TABLE OF CONTENTS

Career Field Education and Training Plan

Community Planners in Job Series 0020

1. **Part I**

Preface	**3**
Abbreviations/Terms Explained	**5**
Section A: General Information	**13**
Section B: Community Planner Competency	**15**
Section C: Career Progression and Information	**50**
Section D: Skill Level Training Requirements	**60**
Section E: Resource Constraints	**60**

2. **Part II**

Section A: Specialty Training Standard	**62**
Section B: Course Objective List	**64**
Section C: Support Material	**65**
Section D: Community Planner Eligible Position List	**67**
Section E: Training Course Index	**80**
Section F: Unique Requirements – Reporting Planner Training	**93**
Section G: Unique Requirements – Planning Training for Leadership	**95**

3. **Appendix A: Training References**

Part I

PREFACE

1. This Career Field Education and Training Plan (CFETP) is a comprehensive document that identifies lifecycle development opportunities and support resources in accordance with Department of the Air Force Instruction (DAFI) 36-2670, *Total Force Development* (https://static.e-publishing.af.mil/production/1/af_a1/publication/dafi36-2670/dafi36-2670.pdf) to help Learning Professionals gain the skills and competencies needed in their careers to become innovative leaders. CFETP identifies and provides a description of recommended training, education, professional development, and experience to empower Department of the Air Force (DAF) Community Planners to be successful in their careers.

2. Community Planners at the headquarters, intermediate and installation level help Senior DAF leaders develop a vision for DAF installations that are, "adaptive, resilient, right-sized and fiscally sustainable," by leveraging facilities, services, and resources both on and off DAF installations to meet current and future mission needs.

3. A primary goal in the DAF Civil Engineer (CE) Annex for Agile, Innovative, and Ready Airmen Engineers is the need to recruit, develop, and retain individuals that will serve as leaders of our Airmen Engineer team. All career fields supporting the Civil Engineer serve as key players involved with shaping the CE enterprise end state goal of Right-Sized, Resilient Installations. The DAF Installation and Infrastructure Action Plan (I2AP) is the Air Force Secretary's plan to increase readiness of our installations while under attack within the DAF. The DAF utilizes this plan based on mission dependency to prioritize funding and to build and maintain right-sized resilient infrastructure. The plan is accessible at https://www.safie.hq.af.mil/Programs/I2AP/. Our installation leaders have a duty to ensure our infrastructure requirements and investments are consistent with the current version of the National Defense Strategy (https://www.defense.gov/National-Defense-Strategy/).

4. Integrated Installation Planning is a planning framework for the development of DAF installations and surrounding communities. Integrated Installation Planning incorporates installation development planning and facility space planning, addresses compatible on and off-base planning for the Air Installations Compatible Use Zones (AICUZ), Noise, and Mission Sustainment programs, and integrates planning with the DAF's Environmental Impact Analysis Process (EIAP). DAFI 32-1015, *Integrated Installation Planning***,** provides a full description of the roles and responsibilities for the 0020 planner, as well as other career fields that support planning processes.

5. This CFETP is intended to serve as a career roadmap for Community Planners professionals in job series *Community Planner* (0020). The Community Planner competencies included should be used by Community Planners and their supervisors/mentors/commanders to evaluate proficiency throughout a career and guide force development efforts. The CFETP will provide personnel pathways to success and create a foundation and a new way for the DAF to ascertain the knowledge, skills, abilities, and other characteristics required to develop the Community Planners we need.

6. Serving as a DAF Community Planner is an exciting, challenging, and rewarding career. If you start your career at a CE squadron, even early in your career, you will have the opportunity to manage projects and influence senior leaders on your base. DAF bases operate as small cities, and all CE staff play a role supporting the DAF equivalent of an Assistant City Manager (Deputy Base Civil Engineer) and City Manager (Base Civil Engineer), who support the equivalent of a municipality's elected mayor (the Air Force Installation or Wing Commander, Space Force Space Base Delta, or Space Launch Delta Commander) and voting members of the city council (the Installation Facilities Board).

7. A Community Planner's technical development is unique compared to other DAF and Civil Engineer specialties. Prior to being hired, a Community Planner has met very specific educational requirements, having completed a four-year course of study from an accredited college or university leading to a bachelor's or higher degree in a major appropriate to the community planning field, such as community planning or urban and regional planning. Planners can also have degrees in related fields such as urban affairs, architecture, landscape architecture, engineering, sociology, geography, economics, political science, or public administration, if they have completed at least 12 semester hours in the planning process, socioeconomic and physical elements of planning, urban and regional economic analysis, and development finance. See the Office of Personnel Management (OPM) standard document (https://www.opm.gov/policy-data-oversight/classification-qualifications/classifying-general-schedule-positions/standards/0000/gs0020.pdf).

7.1. Part 1 of this CFETP provides information necessary for overall management of the occupational series included in this CFETP. Section A details general information on how everyone will use the plan. Section B identifies detailed Community Planner career competencies and a civilian development path. Section C provides career progression and career development opportunities based on experience and education. Section D discusses skill level training requirements and is not applicable for civil service positions. Section E explains the resource constraints and opportunities toward funding educational programs.

7.2. Part 2 provides potential 0020 job series-eligible positions and a training plan. Section A identifies the Specialty Training Standard and includes competencies and professional certifications that complement Community Planners' professional credentials. Section B is a course objective list and is currently reserved for future use. Section C identifies available support materials. Section D details Community Planner eligible position list from initial /early DAF career stage through intermediate Headquarters (HQ) stage to late career higher HQ stage. Section E identifies a training course index for all levels of a DAF Community Planner career. The list includes both mandatory (new employee/supervisor) and optional courses covering the first 10 years from beginning a Community Planner career in the DAF.

8. Guidance in the CFETP provides effective and efficient development at the appropriate points in member's careers.

ABBREVIATIONS/TERMS EXPLAINED

AF/A4C. The Directorate of Civil Engineers. In accordance with Headquarters Air Force Mission Directive (HADMD) 1-38, Air Force Policy Directive (AFPD) 32-10, *Installations and Facilities*, AFPD 32-20, *Fire Emergency Services*, AFPD 32-30, *Explosive Ordnance Disposal*, AFPD 32-60, *Housing*, AFPD 32-70, *Environmental Considerations in Air Force Programs and Activities*, AFPD 32-90, *Real Property Asset Management*, AFPD 10-2, *Readiness*, and AFPD 10-25, *Emergency Management*, the Director of Civil Engineers formulates DAF Civil Engineer strategy, policy and implementation guidance supporting DAF and Department of Defense (DoD) strategic goals and objectives, and manages CE enterprise governance to guide the development and execution of the associated strategy, policy, implementation guidance, and related oversight.

AFCEC. Air Force Civil Engineer Center. AFCEC provides civil engineering services and enterprise lifecycle leadership to DAF installations that enable the warfighter. AFCEC is installation focused and globally linked to provide best-practice solutions to Airmen…anytime and anywhere. AFCEC is the cornerstone of the CE enterprise by managing all centralized CE functions and optimizing key capabilities.

AFIMSC. Air Force Installation and Mission Support Center. One of the centers under Air Force Materiel Command (AFMC), AFIMSC is the single organizational entity in the DAF providing intermediate-level installation and mission support capabilities to support Major Commands (MAJCOMs) and installations across the full range of military operations.

AFIT. Air Force Institute of Technology. AFIT is the DAF's Graduate School of Engineering and Management and the DAF's institution for technical professional continuing education located at Wright-Patterson AFB, OH. A component of Air University (AU) and Air Education and Training Command (AETC), AFIT is committed to providing defense-focused graduate and professional continuing education and research to sustain the technological supremacy of America's air, space, and cyber forces. AFIT accomplishes this mission through four schools: the Graduate School of Engineering and Management, the School of Systems and Logistics, The Civil Engineer School, and the School of Strategic Force Studies. Through its Civilian Institution Programs Office, AFIT also manages the educational programs of officers enrolled at 350+ civilian universities, research centers, hospitals, and industrial organizations.

AFPC. Air Force Personnel Center. Headquarters Air Force Personnel Center (HQ AFPC) executes and integrates DAF personnel programs to develop DAF people and meet the field commanders' needs. HQ AFPC is a Field Operating Agency (FOA) of Headquarters USAF.

AFVEC. Air Force Virtual Education Center. The DAF's "go-to" site for information about your educational benefits. The site offers a wide range of online services that empowers airmen to actively take part in all parts of their education-including the ability to create and manage your Tuition Assistance funding requests.

AICP. American Institute of Certified Planners. AICP is the American Planning Association's (APA) professional institute and provides the only nationwide, independent verification of planners' qualifications. Certified planners pledge to uphold high standards of practice, ethics, and professional conduct, and to keep their skills sharp and up to date by continuously pursuing advanced professional education.

AT&L. Assistant Secretary of the Air Force (Acquisition, Technology, and Logistics). The Office of the Assistant Secretary of the Air Force for Acquisition, Technology and Logistics oversees DAF research, development, acquisition, and program sustainment activities totaling an annual budget of more than $60 billion for more than 550 acquisition programs.

AU. Air University. AU is the DAF's resident home for Professional Military Education (PME), Officer Training School, and Air Force Reserve Officer Training Corps Field Training located at Maxwell AFB, AL. In-residence PME programs include Squadron Officer School (SOS), Air Command and Staff College (ACSC), and Air War College (AWC).

BCE. Base Civil Engineer. Develops and implements CE force employment and provides staff supervision and technical advice. Performs and manages CE functions and activities to provide facilities and infrastructure supporting the United States and allies. Activities include programming, budgeting, project management, drafting, surveying, planning, feasibility studies, construction management, utilities operations, energy and environmental programs, land management, real property accounting, fire protection, explosive ordnance disposal, disaster preparedness programs, family housing and dorm management, and mobilization programs at base level. Serves on response teams and related installation support services. Advises commanders and government officials on effective use of CE resources.

BDE. Basic Developmental Education. BDE programs are tactical level programs that introduce employees to the DAF and DoD missions and prepare them for future leadership, managerial, and leadership roles. Key BDE programs include SOS, the Defense Civilian Emerging Leader Program (CSLP), and the Developing Team Leader Course. Program eligibility requirements vary. See the CE Career Field Team SharePoint for more information (https://usaf.dps.mil/sites/10016/Draft/SitePages/CE%20CFT%20Newsletter%202024.aspx).

CB. Career Broadener. The CB program is part of the DAF leadership development framework, designed to build functional and institutional competencies while enhancing leadership perspective.

CD. **Civilian Development**. The DAF CD program is central to the Air Force's Civilian Leadership Development continuum that spans a civilian's professional career. The programs included in the CD portfolio prepare civilian students from the DAF, its sister services, and allied nations for positions of greater responsibility. Emphasis in these programs includes leadership, military doctrine, and aerospace power. More information about available programs can be accessed through https://www.airuniversity.af.edu/CLDS/.

CFETP. **Career Field Education and Training Plan**. A comprehensive, multipurpose document encapsulating the entire spectrum of training for a career field. It outlines a logical growth plan that includes training resources. The CFETP is designed to identify career field training, eliminate redundancy, and ensure the training budget is defensible.

CFT. Civil Engineer Career Field Team. Functionally oriented teams that execute Force Development policy and programs for civilians.

CFM. **Career Field Manager**. The focal point for the designated career field within a functional community. Serves as the primary advocate for the career field, addressing issues and coordinating functional concerns across various staff. Responsible for the career field policy and guidance. Must be appointed by the Functional Manager (FM) and hold the grade of GS-15 (or equivalent).

CFT. Career Field Team. The group of career field specialists, personnel lists, and/or support personnel at AFPC who are responsible for day-to-day operation of the Career Field Program. They conduct all Force Development processes for the career field, in compliance with DAF personnel policies issued by AF/A1 and career field management policies issued by their functional leaders.

CL. **Continuous Learning**. The Office of the Under Secretary of Defense AT&L promotes a philosophy of career-long learning by AT&L workforce members to enhance proficiency and currency. See Appendix A for CL program application guidance and guidelines for crediting CL activities.

Community Planner. An individual who performs installation development planning functions for the DAF, most often in the Community Planner (0020) occupational series. However, other skill sets at times fill the role of a Community Planner at the installation level (such as Architects (0808) and Landscape Architects (0807)).

CONUS/OCONUS. Continental United States/Outside Continental United States. CONUS refers to United States territory, including the adjacent territorial waters, located within North America between Canada and Mexico. Areas outside the 48 contiguous states are OCONUS. Areas such as Alaska and Hawaii are defined as non-foreign OCONUS.

CPP. Comprehensive Planning Platform. Web-based tool that provide visibility of integrated planning, programming, asset management and budget execution actions through a single digital, authoritative database environment, enabling comprehensive planning across the enterprise. CPP links priority installation development requirements to strategic enterprise mission objectives. It links and integrates facility data to planning and programming actions identified by the integrated installation planning process and it creates a dynamic and agile information technology system responsive to changing requirements, and decision-making in support of the warfighting mission. See the CPP at: https://usaf.dps.mil/teams/CPP/Style%20Library/Prod/home.aspx.

CSLP. Civilian Strategic Leadership Program. The DAF civilian enterprise development program designed to provide selected GS-13/14/15 (or equivalent) DAF employees competencies needed to build a federal corporate culture that drives for results, services customers, and builds successful teams and coalitions within and outside the organization.

CTAP. **Civilian Tuition Assistance Program**. DAF civilian post-secondary Tuition Assistance (TA) supports civilians in their continued self-development and includes coursework at the associate, bachelor, masters, and doctoral levels. TA is for courses that contribute to occupational and institutional competencies, special interest needs and readiness by supporting the current and anticipated needs of the DAF. This includes courses that will provide employees the breadth of knowledge and problem-solving tools that aid in critical thinking, allowing individuals to address a wide range of problems and weigh alternative solutions. Additional information about TA and CTAP is available at https://myfss.us.af.mil/USAFCommunity/s/knowledge-detail?pid=kA08300000002U7CAI.

Currency. Maintaining proficiency in the Community Planning (0020) occupational series as demonstrated by meeting DoD and Air Force Continuous Learning (CL) standards and performing acquisition duties. See CL.

DCOOL. **Defense Civilian Credentialing Opportunities On-Line**. DCOOL is a website focused on civilian credentialing opportunities for federal workers. The site provides information about certifications and licenses providing professional growth opportunities in their career areas. At the site, civilians can provide both general information on credentialing as well as specific information on credentials related to their individual federal occupational series. After searching on a federal occupational series by either code or title, users can view a list of credentials related to most or some of their job duties. Clicking on a credential title in the list provides detailed information about that credential, including a description of the credential, its eligibility requirements, exam topics, and recertification requirements. The site is http://dod-civ-cool-review.s3.amazonaws.com/index.htm.

DE. **Developmental Education**. An array of educational opportunities comprised of professional and specialized education programs, research and doctrinal studies, fellowships, and graduate- level studies. DE spans a member's entire career and provides the knowledge and abilities needed to develop, employ, and command air, space and cyberspace forces.

DAU. **Defense Acquisition University**. DAU is the DoD's institutional authority in implementing Defense Acquisition Workforce Improvement Act (DAWIA) and conferring certification levels located at Fort Belvoir, VA. DAU offers a variety of acquisition courses in residence and via Distance Learning.

DAWIA. Defense Acquisition Workforce Improvement Act. This is a standard curriculum that requires the DoD to establish and secure education, training, requirements and courses for civilian and military workforce.

(D)BCE. (Deputy) Base Civil Engineer. This position serves as the Deputy to the Base Civil Engineer at a DAF or Joint Base installation with responsibilities for all day-to-day support activities provided by the Squadron to the installation and tenant organizations.

DL. **Distance Learning**. DL is on the cutting edge of teaching media and takes advantage of delivery methods such as satellite, internet, and computer-based instruction to deliver course information, also called distance education. Specifically includes Video Tele-seminar , Video Tele-training , and Computer Based Training (CBT). Formal courses use this technology for a training wing or a contractor to develop for export to a field location (in place of resident training) for trainees to complete without the on-site support of the formal school instructor. Courses are offered by AFIT, AU, and Training Detachment.

DT. **Development Team**. The CE Career Field DT is comprised of civil engineer senior leaders and is led by the Deputy Director of Engineers (AF/A4C-2). The DT meets biannually and provides guidance on civilian development plans, provides advice/feedback on policy issues affecting the workforce, provides vectors to workforce members, and endorses candidates for CD. The DT's mission is to prepare future DAF Civil Engineering leaders to meet the challenges of shaping the DAF through appropriate training, education, and experience.

EIAP. **Environmental Impact Analysis Process**. The DAF procedures that guide environmental impact analyses both within the United States and abroad. The focus of the EIAP regulation is on environmental impact analysis under the authority of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. §§ 4321- 4347). The EIAP procedures are essential to achieve and maintain compliance with NEPA.

FA. **Functional Authority**. FAs are designated general officers or members of the Senior Executive Service (SES) serving as deputy chiefs of staff or assistant secretaries appointed by the Secretary of the Air Force to provide oversight and functional advisory services related to functional communities. The Assistant Deputy Chief of Staff for Logistics, Engineering and Force Protection (AF/A4-2) is the FA for DAF Civil Engineering.

FM. **Functional Manager**. Senior leaders, designated by the appropriate FA, who provide day-to-day management responsibility over specific functional communities at the Major Command (MAJCOM), FOA, direct reporting unit, primary supporting unit, or air reserve component level. While they should maintain an institutional focus regarding resource development and distribution, FMs are responsible for ensuring their teams are equipped, developed, and sustained to meet the functional community's mission as well as encourage force development opportunities to meet future needs of the total DAF mission. The FM for DAF CE is the Deputy Director of Engineers (AF/A4C-2).

GS. General Schedule. The General Schedule (GS) classification and pay system covers the majority of civilian white-collar Federal employees (about 1.5 million worldwide) in professional, technical, administrative, and clerical positions. GS classification standards, qualifications, pay structure, and related human resources policies (e.g., general staffing and pay administration policies) are administered by OPM on a government wide basis. Each agency classifies its GS positions and appoints and pays its GS employees filling those positions following statutory and OPM guidelines.

IDE. **Intermediate Development Education**. IDE programs are operational level programs that continue the development and education of mid-career civilians and continue to prepare them to take on increased leadership, managerial, and leadership roles. IDE programs include ACSC, Executive Leadership Development Program, Air Force Legislative Fellows Program, and others. Program eligibility requirements vary. Also see CD and Part I, Section C for a link to CD programs.

IDP. **Individual Development Plan**. A document used to record short- and long-range career goals, the specific competencies, knowledge, skills, and abilities necessary to meet current objectives, and training, education, and other professional development strategies used to develop the desired competencies. In conjunction with a performance assistance plan, the IDP assists in producing more effective civilian performance in present and future positions and is used for civilians below the executive level. A template is available in Part II, Section C.

ITP. Individual Training Plan. The individual training plan is specific to each 0020 in training and should be transferred between supervisors when/if the 0020 is reassigned.

KCP. Key Career Positions. Steppingstones for individuals to gain expertise that may qualify them to move from functional experts to functional leaders.

MAJCOM. **Major Command**. The level of command below Headquarters Air Force (HAF) and directly above Numbered Air Forces (NAF). The DAF is organized on a functional basis in the U.S. and a geographical basis overseas. The functional MAJCOMs are Air Combat Command, AETC, Air Force Global Strike Command, AFMC, Air Force Reserve Command (AFRC), Air Force Special Operations Command , Air Mobility Command , and Air National Guard (ANG). The geographic MAJCOMs are U.S. Air Forces in Europe and Air Forces Africa and Pacific Air Force.

MP. Master Plan. An installation-level umbrella plan encompassing all sub-plans required to ensure future investments in natural and built infrastructure meet goals and objectives for future development.

MDP. Master Development Plan. A comprehensive list of desired education, self-development, training, and typical assignments for each level of career path.

OC. Occupational Competencies. A set of competencies required of all personnel within a specific workforce category (a group of functions requiring similar work, i.e., contracting). They describe technical/functional skills, knowledge, abilities, behaviors, and other characteristics needed to successfully perform that function's mission. A competency identifies behaviors and other attributes and the knowledge, skills, and abilities that define successful job performance. Competencies are important because they are the stepping-stones for civilian development and for the achievement of personnel success and the mission of the DAF.

OPM. Office of Personnel Management. OPM serves as the chief human resources agency and personnel policy manager for the Federal Government. OPM provides human resources leadership and support to Federal agencies and helps the Federal workforce achieve their aspirations as they serve the American people. OPM directs human resources and employee management services, administers retirement benefits, manages healthcare and insurance programs, oversees merit-based and inclusive hiring into the civil service, and provides a secure employment process.

OPR. Office of Primary Responsibility. The primary office responsible for a given task.

OSD. Office of the Secretary of Defense. The principal staff element of the Secretary of Defense in the exercise of policy development, planning, resource management, fiscal, and program evaluation responsibilities. OSD includes the immediate offices of the Secretary and Deputy Secretary of Defense, Under Secretaries of Defense, Director of Defense Research and Engineering, Assistant Secretaries of Defense, General Counsel, Director of Operational Test and Evaluation, Assistants to the Secretary of Defense, Director of Administration and Management, and such other staff offices as the Secretary establishes to assist in carrying out assigned responsibilities.

PAQ. PALACE Acquire Program. The Professional Advancement, Leadership, Achievement, and Career Enhancement (PALACE) or PAQ Program is designed to attract men and women with management potential to careers as Federal employees with the DAF. This objective is accomplished by recruiting and selecting high-caliber candidates within two (2) years of graduating with an advanced degree and training them to become competent, effective, and productive employees. The DAF provides training and developmental opportunities necessary to gain knowledge, skills, and abilities predictive of successful performance, and provides promotional opportunities for PAQs who successfully complete required training and developmental assignments. PAQ authorizations are administratively controlled and managed by HAF Personnel Center Centrally Managed Program Office. For more information on the PAQ program, refer to AFI 36-130, *Civilian Career and Development Programs*.

PCIP. Premier College Internship Program. The DAF Premier College Internship Program is a 10-to-12-week summer program for current college and university sophomores and juniors. The student works shoulder to shoulder with DAF Civil Engineers on challenging and rewarding projects that contribute to the mission of the DAF. The goal of the PCIP is to convert these students into the PAQ program, upon graduation.

PME. Professional Military Education. Critical subset of developmental education that: 1) provides the nation with personnel skilled in the employment of air, space, and cyberspace power in the conduct of war, small scale contingencies, deterrence, peacetime operations, and national security; 2) provides DAF personnel with the skills and knowledge to make sound decisions in progressively more demanding leadership positions within the national security environment; and 3) develops strategic thinkers, planners, and warfighters. In addition, PME programs strengthen the ability and skills of DAF personnel to lead, manage, and supervise.

PMP. Project Management Professional. Project Management Professional is an internationally recognized professional designation offered by the Project Management Institute.

RC. Reserve Component. The Armed Forces of the United States Reserve Component consists of the Army National Guard of the United States, the Army Reserve, the Navy Reserve, the Marine Corps Reserve, the Air National Guard of the United States, the Air Force Reserve, and the Coast Guard Reserve.

SAF/IEI. The Deputy Assistant Secretary for Installations. In accordance with HADMD 1-18, SAF/IEI is responsible for all matters pertaining to the development of strategic planning for DAF installations. This includes the formal establishment of DAF strategic goals and objectives for installations. SAF/IEI is also responsible for Air Force Strategic Basing to include processes and analyses to support decisions relating to basing, base closures and realignments; caretaker and disposal of base closure property; force structure basing changes; installation and compatible planning and economic adjustment; community planning and impact assistance; planning to promote installation sustainment, security and operability; policy, oversight and interagency coordination and engagement for the DAF EIAP; multiple military service operations, encroachment management; and public-public/public private partnerships to provide efficient and effective operations and services for DAF installations. SAF/IEI interfaces with outside organizations on matters concerning DAF wide installations and strategic planning matters.

SDE. Senior Developmental Education. SDE programs are strategic level programs that provide for the deliberate development of senior civilian leaders. These programs provide a more strategic perspective that will prepare senior civilians to lead organizations and programs to achieve results in the Joint, inter-agency and multi-national environments. SDE programs include Defense Senior Leader Development Program, AWC, The Dwight D. Eisenhower School for National Security and Resource Strategy, and others. Program eligibility requirements vary. Also, see CD.

Sentinel Landscape. A defined area that surrounds a DoD facility representing an area of convergence between DoD and other federal lands where the coalition of federal agencies work together to protect the land from development, military readiness, and preserve natural resources.

SES. Senior Executive Service. The SES lead America's workforce. As the keystone of the Civil Service Reform Act of 1978, the SES was established to "...ensure that the executive management of the Government of the United States is responsive to the needs, policies, and goals of the Nation and otherwise is of the highest quality." These leaders possess well-honed executive skills and share a broad perspective on government and a public service commitment that is grounded in the Constitution. Members of the SES serve in the key positions just below the top Presidential appointees. SES members are the major link between these appointees and the rest of the Federal workforce. They operate and oversee nearly every government activity in approximately 75 Federal agencies. OPM manages the overall Federal executive personnel program, providing the day-to-day oversight and assistance to agencies as they develop, select, and manage their federal executives.

SME. Subject Matter Expert. A designated position that serves as the DAF's technical authority for a specific field that requires no technical supervision. A person does not become a SME without being in a designated SME position. The SME designation is critical for the non-supervisory GS-14 positions outside of HAF and their supervisors do not earn credit for technical supervision (e.g. AFCEC/CZT and AFCEC/COA).

SMS. Subject Matter Specialist. Subject Matter Specialists were a concept designed as feeder positions into the SME position. Typically, SMS would be MAJCOM level positions without overall technical authority for the entire DAF.

TA. Tuition Assistance. Financial assistance for tuition, laboratory, and other instructional fees for academic mission-related courses at accredited post-secondary academic institutions.

TCES. The Civil Engineer School. The Civil Engineer School is one of four schools within AFIT, located at Wright-Patterson AFB, OH. The Civil Engineer School provides professional continuing education to Civil Engineers. Course list is available at https://www.afit.edu/CE/.

Total Force. All collective DAF components (active duty, Reserve, Guard, and civilian elements).

SECTION A: GENERAL INFORMATION

1. Purpose. AF/A4C and our enterprise leaders throughout the Total Force are all committed to ensuring that our Community Planning professionals have the depth, breadth, knowledge and capabilities they need to successfully serve our CE Enterprise and our Air and Space Forces. This CFETP supports the objectives of the CE Human Capital Roadmap (https://usaf.dps.mil/sites/CEPortal1/CEStrategy/SitePages/HCR-StrategyPage.aspx). The Human Capital Roadmap emphasizes the importance of "cultivating workforce talent" through advanced education and training, talent management, and development of civilian workforce expertise.

1.1. Properly trained Community Planners are the foundation to successfully manage the limited physical resources at our DAF installations. The Under Secretary of Defense AT&L has directed the DoD to provide education and training for planning personnel and develop a method to report on planner competencies, defined as 32 hours of training biennially. This direction supports the DAF vision to remain the most technically proficient and best educated and trained DAF in the world. The Memorandum dated 28 May 2013 is available at https://usaf.dps.mil/teams/afcec-portal/CI/CIP/Planning/OSD%20Policy%20Memos/OSD%20Policy%20Memo%20Installation%20Master%20Planning%2028%20May%2013.pdf.

1.2. This CFETP provides a consolidated framework for managers, supervisors, and Community Planning professionals to plan, develop, manage, and conduct an effective and efficient professional development program. This Plan:

1.2.1. Identifies requirements and typical job duties for each phase of a Community Planner's career.

1.2.2. Provides occupational tasks and competencies to enable Community Planners, their supervisors, and mentors to jointly build a personalized career path to success to envision the force.

1.2.3. Communicates the career development opportunities available to Community Planners and offers recommendations for advancement in the profession of DAF planning to recruit and retain Community Planners.

1.2.4. Outlines the education and training available to Community Planners and provides references to training courses, training materials, and other useful career resources to develop Community Planners.

1.2.5. Provides information about mandated training reporting for Community Planners and acquisition coded positions to develop Community Planners.

1.2.6. Provides information about training available to installation senior leaders, mentors, and supervisors to develop Community Planners.

2. Use. This plan should be used by Community Planning supervisors at all levels to ensure comprehensive and cohesive training and development programs are available for each individual working as a Community Planner. Individuals should review career goals and progression with supervisors and mentors during scheduled performance feedback and mentoring sessions.

2.1. Supervisors and work center managers should ensure their training programs complement the CFETP competency and proficiency level requirements. On-the-job training, resident training, and contract training or exportable courses can enhance identified requirements.

2.2. Everyone should aim to complete the applicable competency and proficiency level requirements specified in this plan. The list of courses in Part 2 Section E is used as a reference to support and enhance training and development requirements. Additional learning opportunities are outlined in the competency assessment workbooks.

3. Coordination and Approval. The Civil Engineer Civilian Career Field Manager (CFM) is the approval authority for all CFETPs. The HAF/A4C Strategic Installation Master Planner will initiate an annual review of this document to ensure currency and accuracy. Senior leaders within the Civil Engineer community (AFCEC/CIP and AF/A4CP) will identify and coordinate on the career field training and development requirements.

SECTION B: COMMUNITY PLANNER COMPETENCY

4. Competencies

4.1. The DAF defines competencies as a combination of knowledge, skills, abilities and other characteristics that manifest in observable and measurable patterns of behavior required for mission success. The CFT has developed competencies for the Community Planner needed for success on the job. This effort was accomplished by identifying and integrating the community planner occupational competencies and leveraging the DAF's foundational competencies in a manner that provides all Community Planners with transparent and unbiased pathways towards their own successful development.

4.2. Competency models, used within the context of total force development, enable the DAF to maintain or modify its assignment, classification, learning and development, recruitment, retention, and other talent management policies, strategies, operations, tactics, procedures, and techniques to meet mission requirements.

4.3. The foundational competencies are those competencies valued by the DAF and are universally applicable to all Community Planners. These competencies are the core of Community Planners development and enable Planners with tools, pathways, and capabilities to improve their performance in any job, specialty, or situation. The foundational competencies are grouped into different categories of Developing Self, Developing Others, Developing Ideas, and Developing Organization (**Figure 1**). Community Planners can open MyVector (accessible via the DAF Portal) to complete a self-assessment, which offers an opportunity to evaluate themselves on the Community Planners' foundational competencies or a 360-degree assessment, where subordinates, peers, and leaders can also provide feedback. The assessment tools will provide Planners with immediate feedback on personal strengths and areas for improvement. Additionally, MyVector provides a personal improvement plan with targeted resources (videos, reading content, developmental opportunities) for continued self-development. Occupational competencies are a set of competencies required of all Community Planners within a specific workforce category. These competencies provide a framework that describes the knowledge, skills, abilities, and other characteristics needed to perform that function's mission successfully.

FIGURE 1 THE AIR FORCE FOUNDATIONAL COMPETENCY MODEL

4.4. Occupational Competency Model. An occupational series competency can be viewed in a competency model, which is an organized collection of competencies pertinent to the career field. The occupational competency model in **Table 1** provides a framework to effectively assess, maintain, and monitor the competencies required for mission success for Community Planners. The occupational competency modeling process follows a distinct process with continued involvement from the career field and allows Community Planners to see how their task lists, on-the-job training, formal courses, and other training, education, and experiences are aligned to the career field's strategic objectives. The competency model focuses on integrating not just the technical components, but also the leadership, resource management, asset management, managerial, social and interpersonal competencies required for Community Planners to succeed in the field.

TABLE 1 COMMUNITY PLANNING COMPETENCIES

Competency	Sub-Competency	Description
TECHNICAL	Installation Development Planning	Application of the urban planning concepts, principles, theories, and methods necessary to identify community needs and continually evaluate the viability of existing and future infrastructure to maintain resilient installations.
	Compatible Use Planning	Application of planning concepts, principles, theories, and methods to ensure compatible development to manage encroachment through proactive engagement with local, regional, state and federal agencies.
	Asset Management	Application of concepts, principles, theories, methods, and tools related to preparing financial analysis and cost estimates for asset management projects that include Facility Space Planning.

TECHNICAL (cont.)	General Skills and Abilities	Application of concepts, principles, theories, and methods, and use of tools required to observe, examine, measure, analyze, map, and describe physical and cultural features and phenomena.
	Cross Training	Application of concepts, principles, theories, and methods covering basic understanding of programming, environmental, real property/partnerships, and GeoBase processes.
	Airfield Safety	Application of concepts, principles, theories, and methods of preparing airfield waivers and conducting cost-benefit analysis to reduce airfield safety risks.
	Oral & Written Communication	Ability to communicate clearly in writing and orally. Mastery of drafting and delivering presentations and addressing senior leaders.
LEADERSHIP	Leading People	Ability to lead, inspire, distribute, direct work and hold accountable, reward high performers, mentor and develop employees.
	Business Acumen	Ability to manage financial resources, leverage technology, understand personnel systems, and understand contracting and acquisition processes.
	Coalition/Team Building	Ability to develop and lead teams to achieve near, mid, and long-term results, which benefit all stakeholders and the organization.
	Organizational Leadership	Ability to develop or align a unit's mission & vision to parent organization. Develop goals and objectives for unit operations. Establish unit milestones and budget to conduct unit operations.
RESOURCE MANAGEMENT	Information Technology (IT) Systems	Ability to utilize IT tools to improve information flow and communication across multiple domains and maintain authoritative databases to drive data driven decisions.
ASSET MANAGEMENT	Planning	Ability to properly identify requirements and develop plans to achieve the CE mission.
	Requirements and Optimization (R/O)	Ability to work with R/O on the Activity Management Plan.
MANAGERIAL	Accomplish the Mission	Ability to supervise Community Planners to complete tasks that accomplish the mission by providing guidance, encouragement, and the right tools/contacts.
	Infuse Passion	Ability to convey strong passion toward assignments by encouraging Community Planners to proudly own the process and outcome.
	Management Soft Skills	Ability to conduct fair and honest appraisals, document achievements, encourage retention, and offer emotional intelligence.
COMMUNICATION & COLLABORATION COMMUNITION	Conduct Briefings	Ability to comfortably present the facts in a concise manner and handle questions from leadership in a professional and respectful manner.

	Work with Other Units and Outside Organizations	Ability to build relationships, handle unusual requests, and develop solutions.
	Elevator Speech	Ability to present ideas to leadership in a one-by-one environment given limited time and strong need to clearly communicate the point of the conversation.

4.5. Occupational Competency Rubric. After a competency model is developed, a team of subject matter experts begin to build a competency rubric, which consists of the competency, a description of the competency, proficiency levels, and measurable and observable behaviors. The competency rubrics will help Community Planners learn what behaviors are aligned to the occupation series strategic direction, the professional developmental expectations, and the criteria for success. **Table 2** provides an example of a competency rubric for the Community Planner career field.

TABLE 2 COMPETENCY RUBRIC FOR COMMUNIY PLANNERS

COMPETENCY –	***TECHNICAL***
SUB-COMPETENCY –	**Installation Development Planning**
DESCRIPTION –	Urban planning concepts, principles, theories, and methods necessary to identify community needs and continually evaluate the viability of existing and future infrastructure to maintain resilient installations.
PROFICIENCY LEVEL	**OBSERVABLE BEHAVIORS**
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Transportation and Urban Planning Concepts in the Military Context ▪ Local DAF organization(s) and installation mission partners ▪ Airfield Planning ▪ Environmental Planning Concepts ▪ EIAP/NEPA Process ▪ Installation Safety Standards ▪ Compatible Use Planning in the Military Context ▪ Encroachment Management ▪ Explosive Safety Planning ▪ The Planning, Programming, Budgeting, and Execution (PPBE) Model ▪ Rules, Regulations, and DAF Policies **Understand and effectively utilize…** ▪ Comprehensive Planning Platform (CPP) ▪ Mission Compatibility Analysis Tool (MCAT) ▪ Microsoft Office Suite, including MS Teams, OneDrive, and SharePoint ▪ Spatial Analysis Tools ▪ Data Analysis and Visualization Tools ▪ Artificial Intelligence (AI) Tools **Refine skills in…** ▪ Program Management ▪ Problem Solving ▪ Systems Thinking ▪ Communication and Collaboration ▪ Coalition Building/Stakeholder Engagement

	▪ Negotiation and Conflict Management
MID-CAREER	**Perform as a Technical Advisor and advise early career members on…** ▪ Transportation and Urban Planning Concepts in the Military Context ▪ Local DAF organization(s) and installation mission partners ▪ Airfield Planning ▪ Environmental Planning Concepts ▪ EIAP/NEPA Process ▪ Installation Safety Standards ▪ Compatible Use Planning in the Military Context ▪ Encroachment Management ▪ Explosive Safety Planning ▪ PPBE Model ▪ Rules, Regulations, and DAF Policies **Serve as a Leader in and advise/lead early career members on…** ▪ Program Management at the Organizational Level ▪ Complex Problem Solving ▪ Systems Thinking ▪ Communication and Collaboration ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
LATE CAREER	**Serve as an Enterprise Expert in and advise members on…** ▪ Transportation and Urban Planning Concepts in the Military Context ▪ Local DAF organization(s) and installation mission partners ▪ Airfield Planning ▪ Environmental Planning Concepts ▪ EIAP/NEPA Process ▪ Installation Safety Standards ▪ Compatible Use Planning in the Military Context ▪ Encroachment Management ▪ Explosive Safety Planning ▪ PPBE Model ▪ Rules, Regulations, and DAF Policies **Serve as an impeccable example of…** ▪ Program Management at the Enterprise Level ▪ Complex, High-Consequence Problem Solving ▪ Enterprise Level Systems Thinking ▪ Communication and Collaboration ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management ▪ DAF Enterprise Culture **Have a firm understanding of and ability to effectively communicate…** ▪ DoD Priorities ▪ Enterprise Planning Concerns ▪ DAF Enterprise Structure and Culture

4.6. To better understand how to read and utilize the competency rubric, a breakdown of each component is explained below in **Table 3**.

TABLE 3 COMPETENCY AND PROFICIENCY BREAKDOWN

COMPETENCY –	The **COMPETENCY** section states the competency group.
SUB-COMPETENCY –	The **SUB-COMPETENCY** section states the narrower category that forms part of the competency group.
DESCRIPTION –	The **DESCRIPTION** section provides a statement with details about the sub-competency, enabling career field members to better understand how the sub-competency relates to the DAF.

PROFICIENCY LEVEL	INDICATORS
EARLY CAREER Sustained application of competency over time	The proficiency levels are broken into three parts: early career, mid-career and late career. Under each proficiency level are predetermined criteria selected by a group of Community Planner stakeholders. The criteria provide the basis to develop observable behaviors. These criteria provide concrete parameters for the behaviors, which are consistent but progressive in nature, as a member moves up the scale from early to late career. Some of the criteria (e.g., depth of knowledge, consistency of application/ complexity, and thinking challenge) allow an individual to become an expert through the experience gained in a particular job over time. For example, the person can quickly or slowly move up the different levels of proficiency in the same position at the flight; they move quickly because they are exposed to an abundance of situations. While other criteria (e.g., scope, impact, and reach of influence) require more of a hierarchical approach to gain the experience needed to progress through the competency levels. Moving through the proficiency levels may be difficult to do at certain jobs. For example, if scope at the expert level requires job integration with the DAF level, then the individual may have to be in a position where they can gain that experience (i.e., at HQ, Wing, or an organization with far-reaching capabilities).
MID-CAREER Sustained application of competency in a variety of situations	
LATE CAREER Sustained application of competency in complex situations	

4.7. Community Planners can use the rubric to learn what behaviors are needed for their current job but also to review other position requirements to plan a flight path for the future. Additionally, Community Planners can be self-empowered concerning their own professional development by clearly knowing the behaviors needed for job success. The model offers career field members clear, objective, and observable behaviors they should strive to exhibit. Instructional systems specialists can use the model to gain a deeper understanding of what defines success within their career field or organization and begin to build a flight path towards attaining those successful behaviors through self-development.

4.8. A competency map can be overlaid against the current proficiency levels an individual has attained to build a personalized competency map. This personalized map, constructed by the supervisor, will allow members to view their status, strengths, and shortfalls against the position they currently fill. The personalized competency map can be used as a mentorship or individual development tool as Community Planners seek to balance between current mission needs and future desires. **Table 4** provides an example of a competency map for a position within the community planner occupational series where a Community Planner should have the required sub-competency at the appropriate proficiency level. The annotated numbers in the table correlate to the proficiency level within the competency rubric: Early Career (1), Mid-Career (2), Late Career (3).

4.9. Table 4 is an example of an individualized competency map for a Community Planner. In this example, a working group of Community Planners helped to identify the general level of competency proficiency for 0020 series broken down into Early Career (1), Mid-Career (2), and Late Career (3). The employee and supervisor should discuss where the employee may need to improve their knowledge, skills and abilities related to a competency and how to obtain that experience. The competency map will be different for each employee depending on their individual Position Description (PD). Employees should use this table with their supervisor as a training roadmap.

TABLE 4 EXAMPLE COMPETENCY MAP (COMMUNITY PLANNER)

Competency – TECHNICAL	Proficiency Level
Installation Development Planning	1
Compatible Use Planning	1
Asset Management	2
General Skills and Ability	1
Cross Training	1 and 2
Airfield/Airspace Safety	1 and 2
Oral and Written Communication	1
Competency – LEADERSHIP	**Proficiency Level**
Leading People	2
Business Acumen	2
Coalition/Team Building	1
Organizational Leadership	3
Competency – RESOURCE Management	**Proficiency Level**
IT Systems	1 (GIS/CPP) and 2 (AI)
Competency – ASSET MANAGEMENT	**Proficiency Level**
Planning	2 and 3
Requirements and Optimization	1/2
Competency – MANAGERIAL	**Proficiency Level**
Accomplish the Mission	2
Infuse Passion	3
Management Soft Skills	2
Competency –COMMUNICATION & COLLABORATION	**Proficiency Level**
Conduct Briefings	1, 2, and 3
Work with Other Units and Outside Organizations	2 and 3
Elevator Speech	2

4.10. Competency models can also serve as a lynchpin across many existing facets of personnel development. The information within the competency models allows Community Planners to discover how their training, education, and experiences are aligned to the career field's strategic objectives. **Tables 5A-5F** details the Community Planner Competencies.

TABLE 5A COMMUNITY PLANNER TECHNICAL COMPETENCIES

COMPETENCY –	*TECHNICAL*
SUB-COMPETENCY –	**Installation Development Planning**
DESCRIPTION –	Urban planning concepts, principles, theories, and methods necessary to identify community needs and continually evaluate the viability of existing and future infrastructure to maintain resilient installations.
PROFICIENCY LEVEL	**OBSERVABLE BEHAVIORS**
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Transportation and Urban Planning Concepts in the Military Context ▪ Local DAF organization(s) and installation mission partners ▪ Airfield Planning ▪ Environmental Planning Concepts ▪ EIAP/NEPA Process ▪ Installation Safety Standards ▪ Compatible Use Planning in the Military Context ▪ Encroachment Management ▪ Explosive Safety Planning ▪ PPBE Model ▪ Rules, Regulations, and DAF Policies **Understand and effectively utilize…** ▪ CPP ▪ MCAT ▪ Microsoft Office Suite, including MS Teams, OneDrive, and SharePoint ▪ Spatial Analysis Tools ▪ Data Analysis and Visualization Tools ▪ AI Tools **Refine skills in…** ▪ Program Management ▪ Problem Solving ▪ Systems Thinking ▪ Communication and Collaboration ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
MID-CAREER	**Perform as a Technical Advisor and guide early career members on…** ▪ Transportation and Urban Planning Concepts in the Military Context ▪ Local DAF organization(s) and installation mission partners ▪ Airfield Planning at local and MAJCOM level ▪ Environmental Planning Concepts at local and MAJCOM level ▪ EIAP/NEPA Process at local and MAJCOM level ▪ Installation Safety Standards ▪ Compatible Use Planning in the Military Context ▪ Encroachment Management at local and MAJCOM level

	▪ Explosive Safety Planning at local and MAJCOM level ▪ PPBE Model at local and MAJCOM level ▪ Rules, Regulations, and DAF Policies at local and MAJCOM level **Serve as a Leader in and advise/lead early career members on…** ▪ Program Management at the Organizational Level ▪ Complex Problem Solving ▪ Systems Thinking ▪ Communication and Collaboration ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
LATE CAREER	**Serve as an Enterprise Expert in and advise members on…** ▪ Transportation and Urban Planning Concepts in the Military Context ▪ Local DAF organization(s) and installation mission partners ▪ Airfield Planning ▪ Environmental Planning Concepts ▪ EIAP/NEPA Process ▪ Installation Safety Standards ▪ Compatible Use Planning in the Military Context ▪ Encroachment Management ▪ Explosive Safety Planning ▪ PPBE Model ▪ Rules, Regulations, and DAF Policies **Serve as an impeccable example of…** ▪ Program Management at the Enterprise Level ▪ Complex, High-Consequence Problem Solving ▪ Enterprise Level Systems Thinking ▪ Communication and Collaboration ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management ▪ DAF Enterprise Culture **Have a firm understanding of and ability to effectively communicate…** ▪ DoD Priorities ▪ Enterprise Planning Concerns ▪ DAF Enterprise Structure and Culture

SUB-COMPETENCY –	**Compatible Use Planning**
DESCRIPTION –	Application of planning concepts, principles, theories, and methods to ensure compatible development to manage encroachment through proactive engagement with local, regional, state and federal agencies.
PROFICIENCY LEVEL	**OBSERVABLE BEHAVIORS**

EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Mission Sustainment Program and associated tools ▪ AICUZ Program and Noise Studies ▪ Compatible Use Planning (CUP) and associated studies ▪ Coordination and communication with local government, agencies, and non-governmental organizations for community partnerships and encroachment management ▪ Local government bodies and their role(s) in military planning ▪ Explosive Safety site planning and considerations ▪ Military Range site planning and considerations ▪ Frequency site planning and considerations **Understand and effectively utilize…** ▪ Readiness & Environmental Protection Integration (REPI) Grant Opportunities ▪ Partner in Sentinel Program with other agencies/private owners ▪ MCAT Tool **Refine skills in…** ▪ Program Management ▪ Problem Solving ▪ Systems Thinking ▪ Communication and Collaboration through controversy and resistance ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
MID-CAREER	**Perform as a Technical Advisor and guide early career members on…** ▪ Mission Sustainment, AICUZ, and Compatible Use concerns and considerations at local and MAJCOM level ▪ State and Regional government bodies, agencies, and non-governmental organizations with a role(s) in military planning ▪ Explosive Safety, Military Range, and Frequency planning concerns and considerations at the local and MAJCOM level ▪ Use of MCAT for local and local and MAJCOM level mission concerns **Serve as a Leader in and advise/lead early career members on…** ▪ Program Management at the Organizational Level ▪ Complex Problem Solving ▪ Systems Thinking ▪ Communication and Collaboration through controversy and resistance ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
LATE CAREER	**Serve as an Enterprise Expert in and advise members on…** ▪ Mission Sustainment, AICUZ, and Compatible Use concerns and considerations at the Enterprise level ▪ State, Regional, and National government bodies, agencies, and non-governmental organizations with a role(s) in military planning ▪ Explosive Safety, Military Range, and Frequency planning concerns and considerations at the Enterprise level ▪ Participating and Support for the Enterprise Level Mission Sustainment Working Group **Serve as an Organizational Leader in and advise/lead mid-career members**

	on… ▪ DoD Priorities ▪ Enterprise Mission Sustainment, AICUZ, and CUP Concerns ▪ DAF Enterprise Structure and Culture

SUB-COMPETENCY –	**Asset Management**
DESCRIPTION –	Application of concepts, principles, theories, methods, and tools related to the preparation of financial analysis and cost estimates for asset management projects that include Facility Space Planning.

PROFICIENCY LEVEL	OBSERVABLE BEHAVIORS
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Facility Space Planning ▪ Financial Management ▪ Contract Management ▪ PPBE Processes ▪ Cost/Benefit and SWOT Analysis ▪ DAF Asset Management Principles and Activity Management Processes in Master Planning **Understand and effectively utilize or support…** ▪ Real Property Officer roles, responsibilities, and processes ▪ GeoBase roles, responsibilities, and processes ▪ Requirements and Optimization (R/O) roles, responsibilities, and processes ▪ Programming roles, responsibilities, and processes ▪ Environmental Planning Function roles, responsibilities, and processes ▪ Sustainment Management Systems ▪ Available DAF Data Sources to inform Investment Decisions **Refine skills in…** ▪ Program Management ▪ Problem Solving ▪ Systems Thinking ▪ Communication and Collaboration through controversy and resistance ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
MID-CAREER	**Perform as a Technical Advisor and guide early career members on…** ▪ Facility Space Planning Concerns and Considerations at local and MAJCOM Level ▪ PPBE Processes, to include applications of Financial and Contract Management at local and MAJCOM Level ▪ Cost/Benefit, SWOT, and other Analysis Tools as well as available Data Sources to inform data driven investment decisions at local and MAJCOM Level ▪ Implementation and execution of DAF Asset Management Principles and Activity Management at local and MAJCOM Level ▪ Interconnectivity of sections and elements within Civil Engineer Squadron **Serve as a Leader in and advise/lead early career members on…** ▪ Program Management at the Organizational Level ▪ Complex Problem Solving

	▪ Systems Thinking ▪ Communication and Collaboration through controversy and resistance ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
LATE CAREER	**Serve as an Enterprise Expert in and advise members in…** ▪ Enterprise Level Asset Management Principles and execution ▪ Interconnectivity of organizations within and external to the DAF with a role in DAF Asset Management **Serve as an Organizational Leader in and advise/lead mid-career members on…** ▪ DoD Priorities ▪ Enterprise Asset Management Concerns and Considerations in Master Planning ▪ DAF Enterprise Structure and Culture

SUB-COMPETENCY –	**General Skills and Abilities**
DESCRIPTION –	Application of concepts, principles, theories, and methods, and use of tools required to observe, examine, measure, analyze, map, and describe physical and cultural features and phenomena.

PROFICIENCY LEVEL	OBSERVABLE BEHAVIORS
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Risk Communication ▪ Team Building ▪ Data Visualization ▪ Data collection, investigation, and surveys ▪ Establishing internal and programmatic measures of resilience **Understand and effectively utilize…** ▪ Geographic Information Systems (GIS) Tools like AFGIMS ▪ Computer Aided Design (CAD) ▪ Microsoft Office Suite, MS Teams, SharePoint, and like tools ▪ AI Tools **Refine skills in…** ▪ Program Management ▪ Innovation to increase the efficiency, effectiveness, and actionability of planning recommendations to military leaders ▪ Accountability for self and planning recommendations ▪ Time Management ▪ Problem Solving ▪ Systems Thinking ▪ Communication and Collaboration through controversy and resistance ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
MID-CAREER	**Perform as a Technical Advisor and guide early career members on…** ▪ Risk Communication ▪ Team Building at the Organizational Level ▪ Data collection, investigation, and surveys at scale ▪ Establishing internal and external measures of resilience at an Organizational Level ▪ Data Visualization Tools and Resources

	Serve as a Leader in and advise/lead early career members on… ▪ Program Management at the Organizational Level ▪ Uphold standards of Integrity and Honesty ▪ Maintaining Accountability across Teams ▪ Time Management ▪ Public Service Ethos and Motivation ▪ Establishing and promoting team vision ▪ Complex Decision-Making ▪ Complex Problem Solving ▪ Adaptable and Flexible Systems Thinking ▪ Communication and Collaboration through controversy and resistance ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
LATE CAREER	**Serve as an Enterprise Expert in and advise members on…** ▪ Risk Communication at the Enterprise Level ▪ Team Building at the Enterprise Level ▪ Data collection, investigation, and surveys at scale ▪ Establishing Enterprise Level Resilience **Serve as an Organizational Leader in and advise/lead mid-career members on…** ▪ DoD Priorities ▪ Enterprise Level Planning Concerns ▪ DAF Enterprise Structure and Culture ▪ Program Management at the Enterprise Level ▪ Solidifying a Culture of Integrity and Honesty ▪ Accountability at the Enterprise Level ▪ Creating a Culture motivated around the Public Service Ethos ▪ Guiding members on establishing and promoting team vision ▪ Complex Decision-Making ▪ Complex Problem Solving ▪ Adaptable and Flexible Systems Thinking ▪ Communication and Collaboration through controversy and resistance ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
SUB-COMPETENCY –	**Cross Training**
DESCRIPTION –	Application of concepts, principles, theories, and methods covering basic understanding of programming, environmental, real property/ partnerships, and Geobase processes.
PROFICIENCY LEVEL	**OBSERVABLE BEHAVIORS**
EARLY CAREER	**Develop an understanding of…** ▪ Airfield Management roles, responsibilities, and processes ▪ R/O roles, responsibilities, and processes ▪ Real Property Officer roles, responsibilities, and processes ▪ GeoBase roles, responsibilities, and processes ▪ R/O roles, responsibilities, and processes ▪ Programming roles, responsibilities, and processes ▪ Environmental Planning Function roles, responsibilities, and processes ▪ Engineering roles, responsibilities, and processes ▪ DAF Loans, Leasing, Privatized Housing Agreements, and other Real Property Instruments as applicable

	Refine skills in… ▪ Communication and Collaboration ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
MID-CAREER	**Perform as a Technical Advisor and guide early career members on…** ▪ Interconnectivity of sections and elements within Civil Engineer Squadron ▪ Leading Programming, Environmental, or Real Property discussion in the context of Master Planning ▪ Support Agreements, including Intergovernmental, host-tenant, and Memorandums of Agreement (MOA) /Memorandums of Understanding **Serve as a Leader in and advise/lead early career members on…** ▪ Program Management at the Organizational Level ▪ Maintain Culture of Honestly and Integrity with experts, peers, and customers ▪ Complex Problem Solving ▪ Systems Thinking ▪ Communication and Collaboration through controversy and resistance ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
LATE CAREER	**Serve as an Enterprise Expert in and advise members on…** ▪ Coalition Building/Stakeholder Engagement ▪ Creating Culture of Integration and Communication amongst DAF Stakeholders ▪ Roles, Responsibilities, and Junction Points between DAF Stakeholders in the Master Planning Process **Serve as an Organizational Leader in and advise/lead mid-career members on…** ▪ DoD Priorities ▪ Enterprise Planning Concerns ▪ DAF Enterprise Structure and Culture

SUB-COMPETENCY –	**Airfield/ Airspace Safety**
DESCRIPTION –	Application of concepts, principles, theories, and methods of preparing airfield waivers and conducting cost-benefit analysis to reduce airfield safety risks.

PROFICIENCY LEVEL	OBSERVABLE BEHAVIORS
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Airfield, Air Space, and Launch Site Planning ▪ Temporary, Construction, and Permanent Airfield Waiver Process and Execution IAW UFC 3-260-01 ▪ Airfield Waiver Review Board annual review process and briefings ▪ Cost/Benefit Analysis for addressing airfield safety concerns ▪ Risk Assessment and Mitigation Analysis ▪ Risk Communication ▪ Mission Sustainment Program and associated tools ▪ AICUZ Program and associated Studies ▪ CUP and associated studies ▪ Explosive Safety Site Planning

	Understand and effectively utilize… ▪ GIS Tools like AFGIMS ▪ CAD ▪ MCAT ▪ Microsoft Office Suite, MS Teams, SharePoint, and like tools ▪ AI Tools **Refine skills in…** ▪ Program Management ▪ Accountability for self and planning recommendations ▪ Problem Solving ▪ Systems Thinking ▪ Communication and Collaboration ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
MID-CAREER	**Perform as a Technical Advisor and guide early career members on…** ▪ Improving the Airfield Waiver Process and Execution ▪ Advising leadership in addressing Airfield and Launch Safety concerns ▪ Cost-Benefit Analysis methods with an emphasis on Airfield Safety **Serve as a Leader in and advise/lead early career members on…** ▪ Program Management at the Organizational Level ▪ Complex Problem Solving ▪ Systems Thinking ▪ Communication and Collaboration through controversy and resistance ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
LATE CAREER	**Serve as an Enterprise Expert in and advise members on…** ▪ Enterprise Level Airfield, Air Space, and Launch Site Planning Concerns at Enterprise Level ▪ Strategizing on Policies to reduce Airfield and Launch Site Safety concerns **Serve as an Organizational Leader in and advise/lead mid-career members on…** ▪ DoD Priorities ▪ Enterprise Level Strategic Thinking ▪ DAF Enterprise Structure and Culture

SUB-COMPETENCY –	**Oral & Written Communication**
DESCRIPTION –	Ability to communicate clearly in writing and orally. Mastery of drafting and delivering presentations and addressing senior leaders.

PROFICIENCY LEVEL	OBSERVABLE BEHAVIORS
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Clear and convincing oral presentations ▪ Clear, concise, organized, and convincing written arguments ▪ Ability to articulate concerns and decision points (written and oral) in a manner appropriate to the decision-maker rank ▪ Process improvements in techniques for briefing leadership, supporting agencies, and the public ▪ Superior public speaking skills

	Understand and effectively utilize… ▪ Data Visualization Tools ▪ Microsoft Office Suite, MS Teams, SharePoint, and like tools ▪ AI Tools **Refine skills in…** ▪ Integrity, behaving in an honest, fair, and ethical manner ▪ Public Service ▪ Active Listening ▪ Communication and Collaboration ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
MID-CAREER	**Perform as a Technical Advisor and guide early career members on…** ▪ Effective written and verbal communication skills within the military context ▪ Communication Tools available **Serve as a Leader in and advise/lead early career members on…** ▪ Encouraging others to have integrity, behaving in an honest, fair, and ethical manner ▪ Encouraging others to show commitment to Public Service ▪ Active Listening Skills ▪ Demonstrating consistency in words and actions ▪ Communication and Collaboration ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
LATE CAREER	**Serve as an Enterprise Expert in and advise members on…** ▪ Superior written and verbal communication skills in the Military Context ▪ Assessing personal and team strengths and weaknesses ▪ Pursuing development opportunities based on identified weaknesses ▪ Aligning Organizational Objectives and practices with public interest to ensure actions meet public need ▪ Modeling high standard of ethics **Serve as an Organizational Leader in and advise/lead mid-career members on…** ▪ DoD Priorities ▪ Enterprise Level Strategic Thinking ▪ DAF Enterprise Structure and Culture

TABLE 5B COMMUNITY PLANNER LEADERSHIP COMPETENCIES

COMPETENCY –	***LEADERSHIP***
SUB-COMPETENCY –	**Leading People**
DESCRIPTION –	Ability to lead, inspire, distribute, direct work and hold accountable, reward high performers, and mentor and develop employees.
PROFICIENCY LEVEL	**OBSERVABLE BEHAVIORS**

EARLY CAREER	**Develop an understanding of and successfully execute, apply or work to…** ▪ Inspire team members to develop ownership of programs/tasks ▪ Distribute team member workload to support professional growth and development appropriate to your role ▪ Direct team members to accomplish tasks appropriate for your role ▪ Uphold standards of accountability for team members appropriate for your role ▪ Perform as a working supervisor that takes on a larger share of accountability from employees while still maintaining personal planning competencies ▪ Work with supervisors to craft award nominations to reward high performers ▪ Introduce this publication to offer training opportunities **Refine skills in…** ▪ Maintaining Accountability for self and team members ▪ Communication and Collaboration ▪ Team Building ▪ Negotiation and Conflict Management
MID-CAREER	**Serve as a Leader in and advise/lead early career members on how to…** ▪ Encourage team members to develop ownership of programs/tasks ▪ Strategize with team members to understand their next steps without supervision ▪ Communicate clear milestones and deadlines ▪ Distribute team member workload based on established expectations ▪ Ensure employees are exposed to a broad range of planning tasks ▪ Direct team members to accomplish tasks in an efficient manner ▪ Provide positive feedback to high-performing team members ▪ Investigate reward(s)/award(s) for exceptional performance ▪ Engage with supervisory peers for collaborative problem solving across teams ▪ Research training opportunities to facilitate team success ▪ Advocate for training, funding, and time from unit leadership
LATE CAREER	**Serve as a Strategic Leader in and advise/lead early career members on how to…** ▪ Develop high-performing cross-functional teams ▪ Identify high potential employees for future leadership opportunities ▪ Mentor high performing and low performing team members to success ▪ Guide tasks to appropriate employee and suggest options to accomplish the task with precision ▪ Distribute tasks with an eye to create a learning opportunity ▪ Direct employees to plan for future tasks ▪ Train team members to anticipate and initiate tasks before assigned ▪ Maintain an achievement record for all employees to help plan for future award nominations

SUB-COMPETENCY –	**Business Acumen**
DESCRIPTION –	Ability to manage financial resources, leverage technology, understand personnel systems, and understand contracting and acquisition processes.
PROFICIENCY LEVEL	**OBSERVABLE BEHAVIORS**

EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Basic understanding of financial concepts, such as budgeting and cost analysis ▪ Scope of Work (SOW) development, budgeting, and contractor hiring options (See Contracting) ▪ Military Interdepartmental Purchase Request(s) and modifications ▪ Military contracting principles ▪ Federal Acquisition Regulation compliance ▪ Principles of contracting and acquisition **Understand and effectively utilize…** ▪ Financial planning documents with assistance from assigned budget/resource specialists ▪ IT systems and software options (see Asset Management – IT systems for more details) ▪ Human resources applications to log timecard and training hours, participate in mandatory training, and update global personnel databases **Refine skills in…** ▪ Financial Readiness ▪ Problem Solving ▪ Cost/Benefit Analysis ▪ Communication and Collaboration ▪ Negotiation and Conflict Management
MID-CAREER	**Perform as a Technical Advisor and guide early career members in…** ▪ Understanding organizational financial processes through monitoring expenditures ▪ Understanding Cost/Benefit thinking inform priorities ▪ Remaining up to date on technological developments ▪ Effective use of personnel systems to achieve results ▪ Negotiating, with assistance, contractor work scopes and budgets ▪ Reviewing contractor invoices, preparing Independent Government Cost Estimates for professional planning services ▪ Engaging with USACE and NAVFAC to understand the contracting process, roles of the Contracting Officer, and the role of the Contracting Officer Representative **Serve as a Leader in and advise/lead early career members on…** ▪ Financial Readiness at the Organizational Level ▪ Complex Problem Solving at Scale ▪ Cost/Benefit Analysis and Informed Prioritization ▪ Communication and Collaboration ▪ Negotiation and Conflict Management
LATE CAREER	**Serve as an Enterprise Expert in and advise members in…** ▪ Active participation in Enterprise Level Financial Planning discussions ▪ Using available technology and personnel systems ▪ Leading efforts to develop SOWs and other necessary documents for contract solicitation **Have a firm understanding of and ability to effectively communicate…** ▪ Opportunities for contracting process improvements ▪ DAF Enterprise Level contracting issues and corporate contract vehicles

SUB-COMPETENCY –	Coalition/Team Building
DESCRIPTION –	Ability to develop and lead teams to achieve near, mid, and long-term results, which benefit all stakeholders and the organization.

PROFICIENCY LEVEL	OBSERVABLE BEHAVIORS
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work to…** ▪ Network and build coalitions ▪ Collaborate across boundaries to build strategic relationships to achieve a common goal ▪ Participate in team projects and contribute to a positive team environment ▪ Build relationships with colleagues and stakeholders ▪ Support senior planners in building coalitions and teams ▪ Respect the opinions and contributions of others ▪ Offer assistance to colleagues when needed ▪ Communicate effectively with team members and stakeholders **Refine skills in…** ▪ Identifying internal and external political factors influencing planning outcomes ▪ Perceiving organizational and political reality and develop recommendations accordingly ▪ Maintaining culture of dignity, courtesy, and respect
MID-CAREER	**Perform as a Technical Advisor and guide early career members in…** ▪ Strengthening built network and alliance ▪ Effectively collaborating across boundaries to build strategic relationships to achieve a common goal ▪ Consensus building through mutual relationships of give and take built on foundation of trust and cooperation ▪ Coordinate responses, strategic messaging, and directives with DAF agencies as appropriate **Serve as a Leader in and advise/lead early career members on…** ▪ Volunteering or participating in production, generation, and refinement of award packages ▪ Acting in a manner that encourages others based on their strengths ▪ Portraying qualities of commitment, confidence, responsibility, dependability, honesty and ethics
LATE CAREER	**Serve as an Enterprise Expert in and advise members by…** ▪ Interacting and advising commanders, senior leaders, mission partners, and other stakeholders on project information as required ▪ Acting in a manner that encourages others based on their strengths ▪ Portraying qualities of commitment, confidence, responsibility, dependability, honesty and ethics ▪ Exploring opportunities to reach into cross-functional lanes or lines of effort to broaden site picture understanding, and contribute to the achievement of organizational goals ▪ Maintaining a strong working relationship with the local communities and industry to ensure collaboration and support as needed

SUB-COMPETENCY –	Organizational Leadership

DESCRIPTION –	Ability to develop or align a unit's mission & vision to parent organization. Develop goals and objectives for unit operations. Establish unit milestones and budget to conduct unit operations.
PROFICIENCY LEVEL	**OBSERVABLE BEHAVIORS**
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work to…** ▪ Solicit feedback from team members and stakeholders to address concerns about new organizational structures ▪ Develop and generate support for work group vision ▪ Execute the organization's mission and goals ▪ Demonstrate a commitment to the organization's values. **Refine skills in…** ▪ Communication and Collaboration through controversy and resistance ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
MID-CAREER	**Serve as a Leader in and advise/lead early career members on…** ▪ Involving employees and stakeholders in an organizational change process by conducting meetings ▪ Establishing trust through change ▪ Transparent communication strategies, like frequent updates ▪ Acknowledging organizational strengths and developing plan to address areas needing improvement ▪ Communicating organizational vision and mission to employees while incorporating employee feedback for ideas on accomplishing new goals and objectives ▪ Aligning unit goals with organizational goals ▪ Managing resources effectively to achieve unit goals ▪ Developing and implementing strategies to improve unit performance ▪ Evaluating unit performance and identifies areas for improvement ▪ Communicating effectively with unit members and stakeholders ▪ Mentoring junior planners on organizational leadership
LATE CAREER	**Serve as an Enterprise Expert in and advise members on…** ▪ Building nationwide coalitions to develop and garner support for shared programs ▪ Developing and implementing organizational strategy ▪ Influencing policy and decision-making at the highest levels of the organization ▪ Leading organizational change initiatives ▪ Mentoring mid-career planners and prepare them for leadership roles ▪ Representing the organization to external stakeholders ▪ Ensuring the organization is aligned with its mission and values ▪ Listening to various viewpoints from internal and external sources

TABLE 5C COMMUNITY PLANNER RESOURCE MANAGEMENT COMPETENCIES

COMPETENCY –	*RESOURCE MANAGEMENT*
SUB-COMPETENCY –	**IT Systems**

DESCRIPTION –	The ability to utilize IT tools to improve information flow and communication across multiple domains and maintain authoritative databases to drive data driven decisions.
PROFICIENCY LEVEL	**OBSERVABLE BEHAVIORS**
EARLY CAREER	**Develop an understanding of and successfully execute, apply, or work with…** ▪ CPP currency with planning documents, goals and objectives, constraints, opportunities, and planning actions ▪ Geospatial Planning Data sets managed by Geobase ▪ Data Visualization ▪ DAF internal IT systems and databases ▪ Data management protocols and security procedures ▪ Importance of data integrity and accuracy **Understand and effectively utilize…** ▪ CPP ▪ GIS Tools like AFGIMS ▪ Geobase cartographic services ▪ CAD ▪ Microsoft Office Suite, MS Teams, SharePoint, and like tools ▪ AI Tools **Refine skills in…** ▪ Seeking assistance from senior planners or IT support when encountering technical difficulties ▪ Technological literacy ▪ Communication and collaboration ▪ Expectation management
MID-CAREER	**Perform as a Technical Advisor and guide early career members in…** ▪ CPP utilization and currency with a focus on forecasting updates and requirements ▪ Serving as the Planning Data Steward in coordination with Geobase ▪ Utilizing geospatial tools for facility space planning, site planning, and master planning ▪ Being an intermediate level user of Microsoft Office Suite, MS Teams, SharePoint, and like tools ▪ Utilization of AI Tools ▪ The development of graphic presentations, cost estimates, Gantt charts and strategies to communicate with stakeholders ▪ Leveraging IT tools (e.g., GIS software, data analysis tools) to analyze data and generate reports ▪ Contributing to the maintenance and improvement of authoritative data sources ▪ Identifying opportunities to improve information flow and communication ▪ Developing and present data-driven recommendations to leadership ▪ Understanding and applying data visualization techniques to effectively communicate information ▪ Participates in IT system upgrades and testing **Serve as a Leader in and advise/lead early career members on…** ▪ Technological literacy ▪ Communication and collaboration ▪ Expectation management

LATE CAREER	**Serve as an Enterprise Expert in and advise members by…** ▪ Supporting AFCEC CPP Team by suggesting enterprise-level improvements ▪ Forecasting future GIS and CAD enterprise needs ▪ Joining IT Support Teams to offer enterprise-wide improvements ▪ Leading the development and implementation of IT strategies to support community planning goals ▪ Ensuring data accessibility, security, and integrity across multiple domains ▪ Driving innovation through the adoption of new technologies and IT solutions ▪ Overseeing the development and maintenance of authoritative planning data sets ▪ Collaborating with IT professionals to address complex technical challenges ▪ Advocating for the IT needs of the community planning organization ▪ Mentoring mid-career planners on IT systems and data management ▪ Ensuring compliance with all relevant IT security policies and regulations

TABLE 5D COMMUNITY PLANNER ASSET MANAGEMENT COMPETENCIES

COMPETENCY –	***ASSET MANAGEMENT***
SUB-COMPETENCY –	**Planning**
DESCRIPTION –	The ability to properly identify requirements and develop plans to achieve the CE mission.
PROFICIENCY LEVEL	**OBSERVABLE BEHAVIORS**
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Military Master Planning principles, processes, and regulations ▪ Community Planner Technical Competencies (See Technical Competency for more details) ▪ Fund type purposes, cost thresholds, and procedures (i.e., Military Construction (MILCON), Facility Sustainment Restoration and Modernization (FSRM), and Unspecified Minor Military Construction (UMMC) in support of planning efforts ▪ Project prioritization through the Execution Plan process within the Engineering Flight ▪ Links between master planning processes and project implementation **Refine skills in…** ▪ Reading, interpreting, and applying all applicable laws, regulations, and policies (i.e. environmental law, fiscal law, etc.) ▪ Data collection, research, and analysis to support plan development ▪ Preparing basic maps, charts, and visualizations ▪ Participating in planning meetings and contribute to discussions ▪ Following established procedures and guidelines for plan development ▪ Identifying requirements based on mission needs and stakeholder input

MID-CAREER	**Perform as a Technical Advisor and guide early career members in…** ▪ Conducting reviews of the agency's core mission ▪ Information gathering in support of Strategic Plan development, including conflicting and/or incomplete information ▪ Applying appropriate methods to identify policy issues and resource concerns ▪ Applying standard planning theory and practices to create solutions without technical instruction or guidance ▪ Leading the development of comprehensive plans, such as Master Plans, District Plans, and other planning documents ▪ Coordinating with stakeholders across the installation and external agencies to gather input and build consensus ▪ Ensuring plans are aligned with the CE mission and strategic goals ▪ Conducting thorough analysis of requirements and develop realistic and achievable plans ▪ Reading, interpreting, and applying all applicable laws, regulations, and policies (i.e. environmental law, fiscal law, etc.) ▪ Identifying potential risks and challenges and develop mitigation strategies ▪ Presenting plans to leadership and stakeholders for approval ▪ Mentoring junior planners on planning techniques and best practices
LATE CAREER	**Serve as an Enterprise Expert in and advise members in…** ▪ Improving organizational efficiency by developing, planning, and implementing a multi-tier solution to complex or unprecedented problems ▪ Developing and implementing a remediation plan restoring stakeholder confidence in a critical agency program ▪ Improving effectiveness, efficiency, and productivity in master, site, and space planning activities at different echelons and/or physical locations on the installation ▪ Developing strategic planning frameworks to guide long-term development and resource allocation ▪ Influencing policy and decision-making at the MAJCOM or HQ level on planning matters ▪ Ensuring planning efforts are aligned with the evolving needs of the CE mission ▪ Leading interagency collaborations on regional planning initiatives ▪ Serving as a subject matter expert on planning and provides guidance to other organizations ▪ Mentoring mid-career planners and prepare them for leadership roles ▪ Anticipating future trends and challenges and develop innovative solutions

SUB-COMPETENCY –	**Requirements and Optimization**
DESCRIPTION –	The ability to work with R/O on the Activity Management Plan (AMP).
PROFICIENCY LEVEL	**OBSERVABLE BEHAVIORS**
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Activity Management Planning ▪ R/O principles and processes and assisting R/O with project prioritization ▪ Appropriate data analysis to support AMP process ▪ Assist R/O in the validation of asset-based potential mission risk ▪ Assisting with data entry and maintenance of the AMP ▪ Identifying and prioritizing requirements based on mission needs and stakeholder input

	▪ Participating in meetings with R/O personnel and other stakeholders ▪ Procedures and guidelines for requirements management and optimization **Refine skills in…** ▪ Risk communication ▪ Problem Solving ▪ Cost/Benefit Analysis ▪ Communication and Collaboration ▪ Negotiation and Conflict Management
MID-CAREER	**Perform as a Technical Advisor and guide early career members in…** ▪ Conducting review of the agency's AMPs to assist with Program Objectives Memorandum and Integrated Priority List project priorities ▪ Participate in enterprise funding discussions based on master planning principles ▪ Encourage early participation in installation-level Base Comprehensive Asset Management discussions ▪ Leading the development and implementation of requirements plans, ensuring alignment with the AMP ▪ Coordinating with R&O personnel to prioritize and optimize requirements ▪ Conducting thorough analysis of requirements and develop realistic and achievable plans ▪ Identifying potential risks and challenges and develop mitigation strategies ▪ Presenting requirements plans to leadership and stakeholders for approval ▪ Mentoring junior planners on requirements management and optimization techniques **Serve as a Leader in and advise/lead early career members on…** ▪ Risk communication ▪ Problem Solving ▪ Cost/Benefit Analysis ▪ Communication and Collaboration ▪ Negotiation and Conflict Management
LATE CAREER	**Serve as an Enterprise Expert in and advise members in…** ▪ Improving policies to strengthen AMP recommendations ▪ Developing strategic requirements and optimization frameworks to guide long-term resource allocation ▪ Influencing policy and decision-making at the MAJCOM or HQ level on requirements management matters ▪ Ensuring requirements and optimization efforts are aligned with the evolving needs of the CE mission ▪ Leading interagency collaborations on regional requirements and planning initiatives ▪ Serving as a subject matter expert on requirements management and optimization ▪ Mentoring mid-career planners and prepare them for leadership roles ▪ Anticipating future trends and challenges and develop innovative solutions

TABLE 5E COMMUNITY PLANNER MANAGERIAL COMPETENCIES

COMPETENCY –	***MANAGERIAL***

SUB-COMPETENCY –	Accomplish the Mission
DESCRIPTION –	Ability to supervise Community Planners to complete tasks that accomplish the mission by providing guidance, encouragement, and the right tools/contacts.

PROFICIENCY LEVEL	OBSERVABLE BEHAVIORS
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work to…** ▪ Enhance mission communication and education to inform how to accomplish the mission ▪ Review an organization's mission and how the task contributes ▪ Report on planning tasks through the leadership chain ▪ Prepare briefing and tasks associated with the Facility Board and other boards/committees related to planning ▪ Proactively identify and communicate potential roadblocks or challenges **Understand and effectively utilize…** ▪ CPP ▪ GIS Tools like AFGIMS ▪ Geobase cartographic services ▪ CAD ▪ Microsoft Office Suite, MS Teams, SharePoint, and like tools ▪ AI Tools **Refine skills in…** ▪ Consistently completing assigned tasks accurately and on time ▪ Actively seeking guidance from senior planners to ensure tasks align with mission objectives ▪ Contributing to a positive and collaborative team environment ▪ Problem Solving ▪ Systems Thinking
MID-CAREER	**Perform as a Technical Advisor and guide early career members in…** ▪ Empowering members to take active role in the Facility Board and represent community planning at other installation committees ▪ Effectively leading small teams to complete planning projects and meet mission objectives ▪ Delegating tasks appropriately, considering the skills and experience of team members ▪ Providing clear guidance and direction to junior planners ▪ Ensuring team members have the necessary tools, resources, and contacts to succeed ▪ Monitoring team progress and providing timely feedback ▪ Broaden mission context and ensuring team efforts align with organizational goals **Serve as an example for members in…** ▪ Conflict Resolution ▪ Communication and Collaboration ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management

LATE CAREER	**Serve as an Enterprise Expert in and advise members in…** ▪ Assigning tasks that result in productive mission-orientated opportunities to propel staff toward their future career goals ▪ Encouraging staff to develop the right mission partner contacts to help resolve difficult tasks ▪ Leading large teams to achieve strategic planning goals and contribute to the overall CE mission ▪ Developing and implementing strategic plans to guide long-term mission accomplishment ▪ Providing mentorship and guidance to mid-career planners and preparing them for leadership roles ▪ Creating a supportive and empowering environment where team members can thrive ▪ Advocating for the needs of the team and ensuring they have the resources they need to succeed ▪ Establishing clear performance expectations and holds team members accountable ▪ Fostering a culture of continuous improvement and innovation **Have a firm understanding of and ability to effectively communicate…** ▪ DoD Priorities ▪ Enterprise Planning Concerns and Considerations ▪ DAF Enterprise Structure and Culture

SUB-COMPETENCY –	**Infuse Passion**
DESCRIPTION –	Ability to convey strong passion toward assignments by encouraging Community Planners to proudly own the process and outcome.

PROFICIENCY LEVEL	OBSERVABLE BEHAVIORS
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Genuine interest in community planning and its impact on the Air Force mission **Refine skills in…** ▪ Approaching assigned tasks with enthusiasm and a positive attitude ▪ Taking ownership of work ▪ Striving for excellence ▪ Seeking opportunities to learn new skills and expand knowledge ▪ Actively participating in team discussions and contributing innovative ideas ▪ Asking questions and seek clarification to fully understand assignments
MID-CAREER	**Perform as a Technical Advisor and guide early career members in…** ▪ Learning how to self-assess success with aligning staff passions to task assignments ▪ Guiding team members on how to create a sense of purpose ▪ Encouraging team members to expand their capabilities through new and challenging opportunities ▪ Inspiring passion in junior planners by sharing enthusiasm for Community Planning ▪ Fostering a sense of ownership by empowering team members to take responsibility for their work

	▪ Creating a positive and motivating work environment where team members feel valued and appreciated ▪ Recognizing and rewarding the accomplishments of team members ▪ Encouraging creativity and innovation ▪ Providing constructive feedback ▪ Helping team members develop their skills
LATE CAREER	**Serve as an Enterprise Expert in and advise members in…** ▪ Strategizing methods to encourage the next generation of planners to join the DAF ▪ Creating a culture of passion and purpose ▪ Inspiring future leaders by sharing experiences and insights ▪ Advocating for the importance of Community Planning within the DAF and broader community ▪ Serving as a role model of passion, dedication, and commitment ▪ Empowering team members to make a meaningful contribution to the DAF mission ▪ Fostering a culture of continuous learning and professional development

SUB-COMPETENCY –	**Management Soft Skills**
DESCRIPTION –	Ability to conduct fair and honest appraisals, document achievements, encourage retention, and offer emotional intelligence.
PROFICIENCY LEVEL	**OBSERVABLE BEHAVIORS**
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ DAF standard for conducting employee appraisals ▪ Providing clear and thorough feedback that encourages development ▪ DAF, MAJCOM, and local guidance on documenting employee achievements ▪ Mechanism for encouraging employee retention ▪ Emotional intelligence **Refine skills in…** ▪ Demonstrating self-awareness ▪ Seeking feedback from supervisors and colleagues ▪ Actively listening to and considering feedback ▪ Demonstrating professionalism in all interactions with colleagues, stakeholders, and the public ▪ Effectively managing time and priorities ▪ Communicating clearly and respectfully
MID-CAREER	**Perform as a Technical Advisor and guide early career members in…** ▪ Conducting fair and honest performance appraisals ▪ Providing constructive feedback to team members ▪ Setting clear goals and expectations for self and other members ▪ Documenting the achievements of team members and recognizing their contributions ▪ Encouraging retention by creating a positive and supportive work environment ▪ Demonstrating emotional intelligence by understanding and responding to the needs of team members ▪ Resolving conflicts effectively and fairly ▪ Coaching and mentoring to help team members develop their skills

LATE CAREER	**Serve as an Enterprise Expert in and advise members in…** ▪ Seeking advanced leadership courses for personal development ▪ Innovating and trying new ideas to further employee job satisfaction ▪ Developing the leadership skills of mid-career planners ▪ Fostering a culture of respect, inclusion, and accountability within the Community Planning organization ▪ Creating a supportive and empowering environment for employees to thrive ▪ Advocating for policies and programs that support employee well-being ▪ Participating in Career Field development groups, like the Development Team and/or the Functional Advisory Council

TABLE 5F COMMUNITY PLANNER COMMUNICATION ANCOMPETENCIES

COMPETENCY –	***COMMUNICATION & COLLABORATION***
SUB-COMPETENCY –	**Conduct Briefings**
DESCRIPTION –	Ability to comfortably present the facts in a concise manner and handle questions from leadership in a professional and respectful manner.
PROFICIENCY LEVEL	**OBSERVABLE BEHAVIORS**
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Preparing succinct, clear materials for both presentation and standalone resources ▪ AFH 33-337 Tongue and Quill standards ▪ Local templates or guidance for presentation materials ▪ Accurately presenting data and information for informed, data-driven recommendations ▪ Using visual aids effectively (e.g., PowerPoint) following established guidelines ▪ Target audience and tailoring the briefing content accordingly **Understand and effectively utilize…** ▪ CPP ▪ GIS Tools like AFGIMS ▪ Geobase cartographic services ▪ CAD ▪ Microsoft Office Suite, MS Teams, SharePoint, and like tools ▪ AI Tools **Refine skills in…** ▪ responding to questions during the briefing ▪ Delivering pre-prepared briefings using provided templates and scripts ▪ Responding to basic questions with prepared answers or by referring to source documents ▪ Demonstrating professional demeanor and respect for the chain of command ▪ Seeking guidance from senior planners on briefing preparation and delivery

MID-CAREER	**Perform as a Technical Advisor and guide early career members in…** ▪ Reviewing presentation material for quality and clarity ▪ Advising during employee practice briefs ▪ Independently developing and delivering comprehensive briefings on complex planning topics ▪ Tailoring briefing content and style to the specific audience (e.g., senior leaders, community members, other agencies) ▪ Anticipating potential questions and prepare thorough responses ▪ Handling challenging questions and dissenting opinions with professionalism and tact ▪ Using data visualization techniques to effectively communicate complex information ▪ Incorporating feedback from previous briefings to improve future presentations ▪ Mentoring junior planners on briefing preparation and delivery
LATE CAREER	**Serve as an Enterprise Expert in and advise members in…** ▪ How to conduct an effective briefing ▪ Continuing to perfect the art of briefings and share with planners ▪ Leading briefings to senior leadership (e.g., Wing Commander, MAJCOM staff) on strategic planning initiatives ▪ Presenting complex and potentially controversial information in a clear, persuasive, and unbiased manner ▪ Influencing decision-making through compelling data and well-reasoned arguments ▪ Serving as a subject matter expert on planning topics, providing expert advice and guidance ▪ Developing and implementing briefing strategies for high-visibility projects ▪ Mentoring mid-career planners on advanced briefing techniques and leadership communication ▪ Anticipating and mitigating potential risks associated with briefing content and delivery **Have a firm understanding of and ability to effectively communicate…** ▪ DoD Priorities ▪ Enterprise Planning Concerns and Considerations ▪ DAF Enterprise Structure and Culture

SUB-COMPETENCY –	**Work with Other Units and Outside Organizations**
DESCRIPTION –	Ability to build relationships, handle unusual requests, and develop solutions.

PROFICIENCY LEVEL	OBSERVABLE BEHAVIORS
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Learning how to reach out to a new contact and present your needs in a clear, professional, and concise manner ▪ Learning how to develop a strong working relationship leading to continual cross collaboration on difficult requests ▪ Learning how to work with a colleague to develop solutions to a tough problem ▪ Abiding established procedures for sharing information and coordinating activities with other units ▪ Roles and responsibilities of other units involved in the planning process

	▪ Contributions to team efforts and supporting the overall planning goals ▪ Military and Civilian ranks, hierarchies, and organizational structures **Refine skills in…** ▪ Participating in collaborative meetings and take accurate notes ▪ Identifying and escalating potential conflicts or issues to senior planners ▪ Responding to requests for information from other units in a timely and accurate manner ▪ Problem Solving ▪ Systems Thinking ▪ Communication and Collaboration through controversy and resistance ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
MID-CAREER	**Perform as a Technical Advisor and guide early career members in…** ▪ Leading cross-functional teams to develop and implement planning initiatives ▪ Facilitating communication and coordination between different units ▪ Identifying and resolving conflicts between units in a constructive and collaborative manner ▪ Developing innovative solutions to complex planning challenges through collaboration ▪ Building strong working relationships with key stakeholders in other units ▪ Understanding the perspectives and priorities of other units and incorporates them into the planning process ▪ Negotiating effectively to achieve mutually beneficial outcomes **Serve as an example for members in…** ▪ Complex Problem Solving ▪ Systems Thinking ▪ Communication and Collaboration through controversy and resistance ▪ Coalition Building/Stakeholder Engagement ▪ Negotiation and Conflict Management
LATE CAREER	**Serve as an Enterprise Expert in and advise members in…** ▪ Building and maintaining strategic partnerships with key stakeholders across the DAF and other agencies ▪ Influencing policy and decision-making through collaboration and advocacy ▪ Driving organizational change by fostering a culture of collaboration and innovation ▪ Mentoring mid-career planners on building effective working relationships and leading collaborative initiatives ▪ Representing the planning organization in interagency forums and conferences ▪ Developing and implementing strategies to improve collaboration and coordination across the organization ▪ Anticipating and mitigating potential risks associated with interagency collaboration **Have a firm understanding of and ability to effectively communicate…** ▪ DoD Priorities ▪ Enterprise Planning Concerns and Considerations ▪ DAF Enterprise Structure and Culture
SUB-COMPETENCY –	**Elevator Speech**

DESCRIPTION –	Ability to present ideas to leadership in a one-by-one environment given limited time and strong need to clearly communicate the point of the conversation.
PROFICIENCY LEVEL	**OBSERVABLE BEHAVIORS**
EARLY CAREER	**Develop an understanding of and successfully execute, apply or work with…** ▪ Compelling, informative, and well-executed brief or pitch ▪ Appropriate stakeholders with authority or vested interest in project or issue ▪ Establishing linkages between decision-makers strategic concerns and the project or issue **Understand and effectively utilize…** ▪ Guidance from senior planners on developing effective elevator speeches **Refine skills in…** ▪ Clearly and concisely explaining the purpose and scope of a project or issue in a short timeframe (e.g., 30 seconds) ▪ Communicating the key facts and avoiding jargon ▪ Confidence and enthusiasm when presenting information ▪ Responding to basic questions about the project or issue ▪ Delivering elevator speeches in various scenarios ▪ Maintaining flexibility and adaptability
MID-CAREER	**Perform as a Technical Advisor and guide early career members in…** ▪ Advising how to prepare for the speech ▪ Continually refining and improving on the speech ▪ Persuasively communicating the value and impact of a project or issue in a short timeframe ▪ Tailoring elevator speech to the audience and interests ▪ Using storytelling techniques to engage the listener and make the message more memorable ▪ Anticipating and addressing potential concerns or objections ▪ Effectively advocating for the project or issue
LATE CAREER	**Serve as an Enterprise Expert in and advise members in…** ▪ Teaching the art of delivering speech ▪ Providing practice sessions to offer pointers to improve ▪ Securing senior leaders and secure support for strategic initiatives through compelling elevator speeches ▪ Effectively navigating complex political dynamics ▪ Mentoring mid-career planners on developing and delivering impactful elevator speeches for senior leaders **Serve as an impeccable example of…** ▪ Serving as a trusted advisor to senior leaders on communication strategies **Have a firm understanding of and ability to effectively communicate…** ▪ Organization's priorities and goals to frame the message ▪ DoD Priorities ▪ Enterprise Planning Concerns ▪ DAF Enterprise Structure and Culture

5. Integrating Competency Assessments with On-the-Job Training. The intent of moving towards a competency-based system is to sharpen the Total Force's tactical expertise, operational competence, strategic vision, and joint proficiency to lead and execute the full spectrum of DAF missions. This occurs not in a classroom environment, but on the job by combining education, training, and experiences to provide personnel with a better path as they move along their development pathways within their careers. As it is done today, on-the-job training is task-centric and requires our personnel to merely run through a series of checklists or receive varying degrees of training depending on who is working with them. A competency assessment is not a static process or just another checklist. It is a way to assess individuals on a set of competencies (based on a competency model of the job) that are critical to job and organizational success. These assessments focus on the end state and goals that define successful behaviors that are expected of personnel within a particular career field. Assessments can be designed to balance between the skills and elements needed on the job in conjunction with the underlying characteristics that will allow individuals to be able to put the technical, leadership, managerial, social, and interpersonal competencies together.

6. Executing Competencies.

6.1. The competency model has multiple uses throughout the community planning career series. The initial intent of the model is for professional development. The information included within the competency model will allow members to manage their professional growth and development by guiding them identify their own strengths and weaknesses since clear and objective behaviors within the competency model are now mapped out. In addition, supporting competencies are now tied to occupational competencies, which can enable all Community Planners to intentionally develop those transferable underlying characteristics that will translate to mission readiness and mission success. The rubrics can also be used for leaders, supervisors, mentors, subordinates, etc., to complete informal assessments for an individual across each competency. The assessments can be used to work backward and potentially identify gaps in performance and training. This will enable all (leaders, supervisors, mentors, subordinates, and self) to make better decisions about selecting the right training, education, and experiential learning opportunities. All these elements come together to ensure we can build Community Planners who are better prepared, present and future mission focused, and ready to succeed in any situation. Additionally, Department of the Air Force Manual (DAFMAN) 36-2643, *Coaching and Mentoring Program*, has more information on how competencies can be used when an established mentoring strategy is put into effect to foster and develop Community Planners.

6.2. The competency rubrics can also be used to assist with completing a needs assessment to identify required community planning knowledge and skills. This can be done by completing a gap analysis between the current state of training compared to expected competency behaviors.

6.3. The sub-competencies can serve as an outline to assist in modularizing course content, and the listed behaviors can assist in creating a classroom environment that is shaped by real-world experiential requirements a Community Planner may need. This approach can also help identify practical technologies that can be successful in the classroom and translated for real-world uses. Additionally, by using the competency model, measurements can be streamlined to include more project-based learning assessments. Finally, under the Force Development umbrella, any course Community Planners attend can be mapped to the behaviors listed in the rubrics to ensure training resources are being used appropriately, when a Community Planner needs it in their career.

7. Civilian Development.

7.1. Community Planner Manager and/or Supervisor civilian responsibilities are as follows:

7.1.1. Ask manager or seek leadership training, education, and professional development programs and requirements (See Part II Section E).

7.1.2. Collaborate with Installation Civilian Employee Development Specialist to ensure all organizational and functional/occupational training requirements have been identified during the annual training needs assessment data call for respective civilians.

7.1.3. Foster a learning culture that provides opportunities for continuous training, education, and professional development.

7.1.4. Utilize career field roadmaps and competency-based guidance to evaluate and identify subordinate mission-related functional/occupational training needs.

7.1.5. Prepare required Standard Form 182 documentation when submitting subordinate training requests.

7.1.6. In partnership with civilian employees under their purview, review, discuss, and maintain the IDPs. The plan documents the employee's short and long-range career goals, specific competencies, knowledge, skills, and abilities necessary to meet current objectives and training, education, and professional development activities used to develop the desired competencies.

7.1.7. Inform civilians of their responsibilities to accomplish training.

7.1.8. Ensure New Employee Orientation is accomplished within 90 days of employment.

7.1.9. Complete ancillary training requirements as identified, within prescribed timeframes (See Part II Section E).

7.1.10. Complete new supervisor and/or manager training within one year of appointment to a supervisory/managerial position and complete experienced training every three years, thereafter.

7.1.11. Adhere to any additional responsibilities outlined in DAFI 36-2670, *Total Force Development*.

7.2. Community Planner Employee civilian responsibilities are as follows:

7.2.1. Maintain the necessary competencies to accomplish duties within the assigned position and help the DAF meet its mission.

7.2.2. Assume active responsibility for self-development and training through drafting an IDP in collaboration with their respective supervisor and maintain it on an annual basis to ensure the plan remains current.

7.2.3. Identify training needed to improve individual and organizational performance and identify methods to meet those needs, effectively and efficiently.

7.2.4. Request training, when necessary, from supervisor and/or manager to initiate Standard Form 182 submission, if applicable.

7.2.5. Complete New Employee Orientation within 90 days of the initial appointment.

7.2.6. Accomplish required ancillary training and maintains currency (See Part II Section E).

7.2.7. Adhere to any additional responsibilities outlined in DAFI 36-2670.

7.3. Transition Steps from Competency to Career Progression.

7.3.1. Many factors affect the progression of a Community Planner. Factors can include but are not limited to personal short- and long-term goals, number and availability of relevant positions at a particular installation, willingness to be mobile, training, and education. Community Planner progression is specific to the individual and continuous. Progression can include the steps below worked by the employee on their own or in collaboration with their leadership team.

7.3.2. Step 1. Identify short- and long-term goals. Identifying short- and long-term career goals can be a challenge for Community Planners. Self-reflection should be accomplished by employees to determine if you are content in your current position and only desire upskilling to maintain or increase your current proficiencies. If you aspire to progress into a supervisory role or management position, are there competencies to be garnered that will make you an ideal fit for these roles and/or positions? Would you like to pursue areas outside of what you are normally accustomed? Answering these questions will aid you in the preparation of short- and long-term career goals.

7.3.3. Step 2. Compare capabilities against the competency model. Recognizing your strengths and weaknesses aids in understanding your current capabilities. Knowing areas that need improvement is also imperative in developing competencies at the right place and at the right time. Conducting a self-assessment against the Community Planner Occupational Competency Model will enable employees to pinpoint their current location and identify the behaviors, knowledge, skills, and other characteristics needed to perform successfully on the job and/or for a desired role/position.

7.3.4. Step 3. Prepare a development plan. Interaction and communication between supervisors and employees are important in preparing development plans. The interaction and communication should include, but is not limited to employee strengths, improvement areas, goals, interests, and organizational requirements. Ensure any necessary training, education, and experiences needed to attain competencies are annotated. Develop the employees' objectives and ensure they are associated with the organization's mission and goals as well as the employee's developmental needs/requirements. There are various options available to assist in constructing development plans, to include an Individual Development Plan (see Part II Section C) and/or localized developed IDP forms.

7.3.5. Step 4. Self-directed learning. Employees pursue training, education, and experiences identified in their development plan. Although supervisors and employees interact and communicate together, it is ultimately the employee's responsibility for personal and professional development. If assistance is needed, mentors and coaches can be invaluable tools. Mentoring fosters an atmosphere of trust in the workplace that aids in developing the strengths and capabilities of the force. In the DAF, mentorship is defined as a longer-term professional relationship (1-2 years) where the mentor provides informal guidance and wisdom to a mentee to help them develop both personally and professionally focused on career and life development. Coaching is defined as a short-term (six months to a year) relationship where a coach provides specific and measurable support focusing on improving existing job and work-life balance skills. A helpful diagram of the coach and mentor difference is available at https://www.afmc.af.mil/Portals/13/coaching%20vs%20mentoringFINAL%20Compliant.pdf.

Through this development, foundational and occupational competencies can be achieved and mastered, enabling personnel to reach and maximize their full potential. Employees have the option of selecting or requesting to be paired with a mentor through the MyVector Mentor Tool available at https://myvector.us.af.mil/MyConnections/Home.

7.3.6. Step 5. Evaluate outcomes. Competency assessments focus on the end state and goals that define successful behaviors expected of personnel. Assessments are a fluid, ongoing process. They help identify and evaluate the skills necessary to carry out an existing and future job. An organization should not evolve to meet an individual employee's needs; instead, individuals are invited to grow and evolve with the organization. The organization must help and support its own evolution through providing education, time, and resources so the employee can achieve the new skills necessary for mission success.

SECTION C: CAREER PROGRESSION AND INFORMATION

8. Career Progression and Information

8.1. Civilian Career Roadmap or career progression can vary substantially among Community Planners (0020) due to a variety of factors including personal goals, availability of positions at an installation, geographic mobility, training, and continuing education. Within the first ten years of a Planner's career, each Planner should begin to have an idea of their career goals, such as serving in a leadership or technical position, and at what echelon or level of the DAF enterprise. For example, a goal to become a senior leader will drive career and education decisions differently than a goal to be a technical subject matter expert.

8.2. The intent of the CFETP is to focus the Community Planner (0020) on what they need to do for success in their current role, and what they should do to achieve their career aspirations. In some cases, a Planner will not be geographically mobile or will enjoy the work at the installation level and may not want to move to other installations. In this case, the CFETP will help planners continue to develop over the span of their career through education and training opportunities. The goal of the CFETP is to support the CE Human Capital Roadmap lines of effort to envision the force and to recruit/retain Community Planners to meet the mission requirements across the full spectrum of the CE enterprise.

8.3. There is no single, optimal career path to ensure career success. A successful career path includes steady growth in job responsibility and professional development with a broad variety of experience. Periodically, personal situations should be reviewed against organization needs to reassess career path goals. Consider personal strengths, weaknesses, training or experience gaps, commitment to the organization's mission, and short and long-term goals. Organizationally, consider the organization's needs, training resources, position availability, and promotion opportunities. How well a Community Planner performs in their current position is the most important factor in determining future success.

9. DAF Enterprise Career Building Blocks

9.1. The Community Planner Civilian CFT has developed a series of Career Building Blocks for different job series. The following is a broad guideline for career progression—not every aspect will apply to every member. Broadly, career progression should proceed through three developmental levels: Installation, Intermediate, and Headquarters. If leadership is a desired career goal, obtaining supervisory experience at each level is recommended.

9.2. Installation Level Planning Staff conduct tactical planning activities at each installation and ensure the synchronization of policy while supporting mission capabilities. Most planners begin their career at this level.

9.3. Intermediate Level Planners working at second level leadership positions at the installation, the National Guard Bureau (NGB), the AFRC, and AFIMSC, to include personnel working at AFCEC, execute enterprise or operational planning. This includes analysis of assets and mission-driven infrastructure requirements, which informs both strategic and tactical installation planning. A Planner can expect to reach this level mid-career.

9.4. Headquarters Level Planners at A4C, Secretary Air Force (SAF), and second or third level leadership at AFIMSC and AFCEC lead strategic planning for DAF infrastructure and provide strategic, operational, and functional intent and guidance through directive publications. A Planner can expect to work at this level later in their career.

9.5. The AFCEC Planning Subject Matter Experts (SMEs) operate at the intermediate and headquarters level but integrate planning related activities across the DAF enterprise. A planner can expect to work at this level later in their career.

9.6. The structure of the DAF's Community Planner (0020) workforce forms a pyramid, which rises from a broad base of installation level Planners and planning related positions. The DAF Civilian Community Planner pyramid **(Figure 2)** shows appropriate positions, for different stages of the planner's career, available at each level of the DAF enterprise: installation, intermediate, and headquarters. Within each development level, the career pyramid recommends opportunities from the GS-05 (or equivalent) to the Senior Executive Service. Progression through these three levels allows 0020s to obtain depth and breadth of experience required to lead at the higher levels of the DAF Civil Engineering enterprise. However, Planners should not assume quick advancement between GS levels within the three levels of the DAF Civil Engineering enterprise. Instead, it is recommended planners spend a significant part of their early career obtaining depth and breadth of experience by holding positions at different installations within different mission focus areas (different MAJCOMS), to include holding positions outside of the planning career field and obtaining supervisory experience beginning at the installation level. Experience in the private sector or as a member of the armed services performing military installation master planning can also contribute to the developmental building blocks, particularly at the installation level.

9.7. FIGURE 2. DAF COMMUNITY PLANNER CAREER BUILDING BLOCKS

9.8. Management of a Planner's career beginning at the installation level can help the planner better compete for positions at the intermediate and headquarters levels and make individuals with a planning background more competitive for leadership positions of increasing responsibility later in their career. Planners should consider moving to positions at different levels of the DAF enterprise, such as moving from the installation level to the intermediate level, then back to the installation level at a supervisory position, then to the intermediate or headquarters level, to remain in touch with current issues facing Planners working at the tactical level. Experiencing a broad variety of positions, both supervisory and non-supervisory, best prepares potential candidates to hold an AFCEC Planning SME position and positions in senior leadership.

9.9. Individuals who have an interest in different areas of planning, such as traditional comprehensive planning, strategic planning, encroachment planning, environmental planning, or planning policy, may wish to consider different paths to reach their end state goal. See Sections 10 and 11 below for a variety of resources available to develop career plans.

10. MyVector. The MyVector site provides numerous resources for Community Planners. Information is available on the site related to Mentoring, Career Planning, Competency Assessment, and Knowledge sharing. Mentoring and career planning are covered in the next few sections and competency knowledge is covered in Part I Section B.

10.1. Under competency assessment, MyVector includes an "Air Force Competencies" section that provides a competencies self-assessment function and related resources. The competencies include the traditional ones such as developing self and developing others but also include emerging topics such as "Digital Literacy". Based on the results of the self-assessment, the platform includes a "Competency Improvement Plan" with suggested videos, books, courses, and/or articles that can help improve that focus area. The courses recommended are available online/for free and linked to the DAF e-Learning site (https://usaf.percipio.com/login?state=%2F#/).

10.2. Under career planning, MyVector includes the Career Development Plan process known as "vectoring." The CE CFT manages the process with an annual call, which occurs in the fall. Vectoring alternates grades each year, with odd years covering GS-11s and 13s (or equivalent) and even years covering GS-12s and 14s (or equivalent). GS-15s can vector every year. While the vectoring cycle is annual, it generally alternates between grades (e.g., GS-12 one year, GS-13 the next). The vectoring process will assist Community Planners with identifying educational, professional, or experiential gaps or needs in their career experience, and obtain valuable feedback from CE senior leaders on steps to successfully achieve their plan. It is not a promise of a promotion or a commitment to move, but an opportunity to gain insight into how to achieve career goals, which could include: what jobs to seek, professional registration, career program choices, or Civilian Development (CD) recommendations. Community planners should consider updating their MyVector Resume on MyVector and explore CD options on the site. Note that MyVector is used to apply for Vectoring as well as serves as the hub for all civilian Airmen to self-nominate for CD. The nomination process for these programs usually occurs in the winter. MyVector is also used for career development opportunities. Access to MyVector is available at https://myvector.us.af.mil.

11. Individual Development Plan. An IDP that is regularly reviewed and updated will help lay out short-, medium-, and long-term professional career goals, and identify knowledge, skills, and abilities needed to meet those goals, as well as, developmental assignments, positions,

training, and activities, which will guide a supervisor to help reach those goals. There are a variety of resources available online to develop an IDP. An IDP template suitable for all federal employees is available in Part II Section C. The MyVector webpage contains a DAF IDP Resource Guide. IDP guidance for PAQ interns is available on the CE CFT SharePoint at https://usaf.dps.mil/sites/10016/CE%20PAQ%20Program/Lists/AFPC%20PALACE%20Acquire%20PAQ%20Coordinators/AllItems.aspx.

12. Mentoring

12.1. The Mentoring section of MyVector can be used to fine tune career goals, experience and plans. A mentor search capability is available, where community planners can search for a mentor by profile details or request by-name for a mentor. MyVector also allows for knowledge sharing through forum-based discussion groups.

12.2. Community Planner (0020) at all levels should make it a priority to seek advice from more experienced DAF leaders. DAF Civil Engineer leaders, as well as other senior personnel in various functional areas, have rich insights developed and learned through years of experience, and they are often excited to coach and mentor other professionals. When seeking this opportunity, Planners should have questions prepared, have a vision/plan for the next 5-10 years (CD, career broadening, separation, retirement, etc.), and have a biography and resume ready. Prior to meeting a mentor or coach, Planners should contemplate how they may be viewed by the mentor (i.e., consider the perspective of others when evaluating personal performance) and anticipate the types of questions the mentor may ask, such as career aspirations, work values, unique knowledge, skills, or abilities, and preferred types of work and learning. Additional information about mentoring is available at https://myvector.us.af.mil/MyConnections/Home.

13. Breadth of Experience.

13.1. Early Career Level Opportunities. Experiencing a wide variety of Community Planner (0020)-eligible roles, beginning within the Civil Engineer Squadron or Group at the installation level is an important part of gaining depth and breadth of planning-related knowledge and capabilities. Examples of 0020-eligible roles include interdisciplinary positions and positions in the 0301 (Miscellaneous Administration), 0343 (Program Analyst), 0401 (Biological Sciences), 0801 (Engineer), 0808 (Architect), 0819 (Environmental Engineer), 1301 (Physical Sciences), and 1173 (Housing Management) job series. It is recommended Planners obtain diversity of experience at more than one installation falling under different MAJCOMs to include holding varied assignments within other flights within or outside the Civil Engineer Squadron or Group. This experience arms the planner in additional mission areas and may prepare the Planner to hold a supervisory position within the Civil Engineer Squadron or Group. ***Note.*** *Non-interdisciplinary series Environmental (0401), Engineering/Architecture (0801 & 0808), and Real Property (1170) positions might require additional licenses or certifications beyond typical Community Planner college degrees and might require appropriate additional skillset/ degrees/ certifications. See OPM standards for more details.*

13.2. Installation Level Position. Community Planners (0020) should plan to hold an installation level position (0020 or 0020-eligible position) for three to five years prior to holding an installation level supervisory position. Obtaining experience as an installation supervisor, such as the Planning Section Chief (0020), Portfolio Optimization Element Chief (Interdisciplinary), Environmental Element Chief (Interdisciplinary), or Asset Accountability Chief (0301) at the early stages of a Planner's career is essential to ensure competitiveness for advancement to an intermediate or headquarters level leadership position later in the Planner's career. Part II,

Section D, lists supervisor positions that are available within the Community Planning community at the installation level.

13.3. Intermediate Level Career Opportunities. After holding installation level non-supervisory and supervisory roles, a community planner may wish to advance to a higher level of installation leadership or gain experience by holding an intermediate level 0020, 0301, or 0343 non-supervisory or supervisory position. A Community Planner operating at the intermediate level should be a technical expert familiar with installation master, site, and space planning prior to moving to the Interim HQ level. Positions can be held with installations, within AFIMSC, within AFCEC, with the Reserve Component, or at NGB. These positions include Installation Management Flight Chief (installation level), Community Planner (AFCEC), Environmental Planner (AFCEC), Enterprise Planner (AFIMSC), Planning Analysts (AFIMSC), Command Community Planner (ANG), and Branch Chief (AFCEC).

13.4. Senior Career Enterprise Leader Opportunities. After holding a higher-level installation supervisory role or a role at intermediate level, a Community Planner may wish to gain experience by holding a 0020, 0301, or 0343 intermediate level supervisory or HQ level non-supervisory position, see **Table 12 and Table 13**. Generally, individuals working at these positions should have more than 10 years of experience, preferably at the intermediate level and installation level. Individuals compete more competitively for HAF positions if they have completed appropriate PME and/or have a master's degree and certifications appropriate for the educational background.

13.5. The individual should have an idea of their long-term career goal. Community Planners at each level should focus on enhancing competencies needed for their current position and develop competencies for the next step on their career roadmap (see Part I, Section B).

13.5.1. Scenario 1: Work at a position as a Community Planner at the installation level for 2 to 5 years before moving into a supervisory position depending on if the individual started as a recent graduate or has prior military or private sector experience (see Part II, Section D for position options).

13.5.2. Scenario 2: Work at a position at the installation level 2 to 6 years prior to seeking a position at the intermediate HQ level. Many 0301 and 0343 positions are available at the intermediate HQ level, as action officers and in supervisory positions (see Part II, Section D for position options).

13.5.3. Scenario 3: Work at a position at the intermediate HQs for 6 to 10 years, prior to seeking a position at the HAF level. Then pursue HAF level opportunities at several 0301 and 0343 positions available, both supervisory and non-supervisory (see Part II, Section D for position options).

13.6. Most, if not all Community Planner positions require a Secret clearance level depending on the installation. Planners should be able to obtain a Secret clearance to be competitive for positions later in their career.

13.7. Career Building Blocks (CBBs) or 0301/0343 Enterprise Leaders. Community Planners who chose to pursue 0301 or 0343 positions at the installation level may fill positions that could prepare an individual to advance on the Enterprise Leader track, such as the Installation Management Flight Chief position. These positions might set the individuals up to compete for positions, such as CSLP positions, that would put them on track to advance to the SES level as an Enterprise Leader. Timing for career progression depends on the depth and breadth of experience needed to be successful in the position.

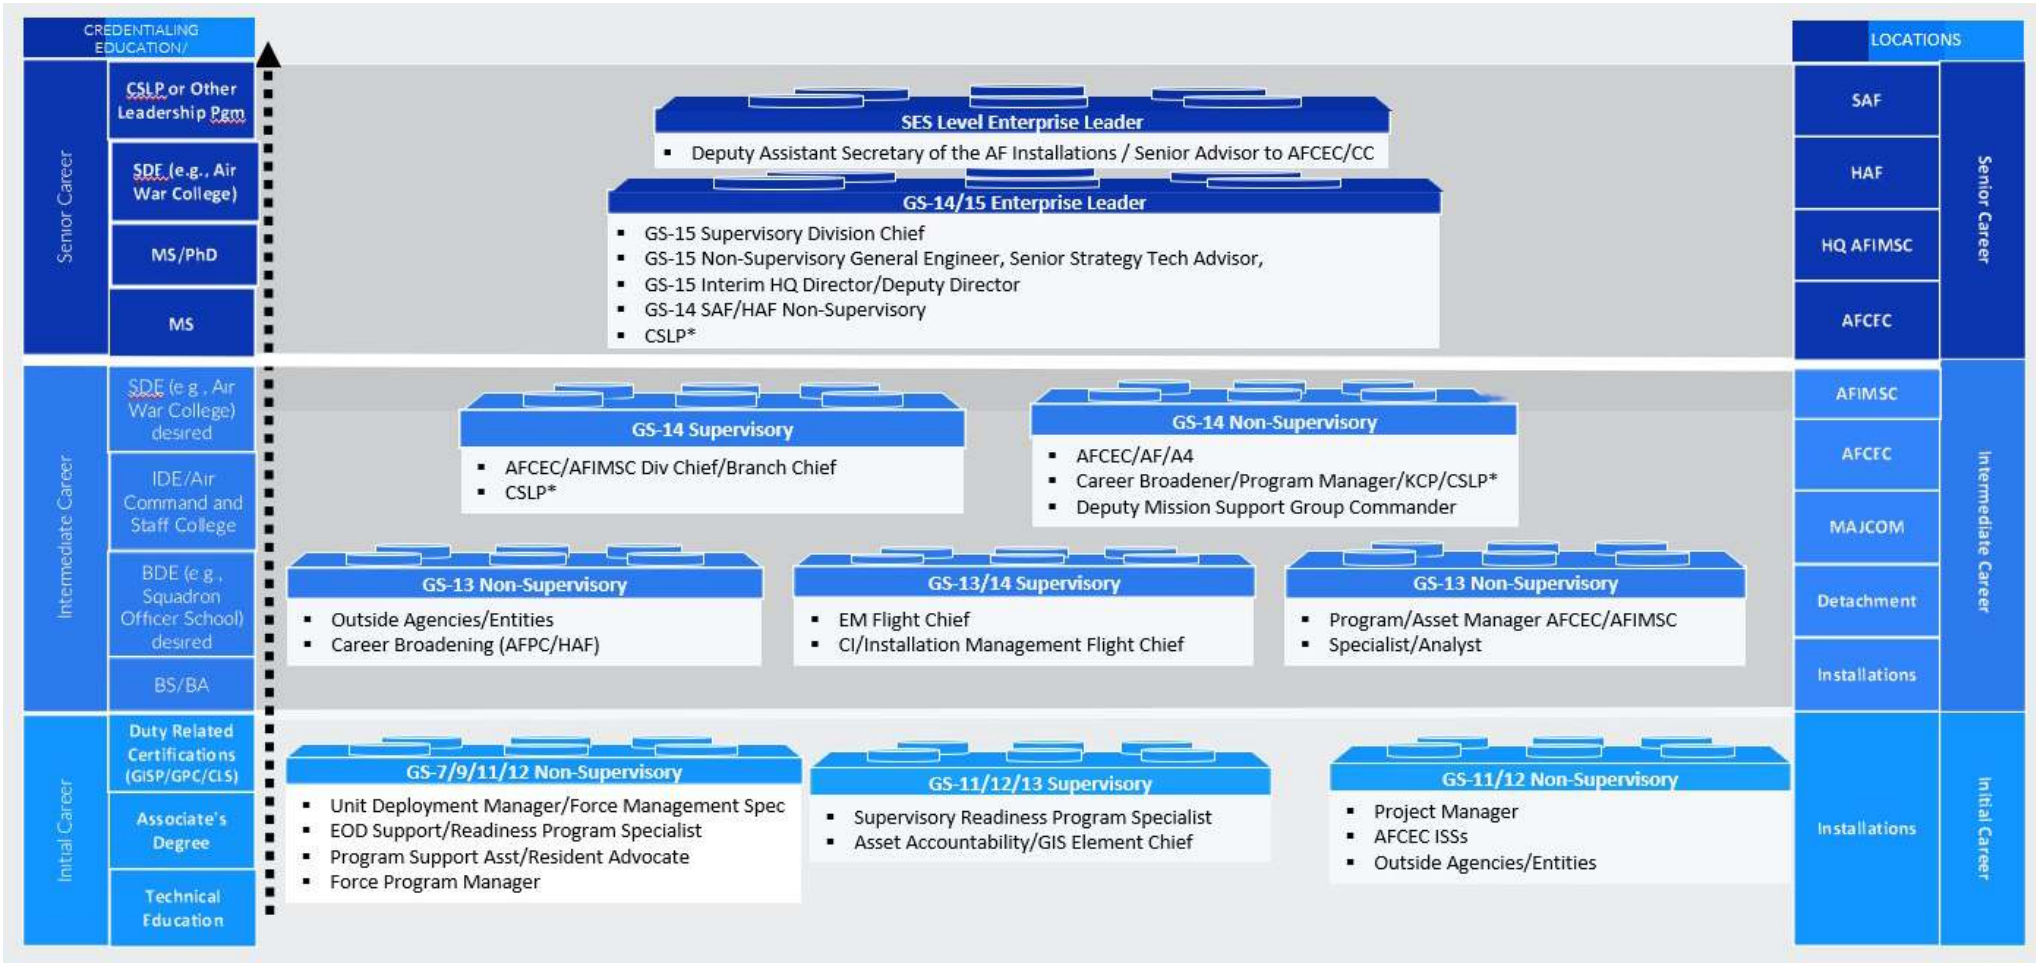

13.8. It is recommended that an individual has 10 years of experience (a combination of installation, intermediate, and prior military or private sector military community planning experience) before working at HAF or seeking a CSLP position; however, individual career paths vary based on mobility and experience. The CBBs and positions detailed in Part II, Section D, illustrate some of the 0301 and 0343 positions at the Base Level, Intermediate HQ level and Senior levels, as well as recommended credentialing and education at each level.

13.9. **Table 6** contains links to other CFETPs that might include relevant training Community Planners wishing to follow other DAF career field paths. **Figure 3** illustrates some of the positions available 0301 and 0343 positions at the Base Level, Intermediate HQ level and Senior levels, as well as recommended credentialing and education at each level. Positions considered officially on track to advance to the SES level as an Enterprise Leader are marked with an asterisk.

FIGURE 3 CAREER BUILDING BLOCKS, 0301/0343 SERIES

14. Geographic Mobility. For those Community Planners willing and able to be geographically mobile, there may be more opportunities to achieve breadth and depth in career experiences. Effective civilian force development depends upon filling high-level positions with Community Planners who have a variety of work experiences. Holding positions at multiple installations exposes a planner to a wider understanding of DAF missions. For example, experiencing operations at a fighter-heavy, research and development, or training and education focused installation provides unique experiences. Planners should also consider size of installation and geographic location when considering breadth of experiences at the installation level. Planning at an OCONUSC installation is different from planning at a CONUS installation, as is planning at small single mission installation versus a large multi-mission installation. Variations in extreme weather (southern coastal vs northern tier) can also provide breadth of experience. When applying for installation level 0020 supervisory positions, this depth and breadth of experience may be the factor that makes Community Planners the best-qualified candidate for selection. This is increasingly true as Community Planners apply for non-supervisory or supervisory positions at the intermediate and headquarters level of development.

15. Career Development Programs

15.1. The DAF offers early career entry programs and mid-career specialty positions offered career development across the enterprise. Two early entry programs include the PCIP and PAQ Programs. Three mid-career programs include CB, KCP, and CSLP.

15.2. Premier College Intern Program. PCIP is a 12-week summer internship available for full time students that are U.S. Citizens, have a GPA greater than 2.95 and have completed at least 60 credits. The GS schedule is based on the number of credits resulting in a GS-04 level position suited for a Junior in college with between 60-120 credits and GS-05 level position suited for a junior or senior in college with more than 120 credits. Each PCIP is assigned a mentor (GS-12 or higher). This experience offers exposure to the community planner role before committing to the DAF career track. If experience results in a positive reaction from intern and mentor, the intern can apply for the PAQ program, and the DAF will give them priority placement.

15.3. PALACE Acquire Program. The PAQ Program is a full-time, paid two (2) year developmental position on an accelerated promotion progression that concludes with a permanent position in Air Force Civil Service. The program is intended to provide high-potential candidates with ample training and mentorship to become our future Air Force Civilian Leaders. The program is funded by HAF through the central salary account, administered by AFPC, and managed by the CFT. Eligibility for the PAQ Program is limited to US Citizens within two years of graduating with an advanced degree and a GPA of 2.95 or greater.

15.4. Career Broadening. The CB program is an integral part of the DAF leadership development framework. It is designed to build functional and institutional competencies while enhancing leadership perspective. Although the CB program has a relatively short duration (36 months), the positions are complex and demanding. They aim to increase and broaden a civilian's experiences. Assignments are designed to enhance Community Planner's breadth of experience and diversity of thought. The key in determining which Career Broadening assignment to pursue is to consider which opportunity will enhance the strategic skills and perspective required to meet individual goals. The DAF advertises in the fall for positions between GS-13 and GS-15 with a 30-36-month assignment. The positions could be at the MAJCOM, Combatant Commands (COCOM), and HAF level CONUS and OCONUS. More information is available in DAFMAN 36-142, *Civilian Career Field Management and Centrally-Managed Programs*. Career broadening assignments are also advertised on USAJobs

(https://www.usajobs.gov/). Some career broadening positions are highlighted in Part II, Section D. Note, this is a snapshot in time and could change in the future.

15.5. Key Career Positions. KCPs are stepping-stones for individuals to gain expertise that may qualify them to move from functional experts to functional leaders. KCPs help applicants gain experience at the intermediate and headquarters levels. KCPs are peppered throughout AFCEC, AFIMSC, MAJCOM, and HQ DAF. These positions have a mobility agreement requiring the incumbent to move positions after three to five years. KCPs ensure multiple intermediate-level personnel can gain a breadth of experience. Positions are for GS-13 to 15 grades, with 36-month initial commitment with the possibility of an extension up to five years. Positions could be division chiefs, branch chiefs, and program managers at the Intermediate HQ level or HQ levels. At the installation level, the positions could include element or flight chiefs or deputy base civil engineers. Application for these positions occurs as part of the Civilian Vectoring process each fall. For more information on the KCP program contact the CE CFT KCP Program Manager at AFPC.CE.CFT@us.af.mil, and/or visit this CE CFT KCP SharePoint site at https://usaf.dps.mil/sites/10016/Career%20Development/Forms/AllItems.aspx?CID=3e962e8c%2D8400%2D418d%2D80c0%2D5e5084dd6f49&FolderCTID=0x0120006776F0FD15C4B54899A5E1EBDBAA2964&id=%2Fsites%2F10016%2FCareer%20Development%2FKey%20Career%20Position%20%28KCP%29

15.6. Civilian Strategic Leadership Program. The CSLP, codified in DAFMAN 36-142, is part of the DAF enterprise career development initiative that plays a crucial role in our talent management strategy for future strategic-level leaders. It offers experienced assignments to develop executive leadership competencies outside one's primary functional area by cultivating sustained high performance and challenging opportunities for growth. The positions include 0301 or 0343 series and can lead to advance Community Planners to the SES level Enterprise leaders. Candidates must show 12 months in current position, 12 months of supervisory experience, and a bachelor's degree. Assignments are 36-month GS-13, GS-14 or GS-15 (and equivalents) at the following levels: installation, MAJCOM, HAF, and COCOM. Application takes place through the annual DAF Civilian Development Call, open to GS-12 through GS-15 (and equivalent) members. Positions are advertised on myFSS (https://myfss.us.af.mil/USAFCommunity/s/view-file?id=069t000000hzKscAAE).

16. Acquisition Coding.

16.1. Acquisition Coding refers to positions identified as part of DAWIA. Along with personnel from other Civil Engineering occupational series (0028; 0193; 1170; 1176; 1601; 1640; all 04xx; all 08xx; all 13xx, and some 0301 and 0343 positions (job series details available at https://www.opm.gov/policy-data-oversight/classification-qualifications/classifying-general-schedule-positions/occupationalhandbook.pdf)), Community Planners (0020) are eligible for acquisition coding. Positions are typically identified to be acquisition coded if at least 50% of the individual's specific job duties correspond to an acquisition competency, as defined by the Defense Acquisition Workforce Position Category Description for Facilities Engineering. Planner positions can be identified as eligible due to the Community Planner's involvement throughout the life cycle of DAF facilities. 0020 positions classified as acquisition coded require additional training, which is further discussed in PART II, Section E.

16.2. Positions advertised as Acquisition Coded or converted to Acquisition Coded require the planner to complete initial training within 24 months. The IDP should reflect the requirement of Acquisition Coding for newly hired or designated positions. Document continuous learning requirements for Acquisition Coding on the IDP.

SECTION D: SKILL LEVEL TRAINING REQUIREMENTS

17. Not applicable for civil service positions.

SECTION E: RESOURCE CONSTRAINTS

18. Request for DAF Training. With supervisor's approval, employees can request to attend training and education opportunities to increase their occupational knowledge, skills, and abilities. There are multiple ways DAF employees can follow to obtain approval and funding to attend training and education opportunities.

19. Functional Training Data-call. The DAF has program element code 88751F to fund civilian functional/occupational training requirements across major commands, field operating agencies, direct reporting units, and force development flights. To identify annual training needs for the fiscal year, the Deputy Chief of Staff-Manpower, Personnel, and Services (AF/A1) issues a data-call to receive inputs using the Civilian Automated Training Input Program for DAF-wide consolidation. Funding for training is prioritized based on priority (**Table 7**). Due to limited resources, funding focuses on priority 1 requirements. Employees should discuss with their supervisor how to add their training/education need(s) to the data call response.

TABLE 7 PRIORITY LEVELS FOR CIVILIAN DEVELOPMENT TRAINING

Priority	Definition
1	Required by Public Law, Executive Order, DoD Directive (to include occupational certification and licensing, as defined in position description as a condition for continued employment). Priority indicator is classified as "Critical/Mandated."
2	Maintains and develops critical occupational/functional competencies identified by DAF publications or other guidance. Priority indicator is classified as "Essential."
3	Maintains and develops critical occupational/functional competencies as directed or identified by DAF MAJCOM (e.g., publications, memoranda). Priority indicator is classified as "Recommended."
4	Maintains and develops critical occupational/functional competencies as directed or identified by DAF installation (e.g., publications, memoranda). Priority indicator is classified as "Recommended."

Source:
https://www.afdw.af.mil/Portals/31/documents/AFDW%20University/Civilian_Automated_Training_Input_Program_Guide.pdf?ver=6YZ45yEDOwZq-CsXMv7ufQ%3D%3D

20.Tuition Assistance (TA). The goal of CTAP is to assist civilians in their continued self-development and includes coursework at the associate, bachelor's, master's, and doctorate levels at an accredited college or university. TA is used for course(s) that contribute to occupational and institutional competencies, special interest needs, and readiness by supporting the current and future needs of the DAF.

20.1. Eligibility. Funds are available for individuals who are permanent full-time appropriated fund employees (including wage grades). Applicants must currently have an acceptable performance appraisal rating and have an approved education goal in AFVEC (https://afvec.us.af.mil/afvec/public/welcome).

20.2. Funding Management and Limitations. TA is available for two (2) courses per semester/quarter. There is no limitation on the number of credit-by-exam tests. TA can be used

for up to 75% of the tuition cost but may not exceed $250.00 per semester hour or $166.00 per quarter hour and $4,500 per fiscal year. Students are responsible for the remainder of the expense.

20.3. TA can be used for 100% of credit-by-exam fees at an installation and/or fully funded testing center. TA does not pay professional certification fees, charges related to accrediting work or life experiences or the following examination fees: Graduate Management Admissions Test (GMAT), Graduate Records Examination, Law School Admission Test, Medical College Admissions Test, Standard Achievement Test, or Admissions College Test.

20.4. TA is not provided, in whole or in part, for courses for which the employee is receiving other federal or state tuition subsidies such as Veterans Administration educational benefits, scholarships or grants, etc. However, TA can be used in conjunction with student loans.

20.5. TA funded under CTAP is not an entitlement or condition of employment and past approved TA does not guarantee future funding. TA funding does not apply to courses at a level lower or equal to a degree already attained by the applying member.

21.TDY Funding. Many training opportunities exist away from the installation and personnel would attend in a Temporary Duty Status (TDY) that pays for transportation, lodging, meals, incidentals, and course costs. Funding for TDYs come from various sources to include TCES, AFCEC, MAJCOMs, and the Squadron unit.

Part II

SECTION A: SPECIALTY TRAINING STANDARD

1. Purpose. Formal training covers the classes, either in person or distance learning. A DAF Planner will need to establish technical competencies as well as learn DAF culture. Individuals will join the DAF Civil Service at different points in their career, and although this CFETP is written from the perspective of a Planner just starting out in their career, there are courses a Planner will have to accomplish to obtain competencies as an DAF Planner even if they are entering the DAF as an experienced professional. Formal training requirements are detailed in Part II Section E.

2. Substitutions training. As noted, college courses or another DoD Service planning course can be substituted for a required course. Planners joining DAF planning from another service or industry should review the training plan from the beginning to ensure they have adequate training in DoD planning.

3. Training requirements for PAQ interns. Additional training requirements for PAQ Interns can be found in **Table 16**. PAQ Interns must complete these courses in combination with the foundational required courses over their two-year internship.

4. Documentation of Training. Use the IDP at Part II Section C to document training requirements and completion of formal training requirements. Each Planner's IDP should be developed to ensure that the planner builds basic competencies and skills for DAF planning within 5 years of employment. After the minimum training requirements are met, Community Planners should develop a training plan to continually refresh skills in planning concepts.

5. Technical Competencies. Part I Section B is designed to ensure Planners have the technical competencies to successfully perform their jobs. As discussed in Part I Section B, the Technical Competencies for planners are Installation Development Planning, Compatible Use Planning, Asset Management, General Skills and Abilities, Cross Training, and Airfield/Airspace Safety. In addition, planners are encouraged to develop Leadership Competencies including Leading People, Business Acumen, Coalition/Team Building, Oral & Written Communications, and Organization Leadership.

6. Professional Certification and License Credentials.

6.1. Professional Certification is one of the professional credentials valued by the Community Planner Career Field. Planners should consider pursuing professional certification if they aspire to attain a leadership position. Typically, a Planner will find the American Institute of Certified Planners (AICP) certification beneficial. However, depending on their degree, they may pursue other certifications such as Leadership in Energy and Environmental Design (LEED), American Society of Landscape Architects (ASLA), and Economic Development Finance Professional (EDFP) Certification Program. A Planner may find additional technical

certification programs such as PMP, continuous process improvement, and Six Sigma certifications enhance the skills and knowledge necessary for becoming a successful planner and leader in the DAF community. Certification usually requires a commitment of time and money outside of the normal work environment, and planners are encouraged to discuss the various options with their supervisor and/or mentor. **Table 8** lists compatible certifications or licenses for Community Planners along with contact information.

6.1.1. Professional AICP certification through the APA is not required for most DAF Planners but is highly encouraged for Community Planners beginning at the installation level. OSD requires 32 hours of planning-related training biennially for all Community Planners, which corresponds with the required number of continuing maintenance credits required to maintain the AICP certification. Although not required, AICP certification is highly desired for intermediate and higher planning positions.

6.1.2. Information about the value of AICP certification, how to get certified, and certification maintenance is available at https://www.planning.org/aicp/. Training required to maintain acquisition coding may also fulfill the requirement for biennial DAF Planner training but will not likely fulfill the requirement for training required to maintain AICP certification. Planners should discuss with their supervisors the options for unit-funded reimbursement for certification costs.

6.1.3. Professional EDFP certification requires four courses offered through Grow America. According to the Grow America website, the courses focus on economic development analysis, real estate finance analysis techniques, loan packaging procedures, negotiating and problem-solving skills, deal structuring techniques. EDFP certification could benefit Community Planners who cover enhanced use lease or other commercial opportunities as well as lead in negotiating real estate deals.

6.2. Professional License is another option for Community Planners to consider. These include Registered Architect (RA) and Professional Engineer (PE). Both licenses are state issued to perform professional services and come with associated legal liabilities. A Community Planner (0020) interested in obtaining future positions under General Engineer (0801) or Architect (0808) series may want to pursue these professional licenses.

6.3. Additional detail on certifications and licenses may be found at DCOOL website (https://www.cool.osd.mil/dciv/index.html). The site allows users to search by occupational series code or title and find general information on credentialing relating to the individual federal occupational series. Clicking on a credential title in the system provides detailed information about the credential, such as a description, its eligibility requirements, exam topics, and recertification requirements.

2. SUPERVISOR	
a. SIGNATURE	b. DATE SIGNED

This document should be reviewed and updated annually. Opportunities identified are not an employee entitlement or a management commitment and are subject to approval and funding availability.

SECTION D: COMMUNITY PLANNER ELIGIBLE POSITION LIST

Tables 9-14 contain a non-exhaustive list of positions that exist across the enterprise offering non-supervisory and supervisory 0020, 0301, 0343, 0401, 0801, and 1170 positions at the initial, interim, and senior career stages, at installation, intermediate HQ, and higher HQ levels. *Non-interdisciplinary series Environmental (0401), Engineering/Architecture (0801), and Real Property (1170) positions might require additional licenses or certifications beyond typical Community Planner college degrees and might require appropriate additional skillset/ degrees/ certifications*. These positions will not necessarily ensure an individual can advance on the Enterprise track to the SES level but might prepare individuals to hold a position that could track to the SES level. While not required, it is highly recommended to begin with the PAQ Program or spend two years at an urban or regional planning position in public or private sector prior to applying for DAF Community Planning positions to better compete for available positions. Grades may vary across the DAF and be dependent on mission and organizational structure.

TABLE 9 NON-SUPERVISORY 0020/0301/0343/1170 EARLY CAREER

INSTALLATION LEVEL EARLY CAREER POSITIONS				
Job Title	**Office Symbol**	**Job Series**	**Grade**	**Description**
Community Planner – PAQ Program	CENP/ CENPL	0020	GS-0020-7 GS-0020-9 GS-0020-11 NH-2	**Installation level position in the Engineering Flight**. Eligibility limited to recent college graduates. Two-year entry-level developmental position designed to provide education and mentorship to achieve KSAs required to promote to full effective grade of GS-12 or NH-3.
Community Planner	CENP/ CENPL	0020	GS-0020-11 GS-0020-11/12 GS-0020-12 NH-02 NH-03	**Installation level position in the Engineering Flight.** Positions conduct master, site, and facility space planning; provide direct mission support to host, tenant, and all other units on the installation; and frequently serves as the conduit between outside the fence agencies and the installation.
Facility Space Planner (Interdisciplinary)	CENP/ CENPL	0020 0801 0808	GS-XXXX-12	**Installation level position in the Engineering Flight.** Positions serve as the Facility Space Planning professional responsible for managing activities related to human and physical aspects of facility planning. Also includes analyzing space use, space optimization, and project planning.
Environmental Program Manager (Interdisciplinary)	CEIE	0020 0401 0801	GS-XXXX- 7 GS-XXXX-9 GS-XXXX-11 GS-XXXX-12	**Installation level position in the Installation Management Flight.** Positions manage the administrative, financial, and technical elements of Cultural Resource Program, NEPA/EIAP, Natural Resource Program, hazardous

		0819 1301		materials/hazardous waste, air quality, water quality (stormwater, wastewater), tanks, integrated solid waste (recycling and composting), and environmental management system.
Environmental Program Manager Specialist (Interdisciplinary)	USSF	0020 0401 0819 1301	GS-XXXX-12	**Installation level position.** Space Force equivalent of Environmental Program Manager (Interdisciplinary) listed above.
Realty Specialists	CEIA	1170	GS-1170-7 GS-1170-9 GS-1170-11 GS-1170-12 NH-02 NH-03	**Installation level position in the Installation Management Flight.** Positions manage the administrative, financial, and technical elements of installation real property.
Geospatial Information Specialist/Program Manager	CENM	0301	GS-0301-11 GS-0301-12 NH-02	**Installation level position in the Engineering Flight.** Positions manage the survey and digital coding of the installation boundary, utilities, and real property through GIS. Requires beginner to intermediate GIS knowledge and training.
Emergency Management Specialist	CEX	0089	GS-0089-11	**Installation level position in the Emergency Management Flight.** Positions support a cross-functional emergency management program that integrates preparedness through prevention, protection, response, recovery, and mitigation activities in all-hazards physical threat environment.
Wing Plans and Programs	WG/XP	0343	GS-0343-12	**Installation level position in the installation's Wing.** Position responsible for planning/programming of infrastructure, personnel, environmental planning, and financial requirements in support of organizational mission objectives. Ensures treaty compliance. Programs /assesses installation resources to support near/far-term projects/ programs.

TABLE 10 SUPERVISORY 0020/0301 EARLY TO MID-CAREER POSITIONS

INSTALLATION LEVEL MID-CAREER POSITIONS				
Job Title	**Office Symbol**	**Job Series**	**Grade**	**Description**
Planning Section Chief (Interdisciplinary)	CENP/ CENPL	0020 0801 0808 0810 0830 0850	GS-0020-12 GS-0020-13 NH-03	**Installation level position in the Engineering Flight.** Positions serve as first level supervisors. Performs managerial authority over the Community Planner Section and is responsible for the oversight of master, site, and facility space planning, and provides direct mission support to host, tenant, and all other units on the installation.
Chief Information Manager	CENM	0301	GS-0301-11 GS-0301-12 NH-03	**Installation level position in the Engineering Flight.** Positions serve as first level supervisors.

				Performs managerial authority over the Geospatial Section and is responsible for the oversight of surveying and GIS data management. Requires intermediate to advanced GIS knowledge and training.
Environmental Element Chief (Interdisciplinary)	CEIE	0020 0401 0801 0819 1301	GS-XXXX-12 GS-XXXX-13	**Installation level position in the Installation Management Flight.** Positions serve as first level supervisors. Performs managerial authority over the Environmental Element and manages the administrative, financial, personnel, legal, and technical aspects of the Environmental Element.
Asset Accountability Element Chief	CEIA	0301	GS-0301-11 GS-0301-12 GS-0301-13 NH-03	**Installation level position in the Installation Management Flight.** Positions serve as first level supervisors. Performs managerial authority over the Asset Accountability Element and is responsible for the oversight of real property assets, financial and force management and information technology.
Portfolio Optimization Element Chief (Interdisciplinary)	CENP	0020 0801 0808 0810 0830 0850	GS-XXXX-12 GS-XXXX-13 NH-03	**Installation level position in the Engineering Flight.** Positions serve as first or second level supervisor. Performs as Chief and program manager, organizing, directing, and exercising control over Community Planning, Programming, and other sections. The Element is the Squadron's single office for base comprehensive planning, project planning, and requirements integration.

TABLE 11 NON-SUPERVISORY 0020/0301/0343/0801/1301 MID-CAREER POSITIONS

INTRIM HQ MID-CAREER POSITIONS				
Job Title	**Office Symbol**	**Job Series**	**Grade**	**Description**
AFCEC Environmental (Interdisciplinary)	CZ	0020 0401 08101 0819 1301	GS-0020-12 GS-0020-13	**Interim HQ position at AFCEC.** Six slots in AFCEC's Environmental Directorate. Position provides AFCEC with environmental technical and program support to one or more environmental programs through contracts, services, and product oversight. Specific areas of responsibility may include regulatory/ legislative support, environmental compliance, air and water compliance, natural and cultural resources, and environmental cleanup program support.
AFCEC Regional Planner	CIPR	0020	GS-0020-13	**Interim HQ position at AFCEC.** Three slots in Regional Planning Branch under AFCEC's Comprehensive Planning Division. Position responsible for identifying, preventing, and/or reducing mission sustainment and resilience challenges leading installation resilience.

AFCEC Regional Planner	CIPR	0801	GS-0801-13	**Interim HQ position at AFCEC.** Three slots in Regional Planning Branch under AFCEC's Comprehensive Planning Division. Position responsible for identifying, preventing, and/or reducing mission sustainment and resilience challenges. One position serves as the noise program manager, one position serves as the airfield waiver program manager, and one position serves as the AICUZ program manager.
AFCEC Community Planner	CIPL	0020	GS-0020-13	**Interim HQ position at AFCEC.** Three slots in Installation Planning Branch under AFCEC's Comprehensive Planning Division. Position supports implementation, sustainment, and evolution of installation planning programs and ensures civil engineering Asset Management processes are integrated into master (district), site, and transportation planning.
AFCEC Community Planner	CIPL	0801	GS-0801-13	**Interim HQ position at AFCEC.** One slot in the Installation Planning Branch under AFCEC's Comprehensive Planning Division. Position manages the Comprehensive Planning Platform.
AFCEC Facility Space Planner	CIPA	1301 0801	GS-XXXX-13	**Interim HQ position at AFCEC.** Two slots in facility space planning in Planning and Analysis Branch under AFCEC's Comprehensive Planning Division. Position leverages data-driven analysis to inform investment decisions across the DAF's real estate and real property portfolios. Position serves as analysts to support improving the way DAF manages installation level facility space planning.
AFCEC Facility Space Planner (Key Career Position)	CIPA	0020	GS-0020-13	**Interim HQ position at AFCEC.** One slot in facility space planning in Planning and Analysis Branch under AFCEC's Comprehensive Planning Division. Position leverages data-driven analysis to inform investment decisions across the DAF's real estate and real property portfolios. Position supports the facility space planning SME.
AFCEC Enhanced Use Lease Asset Manager	CIUE	0301	GS-0301-13	**Interim HQ position at AFCEC.** Six slots in Enhanced Use Lease Branch under AFCEC's Real Estate Development Division. Position serves as Enhanced Use Lease (EUL) Asset Managers responsible for developing, establishing, implementing and controlling reality, contractual, financial and technical aspects of assigned projects through EUL phases.
AFCEC Asset Manager (Interdisciplinary)	CFP	0020 0401 0801	GS-XXXX-13	**Interim HQ position at AFCEC.** One slot in Project Development and Investment Branch under AFCEC's Command Staff Division. Position provides asset management services supporting segments of Air Force Activity

		0804 0808 0810 0819 0830 0850 1301		Management Plans and/or the Air Force Comprehensive Management Plan.
ANG Community Planner	NGB/A4FR	0020	GS-0020-13	**Interim HQ position at ANG.** One slot in Plans and Requirements Branch of ANG. Position serves as the lead facility planner for the DAF National Guard Bureau.
AFRC Facilities Planner (Key Career Position)	AFRC/A4CD	0020	GS-0020-13	**Interim HQ position at AFRC.** One slot in Program Development Branch under AFRC's Civil Engineering Division. Position serves as the lead facility planner for the DAF reserve installations.
AF Mobility Command Integrated Planner	TSDCN	0020	NH-0020-03	**Interim HQ position at AFMC.** One slot to serve as the lead facility planner for AFMC MAJCOM.
AFIMSC Enterprise Planning Analyst	A54	0301	GS-0301-13	**Interim HQ position at AFIMSC.** Two slots in AFIMSC's Basing Division. Position analyzes DAF enterprise-wide installation complex data to determine the best investment strategy for the DAF built and natural infrastructure assets in support of DAF leaders.
AFIMSC Enterprise Basing and Beddown Branch Planning Analysts	A54J A54S	0301	GS-0301-13	**Interim HQ position at AFIMSC.** Two slots in AFIMSC's Joint Basing & Community Partnership and Strategic Basing & Posture Branches. Position analyzes DAF enterprise-wide installation complex data to determine the best investment strategy for the DAF built and natural infrastructure assets in support of AFIMSC, the Secretary of the Air Force, HQ USAF, MAJCOMs and installation commanders.
AFIMSC Strategic Initiatives Integrator	A53 A58	0301	GS-0301-13	**Interim HQ position at AFIMSC.** Three slots in AFIMSC's Capability Portfolio Integration & Optimization and Requirements Development, Program Management, and Policy Divisions. Position focuses on long-term forecast of installation investment requirements across AFIMSC enterprise using asset management principles.
AFIMSC Enterprise Planning Analyst (Interdisciplinary)	A57S	0020 0801	GS-XXXX-13	**Interim HQ position at AFIMSC.** One slot in the Strategy and Future Concepts Branch under AFIMSC's Strategy and Concept Development Division. Position serves as an enterprise planning analyst supporting the analysis of the Air Force enterprise-wide installation complex data to determine the best investment strategy for Air Force built infrastructure assets (including entire installations in support of AFIMSC, the Secretary of the Air Force, HQ USAF, MAJCOMs and installation commanders. The position supports the centralized

				Activity Integration for Air Force installation and Mission Support.
AFIMSC Enterprise Planner	A57 A54 DET 2 & 4	0020	GS-0020-13	**Interim HQ position at AFIMSC.** Six slots in AFIMSC's Requirements, Strategy & Future Concepts, and Basing & Beddown Branches. Position serves as enterprise planners providing support to the DAF installations.
AFIMSC Innovation Program Manager	A99	0343	GS-0343-13	**Interim HQ position at AFIMSC.** One slot in AFIMSC's Analysis, Assessments, and Lessons Learned Division. Position performs a broad range of critical thinking assignments related to installation and mission support entailing unique problems, creativity, innovative use of techniques, advanced approaches, and/or new technologies.
Community Liaison	CC	0301	GS-0301-14	**Installation Level position.** Positions located at the Wing level rather than in the Civil Engineer Squadron or Group. The position manages coordination with regional and local (off-base) entities to ensure compatible land use practices ensure mission sustainment.

TABLE 12 SUPERVISORY 0301/0801 MID-CAREER POSITIONS

INSTALLATION/INTERIM HQ MID-CAREER POSITIONS				
Job Title	**Office Symbol**	**Job Series**	**Grade**	**Description**
Installation Management Flight Chief	CEI	0301	GS-0301-13 GS-0301-14	**Installation Level position.** Positions serve as second level supervisors in the Installation Management Flight in Civil Engineer Squadron/Group. Performs as managerial authority over the Installation Management Flight Group. The position is responsible for providing systematic and integrated management of environmental, housing, and asset accountability elements to effectively execute the installation's mission, sustain quality of life, and optimize product and service delivery.
Supervisory Emergency Management Specialist	CEX	0301	GS-0301-09 / NH-03	**Installation Level position.** Positions serve as first level supervisors in the Readiness and Emergency Management Flight in Civil Engineer Squadron/Group. Performs the planning, directing, controlling, and administering of the installation's Emergency Management programs.
AFCEC Facility Space Planning Branch Chief	CIPA	0801	GS-0801-14	**Interim HQ position at AFCEC.** The position serves as the first level supervisor over the Facility Space Planning Branch under AFCEC's Comprehensive Planning Division. The position is responsible for providing effective management and optimization of installation facility space at the enterprise level.

AFCEC Regional Planning Chief	CIPR	0801	GS-0020-14	**Interim HQ position at AFCEC.** The position serves as the first level supervisor over the Regional Planning Branch under AFCEC's Comprehensive Planning Division. The position is responsible for providing installation resilience and encroachment planning at the enterprise level.
AFCEC NEPA Division Chief (Interdisciplinary)	CIE	0020 0401 0801 0819 1301	GS-XXXX-14	**Interim HQ position at AFCEC.** The position serves as first level supervisor over the Environmental Impact Analysis Division under AFCEC's Installation Directorate. The position provides direction, organization, and control over assigned employees. Position is responsible for oversight and execution of the DAF's Environmental Impact Analysis Process in accordance with the National Environmental Policy Act. Site-specific review and analysis of proposed activities and facilities work enables successful DAF execution of Military Construction, basing and beddown, airspace changes, and real property actions.
AFCEC Enhanced Use Lease Branch Chief, Real Estate Development Division	CIUE	0301	GS-0301-14	**Interim HQ position at AFCEC.** The position serves as the first level supervisor over the Enhanced Use Lease Branch under AFCEC's Real Estate Development Division. The position acts as the DAF Real Property expert to effectively optimize the development of DAF non-excess assets using Value Based Transaction tools, specifically the EUL program. The goal of the program is to proactively leverage EULs to successfully meet broad DAF asset management, energy, sustainment, and security goals.
AFCEC Compatible Use Development Branch Chief	CIUB	0301	GS-0301-14	**Interim HQ position at AFCEC.** The position serves as the first level supervisor over the Readiness & Environmental Protection Integration Branch under AFCEC's Real Estate Development Division. The position is responsible for facilitating the OSD REPI Program to limit encroachment and increase installation resilience.

TABLE 13 NON-SUPERVISORY 0020/0301/0343/0801/1301 LATE CAREER POSITIONS

INTERIM/HIGHER HQ LATE CAREER POSITIONS				
Job Title	**Office Symbol**	**Job Series**	**Grade**	**Description**
AFCEC Community Planner	CIPL	0020	GS-0020-14	**Late Career HQ position at AFCEC.** One slot under the Installation Planning Branch under AFCEC's Comprehensive Planning Division. Position leads DAF integrated installation planning support as the lead SME.
AFCEC Encroachment Planner	CIPR	0020	GS-0020-14	**Late Career HQ position at AFCEC.** One slot under AFCEC's Comprehensive Planning Division. Position leads DAF encroachment planning support as the lead SME.
AFCEC Facility Space Planner	CIPA	0801	GS-0801-14	**Late Career HQ position at AFCEC.** One slot in the Planning and Analysis Branch under AFCEC's Comprehensive Planning Division. Position leads DAF facility space planning as the facility space SME.
AFIMSC Community Partnerships and Joint Basing Program Manager	A54	0301	GS-0301-14	**Late Career HQ position at AFIMSC.** One slot in AFIMSC's Basing Division as the enterprise support analyst for specific CONUS-based installations, Joint Bases (JB) and Community Partnerships. This position integrates, synthesizes and synchronizes the efforts of multiple levels and activities to ensure mutual understanding and unity of effort in all functional program areas.
AFIMSC GeoBase Program Manager (Interdisciplinary)	A53I	0020 0801	GS-XXXX-14	**Late Career HQ position at AFIMSC.** One slot in the Information Resources Management and Integration Branch under AFIMSC's Capability Portfolio Integration and Optimization Division. The position responsibilities include managing the DAF GeoBase Program and DAF; providing expertise on enterprise-wide Geospatial Information and Services (GI&S) in support of AFIMSC; and providing in-depth analysis of DAF and AFIMSC GI&S requirements, and information and investment profile to meet strategic goals and support mission-critical needs.
A4P Installation Support Panel Planning and Programming Analysts (Interdisciplinary)	A4PR	0020 0801 0819	GS-XXXX-14	**Late Career HQ positions at A4P.** There is one Installation Support Panel (ISP) Planning Analyst position and one ISP Programming Analyst position supporting the Chief of the ISP.
A4C Community Planners	A4CPI	0020	GS-0020-14	**Late Career HQ positions at A4C.** Two slots under Installation Planning Branch of A4C's Strategy and Plans Division. One position serves as the strategic master planner for DAF installations and leads DAF in cross-coordination among military services for DoD planning policy. The second position

				serves as the DAF noise and encroachment strategic planner.
A4C Strategic Basing Program Analyst	A4CPI	0343	GS-0343-14	**Late Career HQ position at A4C.** One slot in the Installation Planning Branch of A4C's Strategy and Plans Division. Position performs basing cost benefit from an engineering perspective, represents A4C at strategic basing panels, and coordinates with SAF/IEI on strategic basing actions.
A4C Joint Basing Program Analyst (Career Broadening)	A4CPI	0343	GS-0343-14	**Late Career HQ position at A4C.** One slot in Installation Planning Branch of A4C's Strategy and Plans Division. Position responsible for leading DAF and JB partners through senior and leadership working groups to complete MOAs covering cost sharing, charters, working group arrangements, and other agreements.
A4C Senior Environmental Planner	A4CPI	1301	GS-1301-14	**Late Career HQ position at A4C.** One slot in Installation Planning Branch of A4C's Strategy and Plans Division. Position responsible for strategy/policy, oversight, and resource advocacy for activities related to National Environmental Policy Act compliance.
A4C Strategic Planner	A4CPS	0343	GS-0343-14	**Late Career HQ position at A4C.** One slot in the Strategy and Future Concepts Branch of A4C's Strategy and Plans Division. Position responsible for managing program requirements, objectives, and metrics related to strategic Civil Engineer initiatives.
A4C Housing Program Manager	A4CA	0301	GS-0301-14	**Late Career HQ position at A4C.** One slot in A4C's Asset Management Division, as the DAF program manager. Position responsible to develop and manage DAF's accompanied and unaccompanied housing programs worldwide.
A4C Senior Strategy Technical Advisor (Career Broadening)	A4CP and A4CX	0301	GS-0301-15	**Late Career HQ positions at A4C.** Two positions, one with A4C's Strategy and Plans Division and one with A4C's Readiness Division. Positions serve as informal Deputy Division Chiefs for the Divisions.
A4C Cyber Portfolio Management Integrator (Career Broadening)	A4CI	0301	GS-0301-15	**Late Career HQ position at A4C.** One slot in A4Cs Integration Division. Position supports A4C's Integration Division in the emerging area of control systems cybersecurity.
A4C Career Field Specialist (Career Broadening)	A4CI	0301	GS-0301-14	**Late Career HQ position at A4C.** One slot in A4Cs Integration Division. Position supports A4C's Integration Division as DAF CE career field specialist that helps guide CE careers at the enterprise level.
SAF Senior Strategic Technical Advisor	SAF/IEIP	0020	GS-0020-15	**Late Career HQ position at SAF.** One slot in SAF's Installations Planning Branch. Position serves as the senior strategic technical advisor to SAF covering

				environmental, real property, master, and encroachment planning.
SAF Legislative and Public Communication Manager	IEI	0301	GS-0301-15	**Late Career HQ position at SAF.** One slot in SAF's Installations Division. Position serves as the principal legislative liaison and public communication (L&PC) manager providing sound/timely L&PC guidance to the Assistant Secretary of the Air Force, the Principal Deputy Assistant secretary and the deputy assistant Secretaries for Installations, Environment, Energy, and Logistics. L&PC managers provide guidance on installation issues, strategic basing of weapons systems, encroachment, military construction, and military housing.
SAF Energy Program Administrator	OEA	0301	GS-0301-14	**Late Career HQ position at SAF.** One slot in SAF's Office of Energy Assurance (OEA). Position operates as the DAF energy storefront by serving as the single point of entry for all installation energy requirements. Office assists with developing standards of Installation Energy Plans for installations.

TABLE 14 0301/0343/0801/SES SUPERVISORY POSITIONS IN SENIOR CAREER (INTERIM/HIGHER HQ)

INTERIM/HIGHER HQ LATE CAREER POSITIONS				
Job Title	**Office Symbol**	**Job Series**	**Grade**	**Description**
AFCEC Business Information & Mission Support Director	CB	0301	GS-0301-15	**Late Career HQ position at AFCEC.** The position serves as the third level supervisor in the Business Information Systems & Mission Support Division under AFCEC's Command Staff Directorate to provide the functional bridge between AFCEC and the CE community. Responsibilities include: facilitating strategic planning alignment to AFCEC's mission requirements; delivering key support and processes enabling effective and efficient AFCEC organizational operations; and advocating and integrating innovative modernization across the AFCEC Enterprise.
AFCEC Director, Mission Sustainment Division	CBM	0301	GS-0301-15	**Late Career HQ position at AFCEC.** The position serves as the second level supervisor in the Mission Sustainment Branch under AFCEC's Business Information Systems & Mission Support Division that develops acquisition strategies to execute the CE enterprise investment strategy while providing world-class mission support to AFCEC and applying Category Management principles across the DAF.

AFCEC Director, Installations Directorate and Deputy Director	CI	0301	GS-0301-15	**Late Career HQ positions at AFCEC.** 2 positions serving as Director and Deputy Director for AFCEC's Installations Directorate, which provides enterprise-wide housing solutions, and conducts the strategic acquisition, management, and disposal of DAF real property. These positions also execute the Deputy Assistant Secretary of the Air Force for Installations' land and facilities policies through a full suite of services, including appraisals, lease renewals, licenses, easements, title opinions, environmental cleanup and transfer of property impacted by Base Realignment and Closure legislation, and other support services.
AFCEC Real Estate Division Chief	CIU	0301	GS-0301-15	**Late Career HQ position at AFCEC.** The position serves as the second level supervisor in the Real Property Development Division under AFCEC's Installations Directorate to identify and develop real property value-based transactions by forming long-term collaborative efforts with private industry to develop projects that provide economic benefit and foster stronger relations with local communities. Responsibilities include utilities privatization, EUL and REPI. The division also provides sustained, full-spectrum management of real property value-based portfolio projects at all levels and ensures lease compliance for value-based transactions and project financials analysis and monitoring.
AFCEC Comprehensive Planning Division Chief	CIP	0301	GS-0301-15	**Late Career HQ position at AFCEC.** The position serves as the second level supervisor in the Comprehensive Planning Division under AFCEC's Installations Directorate delivering agile planning solutions, guidance, and strategies to achieve resilient, mission aligned, right sized installations, directly supporting DAF combat capabilities to prevail in the face of great power competition.
AFCEC Energy Program Director	CN	0801	GS-0301-15	**Late Career HQ position at AFCEC.** The position serves as the third level supervisor in AFCEC's Office of Energy Assurance responsible for providing energy resilience capability to DAF enterprise through engineering and acquisition experts. Also conducts analyses to identify mission-critical energy and water vulnerabilities, execute actionable solutions, and support installation-level resilience planning.
AFCEC Program Development/ Investment Division Chief	CFP	0301	GS-0301-15	**Late Career HQ position at AFCEC.** The position serves as the second level supervisor in Project Development & Investment Division under AFCEC's Facility Engineering Directorate providing support to the enterprise activity

				management framework through the delivery of a near-to-mid-term infrastructure investment strategy and project programming for installation complexes across the FSRM, UMMC, and MILCON portfolios.
AFIMSC Installation Support Directorate Mission Activity Integration Division Chief	A54	0301	GS-0301-15	**Late Career HQ position at AFIMSC.** The position serves as the second level supervisor under AFIMSC's Basing Division providing enterprise-wide Installation and Mission Support capabilities and services to enable strategic and long-term planning to achieve mission and vision through engagement, governance, people, process improvement and resource efficiency.
A4C Division Chief, Integration	A4CI	0301	GS-0301-15	**Late Career HQ position at A4C.** The position serves as A4C's Division Chief for Integration and as the CE Civilian Career Field Manager for Civil Engineering career fields.
SAF Director, DAF Community Partnership and Encroachment	IEI	0343	GS-0343-15	**Late Career HQ position at SAF.** The position serves as Director for Air Force Community Partnerships and Encroachment in the Office of the Assistant Secretary of the Air Force for Installations, Environment and Energy.
SAF Director, Strategic Basing	IEI	0343	GS-0343-15	**Late Career HQ position at SAF.** The position serves as Director of Strategic Basing in the Office of the Assistant Secretary of the Air Force for Installations, Environment and Energy.
SAF Energy Program Administrator	OEA	0301	GS-0301-14	**Late Career HQ position at SAF.** The position serves in OEA as the single point of entry for all installation energy requirements. Office assists with developing standards of Installation Energy Plans for installations.
Senior Portfolio Manager (CSLP Position)	SOUTHCOM	0343	GS-0343-15	**Late Career HQ position at SOUTHCOM.** Supervisory career broadener position with SOUTHCOM.
Facility/ Infrastructure Specialist	SPACECOM	0301	GS-0301-15	**Late Career HQ position at SPACECOM.** Supervisory Tech Advisor for Facilities Requirement and Execution for USSPACECOM (Joint Staff).
AFCEC Senior Advisor to AFCEC/CC (Interdisciplinary)	CA	SES	SES	**Late Career HQ position at AFCEC.** The position serves as Senior Advisory to the Director, AFCEC by assisting the commander in leading AFCEC missions including facility investment planning, design and construction, operations support, real property management and oversight, energy support, environmental compliance and restoration, and readiness and emergency management.

AFIMSC Executive Director, (Interdisciplinary)	CA	SES	SES	**Late Career HQ position at AFIMSC.** The position serves as Senior Advisory to the AFIMSC commander and is responsible for enterprise-wide installation and mission support capabilities for installations world-wide, ensuring transparent and standardized intermediate-level oversight, policy, and guidance for installation engineering, protection services, and operations support.
SAF Deputy Assistant Secretary of the DAF for Installations (Interdisciplinary)	IEI	SES	SES	**Late Career HQ position at SAF.** The position serves as Deputy Assistant Secretary of the DAF for Installations responsible for the management, policy and oversight of DAF installation programs, including base closures and realignments, installation strategy, the DAF EIAP, strategic basing, compatible and joint land use, public/private partnerships, the REPI program, encroachment management, housing privatization, utilities privatization, and real property transactions.

SECTION E: TRAINING COURSE INDEX

7. Purpose. This section of the CFETP identifies a sampling of technical and non-technical training courses available for Community Planners. Additional information for the courses can be obtained at the Education & Training Course Announcements website, accessed through the DAF Portal.

8. Air Force Supervisory Courses. These courses prepare civilians throughout the DAF and apply regardless of job series.

8.1. DAF New Supervisors Course: The New Supervisor Course was developed to meet federal requirements contained in Title 5 of the Code of Federal Regulations and the National Defense Authorization Act of 2010. It is a federally mandated requirement for all first-time supervisors of civilian employees (first-level supervision) to complete within one year of becoming a supervisor. The course covers topics mandated by the DoD Supervisory Learning and Evaluation Framework. It gives supervisors of civilian employees a sound foundation in supervisory skills and fundamentals. For more information and registration, please visit the Air University Supervisor/Manager Courses section at: https://www.airuniversity.af.edu/CLDS/Supervisor-Manager/.

8.2. DAF New Manager Course: The New Manager Course was developed to meet federal requirements contained in Title 5 of the Code of Federal Regulations and the National Defense Authorization Act of 2010. It is a federally mandated requirement for all first-time managers of civilian employees (second- and third-level supervisors) to complete within one year of becoming a manager. The course covers topics mandated by the DoD Managerial and Supervisory Learning and Evaluation Framework. It gives managers of civilian employees a sound foundation in supervisory skills and manager fundamentals. For more information and registration, please visit the Air University Supervisor/Manager Courses section at: https://www.airuniversity.af.edu/CLDS/Manager/.

8.3. Military Personnel Management Course (MPMC): The MPMC is designed for civilians who are first-level supervisors of DAF military personnel. While not required, sister service military personnel supervising DAF military personnel are permitted to attend. The MPMC is delivered over 4 weeks (including orientation week) with one, 75–90-minute instructor-led online webinar each week. There are approximately (up to) 2.5 hours, each week, of self-paced readings, videos, activities, and other course materials which are located on a learning management system available to students 24/7. Students are required to successfully meet all coursework requirements to complete the course. For more information and registration, please visit the Air University Supervisor/Manager Courses section at: https://www.airuniversity.af.edu/CLDS/Supervisor-Manager/.

8.4. Experienced Supervisor Course: The Experienced Supervisor Course was developed to meet federal requirements contained in Title 5 of the Code of Federal Regulations and the National Defense Authorization Act of 2010. It satisfies the federal requirement for supervisory refresher training at least once every three years after completing the initial supervisory courses and is required for civilian supervisors with supervisory code 1, 2, and 4. The course covers topics mandated by the DoD Supervisory Learning and Evaluation Framework. https://www.airuniversity.af.edu/CLDS/Supervisor-Manager/.

9. Civil Engineer Courses. **Tables 15-22** cover courses designed to enhance the knowledge and skills of Community Planners both new to the DAF and those new to CE. They are

recommended for Community Planners at the appropriate Tier in their career. This section identifies and provides a description of the recommended training, education, professional development, and experience to empower Community Planners working at the installation level. They define a path from Foundational to Expert. These courses are taught by AFIT, Civil Engineer School on Wright-Patterson AFB, OH. Courses are offered for basic and continuing education units. The curriculum is reviewed annually by the Education and Training Review Committee of the DAF Civil Engineer career field to ensure it meets the educational needs of the officers, enlisted and civilians of the career field.

9.1. The formal training requirements for planners cover the first three years through late career strategic classes. Tier 1 covers required courses during the first five years after hire date, including PAQ intern program. Tier 2 covers advanced required skill courses during years 4 and 5 from the date of hire and specialty area courses to consider taking during years 4 through 6 after date of hire. Tier 3 includes courses to prepare planners to supervise or seek intermediate positions during years 5 through 10 from the date of hire and specialty courses in airfield management and transportation planning. Tier 4 provides courses to prepare planners for branch chief positions and strategic late career positions. Each class contains a link to classes through AFIT or other course providers. Planners should use this section as a checklist to track the completion of mandatory courses. Planners can also use the Individual Development Plan (Part II Section C) to track their training priorities over time.

9.2. Tier 1 (Foundational Skills). Community Planners and Planning Section Chiefs must complete all courses within the first 3 years from the date of hire (**Table 15**).

TABLE 15 TIER 1 FOUNDATIONAL SKILLS TRAINING PLAN

Tier 1 (Foundational Skills) – First 3 years of Air Force Employment				
Skill Area	**Description**	**Course**	**Applicability**	**Link**
Air Force Culture / Organizational	Environment, function, and culture of the USAF (DAF Heritage, Institutional Basics, Customs/Courtesies, Wingman Concepts, Force Development, and Personnel Administration).	*New Employee self-paced distance learning	Required within 90 days of hire date	AF NEO V1.1
Air Force Culture / Organizational	Basic understanding of Air Force Civil Engineer doctrine, history, capabilities, and related functions; the responsibilities of each flight within the objective Civil Engineer squadron, how the Civil Engineer squadron and its flights interface with other organizations, and how to plan and execute various programs within each of the flights.	*WMGT 100 Air Force Civil Engineer Basic Civilian Course (AFIT) self-paced distance learning	Required within 90 days of hire date (32 hours)	WMGT 100
Investigations & Surveys	Geographic Information Systems: Understand fundamental components and capabilities of GIS to analyze project operations and support decision making.	ESRI course or previous GIS experience	Required within 90 days of hire date	ESRI Basic Course
Installation Development Planning	Introduce DAF master planning and increase ability to implement and manage the installation comprehensive planning process. The course is organized along three areas of instruction: (1) Introduction to Organization and Role (2) Core Competencies of the Planner (3) Ancillary Planning Information and Professional Development.	*WENG 519 Air Force Installation Planning Principals (AFIT) Self-paced distance learning	Required Within 2 years of hire date (28 hours)	WENG 519
Compatible Use/ Encroachment	Air Installations Compatible Use Zones program and including noise, legal aspects, and various case studies.	AICUZ workshop	Required within 2 years of hire date (course offered every two years)	DENIX AICUZ Workshop
Environmental	National Environmental Policy Act and how it applies to the base planning process, as well as present key Environmental Planning considerations and recent regulatory changes	NEPA Fundamentals for Installation Planners	Required within 2 years of hire date	AFCEC NEPA Training
Installation Development Planning	Design studio focused on preparing a conceptual Area Development Plan from the development of a vision to the preparation of an Illustrative Plan. Includes an understanding of how to design and how decisions are shaped by physical, economic, political, social, environmental, and cultural considerations. In addition, introduces additional graphic and technical tools and teaches how to prepare a program for short- and long-term development.	*WENG 520 Comprehensive Planning & Development (AFIT) 5 days in residence	Required within 3 years of hire date (Pre-requisite: WENG 519	WENG 520
Investigations &	Learn how to use GIS to create	*DAF GIS for	Required within 3	ESRI or NGA

Surveys	maps, edit data layers, analyze spatial information to support DAF master planning efforts.	Planners or equivalent	years of hire date	

* Required for all new DAF Planners regardless of grade.

9.3. Tier 1 (PAQ Intern Requirements). All courses below must be completed within the two-year PAQ program.

TABLE 16 TIER 1 PAQ INTERN TRAINING PLAN

Tier 1: PAQ Intern Required Courses				
Skill Area	**Description**	**Course**	**Applicability**	**Link**
Project Management	Individual knowledge-based objectives that provide students with the ability to identify the program's purpose, policies, and structure along with the Air Force Incident Management System. This course serves as the foundation for follow-on specialized area training.	AFEMPC (ZZ133131) Installation Emergency Management Program – AF Emergency Management Program Course	Required within 2 years of hire date	AFEMPC
Project Management	Second part of two-part course consists of individual knowledge-based objectives that provide students with the ability to identify the purpose, policies, structure, roles, responsibilities, and procedures for conducting DAF emergency response operations. The second part of the course consists of localized training accomplished at the installation level.	AERO and FERC courses Air Force Emergency Response Operations & First and Emergency Responders	Required within 2 years of hire date	AERO/FERC
Project Management	Principles and terminology of Air Force Project Management. Introduction to the phases of DAF project management: planning & programming, design & contracting, construction, and closeout. Concepts introduced throughout this course include time management, cost management, and quality management of DAF construction projects.	WMGT 322 Introduction to Project Management (AFIT) Self-paced distance learning	Required within 2 years of hire date	WMGT 322
Project Management	Fundamentals of government contract preparation, such as determining acquisition strategies, conducting market research, contract type, source selection and methods of contracting. The course also teaches the basics of organizing, writing, and coordinating Statements of Works and Performance Work Statements as well as teaching the fundamentals of managing contracts such as modifications, inspection, documentation, and remedies for poor performance. Other topics include cost estimating, small business, A-E source selection, and familiarization with the Federal Acquisition Regulation.	WMGT 421 or ACQ 101 (required for AQ coded positions) Contracting for Civil Engineer (AFIT) 8-day Live Broadcast	Required within 2 years of hired date (if filling an AQ position complete ACQ 101 within 2 years of hired date)	WMGT 421 ACQ 101

Project Programming	Overview of project planning and programming. It also defines project requirements, determines work classification, selects appropriate funding avenues (Operations &Maintenance, MILCON, UMMC, Non-Appropriated Funds, etc.), and develops programming documents.	WMGT 423 Project Programming (AFIT) 10-day Live Broadcast	Required within 2 years of hire date	WMGT 423
Project Programming	Improve cost-estimating skills and understand the responsibilities of the cost estimator. Complete RSMeans course (e.g. Construction Cost Estimating Concepts and Practice).	RSMeans Course (as identified by PAQ team)	Required within 2 years of hire date	RSMeans
Project Management	Broad understanding of the overall facilities engineering process and the roles/responsibilities of acquisition team members as they relate to the facility lifecycle in support of military missions.	FE 201, DAU Intermediate Facilities Engineering (DAU) Self-paced distance learning 14 hours	Required within 2 years of hire date	FE 201
Project Management	Apply the principles of Project Management to Civil Engineering projects. Concepts will enhance abilities to ensure that quality construction projects are delivered on time and on budget. Specific topics include project planning, project scheduling, construction management, change management, and construction close-out.	WMGT 422 Project Management (AFIT) 9-day Live Broadcast	Required within 2 years of hire date	WMGT 422
Environmental	Fundamental understanding of the National Environmental Policy Act and the Air Force Environmental Impact Analysis Process regulation. Provides ongoing education on EIAP responsibilities for members proposing projects/actions and Environmental Planning Function personnel. Key topics include NEPA law/Executive Orders, roles and responsibilities, EIAP and planning integration, funding, affected environment/consequences, proponent responsibilities, Categorical Exclusion application, Environmental Assessments and Environmental Impact Statements, public involvement, consultations, effective writing, and mitigation.	WENV 450 Environmental Impact Analysis Process (AFIT) 4 days in residence	Required within 2 years of hire date	WENV 450

9.4. Tier 2 (Advanced Skills). Community Planners and Planning Section Chiefs must complete both courses between 4th and 5th year after the date of hire into the position.

TABLE 17 TIER 2 ADVANCED TRAINING PLAN

Tier 2 (Advanced Skills) – Years 4-5 of Air Force Employment				
Skill Area	**Description**	**Course**	**Applicability**	**Link**
Asset Management	Fundamental concepts and principles of asset management; topics include basic asset management principles, decision making, and DAF asset management-related policies.	*WMGT 301 Introduction to Asset Management (AFIT) Self-paced distance learning 10 hours	Required within **5** years of hire date	WMGT 301
Project Management	Fundamentals of government contract preparation, such as determining acquisition strategies, conducting market research, contract type, source selection and methods of contracting. The course also teaches the basics of organizing, writing, and coordinating Statements of Works and Performance Work Statements as well as teaching the fundamentals of managing contracts such as modifications, inspection, documentation, and remedies for poor performance. Other topics include cost estimating, small business, A-E source selection, and familiarization with the Federal Acquisition Regulation.	WMGT 421 Contracting for Civil Engineering (AFIT) 8-day Live Broadcast	Required within **5** years of hire date (PAQ interns already fulfilled requirement)	WMGT 421

* Required for all new DAF Planners regardless of grade.

9.5. Tier 2 (Additional Training Opportunities). These courses offer topics for Community Planners/Planning Section Chiefs interested in developing a specialty.

TABLE 18 TIER 2 ADDITIONAL TRAINING PLAN

Tier 2 (Additional Training Opportunities) – Years 4-6 of Air Force Employment				
Skill Area	**Description**	**Course**	**Applicability**	**Link**
Building Design	Explore different aspects of resilience management, to control and help reduce the rapidly increasing costs of manmade and natural hazards, and ensure that civil infrastructure exhibits a high degree of resilience. Design considerations to increase resilience primarily through strengthening and configuration to minimize impacts from natural and manmade hazard events will also be addressed.	Whole Building Design Guide – Building Resilience Considerations and Strategies	Within 6 years of hire date	WBDG - BRCS

Compatible Use Program	Understand the Readiness and Environmental Protection Integration Program, a tool for combating encroachment.	REPI Seminars or Sustaining Military Readiness Conference Online, available on REPI website	Within 6 years of hire date	REPI WEBSITE
Compatible Use Program	Understand the Compatible Use Program (previously Joint Land Use Study Program).	Online, available at OLDCC website	Within 6 years of hire date	OLDCC Guidebook
Project Programming	Understand the concepts, principles, processes and practices associated with the life cycle (acquisition, management, accountability, and disposal) of DAF real property assets.	WMGT 424 Realty Management (AFIT) 5-day Live Broadcast	Within 6 years of hire date	WMFT 424
Investigations & Surveys	SMS Builder Level 1 (View Only). Students will be introduced to the Sustainment Management System (SMS) BUILDER so they can be granted “Read Only” rights to the system. Students will gain a foundational knowledge of BUILDER, so they better understand the role it plays in CE processes and how it dovetails with Asset Management principles.	WMGT 131 SMS BUILDER LEVEL 1 (AFIT) Self-paced distance learning 1 month	Within 6 years of hire date	WMGT 131

9.6. Tier 3 (Expert Skills). These courses are designed to be completed by individuals with 5 years or more experience to enhance their knowledge and skillsets in preparation to work in a supervisory or intermediate position.

TABLE 19 TIER 3 EXPERT SKILLS TRAINING PLAN

Tier 3 – Expert skills from Years 5 through 10 to Prepare for Supervisory or Intermediate Positions				
Skill Area	**Description**	**Course**	**Applicability**	**Link**
Installation Development Planning	Activity management through the introduction of concepts that build its foundation. Covers basic principles of asset visibility, data analysis, identifying requirements, measuring performance, financial resources, planning horizons and strategies, and the various business rules that govern the obligation of centralized funds.	WMGT 417 Activity Management (AFIT) 5-day Live Broadcast	Within 10 years of hire date	WMGT 417
Project Management	Overview of project planning and programming. It also teaches how to define project requirements, determine work classification, select appropriate funding avenues (O&M, MILCON, UMMC, NAF, etc.), and develop programming documents.	WMGT 423 Project Programming (AFIT) 10-day Live Broadcast	Within 10 years of hire date (PAQ interns already fulfilled requirement)	WMGT 423
Environmental	Fundamental understanding of the NEPA and the Air Force Environmental Impact Analysis Process regulation. Key topics	WENV 450 Environmental Impact Analysis Process	Within 10 years of hire date (PAQ interns	WENV 450

	include NEPA law/Executive Orders, roles and responsibilities, EIAP and planning integration, funding, affected environment/consequences, proponent responsibilities, Categorical Exclusion application, Environmental Assessments and Environmental Impact Statements, public involvement, consultations, effective writing, and mitigation.	(AFIT) 4 days in residence	already fulfilled requirement)	
Environmental	Basic knowledge of the tribal consultation process, cultural awareness and the importance of engaging with Tribal nations on matters that affect them.	Department of the Interior - Consulting with Tribal Nations (DOI) 3 days in residence	Within 10 years of hire date	Consulting with Tribal Nations
Financial Management	Fundamental DAF financial management principles and theories as well as fiscal law. Also includes learning how to apply these fundamentals to a civil engineer organization and interrelationship with AFCEC and AFIMSC.	WMGT 412 Fundamentals of Financial Management in Civil Engineering (AFIT) 10-day Live Broadcast	Within 10 years of hire date	WMGT 412
Project Management	Broad understanding of the overall facilities engineering process and the roles/ responsibilities of acquisition team members related to the facility lifecycle in support of military missions.	FE 201, DAU Intermediate Facilities Engineering (DAU) Self-paced distance learning 14 hours	Within 10 years of hire date (PAQ interns already fulfilled requirement) Pre-requisite FE 101.	FE 201
Project Management	Through realistic, scenario-based learning, professionals work in teams to practice developing solutions to a variety of challenges that Facilities Engineering (FE) professionals encounter within DoD.	FE 302V, DAU Advanced Facilities Engineering (DAU) 4-day virtual course	Within 10 years of hire date Pre-requisite FE 101 and FE 201.	FE 302V
Explosive Safety	Comprehensive review of explosives safety quantity distance standards and the application of these standards, as well as technical training in the preparation and review of plans submitted for various explosives facilities.	Defense Ammunitions Center – AMMO-36 Explosive Safety For Naval Facility Planner (DAC) 5-day in-residence	Within 10 years of hire date Pre-requisite two other Naval explosive safety courses highly recommended	AMMO-36

9.7. Tier 3 (Specialization Skills). These courses are designed to increase specialized skills in airfield management and transportation planning.

TABLE 20 TIER 3 SPECIALIZED SKILLS TRAINING PLAN

Tier 3 – Specialization Skills				
Skill Area	**Description**	**Course**	**Applicability**	**Link**
Compatible Use Program	The scope of training includes Airfield Safety, Bird/Wildlife Aircraft Strike Hazard Plan, Visual Air Navigation Facilities & Airfield Markings, Air Traffic Control and Landing Systems /Airspace/Airfield Criteria, Airfield Discrepancy Management, Airfield Maintenance and Construction, Pavement Evaluation Reports, Contingency Operations Under Various Design Criteria, Parking Plans, and Strategic Plans.	Education & Training Course Announcements (ETCA) Advanced Airfield Managers (ETCA) 20 days in residence	As mission allows	ETCA
Transportation Planning	Seminars provide guidance on traffic engineering and safety considerations along roadways, intersections, and at entry control facilities (ECF). Also covers planning, design, and operations of ECFs considering security, safety, and traffic requirements.	Surface Deployment and Distribution Command Transportation Engineering Agency - Traffic Engineering & Safety Seminars (SDDCTEA) 1 week in residence	As mission allows (course is free but the unit must pay for travel costs)	SDDCTEA

9.8. Tier 4 (Installation Level Branch Chief). These courses are designed to prepare for installation level branch chief level positions.

TABLE 21 TIER 4 BRANCH LEVEL POSITIONS TRAINING PLAN

Tier 4 – Prepare for Installation Level Branch Chief Positions				
Skill Area	**Description**	**Course**	**Applicability**	**Link**
Air Force Culture / Organizational Leadership	Comprehend strategic financial management concepts, principles, and programs to lead within the civil engineer organization while providing effective financial decision support utilizing asset management principles.	WMGT 513 (AFIT) 5 days live broadcast	As mission allows	WMGT 513
Air Force Culture / Organizational Leadership	Apply leadership principles to flight-level supervision and management. Topics include asset accountability, housing, and environmental programs. Course includes concepts within discussions, case studies, and practicums.	WMGT 531 (AFIT) 5 days in residence	As mission allows	WMGT 531

9.9. Tier 4 (Additional Training for Strategic Level Positions). These courses prepare students for advanced DAF positions at Intermediate and HQ levels.

TABLE 22 TIER 4 STRATEGIC LEVEL POSITIONS TRAINING PLAN

Tier 4 – Additional Training for Strategic Level Positions				
Skill Area	**Description**	**Course**	**Applicability**	**Link**
Air Force Culture / Organizational Leadership	Emphasizes the application of air and space power in joint campaign planning and the operational art of war. Students explore national security issues, strategy and war theory, airpower and space power history and theory, expeditionary DAF employment concepts, and the capabilities and limitations of DAF and space force, and its sister services contributions to joint force commanders.	Air Command and Staff College Version 8.0 (ACSC) self-paced distance learning	As mission allows Must be GS-11 through GS-13 & 2 years civil service	ACSC SDE Program
Air Force Culture / Organizational Leadership	Based on the five core areas central to all levels of professional military education—leadership, profession of arms, warfighting, national/ international security, and communication studies. Provides a strategic, "air-minded" curriculum that prepares graduates to provide strategic leadership, appropriate expertise and critical thinking in support of national security objectives.	Air War College Senior Development Education Program (AWC) self-paced distance learning	As mission allows Must be GS-13 through GS-15	AWC SDE Program
Financial Management	Help senior leaders interpret the planning programming and budgeting processes in terms of strategic leadership. Provides guidance to the federal budget process, congressional input, planning guidance, PPBE, and the DAF flow of funding.	BUF300 – Planning Programming and Budgeting for Leaders Self-paced distance learning	As mission allows	BUF300
Air Force Culture / Organizational Leadership	Develop interpersonal communication and leadership skills as a DAF civilian pursuing future leadership roles. Develop skills in team building, technical credibility, conflict management, problem solving, accountability, and decisiveness.	Civilian Associate Degree Program - Associate Degree in Leadership and Management Studies (CADP) self-paced distance learning, 2 years 5 months	As mission allows	CADP

9.1. Other training offered by the DAF includes monthly virtual training lasting between one and two hours in length and covering vital DAF Community Planner topics including master, site, facility space, encroachment, and transportation planning. Community Planners at all echelons are encouraged to attend these monthly sessions.

9.2. Other Classes. Planners could also benefit from classes geared toward improving presentation, public speaking, and the basics on how to run a meeting. Technical classes on Excel and data management also benefit Planners given installation planning relies on various data types (i.e., socio-economic, census, survey results) and data sizes (i.e., installation-wide facility space dataset or 24-hour traffic data count).

9.3. Interdisciplinary Positions Covering Planning Skillsets. Two community planning positions fall into interdisciplinary category to create opportunities for personnel in other series positions to try parallel discipline or assignment. Specific Community Planning (0020) series positions must adhere to the full training plan. Other parallel positions listed below must complete a modified training program. It is important that DAF personnel engaging in assignments covering master, site, or facility space planning follow at least a rudimentary understanding of DAF planning principals and processes.

9.3.1. Facility Space Planner (Series 0020/0810/0808). Position requires a focus on Facility Space Optimization Plan and ongoing facility space assignments with a rudimentary knowledge of DAF master planning. The courses below with an asterisk must be completed. The other optional courses listed provide additional support to the Facility Space Planner.

- *AF NEO V1.1, New AF Employee Training
- *WMGT 100, AF CE Basic Civilian Course
- *ESRI Basic Course, Introduction to Geographic Information Systems
- *WENG 519, Air Force Installation Planning Principals
- *WMGT 301, Introduction to Asset Management
- WMFT 424, Realty Management
- WMGT 131, SMS Builder Level 1

9.3.2. Portfolio Optimization Chief (Series 0020/0801/0808/0810/0830/0850). Position manages Community Planners and at some installations, Planning Section Chiefs. Knowledge of master, site, and facility space planning is vital to understand as the leader of the planning group. The courses below with an asterisk must be completed in addition to required courses covering programming and energy topics. The other optional courses listed provide additional support.

- *AF NEO V1.1, New AF Employee Training
- *WMGT 100, AF CE Basic Civilian Course
- *ESRI Basic Course, Introduction to Geographic Information Systems
- *WENG 519, Air Force Installation Planning Principals
- *DENIX AICUZ Workshop, Air Installation Compatible Use Zone Workshop
- *WMGT 301, Introduction to Asset Management
- *WMGT 421, Contracting for Civil Engineering
- OLDCC Guidebook, Compatible Use Program
- WMFT 424, Realty Management
- WMGT 131, SMS Builder Level 1
- Courses listed in **Table 19** (expert skills)

9.4. Intermediate and Headquarter Community Planning (0020) positions operate at a higher-level focal point than installation planners. Training at this level requires a similar level of basic and advanced planner training to ensure the expertise and strategic thinking incorporates the installation level planning exposure.

9.4.1. ANG and AFRC Lead Facility Planners (0020). Positions assist the ANG and AFRC installation with their master planning tasks. Knowledge of master planning and contracting is important to understand and implement. The courses below with an asterisk must be completed. The other optional courses listed provide additional support.

- *AF NEO V1.1, New AF Employee Training
- *WMGT 100, AF CE Basic Civilian Course
- *ESRI Basic Course, Introduction to Geographic Information Systems
- *WENG 519, Air Force Installation Planning Principals
- *WENG 520, Comprehensive Planning & Development
- *DENIX AICUZ Workshop, Air Installation Compatible Use Zone Workshop
- *WMGT 301, Introduction to Asset Management

- *WMGT 421, Contracting for Civil Engineering
- OLDCC Guidebook, Compatible Use Program
- WMFT 424, Realty Management

9.4.2. AFCEC/AFIMSC Planners (0020). Positions assist DAF installations with master, site, facility space, and encroachment planning. Depending on the branch, knowledge of master, site, and/or facility space planning is important. The courses listed in **Table 23** with a check box must be completed and those with an asterisk are other optional courses to provide additional support.

TABLE 23 AFCEC/AFIMSC TRAINING PLAN

Course	Name	AFCEC/CIPL AFIMSC A54/A57 AFIMSC DETs	AFCEC/CIPR	AFCEC/CIPA

SECTION F: UNIQUE REQUIREMENTS – REPORTING PLANNER TRAINING

10. On 5 February 2019, Ms. Nancy Balkus, Deputy Director, Directorate of Civil Engineers (AF/A4C) signed a memorandum requiring bi-annual reporting of DAF Planner training. The requirement generated from an Office of the Secretary of Defense Directive for the USAF to report on DAF planner competency (defined as 32 hours of training biennially) at the annual Program Objective Memorandum briefing. The requirement relates to the Infrastructure Investment Strategy Objective to "Strengthen Installation Planning," as properly trained planners are "foundational to the successful implementation of Installation Development Plans."

DEPARTMENT OF THE AIR FORCE
HEADQUARTERS UNITED STATES AIR FORCE
WASHINGTON, DC

MEMORANDUM FOR ALMAJCOM/A4C
AFIMSC/IZ
ANG/A4A
AFRC/A4C
ALL CES/CC

FROM: AF/A4C
1260 Air Force Pentagon
Washington DC 20330

SUBJECT: Interim Master Planning Training Memorandum

The Air Force Infrastructure Investment Strategy includes an objective to Strengthen Installation Planning, to ensure that Installation Development Plans (IDP) align infrastructure requirements and investments with the National Defense Strategy. Requirements for IDPs are outlined in the Unified Facilities Criteria (UFC) 2-100-01, *Installation Master Planning*.

Properly trained planners are foundational to successful implementation of IDPs. The Office of the Secretary of Defense has directed the United States Air Force (USAF) to provide training for planning personnel and develop a method to report on planner competency, defined as 32 hours of training biennially, during annual Program Objective Memorandum briefings. This Memorandum formally implements that direction for USAF personnel as described below.

This memorandum applies to headquarters personnel serving in planning positions or supporting installation planning, and Community Planners, described in Air Force Instruction 32-7062, *Comprehensive Planning* (usually in the Civil Engineer career field, series 0020).

This memorandum does not apply to military personnel, interns, supervisors of planners, those serving as community liaisons, planners in career broadening positions, or local national and contractor personnel when existing agreements or performance work statements don't require training. Local National and Base Operations Support contracted employees shall report training only if required in existing agreements or performance work statements.

No later than 31 Jan 19 AFIMSC, AFRC and ANG should develop interim procedures to track training (e.g. the CE DASH Sharepoint Tools Function or similar). Longer term, other tools will be considered to collect data (e.g. the Civilian Personnel website, Management Internal Control Toolset (MICT), etc.). Training shall be reported by 15 Jul 19 and 15 Jan 20.

Planners shall report at minimum their status as Active, Guard, or Reserve, the base and command name, trainee's name, and number of hours of training completed. Planners may report

2

currency of American Institute of Certified Planners accreditation in lieu of training hours. Note: planners should also track completed training in their individual training records.

Training opportunities for master planning support personnel are attached. Questions regarding this memorandum may be directed to Laura Yates at laura.e.yates4.civ@mail.mil.

NANCY J. BALKUS, P.E., SES
Deputy Director of Civil Engineers
DCS/Logistics, Engineering, & Force Protection

10.1. Who is Required to Report?

- The Installation Planner, regardless of job series, but usually a 0020, must report training.
- Planners holding planning positions at the intermediate or headquarters levels (e.g. AFIMSC, AFCEC, ANG, AFRC, A4C, SAF) must report.
- The reporting requirement does not apply to military personnel, interns, supervisors of planners (except Planning Section Chiefs and Portfolio Optimization Chiefs), community liaisons (not in planning positions), planners in non-planning career broadening positions, local national planners, or contracted personnel (unless the existing agreement or contract requires training).
- AICP certified planners in good standing shall report only AICP certified status.

10.2. What qualifies for planner training?

Training opportunities laid out in this CFETP meet the planning training requirement assuming training increases a planner's ability to do their jobs, understand planning concepts, and understand the DAF enterprise.

- Annual Total Force training, repeat training (taking the same qualifying course more than once), and non-planning, non-DAF related training (hobbies, sports, etc.) do not qualify for the reporting requirement.

10.3. Training Reporting.

- The requirement is to complete 32 hours of training every two years (eight hours every six months). Training shall be reported every six months, for the period of 1 Jan – 30 Jun no later than 3 July, and for the period of 1 Jul – 31 Dec no later than 3 Jan.

- Reporting Mechanism:
    - Regular DAF planners shall report training using the CE Dash Page.
    - ANG and AFRC planners shall report training to NGB/A4 or AFRC/A4 in accordance with NGB/A4 and AFRC/A4 direction. NGB/A4 and AFRC/A4 shall submit NGB and AFRC planner training information to A4CP using CE dash or via e-mail.

10.4. Training Details.

- An hour of training is measured as follows:
    - Presentations shall be measured as an Academic 60 minutes (40–50-minute presentation with discussion).
    - Formal training is measured as 1 CEU = 1 hour.
    - University/College is measured 1 credit = 1 hour.
- DoD training does not have to be AICP approved to meet the biennial DAF training requirement. AICP certified training does meet the biennial DAF requirement.
- Personal Tracking of Training. In addition to reporting training biannually on the CE Dash page, planners are encouraged to maintain their own log of completed training, to include topic/title, date and duration, and to report this training by updating their professional development on their Civilian Career Report in MyBiz, available at the DCPDS portal. Note: If the 0020 is in an acquisition-coded position, Continuing Education requirements for the acquisition-coded positions will also meet the DAF planner training requirements.

SECTION G: UNIQUE REQUIREMENTS – PLANNING TRAINING FOR LEADERSHIP

11.UFC 2-100-01, *Installation Master Planning*, highly encourages new Wing Commanders, Mission Support Group Commanders and Civil Engineers to obtain 4 hours of master planning-related training before or within the first six months of assuming command.

11.1. Air University, Commander's Professional Development School. (https://www.airuniversity.af.edu/Eaker-Center/CPDS/)

11.1.1. Required for new Wing and Vice Commanders

- Commander's Professional Development School, MLMDC-800, USAF Wing Commander's Seminar (43.5-hour course, 30-minute block of instruction on CE perspective includes some orientation of planning as it relates to the Infrastructure Investment Strategy. CE issues related to planning may also be discussed in an hour and a half Q&A panel).
- Senior Officer Legal Orientation (14-hour course, 1 hour block of instruction on Environmental Law): covers environmental planning, airspace & ranges, mission sustainment (encroachment).

11.1.2. Required for new Mission Support Group and Vice Commanders

- Commander's Professional Development School, MLMDC-810, USAF Mission Support Group Commander's Seminar (55.5-hour course, 1 hour block of instruction on CE includes orientation of planning activities conducted by Engineering Flights).
- Senior Officer Legal Orientation (14-hour course, 1 hour block of instruction on Environmental Law): covers environmental planning, airspace & ranges, mission sustainment (encroachment).

11.2. Air Force Institute of Technology**.** (https://www.afit.edu/CE/):
Required for Civil Engineer Squadron Commander and Deputy Base Civil Engineer-selects.

- WMGT 400, Civil Engineer Commander's Course, 2-week course.

11.2.1. Commander's Resources.

- Comprehensive Planning Platform Website.
- Installation and Infrastructure Action Plan
- The Air Installations Compatible Use Zones (AICUZ) Program: The Commander's Role.
- AICUZ Program
- AICUZ FAQ
- DoD's Readiness and Environmental Protection Integration Program Buffer Partnerships
- Commander's Guide to Understanding and Supporting Working Forests
- Community and Environmental Noise Primer
- Military Noise quick Guides
- Working with Conservation Districts: A Guide for Military Installations
- Working to Preserve Farm, Forest and Ranch Lands: A Guide for Military Installations
