements associated with anti-robbery/alarm operations, fresh pursuit and escaped prisoners. TR: AFI 31-101, AFMAN 31-201 Vol 2, 92 ARW PLAN 31-1 IDP, SFI 31-1 V3	20210201	20210205			
☐	7.	BARRED PERSONNEL AND REVOCATED/SUSPENDED DRIVING: (W/O/P) Identify, explain and perform procedures related to the subject. TR: AFI 31-101, SFI 31-1 V3	20210201	20210205			
☐	8.	AA&A/DOE SHIPMENTS: (W/O/P) Identify, explain and perform procedures for scheduled and non-scheduled, conventional and DOE shipments. TR: 92 ARW PLAN 31-1 IDP	20210201	20210205			
☐	9.	DUI/DWI PROCEDURES: (W/O/P) Identify, explain and perform facts and procedures related to alcohol and drug countermeasures TR: SFI 31-3 V3	20210201	20210205			
☐	10.	CONFISCATED ID CARDS: (W/O/P) Identify, explain and perform procedures related to the subject. TR: AFI 36-3026, AFI 31-1 V3	20210201	20210205			
☐	11.	BOMB THREAT/DISASTERS: (W/O) Identify and explain procedures related to the subject. TR: SFI 31-1 V3, 92 ARW PLAN 31-1 IDP	20210201	20210205			
☐	12.	INSTALLATION ENTRY POINT CHECKS: (W/O/P) Identify, explain and perform procedures related to the subject. TR: SFI 31-1 V3, 92 ARW PLAN 31-1 IDP	20210201	20210205
