AFSC 1T0X1
Survival, Evasion, Resistance, Escape Specialist

CAREER FIELD EDUCATION AND TRAINING PLAN

ACCESSIBILITY: Publications and forms are available for downloading or ordering on the e-Publishing web site at www.e-Publishing.af.mil.

RELEASABILITY: There are no releasability restrictions on this publication.

SUMMARY OF CHANGES. This publication was changed to embrace Air Force Foundational Competencies, SERE Specialist Occupational Competencies, and map deliberate development pathways. Updates to the specialty description and requirements for entry, award and retention of AFSC are also included. The specialty training standard (STS) was substantially revised and must be completely reviewed.

SERE Specialist Arch, Beret, and Flash Device Heraldry

The SERE Specialist career field was born in 1947 when Gen Curtis LeMay created the first survival training program at Marks AFB, AK. Demand for training increased, and Gen LeMay moved the school to Camp Carson, CO in 1949. The first arch can be traced back to this approximate point in time. In 2004, the CSAF, Gen John P. Jumper, through the 96th Uniform Board, authorized the current versions of the SERE Specialist arch, beret, and flash device, preserving enlisted history dating back to the inception of the Air Force as a separate service. Only enlisted Airmen who successfully complete the most challenging survival course in the Department of Defense (DoD) earn the right to wear the arch, beret, and flash device. Each year, very few select Airmen achieve this accomplishment.

The SERE Specialist Arch stands for the dedication and sacrifice of each Airman who has earned it. Its origins are rooted in the US Army's Ranger tab, as Gen LeMay recruited many of the first cadre from Ranger units. Over the years, the distinctive scroll-shaped arch worn on the left shoulder has evolved, but its meaning stays constant: It symbolizes the Air Force's commitment to ensure at-risk service members are prepared for the rigors of isolation in hostile environments and can Return with Honor.

The SERE Specialist Beret and Flash Device set their wearers apart from other military specialties. The pewter-green beret represents the unique skills and expertise that SERE Specialists possess, serving as a visible representation of their commitment to the career field. The flash device depicts a bald eagle in front of a compass rose with barbed wire across it. The bald eagle stands for freedom and the strength that SERE Specialists embody, while the compass rose symbolizes navigation and direction, reflecting the skills and training that SERE Specialists undergo to prepare others to evade and escape captivity. The barbed wire serves as a poignant reminder of the challenges and obstacles that prisoners of war have overcome and the sacrifices they have made.

CAREER FIELD EDUCATION AND TRAINING PLAN
SURVIVAL, EVASION, RESISTANCE, ESCAPE SPECIALIST
AFSC 1T0X1

PART I

Preface

1. The Career Field Education and Training Plan (CFETP) is a comprehensive education and training document that identifies life cycle education and training requirements, training support resources, and minimum core task requirements for AFSC 1T0X1 – Survival, Evasion, Resistance, Escape (SERE) Specialist. The CFETP provides personnel with a clear career path to success and instills rigor in all aspects of career field training. **Note:** Civilians occupying associated positions use **Part II** to support duty position qualification training.

1.1. This CFETP introduces a competency-based force development model to ensure personnel are ready and capable of performing their assigned duties as SERE Specialists. The occupational competencies should be used by all SERE Specialists and their supervisors/mentors/commanders to evaluate proficiency throughout a career and guide force development efforts.

1.2. The CFETP provides personnel pathways to success and creates a foundation for the Air Force (AF) to ascertain the knowledge, skills, abilities, and other characteristics required to develop the Airmen we need.

2. The CFETP consists of two parts. Supervisors plan, manage, and control development requirements within the occupational series using both parts of the plan.

2.1. **Part I** provides information necessary for overall management of the specialty. **Section A** explains how individuals will use the plan. **Section B** identifies career field progression information, duties and responsibilities, training strategies, and career field path. **Section C** associates each level with specialty qualifications (e.g., knowledge, education, experience, training, and other). **Section D** indicates resource constraints (e.g., funds, manpower, equipment, facilities). **Section E** identifies transition training guide requirements for E-5 through E-7.

2.2. **Part II** includes the following: **Section A** identifies the STS and includes duties, tasks, and technical references (TR) to support training, Air Education and Training Command (AETC) conducted training, wartime course and core task and correspondence course requirements. **Section B** contains the course objective list and training standards supervisors use to determine if service members satisfy training requirements. **Section C** identifies available support materials (e.g., a qualification training package, which may be developed to support proficiency training). **Section D** identifies a training course index supervisors can use to determine resources available to support training to include both mandatory and optional courses. **Section E** identifies major command (MAJCOM) unique training requirements supervisors can use to determine additional training required for the associated qualification needs. At unit level, supervisors and trainers use **Part II** to identify, plan, and conduct training commensurate with the overall goals of this plan.

Abbreviations and Terms Explained

Air Force Career Field Manager (AFCFM). The Air Force focal point for the designated career field within a functional community. Serves as the primary advocate for the career field, addressing issues and coordinating functional concerns across various staffs. Responsible for career field policy and guidance.

Air Force Job Qualification Standard/Command Job Qualification Standard (AFJQS/CJQS). A comprehensive task list that describes a particular job type or duty position used by supervisors to document task qualifications. The tasks on AFJQS/CJQS are common to all persons serving in the described duty position.

Air Force Specialty (AFS). A group of positions (with the same title and code) that require common qualifications.

Air Force Specialty Code (AFSC). A five-digit alphanumeric code with potential prefixes and suffixes added to identify each career field within the Air Force.

Behavior. An activity performed to achieve objectives of the job. Involves observable (physical) components and unobservable (mental) components. Behaviors consist of the performance of one or more tasks.

Coaching. Relationship where an uncertified or certified professional coach provides technical support focusing on development of mentees based on their identified performance need.

Competencies. Observable, measurable pattern of knowledge, skills, abilities, behaviors, and other characteristics needed to perform institutional or occupational functions successfully.

Competency Model. A collection of competencies that together defines successful performance in a particular work setting. Competency models are the foundation for important human resource functions such as recruitment and hiring, training and development, and retention. Competency models can be developed for specific jobs, job groups, organizations, occupations, or missions. Some competency models include information about the levels of competence, mastery, or proficiency required at different occupational levels.

Core Task. Tasks the AFCFM identify as minimum qualification requirements for everyone within an AFSC, regardless of duty position. Core tasks may be specified for a particular skill level or in general across the AFSC.

Course Training Standard (CTS). Training standard identifies the training members receive in a specific course.

Department of the Air Force Enlisted Classification Directory (DAFECD). The official directory for all military enlisted classification descriptions, codes, and identifiers. The specialty descriptions and codes will be used to identify each Air Force specialty (valid requirements) and describe the minimum mandatory qualifications of personnel to fill these positions. The updated

DAFECD is available on the myFSS website.

Education and Training Course Announcement. Contains specific MAJCOM procedures, fund cite instructions, reporting instructions, and listings for those formal courses conducted or managed by the MAJCOMs or field operating agencies (FOAs). The education and training course announcement contains courses conducted or administered by the Department of the Air Force (DAF) and serves as a reference for the AF, DoD, other military services, government agencies, and security assistance programs.

Enabling Learning Objective (ELO). An ELO states the instructor's expectations of student performance and the steps in accomplishing the Terminal Learning Objective.

Foundational Competencies. A set of accepted and valued competencies (e.g., Airman's Foundational Competencies), which enable success across a wide array of DAF missions, roles, functions, and duties. AFH 36-2647, *Competency Modeling*, contains a complete list of foundational competencies and defining characteristics.

Functional Manager. Senior leaders, designated by the appropriate functional authority who provide day-to-day management responsibility over specific functional communities at the MAJCOM, FOA, DRU, or Air Reserve Command (ARC) level. While they should maintain an institutional focus regarding resource development and distribution, functional managers are responsible for ensuring their specialties are equipped, developed, and sustained to meet the functional community's mission as well as encourage force development opportunities in order to meet future needs of the total AF mission.

Occupational Competencies. A set of competencies required of all Airmen within a specific workforce category (a group of functions requiring similar work, i.e., engineering). They describe technical/functional skills, knowledge, abilities, behaviors, and other characteristics needed to perform that function's mission successfully.

On-The-Job Training (OJT). Hands-on, "over-the-shoulder" training conducted to certify personnel in both upgrade (skill level award and job qualification) and position certification training.

Specialty Training Requirements Team (STRT). Air Force career field managers use this forum and quality control tool to determine and manage career field education and training requirements.

Specialty Training Standard (STS). An AF publication that describes an AF specialty in terms of tasks and knowledge an airman in that specialty may be expected to perform or to know on the job. Also identifies the training provided to achieve a 3-, 5-, or 7-skill level within an enlisted AF specialty. It further serves as a contract between AETC and the functional user to show which of the overall training requirements for an AFSC are taught in formal schools and correspondence courses.

Standard. An exact value, a physical entity, or an abstract concept, the appropriate authority, custom, or common consent sets up and defines to serve as a reference, model, or rule in

measuring quantities or qualities, developing practices or procedures, or evaluating results. A fixed quantity or quality.

Terminal Learning Objective (TLO). A TLO states the instructor's expectations of student performance at the end of a specific lesson or unit. Each TLO includes a condition, task, and a standard.

Utilization and Training Workshop (U&TW). Career field managers use the utilization and training workshop process to develop and review training programs within an AFS or civilian occupational series. The goal of the utilization and training workshop process is to develop architecture for effective life-cycle training to be provided at appropriate points throughout a career path and to ensure that personnel within the specialty or series are properly employed.

Wartime Course. Comprised of those tasks that must be taught when courses are accelerated in a wartime environment. Wartime tasks are the tasks to be taught in the 3-level course when the wartime courses have been activated. In response to a wartime scenario, these tasks are taught in the 3-level course in a streamlined training environment. These tasks are only for those career fields that still need them applied to their schoolhouse tasks.

Section A – General Information

1. Purpose. This CFETP provides the information necessary for CFMs, MAJCOM functional managers (MFMs), commanders, unit training managers (UTMs), supervisors and trainers to plan, develop, manage, and conduct an effective and efficient career field training program. This plan outlines the training individuals in this AFS will receive to develop and progress throughout their career. This plan identifies initial skills, upgrade, qualification, advanced and proficiency training. Initial skills training is the AFS specific training an individual receives upon entry into the AF or upon retraining into this specialty for award of the 3-skill level. Normally, this training is conducted by AETC at one of the technical training centers. Upgrade training identifies the mandatory courses, task qualification requirements, and correspondence course completion requirements for award of the 3-, 5-, 7-, 9-skill level. Qualification training is actual hands-on task performance training designed to qualify a member in a specific duty position. This training program occurs both during and after the upgrade training process. It is designed to provide the performance skills and knowledge required to do the job. Advanced training is formal specialty training used for selected service members. Proficiency training is additional training, either in-residence or exportable advanced training courses, or OJT provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade. The CFETP has several purposes—some are:

1.1. Serves as a management tool to plan, manage, conduct, and evaluate a training program. It is also used to help supervisors identify training and development at the appropriate point in an individual's career.

1.2. Identifies competencies, sub-competencies, and proficiency levels and recommends education and training throughout each phase of an individual's career.

1.3. Lists training courses available in the specialty, identifies sources of training, and the training delivery method.

1.4. Identifies major resource constraints that impact full implementation of the desired career field training process.

2. Uses of the CFETP. MFMs and supervisors at all levels will use the CFETP to ensure comprehensive and cohesive training and development programs are available for everyone in the specialty. Individuals will review career goals and progression with supervisors and mentors during scheduled performance feedback and mentoring sessions.

2.1. AETC training personnel develop or revise formal resident, nonresident, field, and exportable training based upon requirements established by the users and documented in **Part II** of the CFETP. They also work with the CFM to develop acquisition strategies for obtaining resources needed to provide the identified training. Resourcing will be determined through the instructional systems development processes, based on AF/A34S requirements, and coordinated through the MAJCOMs.

2.2. MFMs and supervisors ensure their training programs complement the CFETP mandatory initial, upgrade, and proficiency requirements. OJT, resident training, and contract training or

exportable courses can satisfy identified requirements. Ensure MAJCOM-developed training to support this AFSC is identified for inclusion into the plan.

2.3. Each individual completes the mandatory training requirements specified in this plan. The list of courses in **Part II** is a reference to support training.

3. Coordination and Approval. The CFM is the approval authority. Also, the CFM will initiate an annual review of this document to ensure currency and accuracy. MAJCOM representatives and AETC training personnel will identify and coordinate the career field training requirements. Using the list of courses in **Part II** ensures elimination of duplicate training.

Section B – Career Progression and Information

4. Specialty Description.

4.1. Specialty Summary. Plans, performs, supervises, and leads SERE functions of preparation and execution to allow for mission planning, personnel recovery (PR) mission execution and application of airpower across the full spectrum of military operations in all geographic and environmental conditions. May be employed alone or part of an AF, joint, interagency or coalition force in support of Combatant Commander's contingency plans, response and PR access objectives. Prepares all at risk of isolation personnel for SERE across the full range of military operations. Conducts preparation of the environment activities as part of a supporting or supported force to survey areas for evasion, recovery corridors, contact sites, cache site establishment, areas of interest and physical infrastructure. Provides positive control of recovery/contact sites and caches. Synchronizes joint, interagency, intergovernmental, multinational, and commercial (JIIM-C) efforts for full spectrum PR. Assesses and develops partner nation recovery capabilities through foreign internal defense security force assistance and building partnership capacity. Operates in the seven geographic disciplines of Arctic, Coastal, Desert, Jungle, Mountain, Urban, and Water. Operates in wartime, peacetime or hostage captivity environments, day or night to include friendly, denied, hostile, or sensitive areas. Related DoD Occupational Subgroup: 101200.

4.2. Duties and Responsibilities.

4.2.1. Deploys in support of operational requirements for Joint Force Commanders as in-theater SERE and PR subject matters experts (SME) to support conventional, special operation forces (SOF) and Assisted Recovery. Manages development and coordination of SERE and PR operations. Manages SERE programs including isolated personnel reports (ISOPREP), evasion plans of action (EPA), blood chits, evasion charts (EVC), and PR aids. Augments Joint Personnel Recovery Center (JPRC), Assisted Recovery Coordination Center (ARCC) and all DoD Component Recovery Coordination Cells (PRCC) as SERE and PR SME.

4.2.2. Synchronizes JIIM-C efforts for full spectrum personnel recovery. Assesses and develops partner nation PR capabilities.

4.2.3. Plans, coordinates, and conducts operational preparation of the environment activities with

operations and intelligence directorates of the DoD, external agencies, North Atlantic Treaty Organization, and coalition entities to develop and establish physical infrastructure to support areas for evasion, recovery corridors, contact sites, and potential cache sites.

4.2.4. Responsible for the verification and transmission of areas for evasion, recovery corridors, contact sites, areas of interest, potential cache sites and infrastructure.

4.2.5. Deploys into permissive, hostile, denied, or politically and/or diplomatically sensitive environments, and forward operating locations to participate in the full spectrum of military operations to include air expeditionary force, force projection, counterinsurgency, counter narcotic, counterterrorism, irregular warfare, foreign internal defense , unconventional warfare, security force assistance, humanitarian assistance, noncombatant evacuation operations and operational preparation of the environment as a part of supporting or supported force to enable full spectrum personnel recovery and global access.

4.2.6. Performs tactical mission planning and preparation. Understand conventional and special operations tactics, techniques, and procedures (TTP).

4.2.7. Plans, organizes, directs, and conducts SERE preparation activities. Designs and develops curriculum, functional structure, and procedures for SERE courses and programs. Determines training schedules according to course control documents, directives, policies, and instructional principles. Conducts classroom, laboratory, and operational training. Uses lecture, demonstration and performance, guided discussion, case study, and time and circumstance instructional methodology. Conducts training under conditions closely approximating actual SERE episodes.

4.2.8. Develops and implements SERE joint tactics, techniques, and procedures (JTTP). Assists in developing theater PR infrastructure, concept of operations (CONOPS) and recommends changes.

4.2.9. Instructs and performs static line, military free fall, and emergency parachuting techniques in support of premeditated jump programs, formal jump training, and SERE Initial and Refresher Training. Performs parachutist duties in support of approved DoD exercises. SERE Specialists are designated AF subject matter experts for aircrew parachute egress in an operational environment, at home station or deployed.

4.2.10. Conducts Research Developmental Testing and Evaluation (RDT&E) and Operational Testing and Evaluation (OT&E) on Guardian Angel and SERE/aircrew equipment.

4.2.11. Coordinates SERE activities to support PR related exercises. Performs observer and controller duties for all at risk of isolation personnel to ensure safety of participants, appropriate learning outcomes, and documents lessons learned.

4.2.12. Inspects and evaluates SERE training and PR operational support programs. Determines readiness and efficacy of equipment, supplies, and training aids. Ensures standardization and compliance with policies, directives, course control documents, risk management (RM) procedures, operational guidance, and instructional methodology.

4.2.13. Performs and supervises self-contained underwater breathing apparatus (SCUBA) and water operations in support of SERE initial and refresher training.

5. Competencies. The Air Force defines competencies as a combination of knowledge, skills, abilities, and other characteristics that manifest in observable and measurable pattern of behaviors required for mission success. The SERE Specialist community has rebuilt the entire training platform by using competencies to identify the behaviors that are needed to be successful on the job. This was accomplished by identifying and integrating the 1T0X1, SERE Specialist occupational competencies and leveraging the AF's foundational competencies in a manner that provides all Airmen with transparent and unbiased pathways towards their own successful development.

5.1. Airman's Foundational Competencies. The foundational competencies are a set of accepted and valued competencies, which enable success across a wide array of DAF missions, roles, functions, and duties. These competencies are the core of Airmen development and enable Airmen with tools, pathways, and capabilities to improve their performance in any job, specialty, or situation. The foundational competencies are grouped into different categories of Developing Self, Developing Others, Developing Ideas, and Developing Organization. Airmen can go to myVector (accessible via AF Portal) to complete a self-assessment, which will have them evaluate themselves on the 23 Airmen's foundational competencies or a 360-degree assessment, where subordinates, peers, and leaders can also provide feedback. The assessment tools will provide Airmen with immediate feedback on personal strengths and areas for improvement. Additionally, a personal improvement plan with targeted resources (videos, reading content, developmental opportunities) are provided for continued self-development.

Figure 5.1. Airman's Foundational Competencies.

5.2. Occupational Competencies. Occupational competencies are a set of competencies required of all Airmen within a specific workforce category. These competencies provide a framework that describes the knowledge, skills, abilities, and other characteristics needed to perform that function's mission successfully.

5.3. Occupational Competency Model. A career field's competencies can be viewed in a competency model, which is an organized collection of competencies pertinent to the career

field. The occupational competency model provides a framework to effectively assess, maintain, and monitor the competencies required for mission success for Airmen within the SERE Specialist community. The occupational competency modeling process follows a distinct process with continued involvement from the career field and allows Airmen to see how their task lists, OJT, formal courses, and other training, education, and experiences are aligned to the career field's strategic objectives.

5.4. Career fields work with trained competency experts to identify and develop their competency model, which consists of the competencies, sub-competencies, and definitions. Occupational competency models will be different for each career field. The model focuses on integrating not just the technical components, but also leadership, management, combat, joint, all-domain, and social mastery competencies required for Airmen to succeed in their career field.

Table 5.1. 1T0X1 SERE Specialist, Occupational Competency Model.

Competency	Sub-Competency	Sub-Competency Description
Leadership	Leadership	The ability of an individual to influence, motivate, develop, and empower others to contribute towards the effectiveness and success of an organization.
Management	Personnel Management	The process of planning, scheduling, and allocating personnel to projects and programs to achieve mission objectives.
	Resource Management	The process of forecasting, acquiring, allocating, and managing resources to achieve mission success.
	Program Management	The process of leveraging allocated manning and resources to control and guide program outcomes in accordance with applicable guidance and directives.
Engagement	Communication	The process of receiving, synthesizing, and presenting clear, concise, and accurate messaging through tailored verbal, nonverbal, and written information to achieve objectives.
Instruction	Instruction	Deliver clear, concise, and comprehensive instruction of tasks, procedures, or concepts, aligning with the desired learning outcomes.
Personnel Recovery	Prepare	Preparing commanders and staffs, forces, and potential isolated personnel to conduct personnel recovery through policy and doctrine, education and training, and equipment.
	Plan	The deliberate process of determining how to use military capabilities in time and space to achieve objectives while considering the associated risks.
	Execute	The process of conducting operations to report, locate, support, recover, and reintegrate.
	Adapt	Utilizing reintegration, assessments, lessons learned, requirements, and exercise feedback to develop and modernize preparation, planning, and execution.
SERE	Survival	The process of maintaining life, well-being, and functionality in the face of challenges, threats, and adverse conditions.
	Evasion	The deliberate employment of tactics to avoid detection, capture, or engagement by enemy forces.
	Resistance	Actions taken by captured personnel to maintain life, maintain honor, and avoid providing intelligence, propaganda, or aid to the enemy across the full spectrum of captivity.

	Escape	The process of planning and execution of escape tactics from captivity.
Specialized Skills	Jump	The process of conducting deliberate personnel parachute operations.
	Mountaineering	Operations that expose personnel to adverse and technical terrain with significant environmental hazards that obstruct movement, where risk and mobility increase proportionally, and safety is dependent on technical knowledge and proficiency in specialized tactics, techniques, procedures, and equipment.

5.5. Occupational Competency Rubric. After a model is developed, a team of subject matter experts begin building competency rubrics, which consists of competency, a description of the competency, proficiency levels, and measurable and observable behaviors. The competency rubrics will help Airmen learn which behaviors are aligned to the career field's strategic direction, the professional developmental expectations, and the criteria for success. **Table 5.2** provides an example of a competency rubric for 1T0X1 career field.

Table 5.2. 1T0X1, SERE Specialist Occupational Competency Rubric for Instruction.

Competency	Proficiency Levels	Observable Behaviors
Instruction	**Expert** Depth of Knowledge: New practices/concepts and theories of all workplace elements; is a credible resource in this area	1. Designs and implements comprehensive assessment strategies to evaluate learning outcomes 2. Leverages subject matter expertise to develop training and instructional materials
Sub-Competency	**Advanced** Depth of Knowledge: New practices of all workplace elements	1. Adapts a variety of teaching strategies to engage and challenge learners 2. Utilizes emerging technology to improve learning 3. Fosters a positive and comprehensive learning environment by considering holistic development of learners
Instruction		
Description	**Intermediate** Depth of Knowledge: Established practices of all workplace elements	1. Identifies different learning styles within the group to adapt teaching methods. 2. Provides relevant examples and analogies to enhance understanding of key concepts. 3. Facilitates discussions to encourage active participation. 4. Mentors and guides other instructors to enhance student learning outcomes.
Deliver clear, concise, and comprehensive instruction of tasks, procedures, or concepts, aligning with the desired learning outcomes.		

Supporting Competencies		
Communication Information Seeking Leadership Develops People	**Basic** Depth of Knowledge: Established practice with some workplace elements	1. Conveys lesson objectives clearly and concisely to enhance key concepts. 2. Demonstrates patience and understanding to address audience questions and concerns. 3. Uses instructional aids to effectively meet learning objectives. 4. Researches concepts on subject to provide confidence in lesson material.

5.6. To better understand how to read and use the competency rubric, a breakdown of each component is explained in the tables below.

Table 5.3. Competency Rubric Section 1.

Competency Instruction	←	The competency section states the competency group.
Sub-Competency Instruction	←	The sub-competency section states the narrower category that forms part of the competency group. **Note:** Some models may only consist of a competency and not include a sub-competency.
Description Deliver clear, concise, and comprehensive instruction of tasks, procedures, or concepts, aligning with the desired learning outcomes.	←	The description section provides a statement that gives details about the sub-competency, enabling career field members to better understand how sub-competency relates to the AFS.
Supporting Competencies Communication Information Seeking Leadership Develops People	←	The supporting competencies section are supported-level competencies that are linked to the success of the sub-competency. These competencies lend themselves more toward areas like values, traits, and attitudes. These competencies were included as part of a larger survey that went out to the entire AFS; respondents were asked to rate the top supporting competencies they believe will contribute to higher successful performance within the sub-competency.

Table 5.4. Competency Rubric Section 2.

Proficiency Levels **Expert** Depth of Knowledge: New practices/concepts and theories of all workplace elements; is a credible resource in this area	←	The proficiency levels are broken into four parts: basic, intermediate, advanced, and expert. Under each proficiency level are predetermined criteria selected by a group of SMEs from your career field and validated by the career field. The criteria were used as the basis to develop observable behaviors. These criteria provide concrete parameters for the behaviors, which are consistent but

Advanced Depth of Knowledge: New practices of all workplace elements **Intermediate** Depth of Knowledge: Established practices of all workplace elements **Basic** Depth of Knowledge: Established practice with some workplace elements		progressive in nature as a member moves up the scale from basic to expert. Some of the criteria (e.g., depth of knowledge, consistency of application/complexity, and thinking challenge) allow an individual to become an expert through the experience gained in a particular job and over a period of time. For example, the person can quickly move up different proficiency levels while they are serving as a technician at a flight; they move quickly because they are exposed to a variety of situations. While other criteria (e.g., scope, impact, and reach of influence) require more of a hierarchical approach to gain the experience needed to progress through the competency levels. Moving through the proficiency levels may be difficult to do in certain jobs. For example, if scope at the expert level requires job integration with the AF-level, then the individual may have to be in a position where they can gain that experience (i.e., at Higher Headquarters, Wing, or an organization with far reaching capabilities).

Table 5.5. Competency Rubric Section 3.

Observable Behaviors		
1. Designs and implements comprehensive assessment strategies to evaluate learning outcomes. 2. Leverages subject matter expertise to develop training and instructional materials.	←	The observable behaviors are statements of what can be observed from an individual manifesting the competency at the respective competency level. They provide objective evidence that the individual possesses the competency level and demonstrate what effective performance looks like. The behaviors are written to be specific enough so they can be both observed and measured.
1. Adapts a variety of teaching strategies to engage and challenge learners. 2. Utilizes emerging technology to improve learning. 3. Fosters a positive and comprehensive learning environment by considering holistic development of learners.		
1. Identifies different learning styles within the group to adapt teaching methods. 2. Provides relevant examples and analogies to enhance understanding of key concepts. 3. Facilitates discussions to encourage active participation. 4. Mentors and guides other instructors to enhance student learning outcomes.		
1. Conveys lesson objectives clearly and concisely to enhance key concepts. 2. Demonstrates patience and understanding to address audience questions and concerns. 3. Uses instructional aids to effectively meet learning objectives. 4. Researches concepts on subject to provide confidence in lesson material.		

5.7. Another key component within the rubric is the supporting competencies section at the bottom left-hand corner. These are the top four supporting competencies that can help members excel and be successful in that sub-competency. Some of these supporting competencies are tied directly to the Airmen's Foundational Competencies, while others may be unique to the career field. Having these supporting competencies identified and linked to a career field's competency model can cultivate those underlying characteristics needed to succeed on the job. Leaders,

supervisors, trainers, instructors, or mentors can now set members up for greater success by building these supporting competencies and placing their Airmen in situations where they can apply those strategies. All these elements come together to ensure we can develop Airmen who are better prepared, present and future mission focused, and ready to succeed in any situation. Additionally, DAFMAN 36-2643, *Coaching and Mentoring Program,* has information on how competencies can be used when an established mentoring strategy is put into effect to foster and develop Airmen.

5.8. Competency Development. The intent of moving towards a competency-based system is to sharpen our Airmen's tactical expertise, operational competence, strategic vision, and joint proficiency to lead and execute the full spectrum of USAF missions. This occurs not in a classroom but on the job by combining education, training, and experiences to provide Airmen with a better developmental pathway as they move along their careers. Airmen are still required to complete specific training courses, core tasks, and other training requirements in order to attain a 3-, 5-, and 7-skill levels. Competency development allows Airmen to move beyond the minimum career field requirements and begin addressing developmental gaps and strengthening their capabilities. The information included within the competency model will allow members within the SERE Specialist community to manage their professional growth and development by identifying their strengths and weaknesses against clear and objective behaviors within the competency model.

5.9. Below are the competency rubrics for the 1T0X1, Survival, Evasion, Resistance, Escape (SERE) Specialist, career field.

Table 5.6. Leadership Competency.

Competency	Proficiency Levels	Observable Behaviors
Leadership	**Expert** Reach of Influence: Enterprise	1. Establishes leadership strategy to influence enterprise priorities 2. Motivates and unifies teams towards enterprise priorities
Sub-Competency	**Advanced** Reach of Influence: Organization	1. Communicates mission, vision, and priorities to foster resiliency and unity of effort 2. Promotes professional culture and encourages innovation to achieve organizational objectives 3. Develops future leaders to integrate cross-functional teams
Leadership		
Description	**Intermediate** Reach of Influence: Team	1. Models professional behavior to promote a healthy organizational climate

The ability of an individual to influence, motivate, and empower others to contribute towards the effectiveness and success of an organization.		2. Provides feedback, training, and opportunities for professional development 3. Displays resiliency through adversity while maintaining team cohesion
Supporting Competencies	**Basic** Reach of Influence: Individual	1. Demonstrates personal accountability to execute all duties and responsibilities 2. Makes decisions at lowest level and elevates issues through chain of command 3. Demonstrates followership by supporting leaders in executing mission, vision, and priorities to contribute to a professional climate and culture 4. Proactively seeks feedback and opportunities for self-improvement
Communication Decision Making Leadership Relationship Building		

Table 5.7. Management Competency: Personnel Management.

Competency	Proficiency Levels	Observable Behaviors
Management	**Expert** Reach of Influence: MAJCOM/AF-Level/Industry	1. Advocates to Air Staff for AFS structural changes 2. Programs training requirements for AFS sustainment 3. Vectors personnel to key developmental and leadership positions across the enterprise
Sub-Competency	**Advanced** Reach of Influence: Wing/Institutional	1. Forecasts and communicates assignment needs to fill funded billets 2. Coordinates with CFM and MFM to ensure AFS sustainment
Personnel Management		
Description	**Intermediate** Reach of Influence: Unit/Groups	1. Organizes allocated billets to accomplish Unit Type Code requirements 2. Manages qualified personnel to fill positions
The process of planning, scheduling, and allocating personnel to projects and programs to achieve mission objectives.		

Supporting Competencies	**Basic** Reach of Influence: Individuals	1. Manages and delegates projects and tasks by communicating desired end states 2. Maintains accountability by uses established programs of record 3. Use evaluation, feedback and administrative systems to document, convey, and adjust personnel behavior and performance
Communication Organizational Awareness Accountability Strategic Thinking		

Table 5.8. Management Competency: Resource Management.

Competency	Proficiency Levels	Observable Behaviors
Management	**Expert** Impact on: AF-level practices	1. Utilizes Planning, Programing, Budgeting & Execution process to fund AFS requirements 2. Advises on doctrine and policy for future concepts, long-term planning, and sustainment 3. Advises senior leaders on sustainment of resources and addresses gaps to fulfill national strategies 4. Guides senior leaders to field resources effectively
Sub-Competency	**Advanced** Impact on: Management decisions	1. Substantiates funding requests to eliminate resource gaps 2. Substantiates resource needs (e.g., material, equipment, time, asset) to execute mission requirements 3. Manages allocated budget for capability portfolio
Resource Management		
Description	**Intermediate** Impact on: Specific workplace projects	1. Advocates for resources to address or prevent mission degradation 2. Manages work center resources for mission execution
The process of forecasting, acquiring, allocating, and managing resources to achieve mission success.		
Supporting Competencies	**Basic** Impact on: Specific workplace tasks	1. Identifies and elevates resource needs (e.g., material, equipment, time, asset) to execute mission requirements
Resource Management Analytical Thinking		

Initiative Accountability		2. Utilizes resources appropriately to accomplish assigned tasks

Table 5.9. Management Competency: Program Management.

Competency	Proficiency Levels	Observable Behaviors
Management	**Expert** Scope: Integration with AF-level	1. Creates enterprise-level projects/programs to address strategic requirements 2. Advocates for and/or directs change to improve program management across the enterprise
Sub-Competency	**Advanced** Scope: Integration with organizational strategies	1. Shapes future program requirements and standards in response to evolving mission requirements 2. Defines and evaluates program policy and guidance to ensure alignment with mission requirements
Program Management		
Description	**Intermediate** Scope: Integration with concerned areas	1. Develops and implements program policy and guidance to ensure alignment with mission requirements 2. Recommends policy and guidance waivers or changes for evolving requirements 3. Identifies trends and presents courses of action to resolve challenges or discrepancies within a program
The process of leveraging allocated manning and resources to control and guide program outcomes in accordance with applicable guidance and directives.		
Supporting Competencies	**Basic** Scope: Specific Area	1. Follows established procedures, policy, and guidance to execute program functions 2. Informs stakeholders of project/program status, shortfalls, timeline, and resource requirements to guide decision-making
Analytical Thinking Strategic Thinking Organizational Awareness Decision Making		

Table 5.10. Engagement Competency.

Competency	Proficiency Levels	Observable Behaviors
Engagement	**Expert** Consistency of Application: Able to innovate and formulate strategies; able to model, guide, teach others how to effectively apply the competency in all circumstances	1. Composes original products or communication models to convey complex data 2. Provides ad hoc explanations on issues of significant depth or breadth of content to inform planning and decision making 3. Generates correspondence to answer executive-level inquiries
Sub-Competency	**Advanced** Consistency of Application: Sustained application of competency over time in complex situations	1. Responds effectively to impromptu requests and questions to influence outcomes 2. Instructs and evaluates others on effective communication techniques to improve message receipt 3. Facilitates discussion amongst various stakeholders and/or organizations to generate dialogue on complex topics
Communication		
Description	**Intermediate** Consistency of Application: Sustained application of competency over time in a variety of situations	1. Tailors message to meet target audience understanding of subject matter 2. Determines the best means of sharing complex or technical concepts in order to ensure comprehension 3. Mentors others on effective communication techniques to improve message receipt
The process of receiving, synthesizing, and presenting clear, concise, and accurate messaging through tailored verbal, nonverbal, and written information to achieve objectives.		
Supporting Competencies	**Basic** Consistency of Application: Sustained application of competency over time	1. Creates verbal and written products that convey information in a logical flow to assist in the explanation of information 2. Uses appropriate visual aids to facilitate message delivery 3. Recognizes social cues, non-verbal communication, and cross-cultural nuances to adjust message delivery and improve receipt for target audiences
Communication Influence Self Control Leadership		

Table 5.11. Instruction Competency.

Competency	Proficiency Levels	Observable Behaviors
Instruction	**Expert** Depth of Knowledge: New practices/concepts and theories of all workplace elements; is a credible resource in this area	1. Designs and implements comprehensive assessment strategies to evaluate learning outcomes 2. Leverages subject matter expertise to develop training and instructional materials
Sub-Competency	**Advanced** Depth of Knowledge: New practices of all workplace elements	1. Adapts a variety of teaching strategies to engage and challenge learners 2. Utilizes emerging technology to improve learning 3. Fosters a positive and comprehensive learning environment by considering holistic development of learners
Instruction		
Description	**Intermediate** Depth of Knowledge: Established practices of all workplace elements	1. Identifies different learning styles within the group to adapt teaching methods 2. Provides relevant examples and analogies to enhance understanding of key concepts 3. Facilitates discussions to encourage active participation 4. Mentors and guides other instructors to enhance student learning outcomes
Deliver clear, concise, and comprehensive instruction of tasks, procedures, or concepts, aligning with the desired learning outcomes.		
Supporting Competencies	**Basic** Depth of Knowledge: Established practice with some workplace elements	1. Conveys lesson objectives clearly and concisely to enhance key concepts 2. Demonstrates patience and understanding to address audience questions and concerns 3. Uses instructional aids to effectively meet learning objectives 4. Researches concepts on subject to provide confidence in lesson material
Communication Information Seeking Leadership Develops People		

Table 5.12. Personnel Recovery Competency: Prepare.

Competency	Proficiency Levels	Observable Behaviors
Personnel Recovery	**Expert** Reach of Influence: MAJCOM/AF-Level/Industry	1. Develops policy and doctrine to meet strategic objectives 2. Closes identified gaps by advocating for capabilities, training, and equipment
Sub-Competency	**Advanced** Reach of Influence: Wing/Institutional	1. Organizes joint and multi-national exercises to validate capabilities 2. Engages partners to identify gaps and capabilities for theater operations 3. Advises on PR considerations to inform decision makers
Prepare		
Description	**Intermediate** Reach of Influence: Unit/Groups	1. Coordinates with mission partners to increase PR capabilities 2. Organizes exercises to evaluate unit capabilities 3. Executes SERE Mission Preparation to enable operations
Preparing commanders and staffs, forces, and potential isolated personnel to conduct personnel recovery through policy and doctrine, education and training, and equipment.		
Supporting Competencies	**Basic** Reach of Influence: Individuals	1. Prepare designated personnel for isolation 2. Conducts PR operational support duties to enable readiness (e.g., EPA, ISOPREP, PRK) 3. Participates in exercises to enhance operational capabilities
Communication Analytical Thinking Strategic Thinking Organizational Awareness		

Table 5.13. Personnel Recovery Competency: Plan.

Competency	Proficiency Levels	Observable Behaviors
Personnel Recovery	**Expert** Reach of Influence: Strategic	1. Translate national, theater, and operational level guidance for use in planning efforts 2. Uses strategic guidance to steer and inform the joint planning process
Sub-Competency	**Advanced** Reach of Influence: Operational	1. Develop options, update, or change a plan rapidly based on changes in the operational and strategic environment
Plan		

		2. Supports decision makers by identifying courses of action available along with probable outcomes costs and risks 3. Conducts CONOP Development
Description	**Intermediate** Reach of Influence: Tactical	1. Identifies direction, guidance, and authoritative documents that inform the joint planning process 2. Conducts plan development
The deliberate process of determining how to use military capabilities in time and space to achieve objectives while considering the associated risks.		
Supporting Competencies	**Basic** Reach of Influence: Tactical Team	1. Conducts pre-mission activities in accordance with relevant guidance for mission execution 2. Demonstrates use of Troop Leading Procedures to support tactical level planning. 3. Identifies planning functions, process, and operational design methodology
Analytical Thinking Communication Strategic Thinking Information Seeking		

Table 5.14. Personnel Recovery Competency: Execute.

Competency	Proficiency Levels	Observable Behaviors
Personnel Recovery	**Expert** Reach of Influence: Strategic	1. Aligns PR execution procedures with strategic objectives 2. Coordinates PR execution tasks across Combatant Command (CCMD) boundaries
Sub-Competency	**Advanced** Reach of Influence: Operational	1. Aligns procedures for PR execution with operational objectives 2. Advises Stakeholders on the 5 PR execution tasks
Execute		
Description	**Intermediate** Reach of Influence: Tactical	1. Adapts established procedures in the execution phase 2. Coordinates the 5 PR execution tasks

The process of conducting operations to report, locate, support, recover, and reintegrate.		
Supporting Competencies	**Basic** Reach of Influence: Tactical Team	1. Follows established procedures for executing recovery 2. Supports the 5 PR execution tasks
Communication Decision Making Strategic Thinking Teamwork		

Table 5.15. Personnel Recovery Competency: Adapt.

Competency	Proficiency Levels	Observable Behaviors
Personnel Recovery	**Expert** Scope: Integration with AF-level/within industry	1. Innovates and develops adaptive strategies for personnel recovery 2. Provides input to strategic guidance for adapting personnel recovery 3. Directs testing requirements to modernize preparation, planning, and execution
Sub-Competency	**Advanced** Scope: Integration with organizational strategies	1. Adapts personnel recovery considering time relevance 2. Organizes test operations to modernize preparation, planning, and execution
Adapt		
Description	**Intermediate** Scope: Integration with concerned areas	1. Adapts Organize, Train, & Equip processes to improve IP survivability 2. Collaborates with mission partners to modify preparation activities 3. Coordinates test operations to improve PR
Utilize Reintegration, assessments, lesson's learned, requirements, and exercise feedback to develop and modernize preparation, planning, and execution.		
Supporting Competencies	**Basic** Scope: Specific Area	1. Incorporates feedback to establish lessons learned 2. Compiles information to establish trends 3. Participates in test operations to evaluate capabilities
Analytical Thinking Communication Creative Thinking Flexibility		

Table 5.16. SERE Competency: Survival.

Competency	Proficiency Levels	Observable Behaviors
SERE	**Expert** Consistency of Application: Able to innovate and formulate strategies; able to model, guide, teach others how to effectively apply the competency in all circumstances	1. Modifies and disseminates world-wide survival and recovery TTPs to meet requirements 2. Mentors and guides others by sharing survival and recovery experiences and best practices
Sub-Competency	**Advanced** Consistency of Application: Sustained application of competency over time in complex situations	1. Adapts survival tactics to maintain life in all biomes 2. Identifies survival training and equipment gaps to inform guidance development 3. Provides subject matter expertise to stakeholders, planners, and at risk personnel
Survival		
Description	**Intermediate** Consistency of Application: Sustained application of competency over time in a variety of situations	1. Tailors ability to maintain life despite adverse conditions 2. Tailors ability to affect recovery despite adverse conditions
The process of maintaining life, well-being, and functionality in the face of challenges, threats, and in adverse conditions.		
Supporting Competencies	**Basic** Consistency of Application: Sustained application of competency over time	1. Demonstrates ability to maintain life 2. Demonstrates ability to affect recovery
Creative Thinking Analytical Thinking Flexibility Perseverance		

Table 5.17. SERE Competency: Evasion.

Competency	Proficiency Levels	Observable Behaviors
SERE	**Expert** Consistency of Application: Able to innovate and formulate strategies; able to model, guide, teach others how to effectively apply the competency in all circumstances	1. Modifies and disseminates world-wide evasion TTPs to meet requirements 2. Mentors and guides others by sharing evasion experiences and best practices
Sub-Competency	**Advanced** Consistency of Application: Sustained application of competency over time in complex situations	1. Adapts evasion TTPs to avoid capture from a peer/near peer threat 2. Identifies evasion TTPs and equipment gaps to inform guidance development 3. Provides subject matter expertise to stakeholders, planners, and at risk personnel
Evasion		
Description	**Intermediate** Consistency of Application: Sustained application of competency over time in a variety of situations	1. Demonstrates ability to evade capture for greater than 72 hours in all operating environments 2. Adapts evasion techniques to the environment for long term isolation
The deliberate employment of tactics to avoid detection, capture, or engagement by enemy forces.		
Supporting Competencies	**Basic** Consistency of Application: Sustained application of competency over time	1. Demonstrates ability to evade capture for greater than 24 hours in the operating environment 2. Demonstrate evasion TTPs for short term isolation
Analytical Thinking Decision Making Creative Thinking Flexibility		

Table 5.18. SERE Competency: Resistance.

Competency	Proficiency Levels	Observable Behaviors
SERE	**Expert** Consistency of Application: Able to innovate and formulate strategies; able to model, guide, teach others how to effectively apply the competency in all circumstances	1. Modifies and disseminates world-wide resistance TTPs to meet requirements 2. Mentors and guides others by sharing resistance experiences and best practices
Sub-Competency	**Advanced** Consistency of Application: Sustained application of competency over time in complex situations	1. Adapts resistance TTPs to maintain honor across the spectrum of captivity 2. Prioritizes resistance objectives to combat enemy exploitation 3. Identifies resistance TTPs and equipment gaps to inform guidance development 4. Provides subject matter expertise to stakeholders, planners, and at-risk personnel
Resistance		
Description	**Intermediate** Consistency of Application: Sustained application of competency over time in a variety of situations	1. Applies Code of Conduct to maintain honor in an unknown/unconstrained captivity environment 2. Modifies resistance TTPs to maximize effectiveness
Actions taken by captured personnel to maintain life, maintain honor, and avoid providing intelligence, propaganda, or aid to the enemy across the full spectrum of captivity.		
Supporting Competencies	**Basic** Consistency of Application: Sustained application of competency over time	1. Applies Code of Conduct to maintain honor in a known/constrained captivity environment 2. Uses resistance TTP to minimize exploitation
Analytical Thinking Resilience Self Control Perseverance		

Table 5.19. SERE Competency: Escape.

Competency	Proficiency Levels	Observable Behaviors
SERE	**Expert** Consistency of Application: Able to innovate and formulate strategies; able to model, guide, teach others how to effectively apply the competency in all circumstances	1. Modifies and disseminates world-wide escape and Apprehension Avoidance TTPs to meet requirements 2. Mentors and guides others by sharing escape experiences and best practices
Sub-Competency	**Advanced** Consistency of Application: Sustained application of competency over time in complex situations	1. Adapts escape and Apprehension Avoidance TTPs to maximize success across the spectrum of captivity 2. Prioritizes escape objectives to combat enemy exploitation 3. Identifies escape TTPs and equipment gaps to inform guidance development 4. Provides subject matter expertise to stakeholders, planners, and at-risk personnel
Escape		
Description	**Intermediate** Consistency of Application: Sustained application of competency over time in a variety of situations	1. Adapts Apprehension Avoidance TTPs during internment 2. Adapts escape TTPs during the long-term internment phase to avoid enemy control 3. Leverages escape TTPs to combat manufactured restraints
The process of planning and execution of escape TTPs from captivity.		
Supporting Competencies	**Basic** Consistency of Application: Sustained application of competency over time	1. Combats enemy control by executing Apprehension Avoidance TPPs 2. Combats enemy control by executing escape TTPs (e.g., combative) during initial capture, movement, and short-term phases 3. Employs escape TTPs to combat modified restraints
Creative Thinking Analytical Thinking Decision Making Perseverance		

Table 5.20. Specialized Skills Competency: Parachuting.

Competency	Proficiency Levels	Observable Behaviors
Specialized Skills	**Expert** Impact on: AF-level practices	1. Evaluates personnel in parachute operations and provide oversight of parachute programs 2. Advises AF leaders to enable development of parachute program
Sub-Competency	**Advanced** Impact on: Management decisions	1. Manages all phases of parachute operations to ensure mission success 2. Assists malfunctions officer and drop zone controller for mishap response
Parachuting		
Description	**Intermediate** Impact on: Specific workplace projects	1. Assists Jump Master (JM) with planning and execution of parachute operations
The process of conducting deliberate personnel parachute operations.		
Supporting Competencies	**Basic** Impact on: Specific workplace tasks	1. Follows all directions of the JM and applicable instructions to perform parachute operations 2. Complies with the standards, currency and qualification requirements to perform parachute operations
Precision Decision Making Analytical Thinking Teamwork		

Table 5.21. Specialized Skills Competency: Mountaineering.

Competency	Proficiency Levels	Observable Behaviors
Specialized Skills	**Expert** Consistency of Application: Able to innovate and formulate strategies; able to model, guide, teach others how to effectively apply the competency in all circumstances	1. Mentors and guides personnel in advanced mountain operations and provide oversight of Unit Ground Training (UGT) programs 2. Advises AF leaders to enable development of mountaineering program
Sub-Competency	**Advanced** Consistency of Application: Sustained application of competency over time in complex situations	1. Utilizes practical experience in a variety of mountain environments in both summer and winter conditions 2. Demonstrates well-developed hazard evaluation, risk mitigation, and safe route-
Mountaineering		

		finding skills over all types of terrain and conditions
Description	**Intermediate** Consistency of Application: Sustained application of competency over time in a variety of situations	1. Proficient with the technical skills and tactical knowledge required to oversee mountain operations in all environments 2. Trains, mentors, and oversees UGT for the mountain team member and mountain operator qualifications
Operations that expose personnel to adverse and technical terrain with significant environmental hazards that obstruct movement, where risk and mobility increase proportionally, and safety is dependent on technical knowledge and proficiency in specialized TTPs, and equipment.		
Supporting Competencies	**Basic** Consistency of Application: Sustained application of competency over time	1. Performs basic tasks required to safely operate in adverse terrain 2. Follows command-specific mountain operations programs, policies, and guidance to ensure safe mountaineering operations
Decision Making Analytical Thinking Teamwork Precision		

6. Skill and Career Progression. Adequate training and timely progression from the apprentice to the superintendent level play an important role in the AF's ability to accomplish its mission. It is essential that everyone involved in training do their part to plan, manage, and conduct an effective training program. The guidance provided in this part of the CFETP ensures everyone receives practical training at appropriate points in their career. **Note:** Use the career field development plan (**Figure 10.1**) in conjunction with the information below is used to guide career skill progression.

6.1. Apprentice (3) Level. To be awarded the 3-skill level, members must:

6.1.1. Complete the formal training requirements listed in the DAFECD and restated in **Part I, Section C** of this CFETP.

6.1.2. Complete all 3-level core tasks identified in the STS

6.1.3. Complete *US Army Basic Airborne School,* L5ABA1T031 0A7A, Fort Benning, GA.

6.2. Journeyman (5) Level. To be awarded the 5-skill level, members must:

6.2.1. Complete the formal training requirements listed in the DAFECD and restated in **Part I, Section C** of this CFETP.

6.2.2. Complete all 5-level core tasks identified in the STS.

6.2.3. Be recommended by their supervisor.

6.2.4. Meet time in training requirements (12 months- initial; 9 months- retraining.)

6.3. Craftsman (7) Level. To be awarded the 7-skill level, members must:

6.3.1. Complete the formal training requirements listed in the DAFECD and restated in **Part I, Section C** of this CFETP.

6.3.2. Complete all 7-level core tasks identified in the STS.

6.3.3. Be recommended by their supervisor.

6.3.4. Meet time in training requirements (12 months- initial; 6 months- retraining.)

6.3.5. Attain the minimum rank of SSgt.

6.4. Superintendent (9) Level. To be awarded the 9-skill level, members must:

6.4.1. Be recommended by their supervisor.

6.4.2. Attain the minimum rank of SMSgt.

6.4.3. **Note:** At the time of publication, there are no formal or upgrade training requirements for the 9-skill level.

7. Training Decisions. The CFETP uses a building block approach (simple to complex) to encompass the entire spectrum of training requirements for the SERE Specialist career field. The spectrum includes a strategy for when, where, and how to meet the training requirements. The strategy must be clear and affordable to reduce duplication of training and eliminate a disjointed approach to training.

7.1. Transitioning to a Competency-Based Construct. This CFETP has undergone a considerable revision towards building a competency-based training and development platform for the SERE Specialist career field. A notable change has been to shift the focus from task-based training to one that is more centered on outcomes-based learning. A task is a unit of work activity or operation which forms a significant part of a duty. These are singular in nature and are usually accomplished in one continuous action, which also can occur independently of other tasks. Conversely, outcomes are learning goals that typically consist of a multitude of tasks. These outcomes are actions and performances that embody and reflect the learner's competence in using content, information, ideas, and tools successfully. Focusing on learning outcomes allow organizations, leaders, supervisors, and trainers to incorporate foundational competencies and underlying characteristics (values, traits, attitudes) into learning, which is necessary for developing Airmen with the competencies needed for future challenges.

7.2. Developing Learning Outcomes. To develop the learning outcomes, the team reverse-

engineered behaviors found in the SERE Specialist occupational competency model and considered what an Airman needs to be able to know and do to master a specific behavior. The intent of the learning outcomes is to identify all factors needed to succeed in attaining the behavior. Formal training will be codified by using the behavioral statement coding system for the STS as opposed to the proficiency code key. As a result, each line item will consist of a verb and the coding system for formal training will only use P (performance), K (knowledge), and pk (performance-knowledge).

7.3. The CFETP **Part II** identifies sixteen sub-competencies. Each competency is further broken down into the following proficiency levels; basic, intermediate, advanced, and expert. The proficiency levels are not tied to a specific rank or position. Additionally, each occupational competency has supporting competencies tied to them. The supporting competencies can allow Airmen to intentionally develop those transferrable underlying characteristics that will translate to mission capabilities, mission readiness, and mission success for the agile, future thinking Airmen. Airmen, supervisors, trainers, mentors, and leaders will look for opportunities to integrate the supporting competencies into every facet of an Airman's development as they seek to gain and increase proficiency within the 1T0X1 competencies.

8. Community College of the Air Force (CCAF). Enrollment in the CCAF occurs upon completion of Basic Military Training. CCAF provides the opportunity to obtain an associate of applied sciences degree. In addition to its associate degree program, CCAF offers a number of certifications that can be found in their CCAF general catalog.

8.1. Occupational Instructor Certification. Program for qualified instructors who teach CCAF collegiate-level courses at CCAF affiliated schools (SV81A, *SERE Specialist Training Apprentice Course*). The purpose of the certification is to recognize instructors' extensive faculty development training, education, and qualifications required to teach accredited CCAF course(s) and formally acknowledge instructors' practical teaching experience. Qualified officer, enlisted, civilian and other service instructors are eligible for this certification. To qualify, the instructor must be assigned to course SV81A and meet requirements identified on the CCAF website: https://www.airuniversity.af.edu/Barnes/CCAF/.

8.2. Degree Requirements. All service members are automatically entered into the CCAF program. Prior to completing an associate degree, the 5-level must be awarded, and the following requirements must be met:

Table 8.1. CCAF Degree Requirements.

CCAF AAS Degree Requirements	
	Semester Hours
Technical Education (satisfied by completion of course SV81A, *SERE Specialist Training Apprentice Course*)	24
Leadership, Management, and Military Studies	6
General Education	15
Program Elective (satisfied by completion of course SV81A, *SERE Specialist Training Apprentice Course*)	15

Total	**60**
Note: Refer to the CCAF general catalog for a listing of all degree requirements as they are subject to change and some AFSCs may fall under additional degree programs.	

8.2.1. Technical Education (24 semester hours). A minimum of 9 semester hours of technical Core subjects and courses must be applied, and the remaining semester hours applied from technical core or technical elective subjects and courses.

8.2.2. Leadership, Management, and Military Studies (6 Semester Hours). Requirements may be satisfied by applying professional military education, civilian courses accepted in transfer, and/or by testing credit. The preferred method of completing Leadership, Management, and Military Studies is through attendance at an Airman Leadership School, Non-commissioned officer (NCO) Academy, and/or the Air Force Senior NCO Academy. It is strongly encouraged that SERE Specialists also attend civilian courses that emphasize the fundamentals of leadership and management of human and material resources.

8.2.3. General Education (15 semester hours). Applicable courses must meet the criteria for application of courses to the general education requirements and agree with the definitions of applicable general education subject and/or courses as provided in the CCAF general catalog.

8.2.4. Program Elective (15 Semester Hours). Satisfied with applicable technical education; leadership, management, and military studies; or general education subjects and courses, including natural science courses meeting general education requirements application criteria. Nine semester hours of CCAF degree applicable technical credit otherwise not applicable to this program may be applied. See the CCAF general catalog for details regarding the associates of applied sciences degree for this specialty.

9. Additional off-duty education is a personal choice encouraged for all. Individuals wanting to become a technical training instructor should be actively pursuing an associate degree. A degreed faculty is necessary to maintain accreditation through the Southern Association of Colleges and schools Commission on Colleges.

10. Career Field Path and Manning Table. The SERE Specialist training path includes the training pipeline and continued training progression throughout a SERE Specialist's career. The path recommends varying levels of professional education as well as developmental education, targeting specific points in an airman's career. More information is in **Part 1, Section C** of this CFETP and in the specialty description in DAFECD.

Figure 10.1 SERE Specialist Career Field Path and Manning Table.

1T0 Career Field Development

Section C – Skill Level Training Requirements

11. Purpose. Skill-level training requirements in this specialty are defined in terms of tasks and knowledge requirements. This section outlines the specialty qualification requirements for each skill-level in broad, general terms and establishes the mandatory requirements for entry, award, and retention of each skill-level. The specific task and knowledge training requirements are identified in the STS at **Part II, Section A and B** of this CFETP.

11.1. **Specialty Qualifications.**

11.1.1. Knowledge. Knowledge is mandatory of: The Code of Conduct; DoD Instruction O-3002.05, *Personnel Recovery (PR) Education and Training;* and U.S. Government policy for IP;

global SERE and PR principles and JTTP; procedures for MAJCOM SERE program requirements; procedures for PR program management; JPRC, ARCC and PRCC roles and missions; cultural and sociopolitical considerations that affect PR; all aspects of premeditated and emergency parachuting procedures; providing for personal protection and sustenance; communication and signaling techniques; methods of vectoring recovery assets; escape and evasion TTP (rural and urban; apprehension avoidance (A2) and escape enhancements (E2); chemical, biological, radiological, nuclear (CBRN) survival skills; water survival TTP and dive physiology; psychology of survival; avoidance of hazardous terrain, rough land travel and emergency evacuation procedures for injured personnel; survival medicine; Tactical Combat Casualty Care (TCCC); land and water navigation and travel; special operations recovery teams and nonconventional/unconventional assisted recovery mechanisms; caring for and using post-egress, recovery, and aircrew flight equipment; improvising and manufacturing clothing and equipment needed by an isolated person; lecture, demonstration and performance, guided discussion, time and circumstance, and role-play instructional methods and techniques; impact of international law on IP; conduct after capture concepts for war, governmental detention, and hostage environments including, but not limited to, resistance to exploitation, organization and communication, maintenance of psychological and physical health. Awarded the SERE Beret and Arch upon completion of 1T031 training requirement, unless waived.

11.1.2. Training. The following training is mandatory for the award of the AFSC indicated:

11.1.2.1. 1T031. Completion of the following courses:

11.1.2.1.1. SV70A; SERE Specialist Training Orientation Course (SST-OC).

11.1.2.1.2. SV89A; SERE Specialist Training Indoctrination Course (SST-IC).

11.1.2.1.3. SV97A; Advanced SERE Training.

11.1.2.1.4. SV98A: Long-Term Survival and Evasion Training.

11.1.2.1.5. SV85A; Emergency Parachute and Water Survival Training.

11.1.2.1.6. SV84A; Underwater Egress.

11.1.2.1.7. SV81A; SERE Specialist Training Apprentice Course (SST-AC):

11.1.2.1.7.1. SV81A1; SERE Specialist Training Apprentice Course (SST-AC), Team Building/Stress Inoculation.

11.1.2.1.7.2. SV81A2; SERE Specialist Training Apprentice Course (SST-AC), Core Skills.

11.1.2.1.7.3. SV81A3; SERE Specialist Training Apprentice Course (SST-AC), Instructional Techniques Field.

11.1.2.1.7.4. SV81A4; SERE Specialist Training Apprentice Course (SST-AC), Desert.

11.1.2.1.7.5. SV81A5; SERE Specialist Training Apprentice Course (SST-AC), Coastal, Open Ocean.

11.1.2.1.7.6. SV81A7; SERE Specialist Training Apprentice Course (SST-AC), Tropic.

11.1.2.1.7.7. SV81A8; SERE Specialist Training Apprentice Course (SST-AC), Inland Water Travel.

11.1.2.1.7.8. SV81A9; SERE Specialist Training Apprentice Course (SST-AC), Mountain Team Member.

11.1.2.1.7.9. SV81A10; SERE Specialist Training Apprentice Course (SST-AC), Personnel Recovery.

11.1.2.1.8. L5ABA1T031 0A7A; US Army Basic Airborne Course.

11.1.2.1.9. Air Force Combatives Program, Basic Instructor.

11.1.2.1.10. SERE 100.2 CBT (or equivalent).

11.1.2.1.11. Tactical Combat Casualty Care (TCCC), Tier 2.

11.1.2.2. 1T051. Completion of the following:

11.1.2.2.1. 5 -level core tasks in accordance with (IAW) 1T0X1 CFETP.

11.1.2.2.2. SV81C; SERE Specialist Journeyman Arctic Survival Training (SV81C is offered one time per year and if SV81C is unavailable due to weather or travel restrictions, SV87A, Arctic Survival Training is suitable supplement.)

11.1.2.2.3. PR102; Fundamentals of Personal Recovery (or CFM approved equivalent).

11.1.2.2.4. PR296/297; Reintegration team Responsibilities/ PR Debriefing (or CFM approved equivalent).

11.1.2.2.5. PR292, Personnel Recovery Execution (or CFM approved equivalent).

11.1.2.3. 1T071. Completion of the following courses:

11.1.2.3.1. SV81F; Survival, Evasion, Resistance, Escape (SERE) Craftsman Course.

11.1.2.3.2. 7-level core tasks IAW 1T0X1 CFETP.

11.1.3. Experience. The following experience is mandatory for the award of the AFSC indicated:

11.1.3.1. 1T051. Qualification in and possession of AFSC 1T031. Also, experience applying

global SERE principles, procedures, techniques, and equipment; emergency parachuting procedures; survival medicine; rough land travel and evacuation procedures; land and water navigation and travel; use of post-egress survival and aircrew flight equipment; PR JTTP; escape and evasion techniques; combat communication, signaling, and recovery procedures; PR operations; survival in CBRN contamination conditions; and conduct after capture during wartime, peacetime governmental detention, and hostage detention guidance including survival adaptations, communication, organization, resistance to exploitation, and escape TTPs.

11.1.3.2. 1T071. Qualification in and possession of AFSC 1T051. Also, experience in performing or supervising SERE operations and training activities.

11.1.3.3. 1T091. Qualification in and possession of AFSC 1T071. Also, experience in managing and directing SERE operations and training programs.

11.1.4. Other. The following are mandatory as indicated:

11.1.4.1. **For entry into this specialty:**

11.1.4.1.1. Completion of high school, or equivalent.

11.1.4.1.2. Must score a 55 or higher on the SERE 2-Factor Selection Model.

11.1.4.1.3. Successful passing score of the SERE Initial Fitness Test within 60 days of their entry into active-duty date or retraining class start date for AFSC 1T011.

11.1.4.1.4. Prior to attendance of SERE Specialist Training Orientation Course (SV70A), applicants must meet medical standards for Special Warfare Airmen as outlined in DAFMAN 48-123, *Medical Examinations and Standards*, and the accompanying Medical Standards Directory, Special Warfare Airmen column. Applicants must also meet medical standards for entry into required training that is provided by sister service schools (Army Airborne) as applicable for this AFSC.

11.1.4.1.5. Absence of any speech impediment and ability to read aloud and speak English clearly and distinctly.

11.1.4.1.6. Passing SERE color vision requirement, as defined by Air Force Medical Standards Directory, at minimum must identify vivid red and vivid green as projected by the ophthalmological projector or stereoscope vision testing.

11.1.4.1.7. See most current copy of the DAFECD, via the myFSS link: https://myfss.us.af.mil/USAFCommunity/s/knowledge-detail?pid=kA0t0000000wlDpCAI

11.1.4.2. For retention of AFSC 1T051/71/91:

11.1.4.2.1. Qualification in 5-level/ 7-level IAW SERE CFETP.

11.1.4.2.2. Specialty requires routine access to Tier 3 (T3) information, systems, or similar classified environment. For retention of AFSCs 1T0XX, completion of a current T3, according to DoDM 5200.02_DAFMAN 16-1405, *Department of the Air Force Personnel Security Program* , is mandatory. **Note:** Award of the entry level without a completed T3 is authorized provided an interim Secret security clearance has been granted according to DoDM 5200.02_DAFMAN 16-1405.

11.1.4.2.3. For retention of this AFSC, must maintain local network access IAW AFI 17-130, *Cybersecurity Program Management;* and DAFMAN 17-1301, *Computer Security (COMPUSEC).*

Section D – Resource Constraints

12. Purpose. This section identifies resource constraints that limit the development or execution of training, including cost and manpower. Each constraint should include a narrative explanation, its impact on training, and necessary resources. Additionally, required actions, responsible offices (OPRs), and target completion dates should be documented. Resource constraints must be reviewed and updated annually at a minimum.

13. Apprentice Level Training.

13.1. Constraints.

13.1.1. Lack enough L5ABA1T031 0A7A, *US Army Basic Airborne Course*, training allocations to support the current projected graduation rate and average graduation rate.

13.1.2. Limited manpower, funding and equipment within the 336 TRG to execute new requirements.

13.2. Impact.

13.2.1. Delays in 3-level upgrade training and 3-level waivers granted to continue to allow upgrade to 5-level.

13.2.2. Unable to execute specific areas within the CFETP 3-level requirements based on current programed resources.

13.3. Resources Required.

13.3.1. The 1T0 3-Levels require 80 L5ABA1T031 0A7A, *US Army Basic Airborne Course,* billets per year.

13.3.2. Maintain 66 TRS/SST manpower to 1T0 worldwide average.

13.3.3. 66 TRS/SST Cadre PERSTEMPO unsustainable, and new requirements for funding are taken out of baseline funding required for other phases of training.

13.3.4. Appropriately fund and equip technical training to meet new requirements/programs to include a Tactical Operations Center/Air Operations Center like facility and infrastructure and a safe mountaineering tower to meet CFETP requirements.

13.4. Action Required.

13.4.1. Increase L5ABA1T031 0A7A, *US Army Basic Airborne Course, billet request to 80 per year and work with AETC/A3LS to secure enough Air Force allotted billets to cover all 3-Levels prior to graduation of the last SV81A Series course.*

13.4.2. AETC MFM in coordination with CFM will work with Air Force Personnel Center to balance/prioritize 66 TRS manpower with worldwide average.

13.4.3. Conduct Cost Resource Estimate (CRE) to determine gaps based on new CFETP and provide requirements for appropriate POM & FYDP HAF/MAJCOM levels.

13.5. OPR and Target Completion Date.

13.5.1. OPR: AETC/A3LS, *Air Education and Training Command, Special Warfare Branch*.

13.5.2. Target Date: June 2026 reviewed semiannually.

14. Journeyman Level Training.

14.1. Constraints.

14.1.1. 5-level upgrade training at base level impacts daily operations.

14.1.2. Potential limited number of manpower positions could impact 5-level upgrade training.

14.2. Impact.

14.2.1. Units may be required to prioritize operational mission over OJT for SERE Specialists across the MAJCOMs.

14.2.2. Require double and triple billeting vetted and identified units with 5-level upgrade training programs.

14.3. Resources Required.

14.3.1. Continued refinement of Task Training Guides (TTG) implementation to streamline 5-level training.

14.3.2. Conduct a manpower assessment for all units outside of AETC to assess manpower requirements for 5-level upgrade training.

14.4. Action Required.

14.4.1. TTGs to mitigate time built develop training program and minimize manpower-related training days.

14.4.2. CFM will coordinate with the Air Force Manpower Analysis Agency to conduct a Manpower assessment for all units outside of AETC.

14.5. OPR and Target Completion Date.

14.5.1. OPR: AF/A34S SERE Specialist CFM.

14.5.2. Target Date: Ongoing, reviewed semiannually.

15. Craftsman Level Training.

15.1. Constraints.

15.1.1. Lack sufficient manpower, funding and equipment within the 336 TRG to execute new requirements.

15.1.2. Rely on Davis-Monthan AFB units like the 68 Field Training Unit and AFSOUTH Air Operation Center (AOC) to provide support to Craftsman course through memorandum of understanding (MOU) and memorandum of agreement (MOA).

15.2. Impact.

15.2.1. Relying on other organizations manpower, equipment and resources to execute the requirements can all go away if MOU/MOA are cancelled.

15.2.2. Unable to execute specific areas to the desired level of learning based on the CFETP competency level.

15.3. Resources Required.

15.3.1. Maintain 66 TRS manpower to 1T0 worldwide average or above.

15.3.2. Simulate AOC command and control functions, and increase secure internet protocol router terminals/access to meet objectives.

15.4. Action Required.

15.4.1. AETC MFM in coordination with CFM will work with AFPC to balance/prioritize 66 TRS manpower with worldwide average.

15.4.2. Conduct CRE to determine gaps based on new CFETP and provide requirements for

appropriate POM & FYDP HAF/MAJCOM levels.

15.4.3. Assess whether Craftsman course needs to be relocated to leverage resources and capabilities within other units.

15.5. OPR and Target Completion Date.

15.5.1. OPR: AETC/A3LS.

15.5.2. Target Date: Oct 2026 reviewed semiannually.

Section E – Transitional Training Guide

16. Purpose. This transition guide outlines how to manage the training of members currently in training at the time of publishing and explains how previously trained members will transition to using this CFETP.

17. Conditions.

17.1. Duration. This guide is applicable to all members who entered 3, 5, or 7 skill level training under the previous version of the CFETP and have been upgraded to the next skill level, or at the maximum, 12 months after the publishing date of this CFETP.

17.2. Target Group. This guide applies to all members who entered 3, 5, or 7 skill level training under the previous version of the CFETP. Members who are not engaged in skill level training at the time of publishing will immediately transition to this CFETP.

17.2.1. Members Currently in Skill Level Training:

17.2.1.1. Apprentice, 3-Level Training. Members currently engaged in 3-level upgrade training will continue their training in accordance with SST-AC instruction. SST-AC will update all 3-level upgrade training requirements to meet the new CFETP standards within 12 months of the publishing date.

17.2.1.2. Journeyman, 5-Level Training. Members currently in 5-level upgrade training who have completed less than 50% of their 5-level upgrade training at the time of publication will be required to meet the updated CFETP standards. Those members who have completed more than 50% of their upgrade training at the time of publication will not be required to meet the updated CFETP standards. These individuals will continue their 5-Level upgrade training under the previous CFETP, following established requirements and timelines. Supervisors are encouraged to identify specific competencies (Management, Leadership, and Personnel Recovery) and Sub-Competencies that may benefit the member and incorporate those using the TTGs.

17.2.1.3. Craftsman, 7-Level Training. All 7-Levels who have not completed SV81F SERE Craftsman Course will utilize this updated CFETP. AETC will update all 7-level (SV81F SERE Craftsman Course) course training requirements to meet the new CFETP standards within 12

months of the publishing date.

17.2.1.4. Members will adhere to updated training protocols and timelines in accordance with DAFMAN 36-2689 and under the guidance of their training manager. Additionally, members must complete any new training or proficiency standards introduced in the updated CFETP to ensure a seamless transition without disrupting their current progression.

17.2.2. Members Who Achieved Skill Level Certification: Members who have previously attained their 3, 5, or 7-level certification will retain their qualifications under the previous CFETP dated 20 April 2017. These members will not be subject to retroactive training or additional certification requirements under the new CFETP.

17.2.3. Members Yet to Enter Skill Level Training: Members who have not yet commenced their 3, 5 or 7-level upgrade training will adhere to the new training protocols and standards outlined this current CFETP. This ensures alignment with current operational requirements and standardized training outcomes across the career field.

18. Transitional Training Plan Administration. The transitional training plan will be implemented by issuing updated CFETP guidance to all units. Supervisors and Trainers will be briefed on new standards and provided with necessary materials to ensure uniform instruction across the career field. Management will be conducted by unit-level training managers who will oversee adherence to new requirements. MFMs will provide oversight to ensure alignment across commands. The overall program will be controlled and directed by the CFM.

18.1. Requirements. Based on the publication date of this CFETP, all members with 5-level waivers derived from, "Waiver for 1T0X1 Career Field and Education Training Plan (CFETP) Requirements" memorandum for record, dated 12 Nov 24, who have completed over 50% of their upgrade training, will retain their waivers based on the previous CFETP standards. This waiver will not remain valid for members who have completed less than 50% of their 5-level upgrade training and upgrade training must align with the new CFETP standards. Existing individual waivers for 3-level training (e.g., Airborne waivers) will remain valid regardless of the new CFETP requirements.

18.2. Training Methods. Training will be delivered through a combination of coach-pupil instruction, classroom-based learning, hands-on field exercises, and realistic scenario-based methods in varied environments to ensure comprehensive skill development. CFM-approved TTGs will be used for 5 skill level training requirements under this CFETP.

18.3. Certification Requirements. 5-level upgrade training: Trainers must hold a minimum of a 5-level skill in 1T0 Career Field for at least one year and demonstrate proficiency in all training techniques. Certifiers must not be the member's trainer, and the certifier must be a member within the chain of command. Certifiers are responsible for ensuring adherence to CFETP standards and validating that all trainees meet required proficiency levels.

18.4. Program Management. Program management will be conducted by unit-level trainers, certifiers and unit training managers. All management will be under oversight of their respective

MFM.

18.5. Status Reporting. Unit-level trainers, their supervisors, or senior enlisted leaders should report their transition training plan status to their MFM on a quarterly basis for the entire transition training period. MFMs will report their transition training plan status to the CFM semiannually for the entire transition training period.

18.6. Recommendations. Report unsatisfactory performance of individual course graduates or issues with technical training to the AETC MFM via the member's owning MFM. Reference specific STS line items and detailed performance issues.

PART II

Section A – Specialty Training Standard (STS)

1. Implementation.

1.1. The implementation of this STS for technical training (SST-AC) will occur within 12 months of publication. Any STS tasks that can be accomplished before the 12-month deadline shall be implemented as soon as feasible; however, full implementation will be completed within the specified timeframe.

1.2. Based on CRE or unidentified constraints, AETC/A3LS SERE Specialist MFM may request an extension to the CFM to extend the deadline.

2. Purpose. As prescribed in DAFMAN 36-2689, *Training Program*:

2.1. **Column 1**. Lists ("Tasks", "Knowledge", and "Technical References"), the competencies, learning outcomes, knowledge, and TRs necessary for Airmen to perform duties in the 3, 5, and 7-skill level. In addition, column 1 includes the "behavior match" as outlined in the competency header for required behaviors. Tasks are grouped by competency, sub-competency, and proficiency levels to aid task selection and reduce duplication. Supervisors may select tasks from any attachment to accurately define work performed. **Note:** This version of the CFETP does not include TRs in column 1 of the STS. See **Part II, Section C**, for more information about TRs.

2.2. **Column 2**. Identifies tasks with specific functions and core tasks for each skill level ("5", "7"), deployment tasks (*), CBRN tasks (~), and wartime tasks (W). Wartime tasks will be taught at the 3-level course upon activation of the wartime course.

2.3. **Column 3**. Provides certification for OJT. Column 3 is used to record completion of tasks and knowledge training requirements. If available, use automated training management systems to document qualifications. Use the master task list for the current unit to circle the appropriate items. Tasks and knowledge items status documentation must show a start date, completion date, trainee/trainer and certifier initials (when required). Third party certification is required on core tasks for upgrade to each skill level. Refer to DAFMAN 36-2689 for more details on proper training documentation.

2.4. **Column 4**. Shows formal training requirements. Column 4 (Proficiency codes) identifies the proficiency to be demonstrated on the job by the graduate as a result of training on the behaviors/learning outcomes and the career knowledge provided by the correspondence course.

2.5. Qualitative Requirements. **Attachment 2** contains the behavioral statement coding used to indicate the level of training and knowledge provided by resident training.

2.6. Job Qualification Standard (JQS). This STS becomes a JQS for OJT training when placed in DAF Form 623, *Individual Training Record Folder*, and used IAW DAFMAN 36-2689. When used as a JQS, the following requirements apply:

2.6.1. Documentation. Upon publication of the CFETP, the CFM will determine a no later than date to transition documentation over to an electronic system through memorandum. Until that transfer, members will continue to utilize paper 623, Individual Training Record Folder. Document and certify completion of training IAW DAFMAN 36-2689. Use of **Part I** and **Part II** of this CFETP is mandatory in individual training records. The master task list items will be based on unit specific requirements, and the STS will be adjusted within the electronic system for each unit.

2.6.2. Decertification and Recertification. When a supervisor determines an Airman is unqualified on a task previously certified for their duty position, the supervisor erases the previous certification or deletes certification when using automated system. Appropriate remarks pertaining to the reason for decertification are entered on the DAF Form 623A*, On-the-Job Training (OJT),* or automated version. Once the Airman demonstrates they met the required competency level based on the training standards supervisor/trainer and certifier document IAW DAFMAN 36-2689.

2.6.3. Training Standard. Tasks are trained and qualified to the go/no go level. Go means the individual can perform the task without assistance and meet local demands for accuracy, timeliness, and correct use of procedures.

2.6.4. Transcribing. Transcribing documentation to a new CFETP is an administrative function, not a reevaluation of training. Therefore, supervisor and trainer are considered synonymous for the purpose of documentation. Transcribe within 120 days (240 days for ARC) of published date of revised CFETP or from date revision is posted to automated training records system.

3. Specialty Knowledge Tests (SKTs). The CFETP is a guide for development of promotion tests used in the Weighted Airman Promotion System (WAPS). SKTs are developed at the USAF Occupational Measurement Squadron by senior NCOs with extensive practical experience in their career fields. The tests sample knowledge of STS subject matter areas judged by test development team members as most appropriate for promotion to higher grades. Questions are based upon study references listed in the WAPS catalog. Individual responsibilities are in DAFMAN 36-2664, *Personnel Assessment Program,* the Enlisted Promotion Reference, and Requirements Catalog for most up-to-date testing requirements https://www.studyguides.af.mil/. WAPS is not applicable to the Air Force Reserve and Air National Guard.

4. Recommendations. Report unsatisfactory performance of individual course graduates and any inadequacies of this CFETP to the respective MFM and or CFM. Reference the specific area of concern (paragraph, training standard element, etc.).

Section B – Course Objective List

5. All 3 and 7-level tasks are accomplished through formal training courses to achieve the desired competency and behaviors listed in the STS (**Attachment 3**) of this CFETP.

6. Course numbers with an "SV" prefix have required proficiency levels (RPL) and learning objectives included in AETC approved syllabi. Syllabi will be maintained by 336 TRG/TGT.

7. Any changes to the course syllabus (e.g., time adjustments, rearranging the schedule) must follow the approved AETC waiver process. However, any deviations from 3, 5 and 7-level course objectives to meet the STS must require CFM approval.

8. The 5-level upgrade tasks are accomplished through a combination of formal training courses and OJT conducted at the unit level. CFM approved TTGs are to be used for all 5-level tasks.

Section C – Support Material

9. SERE Specialist CFETP Support Material Library. On behalf of the CFM, 336 TRG/TGT (AETC) will maintain an up-to-date SharePoint library of support material related to this CFETP, 3 and 7 skill level formal training, and 5 skill level upgrade training. The support material library will:

9.1. Be found on the Guardian Angel SERE SharePoint page at: https://usaf.dps.mil/teams/13306/SERE.

9.2. Be updated and verified for accuracy at least annually, or as directed by the CFM.

9.3. Include at a minimum:

9.3.1. 3 and 7 skill level formal training learning objectives.

9.3.2. A listing of TRs used for SERE Specialist training and education with links to available online sources.

9.3.3. Digital copies of TRs that are difficult to source online.

9.3.4. CFM-approved TTGs.

9.3.5. Applicable JQS templates and adopted forms supporting UGT.

10. Task Training Guides (TTGs). The intent for TTGs is to standardize 5 skill level upgrade training across the career field, and to provide units with clear guidance on how to train and evaluate their members un UGT.

10.1. The CFM is the approval authority for TTGs.

10.2. The CFM should assemble a virtual or in-person working group consisting of a diverse cross-section career field members to review and update TTGs at least annually.

10.3. New TTGs or substantive changes to existing TTGs require MFM concurrence prior to CFM approval.

10.4. MAJCOMs may add to the CFM-approved TTGs to meet command-specific requirements but may not waive items without formal coordination.

11. Recommendations. Requests for updates, revisions, and additions to the support material library should be sent to 336 TRG/TGT in coordination with the respective MFM.

Section D – Training Course Index

12. Purpose. This section of the CFETP identifies a sampling of technical and non-technical training courses available for SERE Specialists, including those operated by sister services and contract companies to accomplish required skill level upgrade training and unique needs based on specific mission/unit assignment. Commanders may authorize unit funds to attend other DoD and non-DoD courses to meet unit, MAJCOM, ARC, and CCMD task-specific requirements. **Note:** This index is not all-inclusive. Members should forward recommendations for course additions and revisions to their respective MFM for consideration at the next CFETP review.

Table 12.1. Training Course Index.

Course Title	Location		OPR
Advanced Mountaineering	Various Locations		Civilian
Avalanche Rescue	Various Locations		Civilian
Swift Water Rescue	Various Locations		Civilian
Vehicle Acquisition	Various Locations		Civilian
Wilderness First Responder	Various Locations		Civilian
Ally, Coalition, and Partner Nation SERE Courses	Various Locations		Host Nation
PR102 (J3OP-US018) - Introduction to Personnel Recovery	Joint Knowledge Online (JKO)		JPRA
PR106 (J3OP-US123) - Introduction to DoD Reintegration	JKO		JPRA
PR120 (J3OP-PR120) - Personnel Recovery Integration with Staff, Battle Rhythms, and Joint Functions	JKO		JPRA
PR121 (J3OP-PR121) - Personnel	JKO		JPRA

Recovery and the Command-and-Control Joint Function			
PR122 (J3OP-PR122) - Intelligence Support to Personnel Recovery	JKO		JPRA
PR123 (J3OP-PR123) - Personnel Recovery and the Information Joint Function	JKO		JPRA
PR130 (J3O-PR130) - Introduction to DoD Support to PR in a Chief of Mission Environment (DSPRCE)	JKO		JPRA
PR292 - Personnel Recovery Coordination	Personnel Recovery Education & Training Center (PRETC)		JPRA
PR294 - Personnel Recovery for Special Operations	PRETC (USSOCOM Only)		JPRA
PR295 - Personnel Recovery Joint Planning Process Facilitation	PRETC (MTT to COCOM / Component to support planning)		JPRA
PR296 -DoD Reintegration Responsibilities	PRETC		JPRA
PR297 - Personnel Recovery Debriefing	PRETC		JPRA
PR300 - Personnel Recovery Execution	PRETC		JPRA
PR303 - Nonconventional Assisted Recovery Plans & Operations	PRETC		JPRA
PR350 - Personnel Recovery Planning	PRETC		JPRA
PR397 - Advanced Personnel Recovery Debriefing	PRETC		JPRA
SERE 220 Specialized SERE Training	Ft. Belvoir, VA		JPRA
SERE 245 Specialized SERE Training	Fairchild AFB, WA		JPRA
SERE 350, Specialized Survival for Select Personnel	Fairchild AFB, WA		JPRA
SERE 360, Joint Resistance Training Instructor Course (JRTIC)	Fairchild AFB, WA		JPRA
SERE 370 A, *Urban Evasion Training*	Fairchild AFB, WA		JPRA
Sister Service SERE Courses	Various Locations		Sister Service
Joint Special Operations University (JSOU) Joint Fundamentals Course CEP-1	Distance Learning		SOCOM

JSOU Enterprise Management Course CEP-2	Distance Learning		SOCOM

Attachment 2 – Qualitative Requirements

QUALITATIVE REQUIREMENTS	
Behavioral Statement STS Coding System	
Code	**Definition**
K	Subject Knowledge Training - The verb selection identifies the individual's ability to identify facts, state principles, analyze or evaluate the subject.
P	Performance Training - Identifies that the individual has performed the task to the satisfaction of the course; however, the individual may not be capable of meeting the field requirements for speed and accuracy.
pk	Performance Knowledge Training - The verb selection identifies the individual's ability to relate simple facts, procedures, operating principles, and operational theory for the task.
-	No training provided in the course or CDC.
X	Training is required but not provided due to limitations in resources.

3. ENGAGEMENT

3.1. COMMUNICATION
Description: The process of receiving, synthesizing, and presenting clear, concise, and accurate messaging through tailored verbal, nonverbal, and written information to achieve objectives.

Supporting Competencies: Communication, Influence, Self Control, Leadership

3.1.1. Communication (Basic)
Required Behaviors:
1. Creates verbal and written products that convey information in a logical flow to assist in the explanation of information
2. Utilizes appropriate visual aids to facilitate message delivery
3. Recognizes social cues, non-verbal communication, and cross-cultural nuances to adjust message delivery and improve receipt for target audiences

Criteria: Consistency of Application: Sustained application of competency over time

SPECIALTY TRAINING STANDARD - AFSC 1T0X1
