AIRCRAFT ARMAMENT SYSTEMS SPECIALTY (AFSC 2W1X1)

CAREER FIELD EDUCATION AND TRAINING PLAN

Preface

1. Aircraft Armament Systems is the only Air Force Specialty (AFS) chartered with a deliberate focus on combat aircraft generation timing. The structure of the AFS has evolved into two independent but related charters: loading and maintenance. The *USAF Aircraft Armament White Paper* describes how Armament Airmen enhance combat capability by performing both charters. Load crews work as a team to perform physical actions that arm both nuclear and conventional aircraft with explosives. Loading an aircraft within combat generation timing requires abbreviated technical data in the form of checklists, and the choreography of team members to efficiently arm aircraft with explosives. Weapons loading is managed, and Airmen are certified under the Loading Standardization Evaluation Program (LSEP). Airmen's expertise provides reliable combat aircraft configurations and release capability by maintaining the aircraft weapons release system and weapons suspension equipment, which is managed through this Career Field and Training Plan (CFETP). As Aircraft Armament Systems Airmen develop a breadth of experience across multiple assignments, mission design series aircraft, and equipment, that unique expertise fosters continued development in combat aircraft generation process, from aircraft recovery to arming to launch, Aircraft Armament Systems Airmen focus, and performance is the combat mission. To support and shape the force, it is imperative that the enlisted force is developed with the knowledge, skills, abilities, and other characteristics (KSAO) to resource the Air Force to meet challenges of the future. If the Air Force is to train today's Airman for tomorrow's missions, it is essential the work force be effectively trained to perform duties within each skill level of the AFS. The CFETP for the Aircraft Armament Systems Specialty is a comprehensive education and training document that identifies life cycle education and training requirements, support resources, and minimum core task requirements. This CFETP was developed in accordance with DAFMAN 36-2689, Total Force Development. Note: Civilians occupying associated positions will use Part II to support duty position qualification training.

1.1. Part I provides the descriptive context and information necessary for overall management of the specialty. Section A explains how to use the plan. Section B identifies career field progression, duties and responsibilities, training strategies, and career field path. Section C associates each level with specialty qualifications. Section D indicates resource constraints, e.g. funds, manpower, equipment, and facilities. Section E identifies transitional training guide requirements for SSgt through MSgt.

1.2. Part II includes information for supervisors and trainers used to identify, plan, and conduct training commensurate with the overall goals of this plan. Section A identifies the Specialty Training Standard (STS) and includes duties, tasks, TRs to support training, AETC conducted training, wartime course and core task and correspondence course requirements. Section B contains the Course Objective List (COL) and training standards supervisors will use to determine if airmen satisfied training requirements. Section C identifies available support materials. An example is a Qualification Training Package (QTP) which may be developed to support proficiency training. Section D identifies a training course index supervisors can use to determine resources available to support training, mandatory and optional courses are included. Section E identifies MAJCOM unique training requirements supervisors can use to determine training required for the associated qualification needs. At unit level, supervisors and trainers will use Part II to identify plan and conduct training to meet the overall goals of this plan.

2. Using guidance provided in the CFETP will ensure individuals in the Aircraft Armament Systems specialty receive effective training at the appropriate points in their career. This plan will enable us to train today's workforce for tomorrow's jobs.

ABBREVIATIONS / TERMS EXPLAINED

Air Force Career Field Manager (AFCFM) - Representative appointed by the respective HQ USAF Deputy Chief of Staff or Under Secretariat, to ensure assigned AF specialties are trained and utilized to support AF mission requirements. AF Career Field Manager is the OPR; however, works in concert with MAJCOM Functional Managers as required.

Air Force Job Qualification Standard (AFJQS). A comprehensive task list, which describes a particular job type or duty position. Supervisors use the AFJQS to document task qualifications. The AFJQS tasks are common to all persons serving in the described duty position.

Career Field Education and Training Plan (CFETP). A comprehensive, multipurpose document encapsulating the entire spectrum of education and training requirements for a career field. It outlines a logical growth plan that includes training resources and is designed to make career field training identifiable, to eliminate duplication, and to ensure the training is budget defensible.

Competencies. A combination of knowledge, skills, abilities and other characteristics that manifest in observable and measurable pattern of behaviors required for mission success.

Competency Model. A collection of competencies that together define successful performance in a particular work setting. Competency models are the foundation for important human resource functions such as recruitment and hiring, training and development, and retention. Competency models can be developed for specific jobs, job groups, organizations, occupations, or missions.

Continuation Training. Additional training exceeding requirements with emphasis on present or future duty assignments.

Core Task. A task Air Force Career Field Managers (AFCFMs) identify as a minimum qualification requirement within an Air Force specialty.

Course Objective List (COL). A publication derived from initial and advanced skills Course Training Standard, identifying the tasks and knowledge requirements, and respective standards provided to achieve 3- or 7-skill level in this career field. Supervisors use the continuum of learning to assist in conducting graduate evaluations.

Course Training Standard (CTS). An AETC document that identifies training tasks and associated proficiency levels for a specific course. It serves as a contract between AETC and its customers to show enlisted supplemental or officer training requirements.

Duty Position. When used in this CFETP refers to the work center currently assigned (i.e.: weapons section, weapons standardization, armament shop, etc.)

Education and Training Course Announcement. Contains specific MAJCOM procedures, fund cite instructions, reporting instructions, and listings for those formal courses conducted or managed by the MAJCOMS or FOA.

Exportable Training. Additional training via computer assistance, paper text, interactive video, or other necessary means to supplement training.

Field Training (Type 4). Special or regular on-site training conducted by a Field Training Detachment (FTD) or by a mobile training team.

Foundational Competencies. A set of accepted and valued competencies applicable to all Airmen (officer, enlisted, and civilian) to achieve success across the wide array of Air Force missions, roles, functions, and duties.

Initial Skills Training (Type 3). AFS specific training an individual receives upon entry into the Air Force or upon retraining into this specialty for award of the 3-skill level.

Instructional System Development (ISD). A deliberate and orderly but flexible process for planning, developing, implementing, and managing instructional systems. It ensures that personnel are taught in a cost-efficient way the knowledge, skills, and attitudes are essential for successful job performance.

Master Task Listing (MTL). A comprehensive list of all tasks performed within a work center and consisting of the current CFETP or AFJQS and locally developed AF Forms 797 (as a minimum). Should include tasks required for deployment and/or UTC requirements.

Master Training Plan (MTP). Employs a strategy for ensuring the completion of all work center job requirements by using a Master Task Listing and provides milestones for task, CDC completion, and prioritizes deployment/UTC, home station training tasks, upgrade, and qualification tasks.

MyLearning. A cloud-based learning management system and application stack that enables enterprise-side learning, management, automation, and reporting for Air Force education and training capabilities.

Occupational Analysis Report (OAR). A detailed report showing the results of an occupational survey of tasks performed within a particular AFS.

Occupational Competencies. Competencies required by an individual to successfully execute a mission, role, function, job, task, or duty within a designated or specified workforce category or group of functions requiring similar work (e.g., Aircraft Maintenance, Civil Engineering, and Nursing).

On-the-Job Training (OJT). Hands-on, over-the-shoulder training conducted to certify personnel in both upgrade (skill level award) and job qualification (duty position certification) training.

Behavioral Statement Code Key. The behavioral code key shows the level of training and knowledge provided by resident training and career development courses.

Proficiency Training. Proficiency training is additional training, either in-residence or exportable advanced training courses, or on-the-job training, provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade.

Qualification Training (QT). Actual hands-on task performance training designed to qualify an airman in a specific duty position. This training program occurs both during and after the upgrade training process. It is designed to provide the performance skills/knowledge required to do the job.

Qualification Training Package (QTP). An instructional package designed for use at the unit to qualify, or aid qualification, in a duty position or program, or on a piece of equipment. It may be printed, computer-based, or in other audiovisual media.

Ready Airman Training. Training that prepares an Airman to survive, operate and succeed in a deployed environment, while reinforcing Airman's foundational competencies. Ready Airman Training provides Airmen the knowledge, skills, and abilities to survive, operate and succeed across the full range of military operations in support of the Combatant Command. These knowledge, skills and abilities are

not routinely acquired during initial occupational, mission oriented or ancillary training venues.

Resource Constraints. Resource deficiencies, such as money, facilities, time, manpower, and equipment that preclude desired training from being delivered.

Specialty Training Requirements Team (STRT). A partnership between AFCFM, AETC TPM, MFM, TM and SMEs that determines the need and decides on objectives that will lead to better training quality through review and evaluation of training method, leading to preparation of Draft CFETP.

Specialty Training Standard (STS). An Air Force publication that describes an AFS in terms of tasks and knowledge that an airman may be expected to perform or to know on the job. It further serves as a contract between the Air Education and Training Command (AETC) and the user to show which of the overall training requirements for an AFSC are taught in formal schools or CDCs.

Supplemental Training. Formal, standardized training within an AFS that is in addition to required initial skills training and skill level upgrade training. It may support new/newly assigned equipment, methods, and/or technology.

Total Force. All collective Air Force components (active, reserve, guard, and civilian elements) of the United States Air Force.

Total Force Integration (TFI). A concept for leveraging the combined human resources of the Regular, Guard, and Reserve members, plus Air Force civilian and contract employees, to provide the Air Force with the best possible capabilities to meet their requirements.

Total Force Training Record (TFTR). A single source of authoritative OJT records that is extensible to meet Air Force OJT tracking requirements to be used as one source of truth.

Training Planning Team (TPT). Comprised of the same personnel as a U&TW, however TPTs are more intimately involved in training development, and the range of issues is greater than is normal in the U&TW forum.

Task Qualification Training (TQT). TQT in the task column indicates the task is a CBRN Defense Qualification Task In Accordance With (IAW) DAFI 10-2501, *Emergency Management Program*. These tasks are only required for measured units that fulfil the description of a unit and have a Unit Descriptor Code (UDC) of combat, combat support or combat service support IAW AFI 38-101, *Manpower and Organization*. Units will determine the frequency of how often these tasks are assessed to maintain CBRN defense readiness.

Upgrade Training (UGT). Mandatory training that leads to attainment of higher level of proficiency and award of the 5-, 7-, 9-skill levels.

Utilization and Training Workshop (U&TW). A forum that is convened and chaired on a recurring basis by the AF Career Field Manager (AFCFM) along with the MAJCOM Functional Managers, AETC training personnel and Subject Matter Experts (SME). The workshop is designed to review the applicable CFETP to ensure currency, accuracy and completeness of content, to include specific formal career ladder training requirements.

Part I

Section A - General Information

1. Purpose. This CFETP provides the information necessary for Air Force Career Field Managers (AFCFM), MAJCOM Functional Managers (MFMs), commanders, training managers, supervisors, and trainers to plan, develop, manage, and conduct an effective and efficient career field training program. The plan outlines the training that individuals in this AFS should receive in order to develop and progress throughout their career. This plan identifies initial skills, upgrade, qualification, advanced and proficiency training. Initial skills training is the AFS specific training an individual receives upon entry into the AF or upon retraining into this specialty for award of the 3-skill level. Normally, this training is conducted by AETC at one of the technical training centers. Upgrade training identifies the mandatory courses, task qualification requirements, and correspondence course completion requirements for award of the 3-, 5-, 7-, 9-skill level. Qualification training is actual hands-on task performance training designed to qualify an Airman in a specific duty position. Advanced training is formal specialty training used for selected airmen. Proficiency training is additional training, either in-residence or exportable advanced training courses, or on-the-job training provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade. The CFETP has several purposes—some are:

1.1. Serves as a management tool to plan, manage, conduct, and evaluate a career field training program. Also, it is used to help supervisors identify training at the appropriate point in an individual's career.

1.2. Identifies task and knowledge training requirements for each skill level in the specialty and recommends education/training throughout each phase of an individual's career.

1.3. Lists training courses available in the specialty, identifies sources of training, and the training delivery method.

1.4. Identifies resource constraints, which impact the desired career field training process.

2. Uses. The plan will be used by MFMs, Wing Weapons Managers (WWMs), and supervisors at all levels to ensure comprehensive and cohesive training programs are available for each individual in the specialty.

2.1. AETC training personnel will develop/revise formal resident, non-resident, field, and exportable training based on requirements established by the users and documented in Part II of the CFETP. They will also work with the AFCFM and MFMs to develop acquisition strategies for obtaining resources needed to provide identified training. The Technical Training Annex is located at https://usaf.dps.mil/sites/12231/SitePages/Training-Annex.aspx?csf=1&web=1&e=21HaEL

2.2. MFMs and WWMs will ensure their training programs complement the CFETP mandatory initial, upgrade, and proficiency requirements. OJT, resident training, contract training, or exportable courses can satisfy identified requirements.

2.3. Each individual will complete the mandatory training requirements specified in this plan. The list of courses in Part II will be used as a reference to support training.

3. Coordination and Approval. The AFCFM is the approving official and waiver authority for any

changes to, and deviations from, this CFETP. The AFCFM will initiate an annual review of this document to ensure currency and accuracy. MAJCOM and AETC personnel will identify and coordinate on the career field training requirements. Using the list of courses in Part II, they eliminate duplicate training.

Section B - Career Progression and Information

1. Specialty Summary, Duties/Responsibilities and Specialty Qualifications. Refer to the Department of the Air Force Enlisted Classification Directory (DAFECD), accessible via https://myfss.us.af.mil/USAFCommunity/s/knowledge-detail?pid=kA0t0000000wlDpCAI

2. Competency Based Progression. The Air Force defines competencies as a combination of knowledge, skills, abilities and other characteristics that manifest in observable and measurable pattern of behaviors required for mission success. The Aircraft Armament Systems Specialty has rebuilt the training platform using competencies to identify the behaviors that are needed to be successful in the profession. This has been accomplished by identifying and integrating the 2W1XX occupational competencies and leveraging the Air Force's foundational competencies in a manner that provides Airmen pathways to successful development. The *Foundational Competencies* are a set of accepted and valued competencies, which enable success across a wide array of AF missions, roles, functions, and duties. These competencies are the core of Airmen development and enable Airmen with tools, pathways, and capabilities to improve their performance in any job, specialty, or situation. The foundational competencies are grouped into different categories of Developing Self, Others, Ideas, and Organization. Airmen can go to (https://myvector.us.af.mil/myvector/Home) to complete a self-assessment, where subordinates, peers, and leaders can also provide feedback on personal strengths and areas for improvement. *Occupational Competencies* are required of all Airmen within a specific workforce category and provide the breadth of experience across the AFS. These competencies provide a framework that describes the knowledge, skills, abilities, and other characteristics needed to perform the mission successfully.

	Competency	Definition
Developing Self	Accountability	Demonstrates reliability and honesty; takes responsibility for the actions and behaviors of self and team
	Perseverance	Displays grit in accomplishment of difficult long-term goals. Works strenuously toward challenges; maintains effort and interest over years despite failure, adversity, and plateaus in progress.
	Communication	Effectively presents, promotes and prioritizes varied ideas and issues both verbally and non-verbally through active listening, clear messaging, and by tailoring information to the appropriate audience
	Decision Making	Makes well-informed, effective and timely decisions that weigh situational constraints, risks, and benefits
	Information Seeking	Demonstrates an underlying curiosity; desires to know more about things, people, oneself, the mission or issues; an eager, aggressive learner
	Flexibility	Adapts to and works with a variety of situations, individuals, or groups effectively
	Resilience	Negotiates, manages, and adapts to significant sources of stress or trauma
	Initiative	Does more than is required or expected to improve job results; takes action appropriately without prompting
	Self-Control	Keeps emotions under control and restrains negative actions when under stress
Developing Others	Teamwork	Collaborates effectively with others to achieve a common goal or complete a mission task
	Develops People	Invests in others to maximize their contributions to the mission by inspiring and providing an environment of continual feedback and learning opportunities
	Service Mindset	Desires to help or serve others to meet their needs; makes and focuses efforts to discover and meet others' needs
	Leadership	Inspires, builds, and sustains others' motivation and morale to accomplish the mission; organizes people and actions
Developing Ideas	Analytical Thinking	Identifies problems, evaluates alternative perspectives / solutions, makes effective recommendations, and identifies courses of action
	Digital Literacy	Uses technology to identify, critically evaluate and synthesize data and information; explore, create and manage digital content; and appropriately interact in a virtual environment
	Creative Thinking	Develops new insights into new situations; questions conventional approaches
	Fostering Innovation	Builds a culture of behaviors and business practices that encourages, champions, and rewards creativity and informed risk taking; is open to change
	Influence	Intends to persuade, convince, or impress others to elicit their support to make specific impacts or achieve particular effects on others
Developing Orgs	Resource Management	Carefully and responsibly administrates resources placed under an Airman's control with the intent to maximize readiness and lethality and improve organizational performance
	Results Focused	Demonstrates concern for working well or for competing against a standard of excellence
	Change Management	Adapts, helps others adapt, or implements change with the goal of ensuring unit goals are properly aligned to the desired end state
	Strategic Thinking	Considers and organizes activities and resources to achieve a desired goal; thinks on a large and small scale, long- and short-term
	Precision	A concern for order, quality, and accuracy with an underlying drive to reduce uncertainty in the environment

Figure 1.1. Airmen's Foundational Competencies (AFH 36-2647).

2.1. Occupational Competency Model. A career field's competencies can be viewed in a model, which is an organized collection pertinent to the career field. The occupational model provides a framework to effectively assess, maintain, and monitor the competencies required for mission success for Airmen within the Aircraft Armament Systems career field. The occupational modeling process follows a distinct process with continued involvement from the career field and allows Airmen to see how their task lists, OJT, formal courses, and other training, education, and experiences are aligned to the career field's strategic objectives. Career fields work with trained experts to identify and develop an AFS mission-based competency model, which consists of the competencies, sub-competencies, and definitions. The model focuses on integrating not just the technical components, but also leadership, management, combat, joint, all-domain, and social mastery required for Airmen to succeed in their career field.

Competency	Sub-competency	Definition
Armament Operations	Maintenance	The technical expertise to create, interpret and explain technical data to maintain weapons systems, equipment and serviceability of aircraft to ensure continued reliability for operational readiness.
	Loading	Proficiently load and unload conventional and nuclear munitions on aircraft to provide overwatch, national security, and lethal combat capabilities to ensure air superiority and nuclear deterrence.
Quality Control	Logistics	Support the identification of planning for, resourcing of, and implementation of maintenance concepts and requirements to ensure the best possible equipment capability is available when the Warfighter needs it at the lowest Total Ownership Cost (TOC).
	Inspections	Careful examination of personnel, training, equipment, documentation, as well as maintenance and loading tasks to meet established standards.
	Test & Acquisitions	Supports development and execution of T&E processes, standards, methods, and techniques.
	Documentation	Creating, updating, and recording information to provide instruction, reference, and planning to forecast mission requirements.
Resource Management	Training	Instilling and increasing knowledge, skills, and abilities to develop performance.
	Operations Management	The ability to identify and facilitate organizational needs to complete the mission effectively.
	Personnel Development	The ability to guide personnel effectively to complete taskings through compliance with directives.
Organizational Management	Leadership	The art and science of accomplishing the Air Force mission by motivating, coaching, influencing and directing personnel. The ability to guide personnel effectively to complete taskings through compliance with directives.
Information Management	Communication	The process of exchanging information through a common system of verbal, non-verbal, and physical (i.e. marshalling, signaling) methods to direct, inform, and persuade individuals and agencies at all levels.
Risk Management	Safety	'Identifying potential hazards and applying proper risk management principles in accomplishment of the mission requirements.
	Nuclear Surety	Ensuring maximum capabilities consistent with operational requirements using policies, procedures, and controls to ensure safety and deterrence.

Figure 1.2. 2W1XX, Aircraft Armament, Occupational Competency Model and Sub-Competencies

2.2. Occupational Competency Proficiency Levels. After the model is developed, a team of subject matter experts begin building competency proficiency levels, providing the depth of knowledge, which leads to rubrics that consist of competency, a description of the competency, and measurable and observable behaviors. The rubrics will help Airmen learn which behaviors are aligned to the career field's strategic direction, the professional development expectations, and the criteria for success.

Proficiency Levels	
Expert Depth of Knowledge: New practices/concepts and theories of all workplace elements; is a credible resource in this area	The proficiency levels are broken into four parts: expert, advanced, intermediate, and basic Under each proficiency level are predetermined criteria selected by a group of SMEs from a career field and validated by the AFS. The criteria were used as the basis to develop the obserable behaviors, which are consistent but progressive in nature as a member moves up the scale from basic to expert. Some of the critera (e.g., depth of knowledge, consistency of application/complexity, and thinking challenge) allows an individual to become an expert through the experience gained in a particular job and over a period of time. For example, the person can quickly move up different proficiency levels while they are serving as a technician at a flight; they move quickly because they are exposed to an abundance of situations. While other criteria, (e.g., scope, impact, and reach of influence) requires more of a hierarchical approach to gain the experience needed to progress through the competency levels. Moving through the proficiency levels may be be difficult to do at certain jobs. For example, if scope at the expert level requires job integration with the AF-level, then the individual may have to be in a position where they can gain that experience (i.e., at HHQ, wing, or an organization with far reaching capabilities).
Advanced Depth of Knowledge: New practices of all workplace elements	
Intermediate Depth of Knowledge: Established practices of all workplace elements	
Basic Depth of Knowledge: Established practice with some workplace elements	

Figure 1.3. Proficiency Levels

Criteria	Basic	Intermediate	Advanced	Expert
Depth of Knowledge	Established practice with some workplace elements	Established practices of all workplace elements	New practices of all workplace elements	New practices/concepts and theories of all workplace elements; is a credible resource in this area
Consistency of Application	Sustained application of competency over time	Sustained application of competency over time in a variety of situations	Sustained application of competency over time in complex situations	Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency
Thinking Challenge	Within establish procedures or similar situations	A wide variety of situations	No established procedures	Requires developing imaginative procedures
Scope	Specific Area	Integration with concerned areas	Integration with organizational strategies	Integration with AF-level/within industry
Impact on...	Specific workplace tasks	Specific workplace projects	Management decisions	AF-level practices/within industry
Reach of Influence	Individuals	Unit/Groups	Wing/Institutional	MAJCOM/AF-Level/Industry

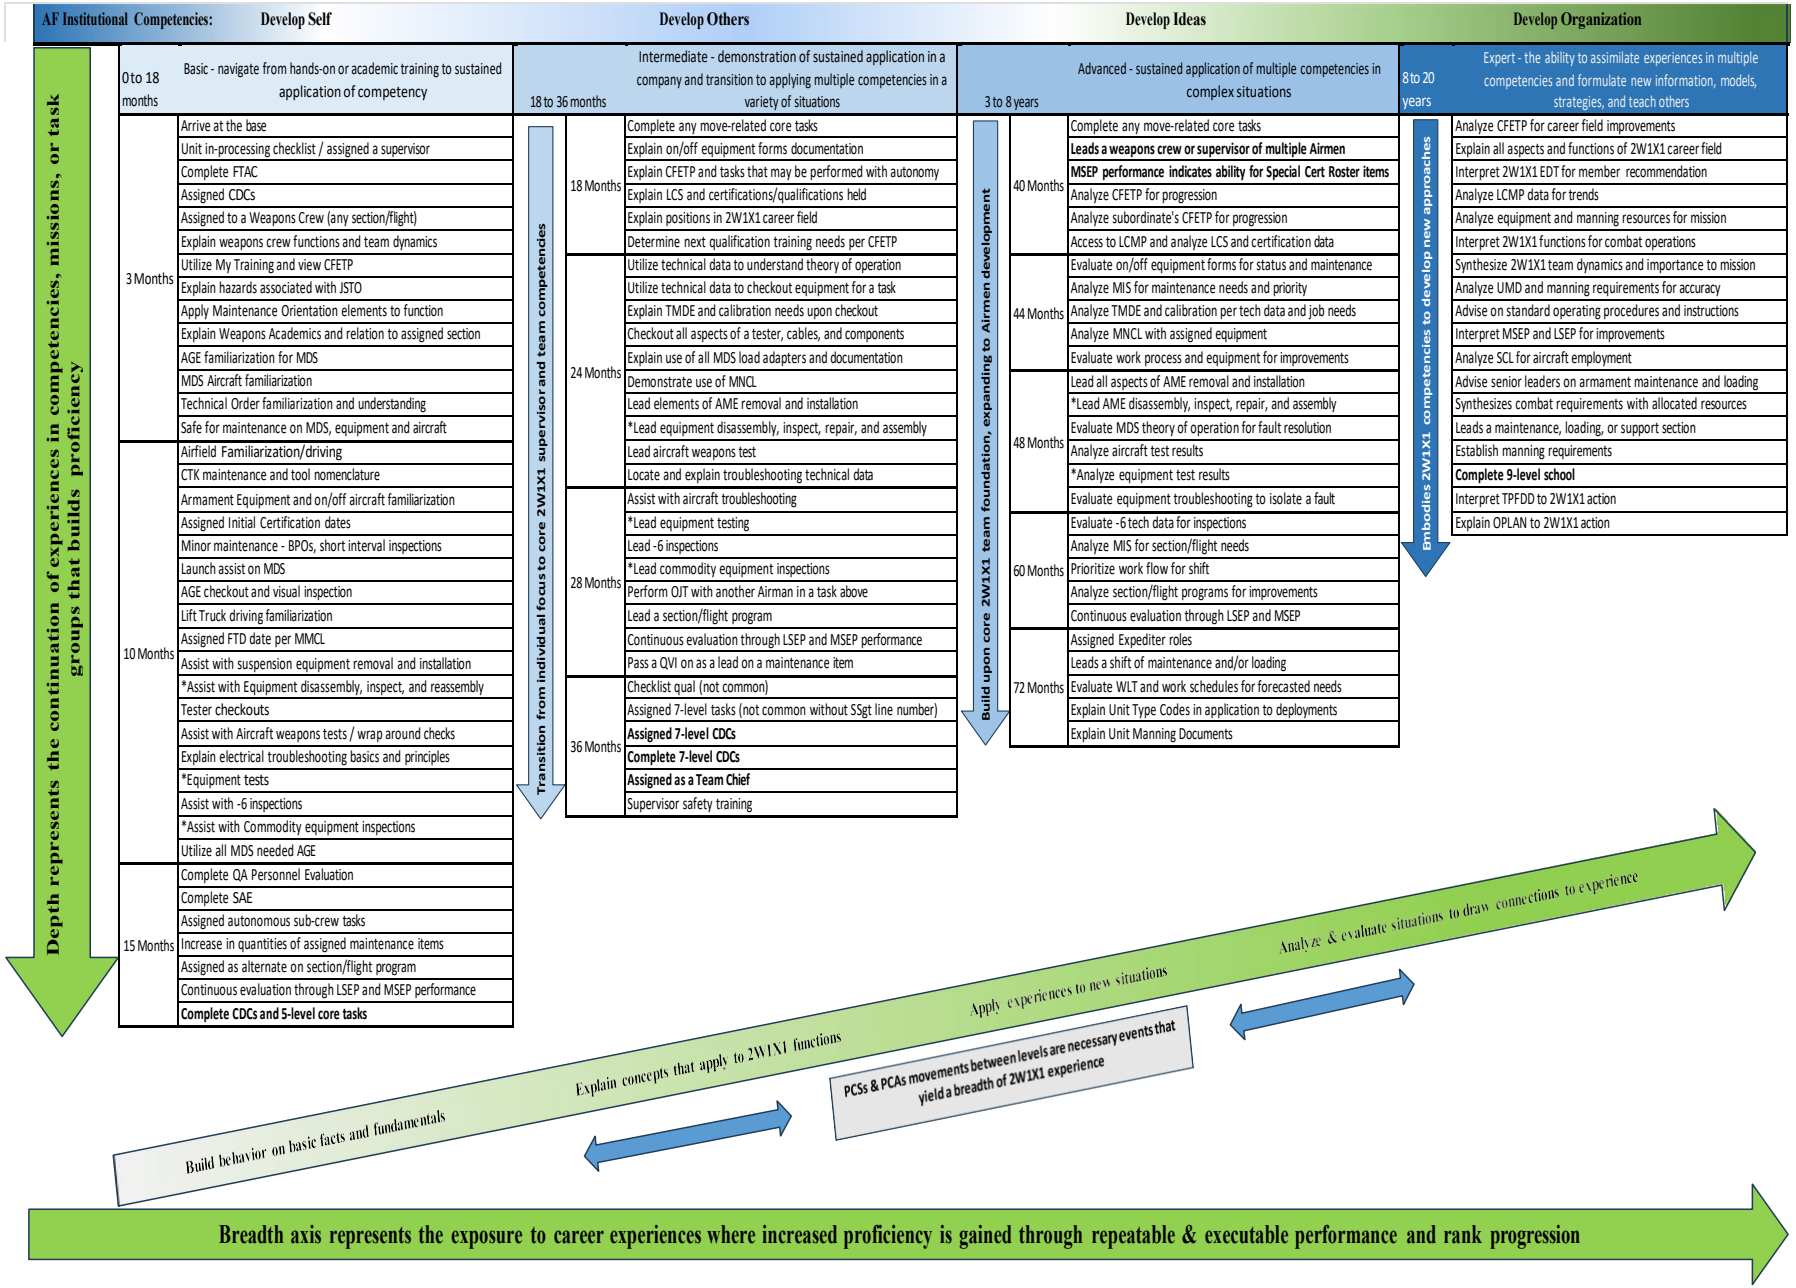

Figure 1.4. Context for Proficiency Levels and Impact Levels

2.2.1. In incorporating the occupational competency model into the CFETP, each sub-competency rubric is constructed so leaders, supervisors, trainers, instructors, or mentors can now set members up to build these supporting competencies, institute behaviors, and place their Airmen in situations where they can apply those strategies. Another key component within the rubric is the supporting competency section at the bottom left-hand corner. The culmination of these elements ensure we can develop Airmen who are better prepared, mission-focused, and ready to succeed. Additionally, AFH 36-2643, *Air Force Mentoring Program*, has information on how competencies can be used when an established mentoring strategy is put into effect to foster and develop Airmen.

2.3. Maintenance Annex. As subject matter experts from across the Aircraft Armament System Specialty evaluated the incorporation of the occupational competency model, the acknowledgement that Armament Airmen build transferable KSAOs from various aircraft required preservation in this CFETP. Aircraft Armament Airmen work on over one-hundred thousand pieces of equipment across the AF. Based on distinct mission sets, different aircraft and the ability for Airmen to Permanent Change of Station (PCS) to any location, ensuring Airmen develop KSAOs specific to that aircraft and that duty assignment ensure safe, secure, and reliable combat operations through measurable training listed in the maintenance annex.

3. Skills and Career Progression. Adequate training and timely progression from the apprentice to the superintendent skill level play an important role in the Air Force's ability to accomplish its mission. As Airmen PCS to locations listed in the table listed below paragraph 7.1, competencies and proficiency levels must be set at the appropriate level, this is not regression, e.g. moving from advanced to basic. It is development and learning new missions and aircraft. It is essential that everyone involved in training do their part to plan, manage, and conduct an effective training program. The guidance provided in this part of the CFETP will ensure each individual receives viable training at appropriate points in their career. Use table 7.2 *Enlisted Career Path* in conjunction with information below to manage career field skill progression.

Figure 1.5. 2W1X1 Roadmap

3.2. Apprentice (3) Level. Individuals must successfully complete an initial skills training course listed in Table 10.1 to be awarded the 3-skill level. Upon completion of initial skills training, a trainee will work with a trainer to enhance their knowledge and skills as part of On-the-Job Training (OJT). They will utilize the Career Development Courses, Qualification Training, and available exportable courses for continued advancement.

3.3. Journeyman (5) Level. To be awarded the 5-skill level in the Aircraft Armament Systems Specialty, individuals must successfully complete the 2W151 CDCs and all applicable 5-skill level core tasks. After award of the 5-skill level, available continuation training should be used based on an individual's particular duty position or other needs. A listing of continuation training is included but not limited to training listed in Part II, Section D, of this CFETP. Individuals will also use the Weighted Airman Promotion System (WAPS) Catalog and resources to prepare for promotion testing. In addition, they should consider continuing their education toward an associate's or higher educational degree from the Community College of the Air Force (CCAF) or other accredited institution.

3.4. Craftsman (7) Level. To be awarded the 7-skill level in the Aircraft Armament Systems Specialty, individuals must successfully complete the 2W171 CDC and all applicable 7-skill level core tasks. After the award of the 7-skill level, available continuation training should be used based on an individual's particular duty position or other needs. A listing of continuation training is included but not limited to training listed in Part II, Section D, of this CFETP. Individuals will use the WAPS Catalog and resources to prepare for promotion testing. In addition, they should consider continuing their education toward an associate's or higher educational degree from the CCAF or other accredited institution.

3.5. Superintendent (9) Level. To be awarded the 9-skill level in the Armament Systems Specialty, individuals must be in the grade of SMSgt and have successfully completed the 9-skill level course, J3AAR2W191 0A1A. Additional training in the areas of budget, manpower, resources, and personnel management should be pursued through continuing education. Additional higher education and completion of courses outside their career AFSC are also highly encouraged.

4. Maintenance Badge and Missile Badge. To qualify for the Maintenance Badge and Missile Badge, 2W1X1 personnel must meet the following criteria:

4.1. Maintenance Badge Criteria

4.1.1. Basic. Wear the basic badge after award of 5-skill level.

4.1.2. Senior. Wear the senior badge after award of the 7-skill level.

4.1.3. Master. Wear the master badge after award of the 9-skill level.

4.2. Missile Badge Criteria

4.2.1. Basic. 2W1 personnel must be certified to load/unload guided missiles and /or perform maintenance on the aircraft / alternate mission equipment that support the guided missile systems for 12 consecutive months. Time may start anytime following the completion of technical training school to wear the Basic badge. Upon meeting this criteria, the member's immediate supervisor will initiate the AF Form 2096 process for approval by the unit Commander and inclusion into the member's permanent records for award.

4.2.2. Senior. 2W1 personnel wear the Missile Senior badge after the award of the 7-skill level with 48 months experience, cumulative from the award of 5-skill level, in direct support of guided missile loading and/or performing maintenance on aircraft or alternate mission equipment that support the guided missile systems. Upon meeting this criteria, the member's immediate supervisor will initiate the AF Form 2096 process for approval by the unit Commander and inclusion into the member's permanent records for award.

4.2.3. Master. 2W1 personnel wear the Missile Master badge as a MSgt or above with 48 months experience, cumulative from the award of 7-skill level and 60 months cumulative experience since award of the basic, in direct support of guided missile loading and/or performing maintenance on aircraft or alternate mission equipment that support the guided missile systems. Upon meeting this criteria, the member's immediate supervisor will initiate the AF Form 2096 process for approval by the unit Commander and inclusion into the member's permanent records for award.

Note: For the AF 2096 process, the award will be listed in Block V., Remarks, of the form with the following statement "Member has met the requirements for the award of the Missile Basic Badge / Missile Senior Badge / Missile Master Badge", as applicable.

5. Training Decisions. The CFETP has undergone a considerable revision towards building a competency-based training and development platform for the Armament career field. A significant change is shifting the focus from task-based training to an approach more centered on outcome-based learning. A task is a unit of work activity or operation which forms a significant part of a duty. These are singular in nature and are usually accomplished in one continuous action, which also can occur independently of other tasks. Conversely, outcomes are learning goals that typically consist of a multitude of tasks. These outcomes are actions and performances that embody and reflect the learner's competence in using content, information, ideas, and tools successfully. Focusing on learning outcomes allow organizations, leaders, supervisors, and trainers to incorporate foundational competencies and underlying characteristics (values, traits, attitudes) into learning, which is necessary for developing Airmen with the competencies needed for future challenges. The following decisions resulted from close coordination between HQ AETC, 2AF Technical Training, schoolhouse instructors and staff, field SMEs, functional managers and the AFCFM. The final training requirements are then approved by the AFCFM. The following key training decisions were made at the 2W1X1 Utilization and Training Workshop (U&TW) held at Sheppard AFB, TX, 3-5 September 2025.

5.1. Targeting learning outcomes, the team reverse engineered the behaviors found in the Armament occupational competency model and then by asking "What does an Airman need to know/do in order to master a specific behavior?" The intent of the learning outcomes is to identify all factors needed to succeed in attaining behavior. During the planning meeting, members decided (approved at STRT/U&TW) to remove the qualitative proficiency code key and use a behavioral statement coding system for the STS. As a result, each line item will consist of a verb and the coding system for formal training will only use P (performance), K (knowledge), and pk (performance-knowledge).

5.2. Core/Cert Tasks/Competencies. Tasks/competencies identified with the corresponding skill level (5/7) are specialty-wide training requirements. Certification on all backshop/flightline core tasks/competencies must be completed for skill level upgrade.

5.3. Initials Skills Training: Initial skills training is provided by AETC through the Armament Course.

5.4. 5-Level Upgrade Training. Upgrade requirements include completion of core competencies

and identified work center requirements for their assigned weapons system and completion of MAJCOM Mandatory Course List (MMCL) requirements as necessary based on assignment. Once 5-level CDC replacements are available, they will be mandatory for upgrade and sustainment of the 5-skill level.

5.5. 7-Level Upgrade Training Requirements. Upgrade requirements include completion of core competencies and identified work center requirements for their assigned weapons system, and completion of MAJCOM Mandatory Course List (MMCL) requirements as necessary based on assignment.

6. Higher Education and Advanced Certification Opportunities. Advanced certifications and other additional off-duty education is a personal choice encouraged for the professional development of the entire enlisted force.

6.1. Community College of the Air Force (CCAF). CCAF is one of several federally chartered degree-granting institutions; however, it is the only 2-year institution exclusively serving military enlisted personnel. The college is regionally accredited through Air University by the Commission on Colleges of the Southern Association of Colleges and Schools (SACS) to award associate in applied science degrees designed for specific Air Force specialties and is the largest multi-campus community college in the world. All enlisted airmen are automatically entered into the CCAF program, details are located at https://www.airuniversity.af.edu/CCAF/.

6.2. Professional Certifications. Certifications assist the professional development of our Airmen by broadening their knowledge and skills. Additionally, specific certifications may be awarding collegiate credit by CCAF and civilian colleges, saving time and Air Force tuition assistance funds. It also helps airmen to be better prepared for transition to civilian life. To learn more about professional certifications and certificationprograms offered by CCAF, visit https://www.airuniversity.af.edu/Barnes/CCAF/Display/Article/803252/credentialing-programs-flight/. In addition to its associate degree program, CCAF offers the following certification programs and resources:

6.2.1. CCAF Instructor Certification (CIC) Program. CCAF offers the three-tiered CIC Program for qualified instructors teaching at CCAF affiliated schools who have demonstrated a high level of professional accomplishment. The CIC is a professional credential that recognizes the instructor's extensive faculty development training, education and qualification required to teach a CCAF course and formally acknowledges the instructor's practical teaching experience.

6.2.2. CCAF Instructional Systems Development (ISD) Certification Program. CCAF offers the ISD Certification Program for qualified curriculum developers and managers who are formally assigned at CCAF affiliated schools to develop and manage CCAF collegiate courses. The ISD Certification is a professional credential that recognizes the curriculum developer's or manager's extensive training, education, qualifications and experience required to develop and manage CCAF courses. The certification also recognizes the individual's ISD qualifications and experience in planning, developing, implementing and managing instructional systems.

6.2.3. Air Education and Training Command (AETC) Instructor. Individuals desiring to become an AETC Instructor must possess at a minimum; an associate degree or should be actively pursuing an associate degree. Instructor Special Duty Assignment (SDA) requires an AETC instructor candidate to have a CCAF degree or be within one year of completion (45 semester hours). A degree faculty is necessary to maintain accreditation through the Southern Association of Colleges and Schools.

6.3. Air Force Credentialing Opportunities On-Line (AF COOL). AF COOL replaced the CCAF Credentialing and Education Research Tool (CERT). The AF COOL Program is managed by CCAF and provides a research tool designed to increase an Airman's awareness of national professional credentialing and funding opportunities available for all Air Force occupational specialties. AF COOL also provides information on specific occupational specialties, civilian occupational equivalencies, AFSC-related national professional credentials, credentialing agencies, and professional organizations. AF COOL contains a variety of information about credentialing and licensing and can be used to:

- Get background information about civilian licensure and certifications in general and specific information on individual credentials including eligibility requirements and resources to prepare for an exam.
- Identify licenses and certifications relevant to an AFSC.
- Learn how to fill gaps between Air Force training and experience and civilian credentialing requirements.
- Get information on funding opportunities to pay for credentialing exams and associated fees.
- Learn about resources available to Airmen that can help them gain civilian job credentials.

To learn more about AF COOL and funding processes, visit https://afvec.us.af.mil/afvec/af-cool/welcome

6.4. Air Force Institute of Technology (AFIT). AFIT is the sole provider of more than 100 professional continuing education courses in acquisition management, logistics management, contracting, systems management, software engineering, and financial management delivered to war fighters around the globe via customer focused delivery modes including resident, on-site, and online courses. More information on course availability can be found at https://www.afit.edu/ls/

6.5. Additional Education Opportunities. For more information on all distance learning and web-based courses refer to the following websites:

6.5.1. Air University: https://www.airuniversity.af.edu/

6.5.2. Defense Acquisition University: https://www.dau.edu/courses

6.5.3. Joint Doctrine, Education & Training Electronic Information System: https://jdeis.js.mil/jdeis/index.jsp

6.5.4. Joint Knowledge Online: https://www.jcs.mil/JKO/

6.6. Continuous Process Improvement (CPI). CPI increases operational capabilities while reducing associated costs by applying proven techniques to all processes associated with fulfilling the Air Force mission. The goal of the Air Force CPI is to eliminate waste while maximizing customer value. Education, training and certification opportunities include Practical Problem-Solving Method, Green Belt, Black Belt, and Master Belt Training. More information can be found in DAFI 38-401, *Continuous Process Improvement.*

6.7. Off-duty Education. Additional off-duty education is encouraged for all members of the

Aircraft Armament Systems career field.

6.7.1. Airmen are highly encouraged to pursue a four-year degree through Air University Associate to Baccalaureate Cooperative Program (AU-ABC). AU-ABC is an initiative between the Air Force and civilian higher education institutions to offer baccalaureate degree opportunities to every Air Force enlisted member. The program directs Airmen with associate in applied science degrees to a collection of accredited "military-friendly" colleges and universities to consider when completing a four-year degree. The AF Virtual Education Center (AFVEC) serves as the gateway to AU-ABC degree program and associated student services such as online enrollment, tuition assistance processing, support services, and access to distance learning instructions.

7. Career Field Path.

7.1. Location / Skill level Table. The table below provides a list of possible assignments. The 3 level column lists AFSC shred outs applicable to each location and all categorizations are subject to change without notice. Active-duty members interested in assignments should consult listings for more detailed information. https://myvector.us.af.mil/myvector/TalentMarketplace/Home

CMSgt 	Chief Enlisted Manager (CEM)	- Chief Leadership Course - Contingency Wartime Planners Course - - Acquisition Professional Development Program	- Wing Weapons Manager (Nuclear/Conventional) - MUNSS Senior Enlisted Leader - Tech Training Superintendent - Inspector (IG/AFIA) (Nuclear/Conventional) - KLP/KDPs**
Note 1. This should be used as a guide to expand knowledge and increase functional skills. Note 2. This should be used as a guide to provide supervisors and members an idea of what positions they should be striving for to gain experience as they progress through the grade and skill levels. *This ladder is reflective of functional roles outlined in AFMAN 21-206 and technical training directives ** Reference 2W1 EDT Policy (https://usaf.dps.mil/sites/12231/2W1%20EDT%20Policy/SitePages/Home.aspx)			

8. MyVector. All personnel are encouraged to setup a MyVector profile through the Air Force Portal, (https://myvector.us.af.mil/myvector/Home). The Mentoring network allows mentees to manage their career development with the input and guidance from a mentor. Mentees will be able to, in real-time, invite

participants to serve as mentors, select mentors based on preferences, chat with their mentor online, and complete a mentoring plan. Career Planning allows the user to view their duty experience through career field specific experience codes. This structure also allows the user to build career plans based on real opportunities and to share these career plans with development teams and mentors. A bullet-tracker option allows the user to track specific events and accomplishments throughout the year for performance reports. Knowledge Sharing provides discussion forums and links to resources for online books and courses that discuss mentoring benefits, the differences between coaching and mentoring and techniques for managing mentoring relationships.

8.1. Enlisted Development Teams. The 2W1 Enlisted Development Team (EDT) IAW DAFI 36-2670, *Total Force Development*, is a development process whose goal is to develop criteria that supports career development, meet mission requirements and to provide selection of 2W1 personnel to fulfill key armament developmental positions at desired leadership levels. The main objective is to deliberately develop specific criteria for key positions that are carefully tailored towards experiences and challenges combined with education and training. The purpose is to provide the necessary authorization, tools and formal guidance to 2W1XX armament personnel, define and integrate the processes required to develop Aircraft Armament Specialists to meet current and future AF requirements, develop clear career path objectives, and develop and continue to refine educational, training and experience opportunities. 2W1XX EDT guidance can be found at https://usaf.dps.mil/sites/12231/2W1%20EDT%20Policy/SitePages/Home.aspx

Section C - Skill Level Proficiency Requirements

1. Purpose. Skill level training requirements in this specialty are defined in terms of competencies and knowledge requirements. This section outlines the specialty qualification requirements for each skill level in broad, general terms and establishes the mandatory requirements for entry, award, and retention of each skill level. The specific competency and knowledge training requirements are identified in the Specialty Training Standard of this CFETP.

2. Specialty Qualification Requirements.

2.1. Knowledge, Education, Training, and Experience. Refer to Department of the Air Force Enlisted Classification Directory (DAFECD), accessible via myFSS at https://myfss.us.af.mil/USAFCommunity/s/knowledge-detail?pid=kA0t0000000wlDpCAI

2.2. Helper, Apprentice, Journeyman, Craftsman and Superintendent. Refer to "AFSC 2W1 Aircraft Armament Systems, Craftsman/AFSC 2W171, Journeyman/AFSC 2W151, Apprentice/AFSC 2W131, Helper/AFSC 2W111," in DAFECD, for specialty qualification information for 1-, 3-, 5-, and 7-skill level personnel.

Note: Award of the 3-skill level without a completed NACLC is authorized provided an interim Secret security clearance has been granted according to DAFMAN 16-1405.

Section D - Resource Constraints

1. This section is reserved and identifies known resource constraints, which preclude optimal/desired training from being developed or conducted, including information such as cost and manpower. Narrative explanations of each resource constraint and an impact statement describing what effect each constraint has on training are included. Also included in this section are actions required, OPR, and target completion

dates. Resource constraints will be, at a minimum, reviewed and updated annually. No resource constraints identified at this time.

Section E - Transitional Training Guide

Note: There are currently no transition training requirements. This area is reserved.

Part II

Section A – Specialty Training Standard (STS)

1. Implementation. The (Attachment 2) STS will be used for technical training provided by Air Education and Training Command (AETC) for classes beginning in February CY26.

2. Purpose. As prescribed in DAFMAN 36-2689, this STS:

2.1. Column 1. (Outcomes, Required Behaviors, Knowledge, and Technical References (TR)) the most common outcome, knowledge, and technical references necessary for Airmen to perform duties in the 3, 5, and 7 skill levels. The number in parenthesis following the competency description correlates to the required behavior listed in the competency heading.

2.2. Column 2. (Deployment @/SEI +/CBRN ~) Outcomes identified with an (@) are deployment UTC task requirements. Armament technicians will be qualified in all these outcomes (as applicable per airframe and Airman's section of assignment) prior to deployment. Outcomes identified with a (+) are required prior to award of the aircraft or system SEI. Outcomes identified with an (~) require annual CBRN (Training Task Qualification) training in the work center IAW DAFI 10-2503, para 6.5.1.1.

2.2.1. Core tasks/outcomes which aren't applicable to base-assigned aircraft or equipment aren't required for upgrade (units are not required to send personnel TDY for core task/outcome training).

2.3. Column 3. (*Certification for OJT*) used to record completion of task and knowledge training requirements. Use automated training management systems to document technician qualifications, if available. Task certification must show a training completion date and initials of the trainee, trainer and certifier. All non-core tasks require training completion date and initials of the trainee and trainer only.

2.4. Columns 4. (*Course Behavioral Codes*) show formal training and correspondence course requirements. This column shows proficiency to be demonstrated on the job by the graduate because of training on the task and knowledge provided by the initial skills and craftsman courses and the career knowledge provided by the correspondence course.

2.4.1. All tasks in the 3-level course column are considered wartime tasks. In response to a wartime scenario, these tasks will be taught in the 3-level course in a streamlined training environment.

2.5. Qualitative Requirements. Attachment 1 contains the Behavioral Statement STS Coding

System used to indicate the level of training and knowledge provided by in-resident training.

2.6. Job Qualification Standard (JQS). Becomes a JQS for OJT when placed in MyTraining or equivalent and used in accordance with DAFMAN 36-2689. For OJT, the tasks in column A are trained and qualified to the go/no go level. "Go" means the individual can perform the task without assistance and meets local requirements for accuracy, timeliness, and correct procedures. When used as a JQS, the following requirements apply:

2.6.1. Documentation. Document and certify completion of training IAW DAFMAN 36-2689. Use of Part II and attachments two and three in conjunction with this CFETP are mandatory in individual training records. Identify duty position requirements by entering in to automated training management systems. As a minimum, complete the following columns in Part II of the CFETP: date training started, date training completed, trainee initials, and trainer initials. It is the work center supervisor's responsibility to identify work center requirements and build a Master Training List (MTL) to train assigned trainees to the requirements. Individual JQS' should be tailored to the trainees' skill-level and duty position.

2.6.2. Transcribing from Old CFETP to New CFETP. All AFJQSs and previous CFETPs are replaced by this CFETP; therefore, transcribing of all training records to this CFETP STS is mandatory. Use this CFETP STS (or automated STS) to identify and certify all past and current qualifications. Document and certify all previous and current training IAW DAFMAN 36-2689 and AFI 36-2650.

2.7. STS. These STSs are used as guides for the development of promotion tests used in the WAPS. Specialty Knowledge Tests (SKTs) are developed at the AETC A2/9 SAS-OA (Airman Advancement Division) by Senior NCOs with extensive practical experience in the career field. The tests sample knowledge of STS subject matter areas judged by test development team members to be most appropriate for promotion to higher grades. Questions are based on study references listed in the Enlisted Promotions References and Requirements Catalog (EPRRC). Individual responsibilities are in AFI 36-2502, *Airman Promotion/Demotion Programs*. WAPS isn't applicable to ANG or AFRC.

3. Recommendations. Report inadequacies and suggested corrections to this STS through channels to the AETC 2W1X1 Training Manager at 363d TRS/TRR, DSN: 736-1828 or DSN: 736-8777 referencing specific STS paragraphs. Supervisors and trainees will use the Customer Service Line (DSN: 736-4147) or email 82TRG.CSIL@us.af.mil to report training deficiencies identified during initial evaluation.

Section B – Course Objective List

4. Course Objectives: A detailed listing of formal training objectives via the Technical Training Annex may be obtained by submitting a request to the AETC 2W1X1 Training Manager, 363d TRS/TRR, 520 Missile Road, Stop 244, Sheppard AFB TX 76311-2261, DSN: 736-1828 or DSN: 736-8777.

Section C - Support Material

Note: There are currently no support materials. This area is reserved.

Section D - Training Course Index

5. Purpose. This section of the CFETP identifies training courses available for the Aircraft Armament

Systems specialty.

6. Air Force In-Residence Courses.

6.1. Technical Training. Course summary information can be found on the Education and Training Course Announcements (ETCA) website: https://usaf.dps.mil/teams/app10-etca/SitePages/home.aspx?isdlg=1&IsDlg=1

Table 10.1COURSE NUMBER	TITLE	LOCATION
J3ATR2W131 048C	Aircraft Armament Systems Apprentice Fundamentals	Sheppard

MQ-9	J4AMP2W1X1 A51A	MQ-9 Weapons Systems
	J4AMP2W1X1 A48B	Armament System (20mm) Intermediate Maintenance (I/M)
	J4AMP2W1X1 B48A	Armament System (20mm LALS) Intermediate Maintenance (I/M)
	J4AMP2W1X1 C48A	Armament System (BRU-61) Intermediate Maintenance (I/M)
	J4AMP30000 A48A	Advanced Wire Maintenance
	J4AMP30000 C48A	Basic Soldering Techniques
	3J5ACC2W0X1 000	ACC Weapons Safety Program Management Course
	L3AZR2W071 0C2A	Weapons Safety Management Course
	J4AMP2W1X1 C48A	Armament System (BRU-61) Intermediate Maintenance
	J4AMP2W1X1 S17A	Armament System (M299) Intermediate Maintenance

7. Exportable Courses. Additional multimedia training products covering a wide range of topics can be found on MyLearning under the Griffin Catalog: https://lms-jets.cce.af.mil/moodle/

Section E - MAJCOM Unique Requirements

8. Per AFI 36-2650, a MAJCOM mandatory course list (MMCL) based on each mission design series (MDS) aircraft is available from the following websites:

Air Combat Command (ACC)	https://usaf.dps.mil/sites/ACC-A4/A4P/APMT/Current%20MCL/Forms/AllItems.aspx
Air Force Global Strike Command (AFGSC)	AFGSC Maintenance Training - AFGSC Mandatory Course Listing (MCL) - All Documents (dps.mil)
Air Force Special Operations Command (AFSOC)	No SharePoint, AFSOC Training Managers manage courses.
Pacific Air Forces (PACAF)	https://usaf.dps.mil/sites/pacafa4/a4mm/SitePages/Maintenance-Training.aspx
United States Air Forces in Europe – Air Forces Africa (USAFE-AFAFRICA)	https://usaf.dps.mil/sites/ua-a4/a4m2/Training/TrainingDocs/Forms/MAJCOMMMCL.aspx
Note: Air Education and Training Command (AETC) and Air Force Mobility Command (AFMC) units comply with lead command Mission Design Series (MDS), MMCL for each assigned aircraft.	

BY ORDER OF THE SECRETARY OF THE AIR FORCE OFFICIAL

OFFICIAL

KENYON K. BELL, Lt Gen, USAF
DCS/Logistics, Engineering and Force Protection

QAULITATIVE REQUIREMENTS

Behavioral Statement STS Coding System	
Code	**Definition**
K	Subject Knowledge Training – The verb selection identifies the individual's ability to identify facts, state principles, analyze, or evaluate the subject.
P	Performance Training – Identifies that the individual has performed the task to the satisfaction of the course; however, the individual may not be capable of meeting the field requirements for speed and accuracy.
pk	Performance Knowledge Training – The verb selection identifies the individual's ability to relate simple facts, procedures, operating principles, and operational theory for the task.
-	This mark is used alone instead of a scale value to show no proficiency training is provided in the course or CDC.
X	This mark is used alone in the course columns to show that training is required but not given due to limitations in resources.

Explanations

The asterisk symbol * is used in column 4A to indicate the task/competencies earned in technical training. Reference technical training Annex at https://usaf.dps.mil/sites/12231/SitePages/Training-Annex.aspx?csf=1&web=1&e=21HaEL

***NOTES*:**

- Behavioral Code Breakdowns are listed in Column 2. Individual codes for each task/outcome are listed immediately following task narrative.

- All learning outcome items shown with a behavioral code are trained during war time.

- Column 2 lists Core tasks, when this includes the numbers 5 or 7, this task/outcome is a requirement for 5-skill level or 7-skill level upgrades, respectively.

1. Tasks, Knowledge And Technical References	2. Tasks			3. Certification for OJT					4. Proficiency Codes Used to Indicate Training/Information (See Explanations)

1. ARMAMENT OPERATIONS												
1.1. Maintenance Description: The technical expertise to create, interpret and explain technical data to maintain weapons systems, equipment and serviceability of aircraft to ensure continued reliability for operational readiness. **Supporting Competencies:**												
1.1.1. Maintenance (Basic) **Required Behaviors:** 1) Assist with weapon system maintenance, operational and functional checks to maintain aircraft and equipment serviceability 2) Utilize equipment and tech data required to complete maintenance tasks 3) Gain fundamental knowledge of assigned weapons systems, components, and operations **Criteria:** *Impact on… specific workplace tasks*												
1.1.1.1. Aid team with test sets, support equipment	2	5							*	-	-	-
1.1.1.2. Inspect equipment serviceability for assigned tasks	2	5							*	K	-	-
1.1.1.3. Verify status of technical data currency	2								*	-	-	-
1.1.1.4. Assess work environment for safety hazards, environmental conditions (aircraft/work center)	1								*	K	-	-
1.1.1.5. Communicate operational/functional check results	1	5							*	P	-	-
1.1.1.6. Identify and use required tools, structural hardware, and equipment for assigned tasks	1								*	-	-	-
1.1.1.7. Maintain equipment and tool accountability	1								*	K	-	-
1.1.1.8. Explain the different types of scheduled and organizational inspections that are performed on/off equipment	2								*	K	-	-
1.1.1.9. Comprehend basic electrical principles related to weapons systems, equipment, and test sets (ac/dc voltage, current, resistors, relays, solenoids)	3								*	K	-	-
1.1.1.10. Comprehend basic mechanical principles associated with weapons release functions on weapons systems and equipment	3								*	K	-	-
1.1.1.11. Perform basic electrical repairs (connector swaps, wire repair, use of multimeters)	2								*	P	-	-
1.1.2. Maintenance (Intermediate) **Required Behaviors:** 1) Lead and execute maintenance and repair procedures for on and off equipment 2) Applies acquired knowledge, utilizes theory of operation, and problem solving techniques to resolve maintenance discrepancies **Criteria:** *Impact on… Specific workplace projects*												
1.1.2.1. Comprehend technical data for associated tasks	1								*	K	-	-
1.1.2.2. Analyze aircraft and equipment forms to determine status	2	5							*	K	-	-
1.1.2.3. Control MMHE and equipment inventory (e.g. R14, R-25, Maintenance Safety and Protection Equipment, and -21)	1	7							*	-	-	-
1.1.2.4. Validating equipment and tool accountability	1								*	-	-	-

1.1.2.5. Initiate Engineering Tech Asst Request, Action Request and/or Customer Relationship Management	2								*	-	pk	-
1.1.2.6. Apply theory of operation of assigned weapons systems, gun systems, and suspension equipment for sustainment	2								*	K	-	-
1.1.2.7. Prioritize Armament production operations	1								*	-	-	-
1.1.2.8. Identify the need for deficiency reports and/or report of survey	1								*	-	-	-
1.1.2.9. Interpret PMEL/TMDE calibrations according to technical data	2	5							*	-	-	-
1.1.2.10. Diagnose aircraft and equipment discrepancies	1								*	-	-	-
1.1.2.11. Repair aircraft on and off equipment using outside support services (e.g., AFETS/ETARS/CRM Instructions)	1								*	pk	-	-
1.1.2.12. Convey estimated time in completion standards	1	7							*	-	pk	-
1.1.2.13. Interpret generation flow plan (e.g. 2408, 2409)	1	7							*	-	pk	-
1.1.3. Maintenance (Advanced) **Required Behaviors:** 1) Develop and implement maintenance schedule and review accomplished tasks 2) Serve as a subject-matter-expert to provide technical expertise and evaluate the performance of maintenance tasks 3) Collaborate with external agencies to resolve complex troubleshooting and repair tasks **Criteria:** *Impact on… Management decisions*												
1.1.3.1. Advise Weapons Section Chief on maintenance concerns	1								*	-	-	-
1.1.3.2. Interpret Quality Assurance reports, metrics, maintenance training, certification, and maintenance personnel issues.	2								*	-	-	-
1.1.3.3. Validate maintenance tasks for completion	2								*	-	-	-
1.1.3.4. Coordinate with PS&D for MDS scheduled inspections	1								*	-	-	-
1.1.3.5. Develop implementation plan from maintenance scheduling, production and Armament TCTO meetings	1								*	-	-	-
1.1.3.6. Advise fault isolation, troubleshooting procedures	2								*	-	-	-
1.1.3.7. Collaborate with AFETS or contractors on complex maintenance actions	3								*	-	-	-
1.1.3.8. Initiate In-process Inspections listing	2								*	-	-	-
1.1.3.9. Train personnel on weapons components Theory of Operation	2								*	-	-	-
1.1.3.10. Establish estimated time in completion standards	1								*	-	-	-
1.1.3.11. Review MDS JSTs as required	1								*	-	-	-
1.1.4. Maintenance (Expert) **Required Behaviors:** 1) Analyze maintenance data trends and collaborate across the enterprise to develop and implement maintenance best practices 2) Validates and develops policies and procedures pertaining to maintenance operations to meet vision requirements **Criteria:** *Impact on…SQ/GRP Level*												
1.1.4.1. Initiate changes to special certification roster	1								*	-	-	-
1.1.4.2. Provide inputs to quarterly, monthly, and weekly flying schedule	1								*	-	-	-
1.1.4.3. Apply FHP and health of fleet metrics to Armament processes	2								*	-	-	-
1.1.4.4. Interpret MSEP and LSEP	2								*	-	-	-
1.2. LOADING Description: Proficiently load and unload conventional and nuclear munitions on aircraft to provide overwatch, national security, and lethal combat capabilities to ensure air superiority and nuclear deterrence. **Supporting Competencies:**												
1.2.1. Loading (Basic) **Required Behaviors:** 1) Identify unsafe conditions, initiate, assist or perform emergency procedures to prevent injury, loss of life, and damage of equipment												

2) Adhere to technical data in order to load and unload munitions safely, reliably, and proficiently 3) Utilize loading equipment in support of munitions operations **Criteria:** *Depth of Knowledge: Established practice with some workplace elements*												
1.2.1.1. Implement emergency procedures listed in applicable loading technical data	1	5F	@ / ~						*	-	-	-
1.2.1.2. Identify hazards impacting explosive loading operation	1	5F	@ / ~						*	K	-	-
1.2.1.3. Utilize applicable/current technical data to perform operations	2	5F	@ / ~						*	-	-	-
1.2.1.4. Identify issues impacting weapons systems/equipment reliability	2	5F	@ / ~						*	K	-	-
1.2.1.5. Identify equipment, trailers, and munitions characteristics, tie down procedures, etc. required to perform operations	3	5F	@ / ~						*	K	-	-
1.2.1.6. Maintain accountability of assets utilized to perform tasks	3	5F	@ / ~						*	-	-	-
1.2.1.7. Operate associated munitions lifting support equipment, MMHE, equipment, to perform weapons loading processes for fighter aircraft (OSLA, ADU-537 A/E, bomb rollers, MOLT, 6.5 inch adapter, etc.)	3	5F	@ / ~						*	K	-	-
1.2.1.8. Operate associated munitions lifting support equipment, MMHE, equipment, to perform weapons loading processes for bomber aircraft (forks, lift arms, inverted forks, ADU-468, MHU-159, MHU-97, universal lift bar, etc.)	3	5F	@ / ~						*	K	-	-
1.2.2. Loading (Intermediate) **Required Behaviors:** 1) Prioritize and direct nuclear and conventional explosive loading operations to achieve mission objectives 2) Review and enforce policies supporting combat aircraft generation, test, and training sorties within established requirements **Criteria:** *Depth of Knowledge: Established practices of all workplace elements*												
1.2.2.1. Identify factors affecting explosive loading operations (personnel, environmental, safety etc.)	1	7F							*	K	-	-
1.2.2.2. Coordinate with agencies to align workflow to complete mission objectives (e.g. ICT, DLO, CSO)	1	7F							*	-	-	-
1.2.2.3. Assign personnel to tasks to complete mission objectives	1	7F							*	-	-	-
1.2.2.4. Utilize applicable guidance to complete mission objectives	2	7F							*	-	-	-
1.2.2.5. Explain aircraft generation requirements across multiple mission sets	2	7F							*	-	-	-
1.2.2.6. Enforce policies that support missions	2	7F							*	-	-	-
1.2.2.7. Identify requirements and principles for CSOs, ICTs, and DLOs	2	7F							*	K	-	-
1.2.2.8. Explain LCS certifications and qualifications for crew members	2	7F							*	-	-	-
1.2.3. Loading (Advanced) **Required Behaviors:** 1) Implements policy and creates processes that impact loading operations 2) Performs trend analysis to create corrective action plan for safe and reliable loading 3) Monitor and address impacts to load crew readiness to meet mission requirements 4) Creates and/or reviews UCML and/or TTML to meet mission requirements **Criteria:** *Depth of Knowledge: New practices of all workplace elements*												
1.2.3.1. Develop local procedural guidance (e.g., Wing Supplements/Policy Letters outlining munitions loading operations)	1								*	-	-	-
1.2.3.2. Monitor weapons loading operations to support current DOC statements or equivalent and test and training requirements	3								*	-	-	-

1.2.3.3. Review DOC statements or equivalent, UTCs, WMP data, and initiate changes as required	1								*	-	-	-
1.2.3.4. Implement TTPs for specialized equipment	1								*	-	-	-
1.2.3.5. Update local policies affecting weapons loading operations	2								*	-	-	-
1.2.3.6. Review weapons loading Technical Order changes	2								*	-	-	-
1.2.3.7. Reviews Weapons Flash for loading safety trends	2								*	-	-	-
1.2.3.8. Analyze LSEP data to identify negative trends and take action as required	2								*	-	-	-
1.2.3.9. Monitor weapons loading during local exercises	3								*	-	-	-
1.2.3.10. Review local manning docs/WLCMT to ensure minimum load crew numbers are met	3								*	-	-	-
1.2.3.11. Coordinates Wing agencies to ensure primary, limited, and support munitions are identified to support DOC statements or equivalent, WCDO and training syllabus requirements	4								*	-	-	-
1.2.3.12. Familiarize UCML/TTML processes	4								*	-	-	-
1.2.4. Loading (Expert) **Required Behaviors:** 1) Communicate and coordinate with HAF, MAJCOMs, and outside agencies for issues pertaining to loading policies and procedures 2) Validates and develops policies and procedures pertaining to aircraft loading operations to meet mission requirements **Criteria:** *Depth of Knowledge: New practices/concepts and theories of all workplace elements; is a credible resource in this area*												
1.2.4.1. Establish MAJCOM guidance pertaining to weapons loading policies	1								*	-	-	-
1.2.4.2. Advises CFM/MFMs pertaining to loading operations	1								*	-	-	-
1.2.4.3. Validate loading technical data and equipment are safe and reliable	2								*	-	-	-
1.2.4.4. Provides subject matter expertise to industry/supporting agencies/program offices regarding future and current weapons loading procedures and support equipment	2								*	-	-	-
1.2.4.5. Interprets plans and UTCs to develop policies and procedures pertaining to weapons loading operations	2								*	-	-	-
1.2.4.6. Analyze test plans and training syllabus, to develop policies and procedures pertaining to weapons loading operations	2								*	-	-	-
2. QUALITY CONTROL												
2.1. Logistics Description: Support the identification of planning for, resourcing of, and implementation of maintenance concepts and requirements to ensure the best possible equipment capability is available when the Warfighter needs it at the lowest Total Ownership Cost (TOC). **Supporting Competencies:**												
2.1.1. Logistics (Basic) **Required Behaviors:** 1) Requisition and perform disposition of assets to complete specific workplace tasks 2) Perform tracking procedures for assets in the supply system **Criteria:** *Impact on... specific workplace tasks*												
2.1.1.1. Utilize applicable IPBs to identify required assets to complete tasks	1								*	pk	-	-
2.1.1.2. Perform supply issue/receipt procedures (e.g., AF Form 2005, ALIS, IMIS) to requisition/turn in assets	1	5							*	K	-	-
2.1.1.3. Understand supply discipline	1								*	K	-	-
2.1.1.4. Inventory on hand quantities of operating stock	2								*	-	-	-
2.1.1.5. Identify asset availability limiting factors	2								*	K	-	-
2.1.1.6. Comprehend deficiency reporting systems	2								*	K	-	-

2.1.2. Logistics (Intermediate) **Required Behaviors:** 1) Track requisitions and dispositions of total unit equipment & assets 2) Determine level of Prioritize asset acquisition requisition for timely allocation of resources 3) Forecast asset requirements and availability budget and resources for projected mission taskings and through funding requests 4) Monitor stock levels to sustain adequate supply for operations **Criteria:** *Impact on… Specific workplace projects*												
2.1.2.1. Monitor assigned equipment asset location, status, and quantities	1								*	-	-	-
2.1.2.2. Resolve limiting factors impacting equipment and asset availability	1								*	-	-	-
2.1.2.3. Update asset tracking documentation to reflect current status	1								*	-	-	-
2.1.2.4. Interpret supply guidance to determine priority level for on/off-equipment asset requisitions	2								*	-	-	-
2.1.2.5. Coordinate needs to initiate CANN actions	2								*	-	-	-
2.1.2.6. Review UTCs and required allowances to determine asset requirements	3								*	-	-	-
2.1.2.7. Measure on-hand inventories against mission requirements to determine stock levels (e.g., Bench stock, RSP, WRM, CHPMSK)	4								*	-	-	-
2.1.2.8. Order assets, equipment, and munitions consumables based on mission requirements	4								*	K	-	-
2.1.2.9. Perform Due in For Maintenance procedures and Expendability, Recoverability Repair Codes	1	5							*	K	-	-
2.1.2.10. Initiate deficiency reports, special reporting, and monitor status and or report of survey	1								*	-	-	-
2.1.2.11. Review supply reports (e.g., D04, D14, D25)	1	7							*	-	-	-
2.1.2.12. Explain munitions forecasting process	3								*	K	-	-
2.1.3. Logistics (Advanced) **Required Behaviors:** 1) Identify & resolve limiting factors pertaining to aircraft and weapons employment to support operational planning 2) Interpret logistical data to provide inputs for allocation and movement of resources **Criteria:** *Impact on… Management decisions*												
2.1.3.1. Review mission tasking and identify asset availability	1								*	-	-	-
2.1.3.2. Coordinate with MAJCOM to determine appropriate levels of authorized assets	1								*	-	-	-
2.1.3.3. Initiate MAJCOM directed Redistribution Order	2								*	-	-	-
2.1.3.4. Update logistical data systems (e.g., BLADE, DPAS, MIS, DLA)	2								*	-	-	-
2.1.4. Logistics (Expert) **Required Behaviors:** 1) Facilitate the acquisition and sustainment of facilities, equipment and personnel 2) Establish and execute assignment of resources to accomplish mission requirements **Criteria:** *Impact on…SQ/GRP Level*												
2.1.4.1. Coordinate limiting factors to develop corrective actions (ALC, MAJCOMs, Program Office, etc.)	1								*	-	-	-
2.1.4.2. Determine resource requirements based on emerging mission needs (e.g., ACFT bed-down)	1								*	-	-	-
2.1.4.3. Review readiness reporting data to identify limiting factors	1								*	-	-	-
2.1.4.4. Direct Redistribution Order	2								*	-	-	-
2.1.4.5. Develop UTC logistics details and manpower requirements	2								*	-	-	-

2.2. INSPECTION Description: Careful examination of personnel, training, equipment, documentation, as well as maintenance and loading tasks to meet established standards. **Supporting Competencies:**												
2.2.1. Inspection (Basic) **Required Behaviors:** 1) Sustains weapons systems and equipment through published inspection criteria and perform preventive actions **Criteria:** *Depth of Knowledge: Established practice with some workplace elements*												
2.2.1.1. Follow applicable technical data for specified equipment inspections	1								*	K	-	-
2.2.1.2. Determine status of equipment based on inspection criteria or supporting documentation for specified equipment (e.g., 122 snapshot, TCMAX tool rip)	1								*	K	-	-
2.2.1.3. Validate serviceability of equipment through visual and pre-use inspections (e.g. MJ-1, MHU-83, Ram Assembly, MHU-114/E, MHU-194/F, Munitions Trailers, Utility Trailers, MHU-196/204, Split Deck Platform, TR-1 Floodlight Set, FL-1D Floodlight Set, NF-2 Floodlight set -60 Generator, C-10 Air Conditioner, -86 Generator Set, -95 Gas Turbine Compressor, Essex Cart, MA-3 Air Conditioning Unit, Hydraulic Test Stand, MXU-690/E Cooling Unit, Air Flow Cooling Monitor, PD-501 Air Conditioner, Trailer Mounted Air Conditioner, MC-2A Air Compressor, SGNC, PAO Cooling System, Hydraulic Test Stand (Mule), Multi Aircraft Canopy (MAC) Crane, Portable Floor Crane, Component Handling Jack, Portable Rotary Compressor, Portable Hydraulic Power Supply Cart, CGCAC, Boresight Equipment, H-1 Heater, 10K Air Conditioner, etc.)	1								*	K	-	-
2.2.2. Inspection (Intermediate) **Required Behaviors:** 1) Verifies work and documentation performed by peers and subordinates involving munitions loading and weapons systems maintenance to meet established standards **Criteria:** *Depth of Knowledge: Established practices of all workplace elements*												
2.2.2.1. Evaluate training expertise from subject matter experts (SMEs)	1								*	-	pk	-
2.2.2.2. Utilize inspection systems (TCMAX/MIS/Aircraft and Equipment Documentation) to determine status of aircraft and equipment	1								*	-	-	-
2.2.2.3. Apply inspection criteria to verify equipment status	1								*	-	-	-
2.2.2.4. Provide guidance to correct discrepancies and enforce standards	1								*	-	-	-
2.2.2.5. Execute self inspection programs (SIPs)	1								*	-	pk	-
2.2.3. Inspection (Advanced) **Required Behaviors:** 1) Analyze and improve workplace programs and procedures to enhance standards 2) Integrate with other agencies to develop improvements 3) Develops specialized inspections resulting from negative trends and safety issues **Criteria:** *Depth of Knowledge: New practices of all workplace elements*												
2.2.3.1. Develop self inspection programs (SIPs)	1								*	-	-	-
2.2.3.2. Conduct periodic reviews of assigned programs	1								*	-	-	-

2.2.3.3. Attend Training Analysis Brief (TAB) and shared resources meeting to identify issues affecting weapons maintenance and load training	1								*	-	-	-
2.2.3.4. Conduct interagency meetings to plan and develop processes to improve weapons maintenance and loading (i.e., AFETS, IG, Weapons Safety, Fire Department)	2								*	-	-	-
2.2.3.5. Develop In-Process Inspections (IPIs), One-time Inspections (OTIs), and Key Task Listings (KTLs) requirements	3								*	-	-	-
2.2.3.6. Manage TCTO completion	3								*	-	-	-
2.2.3.7. Analyze trends to recommend specialized inspections (e.g., supervisory postloads)	3								*	-	-	-
2.2.4. Inspection (Expert) **Required Behaviors:** 1) Analyze applicable data to determine the need to change Tactics, Techniques, and Procedures (TTPs) based on mission requirements 2) Provide validation during development of inspection criteria for new systems, programs or equipment to aircraft loading operations to meet mission requirements **Criteria:** *Depth of Knowledge: New practices/concepts and theories of all workplace elements; is a credible resource in this area*												
2.2.4.1. Interpret logistics-wide data to enhance armament processes (e.g., HOF, MSEP, LSEP, and WIT)	1								*	-	-	-
2.2.4.2. Audit AFIS reports (e.g., MICT, IGEMS, CCIPs, WWM Annual Assessments) to enhance armament functional processes	1								*	-	-	-
2.2.4.3. Establish standards for new programs and equipment	2								*	-	-	-
2.3. TEST & ACQUISITIONS Description: Supports development and execution of T&E processes, standards, methods, and techniques. **Supporting Competencies:**												
2.3.1. Test & Acquisitions (Basic) **Required Behaviors:** 1) Perform tactical operations through the phases of asset development 2) Utilizes technical data to perform tests and recommends improvement **Criteria:** *Impact on... specific workplace tasks*												
2.3.1.1. Assist with validation and verification of technical orders	2								*	-	-	-
2.3.1.2. Assist with validation and verification of support equipment	1								*	-	-	-
2.3.1.3. Perform loading, maintenance and test set operations in support of test plan	1								*	-	-	-
2.3.1.4. Verify status of contractor source data	2								*	-	-	-
2.3.1.5. Identify area of improvements or deficiencies in contractor source data, local procedures, and preliminary technical orders.	2								*	-	-	-
2.3.1.6. Practice COMSEC/OPSEC (e.g. proprietary contractor information)	1								*	K	-	-
2.3.1.7. Identify test asset types/variants	1								*	-	-	-
2.3.2. Test & Acquisitions (Intermediate) **Required Behaviors:** 1) Collaborating with test engineers rectify the requested improvements and design 2) Proposing capabilities and resources through the implementation of tests methodologies **Criteria:** *Impact on… Specific workplace projects*												
2.3.2.1. Identify area of improvements or deficiencies in test operations	1								*	-	-	-

2.3.2.2. Review previous test points, processes and procedures to advance current test objectives	2								*	-	-	-
2.3.2.3. Identify differences between DoD and contractor agencies to safeguard proprietary information	1								*	-	-	-
2.3.2.4. Understand phases of Acquisition process	2								*	-	-	-
2.3.2.5. Draft the necessary local loading and maintenance procedures, coordinate waivers to standard procedures	2								*	-	-	-
2.3.2.6. Apply Test/Safety plan directives	1								*	-	-	-
2.3.3. Test & Acquisitions (Advanced) **Required Behaviors:** 1) Participates in Joint Working Groups with Special Programs Offices and other agencies 2) Evaluate weapons systems compatibility to validate asset and system functionality 3) Coordinates with Seek Eagle Office for procedure approval to facilitate asset innovation 4) Applies process improvement techniques to establish local procures for maintenance and loading operations **Criteria:** *Impact on… Management decisions*												
2.3.3.1. Coordinate test point requirements with AFSEO	3								*	-	-	-
2.3.3.2. Coordinate approval of local procedures with the MAJCOM	1								*	-	-	-
2.3.3.3. Approve local loading and maintenance procedures	1								*	-	-	-
2.3.3.4. Provide technical advice to ensure alignment with MIL standard technical data	1								*	-	-	-
2.3.3.5. Validate Test/Safety plan directives	4								*	-	-	-
2.3.3.6. Enforce COMSEC/OPSEC	1								*	-	-	-
2.3.3.7. Resolve deficiencies in test operations to sustain weapons systems integrity	2								*	-	-	-
2.3.3.8. Advise leadership risk reduction or acceptance due to nonstandard test plans	4								*	-	-	-
2.3.3.9. Safeguard contract proprietary information	1								*	-	-	-
2.3.3.10. Generate test report analysis	4								*	-	-	-
2.3.4. Test & Acquisitions (Expert) **Required Behaviors:** 1) Formulates, leads, & executes Operational Test & Evaluation Plans 2) Articulates data analysis to senior decision-makers for enterprise implementation 3) Validates the test and acquisition assets for fielding implementation for Developmental Test and Evaluation 4) Identifies opportunities for equipment and process innovation in order to better execute mission objectives (e.g. MMHE focal point, LME, IT, and commercial solutions) **Criteria:** *Impact on…SQ/GRP Level*												
2.3.4.1. Establish test/safety plan directives	1								*	-	-	-
2.3.4.2. Approve deviations of Standard Operating Procedures	3								*	-	-	-
2.3.4.3. Provide strategic communication of Acquisition Phases	2								*	-	-	-
2.3.4.4. Identify multi-MDS compatible equipment	4								*	-	-	-
2.3.4.5. Advise leadership on needed SAP authorizations/billets	1								*	-	-	-
2.4. DOCUMENTATION Description: Creating, updating, and recording information to provide instruction, reference, and planning to forecast mission requirements. **Supporting Competencies:**												
2.4.1. Documentation (Basic) **Required Behaviors:** 1) Records maintenance and loading action in applicable forms in order to sustain mission capability												

2) Annotates discrepancies in maintenance information systems accurately allowing for thorough tracking and review of actions taken **Criteria:** *Depth of Knowledge: Established practice with some workplace elements*												
2.4.1.1. Utilize publications and guidance to document on/off equipment maintenance/loading tasks (e.g., MIS, 00-20 Series, 21-Series, WUC Manuals)	1	5							*	K	-	-
2.4.1.2. Utilize guidance to document equipment condition tags	1	5							*	K	-	-
2.4.1.3. Translate discrepancy conditions for aircraft and equipment status (red x, /, -)	2	5							*	K	-	-
2.4.1.4. Create/Sign Off Jobs in the MIS or equivalent	2	5							*	K	-	-
2.4.1.5. Navigate through TCMAX or MIS to identify status of tools and equipment	2								*	K	-	-
2.4.1.6. Explain TO improvement program to sustain and enhance mission capability	1								*	K	-	-
2.4.2. Documentation (Intermediate) **Required Behaviors:** 1) Recognizes and corrects deficient documentation and implements process improvement actions 2) Reviews section's completed documentation for accuracy and completion **Criteria:** *Depth of Knowledge: Established practices of all workplace elements*												
2.4.2.1. Correct documentation issues (e.g., MIS, 00-20 Series, 21-Series, WUC Manuals, supplements)	1								*	-	-	-
2.4.2.2. Utilize documentation history to identify negative trends and initiate process improvement actions	1	7							*	-	-	-
2.4.2.3. Complete documentation for data integrity (e.g., screen 100, 781 Series, DIT, FRACAS, 2434, 2430, TICMS)	2	7							*	K	-	-
2.4.2.4. Correct tool inventory discrepancies (MIL, TCMAX or Equivalent)	1								*	-	-	-
2.4.2.5. Comprehend the importance of TO improvement program	1								*	K	-	-
2.4.2.6. Process a recommend improvement (TO, self-assessment program, TODR, AF 847, etc.)	1								*	-	-	-
2.4.2.7. Process AFTO 95, or MIS historical documentation equivalent, to document on/off equipment significant histories	1	7							*	-	-	-
2.4.2.8. Audit documentation for data integrity (e.g., screen 100, 781 Series, DIT, FRACAS, 2434, 2430, AFTO 375s, AFTO 95s, TICMS)	2	7							*	-	-	-
2.4.3. Documentation (Advanced) **Required Behaviors:** 1) Generates, stores and distributes reference material to applicable organizations to ensure compliance **Criteria:** *Depth of Knowledge: New practices of all workplace elements*												
2.4.3.1. Utilize QA/WSS/HHQ evaluations to identify trends (LEAP/WLCMT, SAV)	1								*	-	-	-
2.4.3.2. Develop corrective actions to reverse negative trends	1								*	-	-	-
2.4.3.3. Document trend data for higher-level leadership	1								*	-	-	-
2.4.3.4. Creates workplace policies and products regarding section standards and procedures	1								*	-	-	-
2.4.4. Documentation (Expert) **Required Behaviors:** 1) Establishes and coordinates Air Force publications, policies and procedures 2) Develops and updates standardized forms and maintenance information systems to track, store, and monitor data												

Criteria: *Depth of Knowledge: New practices/concepts and theories of all workplace elements; is a credible resource in this are*												
2.4.4.1. Review engineering/safety data to develop updated guidance (e.g., ETARs, ARs, AFSAS)	1								*	-	-	-
2.4.4.2. Approve loading and maintenance guidance/policy for existing/emerging weapon systems (e.g., AFTOs 679, 847, 27, 82, 870)	1								*	-	-	-
2.4.4.3. Create loading/dispatch documentation (e.g., 2434, 2430, line walks)	2								*	-	-	-
3. RESOURCE MANAGEMENT												
3.1. TRAINING Description: Instilling and increasing knowledge, skills, and abilities to develop performance. **Supporting Competencies:**												
3.1.1. Training (Basic) **Required Behaviors:** 1) Seeks opportunities to improve certification and qualification proficiency through repetition 2) Reviews and updates personnel training records for documentation validity **Criteria:** *Impact on... specific workplace tasks*												
3.1.1.1. Demonstrates knowledge of career field progression	1								*	K	-	-
3.1.1.2. Demonstrates proficiency in interpreting personnel training records	2								*	-	-	-
3.1.1.3. Plans developmental goals and milestones with mentors	1								*	-	-	-
3.1.1.4. Applies feedback for increased proficiency	1								*	-	-	-
3.1.2. Training (Intermediate) **Required Behaviors:** 1) Analyze performance gaps and schedules personnel for required training 2) Establishes and documents work center training to develop skilled technicians 3) Assesses performance and validates personnel proficiency level to support mission requirements (i.e. QA, WS) **Criteria:** *Impact on… Specific workplace projects*												
3.1.2.1. Schedule personnel for courses based on functional requirements and complete and/or nominate an Airman for secondary training opportunities to enhance technical expertise (e.g., FTD, AFETS, MMCL, MTF)	1								*	-	pk	-
3.1.2.2. Assess personnel for upgrade training, sustainment training and for proficiency (e.g., on and off equipment evaluations)	3								*	-	-	-
3.1.2.3. Manage work center requirements from Master Training Plan	2								*	-	-	-
3.1.2.4. Recommend personnel for skill-level upgrades	3								*	-	-	-
3.1.2.5. Identifies crew members who are prepared to complete next FTD or maintenance course (e.g. crew has executed multiple suspension equipment installs and removals, identifying an Airman with approximately four months experience is ready for flightline-related FTD)	1								*	-	-	-
3.1.3. Training (Advanced) **Required Behaviors:** 1) Develops and coordinates POIs for mission requirements 2) Monitor and sustain training readiness for mission requirements **Criteria:**												

Impact on… Management decisions												
3.1.3.1. Establish munitions requirements for weapons load training	2								*	-	-	-
3.1.3.2. Develop training schedule to meet mission requirements (FTD, 898, WLT)	2								*	-	-	-
3.1.3.3. Participate in the Curriculum Advisory Committee (CAC) for MMCL course revisions	1								*	-	-	-
3.1.3.4. Analyze MSEP/LSEP report and implement training corrective actions	2								*	-	-	-
3.1.3.5. Maintain standardized training and evaluation to maximize technical proficiency and ensure mission readiness	2								*	-	-	-
3.1.4. Training (Expert) **Required Behaviors:** 1) Develops and implements career field training strategies to align with mission requirements (STRT, UT&W, CFETP, curriculum development) 2) Identifies career field training requirements and advocates for funding to ensure training resources are available **Criteria:** *Impact on…SQ/GRP Level*												
3.1.4.1. Evaluate CFETP for required changes	1								*	-	-	-
3.1.4.2. Coordinates with CFM/MFM/FAMs to identify standardized CUT tasks and develop CONOPS for ACE/MCA support	1								*	-	-	-
3.1.4.3. Review and update FTD course POIs	2								*	-	-	-
3.1.4.4. Review MAJCOM Mandatory Course Listing (MMCL) for course prerequisites	2								*	-	-	-
3.1.4.5. Develops and reviews course curriculum to ensure relevancy and accuracy	2								*	-	-	-
3.1.4.6. Align training requirements based on evaluation of environmental factors and emerging requirements	1								*	-	-	-
3.2. OPERATIONS MANAGEMENT Description: The ability to identify and facilitate organizational needs to complete the mission effectively. **Supporting Competencies:**												
3.2.1. Operations Management (Basic) **Required Behaviors:** 1) Determine and utilize applicable equipment, technical data, documentation (MIS and applicable forms) and procedures to complete a task 2) Determine number of qualified personnel and work center to complete assigned tasks **Criteria:** *Depth of Knowledge: Established practice with some workplace elements*												
3.2.1.1. Explain how to determine the number of personnel and equipment required to complete a task	2								*	-	-	-
3.2.1.2. Explain MOC/MUNS control functions	2								*	-	-	-
3.2.1.3. Comprehend technical data safety verbiage (e.g., Cautions, Warnings, Notes)	1								*	K	-	-
3.2.1.4. Identify different types of technical order series	1								*	K	-	-
3.2.1.5. Follow basic security requirements in-garrison or expeditionary policy	1								*	K	-	-
3.2.2. Operations Management (Intermediate) **Required Behaviors:** 1) Task personnel for operations based on mission requirements 2) Coordinate and communicate with section and other units to determine work priorities 3) Prioritize tasks with available manning, material, and time to complete projects												

Criteria: *Depth of Knowledge: Established practices of all workplace elements*												
3.2.2.1. Determine adequate personnel and equipment availability for required flying operations	3	7							*	-	-	-
3.2.2.2. Verify work center manning qualifications, to include TFI units, to complete work priorities (e.g., special certification roster, load crew status reports, MIS, CFETP)	1	7							*	-	-	-
3.2.2.3. Determine appropriate supporting agencies to accomplish daily functions (e.g., AGE, SPECS)	2	7							*	-	-	-
3.2.2.4. Coordinate with Production and Mx NCOIC to establish priorities	2	7							*	-	-	-
3.2.2.5. Translate flying schedule to project and forecast munitions requirements	2	7F							*	-	-	-
3.2.2.6. Account for Munitions via appropriate system and work center	2	7F							*	-	-	-
3.2.2.7. Utilize D-8 maps to prioritize munitions operations	3	7							*	-	-	-
3.2.2.8. Comprehend MESLs/MEFLs and aircraft status using to prioritize associated work tasks	3	7F							*	-	-	-
3.2.2.9. Interpret daily flying/work schedules to determine aircraft/equipment status and recommend consolidating scheduled/unscheduled maintenance through cannibalizations, awaiting parts, awaiting maintenance, etc.	1	7							*	-	-	-
3.2.2.10. Explain the importance and components of aircraft impoundments	1	7							*	-	-	-
3.2.3. Operations Management (Advanced) **Required Behaviors:** 1) Manages manpower and develops duty schedules to meet mission needs 2) Coordinate with MAJCOM and other agencies to mitigate effects of resource shortfalls to facilitate objective completion 3) Analyze trends and short comings to devise plans for improvement 4) Develop and implement schedule and review accomplished tasks **Criteria:** *Depth of Knowledge: New practices of all workplace elements*												
3.2.3.1. Initiate FRAGO and breakout to identify munitions flow and shortfalls for wing operations	2								*	-	-	-
3.2.3.2. Analyze flying operations to develop SCL turn times	3								*	-	-	-
3.2.3.3. Ensure adequate personal skill level and qualification balance throughout work center	1								*	-	-	-
3.2.3.4. Create maintenance flow plan based from airframe inspection technical data and implement through JSTs and the MIS	4								*	-	-	-
3.2.3.5. Analyze generation line up to create a maintenance/loading priority plan with production	4								*	-	-	-
3.2.3.6. Participate in group-level manning meetings	1								*	-	-	-
3.2.3.7. Engage other sections to balance resources for mission	3								*	-	-	-
3.2.3.8. Explain Ready Aircrew Program and relation to weapons loading and maintenance practices	2								*	-	-	-
3.2.3.9. Interpret Resource Protection Requirements to develop in-garrison or expeditionary policy	2								*	-	-	-
3.2.3.10. Manage Armament related impoundments and cannibalizations to aid in maintenance scheduling	3								*	-	-	-
3.2.4. Operations Management (Expert) **Required Behaviors:** 1) Determines requirements and distributes manpower to deliver combat capability and sustain nuclear deterrence 2) Develops and implements loading and maintenance policy supporting combat aircraft generation, test, and training sorties **Criteria:** *Depth of Knowledge: New practices/concepts and theories of all workplace elements; is a credible resource in this are*												

3.2.4.1. Engage AOC for SCL management	2								*	-	-	-
3.2.4.2. Engage MAJCOMs to assist with mission command risk based on requirements	2								*	-	-	-
3.2.4.3. Integrate weapons employment manuals and weapons officer duties with armament processes	2								*	-	-	-
3.2.4.4. Translate munitions stockpile limitations to combat aircraft generations	2								*	-	-	-
3.2.4.5. Correlate LCOMs, AFMD, AFMSs, variances, AOA, to evaluate UMDs and command manpower	1								*	-	-	-
3.2.4.6. Evaluate 2W1 world-wide averages (WWAs) to determine entitlements and engage with HQ AFPC	1								*	-	-	-
3.2.4.7. Synthesize programmatic requirements (e.g., 1067, TCD, SATAF, P-plan) to influence the Program Objective Memorandum (POM) process	1								*	-	-	-
3.3. PERSONNEL DEVELOPMENT Description: The ability to guide personnel effectively to complete taskings through compliance with directives. **Supporting Competencies:**												
3.3.1. Personnel Development (Basic) **Required Behaviors:** 1) Apply direction and feedback to accomplish tasks for maintaining mission readiness 2) Maintain information on performance with detailed description of tasks performed 3) Seek opportunities to bolster knowledge, skills, and abilities to enhance occupational development 4) Maintain professional and personal readiness **Criteria:** *Impact on… specific workplace tasks*												
3.3.1.1. Complete the 12 Ready Training Areas (RTA) task requirements	4								*	-	-	-
3.3.1.2. Communicate Individual Development Plan (IDP) progress to supervisor	1								*	-	-	-
3.3.1.3. Monitor and complete Career Development Course per established timeline	4								*	-	-	-
3.3.1.4. Aid supervisor in OJT progression	2								*	-	-	-
3.3.1.5. Aid supervisor in individual feedback documentation	2								*	-	-	-
3.3.1.6. Complete applicable Mission Design Series (MDS) specific FTD courses	3								*	-	-	-
3.3.1.7. Complete LSEP requirements	3								*	-	-	-
3.3.2. Personnel Development (Intermediate) **Required Behaviors:** 1) Provide and document feedback on performance to enhance career progression 2) Enhance unit performance by collaborating occupational competency based developmental opportunities with external agencies 3) Manages readiness of personnel to meet mission requirements **Criteria:** *Impact on… Specific workplace projects*												
3.3.2.1. Manage subordinate career progression	1								*	-	-	-
3.3.2.2. Establish, monitor, and document Individual Development Plan (IDP) for trainees	1	7							*	-	-	-
3.3.2.3. Coordinate with Weapons Standardization for required training	2								*	-	-	-
3.3.2.4. Coordinate with external agencies for personnel knowledge and skill development	2								*	-	-	-
3.3.2.5. Manage the completion of 12 Ready Training Areas (RTA) task requirements	3								*	-	-	-

3.3.2.6. Identify and communicate personnel IMR status to unit members	3								*	-	-	-
3.3.2.7. Identify and communicate personnel training status to unit members	3								*	-	-	-
3.3.2.8. Identify and communicate personnel status to unit deployment managers	3								*	-	-	-
3.3.2.9. Monitor and report individual PRAP status to unit members	3								*	-	-	-
3.3.3. Personnel Development (Advanced) **Required Behaviors:** 1) Manage manpower requirements to prepare personnel for functional key leadership roles to optimize mission execution 2) Develop and implement programs to support functional growth **Criteria:** *Impact on… Management decisions*												
3.3.3.1. Review and update Unit Manning Document	1								*	-	-	-
3.3.3.2. Review and update Unit Personnel Management Roster	1								*	-	-	-
3.3.3.3. Advocate and coordinate developmental opportunities with external agencies	2								*	-	-	-
3.3.3.4. Maximize resource availability to increase functional training opportunities	2								*	-	-	-
3.3.4. Personnel Development (Expert) **Required Behaviors:** 1) Deliberately vector personnel into key developmental and leadership positions to effectively manage the career field (EDT, CIP, etc.) 2) Validate and coordinate with MAJCOMs to address development requirements 3) Manage human capital to facilitate force development **Criteria:** *Impact on…SQ/GRP Level*												
3.3.4.1. Establish and implement career field development program	1								*	-	-	-
3.3.4.2. Routinely evaluate effectiveness of career field developmental program	1								*	-	-	-
3.3.4.3. Identify, establish, and manage career field key leadership positions and key developmental positions	1								*	-	-	-
3.3.4.4. Identify, establish, and manage career field key nuclear billet positions	1								*	-	-	-
3.3.4.5. Identify and communicate emerging mission requirements	2								*	-	-	-
3.3.4.6. Identify and communicate career field lifecycle training requirements and updates	2								*	-	-	-
3.3.4.7. Coordinate with applicable external agencies to facilitate force development and management	3								*	-	-	-
3.3.4.8. Routinely evaluate effectiveness of career field force development and management programs	3								*	-	-	-
4. ORGANIZATIONAL MANAGEMENT												
4.1. LEADERSHIP Description: The art and science of accomplishing the Air Force mission by motivating, coaching, influencing and directing personnel. The ability to guide personnel effectively to complete taskings through compliance with directives. **Supporting Competencies:**												
4.1.1. Leadership (Basic) **Required Behaviors:** 1) Complete assigned responsibilities while developing leadership qualities 2) Generate decisions at the lowest level and communicate mission limiting factors to supervision **Criteria:**												

Impact on… specific workplace tasks												
4.1.1.1. Perform assigned tasks within team dynamics	1								*	-	-	-
4.1.1.2. Identify opportunities to fulfill leadership roles	1								*	K	-	-
4.1.1.3. Establish leadership development plan with supervisor (e.g., training status checks)	1								*	-	-	-
4.1.1.4. Recommend process improvement to peers and supervision	2								*	-	-	-
4.1.1.5. Leverage feedback for self improvement	1								*	-	-	-
4.1.1.6. Explain application of team development during loading and maintenance operations	2	5							*	-	-	-
4.1.2. Leadership (Intermediate) **Required Behaviors:** 1) Understand and communicate unit mission and functional responsibilities to enhance mission comprehension 2) Lead, motivate, and mentor unit members to enhance organizational effectiveness 3) Encourage compliance of Air Force standards to enrich organizational behavior **Criteria:** *Impact on… Specific workplace projects*												
4.1.2.1. Review and understand commanders lines of effort and direction	1								*	-	-	-
4.1.2.2. Review and understand functional responsibilities	1								*	-	-	-
4.1.2.3. Explain unit mission requirements	1	5							*	-	-	-
4.1.2.4. Develop lines of communication within unit	2								*	-	-	-
4.1.2.5. Provide constructive feedback to peers and subordinates	2								*	-	-	-
4.1.2.6. Explain importance of guidance and instructions	3								*	-	-	-
4.1.2.7. Continually montor workcenter environment	2								*	-	-	-
4.1.3. Leadership (Advanced) **Required Behaviors:** 1) Conduct unit visits, monitor unit health, balance manning and disseminate policies and programs 2) Mentor personnel to improve productivity, morale and quality of life 3) Provide developmental guidance and assignment to enhance professional growth **Criteria:** *Impact on… Management decisions*												
4.1.3.1. Perform active engagements within workcenter to understand functional climate	1								*	-	-	-
4.1.3.2. Develop external healthy organization relationships to advance armament functions	1								*	-	-	-
4.1.3.3. Comprehend mission requirements to align manning with operations tempo	1								*	-	-	-
4.1.3.4. Translate guidance and instructions to work force	1								*	-	-	-
4.1.3.5. Familiarization with Wing and functional resources to guide Airmen and advise commanders	2								*	-	-	-
4.1.3.6. Advocate for adequate funding to support unit requirements (e.g., UFR, ETC)	2								*	-	-	-
4.1.3.7. Implement 2W1 Developmental Team feedback for individual's future placement	3								*	-	-	-
4.1.3.8. Assess 2W1 workforce experiences to identify key personnel to perform WS and QA roles/responsibilities	3								*	-	-	-
4.1.4. Leadership (Expert) **Required Behaviors:** 1) Communicate Air Force and MAJCOM mission and vision to the lowest level 2) Lead organizational efforts in personnel development, policy, and procedures **Criteria:** *Impact on…SQ/GRP Level*												

4.1.4.1. Translate Air Force and MAJCOM mission and vision statements to functional processes/ehancements	1								*	-	-	-
4.1.4.2. Perform site visits to understand functional unit climate	1								*	-	-	-
4.1.4.3. Interpret mission needs and provide guidance/policy to support operations	1								*	-	-	-
4.1.4.4. Establish relationships to provide support to units through challenges	1								*	-	-	-
4.1.4.5. Engage units for functional process improvements	2								*	-	-	-
4.1.4.6. Implement career field development program	2								*	-	-	-
5. INFORMATION MANAGEMENT												
5.1. COMMUNICATION Description: The process of exchanging information through a common system of verbal, non-verbal, and physical (i.e. marshalling, signaling) methods to direct, inform, and persuade individuals and agencies at all levels. **Supporting Competencies:**												
5.1.1. Communication (Basic) **Required Behaviors:** 1) Employs communication tools; written, verbal, and electronic formats to provide clarity and transparency 2) Demonstrates the ability to communicate clearly and understand basic duties 3) Receives and executes orders and guidance from leadership **Criteria:** *Impact on... specific workplace tasks*												
5.1.1.1. Execute tasks after given basic instructions	3								*	-	-	-
5.1.1.2. Communicate individual's status of training (TFTR, MyTraining, 593 Screen)	1								*	-	-	-
5.1.1.3. Demonstrate basic radio communication	1								*	-	-	-
5.1.1.4. Explain Armament Functions within the maintenance complex	2								*	K	-	-
5.1.1.5. Utilize ETOOLS (e.g., tough books, IPADs, GETACs, MITs)	1								*	-	-	-
5.1.1.6. Communicate with team members to complete operations	2	5							*	-	-	-
5.1.2. Communication (Intermediate) **Required Behaviors:** 1) Utilizes communication tools to direct and control maintenance and loading actions 2) Demonstrates the ability to communicate operational risk to facilitate course of action development and informed decision making 3) Interprets top-level organizational guidance and subordinate communication to set priorities/distill information into executable tasks **Criteria:** *Impact on… Specific workplace projects*												
5.1.2.1. Comprehend non-verbal communication during loading operations	1								*	-	-	-
5.1.2.2. Demonstrate proficient use of LMR to communicate information	1	7							*	-	-	-
5.1.2.3. Conduct briefings (e.g., load pad safety brief, explosive operation)	2	5							*	-	-	-
5.1.2.4. Maintain controlled communication for reporting procedures and emergency action responses	2	7							*	-	-	-
5.1.2.5. Translate information from leadership and peers to prevent redundancy (e.g., log books, turn over, roll calls)	3								*	-	-	-
5.1.2.6. Translates information from subordinates to leadership	3								*	-	-	-
5.1.3. Communication (Advanced) **Required Behaviors:** 1) Organizing and conveying information to leadership on readiness, timelines, and LIMFACs for mission employment capability												

2) Articulates information based on limited or uncertain data in impromptu situations or to varying audiences to maintain good order and discipline **Criteria:** *Impact on… Management decisions*												
5.1.3.1. Incorporate armament related data into coherent briefs for senior leadership	1								*	-	-	-
5.1.3.2. Attends command briefings and channels information as required	1								*	-	-	-
5.1.3.3. Translate expert knowledge to make risk assessment decisions	2								*	-	-	-
5.1.3.4. Implement Mission Command principles (e.g., AFPD 1-1)	2								*	-	-	-
5.1.3.5. Completes Enterprise Access Management Service (EAMS) taskers	1								*	-	-	-
5.1.3.6. Comprehend the deployment/mobility planning process, to include WRM and RSP kits, along with execution of flying operations at different locations	2								*	-	-	-
5.1.4. Communication (Expert) **Required Behaviors:** 1) Develops messaging to senior leadership and other external organizations to effectively convey mission constraints and requirements 2) Translates and disseminates policies and operational guidance to ensure mission success 3) Develops communication strategies to produce a desired effect across diverse audiences **Criteria:** *Impact on…SQ/GRP Level*												
5.1.4.1. Translate strategic documents and impacts to the armament career field (e.g., NDS, NMS, NDAA, FYDP, etc.)	2								*	-	-	-
5.1.4.2. Differentiate between FHP generation and combat sortie generation to advocate for armament resources	1								*	-	-	-
5.1.4.3. Develop countermeasures to day-to-day operations that inhibit combat generation training	3								*	-	-	-
5.1.4.4. Assimilate DOC statement to WCDO and the execution of war plans	2								*	-	-	-
5.1.4.5. Translate OPLANs to extrapolate armament processes for actual mission requirements and mission needs	1								*	-	-	-
5.1.4.6. Engage in organizational officer/senior enlisted development to articulate armament processes and wartime readiness	1								*	-	-	-
5.1.4.7. Analyze AOR prep messages/specific requirements to effectively fulfill and Identify mission requirements	2								*	-	-	-
5.1.4.8. Develop staff communications derived from unit readiness reports, W3R data and subject matter expertise	1								*	-	-	-
5.1.4.9. Advise on deployment readiness reporting systems (DRRS) the status of forces	1								*	-	-	-
5.1.4.10. Communicate across MAJCOMs to standardize armament processes	2								*	-	-	-
6. RISK MANAGEMENT												
6.1. SAFETY Description: Identifying potential hazards and applying proper risk management principles in accomplishment of the mission requirements. **Supporting Competencies:**												
6.1.1. Safety (Basic) **Required Behaviors:** 1) Utilizes appropriate personnel protection equipment (PPE) and safety equipment to ensure safe operations 2) Applies risk management principles to mitigate safety hazards (on- and off-duty)												

Criteria: *Impact on… specific workplace tasks*												
6.1.1.1. Utilize required PPE to perform maintenance and loading operations	1								*	K	-	-
6.1.1.2. Recognize hazards associated to maintenance tasks	1								*	K	-	-
6.1.1.3. Recognize hazards associated to explosive operations	2								*	K	-	-
6.1.1.4. Initiates safety mishap reporting	2								*	K	-	-
6.1.1.5. Adhere to workcenter Job Safety Standard	2								*	K	-	-
6.1.1.6. Identify HAZMAT requirements	1								*	K	-	-
6.1.2. Safety (Intermediate) **Required Behaviors:** 1) Monitors Job Safety Training Outline (JSTO) guidelines and verifies practices are implemented in the work center 2) Promotes safe working conditions by enforcing safety regulations and risk management principles **Criteria:** *Impact on… Specific workplace projects*												
6.1.2.1. Enforce applicable safety requirements	1	5							*	-	-	-
6.1.2.2. Enforce PPE use and implement risk mitigation	2	5							*	-	-	-
6.1.2.3. Assess the operational environment and implement appropriate course of action (e.g., Bioenvironmental, AF Form 457, JSTO)	2								*	-	-	-
6.1.3. Safety (Advanced) **Required Behaviors:** 1) Investigates safety mishaps and disseminates findings to applicable personnel 2) Establishes local safety standards to supplement existing safety regulations 3) Enhances safety programs to prevent future mishaps and/or losses 4) Shapes risk informed decision-making to achieve mission objectives **Criteria:** *Impact on… Management decisions*												
6.1.3.1. Aids in investigations and presents findings to appropriate authority	1								*	-	-	-
6.1.3.2. Distribute safety report information to prevent mishaps	1								*	-	-	-
6.1.3.3. Performs trend analysis and recommends mitigation measures	3								*	-	-	-
6.1.3.4. Develop local safety supplements and Operating Instructions	2								*	-	-	-
6.1.3.5. Advise leadership on trends, root causes, and corrective actions	2								*	-	-	-
6.1.3.6. Advise leadership on ORM for informed decision making	4								*	-	-	-
6.1.3.7. Generate Safety Flashes/Newsletters	3								*	-	-	-
6.1.4. Safety (Expert) **Required Behaviors:** 1) Communicates and coordinates with HAF, MAJCOMS, and outside agencies for issues pertaining to safety 2) Validates and develops policies and procedures pertaining to safety-related content to meet mission requirements. 3) Produces and disseminates safety incident reports to prevent future mishaps **Criteria:** *Impact on…SQ/GRP Level*												
6.1.4.1. Distributes safety investigation findings for awareness	1								*	-	-	-
6.1.4.2. Implements mitigation to safety issues within 2W1X1 career field.	2								*	-	-	-
6.1.4.3. Coordinate recommended changes	1								*	-	-	-
6.1.4.4. Performs inspections and interprets results to validate policy and procedure.	2								*	-	-	-
6.1.4.5. Initiate safety data call for informed decision making	3								*	-	-	-
6.2. NUCLEAR SURETY												

Description: Ensuring maximum capabilities consistent with operational requirements using policies, procedures, and controls to ensure safety and deterrence. **Supporting Competencies:**												
6.2.1. Nuclear Surety (Basic) **Required Behaviors:** 1) Articulates and demonstrates nuclear surety requirements and procedures to ensure standardization of nuclear operations 2) Adheres to the requirements for special equipment (NCE/NCI) and personnel certification to ensure safety and reliability 3) Identifies and reports potential nuclear surety issues to prevent mishaps and threats to the nuclear mission **Criteria:** *Depth of Knowledge: Established practice with some workplace elements*												
6.2.1.1. Comply with Nuclear Surety training and requirements	1								*	pk	-	-
6.2.1.2. Comply with the Personnel Reliability Assurance Program (PRAP) requirements	1								*	pk	-	-
6.2.1.3. Identify abnormal nuclear weapons conditions	1								*	K	-	-
6.2.1.4. Validate Master Nuclear Certified Listing (MNCL) against support equipment	2	5							*	pk	-	-
6.2.1.5. Identify NCE/NCI assets	2	5							*	K	-	-
6.2.1.6. Explain various levels of nuclear mishap reporting	1								*	K	-	-
6.2.1.7. Identify Weapon System Safety Rules (WSSR) violations	3								*	K	-	-
6.2.1.8. Explain importance of custody/control of nuclear weapons	1								*	K	-	-
6.2.1.9. Explain Two-Person Concept (TPC) and No-Lone Zone Procedures	1								*	K	-	-
6.2.1.10. Explain use of Tamper Detection Indicators (TDI)	1								*	K	-	-
6.2.2. Nuclear Surety (Intermediate) **Required Behaviors:** 1) Enforces nuclear surety principals while leading team operations to ensure safe, secure, and reliable loading and maintenance tasks 2) Manages nuclear surety programs to ensure unit compliance 3) Utilizes flag words to report deficiencies and incidents 4) Enforces custody, control, and transfer procedures for nuclear assets and positive control of associated items **Criteria:** *Depth of Knowledge: Established practices of all workplace elements*												
6.2.2.1. Monitor personnel for PRAP and load certification status	1								*	-	-	-
6.2.2.2. Enforces control and operations in closed in security area (CISA)	4								*	-	-	-
6.2.2.3. Identify nuclear weapon faults, levels of criticality and weapons isolation.	1								*	-	-	-
6.2.2.4. Identifies violations to report nuclear mishaps using flag words	3								*	-	-	-
6.2.2.5. Execute nuclear surety program training requirements	2								*	K	-	-
6.2.2.6. Validate nuclear surety program through periodic evaluations	2								*	-	-	-
6.2.2.7. Initiates nuclear mishap reporting	3	5							*	-	-	-
6.2.2.8. Inspect logs and equipment for custody/control of nuclear weapons and components (e.g., AF IMT 504, TDI control log)	4								*	-	-	-
6.2.3. Nuclear Surety (Advanced) **Required Behaviors:** 1) Validates individual and unit compliance with nuclear surety policies and procedures to ensure nuclear assurance and deterrence 2) Analyzes deficiencies and incidents and take action to reduce risk to the nuclear enterprise 3) Evaluates nuclear surety programs to ensure wing compliance. 4) Evaluates custody, control, and transfer procedures for nuclear assets and positive control of associated items												

Criteria: *Depth of Knowledge: New practices of all workplace elements*												
6.2.3.1. Advises certifying official (CO) to take action on personnel management through PRAP compliance	1								*	-	-	-
6.2.3.2. Validate local nuclear surety policies and guidance to safeguard weapons and components	1								*	-	-	-
6.2.3.3. Review reported mishaps and deficiencies for trend analysis	2								*	-	-	-
6.2.3.4. Advise leadership on Nuclear fault isolation and corrective actions	2								*	-	-	-
6.2.3.5. Evaluate organizational nuclear surety program elements	3								*	-	-	-
6.2.3.6. Advise senior leadership on nuclear generation operations	3								*	-	-	-
6.2.3.7. Audit custody, control, and transfer processes	4								*	-	-	-
6.2.4. Nuclear Surety (Expert) **Required Behaviors:** 1) Establishes, evaluates, and enforces nuclear surety policies to ensure that safe, reliable and secure weapons systems meet nuclear mission objectives 2) Establishes and evaluates nuclear certified loading procedures and technical operations to ensure compliance with the nuclear surety program 3) Evaluates personnel reliability assurance program to ensure personnel readiness and to meet mission requirements 4) Validates custody, control, and transfer procedures for nuclear assets and positive control of associated items **Criteria:** *Depth of Knowledge: New practices/concepts and theories of all workplace elements; is a credible resource in this are*												
6.2.4.1. Review Operational Plan (OPLAN) for personnel, equipment, and mission adequacy	1								*	-	-	-
6.2.4.2. Validate instructions and manuals that impact nuclear loading operations	1								*	-	-	-
6.2.4.3. Organize inspection teams to assess unit's nuclear readiness and loading operations	1								*	-	-	-
6.2.4.4. Assess recommended changes to technical data for nuclear surety compliance	2								*	-	-	-
6.2.4.5. Engage with DAF on PRAP certification process	3								*	-	-	-
6.2.4.6. Monitor nuclear deficiencies to closure.	2								*	-	-	-
6.2.4.7. Shapes Command-level inspection criteria in coordination with IG	4								*	-	-	-
7. **MAINTENANCE ANNEX**												
7.1. Maintenance Annex Description: As an part of ARMAMENT OPERATIONS, this annex supplements the Maintenance competency to ensure technical expertise on an MDS weapons systems, equipment, and serviceability of aircraft to ensure continued reliability for operational readiness. **Supporting Competencies:**												
7.1.1. Maintenance (Basic) **Required Behaviors:** 1) Assist with weapon system maintenance, operational and functional checks to maintain aircraft and equipment serviceability 2) Utilize equipment and tech data required to complete maintenance tasks **Criteria:** *Impact on... specific workplace tasks*												
7.1.1.1 **A-10**												

7.1.1.1.1 Perform A-10 familiarization, external power application, and safe for maintenance on aircraft, equipment, and/or work center/facility	2	5F							*	-	-	-
7.1.1.1.2 Explain A-10 safety devices, cockpit switches, egress procedures, and danger areas	2								*	-	-	-
7.1.1.1.3 Explain Air munitions on A-10	2								*	K	-	-
7.1.1.1.4 Explain GAU-8, handling system, and loading systems (GFU-7 and GFU-8) operations	2								*	K	-	-
7.1.1.1.5 Execute loading system (GFU-7 and GFU-8) inspection and checkout	1								*	-	-	-
7.1.1.1.6 Aid in the execution of gun safing and clearing operations for assigned work center (Armament and/or Flightline)	2	5							*	-	-	-
7.1.1.1.7 Execute GAU-8 and handling system install, removal, and checkout	1								*	-	-	-
7.1.1.1.8 Execute GAU-8 and handling system disassembly, inspection, and reassembly	1								*	-	-	-
7.1.1.1.9 Execute A-10 pylon removal, inspection, and install	1								*	-	-	-
7.1.1.1.10 Execute MAU-40 & MAU-50 basic post flight inspections, removal and installation	1								*	-	-	-
7.1.1.1.11 Execute MAU-40/MAU-50 disassembly, inspection, assembly, and checks with MAU-12/40/50 Test Set and weight check with Proofload Tester	2	5B							*	-	-	-
7.1.1.1.12 Execute LAU-88, LAU-117, LAU-131, and LAU-105 basic post flight inspections, removal and installation, and checks with ARM-136/DSM-157, MLS Test Set, Analog Preload Circuit Test Set, Digital Test Set, Detent Tester	1								*	-	-	-
7.1.1.1.13 Execute LAU-88, LAU-117, LAU-131 and LAU-105 disassembly, inspection, repair, assembly, and checks with Control Test Set, MK-III, MK-IV Tester, multimeter, Detent Tester	1								*	-	-	-
7.1.1.1.14 Execute Dual Rail Adapter, Triple Ejection Rack, and BRU-61 removal and installation, and checks with Analog Preload Circuit Test Set, Digital Preload Circuit Test Set	1								*	-	-	-
7.1.1.1.15 Execute Dual Rail Adapter, Triple Ejection Rack, and BRU-61 disassembly, inspection, repair, assembly, and checks with MER/TER/BRU-3 Test Set, CMBRE Test Set, ADU-890 Test Set, Control Test Set, Proofload Tester	1								*	-	-	-
7.1.1.1.16 Aid Armament Systems component removal, repair, installation, fault isolation, and check out (e.g. Station Control Unit, Digital Data Processing Unit, Gun Control Unit, Guided Missile Interface Unit, Armament Relay Box, Armament Circuit Breaker Panel, Left Hand Circuit Breaker Panel, Electrical Test Panel, Central Interface Control Unit, 1760 Relay Box, Armament HUD, Control Panel, Multi-Functional Color Display, Control Display Unit, Operational Flight Program) using testing methods: BIT, Portable Automated Test Station, Hands-on Throttle Stick, A/E24T-138 Test Set, Control Test Set and LRU checks	2								*	-	-	-
7.1.1.1.17 Configure A-10 test sets and associated equipment, inspect, maintain, and repair (MAU-12/40/50 Test Set, A/E24T-138 Test Set, DSM-157/ARM136, CTS, Armament Control System Interface Test Set, MK-III/MK-IV Test Set, MLSTS, MER/TER/BRU-3 Test Set, Analog Preload Circuit Test Set, Digital Preload Circuit Test Set, Detent Tester, Proofload Tester, PATS)	2								*	-	-	-
7.1.1.2 **F-15**												
7.1.1.2.1 Perform F-15C/E/EX familiarization, external power application, and safe for maintenance on aircraft, equipment, and/or work center/facility	2	5F							*	-	-	-
7.1.1.2.2 Explain F-15C/E/EX safety devices, cockpit switches, egress procedures, and danger areas	2								*	-	-	-
7.1.1.2.3 Explain Air munitions on F-15C/E/EX	2								*	K	-	-
7.1.1.2.4 Explain M61 handling system, and loading systems (UALS and LALS) operations	2								*	K	-	-
7.1.1.2.5 Execute loading system (UALS/LALS) disassembly, inspection, and reassembly	1								*	-	-	-

7.1.1.2.6 Aid in the execution of gun safing and clearing operations for assigned work center (Armament and/or Flightline)	2	5							*	-	-	-
7.1.1.2.7 Execute M61 and/or components, handling system install, removal, and checkout (A/E34T-199 test set)	1								*	-	-	-
7.1.1.2.8 Execute M61 and/or components, disassembly, inspection, reassembly, and checkout	1								*	-	-	-
7.1.1.2.9 Execute gun boresighting	1								*	-	-	-
7.1.1.2.10 Execute F-15C/E/EX SUU-59/SUU-73/SUU-60 pylon removal and install	1								*	-	-	-
7.1.1.2.11 Execute BRU-61 removal and install	1								*	-	-	-
7.1.1.2.12 Execute F-15C/E/EX SUU-59/SUU-73/SUU-6 disassembly, inspection and reassembly,	1								*	-	-	-
7.1.1.2.13 Execute BRU-46/BRU-47/MAU-12 basic post flight inspections, removal, installation and checkout (A/E24T-198)	1								*	-	-	-
7.1.1.2.14 Execute BRU-46/BRU-47/MAU-12 disassembly, inspection, assembly, and weight check with Proofload Tester	2	5B							*	-	-	-
7.1.1.2.15 Execute LAU-106/LAU-128 basic post flight inspections, removal and installation	2	5F							*	-	-	-
7.1.1.2.16 Execute LAU-106/LAU-128 disassembly, inspection, assembly, checks with A/E24T-197 Test Set, and Detent Tester	1								*	-	-	-
7.1.1.2.17 Execute ADU-552 removal and installation, and *checks with A/E24T-199 Tester and A/E24T-198 Test Set	1								*	-	-	-
7.1.1.2.18 Execute ADU-552 disassembly, inspection, repair, assembly, and checks with A/E24T-197 Test Set	1								*	-	-	-
7.1.1.2.19 Aid Armament Systems component removal, repair, installation, fault isolation, and check out (e.g. Converter Programmer, Armament Control Panel, Multi-Purpose Color Display, Master Armament Bus Control Contactor, Armament 1553 MUX Bus Coupling Transformer, Armament Bus Control Contactor, Emergency Jett Switch, Missile Launcher Auxiliary Relay Panel, PACS Termination Resistor Assembly, Armament Safety Switch, Nuclear Consent Panel, Encoder/Decoder, Power Supply, Electronic Sequencing Unit) using testing methods: operational checkout, A/E24T-199 Tester, A/E24T-198 Test Set, A/E24T-197 Test Set	2								*	-	-	-
7.1.1.2.20 Configure F-15C/E/EX test sets and associated equipment, inspect, maintain, and repair (MAU-12/40/50 Test Set, A/E24T-197 Test Set, A/E24T-198 Test Set, A/E24T-199 Tester, proofload tester, Detent Tester, CMBRE, ADU-890/E Test Set)	2								*	-	-	-
7.1.1.3 **F-16**												
7.1.1.3.1 Perform F-16 familiarization, external power application, and safe for maintenance on aircraft, equipment, and/or work center/facility	2	5F							*	-	-	-
7.1.1.3.2 Explain F-16 safety devices, cockpit switches, egress procedures, and danger areas	2								*	-	-	-
7.1.1.3.3 Explain Air munitions on F-16	2								*	K	-	-
7.1.1.3.4 Explain M61 handling system, and loading systems (UALS and LALS) operations	2								*	K	-	-
7.1.1.3.5 Execute loading system (UALS/LALS) disassembly, inspection, and reassembly	1								*	-	-	-
7.1.1.3.6 Aid in the execution of gun safing and clearing operations for assigned work center (Armament and/or Flightline)	2	5							*	-	-	-
7.1.1.3.7 Execute M61 and/or components, handling system install, removal, and checkouts (16U75060 Tester)	1								*	-	-	-
7.1.1.3.8 Execute M61 and/or components, disassembly, inspection, reassembly, and checkout	1								*	-	-	-
7.1.1.3.9 Execute gun boresighting	1								*	-	-	-
7.1.1.3.10 Execute F-16 Wing Weapons Pylon, PIDS Pylon, Centerline Pylon, ALE-50 Pylon removal, *repair, install, and checkout (SST, 17U75060 Tester, Fault Isolation System Tester (FIST))	1								*	-	-	-
7.1.1.3.11 Execute MAU-12, BRU-57 removal, *repair, install, and checkout (SST)	1								*	-	-	-

7.1.1.3.12 Execute F-16 Wing Weapons Pylon, PIDS Pylon, Centerline Pylon, ALE-50 Pylon disassembly, inspection, *repair, reassembly, and checkout (SST)	1								*	-	-	-
7.1.1.3.13 Execute MAU-12, BRU-57, and BRU-61 basic post flight inspections, removal and installation	1								*	-	-	-
7.1.1.3.14 Execute MAU-12, BRU-46, BRU-57, and BRU-61 disassembly, inspection, *repair, assembly, and checks with SST, MAU-12/40/50 Test Set, CMBRE, ADU-890/E Test Set, and weight check with Proofload Tester	2	5B							*	-	-	-
7.1.1.3.15 Execute LAU-118, LAU-129, LAU-131 basic post flight inspections, removal and installation, and checks with SST, 17U75060 Tester, Enhanced Diagnostic Aid (EDNA), Multimeter, and Detent Tester	1								*	-	-	-
7.1.1.3.16 Execute LAU-129/LAU-131 disassembly, inspection, assembly, and checks with SST and Detent Tester and functional check with MK-III/MKIV Tester, Multimeter	2	5B							*	-	-	-
7.1.1.3.17 Execute Launcher Adapter, Triple Ejection Rack removal and installation, and checks with SST and 17U75060 Tester	1								*	-	-	-
7.1.1.3.18 Execute Launcher Adapter, Triple Ejection Rack disassembly, inspection, *repair, assembly, and *checks with SST, Multimeter, and Proofload Tester	1								*	-	-	-
7.1.1.3.19 Aid Armament Systems component removal, repair, installation, fault isolation, and check out (e.g. Cockpit Armament Panels, Cockpit Armament Switches, Advanced Conventional Remote Interface Unit, Advanced Missile Remote Interface Unit, Nuclear Remote Interface Unit, Jettison Release Interface Unit, Store Control Panel MFD, Master Arm and Release Matrix, SMS Power Matrix, Wing Stores Matrix, Station #5 Stores Matrix, Gun Control Unit, ALE-50 Launcher/Controller, Modular Mission Computer, Central Interface Unit) using testing methods: operational checkout, Fault Isolation System Tester, BIT, SST	2	5							*	-	-	-
7.1.1.3.20 Configure F-16 test sets and associated equipment, inspect, maintain, and repair (Viper Memory Load Verifier, MAU-12/40/50 Test Set, SST Instrument Unit, SST Organizational Level Adapter Set, SST Intermediate Level Adapter Set, MK-III/MK-IV Test, Fault Isolation System Tester, Multiplex Fault Isolator, AN/GSM-369 Test Set, proofload tester, Detent Tester, CMBRE, ADU-890/E Test Set)	2								*	-	-	-
7.1.1.4 **F-22**												
7.1.1.4.1 Perform F-22 canopy open/close, panel installation/removal, aircraft familiarization and safe for maintenance on aircraft, equipment, and/or work center/facility	2	5F							*	-	-	-
7.1.1.4.2 Explain F-22 safety devices, cockpit switches, egress procedures, low observable safety, hydraulic pressurization on frequent-accessed panels, and danger areas	2								*	-	-	-
7.1.1.4.3 Explain Air munitions on F-22	2								*	K	-	-
7.1.1.4.4 Explain M61 handling system, and loading systems (UALS and LALS) operations	2								*	K	-	-
7.1.1.4.5 Execute loading system (UALS) disassembly, inspection, and reassembly	1								*	-	-	-
7.1.1.4.6 Aid in the execution of gun safing and clearing operations for assigned work center (Armament and/or Flightline)	2	5							*	-	-	-
7.1.1.4.7 Execute M61 and/or components handling system install, removal, container and component inspections, and checkouts (Portable Maintenance Aid, SWAT Tester)	1								*	-	-	-
7.1.1.4.8 Execute M61 and/or components disassembly, inspection, reassembly, and checkout	1								*	-	-	-
7.1.1.4.9 Execute gun actuators and/or doors installation, removal, and adjustments	1								*	-	-	-
7.1.1.4.10 Execute F-22 Pylon removal and install	1								*	-	-	-
7.1.1.4.11 Execute BRU-46 removal and install	1								*	-	-	-
7.1.1.4.12 Execute F-22 Pylon disassembly, EED removal and installation, inspection, repair, reassembly, and checkout (SWAT)	1								*	-	-	-

7.1.1.4.13 Execute BRU-61 basic post flight inspections, removal, and installation	1								*	-	-	-
7.1.1.4.14 Execute BRU-46 disassembly, inspection, assembly, and checks with COLT, and weight check with Proofload Tester	2	5B							*	-	-	-
7.1.1.4.15 Execute LAU-141 launcher trapeze arms, basic post flight inspections, removal and installation, checks with COLT, and Detent Tester	1								*	-	-	-
7.1.1.4.16 Execute LAU-141 disassembly, inspection, assembly, and checks with COLT, and Detent Tester	1								*	-	-	-
7.1.1.4.17 Perform PMA connection to aircraft, IMIS terminal for maintenance and/or data transfer	1								*	-	-	-
7.1.1.4.18 Perform F-22 IRCM/weapons bay doors actuation, removal, installation, rigging, alignment, and operational checks	1								*	-	-	-
7.1.1.4.19 Aid Armament Systems component removal, repair, installation, servicing, fault isolation, and check out (e.g. AIM-120 guides/restraints, weapons bay door inhibit switches, power drive unit, open/close sensors, weapons bay torque tubes, weapons bay struts, Master Arm Switch, Jettison Switch, Select Jettison Switch, SMS I-BIT, Stick Grip, Throttle Switches using testing methods: operational checkout, COLT)	2	5							*	-	-	-
7.1.1.4.20 Configure F-22 test sets and associated equipment, inspect, maintain, and repair (COLT, COLT Accessory Kit, F-22 Test Programmable Set, , AN/GSM-369 Test Set, SMS Wrap Around Tester (SWAT), Hardware Self Tester, proofload tester, Detent Tester, CMBRE, ADU-890/E Test Set)	2								*	-	-	-
7.1.1.5 F-35												
7.1.1.5.1 Perform F-35 canopy open/close, IPP operation, aircraft familiarization and safe for maintenance on aircraft, equipment, and/or work center/facility	1								*	-	-	-
7.1.1.5.2 Explain F-35 safety devices, cockpit switches, egress procedures, low observable safety, and danger areas	2								*	-	-	-
7.1.1.5.3 Explain Air munitions on F-35	2								*	-	-	-
7.1.1.5.4 Explain 25mm gun, handling system, and loading systems (25mm Bulk Loader) operations	2								*	-	-	-
7.1.1.5.5 Execute loading system (e.g. gun control unit, clevis bolts, arming solenoid, transfer unit, upload/download interface, etc.) removal, inspection, installation, and checkout	1								*	-	-	-
7.1.1.5.6 Aid in the execution of gun safing and clearing operations for assigned work center	2								*	-	-	-
7.1.1.5.7 Execute 25mm gun removal, inspection, installation and checkouts	1								*	-	-	-
7.1.1.5.8 Explain ALIS and access Maintenance Vehicle Interface and Joint Technical Data to perform maintenance, work order execution/completion, and follow-on maintenance	2								*	-	-	-
7.1.1.5.9 Execute gun actuators and/or doors installation, removal, and adjustments	1								*	-	-	-
7.1.1.5.10 Execute F-35 SUU-95, Air-to-Ground Pylon PPS, and SUU-96 and components (e.g. ECU, filter, compressor, etc.) removal, inspect, install, and checkout (WATS)	1								*	-	-	-
7.1.1.5.11 Execute BRU-68 and BRU-61 disassembly, inspection, repair, assembly, and checks with CMBRE, ADU-890/E Test Set, and SMS checkout	1								*	-	-	-
7.1.1.5.12 Perform PMA connection to aircraft and terminal for maintenance and/or data transfer	2								*	-	-	-
7.1.1.5.13 Execute Bulk Loader/Expedient Loader and/or components disassembly, inspection, repair, reassembly, and checkout	1								*	-	-	-
7.1.1.5.14 Execute ADU-930/A, ADU-931/A, ADU-934/A removal, inspection, assembly, and installation	1								*	-	-	-
7.1.1.5.15 Execute LAU-147, LAU-151 removal, inspection, and installation, reconfiguration, and checks with WATS	1								*	-	-	-
7.1.1.5.16 Execute LAU-147, LAU-151 disassembly, inspection, repair, assembly, and checks with Multimeter, and Detent Tester	1								*	-	-	-

7.1.1.5.17 Perform PMD connection to aircraft, pilot station, ALIS terminal for maintenance and/or data transfer	2								*	-	-	-
7.1.1.5.18 Perform F-35 IRCM/weapons bay doors actuation	2								*	-	-	-
7.1.1.5.19 Perform removal and installation of Pneumatic Power System components (ECU, Filter, Manifold, PAO Cooling Plate, Compressor, etc.)	2								*	-	-	-
7.1.1.5.20 Execute Ordnance Quick Latch System, Forward Adapter Latch, Center Adapter Latch, Aft Adapter Latch	1								*	-	-	-
7.1.1.5.21 Perform Fuselage Remote Interface Unit (FRIU), Missile Remote Interface Unit (MRIU) removal, inspection, and installation	2								*	-	-	-
7.1.1.5.22 Perfom cleaning and inspection of fiber optic wire	2								*	-	-	-
7.1.1.5.23 Configure F-35 test sets and associated equipment, inspect, maintain, and repair (Stray Voltage Tester, Detent Tester, WATS, CMBRE, ADU-890/E Test Set)	2								*	-	-	-
7.1.1.6 **AC-130J**												
7.1.1.6.1 Perform AC-130J familiarization, external power application, and safe for maintenance on aircraft, equipment, and/or work center/facility	2	5F							*	-	-	-
7.1.1.6.2 Explain AC-130J safety devices, cockpit switches, cargo door and ramp procedures, egress procedures, and danger areas	2								*	-	-	-
7.1.1.6.3 Explain Air munitions on AC-130J	2								*	K	-	-
7.1.1.6.4 Explain 30mm and 105mm handling system, and loading system operations	2								*	K	-	-
7.1.1.6.5 Execute 30mm and/or handling system, trainable gun mount (e.g. barrel, pressure seal, pressure plate, etc.) disassembly, inspection, reassembly, and checkout	1								*	-	-	-
7.1.1.6.6 Aid in the execution of 30mm and 105mm safing and clearing operations for assigned work center (Armament and/or Flightline)	2	5							*	-	-	-
7.1.1.6.7 Execute 30mm and/or components, handling system install, removal, and checkout	1								*	-	-	-
7.1.1.6.8 Execute 105mm and/or components, handling system inspection and checkout	1								*	-	-	-
7.1.1.6.9 Execute 105mm and/or handling system, trainable gun mount (e.g. Recoil Mechanism Assembly, Elevation Actuator, Firing Solenoid, Out-of-Battery Pump, Tube Retractor, Gun Mount, etc.) install, removal, boresight, and checkout	1								*	-	-	-
7.1.1.6.10 Execute MAU-40 basic post flight inspections, removal, inspection, installation, and checkout	1								*	-	-	-
7.1.1.6.11 Execute MAU-40 and BRU-61 disassembly, inspection, repair, assembly, and checks with MAU-12/40/50 Test Set, Analog Preload Circuit Test Set, Digital Preload Circuit Test Set, CMBRE, ADU-890/E Test Set, and weight check with Proofload Tester	2	5B							*	-	-	-
7.1.1.6.12 Execute Common Launch Tube and/or components (e.g. rails, spacers, rotary airlock assembly, etc.) removal, inspections, installation, and checkouts	1								*	-	-	-
7.1.1.6.13 Configure AC-130J test sets and associated equipment, inspect, maintain, and repair (MAU-12/40/50 Test Set, AN/AWM-103 Tester, proofload tester, TS-4485/AN/ALM-288 Tester, Common Aircraft Armament Tester (CAATS), Stray Volts Tester, CMBRE, ADU-890/E Test Set)	2								*	-	-	-
7.1.1.6.14 Aid fault isolation on suspension equipment, guns, or aircraft listed in AC-130J Maintenance Basic utilizing Fault Isolation TOs, wiring diagrams, or testers	2	5							*	-	-	-
7.1.1.7 **CV-22**												
7.1.1.7.1 Perform CV-22 familiarization and safe for maintenance on aircraft, equipment, and/or work center/facility	2	5							*	-	-	-
7.1.1.7.2 Explain CV-22 safety devices, cockpit switches, egress procedures, and danger areas	2								*	-	-	-
7.1.1.7.3 Utilize portable electronic data device	2								*	-	-	-
7.1.1.7.4 Explain GAU-21, handling system, and loading system operations	2								*	-	-	-

7.1.1.7.5 Execute GAU-21 and/or loading system (A/A49E-38 Ramp Mounted Weapons System (RMWS), cradle, back plate assembly, flash suppressor, etc.) disassembly, inspection, reassembly, install, removal, and checkout	1	5							*	-	-	-
7.1.1.7.6 Aid in the execution of GAU-21 safing and clearing operations	2	5							*	-	-	-
7.1.1.7.7 Configure CV-22 test sets and associated equipment, inspect, maintain, and repair (TS-4485/AN/ALM-288 Tester)	2								*	-	-	-
7.1.1.8 **HH-60** W												
7.1.1.8.1 Perform HH-60 familiarization and safe for maintenance on aircraft, equipment, and/or work center/facility	2	5							*	-	-	-
7.1.1.8.2 Explain HH-60 safety devices, cockpit switches, egress procedures, rotors turning procedures, and danger areas	2								*	-	-	-
7.1.1.8.3 Explain GAU-2 handling system, and loading system operations	2								*	-	-	-
7.1.1.8.4 Execute, GAU-2, GAU-18 and GAU-21and/or loading system (Electronic Control Unit, Gun System Control Panel, Pintle Arm Assembly, Flash Suppressor, Gun Drive Assembly, Gun Control Unit, Hand Grip, Clutch Assembly, Dillon Feed, Gun Mount, Yoke Assembly, Booster Motor Assembly, Feed Chute, Brass Chute, Back Plate, Link Ejection Chute, Mounting Arm, Cradle Assembly etc.) disassembly, inspection, repair, reassembly, install, removal and checkout	1	5							*	-	-	-
7.1.1.8.5 Aid in the execution of GAU-18 and GAU-2, GAU-21 safing and clearing operations	2	5							*	-	-	-
7.1.1.8.6 Configure HH-60 test sets and associated equipment, inspect, maintain, and repair (TS-4485/AN/ALM-288 Tester, jet washer, Generator/Rectifier In-Shop)	2	5							*	-	-	-
7.1.1.9 **MQ-9**												
7.1.1.9.1 Perform MQ-9 familiarization and safe for maintenance on aircraft, equipment, and/or work center/facility	2	5							*	-	-	-
7.1.1.9.2 Explain MQ-9 safety devices, switches, and danger areas	2								*	-	-	-
7.1.1.9.3 Explain Air munitions on MQ-9	2								*	-	-	-
7.1.1.9.4 Execute MQ-9 Outboard Pylon and BRU-71 removal, install, and checkout	1								*	-	-	-
7.1.1.9.5 Execute M299 removal, install, and checkout	2	5							*	-	-	-
7.1.1.9.6 Execute MQ-9 Outboard Pylon and BRU-71 disassembly, inspection, reassembly, and checkout	1								*	-	-	-
7.1.1.9.7 Execute M299 inspection and checks	1								*	-	-	-
7.1.1.9.8 Aid Armament Systems component removal, repair, installation, servicing, fault isolation, and check out (e.g. Keystone Module Assembly, Mission Control Module, Relay Assembly Jettison Arm, SSIU Assembly, AGM-114 Controller Module, Power Inverter, Inrush Current Limiter, Inverter Tray, etc.)	2								*	-	-	-
7.1.1.9.9 Configure MQ-9 test sets and associated equipment, inspect, maintain, and repair (AN/AWM-103 Tester)	2								*			
7.1.1.10 **B-1**												
7.1.1.10.1 Perform B-1 familiarization and safe for maintenance on aircraft, external power application, cooling air, equipment, and/or work center/facility	2	5F							*	-	-	-
7.1.1.10.2 Explain B-1 safety devices, cockpit switches, egress procedures, and danger areas	2								*	-	-	-
7.1.1.10.3 Explain Air munitions on B-1	2								*	-	-	-
7.1.1.10.4 Execute B-1 1760 Enhanced Conventional Bomb Module removal, inspections (e.g. scheduled, End of Firing Day, etc.), installation and checkout	1								*	-	-	-
7.1.1.10.5 Execute MAU-12, 14-inch Ejector Rack, 30-inch Ejector Rack removal, repair, install, and checkout (MAU-12/40/50 Test Set, CBMTS)	1								*	-	-	-

7.1.1.10.6 Execute B-1 Target Pod Pylon, Multipurpose Rotary Launcher Conventional Bomb Module, 1760 Enhanced Conventional Bomb Module disassembly, inspection, repair, reassembly, and checkout (CBMTS)	1								*	-	-	-
7.1.1.10.7 Execute MAU-12, 14-inch Ejector Rack, and 30-inch Ejector Rack disassembly, inspection, repair, assembly, and checks with MAU-12/40/50 Test Set, and weight check with Proofload Tester)	2	5B							*	-	-	-
7.1.1.10.8 Execute chaff/flare dispenser inspection, repair, and checkout (Diode Matrix Test Set)	1								*	-	-	-
7.1.1.10.9 Operate weapons bay door manually, electrically, and perform checkout	2								*	-	-	-
7.1.1.10.10 Execute Armament Systems component removal, repair, installation, fault isolation, and check out (e.g. Pilot Stores Panel, Pilot Stores Jettison Panel, Stores Management System Panel, Avionics Contro Unit, Weapons Bay, Proximity Switch, Proximity Switch Electrical Package, Launcher Drive Electrical Controller Assembly, Launcher Driver, Armament Ground Control Panel) using testing methods: operational checkout, Weapons System Ground Readiness Check, Loading PCMIA, Loading MSD, etc.	1								*	-	-	-
7.1.1.10.11 Configure B-1 test sets and associated equipment, inspect, maintain, and repair (MAU-12/40/50 Test Set, CBMTS, Junction Box Ejector Rack Test Set, RLDS Test Set, Proximity Switch Test Set, Weapons Bay Door/Spoiler Test Set, AN/GYQ-79 (CMBRE), ADU-890/E Test Set, proofload tester, Diode Matrix Unit Test Set, etc.)	2								*	-	-	-
7.1.1.10.12 Perform MHU-196 operations with launcher loader adapter, MPRL, etc.	2								*	-	-	-
7.1.1.11 **B-2**												
7.1.1.11.1 Perform B-2 familiarization, low observable awareness, and safe for maintenance on aircraft, external power application, equipment, and/or work center/facility	2	5F							*	-	-	-
7.1.1.11.2 Explain B-2 safety devices, weapons bay door operation, cockpit switches, egress procedures, and danger areas	2								*	-	-	-
7.1.1.11.3 Explain Nuclear Enable System, operation of Weapons Bay Doors, application of cooling air, MMS Command Disable System Recode Procedures	2								*	-	-	-
7.1.1.11.4 Explain Air munitions on B-2	2								*	-	-	-
7.1.1.11.5 Execute B-2 suspension equipment (e.g. Smart Bomb Rack Assembly (SBRA), Rotary Launcher Adapter (RLA), Monitor and Control Equipment (MACE), Carriage and Release Equipment (CARE), (e.g. scheduled, End of Firing Day, etc.) removal, repair, installation, and checkout (e.g. operational checkout, COLT, BIT, etc.)	2	5F							*	-	-	-
7.1.1.11.6 Execute BRU-44 Bomb Rack and/or components removal, repair, install, and checkout (MAU-12/40/50 Test Set, COLT)	1								*	-	-	-
7.1.1.11.7 Execute B-2 suspension equipment (e.g. Smart Bomb Rack Assembly (SBRA), Rotary Launcher Adapter (RLA), Monitor and Control Equipment (MACE), Carriage and Release Equipment (CARE), (e.g. scheduled, End of Firing Day, etc.) disassembly, inspection, repair, reconfiguration, reassembly, and checkout (e.g. operational checkout, COLT, BIT, etc.)	1								*	-	-	-
7.1.1.11.8 Execute BRU-44 Bomb Rack and/or components disassembly, inspection, repair, assembly, and checks with MAU-12/40/50 Test Set, COLT, and weight check with Proofload Tester)	2	5B							*	-	-	-
7.1.1.11.9 Explain RLA configurations and components (e.g. Nuclear Weapons Control Monitor, Missile Status Relay Assembly, Transformer Rectifier Unit, Bomb Status Relay Assembly, Ejector Relay, Twist Cable, etc.)	2								*	-	-	-

7.1.1.11.10 Execute Armament Systems component removal, repair, installation, fault isolation, and check out (e.g. Ground Control Panel, Consent/Arm Panel, Jettison Enable Panel, Manual Weapons Release Panel, Weapons Door Safe Lock Control, Forward Clip-In Fitting, PDU, PDU Flex Shaft, Aft Clip-In Fitting, RLA Torque Limiters, Fwd/Aft Control Box, etc.) using testing methods: operational checkout, Component Prefunctional Continuity and Isolation Check, etc.	1								*	-	-	-
7.1.1.11.11 Configure B-2 test sets and associated equipment, inspect, maintain, and repair (MAU-12/40/50 Test Set, Bonding Meter T477W, Stores Management System Test Set, Tension Resistance Meter, COLT, Accessory Kit, B-2 Test Programmable Set (TPS), Separation Nut Simulator, proofload tester, etc.)	2								*	-	-	-
7.1.1.11.12 Perform MHU-204 operations with launcher loader adapter, RLA, etc.	2								*	-	-	-
7.1.1.12 **B-52**												
7.1.1.12.1 Perform B-52 familiarization and safe for maintenance on aircraft, external power application, equipment, and/or work center/facility	2	5F							*	-	-	-
7.1.1.12.2 Explain B-52 safety devices, weapons bay door operation, cockpit switches, egress procedures, and danger areas	2								*	-	-	-
7.1.1.12.3 Explain Air munitions on B-52	2								*	-	-	-
7.1.1.12.4 Execute B-52 suspension equipment (e.g. Heavy Stores Adapter Beam (HSAB), Conventional Rotary Launcher (CRL), Cluster Bomb Rack (CBR), Launcher Yokes, PDU, Common Strategic Rotary Launcher (CSRL), ALE-25 Pylon, LAU-105, Laser Pod Pylon, etc.) removal, inspection, repair, installation, and checkout (e.g. operational checkout, Multi-Use Systems Tester Armament Next Generation (MUSTANG), detent tester, etc.)	1								*	-	-	-
7.1.1.12.5 Execute A-6 Bomb Release Unit, B-11 Bomb Shackle, MAU-12 Bomb Rack and/or components removal, repair, install, and checkout (MAU-12/40/50 Test Set, MUSTANG, etc.)	1								*	-	-	-
7.1.1.12.6 Execute B-52 suspension equipment (e.g. Heavy Stores Adapter Beam (HSAB), Conventional Rotary Launcher (CRL), Cluster Bomb Rack (CBR), Launcher Yokes, PDU, Common Strategic Rotary Launcher (CSRL), ALE-25 Pylon, LAU-105, Laser Pod Pylon, etc.) disassembly, inspection, repair, reconfiguration, reassembly, and checkout (e.g. operational checkout, MUSTANG, detent tester, etc.)	1								*	-	-	-
7.1.1.12.7 Execute A-6 Bomb Release Unit, B-11 Bomb Shackle, MAU-12 Bomb Rack, LAU-105 and/or components disassembly, inspection, repair, assembly, and checks with MAU-12/40/50 Test Set, MUSTANG, detent tester, and weight check with Proofload Tester)	2	5B							*	-	-	-
7.1.1.12.8 Execute Armament Systems component removal, repair, installation, fault isolation, and check out (e.g. Digital Bomb Release Interval Control (D-BRIC), Weapons Control Panel, Missile Consent Panel, Conventional Weapons Relay and Control Panel, Jettison Time Delay Relay Panel, etc.) using testing methods: operational checkout, Coded Switch System operation, etc.	1								*	-	-	-
7.1.1.12.9 Configure B-52 test sets and associated equipment, inspect, maintain, and repair (MAU-12/40/50 Test Set, MUSTANG, Conventional Weapons Relay Panel Test, DBRIC Interval Timer Test Set, proofload tester, etc.)	2								*	-	-	-
7.1.1.12.10 Perform MHU-196/LLS operations with launcher loader adapter, CSRL, etc.	2								*	-	-	-
7.1.2. Maintenance (Intermediate) **Required Behaviors:** 1) Lead and execute maintenance and repair procedures for on and off equipment 2) Applies acquired knowledge, utilizes theory of operation, and problem solving techniques to resolve maintenance discrepancies **Criteria:**												

Impact on… Specific workplace projects												
7.1.2.1. A-10												
7.1.2.1.1 Leads crew and/or subordinates in functions accomplished on A-10 Maintenance Basic	1								*	-	-	-
7.1.2.1.2 Executes fault isolation on suspension equipment, guns, or aircraft listed in A-10 Maintenance Basic utilizing Fault Isolation TOs, wiring diagrams, or testers	2	7							*	-	-	-
7.1.2.2 F-15												
7.1.2.2.1 Leads crew and/or subordinates in functions accomplished on F-15 Maintenance Basic	1								*	-	-	-
7.1.2.2.2 Executes fault isolation on suspension equipment, guns, or aircraft listed in F-15 Maintenance Basic utilizing Fault Isolation TOs, wiring diagrams, or testers	2	7							*	-	-	-
7.1.2.3. F-16												
7.1.2.3.1 Leads crew and/or subordinates in functions accomplished on F-16 Maintenance Basic	1								*	-	-	-
7.1.2.3.2 Executes fault isolation on suspension equipment, guns, or aircraft listed in F-16 Maintenance Basic utilizing Fault Isolation TOs, wiring diagrams, or testers	2	7							*	-	-	-
7.1.2.4. F-22												
7.1.2.4.1 Leads crew and/or subordinates in functions accomplished on F-22 Maintenance Basic	1								*	-	-	-
7.1.2.4.1 Executes fault isolation on suspension equipment, guns, or aircraft listed in F-22 Maintenance Basic utilizing Fault Isolation TOs, wiring diagrams, or testers	2	7							*	-	-	-
7.1.2.5. F-35												
7.1.2.5.1 Leads crew and/or subordinates in functions accomplished on F-35 Maintenance Basic	1								*	-	-	-
7.1.2.5.2 Executes fault isolation on suspension equipment, guns, or aircraft listed in F-35 Maintenance Basic utilizing Fault Isolation TOs, wiring diagrams, or testers	2	7							*	-	-	-
7.1.2.6. AC-130J												
7.1.2.6.1 Leads crew and/or subordinates in functions accomplished on AC-130J Maintenance Basic	1								*	-	-	-
7.1.2.6.2 Executes fault isolation on suspension equipment, guns, or aircraft listed in AC-130J Maintenance Basic utilizing Fault Isolation TOs, wiring diagrams, or testers	2	7							*	-	-	-
7.1.2.7. CV-22												
7.1.2.7.1 Leads crew and/or subordinates in functions accomplished on CV-22 Maintenance Basic	1								*	-	-	-
7.1.2.7.2 Executes fault isolation on suspension equipment, guns, or aircraft listed in CV-22 Maintenance Basic utilizing Fault Isolation TOs, wiring diagrams, or testers	2	7							*	-	-	-
7.1.2.8. HH-60W												
7.1.2.8.1 Leads crew and/or subordinates in functions accomplished on HH-60 Maintenance Basic	1								*	-	-	-
7.1.2.8.2 Executes fault isolation on suspension equipment, guns, or aircraft listed in HH-60 Maintenance Basic utilizing Fault Isolation TOs, wiring diagrams, or testers	2	7							*	-	-	-
7.1.2.9. MQ-9												
7.1.2.9.1 Leads crew and/or subordinates in functions accomplished on MQ-9 Maintenance Basic	1								*	-	-	-
7.1.2.9.2 Executes fault isolation on suspension equipment, guns, or aircraft listed in MQ-9 Maintenance Basic utilizing Fault Isolation TOs, wiring diagrams, or testers	2	7							*	-	-	-
7.1.2.10. B-1												
7.1.2.10.1 Leads crew and/or subordinates in functions accomplished on B-1 Maintenance Basic	1								*	-	-	-
7.1.2.10.2 Executes fault isolation on suspension equipment, guns, or aircraft listed in B-1 Maintenance Basic utilizing Fault Isolation TOs, wiring diagrams, or testers	2	7							*	-	-	-
7.1.2.11. B-2												

7.1.2.11.1 Leads crew and/or subordinates in functions accomplished on B-2 Maintenance Basic	1								*	-	-	-
7.1.2.11.2 Executes fault isolation on suspension equipment, guns, or aircraft listed in B-2 Maintenance Basic utilizing Fault Isolation TOs, wiring diagrams, or testers	2	7							*	-	-	-
7.1.2.12. B-52												
7.1.2.12.1 Leads crew and/or subordinates in functions accomplished on B-52 Maintenance Basic	1								*	-	-	-
7.1.2.12.2 Executes fault isolation on suspension equipment, guns, or aircraft listed in B-52 Maintenance Basic utilizing Fault Isolation TOs, wiring diagrams, or testers	2	7							*	-	-	-
