Pages: 115

This instruction implements Department of the Air Force Policy Directive (DAFPD) 32-90, *Real Property Asset Management* and Executive Order (E.O.) 13327, *Federal Real Property Asset Management*. The purpose of this instruction is to provide guidance for maintaining real property records and reporting real property assets according to Department of the Air Force (DAF) and Department of Defense (DoD) issued policies, guidance and procedures. This instruction applies to the Regular Air Force (Reg AF), United States Space Force (USSF), Air Force Reserve Command (AFRC), and Air National Guard (ANG). This publication may be supplemented at any level, but all supplements must be routed to the office of primary responsibility (OPR) for coordination prior to certification and approval. The authorities to waive wing, unit, delta, or garrison level requirements in this publication are identified with a Tier ("**T-0**, **T-1**, **T-2**, **T-3**") number following the compliance statement. Submit requests for waivers through the chain of command to the appropriate Tier waiver approval authority, or alternately, to the publication OPR for non-tiered compliance items. See Department of the Air Force Manual (DAFMAN) 90-161 *Publishing Processes and Procedures*, for a description of the authorities associated with the Tier numbers. Submit requests for waivers through the chain of command to the appropriate Tier waiver approval authority, or alternately, to the requestor's commander for non-tiered compliance items. Refer recommended changes and questions about this publication to OPR using the DAF Form 847, *Recommendation for Change of Publication*; route DAF Forms 847 from the field through the appropriate functional chain of command. Ensure all records generated as a result of processes prescribed in this publication adhere to Air Force Instruction 33-322, Records Management and

Information Governance Program, and are disposed in accordance with the Air Force Records Disposition Schedule, which is located in the Air Force Records Information Management System.

Compliance with the attachments in this publication is mandatory. The use of the name or mark of any specific manufacturer, commercial product, commodity or service in this publication does not imply endorsement by the DAF.

SUMMARY OF CHANGES

This document includes substantial revisions and requires a complete review, as the document has been re-structured to improve the overall flow of the content and to enhance installation effectiveness. Key revisions involve the restructuring of Air Force Civil Engineer Center (AFCEC) and Air Force Installation and Mission Support Center (AFIMSC), the incorporation of the Footprint Growth Offset Policy, and expanded roles and responsibilities for real property accountability. The updates more effectively integrate United States Air Forces in Europe (USAFE)/United States Africa Command (AFAFRICA), USSF, AFRC, and ANG equivalent terminology where relevant; change to Facilities Board approval and notification procedures; and mandate the use of NexGen IT to ensure Financial Improvement and Audit Remediation (FIAR) compliance. Additionally, the updates include a table with Real Property Asset (RPA) Operational Status Codes (OSCs) and earned sustainment percentages; enhanced guidance on OSCs for Landfill Management; clarification of procedures for maintaining Facility and Grant Folders, including the mandatory naming convention for Key Supporting Documents (KSDs) uploaded to the Accountable Property System of Record (APSR); a revision of processes related to Real Property Inventories and Reporting aligned with FIAR Principles; and updated guidance on Privatized and Privately Owned Assets on DAF Property. The document also adds, and revises terms, removes the Real Property Installed Equipment (RPIE) example list, and now includes new attachments: standardized naming conventions for Real Property and Real Estate KSDs and Transactions, KSD Checklists, and instructions for AF Form 123, *Request for Changed Use of Real Property*, and DAF Form 1192, *USAF Installations Characteristics Report*.

Chapter 1—OVERVIEW **6**

Chapter 1

OVERVIEW

1.1. Purpose. This DAFI assigns responsibilities and prescribed procedures for:

1.1.1. Requirements to record fiscal, physical, legal, environmental, and geospatial information on real property (RP) assets to which the DAF has a legal interest. Data from real property inventories (RPI) and Accountable Property System of Record (APSR) are the basis for current sustainment and future capital investments. Physical verification can be derived from surveyed as-built drawings to facilitate accurate real property and geospatial information reconciliation. **(T-0)**

1.1.2. Submitting appropriate reporting data from DAF APSR to the DoD RPI systems, i.e., Data Analytics & Integration Support (DAIS). The data is then aggregated in the DAIS platform and submitted as the DoD Real Property Asset Database (RPAD). **(T-0)**

1.1.3. Requirements to ensure and sustain financial auditability of DAF real property physical records, APSR inventory, and financial reporting. Real property used by the DAF will be reported on the annual DAF financial statement. **(T-0)**

1.1.4. DAF real property management to promote the most efficient and economic use of DAF real property assets and to ensure accountability for implementing federal and DoD real property reforms. **(T-0)**

1.2. Applicability. This instruction applies to real property owned, leased, or otherwise acquired by DAF or other federal entities and under custody, control, or utilization of the DAF. This includes, but is not limited to, Joint Bases, DAF utilized enduring locations, DAF utilized semi-permanent contingency locations, and initial and temporary contingency locations. This also includes non-possessory Readiness and Environmental Protection Integration (REPI) program easements. **(T-0)**

1.2.1. The provisions of this instruction apply to all DAF real property in which the DAF, on behalf of the United States, acquires, holds, or retains as a real estate interest under the law or international agreement except:

1.2.1.1. For the acquisition and management of defense industrial plants governed by DoD Directive 4275.5, *Acquisition and Management of Industrial Resources*.

1.2.1.2. Except for the reporting requirements outlined in this instruction, all other provisions do not apply to civil works projects. **(T-0)**

1.2.1.3. As stated in Host-Tenant support agreement, tenant is responsible for installed equipment. **(T-1)**

1.2.2. Real property held for administrative accountability for the DAF is governed by this instruction. The DAF APSR is the authoritative source for the RPI, substantiated by the KSDs in the facility file folder. **(T-0)**

Chapter 2

ROLES AND RESPONSIBILITIES

2.1. Assistant Secretary of the Air Force for Energy, Installations and Environment (SAF/IE).

2.1.1. Responsible for the formulation, review, and execution of plans, policies, programs and budgets for installations, environment, safety, infrastructure, and energy. **(T-0)**

2.1.2. Has overall responsibility and oversight of DAF-controlled real property. **(T-0)**

2.1.3. Deputy Assistant Secretary of the Air Force for Infrastructure, Energy, and Environment (SAF/IEE). Provides overall guidance and direction for all DAF real property life-cycle management, military construction, and environment. **(T-0)**

2.1.4. Deputy Assistant Secretary of the Air Force Installations (SAF/IEI).

2.1.4.1. Responsible for all real property transactional activity, acquisition (to include withdrawal of public lands), temporary use and disposal of DAF real property, privatization, or similar initiatives. **(T-1)**

2.1.4.2. Provides DAF real property policy, approval, and oversight guidance as delegated by SAF/IE. **(T-1)**

2.1.4.3. Issues guidance and approvals for transactions involving market-based value determinations and the best needs of the Federal government. **(T-1)**

2.2. Assistant Secretary of Air Force for Financial Management and Comptroller (SAF/FM).

2.2.1. Responsible for financial statement reporting for all real property the DAF utilizes in accomplishment of its mission including reconciliation of General Ledger to APSR cost and value data, recording of Journal Vouchers (JV) to correct General Ledger values, and validation of internal controls through coordination with Air Force Asset Management Division (AF/A4CA) and Air Force Civil Engineer Center (AFCEC). **(T-0)**

2.2.2. Coordinate with the Assistant Secretary of the Air Force for Acquisition, Technology, and Logistics (SAF/AQ) to record the value of the DAF industrial facilities. **(T-0)**

2.2.3. Coordinate with SAF/AQ on the execution of FIAR compliance requirements. **(T-1)**

2.3. The Assistant Secretary of the Air Force for Acquisition, Technology, and Logistics (SAF/AQ).

2.3.1. Responsible for management of, and policy related to, the Industrial Preparedness Program (IPP) and industrial resources in accordance with DoDD 4275.5, HAFMD 1-10, *Assistant Secretary of the Air Force (Acquisition),* and DAFI 63-101/20-101, *Integrated Life Cycle Management*. **(T-0).** When SAF/AQ is identified as the DAF lead for a particular activity, SAF/SQ is responsible for providing space-focused input and coordination to SAF/AQ, to maximize efficiencies in activities common to both organizations, consistent with this mission directive and HAFMD1-10. Reference HAFMD 1-17.

2.3.2. Responsible for oversight and execution of current and future FIAR compliance requirements. **(T-0)**

2.3.3. SAF/FM, AF/A4CA, and Deputy Assistant Secretary of the Air Force for Acquisition Integration (SAF/AQX), will ensure the DAF industrial facilities are accurately recorded in the real property APSR and the value of these assets, integrated with the broader DAF RP inventory, will contribute to the total value reported in the DAF's annual Financial Statement.

2.4. Air Force Director of Civil Engineers (AF/A4C).

2.4.1. Responsible for development of strategy and policy, oversight, Congressional engagement and resource advocacy for the DAF enterprise infrastructure including DAF owned/controlled real property. **(T-0)**

2.4.2. Coordinate with Installation and Mission Support Division of the Space Staff (SF/S4OI) for development of strategy, policy, and guidance for USSF specific real property equities. SF/S4OI will identify mission related impacts and requirements to AF/A4C. **(T-0)**

2.4.3. Coordinate with SAF/AQ for APSR and FIAR compliance. **(T-0)**

2.4.4. Plans, programs, execute real property requirements and geospatial data which include projects for new facility construction and demolition of existing facilities, necessary for performance of the DAF mission. **(T-0)**

2.4.5. Serves as the approval authority for RPIE determinations that, as needed, are presented to the Civil Engineer (CE) Board through the Civil Engineer Enterprise Governance (CEEG) structure, reference Department of the Air Force Pamphlet (DAFPAM) 32-1000, *Civil Engineer Enterprise Governance*. **(T-0)**

2.4.6. Air Force Asset Management Division (AF/A4CA).

2.4.6.1. Serves as the Senior DAF Real Property Manager. The division consults on internal and external real property accountability and RPI data requirements. **(T-0)**

2.4.6.2. Develops policy and guidance, accountability metrics/measures and facilitates compliance with applicable real property accountability laws, directives, and instructions. **(T-0)**

2.4.6.3. Reports the Future Years Defense Program (FYDP) including the forecasted amount of new construction and correlating geospatial information (planning dataset titled Future Projects), other acquisitions, disposals, transfers, and real property assets. **(T-1)**

2.4.6.4. Serves as the signature authority for RPIE determinations. **(T-1)**

2.4.6.5. Provides strategy, guidance, oversight, and implementation guidance to ensure the DAF RPI is accurate and financially auditable. **(T-1)**

2.4.6.6. Facilitates the Military Departments (MILDEPs), Washington Headquarters Services (WHS), and federal agency reconciliation process to ensure that any tenant occupying, operating, or maintaining any real property asset reconciles, at least annually, as described in DoDI 4165.14. Facilitates reconciliation efforts with applicable points of contact from AF/A4CA, Air Force Civil Engineer Center/Real Property Transactions (AFCEC/CIT), Installation Real Property Accountable Officer (RPAO) and outside agencies to make necessary corrections. **(T-0)**

2.4.6.7. Develops policy and strategy and provides oversight of real property accountability for contingency locations. **(T-1)**

2.4.6.8. Serves as the DAF representative and advocate to the Office of the Secretary of Defense (OSD) Real Property Categorization Panel (RPCP) meetings. **(T-1)**

2.4.6.9. Reports the DAF RPI to the Office of the Assistant Secretary of Defense (ASD) for Energy, Installations, and Environment (EI&I). Reports RPI guidance prescribed and as required, including changes resulting from periodic physical inventories and reconciliations (internal and external). **(T-0)**

2.4.6.10. Reports the DAF RPI and forecasted RPI, as of September 30 of each year, to the OASD (EI&E) Real Property, in accordance with the reporting information and schedule prescribed by OASD (EI&E) RPI guidance and the data format. **(T-0)** See the OASD (EI&E) website, accessible by DoD Common Access Card at **OASD (EI&I) Real Property & Infrastructure Data**.

2.4.6.11. Compiles and submits Real Property Deferred Maintenance and Repair (DM&R) Report. Deferred Maintenance and Repair, as defined in the *Federal Accounting Standards Advisory Board (FASAB) Handbook of Federal Accounting Standards and Other Pronouncements*, as Amended (FASAB Handbook), *Statement of Federal Financial Accounting Standards 42, Deferred Maintenance and Repairs: Amending Statements of Federal Financial Accounting Standards 6, 14, 29 and 32*. **(T-0)**

2.5. Major Commands (MAJCOM).

2.5.1. Air Force Materiel Command (AFMC). AFMC, through the AFIMSC and the AFCEC will serve as OPR and implement this DAFI, allocate resources, and oversee execution of real property programs throughout the DAF. **(T-1)**. This will include the following:

2.5.2. Air Force Installation and Mission Support Center (AFIMSC).

2.5.2.1. Serves as the single intermediate-level organization providing installation and mission support oversight and capabilities to United States Space Force (USSF), Major Commands (MAJCOM)/Direct Reporting Unit (DRU) and their subordinate organizations and installations. **(T-1)**

2.5.2.2. AFIMSC Detachments serve as the conduit between AFIMSC, supporting USSF, MAJCOMs/DRU, and assigned installations. **Exception:** United States Air Force Academy (USAFA). **(T-1)**

2.5.3. Air Force Life Cycle Management Center (AFLCMC).

2.5.3.1. The Engineering Directorate (AFLCMC/EN-EZV) functions as the OPR for planning, programming, budgeting, and the operation of industrial facilities. **(T-0)**

2.5.3.2. AFLCMC/EN-EZV in coordination with SAF/AQX, conducts, validates, and documents E&C on DAF owned industrial facilities. **(T-0)**

2.5.3.2.1. Conduct, validate, and document an annual Existence and Completeness (E&C), as directed by the Secretary of Defense (SecDef) of DAF owned, leased, or controlled buildings, structures, and linear structures to ensure 100 percent reconciliation of assets in the APSR and with the Installation Geospatial Information Office (IGIO). **(T-0)**

2.5.3.2.2. The E&C processes and procedures will align with the E&C Standard Operating Procedure (SOP) established annually by AFCEC/CI. **(T-1)**

2.5.3.2.3. Ensure proper accountability and accuracy of DAF-owned assets in the APSR with corresponding KSDs to support the annual DAF Financial Statement. **(T-0)**

2.5.4. Air Force Civil Engineer Center (AFCEC).

2.5.4.1. Issues guidance for specific programs, procedures, data table structures, and formats that DAF installations must use for submissions of the DAF enterprise RPI data and geospatial information. **(T-2)** This RPI is subsequently submitted annually to AF/A4CA. **(T-1)**

2.5.4.2. Provides installation and site level support for policy clarification. For policy clarification that cannot be resolved at AFCEC, a complete report with recommendation will be generated and sent to AF/A4CA for final adjudication. **(T-1)**

2.5.4.3. Ensures accountability that the placed-in-service DAF RPI is complete and accurate. **(T-1)** A complete RPI consists of all sites, including all land, buildings, structures, and linear structures, for which the DAF has real property accountability, regardless of the organization using or funding the facility or land. **(T-0)**

2.5.4.4. Engages with the National Guard Bureau (NGB) for matters dealing with ANG and the ANG installations and sites. **(T-1)**

2.5.4.5. Serves as a liaison with the AFRC office for all issues related to the AFRC, Reserve Command installations, and associated sites. **(T-1)**

2.5.4.6. Works with the SF/S4OI for matters pertaining to USSF installations and sites. **(T-1)**

2.5.4.7. Verifies all grants (both ingrants and outgrants) are accurately recorded and documented in APSR. **(T-0)**

2.5.4.8. Validates the accuracy of all RPI data included in the annual submission to AF/A4C. **(T-1)** Includes changes resulting from the periodic physical inventories and reconciliations with Defense agencies, DoD Field Activities and Government Owned, Contractor Operated (GOCO) facilities. **(T-0)**

2.5.4.9. Assists AF/A4C in responding to requests for information, data calls and financial audit inquiries related to real property management. **(T-1)**

2.5.4.10. Provides training, guidance, management and execution oversight for real property accountability and audit readiness. **(T-2)**

2.5.4.11. Ensure DAF real property IT business systems comply with the DoD Business Enterprise Architecture and the Real Property Information Model (RPIM) which specifies metadata and business rules for RPI. Also ensures applicable requirements documents and systems are appropriately funded to efficiently implement and sustain the DAF RPI. **(T-0)**

2.5.4.12. Maintains the accuracy of the real property unique identifier (RPUID) via the DAIS system. This ensures real time data updates to APSR accurately reflect the APSR values, as they exist in the DAF authoritative APSR. **(T-0)**

2.5.4.13. Ensure any federal component or agency that occupies, operates, or maintains any real property asset reconciles, annually or as changes occur, the component RPI with the appropriate supporting DAF installation RPAO. **(T-0)**

2.5.4.14. Issues instrument numbers. The instrument number is a unique identifier to be placed in the APSR to keep an accurate record of an instrument's lifetime. All instrument numbers are tied to an accountable record for financial data, grantee information and legal accountability for government usage. **(T-1)**

2.5.4.15. Provides quarterly APSR extract to AF/A4CA to compile the Real Property DM&R Report. **(T-1)**

2.5.4.16. Air Force Civil Engineer Center Environmental Management Directorate (AFCEC/CZ) compiles Buildings, Structures, and Archaeological Sites portions of the Heritage Asset Data Report for submission to AF/A4CA. **(T-1)**

2.5.4.17. AFCEC/CI compiles Stewardship of Lands Report for submission to AF/A4CA. **(T-1)**

2.5.4.18. AFCEC/CB employ DAF GeoBase Standard Services and Capabilities as mandated systems of record, i.e., for linear segmentation infrastructure data and analysis, per DAFI 32-1001, *Civil Engineer Operations,* and as FIAR inputs for linear structures comparisons and assessments with real property inventories.

2.5.5. United States Space Force (USSF). SF/S4OI works with AF/A4CA and AFCEC on real property matters and endorsement pertaining to USSF installations consistent with 10 May 2021 Memorandum of Understanding between USAF and USSF, *Air Force Support to Space Installations and Missions, Standard Operating Procedures for SAF/IE and SF/COO, and Standard Operating Procedures for AF/A4 and SF/COO.* **(T-1)**

2.5.6. Air Force Reserve Command (AFRC). AFRC acts as both a headquarters (HQ) and a MAJCOM and serves as a channel of communication between the DAF, AFCEC, and the Reserve installations. **(T-1)**

2.5.6.1. AFRC HQ transmits RP guidelines and instructions from HAF and other authorities to the Reserve staff and monitors adherence to the guidelines and instructions. **(T-2)**

2.5.6.1.1. AFRC/A4CA will receive prioritized lists from AFCEC/CI and distribute accordingly to Reserve installations. **(T-2)**

2.5.6.1.2. For any issues or concerns regarding RP Key Supporting Documentation (KSD) or grant opportunities at reserve installations, HQ AFRC/A4CA will collaborate with AFCEC/CI to obtain any guidance or exemptions to policy. **(T-2)**

2.5.6.2. Existence and Completeness (E&C) Testing and Oversight. **(T-1)**

2.5.6.2.1. AFRC HQ will compile, and review Command-and-Control (C&C) workbook prepared and sent from Reserve installations prior to the completion date established. AFRC HQ will submit to AFCEC. **(T-1)**

2.5.6.2.1.1. AFRC HQ implements testing, scoring, and grading to Reserve installations and provides recommendations to AFCEC based on testing results. **(T-1)**

2.5.6.2.2. HQ AFRC/A4CA will provide E&C findings to the AFCEC/CITA Workflow recorded on the C&C workbook. **(T-1)**

2.5.6.3. AFRC Real Property Office (RPO) and RPAO training requirements:

2.5.6.3.1. Will complete Real Property Basic course online and attend AFIT Real Property Management Course (WMGT 424) upon initial hire. **(T-1)**

2.5.6.3.2. Will attend the AFCEC Advanced Realty Course, if applicable, and the Worldwide Symposium (biennial) as part of the real estate and real property formal training that is required. **(T-2)**

2.5.6.3.3. AFRC RPOs will hold bi-annual training for the AFR installations RPOs/RPAOs and their joint ANG counter parts. **(T-1)** All AFRC RPOs/RPAOs will recertify their real property formal training during these classes. **(T-2)**

2.5.7. NGB/ANG. The National Guard Bureau acts as both a HQ and MAJCOM and serves as a channel of communication between the DAF, ANG, and the states that the ANG holds interests. NGB provides resources and governs how those resources are to be used. **(T-1)**

2.5.7.1. Within the ANG, appointment of the financial audit action point of contact will be accomplished by states or territory's United States Property and Fiscal Officers (USPFO). **(T-1)** The USPFO may delegate this role to the BCE or Deputy BCE (DBCE).

2.5.7.2. United States Property and Fiscal Officers (USPFO).

2.5.7.2.1. The USPFO for the ANG will be appointed per Chief of the National Guard Bureau Instruction (CNGBI) 9501, 01, *National Guard Bureau United States Property and Fiscal Officer Program*, 8 Jul 21, guidance. **(T-1)**

2.5.7.2.2. The USPFO, when serving in a full-time, federal status pursuant to Title 10 United States Code (USC), serves as an RPAO and can appoint an Assistant USPFO for real property. The appointed Assistant USPFO is accountable to the USPFO for fiscal, property, and real property matters. **Note:** Delegations must be reestablished upon personnel changes. Appointed Assistant USPFO and Real Property Managers (RPMs) are required to attend the ANG Real Property course every two years. **(T-0)**

2.5.7.2.3. The USPFO, or Assistant USPFO, supervises accountability of the states for federal property issued to Air National Guard. The USPFO also addresses official audit reports to mitigate identified deficiencies. Reference 32 USC § 708 and DoDI 1200.18, *The United States Property and Fiscal Officer Program.* **(T-0)**

2.5.7.2.4. USPFO, or Assistant USPFO, for ANG must annually assert that all installations and sites under their jurisdiction and control, including tenant organizations, and real estate instruments, are correctly entered into the APSR upon execution. **(T-1)**

2.5.7.2.5. USPFO, or Assistant USPFO, for ANG, in consultation with the governing post office, will ensure occupied buildings have a street address assigned and entered in the APSR. **(T-1)**

2.5.7.3. NGB will consolidate each of the installations assertion memos and provide one FIAR letter for all installations. **(T-1)**

2.5.7.3.1. NGB transmits RP guidelines and instructions from HQ AF and other authorities to the Guard staff and monitors adherence to the guidelines and instructions. **(T-0)**

2.5.7.3.1.1. NGB will receive prioritized lists from AFCEC/CI and distribute accordingly to Guard installations. **(T-2)**

2.5.7.3.1.2. For any issues or concerns regarding RP accountability or RP instruments at Guard installations, NGB will collaborate with AFCEC/CI to obtain any guidance or exemptions to policy. **(T-1)**

2.5.7.3.2. E&C Testing and Oversight. **(T-2)**

2.5.7.3.2.1. NGB will compile, and review C&C workbook prepared and sent from Guard installations prior to the completion date established. NGB will submit to AFCEC. **(T-2)**

2.5.7.3.2.2. NGB will provide E&C findings to the AFCEC/CITA Workflow recorded on the C&C workbook. **(T-2)**

2.6. Installation Commander.

2.6.1. Maintains overall responsibility for the efficient and effective use of installation real property and will designate an installation RPAO by appointment letter to oversee the integrity of the installation APSR as described in DoDI 4165.14. See **Attachment 2. (T-0)**

2.6.1.1. The appointed installation RPAO must meet the following criteria in accordance with DoDI 4165.14 **(T-0)**:

2.6.1.1.1. Must be a United States citizen, federal civilian employee, the Base Civil Engineer, a commissioned officer, or a noncommissioned officer and will not be a contractor. **(T-0)**

2.6.1.1.2. May be appointed for one or more installations. **(T-1)**

2.6.1.1.3. Will be appointed at a subordinate site if the subordinate site maintains its own records. **(T-1)**

2.6.2. Installation Commander roles and responsibilities in ANG are retained by the Wing/CC, or Assistant Deputy Wing/CC. **(T-1)**

2.7. Base Civil Engineer (BCE).

2.7.1. Ensures CE compliance with all DoD policy, guidance, and priorities. **(T-1)**

2.7.2. Manages resources to guarantee CE compliance with applicable governance to ensure accurate APSR and the rights and obligations of all real property agreements associated with the installation. **(T-1)**

2.7.3. Certify the RPO conducts an annual inspection for the E&C of the RPI and ensures reconciliation with the IGIO. ANG installations will ensure reconciliation with ANG Readiness Center NGB/A4FI. **(T-1)** The BCE will ensure APSR updates occur within 30 days of the inspection and that an assertion memorandum is signed by the Installation Commander. **(T-1)** Ensures Facilities Board is briefed on results of the annual inspection.

2.7.4. The BCE will sign, or delegate in writing, an appropriate approval authority for all Defense Department (DD) Form 1354, *Transfer and Acceptance of DoD Real Property*, as the accepting or transferring official for the DoD. **(T-0)** The RPAO will not be a designated authority to sign the DD Form 1354 if they are responsible for entering the data into the APSR. **(T-1)** The designated appointee will sign construction acceptance documents from Defense Construction Agents (DCAs) for capital improvement projects. **(T-1)** Transfers of property within the DoD will be signed by the individual with appropriate delegation of authority. **(T-1)**

2.7.4.1. ANG BCEs cannot delegate the approval authority of the DD Form 1354. **(T-0)** USPFO, or Assistant USPFO and/or RPM will not be a designated authority to sign the DD Form 1354 if they are responsible for entering the data into the APSR. **(T-1)**

2.7.4.2. For installations located outside of the United States or its territories, the Construction Agent (CA) can be the Host Nation or North Atlantic Treaty Organization (NATO). **(T-0)**

2.7.5. Ensures training, guidance, and oversight of real property office, and personnel responsible for relevant RP financial reporting and audit actions and ensures DD Form 1354 is provided to the RPO on placed-in-service date (PISD). **(T-2)**

2.7.6. The BCE will ensure the facility change in use are documented on AF Form 123, *Request for Changed Use of Real Property*, and in accordance with the procedures listed in **Chapter 3**. An AF Form 123 may be signed by the RPAO if the BCE has provided written authority, and the change being made is within the same Facility Analysis Category (FAC) Code. Refer to **Attachment 5** for AF Form 123 Instructions. **(T-1)**

2.7.7. The BCE will appoint a FIAR Lead, in writing, for the group or squadron, or delta/installation. **(T-1)** The individual will possess sufficient experience (GS-12 or above, commissioned officer, or senior noncommissioned officer) and authority to direct real property financial audit compliance actions within all CE flights. **(T-1)** The installation RPAO will not be appointed as the FIAR Lead. **(T-1)** Within the ANG, appointment of the FIAR Lead will be accomplished by the State's or Territory's USPFO or a USPFO delegated appointee. **(T-2)**

2.7.8. ANG BCEs need a delegation memo from USPFO, or Assistant USPFO to cover the duties listed in this section. **(T-2)**

2.7.9. Real Property Accountable Officer (RPAO).

2.7.9.1. Individual appointed by the Installation commander, on behalf of the DAF, that is responsible for the accuracy, maintenance, and physical accountability of the RPI for the installation or site assigned. **(T-1)**

2.7.9.2. Ensures all real property transactions are auditable by implementing and adhering to internal controls for operations, reporting and compliance. **(T-1)**

2.7.9.3. The RPO is responsible for entering the correct customer code assignment in NexGen IT. The Civil Engineer Financial Manager (CE FM) is responsible for identifying the appropriate fund code for the tenant based upon the approved Host Tenant Support Agreement. RPO will notify the CE FM if an asset is identified as potentially being omitted from the Host Tenant Support Agreement. **(T-1)**

2.7.9.4. Real Property Officer/Real Property Office (RPO).

2.7.9.4.1. Maintains an accurate and complete APSR regardless of the organization using or funding the facility or land. Ensure all facility assignments are allocated by organization within the asset allocation record. **(T-1)**

2.7.9.4.2. Perform physical inventories of all assets in coordination with space planners, community planners, and IGIO under the RPO jurisdiction, custody, and control every 5 years, and every 3 years for all assets with a historic determination. **(T-0)** Physical inventories do not apply to privatized assets.

2.7.9.4.3. Ensure all disposals are accurately recorded in the APSR and KSDs are in the facility folder upon receipt of the Interim DD Form 1354. **(T-0)**

2.7.9.4.4. Ensure annual boundary inspections are completed, and KSDs are in the facility folder. **(T-1)**

2.7.9.4.5. Ensures annual ingrant and outgrant compliance inspections are completed and KSDs are in the grant folder. **(T-1)** Ensures all grants are accurately reflected in the APSR**.** RPO will provide updates to IGIO for updates to GIS records. **(T-1)** Specifically, the RPO must enter the asset review type Inspection Compliance (INSC) and grant compliance inspection date in the APSR. **(T-2)**

2.7.9.4.6. Completes AFIT Real Property Management Course (WMGT 424), the online Real Property Basic Course (**https://lms-jets.cce.af.mil/moodle/course/view.php?id=14624**), and the Advanced Real Property Course, if applicable. **(T-1)**

2.7.9.4.6.1. NGB personnel should attend WMGT 424 course, however ANG RPAO and/or RPMs are not required to attend the course. **(T-1)**

2.7.9.4.7. Updates the AFCEC/CIT SharePoint Site to ensure all appropriate contacts, to include all Real Property Specialists (RPS), BCE, DBCE, and appointed FIAR Lead , are listed in the Base POC section at **https://portal.afcec.hedc.af.mil/CI/CIT/Lists/base_contacts/AllItems.aspx.** (**T-1)**

2.7.9.4.7.1. NGB will update the SharePoint site with the appropriate contacts for ANG. **(T-2)**

2.7.9.4.7.2. AFRC will update the SharePoint site and list the AFRC Command RPOs as contacts. **(T-2)**

2.7.9.4.8. Attend pre-decisional and Work Request Review Board meetings to ensure real property requirements are met. **(T-1)**

2.7.9.4.9. Required to have a representative attend and present briefs as necessary at the Facilities Board meetings to remain informed and provide guidance on projects that have real property implications in accordance with DAFI 32-1015, *Integrated Installation Planning*. **(T-1)**

2.7.9.5. Financial Improvement and Audit Remediation (FIAR) Lead.

2.7.9.5.1. The FIAR Lead will act as a control point to oversee various FIAR procedures. **(T-1)**

2.7.9.5.1.1. The installation FIAR Lead will oversee completion of the E&C procedures and perform testing of APSR data entry accuracy and document retention compliance through assignment of resources, direct observation, review of results and documentation through sampling and assertion of completion of E&C procedures as outlined in the current fiscal years Standard Operating Procedures (SOP) for E&C testing. **(T-1)**

2.7.9.5.2. The FIAR Lead will not be currently assigned to the RPO. **(T-1)**

2.7.9.6. Internal CE Partners**.** The internal CE offices listed below will be necessary to inform and provide answers to a multitude of Real Property issues including but not limited to **(T-1)**:

2.7.9.6.1. Engineering Flight (CEN).

2.7.9.6.1.1. Programming - The programmer completes the Capital Improvement Accounting Treatment Template (CIATT) to determine if the project requires capitalization, and if so, initiates a Draft DD Form 1354, Transfer and Acceptance of Military Real Property, identifying all work needing to be capitalized. **(T-1)** Reference DAFI 32-1020, *Planning and Programming Built Infrastructure Projects,* for requirements.

2.7.9.6.1.1.1. The programmer initiates a Draft AF Form 300 Facility Disposal for Real Property asset disposal where applicable and in accordance with AFI 32-9004, *Disposal of Real Property*. **(T-1)**.

2.7.9.6.1.2. Community Planner – In coordination with the BCE, responsible for Installation Development Plan and is responsible for the proper documentation of initial planning efforts. Reference section 2.2.1 in DAFI 32-1020 for requirements. **(T-1)**

2.7.9.6.1.3. Facility Space Planner (FSP) – Coordinates with the RPO to develop and maintain customer facility space allocations and requirements (also known as customer authorizations). The RPO maintains the customer facility space allocations within NexGen IT. Refer to the Facility Space Planning Optimization Playbook, Appendix D, Section 1.1.2. **(T-1)**

2.7.9.6.1.3.1. Generates AF Form 123, DD Form 1354, or other required KSDs to update the APSR. **(T-1)**

2.7.9.6.1.4. Project Manager (PM) – Aligns resources to CE Enterprise objectives and initiatives over the near, mid, and long term within acceptable levels of risk. Responsible for tracking various requirements within NexGen IT. **(T-1)**

2.7.9.6.1.5. Installation Geospatial Integration Office(r) (IGIO) - The Installation Geospatial Integration Office, along with RPO, reconciles APSR with GeoBase data annually. **(T-1)** Employing DAF GeoBase Standard Services and Capabilities as mandated systems of record, i.e., for linear segmentation infrastructure data and analysis. **(T-1)** (Add SOP information)

2.7.9.6.1.5.1. Real property systems must associate a RPUID and RPSUID with related geospatial information database features in accordance with the policy established in *Office of Management and Budget Circular A-16*. **(T-0)** To describe linear assets more accurately, it is crucial to finish tracking the useful life of each facility and to describe utilities and other systems in terms of segments. The RPO and the IGIO reconcile the APSR and the Geospatial Information system annually for buildings, structures, linear structures, and land assets. **(T-1)** See DAFI 32-10112, *Installation Geospatial Information and Services (IGI&S)*.

2.7.9.6.1.5.2. Sampling of RPUIDs. The installation RPO, or NGB for ANG installations, will provide supporting documentation to AFCEC/CIT and AF/A4C for corrective action plan validation upon request. **(T-1)** NGB will work with the installation RPO to perform virtual sampling when Information Technology (IT) systems cannot support the accuracy needed for remote sampling. **(T-1)**

2.7.9.6.1.5.3. RPOs will coordinate and resource IGIO development and sustainment of Installation Real Property Map Books in support of audit readiness and shared situational awareness. **(T-1)**

2.7.9.6.2. Installation Management Flight (CEI).

2.7.9.6.2.1. CE Financial Manager (CE FM) – Responsible for ensuring accurate accounting of construction projects expenditure and ensures funds are appropriately allocated through DFAS and activates funding documents in NexGen IT. Also responsible for creating and maintaining customer records. **(T-1)**

2.7.9.6.2.2. Environmental Element – Responsible for making the National Register of Historic Places (NRHP) determination of eligibility for a given cultural resource, per the National Historic Preservation Act (NHPA) and DAFMAN 32-7003, *Environmental Conservation*. When a facility attains 45 years of age, this milestone triggers the installation Environmental Flight to perform a NRHP evaluation and determination. Documentation and request for concurrence is submitted to the relevant State Historic Preservation Office (SHPO). If the SHPO concurs with the DAF's determination regarding whether an asset qualifies for Heritage/Historic designation, the appropriate DAF installation RPO will update the RP asset record in NexGen IT with the appropriate coding. Installations outside of the United States, refer to the Host Nation. **(T-0)**

2.7.9.6.2.2.1. Responsible for ensuring all Environmental Impact Analysis Process (EIAP) requirements are met (i.e., NEPA, General Conformity) before constructing/installing real property that may potentially impact the environment.

2.7.9.6.2.2.2. Responsible for ensuring that all applicable environmental permitting requirements are met. For example, ensuring air quality construction permits are obtained prior to constructing/installing real property that emits air pollution, and subsequently obtaining air quality operating permits before beginning operation of that equipment.

Chapter 3

REAL PROPERTY ACCOUNTABILITY

3.1. Accounting for Real Property.

3.1.1. All real property assets must be recorded in the APSR. This action is necessary to accurately track the RPI, manage the rights and obligations of real property agreements, and ensure all KSDs are auditable. This ensures CE compliance with appropriate governance and enables the highest decision-making capability within the DAF and DoD. **(T-0)** The APSR contains data to support installation operations, project management, and facility maintenance. **(T-1**)

3.1.2. An accurate RPI includes the rights and obligations of ingrants/outgrants such as leases, licenses, permits, easements, occupancy agreements, and treaties that give the DAF an interest in, control of, or use of RP in less-than-fee ownership, or provide others use, occupancy or control of DAF real property. **(T-0)** AFCEC will determine the accountability requirements for other agreements not listed above, on a case-by-case basis. **(T-2)**

3.1.3. Accounting for DoD Real Property on Other Military Department (MILDEP) Site. Ensure that all assets occupied by other DoD Components are reported only by the Host Installation. Host Installations will maintain real property records of all Tenant Organization Real Property assets, regardless of another MILDEP constructing, occupying, and/or funding of Real Property assets. **(T-0)** When DAF constructs and/or occupies facilities located on other MILDEP sites the DAF will provide a DD Form 1354 to the appropriate MILDEP with real property accountability and maintain a Phase 1A record in the DAF APSR. **(T-0)**

3.1.3.1. DoD agencies may fund and maintain sole occupancy and use of a facility on DAF property for business purposes. The facility is carried on the host DAF installation's RPI for real property reporting and financial accountability. **(T-0)**

3.1.3.1.1. The DAF requires a complete DD Form 1354 from the transferring entity and records the property as 'owned' by the DAF for accountability purposes. The RPAO will ensure that appropriate cost, funding, and organizational codes are correctly entered into the APSR. **(T-1)** This will ensure sustainment, restoration and modernization funding are earned by the responsible service or entity.

3.1.3.1.2. In accordance with **Attachment 4** of this publication and AFI 32-1023, *Designing and Constructing Military Construction Projects*, the RPAO must receive the applicable KSDs from the BCE PM at project completion from the tenant or funding sponsor to support an audit trail of the final costs paid for the facilities, in addition to the DD Form 1354. **(T-0)** The RPAO will validate that support agreement or rights and obligations are in place and that properly recorded codes are entered in the APSR. **(T-1)**

3.1.3.1.3. The funding sponsor must provide a physical or scanned copy of the Interim DD Form 1354, to the RPAO, on the date the facility is accepted into service and a Final DD Form 1354 within 10 business days of financial close-out. **(T-1)**

3.1.3.2. Financial Reporting Organization Requirements. In accordance with DoD 7000.14-R *Financial Management Regulation Volume 4 Accounting Policy*, real property must be reported on the financial statements of the Host Installation on whose installation a real property asset is located. **(T-0)** The financial reporting organization is the DoD component accountable for the real property asset. The DAF is responsible for sustainment requirements of DAF real property assets and reports these assets on its financial statements. **(T-1)**

3.1.3.2.1. The military service or WHS (Host Installation) where the asset is located should report financially on in-service real property. **(T-0)**

3.1.3.2.2. Working capital funds will continue to financially report real property on sites where they are the Host Installation and will impute costs as needed where they are not the host. **(T-1)**

3.1.3.2.3. A DoD component funding construction will report the construction in progress (CIP). **(T-1)** Once the asset is placed in service, if the funding DoD Component is not the Host Installation, the asset will need to be transferred via the DD Form 1354 process from the funding DoD Component to the Host Installation. **(T-1)**

3.1.3.2.4. Capital improvements will be financially reported by the entity funding construction and transferred to Host Installation. **(T-1)**

3.1.3.2.5. Reporting entities will disclose the nature of their real property financial reporting responsibilities in their management representation letters and notes to their financial statements. **(T-1)**

3.1.3.2.6. DoD real property that is not located on a DoD installation (including property located on an installation that is hosted by an entity other than DoD) will be reported on the financial statements of the MILDEP that is the Host Installation having jurisdiction of the real property asset. **(T-0)**

3.1.3.2.7. If a real property asset is located on a DoD installation that is funded by an entity that is not part of the consolidated DoD financial statements, it will be the financial reporting responsibility of the non-DoD entity. **(T-0)** For additional context and guidance, refer to FMR, Volume 4, Chapter 24.

3.1.4. Facility Numbers. The BCE will ensure unique Facility Numbers are assigned to all facilities located on or under control of the installation and site regardless of the organization using and/or funding the facility, including privately owned. **(T-0)**

3.1.4.1. The BCE ensures all Facility Numbers, except linear and privatized assets, may be easily read from the street or parking lot and are compatible with installation and site sign standards presented in the Installation Facility Standards, part of the Installation Development Plan covered under, DAFI 32-1015. **(T-1)** Whether it is feasible to affix a placard indicating the Facility Number or not, the BCE must ensure the facilities are accurately depicted in the installation geospatial information database. **(T-1)**

3.1.4.1.1. The RPO will assign a unique Facility Number to each facility per site. **(T-0)** Do not include building wing and apartment identifiers in the official Facility Number. **Note:** Facility Numbers must be alphanumeric, should not include spaces or special characters, and will not exceed ten characters.

3.1.4.1.2. Buildings that are connected by open breezeways or corridors are considered separate buildings and assigned individual numbers. Facilities must have a common wall to be included under one Facility Number. **(T-1)**

3.1.4.1.3. Square footage for covered walkways or enclosed corridors that connect two facilities must be divided equally and applied to each facility that is connected. **(T-1)** An exception is a building built and accepted in phases on a single work order. See DAFMAN 32-1084, *Standard Facility Requirements*, for guidance on calculating area amounts.

3.1.4.1.4. The RPO will assign a Facility Number to a 'proposed asset' in the APSR. **(T-1)** The same number may appear on early engineering drawings and consistently identify the facility during and after the construction. RPUIDs are requested upon funding authorization of a project.

3.1.4.1.5. Facility Numbers may be assigned to ANG on municipal airports for which the ANG has a joint-use agreement and responsibility for a portion of the sustainment, restoration, and modernization. **(T-1)**

3.1.4.1.6. Facility Numbers must be assigned to real property, such as monitoring wells, located off the installation or on private property. **(T-1)** The Facility Number will be linked to the instrument number. **(T-1)**

3.1.4.1.7. Facility Numbers may be assigned to tents. However, only concrete tent pads and hardwired utilities will be considered real property. **(T-1)**

3.1.4.1.8. The Facility Number on an asset must match the Facility Number listed for that asset in the APSR. **(T-1)** Additionally, Facility Number listing in the IGIO information database must match the Facility Number within the APSR. **(T-0)**

3.1.4.1.9. Once Facility Numbers are assigned a RPUID, the Facility Number will not change. **(T-1)**

3.1.4.1.10. Once a RPUID has been issued, that Facility Number may not be reused on that site. **(T-0)**

3.1.5. Facility Addresses. The RPAO, in consultation with the governing clerk’s office, will assign unoccupied buildings a street address by entering the Facility Number and street name in the APSR and will provide address to the IGIO information database. ANG provides street addresses to GeoBase. **(T-1)** Garages and other outbuildings should have the same address as the primary facility or house.

3.1.5.1. Remote sites without assigned personnel may have a zip code as the official address in the APSR. Latitude and longitude can be used if no security concerns exist. **(T-1)**

3.1.5.2. The official address of the installation and site will be the single address at the main gate to which express mail would be delivered if no other address has been established. **(T-1)** If the installation and site does not receive mail, then its zip code will function as its address. **(T-1)**

3.1.5.3. Installation commanders may name streets within the installation and site boundaries under their jurisdiction. Memorialization of facilities or installations is a Manpower, Personnel and Services (AF/A1) function. Guidance for memorialization is contained in DAFI 36-2880, *Memorialization Program,* Table 3.1. **(T-1)** For ANG, the A4F retains authority for naming streets and site boundaries under their jurisdiction. **(T-1)**

3.1.6. Category Code (CATCODE) and Facility Analysis Category (FAC) Code. The DAF must create sufficient CATCODEs to categorize their real property in a manner that provides consistent identification and analysis of similar assets across the DoD. The DAF will ensure that systems capturing information for the planning and programming, budgeting, accounting, record keeping, and reporting in the areas of construction, inventory, and sustainment of real property use the DoD FAC Codes and the DAF CATCODEs defined in the current version of the Real Property Categorization System (RPCS). **(T-0)**

3.1.6.1. Regular AF, AFRC, ANG, and USSF programmers are required to use the DAF Category Codes website to determine the proper DAF CATCODE. **(T-1)** The DAF CATCODEs and full descriptions are included in the **DAF CATCODE website**. The CATCODE does not affect the space authorization aspect of these documents.

3.1.6.2. Due to the nature of DAF CATCODE updates and changes, this website is a living document; check for updates before creating real property KSDs at **https://usaf.dps.mil/teams/10758/CITCATCODE/Module/Home.aspx.** (**Note:** A CAC is required for access to this website.) **(T-1)**

3.1.7. Submitting Changes to the Category Code Website. New CATCODEs or changes in current CATCODEs require significant coordination with Air Staff, Space Staff, and AFCEC. New DAF CATCODEs or changes must be approved through the RPCS Working Group. **(T-0)** Not all facilities or CATCODEs have sustainment funding requirements.

3.1.7.1. If a proposed asset does not fit within an existing DAF CATCODE, the installation RPO, or NGB/A4, will submit the following information through the AFCEC/CIT Program Manager to AFCEC/CITA to initiate the review process no later than 30 August **(T-1)**:

3.1.7.1.1. A thorough description of the asset and why a current CATCODE is not applicable. **(T-1)**

3.1.7.1.2. Photographs, data, and technical specifications, if available. **(T-1)**

3.1.7.1.3. A clear definition of the proposed CATCODE and link to the FAC Code, either existing or proposed. **(T-1)**

3.1.7.2. Unit(s) of measure that conform(s) to the DoD FAC Code in accordance with the DAF Category Codes website. **(T-1)**

3.1.7.3. A request for a new DAF CATCODE will be reviewed against existing codes and criteria to determine if it meets any of the current guidelines for sustainment funding. **(T-1)** If an existing CATCODE does not adequately describe an asset, AF/A4CA will present the new proposed code at the OSD RPCS Working Group for approval and subsequent inclusion in the APSR. **(T-0)**

3.1.8. Changing the Use/Category Code of Facility. The RPO, in conjunction with the Facility Space Planning office, presents a notification of a change in use to the Facilities Board. If the change is a result of a project, this notification must be made prior to the change being made in the APSR. If the change is occurring through a study or Inventory/Inspection with the associated floorplan, update the APSR. All DAF CATCODE changes are required to be documented on an AF Form 123 and signed by the appropriate approval authority. The appropriate signed Facilities Board minutes and slides must be attached to all AF Form 123's. All required KSDs will be filed in the facility file folder and uploaded to the APSR. **(T-1)**

3.1.8.1. Approval authority. Installation commanders and/or BCEs will sign AF Form 123 for Facility Board notification except for the following that require higher HQ approval **(T-0)**:

3.1.8.1.1. Munitions and Munitions Maintenance Facilities. To request changes in use of munitions storage and maintenance facilities that would affect the explosive safety siting for weapons or munitions and support items, forward AF Form 123 with MAJCOM, or equivalent, concurrence to AFCEC/CIT. AFCEC/CIT will route the AF Form 123 to the Air Force Logistics Munitions Division (AF/A4LW) for approval. **(T-1)** For Outside the Continental United States (OCONUS) and USSF locations, send AF Form 123 to detachments for coordination with MAJCOM functional offices and forwarding to AFCEC/CIT for continuation of action. **(T-1)** AFRC and ANG must request changes of munitions and munitions maintenance facilities through their respective higher headquarters prior to AFCEC/CIT for AF/A4LW approval. **(T-1)**

3.1.8.1.2. New Facilities. For new facilities, do not change the use that was justified on DD Form 1391, *FY ___ Military Construction Project Data*, until two years after PISD. However, if a change in use is necessary because of base mission or other overriding needs, send AF Form 123 through Air Force Civil Engineer Center Facility Engineering Directorate (AFCEC/CF) to AF/A4C for approval and congressional notification. For OCONUS locations, send AF Form 123 to detachments for coordination with MAJCOM functional offices and forward to AFCEC/CIT for continuation of action. For USSF locations, send AF Form 123 to AFIMSC Det 1 for coordination and SF/DCOO approval. **(T-1)**

3.1.8.1.3. Morale, Welfare, and Recreation (MWR). For all recreation centers or facilities constructed or purchased with Nonappropriated funds (NAF), send AF Form 123 to AFCEC/CIT. AFCEC/CIT will send AF Form 123 to Air Force Services Agency for coordination and approval. **(T-1)** For OCONUS locations send AF Form 123 to detachments for coordination with MAJCOM functional offices and forward to AFCEC/CIT for continuation of action. Reference DAFI 34-101, *Air Force Morale, Welfare, and Recreation (MWR) Programs and Use Eligibility*. ANG must request change of use to morale, welfare, and recreation facilities through NGB. NGB will forward AF Form 123 to Air Force Services Center (AFSVC) for coordination and approval. **(T-1)** For USSF locations, send AF Form 123 to AFIMSC Det 1 for coordination and SF/DCOO approval. **(T-1)** Reference **9.4 Footprint Growth Offset Policy** for guidance.

3.1.8.1.3.1. NAF changes in use: For all change in use requests resulting in an update to Nonappropriated portfolio, send AF Form 123 to AFCEC/CIT. AFCEC/CIT will send AF Form 123 to AFSVC for coordination and approval. **(T-1)** For OCONUS locations send AF Form 123 to detachments for coordination with MAJCOM functional offices and forward to AFCEC/CIT for continuation of action. ANG must request change of use to morale, welfare, and recreation facilities through NGB. NGB will forward AF Form 123 to Air Force Services Agency for coordination and approval. **(T-1)** For USSF locations, send AF Form 123 to AFIMSC Det 1 for coordination and SF/DCOO approval. **(T-1)** Reference **9.4 Footprint Growth Offset Policy** for guidance.

3.1.8.1.4. Religious Facilities. To change the use of religious facilities, send AF Form 123 to AFCEC/CIT. AFCEC/CIT will send AF Form 123 to Air Force Personnel, Budget, and Readiness Division (AF/HCP), (**af.hcp.workflow@us.af.mil**) for AF/HC approval. **(T-1)** For OCONUS locations send AF Form 123 to detachments for coordination with MAJCOM functional offices and forwarding to AFCEC/CIT for continuation of action. ANG must request change in use of religious facilities through NGB. NGB will send AF Form 123 to AF/HCP for AF/HC approval. **(T-1)** For USSF locations, send AF Form 123 to AFIMSC Det 1 for coordination and with Space Staff and forward to AFCEC/CIT for continuation of action. **(T-1)**

3.1.8.1.5. Military Family Housing. Reference AFI 32-6000, *Housing Management,* for changes in use related to family housing.

3.1.8.1.5.1. Facilities cannot be converted to or acquired as military family housing units unless the number of units to be converted or acquired has been specifically authorized by law. **(T-0)** Reference 10 USC § 2822, *Requirement for Authorization of Number of Family Housing Units*. Facilities originally constructed or acquired as family housing can be converted or re-acquired with SAF/IEI approval. **(T-1)**

3.1.8.1.5.2. For permanent change in use (conversion) of family housing units to other use, the military family housing office in coordination with the RPO, will route an installation commander-signed conversion request with supporting justification and documentation and an AF Form 123, through AFCEC/CI, to AF/A4C for SAF/IEI approval. AFIMSC Detachments must ensure all requests are coordinated by MAJCOM/A4Cs and the functional supporting agency for the receiving organization (for instance, AF Services Agency) before submittal to AFCEC/CI. **(T-1)**

3.1.8.1.5.3. For temporary changes in use (temporary diversion) of less than three years, route an installation commander signed diversion request with supporting justification and documentation to AFCEC/CI for approval. AFCEC/CI will forward approval response to DAF/A4C as information. Diversions of non-surplus family housing for use by unaccompanied key and essential personnel are the only temporary changes in use allowed. **(T-1)**

3.1.8.1.6. Unaccompanied Housing. Reference AFI 32-6000 for changes in use related to DAF permanent party unaccompanied housing.

3.1.8.1.6.1. For permanent change in use of DAF permanent party unaccompanied housing facilities identified on the Dormitory Master Plan, route an installation commander-signed change request with supporting justification and documentation and the AF Form 123 through AFCEC/CI to DAF/A4C for approval. AFIMSC Detachments must ensure all requests are coordinated by MAJCOM/A4Cs or the SF/DCOO and the functional supporting agency for the receiving organization before submittal to AFCEC/CI. **(T-1)**

3.1.8.1.6.2. For permanent conversion of other facilities into permanent party unaccompanied housing, forward the installation commander request and an AF Form 123 with supporting justification and documentation to AFCEC/CI for coordination and staffing to DAF/A4C for approval. AFIMSC Detachments must ensure all requests are coordinated by MAJCOM/A4Cs or the SF/DCOO and the functional supporting agency for the surrendering organization before submittal to AFCEC/CI. Permanently converted facilities must comply with DoD and DAF minimum assignment standards to be used to support permanent party unaccompanied member. **(T-1)**

3.1.8.1.6.3. For temporary diversion of other facilities into permanent party unaccompanied housing, forward the installation commander approval and AF Form 123 with supporting justification and documentation to AFIMSC/Detachment, MAJCOM/A4C, AFCEC/CI and A4C as information. Temporarily diverted facilities must comply with DoD and DAF minimum assignment standards to be used to support permanent party unaccompanied members. **(T-1)**

3.1.8.1.7. Facilities temporarily diverted into unaccompanied housing will be recorded, managed, monitored, and tracked in eMH IAW eMH guidance in AFI 32-6000. **(T-1)**

3.1.8.1.8. For USAFE locations only: Change in use requests resulting in a NATO square footage portfolio decrease, send AF Form 123 to AFIMSC Det 4/CEIA (**AFIMSCDet4.CEI.InstallationMngt@us.af.mil**) for coordination with MAJCOM functional offices and NATO approval. **(T-1)**

3.1.8.2. The BCE may delegate in writing, appropriate signature authority on the AF Form 123 to the DBCE. The BCE may also delegate authority to the RPAO, in writing, for Inventory Adjustments (IADJ). All delegation letters should be maintained in the BCE File Plan. **(T-1)**

3.1.8.3. All change in use/CATCODE changes for facilities must be consistent with the installation planning documents. **(T-1)** There is no requirement to report change in use for Base Realignment and Closure property unless the Base Realignment and Closure action results in a Joint Basing action where the DAF is the lead service. **(T-1)**

3.1.9. Accounting for RPA Operational Status Codes (OSC) of Facilities. Upon receiving the required approval Memorandum for Record (MFR) from Engineering, the RPAOs are responsible for changing the RPA OSC of a facility in the APSR. **(T-1)** RPAOs should retain approved MFRs in the facility record. For the use of closed and caretaker OSCs, reference DAFI 32-1015. **(T-1)** Refer to **Table A3.1** for RPA OSC guidance.

3.2. DAF Accountable Property System of Record (APSR). DAF APSR stores and provides authoritative real property data to the DAF, DoD, and other federal agencies for real property accountability and reporting. **(T-0)**

3.2.1. NexGen IT is the DAF APSR, which sends and receives data through electronic interfaces with other DAF and DoD systems such as Defense Enterprise Accounting and Management System (DEAMS) and DAIS Platforms

3.2.1.1. All total force installations and sites are required to utilize NexGen IT for accurate and complete RPI accountability and facility financial reporting. **(T-1)**

3.2.1.2. For military family housing, the Enterprise Military Housing (eMH) system is the DoD APSR. For additional information pertaining to eMH system, refer to AFI 32-6000. **(T-0)**

3.2.2. The RPSUID and the RPUID are the unique identifiers of each site and asset in the APSR. **(T-0)** For additional information, refer to **Chapter 5**.

3.2.3. Data Requirements.

3.2.3.1. The RPIM prescribes the DoD required data elements and metadata for real property inventory and forecasting. See the Office of the OASD(EI&E) website for RPIM guidance at **OASD (EI&I) Real Property Programs.** (**Note:** A CAC is required for access to this website.) **(T-0)**

Table 3.1. RPA Operational Status Codes.

Code	Code Title	Code Definition
ACT	Active	Asset is utilized for 6 months or more annually. (100% sustainment earned)
CARE	Caretaker	Asset is not occupied and must maintain minimum maintenance for safety and security. (15% sustainment earned)
CLSD	Closed	Asset is not occupied with no intent to reopen and have been added to the Growth Offset Bank. To be removed from a CLSD status requires SAF/IEE approval. (0% sustainment earned)
DISP	Disposed	Asset has been demolished or conveyed or transferred to a non-DoD entity. (0% sustainment earned)
ENVH	Environmental Hold	Asset is currently not being used; environmental concerns/issues are being addressed. (e.g., Asbestos remediation, Mold, permit acquisition) (sustainment varies – See Environmental POC)
EXCS	Excess	Asset not required to meet the current and future needs and responsibilities of DoD. Asset has been reported to GSA for further action. Asset must be maintained and reported by the DAF. Requires SF 118 as KSD. (15% sustainment earned)
NONF	Non-functional	Asset cannot be used or occupied for any reason until functional capability is restored to a usable or habitable condition. (e.g., Abandon in place – linear assets) (0% sustainment earned)
OUTG	Outgranted	Asset rights of use have been granted to a non-DoD entity. (100% sustainment earned, unless tenant is responsible for sustainment)
SEMI	Semi-Active	Asset is utilized for less than 6 months annually. (100% sustainment earned)
SURP	Surplus	Asset not required to meet the current or future needs and responsibilities of the federal Government. Must have notification from GSA as KSD (updates and information can be found at U.S. GSA Real Property Disposition). (15% sustainment earned)
TBA	To be Acquired	DoD has initiated action to acquire legal interest. (0% sustainment earned)
*****Disclaimer – Sustainment earned percentages are directed by OSD **(T-0)**.		

3.2.3.1.1. Upon release of a new version of the RPIM, the DAF must configure and/or update the APSR to meet the requirements by established deadlines of which are established by OSD Sustainment Functional Business Governance Board (FBGB), Federal Real Property Council (FRPC), Office of Management and Budget (OMB), or a new statutory requirement. AFCEC/CI will notify AFCEC/CBFG (Geospatial Engineering Branch) for inclusion in the Spatial Data Standards for Facilities, Environment, and Infrastructure Air Force Adaptation. **(T-0)**

3.2.3.1.2. The RPAO, or the ANG RPM, will ensure all changes to APSR are accurate after obtaining or creating the appropriate KSDs. **(T-2)** Facilities board notification will be accomplished after the RPIM APSR updates. **(T-1)**

3.2.3.2. All real property under the command or control of the DAF must be categorized within the framework of the DoD RPCS. **(T-0)** The facility analysis categories within the RPCS will be the basis for unit costs used to calculate Plant Replacement Value (PRV) and other inventory-based cost estimates. **(T-0)** See the OASD (EI&E) website for RPCS guidance at **OASD (EI&E) Real Property Programs**. (**Note:** A CAC is required for access to this website.)

3.2.3.3. RPO will ensure RPA Operational Status Codes are accurate and complete. Reference **Table 3.1** for OSCs.

3.2.3.4. Landfill Management. Consult your Environmental Office to determine the correct RPA OSC. **(T-0)**

3.2.3.4.1. Landfills located on an installation or site with the CATCODEs 833360 or 833361 will utilize the following RPA OSC:

3.2.3.4.1.1. DAF landfills permitted to receive waste will be coded as ACT (active) – receives 100% sustainment. **(T-1)**

3.2.3.4.1.2. DAF landfills that have been Resource Conservation and Recovery Act (RCRA) - closed and require post-closure monitoring and maintaining will be coded as CARE (caretaker) - receives 15% sustainment. **(T-1)**

3.2.3.4.1.3. DAF RCRA-closed landfills and/or landfill cells in remediation (Defense Environmental Restoration Program (DERP)) will be coded as CLSD (closed) - receives 0% sustainment. **(T-1)**

3.3. Reconciliation and Certification. RPOs will annually reconcile APSR with internal offices including but not limited to Environmental (Historic), GIO (Geospatial Information, Linear Structure Reconciliation), and Housing (Privatization). **(T-0)**

3.3.1. Reconciliation of Non-DoD Assets. **(T-0)**

3.3.1.1. Installation RPOs may be required to reconcile with other tenants not listed above. All discrepancies between the Host Installation and tenant RPI records will be annually reconciled by 1 April. **(T-1)**

3.3.1.2. When an asset's predominant use is allocated to a non-DoD entity, RPO must ensure asset is coded in the APSR with the RPA OSC of Outgranted (OUTG). **(T-2)**

3.3.2. Reconciliation and Certification of Other Service Real Property on DAF Installations. **(T-0)**

3.3.2.1. When a DoD agency occupies, operates, and/or maintains the facilities located on a DAF site, the responsible offices will review and reconcile as needed, the APSR reports to verify and certify that all assets are entered correctly in APSR and are supported by hardcopy or other source documentation. **(T-0)**

3.3.2.2. The DAF installation RPO will coordinate with the DoD component, DoD Agency, and Working Capital Fund facility users to ensure that the following actions are taken for RPI reconciliation:

3.3.2.2.1. Reconciliation. Reconcile, at least annually, the DAF RPI records with all other DoD components and DoD agencies that occupy, operate, and/or maintain facilities or land for which the military departments or WHS have real property accountability. This reconciliation will ensure that both parties maintain accurate records of the asset's use in accordance with DoDI 4165.14. **(T-0)** RPI reconciliation may be accomplished by a multidisciplinary group consisting of resource managers, RPAOs, tenants, geospatial information personnel and other offices and organizations (e.g., operations and program managers) as required. **(T-0)**

3.3.2.2.2. Inventory. The DoD components will provide inventory and other information requested by the DAF to assist in managing the property used by components in accordance with real property service provider Memorandum of Understanding (MOU) and Installation Use Agreement. **(T-0)**

3.3.2.2.3. Reimbursement. The RPO will ensure asset allocations are properly assigned in the APSR to reflect the allocations in accordance with underlying agreements to support reimbursable obligations. **(T-1)**

3.3.3. Accounting for Real Property Inventory with Environmental Liability.

3.3.3.1. Accounting for assets with an environmental liability is required. **(T-1)** An environmental liability is an expected future outflow or expenditure of resources and includes the estimated environmental costs associated with the future closure of operations, including closure and disposal of real property assets. The cost for environmental liabilities associated with real property assets (asset-driven liability) must be disclosed on the DAF Financial Statement, Note 14, and is estimated using real property asset data. **(T-1)** Asset-driven liability costs are reported on the DAF financial statement in one of two categories, Environmental Closure Requirements and Asbestos.

3.3.3.2. The RPAO will:

3.3.3.2.1. Assist the Civil Engineer Installation Management, in coordination with the Environmental Element, to reconcile real property records with environmental data system records annually. **(T-1)** Examples of environmental data systems include the Air Program Information Management System (APIMS) for real property that generates air emissions and the Storage Tank Accounting and Reporting (STAR) module in APIMS for certain real property storage tanks.

3.3.3.2.2. Ensure a RPUID is assigned and communicated to the environmental section for any asset with an environmental liability. **(T-1)**

3.3.3.2.3. Coordinate with environmental management on the environmental restriction (RPIM restriction type code = ENV) and update the APSR accordingly. **(T-1)** Environmental management will provide a list of applicable real property changes such as a new facility or modification to support environmental inspections, assessments, and audits. **(T-1)**

Chapter 4

REAL PROPERTY REPORTING AND PLANNING

4.1. General Reporting Requirements.

4.1.1. AFCEC submits DAF RPI, extracted from the APSR, as the initial submission of the Real Property Asset Database (RPAD) to AF/A4CA, who reviews and certifies annual submission to the OASD(S), as the official DAF RPAD. **(T-0)**

4.1.2. DAF must use the guidance issued by OASD(S) for all submissions of the DoD enterprise RPI data. **(T-0)**

4.1.2.1. DAF must report at least one DoD FAC Code, DAF CATCODE, Command Tenant Code, and Customer Organization Code for each real property asset. **(T-0)**

4.1.2.2. The CE FM is the entity responsible for creating accurate customer records with the most current Organization and Fund Source Codes. **(T-1)**

4.1.2.3. DAF must report each DAF Asset Allocation with the appropriate DAF CATCODE and customer name/code, utilizing the current RPCS and Command Tenant and Organization Codes. **(T-0)**

4.1.2.3.1. Allocation records will be maintained in accordance with the primary use. For example, an administrative facility will be reported as a UoM Code of SF. Additional allocation records with a different UoM Code, will be identified as 'other allocations' (KW, EA, SY, etc.). **(T-0)**

4.1.2.3.2. Vacant facilities and/or spaces CATCODE will remain as the facility function and the customer will be identified as vacant customer with appropriations assigned to the BCE. **(T-1)**

4.2. Required Reports. The DAF reports data from the APSR to outside entities for use in their planning and funding allocations. The data and focus of each of these reports is substantially different.

4.2.1. All real property used by the DAF to carry out its mission is included in the SAF/FM annual Financial Statement, which provides cost and value information. This data is reported by financial guidance laid out in DoD 7000.14-R, *DoD Financial Management Regulation* Volume 6B, Required Supplementary Information (RSI). **(T-0)**

4.2.2. The following reports are submitted to SAF/FM for the annual Agency Financial Report upon request **(T-0)**:

4.2.2.1. Real Property Deferred Maintenance and Repair Report (DM&R)

4.2.2.2. Real Property Stewardship of Lands

4.2.2.3. Real Property Operating Lease Report

4.2.2.4. Real Property Heritage Asset Data Report

4.2.3. Specific installation and site data are consolidated at the end of each fiscal year and transmitted to the DoD by AF/A4C. The data is consolidated into the DoD-wide RPAD report to the Federal Real Property Council (FRPC) and General Services Administration (GSA) for intragovernmental planning and reporting. The DAF prepares and submits three major DoD real property reports at the end of each fiscal year **(T-0)**:

4.2.3.1. Real Property Inventory (RPI) Report

4.2.3.2. Real Property Inventory (RPI) Forecasts Report

4.2.3.3. Real Property Annual Plant Replacement Value (PRV) Calculations Memorandum

Chapter 5

INSTALLATIONS AND SITE CHARACTERISTICS

5.1. Installations. An installation is a management concept for real property in which the DAF has an interest or jurisdiction and for which the DAF is accountable to the OMB. Installation definition also includes real property that the DAF controls by international agreement with foreign governments, or through other rights. An installation may be a physical location, or virtual. An installation is composed of a collection of sites under a single installation commander. The sites under the installation are physical locations. Some mission and/or locations may be classified, however real property facilities are unclassified. Mission classification does not prevent accounting for those assets in the DAF APSR, unless a waiver is issued by Office of Under Secretary of Defense (OUSD). **(T-0)**

5.1.1. Major Installation - Primary/Parent Site (Air Force Base, Space Force Base, Air Base, Air Guard Base, or Air Reserve Base): A self-supporting center of operations for actions of importance to DAF combat, combat support, or training. Operated by an Active AF, USSF, AFRC, or ANG unit of wing size or larger with all land, facilities and organic support need to accomplish the unit mission. Must have real property accountability through interest of all real estate and facilities. **(T-0)** Agreements with foreign governments which give the Air Force jurisdiction over real property meet this requirement.

5.1.2. Minor Site/Installation (Air Station, Space Force Station, Air Guard Station, or Air Reserve Station): A Geographically Separated Unit (GSU) that reports under a Primary Site. Facility operated by Active, AFRC, or ANG unit of at least squadron size that does NOT otherwise satisfy all the criteria for a major installation/site. **(T-0)**

5.1.3. Support Site: Air Station, Space Force Station, Air Guard Station, Air Reserve Station, or facility operated by Active, AFRC, or ANG unit that provides general support to the DAF mission and does not satisfy the criteria for a major or minor installation. Examples of support sites include AFRC and ANG installations support communications/engineering units, installations in standby, and installations with non-flying operations which provide only base operations support to other units. **(T-0)**

5.1.4. Other: Annexes, minimally manned/unmanned site with little or no real property, and leased office space such as units that are located on installations belonging to other Services, radio relay sites, radio beacon sites, remote tracking sites, radar sites, and NAVAID sites. **(T-0)**

5.2. Establishing and Naming Installations. Installation commanders and MAJCOM commanders, or Field Command (FLDCOM) commanders, are required to assign a name, use, and designation to real property acquired following the guideline in DAFI 36-2880. **(T-1)**

5.2.1. Use a name that best identifies the geographic location of the installation. **(T-1)**

5.2.2. Use the procedures authorized in DAFI 36-2880 to name an installation. **(T-1)**

5.2.3. Name airfields for the primary installation they support. Use numerical suffixes if necessary. **(T-1)**

5.2.4. Use the official local name and location designation if the DAF shares the installation with a civil, commercial, or government service. **(T-1)**

5.2.5. Once the installation name is established on an approved DAF Form 1192 *USAF Installations Characteristics Report*, installations are prohibited from making changes to the name. **(T-1)**

5.3. Designating Installation Type.

5.3.1. Identify an installation based on its general use or purpose.

5.3.1.1. Air Force Base, Space Force Base, Air Base, Air Reserve Base, or Air Guard Base. Use the applicable terms for installation from which aircraft operations can be conducted or from which major activities of importance to DAF combat, combat support, and training missions can be supported. **(T-0)**

5.3.1.2. Air Station, Space Force Station, Air Reserve Station, or Air Guard Station. Use the applicable term for installations, with or without a flying mission, that are operated by a unit of at least a squadron size that does not otherwise meet the criteria of **paragraph 5.3.1.1**. **Note:** Prior to designating an installation as an Air Force Base, Space Force Base, Air Station, of Space Force Station verify the installation category (Major Installation or Minor Site/Installation). **(T-0)**

5.3.1.3. Air Force Auxiliary Airfield. Use this term if the installation has an aircraft operating area that supports a primary installation. **(T-0)**

5.3.1.4. Air Force Industrial Plants. Use this term if the site is DAF controlled industrial property operated by a contractor. **(T-0)**

5.3.1.4.1. Number DAF plants instead of naming them. **(T-0)**

5.3.1.4.2. Notify the Director of the Space Force for Acquisition Integration (SAF/SQX) when a Facility Number is added to Air Force industrial real property. **(T-1)**

5.3.1.5. Leased Family Housing. Establish one installation for all approved leased housing within a metropolitan area. Approved leased housing units within any one metropolitan area may be aggregated into one leased site. **(T-0)**

5.4. Designating Site Types.

5.4.1. A site record is the parent entity for the assets located at that site. It must have at least one physical asset associated with it, such as a parcel of land and/or a facility. A site represents a contiguous collection of assets. Each site will be assigned an RPSUID by DAIS. **(T-0)**

5.4.1.1. Primary Site (P). A self-supporting site, with or without an aircraft operating area that has facilities for administrative and operating activities to carry out a given mission. For recording and reporting real property, this is typically the parent or control installation.

5.4.1.2. Auxiliary Site (A). A site with an aircraft operating area that provides operational activities in support of a primary installation and depends upon a primary installation for administrative and logistical support.

5.4.1.3. Off-base Site (O). A site without an aircraft operating area that provides operational, training, administrative, or logistical support to a primary, auxiliary, or detached site and depends on that site for other support. A site that is separated by a DAF owned road, fence, or other segregating construction is not considered an off-base site.

5.4.1.4. Detached Site (D). A non-self-supporting site used for administrative, operational, or training missions not in support of any primary, auxiliary, or off-base site.

5.4.1.5. Detached Leased Site (DL). A non-self-supporting site with a leasehold interest in the entire site, used for administrative, operational, or training missions not in support of any primary, auxiliary, or off-base installation.

5.4.1.6. Virtual Site (V). A site that will not have an associated primary site.

5.5. Real Property Unique Identifier (RPUID) and Real Property Site Unique Identifier (RPSUID).

5.5.1. The RPO processes a DAF Form 1192 for all noncontiguous sites that the DAF has real property interest. After approval of the DAF Form 1192, the RPO requests a RPUID to at least one facility. When the decision is made to dispose of a site or change its attributes, the RPO must submit an DAF Form 1192 to AFCEC/CIT Workflow (**afcec.cit-.a@us.af.mil**) detailing disposal or change. **(T-1)**

5.5.1.1. For ANG installations, all site changes, disposals and/or updates shall be submitted to NGB then, upon approval, NGB will submit DAF Form 1192 to AFCEC for completion.

5.5.2. A non-intelligent RPUID is assigned by the installation RPO from the DoD DAIS system to any unclassified real property assets in which the DAF, acting on behalf of the United States, initiates action to acquire a legal interest in or has already acquired a legal interest in. **(T-0)**

5.5.2.1. When an asset is to be acquired through military construction (MILCON), the AFCEC Facilities Engineering Directorate (AFCEC/CF) requests a RPUID from the RPO after issuance of design funding. **(T-1)**

5.5.2.2. The installation RPO requests an RPUID in the APSR only after receiving notification in writing of release of funding. **(T-0)**

5.6. DAF Form 1192, *USAF Installations Characteristics Report.* Installations and AFCEC/CI use this form to document additions, changes and deletions for installations and sites. Refer to **Attachment 6** for DAF Form 1192 completion instructions. **(T-1)**

5.6.1. Examples of real property actions that require an DAF Form 1192 and accompanying MFR.

5.6.1.1. Activation, assignment, or inactivation of installations or sites.

5.6.1.2. Transfers between commands, transfers within a command, transfers between installations, DoD services and other U.S. Government agencies or departments, including real property assets.

5.6.1.3. Any name changes.

5.6.1.4. Classification of primary or auxiliary installations.

5.6.1.5. Any additional unique characteristic changes not mentioned above.

5.6.2. For installations with assets in multiple states and/or counties, a DAF Form 1192 is required for each state or county. **(T-2)** Once DAF Form 1192 is approved, establish or update information in the installation APSR Installation/Site record.

5.6.3. The completed DAF Form 1192 is sent to AFCEC/CIT for technical sufficiency review and MAJCOM signature. AFCEC/CIT will then staff the DAF Form 1192, the MFR, and a recommendation for MAJCOM commander (MAJCOM/CC) or USSF-equivalent (as required) and AF/A4CA approval. **(T-1)**

Chapter 6

ACCOUNTABILITY OF REAL PROPERTY ACQUISITIONS

6.1. Authorities for Acceptance.

6.1.1. The Business Systems and Information Directorate led by DASD (INF) approves the real property acceptance requirements documents and establishes general component implementation requirements for acceptance of real property of all acquisition types. See Business Systems and Information Directorate, Real Property Accountability website at **OASD (EI&E) Real Property & Infrastructure Data**.

6.1.2. The Business Process Reengineering Real Property Construction in Progress (CIP) Requirements document identifies specific implementation requirements for recording and reporting construction in progress, **Construction in Progress Requirements Document (osd.mil)**. Additional instruction for accepting construction, and Inventory Adjustments are found in UFC 1-300-08, *Unified Facility Criteria for Transfer and Acceptance of DoD Real Property*.

6.2. Executive Agents. The Departments of the Air Force, Army, Navy, and WHS are the only executive agents in the DoD that may hold title to U.S. Government real property on their inventories. Therefore, all real property on military installations and sites are accounted for by an executive agent/Host Installation, including privately owned and operated properties (e.g., bank, credit union buildings, privatized housing, and utilities). Defense agencies, non-appropriated fund activities (e.g., theaters, community centers and some fitness centers) and Army Air Force Exchange Service (AAFES) organizations occupy and control property that is administratively accounted for by the military department that holds the responsibility for that property in the annual reports to the OSD and GSA or as set forth in section IV.E. of the Deputy Secretary of Defense memorandum entitled, "Land Acquisition and Leasing in the United States", dated 22 Feb 2021. **Exception:** Installations outside the United States, reference **Chapter 14**. **(T-0)**

6.3. Accountability of Real Property Acquisitions. Acquisitions of RP requires the RPO to capitalize or expense any improvement that increases the useful life, capacity, or size of an existing asset, modifies functionality, and/or capitalization threshold. **Note:** Capitalization threshold is for financial reporting only. The RPO APSR duties and responsibilities remain the same. New acquisitions must be entered into the APSR within 10 business days of acceptance. KSDs are to be included for a complete audit trail of the transaction. For additional guidance on the acquisition of real property, see AFI 32-9001. **(T-0)**

6.3.1. Construction or capital improvements must be recorded in the accounting period when the transaction is completed. **(T-0)** This takes priority over the requirement of 10 business days to ensure that financial reporting is not adversely impacted.

6.3.2. When deviations from the 10 business days occur, record it by MFR and file as supporting documentation for financial reporting auditability. **(T-0)**

6.3.2.1. Projects completed in September must be entered into the APSR no later than the 20th. **(T-0)** If the asset cannot be added into the APSR with an active cost record prior to the end of year cutoff and has a PISD on, or prior to 30 Sept, notify SAF/FMFM with the Draft, Interim, or Final DD Form 1354 to ensure a JV can be prepared to accurately report the asset on the financial statements in the proper fiscal year. **(T-0)**

6.3.3. When the DAF acquires/receives a new asset, the RPO/RPAO **(T-1)**:

6.3.3.1. Will not be a designated authority to sign the "Transferred By" or "Accepted By" fields on the DD Form 1354, *Transfer and Acceptance of DoD Real Property*, if they are responsible for entering the data into the APSR. **(T-1)** The "Accepted By" signature will be the BCE or authorized designated U.S. Government representative. **(T-1)** The "Transferred By" field will be signed by the DCA PM on PISD. **(T-1)**

6.3.3.1.1. An approval memorandum signed by the Deputy Assistant Secretaries or equivalent of the losing and gaining services are required for approval of transfers between military service or WHS agencies. This memorandum must be included with the DD Form 1354. **(T-1)**

6.3.3.1.2. For installations located outside of the United States or its territories, the CA can be the Host Nation or NATO. **(T-0)**

6.3.3.1.3. RPA Interest Type Code for OCONUS:

6.3.3.1.3.1. If the Status of Forces Agreement (SOFA) agreement does not allow ownership, record as ONFG. (T-0)

6.3.3.1.3.2. If the SOFA agreement allows ownership and construction was funded by NATO, record as ONFG. (T-0)

6.3.3.1.3.3. If the SOFA agreement allows ownership and 100% of construction was funded by DoD, record as Fee and the Acquisition Cost should be recorded at actual or estimated historical cost. (T-0)

6.3.3.1.3.4. If the SOFA agreement allows ownership and construction costs were split between NATO and DoD, record as follows:

6.3.3.1.3.4.1. If the cost share amount funded by DoD is over $1M record the asset as FEE and the acquisition cost should be recorded as the share amount. (T-0)

6.3.3.1.3.4.2. If the cost share amount funded by DoD is under $1M record the asset as ONFG. (T-0)

6.3.3.1.3.5. PRV can and should remain as the full PRV of the facility. **(T-0)**

6.3.3.1.4. For ANG, the appointed USPFO or Assistant USPFO, as RPAO, can sign "Transferred By" or "Accepted By" fields on the DD Form 1354 because they are not responsible for entering the data into the APSR. **(T-1)**

6.3.3.2. Early in the project life cycle, the BCE PM must coordinate with the RPAO/RPO to ensure proposed facility numbers for new construction are requested and created as a proposed asset in the APSR. Upon project funding authorization, the RPAO/RPO will request RPUIDs for proposed assets to facilitate the completion of the DD Form 1354. **(T-2)** RPAO/RPO will review and validate DD Form 1354 for completeness and accuracy or return to the initiator for corrections. The BCE PM will approve prior to acceptance signatures, to enable the DAF APSR updates. **(T-1)** The RPAO/RPO will provide a copy of the accepted DD Form 1354 to the IGIO for inclusion in the installation geospatial information database. **(T-1)**

6.3.3.3. In accordance with AFI 32-1023, RPO/RPAO must participate in MILCON Red Zone (~80% construction completion) meetings and final inspections of facilities to validate data for the Interim and Final DD Form 1354 and capitalize new or improved assets within 10 business days of PISD. **(T-1)**

6.4. The nine acquisition types involve acceptance of and by:

6.4.1. New construction or capital improvement to an existing asset

6.4.2. Acquiring land with or without facilities

6.4.3. Real Estate ingrant

6.4.4. Condemnation

6.4.5. Revision of a previous acquisition contract

6.4.6. Transfer from another DoD Service

6.4.7. Transfer from federal entity

6.4.8. Gift or donation

6.4.9. OCONUS acquisition types as shown in AFI 32-9001

6.5. Accepting New Construction from Defense Construction Agents (DCA).

6.5.1. DCA PM and/or BCE PM will provide the draft of Interim DD Form 1354 at least 30 days prior to PISD. The installation RPAO/RPO will review to ensure accuracy, completeness of data and availability of required KSDs. **(T-1)** Interim DD Form 1354 data and associated KSDs must be entered into the APSR within 10 business days of PISD. If project is delivered in phases, follow this process, and enter separate Interim DD Form 1354 and associated data/KSDs into the APSR for each phase accepted. **(T-1)**

6.5.1.1. Coordination between the BCE PM, RPAO/RPO, and CE FM or Fiscal Officer is necessary to reconcile project costs to be capitalized. **(T-0)**

6.5.1.2. For installations located outside of the United States or its territories, the CA can be the Host Nation or NATO. **(T-0)**

6.5.2. At PISD, the DCA PM or BCE PM provides a signed Interim DD Form 1354. (**T-1)**

6.5.2.1. RPAO/RPO receives the Interim or Final DD Form 1354 during final inspection of the facility. **(T-1)**

6.5.2.2. The RPAO ensures the PISD in the APSR is the same as that on the DD Form 1354. **(T-1)**

6.5.2.3. The RPAO or FIAR Lead must validate and verify all auditable KSDs for each real property asset prior to acceptance. **(T-1)**

6.5.2.3.1. The total cost accumulated in the CIP Account at the time the asset is placed in-service is documented on the interim DD Form 1354. **(T-0)**

6.5.3. The facility, or portion thereof, may be occupied only after the BCE, or designated appropriate signature authority, signs the Interim DD Form 1354. The DAF will only occupy the portion of the facility accepted on the Interim DD Form 1354. **(T-1)**

6.5.4. Upon receipt of the Interim and Final DD Form 1354 and completed construction documents, the RPAO/RPO will reconcile any changes to the APSR within 10 business days. **(T-1)**

6.6. Accepting Construction Accomplished by the BCE.

6.6.1. The BCE PM will prepare an Interim DD Form 1354 for construction of all new facilities and other property meeting the criteria for capitalization, minor construction, or alteration performed by contractors or installation labor and will require the Engineering or Operations Flight to prepare a DD Form 1354 in NexGen IT. **(T-0)**

6.6.2. The BCE, or designated appropriate signature authority, will sign and process the Interim and Final DD Form 1354 and the RPAO will reconcile any changes to the APSR within 10 business days of PISD. **(T-1)**

6.7. Acceptance and Accounting for Construction in Progress (CIP).

6.7.1. Draft an Interim DD Form 1354 Preparation

6.7.1.1. A Draft DD Form 1354 will be provided to the RPO at project approval. When the RPAO receives Draft DD Form 1354 they will create proposed asset(s) in NexGen IT for each new asset to be constructed. **Note:** Upon notification of funding authorization, the RPAO will provide an RPUID for every asset that is known to be constructed. **(T-1)**

6.7.1.2. An updated Draft DD Form 1354 will be provided to the RPAO no later than when construction is at 80% completion (at the red zone inspection). **(T-1)**

6.7.1.2.1. The DCA PM, the BCE PM, and the RPO will work in conjunction to develop the Interim DD Form 1354. **(T-1)**

6.7.1.3. An Interim DD Form 1354 signed by the "transferred by" agent must be provided to the RPO at facility acceptance. **(T-1)**

6.7.2. The costs of new construction and capital improvements are accumulated in a CIP Account while the assets are under construction. CIP Accounts include all design and construction costs incurred after funding authorization is received. The sum of the individual costs in the CIP Account will determine the total cost of the asset that is then recorded in the appropriate General Property, Plant, and Equipment (G-PP&E) ledger account. **(T-1)**

6.7.3. Funding Entity**.** CIP for real property, including capital improvements, are reported by the funding entity in its CIP Account until the asset is placed-in-service. When the asset is placed in service, the CIP will be relieved by the funding entity. **(T-1)** At this time, an asset will be recorded by the funding entity and Interim DD Form 1354 will be used to document the new construction. **(T-1)**

6.7.3.1. If additional costs continue to be incurred after the asset is placed in-service, those costs will continue to be recorded in the funding entity's CIP Account. **(T-1)**

6.7.3.2. Upon final contract closeout, CIP will be transferred with the Final DD Form 1354, in accordance with the installation and site where the asset is located. **(T-1)** Reference DoD 7000.14-R, *Financial Management Regulation Volume 4 Accounting Policy*, Chapter 24 and the FASAB Handbook. **(T-0)**

6.7.4. Final DD Form 1354 Preparation and Project Close-Out.

6.7.4.1. The applicable DCA PM or BCE PM will complete a Final DD Form 1354 at the close-out of the project, updating any difference in costs from the Interim DD Form 1354 and providing it, along with any additional KSDs, to the RPAO. The PISD does not change with the Final DD Form 1354. **(T-1)**

6.7.4.1.1. For installations located outside of the United States or its territories, the CA can be the Host Nation or NATO. **(T-0)**

6.7.4.2. The Final DD Form 1354 distributes unallocated costs across the assets as appropriate and marks financial closeout of the CIP account for the project. This process updates the final valuation cost of the assets. **(T-0)**

6.7.5. Documentation. The project DCA PM and/or BCE PM must retain the KSDs for the corresponding project component for which they have fiscal accountability to provide an audit trail of the CIP Account. **(T-1)** For an accepted real property asset the project DCA PM and/or BCE PM must provide KSDs to the RPO which are retained in the facility folder. **(T-1)** The minimum documents required for a facility folder are defined in **7.3 Key Supporting Documents (KSDs)** of this publication. Also, refer to **Attachment 4** for KSD requirements. **(T-1)**

6.8. Accepting New Government Owned or Leased Family Housing and Capital Improvements.

6.8.1. A work order or a project that covers several facilities may be accepted on multiple Interim DD Form 1354s. Reference UFC 1-300-08, and the Real Property Construction in Progress Requirements. **(T-0)**

6.8.2. When government-controlled family housing and support facilities are maintained by contract, the contractor will provide adequate data, as determined by the DAF, and documentation for the RPI for any improvement work accomplished. **(T-1)**

6.9. Land Withdrawal. Land withdrawn from the public domain is accepted into the RPI as stewardship land. (**T-0)**

6.10. Accounting for DAF Entities on Non-DAF Property (Ingrants).

6.10.1. Establish Ingrant Inventory Records. The RPO establishes DAF inventory records for property, or detached leased facilities, that the DAF does not own but acquires for use by lease, permit, easement, license, or another written legal instrument. These records show the nature of the DAF ‘interest’ and are identified in the financial statement and RPI record as being ‘leased’. These properties must be assigned to a RPSUID and a RPUID to be linked to the instrument(s). **(T-1)** This entry includes both operating and capital leases.

6.10.1.1. The RPO will maintain data in the RPI on the terms and other specific legal characteristics of each instrument in accordance with DoDI 4165.14 and AFI 32-9001. **(T-0)** All real property assets associated with the legal agreement will be assigned a RPUID and a facility number. **(T-2)**

6.10.1.1.1. Environmental contamination and cleanup projects that require access to property for which DAF has no other interest will be accepted into the APSR for environmental remediation purposes. The interest will be minimal and must be documented with a real estate instrument. **(T-1)**

6.10.1.1.1.1. All real estate instruments, Continental United States (CONUS) and OCONUS, must be entered into the APSR and associated with a RPSUID and a RPUID. **(T-1)**

6.10.1.2. Lease interest for property owned by a non-government entity must be accepted into the RPI within 30 days of execution and have RPIM data elements populated to ensure accurate business management, reporting, and accountability. **(T-1)** Ingrant and acquisition support documents will be filed in the facility folder and the lease instrument uploaded in the APSR. **(T-1)**

6.10.1.2.1. Occupancy Agreements for property provided by GSA are required to be captured in the APSR. AFCEC/CIT Program Manager is responsible for assigning these Occupancy Agreements to specific DAF installations, based on the proximity of the GSA lease to the installation and/or grouping by a common tenant in multiple locations **(T-1).** Reference AFI 32-9001 for additional GSA acquisition information.

6.10.1.2.2. DAF facilities constructed on another military service's installations will be transferred at acceptance, for accountability purposes, to the host component and identified with the Host Installation Facility Number, RPUID, Installation Code, and Installation Name. **(T-1)** Capital improvements made by the DAF to these facilities will be reported to the Host Installation RPAO with a DD Form 1354 and sufficient supporting documentation to provide auditability of the transaction. **(T-1)**

6.10.2. **Property for DoD Components Other Than Military Department.**

6.10.2.1. DAF will serve as the Real Property Agent for other DoD Components (excluding Military Departments) in accordance with established procedures. Acquisition requests from these components must be submitted to USD(A&S) through the Air Force **(T-0).**

6.10.2.2. DAF will determine if it is the appropriate agent based on Secretary of Defense designation or if none, by agreement between the requesting DoD Component and the Air Force, or by location of the property being acquired **(T-0)**

6.10.2.3. Real Property Agent will maintain real property accountability of the new asset, will request a RPUID, and reflect the physical accountability of the asset in its APSR once property is acquired **(T-0)**

6.11. Accepting Construction in Foreign Countries.

6.11.1. The host nation may accomplish the acquisition or construction of facilities, rather than a DAF designated DCA. **(T-0)** When the facility is placed-in-service, the data and background material furnished by the Host Nation may be provided in lieu of the Interim DD Form 1354. The BCE PM will create and populate the Interim DD Form 1354 and upload KSDs in NexGen IT. The RPO will adjust the estimated capitalized amount in the APSR to reflect the actual total construction costs when final documents are provided. **(T-1)**

6.11.2. Draft and Interim DD Form 1354 preparation for New Construction or Improvement projects.

6.11.2.1. The DCA PM, or BCE PM, will create the Draft DD Form 1354 when requesting a RPUID and Facility Number at the beginning of the construction project. The DCA PM, or BCE PM, will complete the Draft and Interim DD Form 1354s in collaboration with the RPAO/RPO. The DCA PM, or BCE PM, ensures the Interim DD Form 1354 is signed and furnished to the RPAO/RPO no later than when construction is at 80% completion (at the red zone inspection). **(T-1)** For installations located outside of the United States or its territories, the CA can be the Host Nation or NATO. **(T-0)**

6.12. Accepting Real Property Acquired by Government Purchase Card (GPC).

6.12.1. Real property or RPIE acquired via GPC, may be accepted into the APSR with a Final DD Form 1354, providing it meets the criteria to be considered real property or RPIE. All real property acquired via GPC will have prior approval from the BCE and the Facilities Board. If advanced approval is not in writing, the property will be treated as unit-owned equipment. **(T-1)** If unit funds are used to purchase items considered to be RPIE, unit funds should sustain and replace the equipment. AFRC approval is required. AFRC installation will provide all KSDs prior to purchase and Air Force approvals. **(T-1)**

Chapter 7

REAL PROPERTY RECORDS MAINTENANCE

7.1. Facility Folder Maintenance.

7.1.1. The Installation RPAO/RPOs will establish, maintain, and secure a facility folder for each real property asset. The RPO will maintain file folders and will upload required KSDs, as applicable, to the APSR, in accordance with AFI 33-322 and NexGen IT Real Property Reference Guide. **(T-1)** If an installation has an existing six-part facility folder template, utilize standardized template across the installation, to include all sites. All six-part facility folders should contain the following, at a minimum:

7.1.1.1. Initial acquisition or change documentation as required. Documents include but are not limited to DD Forms 1354, AF Forms 123, AF Form 300*,* *Facility Disposal*, McKinney-Vento Act submission (CONUS only), in addition to any corresponding KSDs for audit purposes. **(T-1)**

7.1.1.2. DAF Form 914, *Physical Inventory Validation Form.* **(T-1)**

7.1.1.3. Asset utilization information (e.g., Facility Board/space utilization meeting minutes/approval, space studies). **(T-1)** Reference DAFI 32-1015, ANG reference ANGI 32-1003, *Facilities Board*.

7.1.1.4. Track past and current occupants for facility and miscellaneous documentation (e.g., correspondence, environmental documentation summary) as required. **(T-1)**

7.1.1.5. Historic Status Determination and/or substantiating documentation. **(T-1)**

7.1.1.6. Map or visual representations (e.g., boundary maps, legislative jurisdiction maps, photographs, floor plans) as required. **(T-1)**

7.1.2. Maintain KSDs of inspections and inventories in the six-part facility folder and APSR for accountability and audit purposes. **(T-1)**

7.1.3. In accordance with Office of Management and Budget M-23-07, all permanent records in federal agencies must be fully managed electronically for eventual transfer and accessioning by National Archives Records Administration (NARA). Permanent records are federal records that have been determined by NARA to have sufficient value to warrant their preservation in the National Archives even while they remain in agency custody. **(T-0)** Reference Federal Records Management Council (FRMC) website **https://www.archives.gov/records-mgmt/policy/frmc**. **(T-1)**

7.1.3.1. Real property records retire as permanent upon inactivation of the installation. The RPAO must maintain real property records as current until inactivation of installation, at which time the records are retired as permanent. The accountable installation or MAJCOM will destroy records 50 years after base inactivation if no claim is filed, or 50 years after settlement of claim, whichever is applicable. **(T-1)** Legal custody of the real property records is transferred to National Archives in an electronic format. **(T-0)** DAF/A4CA will provide electronic transfer process upon notification of impending installation closure.

7.2. Grant Folder Maintenance.

7.2.1. A Grant folder will be established for every ingrant and outgrant in accordance with AFI 33-322, *Records Management and Information Governance Program*, and maintained within RPAO/RPO control until the closure of the entire installation. Grant folders include the following information, if applicable, refer to **Attachment 4** for Grants Checklist:

7.2.1.1. Grant with any amendments. **(T-1)**

7.2.1.2. Annual verification of insurance and collection of proof of current insurance (self-insured or certificate). **(T-1)**

7.2.1.3. Initial justification and support documentation (e.g., Facility Board approval, DAF Form 813, strategic basing approval, McKinney-Vento Act submission for outgrant leases, delegated authority memorandum). **(T-1)**

7.2.1.4. Grant compliance inspection form. **(T-1)**

7.2.1.5. Rental payments reconciliation (e.g., real property revenue log) screen shots of revenue log updates. **(T-1)**

7.2.1.6. Utilization information (e.g., Facility Board/space utilization approval for use changes, space studies). **(T-1)**

7.2.1.7. Environmental Documentation. If the environmental documentation is too large to include in the folder, attach a MFR stating exact location of documentation and/or place the summary in the file. **(T-1)**

7.2.1.8. Miscellaneous documentation (e.g., correspondence, legal review, public comment, reference to location of appraisal documentation).

7.2.1.9. Map or visual representations (e.g., maps, photographs, floor plans) as required. **(T-1)**

7.2.1.10. All grants, CONUS and OCONUS, must be entered into the APSR and associated to a RPUID. **(T-0)**

7.2.1.11. The RPAO will update the real property record with the date the compliance inspection was completed and document the findings with an MFR. **(T-1)** RPO must enter review type 'INSC – Compliance' in the APSR within 30 days of inspection. **(T-1)**

7.3. Key Supporting Documents (KSDs).

7.3.1. Documents pertaining to real estate transactions, e.g., acquisition, disposal, leases, permits, will be retained in the facility folder. The RPO must have access to supporting documents such as original acquisition, approval, financial expenditure, maps, plans, blueprints, drawings, specifications, and other documents that relate to the RPI **(T-1).** These supporting documents serve as subsidiary records to the general ledger control account.

7.3.2. RPO will upload the necessary KSDs to the APSR. **(T-1).** Refer to **Attachment 3** for required KSD and Transaction naming conventions. To ensure efficient information retrieval, all submitted documents must adhere to the following standards:

7.3.2.1. Documents must follow a consistent and predetermined naming convention. **(T-1)**

7.3.2.2. Documents must be submitted as individual, directly accessible files (e.g., individual PDFs, spreadsheets, etc.) to ensure efficient review workflows. **(T-1)**

7.3.2.3. To maintain accountability and ensure compliance, all documents requiring approval or validation within the system must be signed prior to submission.

7.3.2.4. Due to incompatibility issues with NexGen IT, PowerPoint (.ppt, .pptx) and Excel (.xls, .xlsx) files are prohibited for direct submission. Users must convert these file types to a compatible format (e.g., PDF) prior to uploading to ensure accessibility and usability within the system.

7.3.2.4.1. Key Supporting Documents for Facility Records. The RPO will build and maintain a facility folder that contains the following (at a minimum) required documents:

7.3.2.4.1.1. Original property card (e.g., rescinded AF Form 1430, *Real Property Accountable Records-Buildings*, DD Form 1354, *Transfer and Acceptance of DoD Real Property*). **(T-1)**

7.3.2.4.1.2. Floor plans, drawing of record, maps, plat maps when available. **(T-1)**

7.3.2.4.1.3. Environmental documentation (e.g., DAF Form 813, *Request for Environmental Impact Analysis*, Environmental Assessment, Environmental Impact Statement, Environmental Baseline Survey, summary or waiver, General Conformity Analysis, applicable permits). If the environmental documentation is too large to include in the folder, attach a MFR stating exact location of documentation and/or place the summary in the file. **(T-1)**

7.3.2.4.1.4. The installation engineering flight will ensure the appropriate PM provides KSDs described in UFC 1-300-08 to the RPO. **(T-1)**

7.3.2.4.1.5. A cross reference to a Real Estate instrument if applicable. **(T-1)**

7.3.2.4.1.6. Asset review documentation (*Physical Inventory Validation Form*). **(T-1)**

7.3.2.4.1.7. Disposal documentation. Reference AFI 32-9004 for specific disposal processes, procedures and KSDs. Also, reference **Attachment 4** for disposal checklist. **(T-1)**

7.3.2.4.2. If original property records do not exist, they may be re-created, in accordance with an approved method from the DoD FMR to estimate the asset's PISD, reference **Attachment 9** for PISD estimation methods and documentation. To support financial reporting, the RPAO will issue a MFR with supporting documentation stating that records were not found, and the installation staff used the previously referenced approved method from the DoD FMR for PISD estimation. Further, RPAO will document the asset's predominant use CATCODE and UoM Quantity on an IADJ DD Form 1354. **(T-1)**

7.3.2.4.2.1. IADJ DD Form 1354 to support the asset as found-on base. **(T-0)**

7.3.2.4.2.2. Documentation to support estimated PISD in accordance with established SOP developed by AFCEC/CIT. **(T-2)**

7.3.2.4.2.3. DAF Form 914 based on a current inspection. **(T-1)**

7.3.2.4.2.4. Documentation to support historical status such as State Historic Preservation Office (SHPO), Federal Preservation Office (FPO), National Register Listing (NRL), or related memorandum. **(T-0)**

7.4. Real Property Data Management. Responsibility for the integrity of real property data is shared across the entire CE Enterprise, not limited to the Real Property Office. **(T-1)** The FIAR Lead will perform sample testing to validate the accuracy of KSDs in accordance with E&C SOP. **(T-1)** The government's DCA and/or PM must provide the KSDs that will support the construction in accordance with the Memorandum of Understanding (MOU)/Memorandum of Agreement (MOA) to the RPAO/RPO of the Host Installation for the purpose of an audit trail. **(T-1)**

7.4.1. The documentation must be retained in accordance with DoDI 4165.14 and AFI 33-322 and be available to higher headquarters, or auditors, upon request. **(T-0)**

7.4.2. All auditable KSDs will be uploaded to the APSR and upon request, if additional documents are necessary, KSDs must be provided to AFCEC/CIT within three business days in accordance with FIAR requirements. **(T-1)**

Chapter 8

REAL PROPERTY INVENTORY MANAGEMENT

8.1. Installation Real Property Inventories and Reporting.

8.1.1. Assistance in completing Inventory and/or Inspections**.** BCE may request that other installation personnel inventory select facilities in the performance of their functional requirements. **(T-1)** Suitable functions include but are not limited to:

8.1.1.1. Base housing office inventories and inspections of government owned housing assets/facilities.

8.1.1.2. Services organization inventories of Services and NAF facilities.

8.1.1.3. Facility managers' inventories of assigned facilities.

8.1.1.4. Installation Management Flight inventories of landfills, tanks, and environmental monitoring wells.

8.1.1.4.1. AFRC Environmental personnel perform inventories of landfills, tanks, and environmental issues.

8.1.1.5. Using organization assistance with annual inspections of ingrant and outgrant facilities to ensure Grantor/Grantee compliance.

8.1.1.6. Using organizations' inventories of ranges, range supporting structures and other assigned facilities as well as associated safety zones.

8.1.1.7. Cultural Resource Manager provides information for inventory and inspections of heritage assets. **(T-1)**

8.1.1.8. Tri-annual airfield inspection reports and reconciliations are performed under contract with AFCEC. **(T-1)**

8.1.1.8.1. AFRC tri-annual airfield inspection reports and reconciliations are performed by AFRC Airfield Operations (AFRC/A3).

8.1.1.9. Security Forces for Boundary Inspections.

8.1.1.10. Supplemental Installation personnel support to conduct annual E&C Inventory requirement.

8.1.2. Annual Requirements

8.1.2.1. Existence and Completeness (E&C). The RPO will conduct an 'Annual Identification of Real Property Assets', also called an Existence and Completeness inspection (known as "Book to Floor, Floor to Book") no later than 1 April of each fiscal year. **(T-1)** Asset identification involves external inspection of inventory and may require updates to the APSR to ensure completeness. Reference annual E&C SOP (**FIAR - All Documents (dps.mil)**) for audit compliance.

8.1.2.1.1. E&C findings will be recorded on the AFCEC published Command and Control (C&C) workbook, submitted to AFCEC/CITA Workflow, and subsequently posted on the AFCEC Accountability SharePoint link identified in the annual SOP. The RPO will maintain an inventory and KSDs for the changes made to the APSR within the facility folder for audit inspection. **(T-1)** IGIO and RPO will reconcile annually. **(T-1)** AFRC provides the AFCEC C&C workbook to each of its host locations for completion by 1 April. In co-located installations with ANG as the largest tenant, the AFRC Host will provide the C&C workbook to the local ANG tenant for completion. Both the AFRC RPO, and the ANG RPM, will collaborate to complete the task by 1 April. **(T-1)**

8.1.2.1.2. The installation RPO will update the APSR within 30 days, with the Asset Review Date and Type Code of Inspection (INSP) Physical (Existence) for all assets verified. If the change is a result of a reconciliation or Inventory/Inspection, the RPAO will ensure the APSR is updated and prepare a notification for the next Facilities Board. **(T-1)**

8.1.2.1.3. An assertion memorandum must be signed by the RPAO, FIAR Lead, BCE, and the Installation Commander to assert this inspection has been accomplished and that updates to the APSR are complete. **(T-1)** The assertion memorandum will be maintained within the RPO's facility folder for inspection with copies provided to AFCEC/CIT Workflow (**afcec.cit-.a@us.af.mil**). **(T-1)**

8.1.2.1.3.1. For ANG, the assertion memorandum must be signed by the BCE and USPFO and memo must be provided to NGB. **(T-1)** The Memorandum will be maintained within the RPM's facility folder for inspection. **(T-1)**

8.1.2.1.3.2. AFRC Installations' RPAOs will comply with the process in **paragraph 8.1.2.1.3** with the assertion memorandum copies provided to the MAJCOM. The AFRC/A4CA will provide copies to AFCEC/CITA Workflow. **(T-1)**

8.1.2.2. Installation and Site Boundary Inspections.

8.1.2.2.1. The RPO will perform boundary inspections annually to ensure that all site/installation boundary encroachments and security issues, such as trespasses, are identified and resolved by removal, if practical, or prepare an appropriate real estate instrument. **(T-1)**

8.1.2.2.2. Boundary inspections may be 'virtual' rather than physical with BCE concurrence. If performing virtual inspection, satellite imagery must be no more than one year old. **(T-1)**

8.1.2.2.3. The RPO will ensure that acquisition tracts (assemblage deeds packages) have been added to the APSR and will provide updates to the IGIO for GIS updates. **(T-0)** The inspections of the exterior sides of boundary tracts that compose the installation and site boundary are included with the annual boundary inspection. **(T-1)** Any discrepancies should be reported to the BCE.

8.1.2.2.4. The RPAO will update the Asset Review section in the APSR with the date the installation and site boundary inspection were completed and document the findings with a MFR. **(T-1)** Ensure the RPO enters in the APSR with asset review type 'INVB – Boundary' within 30 days of inspection. **(T-1)**

8.1.2.2.5. The RPO will prepare a MFR to document the inspection and any findings and retain them in the boundary facility folder(s). **(T-1)** RPO will provide updates to IGIO for updates to GIS records.

8.1.2.3. Physical Inventory Requirements (Cyclic).

8.1.2.3.1. The RPO will conduct a physical inventory of real property assets utilizing the DAF Form 914 and update the APSR to ensure a 100% review once every 5 years, or once every 3 years for historic assets. **(T-0)** This inventory inspection involves both interior and exterior review of the assets and Asset Allocation validation. Any asset that is discovered because of the exterior inventory must be added to the APSR within 30 days as Found on Site (FOS)/Found on Base (FOB). Refer to the E&C SOP on how to obtain the appropriate KSD. Any drawing updates will be provided to the IGIO. Best practice is to perform a minimum of 20% inventory of total assets and 33% inventory of historic assets annually. **(T-0)**

8.1.2.3.1.1. ANG provides information updates to ANG GeoBase. **(T-2)**

8.1.2.3.1.2. AFRC Installations RPOs will comply with DAF procedures of Cyclical Inventory requirements, including all updates to AFRC/GIS reconciliations. **(T-2)**

8.1.2.3.2. The RPO will ensure there is wide and proper distribution of the inventory schedule to all entities who will be involved in data collection and verification. **(T-1)**

8.1.2.3.3. Annually, the Installation Commander must endorse a MFR attesting the data in the RPI is accurate and supported by proper documentation. **(T-1)** Proper documentation includes results of the physical inventory. The RPO will maintain the MFR in accordance with the file plan. **(T-1)**

8.1.2.3.3.1. ANG USPFO or Assistant USPFO must, via a MFR, verify the data in **Table 8.1** is accurate and supported by proper documentation. **(T-2)**

8.1.2.3.3.2. AFRC provides oversight, review, and periodic inspection of cyclical inventory requirements. KSDs must be available to AFRC upon request. **(T-2)**

Table 8.1. Asset Information to be Validated During Physical Inventory.

Minimum Asset Information to be Validated During Physical Inventory per DoDI 4165.14
What do I have?
Installation Code
RPSUID
RPUID
Facility Number
RPA Command Claimant Code
RPA Type Code
RPA Interest Type Code
RPA Total UM Quantity
RPA Total UM Code
RPA Operational Status Code
RPA Placed in Service Date
RPA Predominant Current Use CATCODE Code
RPA Historic Status Code
RPA Historic Status Date
Where is it located?
RPSUID
Address Street Direction Code
Address Street Name
Address Street Number
Address Street Type Code
Country Code

RPA Utilization Rate
Asset Review Date (For Physical Inspection)
Asset Review Type Code (For Physical Inspection)

8.1.2.3.4. Inspections ensure that installation/site real property facilities exist and are correctly recorded with complete supporting paper documentation on file (audit trail). Upon completion, any changes identified will be documented with appropriate KSDs and updated in the APSR within 30 Days. **(T-1)** If the change is a result of a reconciliation or inventory/inspection, the RPAO will ensure the APSR is updated and prepare a notification for the next Facilities Board. **(T-1)** The APSR includes these RPA types: buildings (B), structures (S), linear structures (LS), and land (L).

8.1.2.3.4.1. The historic and cultural real property assets identified in the RPI require a physical inventory, document review, and update of the APSR to ensure a 100% review every 3 years. This inventory inspection involves both interior and exterior review of the assets and user validation. With assistance from the installation Cultural Resources Manager, the RPAO will annually reconcile, before the end of the third quarter, heritage real property assets and coding with the historical age of the facility. Make corrections and update the APSR within 30 days of identification of change in the UoM, FAC Code, or Customer Name as required. All IADJs requiring changes to the UoM and/or UoM Quantity require the use of DD Form 1354, signed by BCE or designated authority. **(T-1)** CATCODE changes require an AF Form 123, *Request for Changed Use of Real Property*. See **Chapter 3** for additional details on CATCODE changes. If the change is a result of a reconciliation or inventory/inspection, the RPAO will ensure the APSR is updated and prepare a notification for the next Facilities Board. **(T-1)**

8.1.2.3.4.1.1. ANG RPMs will document APSR adjustments via MFR signed by USPFO, or Assistant USPFO, and provide notification at the next Facilities Board. **(T-1)**

8.1.2.3.4.1.2. AFRC Installation RPOs will document APSR adjustments via MFR signed by the BCE and file in facility folder with appropriate completed KSDs noted in **paragraph 8.1.2.3.4.1**. **(T-1)**

8.1.2.3.4.1.3. OCONUS installations, if determined by local historic preservation office that a facility meets the requirement of historic and cultural resource the Historic Status Code should be FHCR. Refer to section G.2 of DoDM 4715.05-V1, *DoD Overseas Environmental Baseline Guidance Document (OEBGD): Conservation*, June 29, 2020, for local historical preservation requirements. **(T-0)**

8.1.2.3.5. The installation RPO will provide a DAF Form 914, *Physical Inventory Validation Form*, to personnel conducting an inventory and is required for all RP Asset Types (B, S, LS, *L). **(T-1)** The form should include basic facility data (e.g., Facility Number, CATCODE with description, UoM Code/Quantity) based on the updated drawing of record of the currently assigned space. The installation RPAO/RPO will ensure that the data recorded in the APSR is accurate and complete and will notify the IGIO of any changes. **(T-1)** The RPO is required to update the APSR with review asset type Inventory, Quantitative (INVQ). The form will be signed by the RPS the conducted the inspection and retained in the facility folder. **(T-1)** If someone other than

the RPO completes the inspection, the person who conducted the inspection and a member from the RPO will sign the form. **(T-1) *Land record exception**: RPOs may use one DAF Form 914 if inventorying contiguous land parcels at the same time. Document the findings per asset on an MFR with a list of the land records and file in the facility folder, as well as upload to the APSR.

8.1.2.3.5.1. AFRC Installation RPOs will conduct the physical inventory along with the Facility Managers and geospatial engineering personnel. Upon completion of the inventory the Facility Manager and RPO will sign the DAF form 914. RPO must enter in the APSR with review asset type Inventory, Quantitative (INVQ) and IGIO will ensure the geospatial information in database is accurate. **(T-1)**

8.1.2.3.6. Customer Facility Space Allocation in Real Property Facilities. RPAO ensures facilities space allocation is documented in the APSR by customer assignment in coordination with the FSP if required. **(T-1)** Facility and facility components are properly identified in accordance with DAF Category Code website at **https://usaf.dps.mil/teams/10758/CITCATCODE/module/home.aspx**.

8.1.2.4. Surveys.

8.1.2.4.1. Boundary Surveys. A licensed surveyor will certify the legal description for all boundaries of DAF installations and/or sites. **(T-1)** Not applicable to bases located in Foreign Partner Nations, refer to **Chapter 14**. A copy of the boundary survey will be kept by the RPO. **(T-1)**

8.1.2.4.2. The BCE, or NGB on behalf of AFRC, and ANG will ensure a new boundary survey is accomplished upon any acquisition or disposal of land or any time the boundary cannot be verified. **(T-1)** The legal description will be certified by a licensed surveyor and RPO will provide updates to IGIO for updates to GIS records. **(T-1)**

8.1.2.4.2.1. If an acquisition or disposal has occurred and a boundary survey was not accomplished at that time, a boundary survey will be programmed immediately. **(T-1)**

8.1.2.4.2.2. Provide the local district office of the United States Army Corps of Engineers a copy of any updates to the installation boundary survey. **(T-0)**

Chapter 9

ACCOUNTABILITY OF REAL PROPERTY DISPOSALS

9.1. Fundamentals of Disposal. Installations are responsible for continual review of land and mission requirements to ensure real property is no longer required to support the current, or projected mission, is disposed. Reference AFI 32-9004 for responsibilities and levels of approval authority for disposal of real property. Environmental reference has changed to DAFI 32-7020, *Environmental Restoration Program*. All disposals under Title 10 United States Code Section 2662 must contain certification by the Secretary of the Air Force that the feasibility of exchanging the property for other real property has been considered and it has been determined that the property to be declared 'excess' is not suitable for that purpose. RPO will not update the RPA OSC to 'Excess' (EXCS), until SF 118 has been signed by the appropriate authority and delivered to GSA; GSA will confirm receipt of property by completed SF 118. Disposal of the land, with or without improvements, may include portions of roads, fences, and other assets accounted for in aggregate records. **(T-0)**

9.2. Accountability and Care of Excess Real Property. The DAF personnel must actively maintain accountability and protect excess property from condition degradation, vandalism and theft until the disposal has been completed at all levels. Installations are authorized to reduce maintenance service levels commensurate with the proposed disposition if safety and security risks are properly managed. In the interim, the RPO will update the RPA OSC to 'Caretaker' (CARE). **(T-1)**

9.3. Reporting Disposal Actions. Under Title 40 United States Code, Section 471 et seq., Federal Property and Administrative Services Act of 1949, as amended ("Federal Property Act"), federal agencies must report 'excess' real property to GSA. When GSA determines that no federal activity needs the property, the RPO should continuously monitor the GSA Disposal website (U.S. GSA Real Property Disposition) to validate when the OSC may be changed. The RPO will update the APSR to 'Surplus' (SURP), until disposal process is complete. The selected method must be in the best interest of the government. Reference **Table 3.1**. in **Chapter 3** for Operational Status Codes. For installations and sites in foreign nations follow DoDI 4165.69, *Return of DoD Sites Overseas*. **(T-0)**

9.4. Footprint Growth Offset Policy. RPAOs will adhere to the Footprint Growth Offset Policy, outlined in DAFI 32-1015, Chapter 9, when changing the following codes or statuses in the real property records:

9.4.1. The conversion of a facility from Non-Appropriated Fund (NAF) to Appropriated Fund (APF), or of a Relocatable Facility to Real Property as detailed in **paragraph 12.5**. **Relocatable Facilities (RLFs)**constitutes an acquisition by other means. As such, these actions are considered footprint growth, and the procedures of the Footprint Growth Offset Policy must be followed. **(T-0)**

9.4.2. If an RPAO changes the OSC from 'ACT' to 'CLSD' it adds square footage to the growth offset bank for your MAJCOM and shall be reported accordingly. Reference **Table 3.1**. in **Chapter 3** for Operational Status Code details**. (T-0)**

9.5. Demolition of Facilities.

9.5.1. Record expected sales or salvage values are less and any costs necessary to prepare the facilities for disposal through sale, trade, or donation. Do not disclose costs of deferred maintenance. Facilities disposed by demolition have no net sales or salvage value but do have associated costs that must be accrued and reported in accordance with FASAB Handbook, *Statements of Federal Financial Accounting Standards No. 6: Distinguishing Basic Information, Required Supplementary Information, and Other Accompanying Information*. **(T-0)** The two key criteria for reportable liability are that a future cost is probable and that the cost can be estimated.

9.5.2. If demolition is in the footprint of new construction, an Interim DD Form 1354 must be provided when the facility is demolished/disposed. All costs of demolition are accounted for in the new construction. **(T-0)**

Chapter 10

PRIVATIZED/PRIVATELY OWNED ASSETS ON DAF PROPERTY

10.1. Accountability of Privatized/Privately Owned Assets on DAF Property. The RPO will maintain privatized assets within the APSR as the Real Property Asset Interest Type code in accordance with the current version of the RPIM for Government/Private Agreements (GVPV), Military Housing Privatization Initiative (MHPI), or if owned by a private entity, e.g., franchise bank (PRIV). **(T-1)** Complete the transaction and modify the APSR within the same month as the disposal documents are signed, for financial purposes. The RPAO will update privately owned/privatized asset records annually, if required. **(T-1)**

10.2. Military Housing Privatization Initiative.

10.2.1. New homes and supporting facilities (e.g., playgrounds, pools, community centers, maintenance facilities, utilities) that are constructed on government-owned property by the privatized housing project owner as part of the privatization project must be recorded in the APSR as RPA Interest Type MHPI and RPA OSC as ACT. **(T-2)**

10.2.2. For privatized housing assets that no longer exist on government-owned property, the RPAO will process the disposal, IAW NexGen IT RP Reference Guide. **(T-2)**.

10.2.3. Process an IADJ DD Form 1354 for those portions of aggregated assets for updates to the UoM Quantity in the DAF APSR. **(T-1)**

10.2.4. Enterprise Military Housing (eMH) System. The installation Military Housing Office maintains the eMH system and is the authoritative data source for government-controlled family housing, privatized housing, and unaccompanied housing assets. For guidance on the eMH system, reference AFI 32-6000. **(T-1)**

10.2.4.1. All housing units must have a Facility Number and RPUID provided by the installation's RPO to be added into the eMH system. **(T-1)**

10.2.4.2. Housing Office and RPO are required to conduct an annual reconciliation to ensure both APSRs mirror each other. **(T-1)**

10.2.4.3. A MFR asserting reconciliation will be signed by the RPAO and placed in the APSR lease record in the notes and documents tab. **(T-1)**

10.3. Privatized Utility Systems.

10.3.1. The installation RPAO must ensure accountability of all privatized utilities. Additions or deletions are updated in the APSR with Facility Number/RPUIDs for tracking purposes. **(T-1)**

10.3.2. Utility systems are generally sold by bill of sale. A real estate instrument for the new owner to access and service equipment on the installation is required. The aggregate records may require adjustment to accurately reflect what was sold and what is still owned for the audit trail and future funding. If FEE owned aggregate assets are privatized, and the DoD maintains interest of a small portion, an adjustment to the UoM Quantity of the FEE asset is required and a new Facility Number/RPUID must be created to track the different interest types. The real property asset Interest Type Code of the sold utility system is Government/Private Agreement (GVPV). **(T-1)**

10.4. Contractor and Other Organization Requirements. Subject to the terms of their contract or other agreement (e.g., lease) with the DAF, contractors and others may retain title to facilities they construct for their use during the performance of a contract. **(T-0)** The contractor must remove the structure or upon AFCEC/CI approval may gift it to the DAF, refer to AFI 32-9001. **(T-1)** Acceptance of Fee Interest requires either a deed, a Final DD Form 1354, or its equivalent from any other entity and additional KSDs. **(T-0)** The structure can be accepted via the following:

10.4.1. Final DD Form 1354, with block 24 signed by the entity gifting and BCE signature in block 25. **(T-0)**

10.4.2. Acceptance of Fee Interest may only occur through a deed conveyance (General Warranty, Special Warranty, or Quitclaim Deed) from the owner to protect the government's interest. **(T-0)**

Chapter 11

REAL PROPERTY FACILITY IMPAIRMENT

11.1. Recognize and report impairment of real property asset losses.

11.1.1. Impairment Assessment (Loss of Value) of Real Property Assets. The DAF must identify, measure, and financially report the impairment of a real property asset on the annual financial statement in accordance with General Accepted Accounting Principles (GAAP), specifically Statement of Federal Financial Accounting Standards (SFFAS) 44, *Accounting for Impairment of General Property, Plant, and Equipment Remaining in Use* (**T-0).** Impairment is a financial term defined as a significant and permanent decline in service utility (useful life) of General Property, Plant and Equipment (G-PP&E), which permanently alters the manner and duration of use of asset. Circumstances/events that lead to impairments are not considered normal, nor ordinary. A qualifying event could be any of the following but not limited to fire, flooding, earthquakes, tornados, and hurricanes. Qualifying events that significantly damage or limit the capability or capacity of a real property asset, prompt the need for an assessment (SFFAS 44).

11.1.1.1. Jurisdiction. The Installation Host with jurisdiction over the real property asset must recognize the asset and report an impairment loss within 90 days of the event and/or discovery of the condition **(T-0).** Reference DAF Impairment Standard Operating Procedures for additional details of the damaged assets installations are required to report.

11.1.1.2. Identify Potential Impairment. Common indicators of potential impairment include:

11.1.1.2.1. Evidence and extent of physical damage.

11.1.1.2.2. Enactment or approval of laws or regulations which limit or restrict the usage of the real property asset.

11.1.1.2.3. Changes in environmental factors (e.g. change in floodplain).

11.1.1.2.4. Technological changes or evidence of obsolescence (however, if obsolete real property continues to be used, the service utility expected at acquisition may not be diminished).

11.1.1.2.5. Changes in the facility functionality, inability to fulfill mission and/or variations of life cycle of real property.

11.1.1.2.6. Construction stoppage or contract termination; and/or

11.1.1.2.7. Real Property assets are idled or unserviceable for excessively long periods.

11.1.2. **Assessment.** The BCE, or equivalent, will utilize professional judgement to assess, determine, and measure impairment loss based upon: (1) the relative costs of providing the service before and after the decline; (2) the percentage decline permanent in-service utility; or (3) other considerations available (SFFAS 44). **(T-0)**

11.1.3. Certification. The BCE, or equivalent, will certify impairment loss and measurement methodologies. These findings will be presented to the Facilities Board, or equivalent governing body, Assessment Process as defined in SFFAS 44. The appropriate signed Facilities Board minutes, slides, and accompanying KSDs will be provided to the RPO as justification to change the OSC of impaired facility. **(T-1)**

11.1.3.1. Installation RPO will update OSC of impaired asset to closed (CLSD) with accompanying KSDs in the APSR. Retain copies of KSDs in the facility folder from the required list.

11.1.3.2. Reporting. The Installation Commander, or delegated authority, must submit a MFR with an enclosed list of facilities deemed impaired within 15 days of BCE certification to AFCEC/CI for HAF/A4CA submission. **(T-1)**

11.1.3.2.1. USPFO, or Assistant USPFO, retains responsibility for MFR submission. **(T-1)**

11.1.3.2.2. AFRC/A4 will submit MFR to AFCEC/CI for HAF/A4CA submission. **(T-1)**

11.1.3.3. Submission. AF/A4CA transmits impairment loss information, as required to SAF/FMFM, and maintains an annual log with monthly tracking activity.

Chapter 12

REAL PROPERTY INSTALLED EQUIPMENT (RPIE)

12.1. Real Property Installed Equipment (RPIE). Real property installed equipment is permanently attached or generally installed as a part of a construction or capital improvement project. The equipment cannot be removed without physically damaging the structural integrity of the asset or degrading the functionality of the asset. Not included are those items of government-owned or leased accessory equipment, apparatus, and fixtures that are essential to the function of the facility but are considered functionally unique equipment.

12.1.1. Attached or built into, on, or upon a real property facility and necessary to make the facility complete and usable regardless of end-user. If this equipment is removed, it would reduce the designed usefulness, prohibit operation of the facility, or decertify the facility from performing its designed function.

12.1.2. The equipment, component, or system is required by a Unified Facilities Criteria (UFC), applicable building code, or is part of the Plant Replacement Value Unit Cost (PUC) or Sustainment Unit Cost (SUC) in the DoD Facilities Pricing Guide (e.g., emergency generators, associated automatic transfer switches, heating, ventilation, and air conditioning (HVAC) cooling towers, etc.).

12.2. Real Property Installed Equipment Inventory (RPIE). If items are considered RPIE, have a CATCODE, and are within the footprint of the facility, it will be identified in the APSR. If RPIE is identified by a DAF CATCODE, it must be identified in the APSR as an 'Other Allocation' for the purpose of generating a sustainment, restoration, and modernization funding requirement. **(T-1)** Inventory and management of this equipment is the responsibility of the CE Squadron's Operations Flight, except for military family housing and unaccompanied housing appliances. These assets are the responsibility of the military housing office. Reference AFI 32-1001, *Civil Engineers Operations*, for the requirements of RPIE inventory management.

12.2.1. RPIE data is collected, maintained, and updated in the DAF mandated systems for Operations Management, Sustainment Management System (i.e., BUILDER, PAVER, etc.), and future designated sustainment management products.

12.2.2. The eMH program is the authoritative sustainment management suite for military family housing and unaccompanied housing furnishings and appliances. Reference AFI 32-6000.

12.3. Exclusions. Equipment in Place (EIP), to include organizational or collateral equipment, is not RPIE. EIP is fixed in place or attached to real property, but isn't an integral part of the facility, and therefore may be severed or removed without degrading the functionality and/or physically damaging the structural integrity of the facility regardless of end-user.

12.3.1. EIP does not generate a facilities sustainment funding requirement. Therefore, life cycle costs associated with organizational equipment components cannot be funded with sustainment funding.

12.3.2. The using organization is responsible for budgeting and funding the acquisition, maintenance, repair, and replacement of organizational equipment items.

12.3.3. Special Considerations for the Intercontinental Ballistic Missile (ICBM) System. This section provides specific guidance for assets supporting the ICBM system at Minot, FE Warren, Malmstrom, and Vandenberg AFBs.

12.3.3.1. Any asset directly supporting the ICBM weapon system may be classified as organization equipment, provided they do not meet the definition of Real Property.

12.3.3.2. The transfer of selected real property and RPIE assets to the ICBM weapon system is essential to ensure Air Force Personnel, weapons systems, and supporting infrastructure provide safe, secure and effective nuclear capabilities.

12.3.3.3. The delineation between a weapon system asset, Real Property (RP), and Real Property Installed Equipment (RPIE) is a dynamic process. This determination will follow the RPIE process shown in **paragraph 12.5**, and a copy of the final delineation for the weapon system will be maintained at the installation and at HAF/A4C. **(T-1)**

12.4. RPIE Determinations. Determinations are made using current and existing real property policy to guide if a given component or asset is real property, RPIE, or EIP. There are four major decision levels for RPIE determinations. Determinations should be made at the lowest level possible, and progress through decision levels as complexity and DAF wide impacts increase.

12.4.1. First decision level. First level resides with the installation RPAO, who uses current and existing real property policy to determine if a given asset is real property or RPIE. The current RPIE Determination list can be found at **https://usaf.dps.mil/teams/10758/citcatcode/rpie%20determinations/forms/allitems.aspx**. (**Note:** A CAC is required for access to this website.) The list is not all inclusive but contains examples of 'types' of property that meet the RPIE definition. If not listed in the overall RPIE Determination list, the RPAO will look at the facility CATCODE component list. In the event the installation RPAO is unable to decide, the installation RPAO initiates adjudication or clarification by the second decision level. The Installation RPAO submits a completed RPIE Determination Request Form with supporting documentation, if applicable, to AFCEC/CIT, AFRC/A4C, or NGB/A4C. RPIE determination form can be located on the CIT SharePoint site. **(T-1)**

12.4.2. Second decision level. Second level determinations are rendered by AFCEC/CITA in coordination with AFCEC/CO and in consultation with applicable subject matter experts within the Air Force Installation Engineering Division (AFIMSC/A58) and AFCEC/CF. If AFCEC/CITA is unable to decide due to lack of guidance, level of impact, etc., the request is routed to AF/A4CA for third level decision. **(T-1)**

12.4.3. Third decision level. Once AF/A4CAR receives the RPIE determination request, they conduct research utilizing current RP policy, SMEs, A4C/SEL and various CE resources, e.g., budgeting, readiness, and resiliency. If an affirmative decision is made on the determination at this level, the request is returned to AFCEC/CIT.

12.4.4. Fourth and fifth decision levels. AF/A4CA convenes a joint review with DAF, USSF, AFRC, ANG, AFIMSC, and AFCEC representatives to evaluate proposed COAs and adjudicate the RPIE determination request. During this review process, AF/A4CAR staffs the request for formal coordination and comment across DAF CE functional, AFCEC, AFIMSC, AFRC/A4C, NGB/A4C, and AF/A4C Divisions. AF/A4CAR consolidates these comments and presents the results for a final determination. By exception, if the request remains unresolved, it is escalated for a fifth and final adjudication level. **(T-1)**

12.4.5. Documentation. Upon approval at the second level or above, a memorandum summarizing the final decision will be prepared and routed for the appropriate signature. **(T-1)** If the determination results in the asset being considered RPIE, then the applicable DAF CATCODEs are applied and included in the determination memorandum. Once the policy memorandum has been signed, AFCEC/CITA will distribute to the requester and/or installation RPAOs. **(T-1)** Additionally, the policy memorandum should be incorporated into the DAF CATCODE, RPIE Determinations website. See DAF Category Codes website for complete list of RPIE determinations.

12.4.6. **RPIE Determination Requirements.** Supporting documentation is required when requesting second level through fourth level RPIE determinations.

12.4.6.1. To meet the "Necessary for the facility to be complete and usable" provision, the items should generally be required by a UFC, applicable building code, or part of the PUC or SUC in the DoD Facilities Pricing Guide. Critical equipment such as emergency generators, associated automatic transfer switches, HVAC cooling towers, etc., necessary for facility completeness and usability are considered a part of "Necessary for the facility to be complete and usable".

12.4.6.2. A DD Form 1391 or applicable work order management system summary for a given project should be provided to validate that the costs were included for funding initial construction or part of a renovation. **(T-1)**

12.5. Relocatable Facilities (RLFs). This section provides guidance for the management and accountability of RLFs, in accordance with DoDI 4165.56, *Relocatable Facilities* and DAFI 32-1020, *Planning and Programming Built Infrastructure Projects*.

12.5.1. Definition. A facility is classified as an RLF based on its original design intent to be readily transported and re-used for temporary requirements. This intent, not the construction method (modular, prefabricated, etc.), is the governing factor. Unless formally converted to real property (RP), all RLFs are managed as General Equipment (GE)

12.5.2. Conversion of RLFs to Real Property. A conversion may be initiated only when there has been a substantive change from the RLF's originally intended purpose, requiring it to be permanently affixed to the land, or when the facility is identified as a cost-effective solution to satisfy a valid, long-term requirement, thereby offsetting an anticipated RP facility cost. When these conditions are met, the conversion allows the Air Force to retain a valuable asset and achieve financial or operational benefit.

12.5.3. Approval Authority for Conversion to Real Property. In accordance with DoDI 4165.56 and as implemented by DAFI 32-1020, Chapter 8, the designated approval authority for the conversion of RLF to Real Property is AFCEC/CC, with concurrence from AFCEC/CI and AFCEC/CF. The installation is responsible for preparing and submitting the complete conversion request package, including all required analyses and documentation, through the installation leadership chain to AFCEC/CF for final decision. **(T-0)**

12.5.4. Real Property Accountable Officer (RPAO) Responsibilities for Conversion. The RPAO is the primary agent for executing the conversion and ensuring auditable documentation. The RPAO will ensure the action is compliant and auditable by adhering to the procedures in DoDI 4165.14. The RPAO will: **(T-1)**

12.5.4.1. Validate Pre-conditions. The RPAO must obtain and validate the required documentation from the engineering flight, including the economic analysis, manufacturer's certification of lifespan, and the signed commander's approval memo. **(T-1)**

12.5.4.2. Document and Process Capitalization. The RPAO will process a DD Form 1354. This form must document the complete cost, including the current depreciated value of both the RLF and all supporting real property (e.g., foundations, utilities), calculated in accordance with DoD 7000.14-R. **(T-1)**

12.5.4.3. Establish the Real Property Record. Upon acceptance of the DD Form 1354, the RPAO will create a new record in the real property APSR, securing a Real Property Unique Identifier (RPUID) and using the acceptance date as the official conversion date. **(T-1)**

12.5.4.4. Reconcile Accountability. The RPAO must actively coordinate with the equipment APO to ensure the RLF is simultaneously removed from the equipment APSR to prevent dual accountability. **(T-1)**

Chapter 13

ACCOUNTING FOR BASE REALIGNMENT AND CLOSURE INSTALLATIONS

13.1. Real Property Records During a Base Realignment and Closure Due to a Joint Basing Action.

13.1.1. In the event of a joint basing action, where the Air Force or Space Force will be the lead "supporting" Service for the joint base to a "supported" Service component:

13.1.1.1. AF/A4CA, AFCEC/CIT, and installation RPAOs will create a working group to ensure all real property data is accounted for appropriately. **(T-1)**

13.1.1.2. RPAO to ensure real property assets transfer from the supported components APSR to the DAF APSR in accordance with the established DoD joint basing guidance and implementation plan. **(T-0)**

13.1.1.3. AFCEC/CIT will ensure the supported component provides the DAF with the current inventory as recorded in the supported components APSR. **(T-0)** AFRC and ANG will coordinate with AFCEC/CIT. **(T-2)**

13.1.1.4. Prior to MOA execution, the AFCEC and supported components will conduct joint facility surveys to 1) identify and document the current occupants; and 2) determine the condition of each facility in accordance with the established facilities investment guidance. **(T-1)**

13.1.1.4.1. If the DAF requests a change in facility occupancy, the change should not occur unless agreed to by the occupying tenant or the supported component. **(T-1)**

13.1.1.4.2. A condition index or Q-rating agreed to by the DAF and supported components will be populated in the APSR for each asset. **(T-1)**

13.1.1.4.3. Facilities occupied by the Army National Guard and/or ANG will be properly identified in the RPI by population of the Reimbursable Agreement Support Code. **(T-1)** This code reflects the type of federal and state cost share agreement(s) for sustainment and operations support.

13.1.1.5. The installation RPAO will review the inventory records in close coordination with the supported component(s) to duly reconcile all errors and anomalies in addition to those identified by OSD from the facilities assessment database. **(T-1)** All errors and anomalies will be corrected in the supported component's database of record prior to transfer as required OASD (S) guidance. **(T-0)**

13.1.1.6. AF/A4CA and AFCEC/CIT will accept responsibility to account for, manage, and report all transferred real property assets to ensure that: 1) all assets are efficiently and effectively managed; 2) the inventory is accurately maintained; and 3) all transactions for the acquisition, management, and disposal of real property can be audited in their entirety and reported accurately. **(T-0)**

13.1.1.7. AFCEC will ensure the transfer of real property assets will be in accordance with a detailed timeline that lays out the critical path of required actions, to include but not limited to review and staffing of real estate agreements, transfer of system records, and signature authority. **(T-1)** This timeline will be included in the MOA Implementation Plan. **(T-0)**

13.1.2. In the event of a Joint Basing action where the Air Force or Space Force is the 'supported' Service for the Joint Base to a 'supporting' Service component, AF/A4CA, AFCEC/CIT, AFRC, NGB and installation RPAOs will:

13.1.2.1. AFCEC will ensure real property assets transfer from the DAF to the supporting component in accordance with the established DoD Joint Basing guidance and implementation plan. **(T-0)**

13.1.2.2. RPAO ensures the transfer includes those actions required to transfer real property assets and records from the DAF real property APSR to the authoritative APSR of the supporting component. **(T-1)**

13.1.2.3. AF/A4CA will ensure the DAF provides the supporting component with the current inventory as recorded in the DAF real property APSR. **(T-0)**

13.1.2.4. Prior to MOA execution, the DAF and supporting component will conduct joint facility surveys to 1) identify and document the current occupants; and 2) determine the condition of each facility in accordance with the established facilities investment guidance. **(T-1)**

13.1.2.4.1. If the supporting component requests a change in facility occupancy, the change should not occur unless agreed to by the tenant, if occupied by a tenant, or the DAF. **(T-1)**

13.1.2.4.2. Facilities occupied by the Army National Guard and/or ANG will be properly identified in the real property inventory by population of the 'Reimbursable Agreement Support Code'. **(T-1)** This code reflects the type of federal and state cost share agreement(s) for sustainment and operations support.

13.1.2.5. AF/A4CA and AFCEC/CIT will review the inventory records in close coordination with the supporting component to duly reconcile all errors and anomalies in addition to those identified by OSD from the facilities assessment database. **(T-1)** All errors and anomalies will be corrected in the supported component's APSR prior to transfer as required by OASD(S) guidance. **(T-0)**

13.1.2.5.1. AFRC provides oversight of all AFR locations and coordinates with AFCEC/CIT and HAF. **(T-1)**

13.1.2.5.2. NGB/A4 provides oversight of all ANG locations and coordinates to AFCEC/CIT and HAF. **(T-1)**

13.1.2.6. AFCEC/CIT ensures the transfer of real property assets will be in accordance with a detailed timeline that lays out the critical path of required actions, to include but not limited to review and staffing of real estate agreements, transfer of system records, and signature authority. **(T-1)** This timeline will be included in the MOA Implementation Plan. **(T-0)**

13.2. Reporting Responsibility.

13.2.1. The BCE, AFRC, or NGB will transfer all Base Realignment and Closure records to AFCEC for processing. **(T-2)**

13.2.1.1. The Host Installation and AFCEC representatives must sign a MOA to define individual responsibilities. **(T-2)**

13.2.1.2. The RPAO will record base realignment and closure real property in accordance with inventory requirements, as well as RPUID and RPSUID requirements. **(T-2)**

13.2.1.3. AFCEC should provide documentation to the Host Installation RPAO sufficient to maintain accurate and up-to-date real property records. AFCEC should provide copies of grants, agreements, and deeds to both the Host Installation RPAO and the responsible United States Army Corps of Engineers regional office.

13.2.1.4. AFCEC should notify the Host Installation RPAO, NGB/A4, United States Army Corps of Engineers, AF/A4CA, and the appropriate GSA Regional Office of completion of the Base Realignment and Closure Installation transfer within 30 days of filing final deeds and provide audit trail documentation of any property at the installation or site still owned by the DAF.

13.3. Geographically Separated Locations during a Joint Basing Action.

13.3.1. Geographically separated locations are non-adjacent property or facilities owned by, leased to, or otherwise possessed by a DoD component, whose relative proximity to a joint base makes it feasible to receive installation support functional services from a joint base installation. Geographically separated locations are defined as "sites" in the RPI.

13.3.2. AF/A4CA will approve transfers of geographically separated locations to the supporting component in accordance with the schedule detailed in the MOA implementation plan. **(T-0)** All geographically separated locations associated with a named installation will transfer unless:

13.3.2.1. Listed in the installation inventory provided to Congress pursuant to the 10 USC § 2687, *Base Closures and Realignments*, as a separate installation (which is dispositive evidence that the geographically separated location is not covered by the recommendation). **(T-0)**

13.3.2.2. A variance is approved pursuant to the variance approval process set out in DoD Initial Guidance for the Base Realignment and Closure Joint Basing Implementation plan. **(T-0)**

13.3.3. When the DAF is the joint base supported component, the installation RPAO, AFRC for AFR property, NGB/A4 for ANG property, and AFCEC/CIT will review their existing inventory of geographically separated locations to determine which, if any, locations are to remain DAF inventory control and reportability, or if they are to transfer to the supporting component. This inventory review, and any proposed variances, must be identified prior to MOA execution. **(T-1)**

13.3.4. For installations and sites in foreign nations follow DoDI 4165.69.

Chapter 14

REAL PROPERTY INTEREST OUTSIDE THE UNITED STATES (I.E., IN FOREIGN PARTNER NATIONS)

14.1. Responsibilities. DAF real property rules and regulations apply to interests held in foreign nations if they do not contradict the Status of Forces Agreement (SOFA), or applicable international agreement, governing the property.

14.2. Land Management. Chapter 5 requirements apply to installations and sites in foreign nations. Exceptions:

14.2.1. All land records on DoD installations located outside the United States (in Foreign Partner Nations) are coded ONFG in the APSR. **(T-0)**

14.2.2. Installation boundary surveys.

14.2.2.1. Surveys, if required will be in accordance with the applicable international agreements and boundaries described in the host nation/U.S. bilateral consignment agreement. **(T-0)** Surveys can be performed by RPO, the Host Nation, or jointly, in a nationally recognized format.

14.2.2.2. Required surveys will be filed with local authorities in accordance with the SOFA, or respective international agreement, or with the appropriate local authorities. **(T-0)** This also applies to surveys for easement and lease ingrants with terms greater than 20 years.

14.2.2.3. Encroachments discovered during an annual boundary inspection will be resolved in accordance with the SOFA or respective international agreement governing the property. **(T-0)**

14.2.3. Sites determined excess to DoD needs will be reported excess in accordance with DoDI 4165.69, Chairman of the Joint Chiefs of Staff Instruction (CJCSI) 2300.02K, *Coordination of Overseas Force Structure Changes and Host-Nation Notification*, CJCSI 2300.03D, *Realignment of Overseas Sites*, or applicable international agreement and in coordination with the U.S. Department of State. **(T-0)**

14.2.4. When considering vacating leased property, take prompt action to relocate DAF and DoD activities in leased building space into DoD consigned host nation installation, and dispose of excess leaseholds in accordance with the SOFA or applicable international agreement. **(T-0)**

14.2.5. Outgranting property will be done to the extent allowable by the SOFA or applicable international agreement. Outgranting will be done in accordance with procedures outlined in AFI 32-9003. **(T-0)**

14.3. Managing Real Property Facilities. requirements apply to installations and sites in foreign nations with the following exceptions **(T-0)**:

14.3.1. Follow the SOFA, or other applicable international agreement, for guidance in submitting environmental documentation.

14.3.2. In addition to the environmental documents required by the SOFA, or other applicable international agreement, additional environmental effects documents are required in accordance with AFI 32-7091, *Environmental Management Outside the United States*. For contingency locations, an Environmental Conditions Study is required in accordance with DoDI 4715.22, *Environmental Management Policy for Contingency Locations.*

CHRISTOPHER J. LEONARD, Brig Gen, DAF
Director of Civil Engineers DCS/Logistics
Engineering & Force Protection

SF/DCOO—Deputy Chief Operations Officer

SF/S3/4/7—Headquarters Space Force Deputy Chief of Space Operations for Operations

SF/S4OI—Installation and Mission Support Division of the Space Staff

Terms

Accountability—The obligation imposed by Law, lawful order, or regulation, accepted by an organization or person for keeping accurate records, to ensure control of property, documents, or funds, with or without physical possession. The obligation, in this context, refers to the financial duties, responsibilities, and those obligations necessary for protecting the public interest; however, it does not necessarily impose personal liability on an organization or person. Law, lawful order, or regulation on an officer or other person for keeping an accurate record of property, documents, or funds, including identification data, gains, losses, dues-in, dues-out, and balances on hand or in use. The person having this obligation may or may not have actual possession of the property, documents, or funds.

Accountable Property System of Record—The military service system used to control and manage accountable property records. A subset of existing organizational processes related to the lifecycle management of property; the system that is integrated with the core financial system. For DAF real property, APSR is NexGen IT.

Acquisition—Obtain interest in real property.

Acquisition Cost—The original purchase, construction, or development cost, net of (less) any purchase discounts.

Activation—Establishing a DAF function at a current DAF installation or facility or the activation of a new installation.

Air Force Controlled Property—Property occupied and used by the DAF, or another MILDEP and the DAF has accountability. i.e., leases, license, easements, permits, ingrants, private entity agreements.

Appraisal—The act or process of developing an estimated value. An opinion of the nature, quality, value, or utility of specific interests in, or aspects of, identified real estate.

Area Amount—The capacity or size of a facility in gross measurement.

Asset—Anything having monetary value. A DoD asset is any item of economic value owned by a DoD component or held in a fiduciary capacity under the control of a DoD component. The item may be physical in nature (tangible), or a DoD component may have a right to control the item (intangible). The value of a DoD asset is expressed in terms of its acquisition cost and control of the asset by DoD component must be the result of a past transaction or event.

Audit Trail—Paper and electronic trail that gives a step-by-step documented history of a transaction.

Auxiliary Installation—An installation with an aircraft-operating area that provides operational activities in support of a primary installation and depends upon a primary installation for administrative and logistical support.

Base Realignment and Closure—The congressionally authorized process DoD uses to reorganize its installation infrastructure to more efficiently and effectively support its forces, increase operational readiness, and facilitate new ways of doing business.

Basic Action Request—The formal request submitted to initiate the DAF Strategic Basing Process. The proponent of a proposed basing action will complete and submit the request to SAF/IEI (Director of Strategic Basing).

Building—A roofed and floored facility enclosed by exterior walls and consisting of one or more levels that is suitable for single or multiple functions and that protects human beings and their properties from direct harsh effects of weather (e.g., rain, wind, sun).

Business Enterprise Architecture—The enterprise architecture for the DoD Business Mission Area (BMA). The BEA guides and constrains implementation of interoperable Defense Business System (DBS) solutions as required by Title 10 USC § 2222 of the United States Code by guiding system alignment to end-to-end processes. It also guides IT investment management to align with strategic business capabilities as required by the Clinger-Cohen Act and supporting the Office of Management and Budget (OMB) and the Government Accountability Office (GAO) policies.

Cadastral Survey—Survey or map to establish real property boundaries the value, extent, and ownership of land. It involves the physical delineation of property boundaries and determination of dimensions, areas and certain rights associated with properties.

Capital Improvement—Any improvement over the capitalization threshold that increases the useful life, capacity, or size of an existing asset, regardless of the source of funding (requires a DD Form 1354).

Capital Lease—A lease is classified as a capital lease if one of the following four criteria is met: 1) the lease transfers ownership of the property to the lessee by, or at, the end of the lease term, 2) The lease contains an option to purchase the leased property at a bargain price, 3) The lease term is equal to or greater than 75% of the estimated economic life of the leased property, or 4) The present value of rental and other minimum lease payments, excluding that portion representing executory costs to be paid by the lessor, equals or exceeds 90% of the fair value of the leased property. All other leases are classified as operating leases. Refer to OMB Circular A-11, *Preparation, Submission, and Execution of the Budget*.

Caretaker—Asset has minimum maintenance for safety and security. Facility may not be inhabited, but is still structurally sound, and may be reused or converted for future use. The utilities have either been disconnected or reduced to a minimum level for safety, security, and/or preservation of the asset.

Category Code—The most detailed level of classification for real property. Denotes a specific real property type and function in accordance with the current version of the Real Property Categorization System (RPCS) and each military department's specific documentation. Air Force CATCODEs are described in **Chapter 3**.

CIATT—The Capital Improvement Accounting Treatment Template (CIATT) template determines and documents the correct accounting classification of construction, capital improvements, maintenance and repair, and demolition funds on an asset for non-MILCON projects. The CIATT allows for accurate, appropriate, and timely recording of Construction in Progress (CIP) projects within NexGen IT to support a complete population of CIP projects.

Civil Engineer Enterprise Governance—The Civil Engineer Enterprise Governance provides an overarching framework for governing the Air Force Civil Engineer Enterprise by establishing strategy, setting direction, making decisions, and overseeing enterprise-wide civil engineer processes.

Civil Works—Tasks undertaken by the Directorate of Civil Works, United States Army Corps of Engineers that include water resource development activities including flood risk management, navigation, recreation, infrastructure, and environmental stewardship and includes emergency response.

Closed—Asset is not being used or maintained. Specifically, facility is not inhabited, may not be structurally sound, and cannot be economically reused or converted for active use. Facility is identified for demolition; a programmed project has been developed and is awaiting funding authorization. Utilities must be completely disconnected (decommissioned).

Closed Operational Status Code—Mission operation ceased; facility is non-functional, not currently in use and has no future use.

Construction in Progress—A temporary classification of assets under construction. The costs of new construction and capital improvements are accumulated in a Construction in Progress Account while the asset is under construction. Construction in Progress Accounts are only utilized for construction of real property assets and shipbuilding (including ship conversion, alteration, or repair). Under certain contract provisions Construction in Progress Accounts includes all costs incurred to bring the asset to a form and condition suitable for its intended use.

Continental United States—The continental/contiguous 48 states of the United States and the District of Columbia, which do not include Alaksa and Hawaii. It is also called CONUS.

Contingency Location—A non-enduring location outside of the United States that supports and sustains operations during contingencies or other operations and is categorized by mission lifecycle requirements as initial, temporary, or semi-permanent. Also called CL.

Contingency Operations—A military operation that is designated by the Secretary of Defense as an operation in which Service members are or may become involved in military actions, operations, or hostilities against an enemy of the United States or against an opposing military force; or results in the call or order to, or retention on, active duty of Service, or any other provision of law during a war or during a national emergency declared by the President or congress pursuant to 10 USC § 101, 1805, or 2801.

Conversion—A change in use of a FH facility requiring a permanent change of category code on real property inventory records from a FH unit to a non-FH facility category code.

Cooperative Security Location—An enduring posture location characterized primarily by the periodic presence of allocated U.S. forces, with little or no permanent U.S. military presence or U.S.-controlled infrastructure, used for a range of missions and capable of supporting surge requirements for contingencies. CSLs are typically used for missions such as security cooperation and building partner capacity, and they can support an increased force presence during contingencies of finite duration. Also called CSL.

Data Analytics and Integration Support Platform—The real property community provides access to information related to DoD's real property assets and sites throughout the entire lifecycle. The information contained herein has been provided via web services from the authoritative systems within the military departments and Washington Headquarters Services and is validated against the DoD Real Property Information Model (RPIM).

Decommissioned—Series of actions performed by the CES Operations Flight when preparing a facility for disposal by demolition. Decommissioning only applies when the facility is no longer in operational use (no-occupancy) and will be demolished allowing for irrevocable shut-down actions. Any facility with a potential for return to service will not be decommissioned but instead placed in a caretaker state.

Deferred Maintenance and Repair—Maintenance and repairs not performed when they should have been or were scheduled to be and which, therefore, is put off or delayed for a future period.

Disposal—Any authorized method (i.e., demolition, transfer) of permanently divesting the DoD of accountability for and control of a real property asset of the United States.

Disposed Operational Status Code—Any authorized method of permanently relinquishing Air Force control of responsibility for, or any real property interest in, real property (Reference: AFI 32-9004)

Defense Construction Agent—The designated USACE, NAVFAC, or other DoD organization authorized pursuant to Title 10 USC §2851 and DoDD 4270.05 to administer design and facilities projects of military facilities in accordance with applicable laws and regulations.

Diversion—Temporary change in the designated use of a facility, normally does not exceed 3 years. Diversion requires a real property inventory record annotation of the applicable temporary facilities construction category code but does not change category code on real property inventory records.

Donations—Donations are contributions (i.e., voluntary gifts) of resources to a government entity by a non-federal entity. Donations may be financial resources, such as cash or securities, or nonfinancial resources such as land or buildings. The original entry in the real property inventory for donated real property must include the fair market value of that property in the “Estimated Value” field. In cases of the donation of assets classified as heritage assets or stewardship land, no amount is recognized because such property, plant and equipment would have been expensed when purchased.

Drawing of Record—An attributed floor plan that is used to account for customer allocation quantities by DAF category code of DAF real property buildings. It shows the required elements of a floor plan to calculate the square footage of a customer allocation along with the required attribution that defines the customer allocation. The drawing of record resides in the installation GIS or in the Facility Space Management Capability of the APSR. It is important to note that customer allocations are not meant to be manually measured off the drawing of record. The customer allocations are derived from the drawing of record using the appropriate tools in the GIS or automatically in the APSR.

Enduring Location—A location is enduring when DoD intends to maintain access and use of that location for the foreseeable future. The following types of sites are considered enduring for U.S. Government purposes: main operating base, forward operating site, and cooperative security location. All three types of locations may be composed of more than one distinct site. Enduring locations are published in the OSD -approved Enduring Location Master List.

Estimated Useful Life—The useful life estimate considers factors such as physical wear and tear and technological change (e.g., obsolescence). DoD evaluated estimated useful lives for real property and based on these and other factors. See **Attachment 9**, **Table A9.1**., Real Property Depreciation Schedule, for the useful life years of three real property types.

Equipment Authorized Inventory Data—Items accountable in the standard base supply system and maintained on custodian authorization/custody receipt listing.

Equipment in Place—This is a special category of personal property (not real property). EIP consists of capital equipment and other nonexpendable equipment of a movable nature that has been fixed in place or attached to real property, but not as an integral part of the facility, and therefore may be severed or removed from a facility without severely damaging, destroying, or reducing the usefulness of the facility. EIP is personal property and does not include installed building equipment. It is accounted for on property book records (not real property records). EIP costs may be included as a funded construction cost.

Expensed Improvement—Any improvement under the capitalization threshold that increases the useful life, capacity, or size of an existing asset, regardless of the source of funding (requires a DD Form 1354).

Facility Analysis Category Code—A grouping of real property assets that have a common unit of measure and equivalent cost based on the unit of measure. Included in this equivalent cost are costs associated with real property construction, maintenance, sustainment, and repair. Within the Department, a DoD Facility Analysis Category Code is represented by a four-digit numerical code, as found in DoDI 4165.03, DoD Real Property Categorization and the current version of the Real Property Categorization System.

Facility—A building, structure, or linear structure that has its own footprint will have a real property unique identifier received from the Data Analytics and Integration Support Platform and is entered into the APSR as a unique real property record.

Facility Sustainment Model—A model used to determine funding levels for sustainment, restoration, and modernization. Projects annual facility sustainment costs for the DoD facilities inventory.

Financial Improvement and Audit Remediation—The Financial Improvement and Audit Readiness goal is to improve the Department's financial management operations, helping provide America's Service men and women with the resources they need to carry out their mission and improving our stewardship of the resources entrusted to us by the taxpayers. Success will be demonstrated through a financial statement audit performed by independent auditors resulting in an unmodified audit opinion on the Department's financial statements.

Footprint Growth Offset Policy—Requires MAJCOMs, USSF, and AFIMSC to empower installations within their area of responsibility (AOR) to identify opportunities for consolidation, demolition, and entering facilities into a Closed (CLSD) Real Property Operational Status Code to ensure efforts result in a net reduction of building square footage (SF). Focus is on asset growth that will be sustained with APF O&M.

Forecast—A prediction of future real property assets, including acquisitions, transfers, and disposals, to support the DoD mission.

Foreign—Situated outside of the United States, its territories, and possessions.

Found on Site/Found on Base—An acquisition method for the discovery of a real property asset that is not currently included in the inventory, or correction of inventory, when key elements of the APSR are incorrect. An Inventory Adjustment is used to document assets missing the original acquisition documentation. A "found on site" transaction provides documentation for a real property addition to the real property inventory because of a physical inventory discrepancy (the asset is not currently in the inventory).

Future Years Defense Program—Program and financial plan for the DoD, as approved by the Secretary of Defense. The Future Years Defense Program arrays cost data, manpower and force structure over a 5-year period (force structure for an additional 3 years), portraying this data by major force program for DoD internal review for the program and budget review submission. It is also provided to the Congress in conjunction with the President's budget.

Geographic Information System—A computer system that stores, manages, analyzes and displays geographically reference information.

Geographically Separated Unit—A unit that is geographically separated beyond a reasonable commuting distance from its servicing military personnel flight or physically resides on an installation that belongs to another service/entity.

Geospatial Feature—An abstraction of a real-world phenomenon that physically places the phenomenon, via an implicit or explicit reference, to a specific location relative to the Earth. This information must be accompanied by the applicable coordinate reference system, as defined in the geospatial standards maintained by the International Organization for Standardization. Real property geospatial features are typically expressed as a point, line, or polygon. Commonly known as Geospatial Information System (GIS) data.

Growth Offset Bank—The list of buildings that were demolished from FY19 to present and as defined by Real Property Asset (RPA) Type "B" in the APSR, in CLSD operational status and with a programmed demolition project for the facility that are available to MAJCOMs or USSF for offsetting square footage growth.

Heritage Assets—General property, plant, and equipment (i.e., buildings, structures, Archaeological Sites, and Museum Collection Items) that are unique due to historical or natural significance, cultural, educational, artistic importance, or significant architectural characteristics and is retained by the Agency for one or more of the following reasons 1) Historical or natural significance, 2) Cultural, educational or artistic (e.g., aesthetic) importance, and 3) Significant architectural characteristics.

Historic Property—A prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the National Register of Historic Places. For purposes of real property management, this is a subcategory of Heritage Assets. A DAF installation's Integrated Cultural Resources Management Plan is revised annually to depict the inventory of such properties.

Historic Status—The status of a facility with respect to the National Register of Historic Places or a Host's Nation equivalent locations.

Host Installation—The Military Service or WHS holding real property accountability for a defined location.

Host Nation—A nation that receives the forces and/or supplies of allied nations and/or North Atlantic Treaty Organization organizations to be located on, to operate in, or to transit through its territory.

Industrial Facilities—Also referred to a "industrial plants," means a government-owned property, often contractor operated, that provides the DoD with defense-related materials, products, and services.

Ingrant—Actions initiated by the DAF such as licenses, leases, permits, temporary easements, foreign installation rights, international agreements, and treaties, under which the DAF acquired an interest in or control of real property in less than fee ownership.

Impairment—— A 'financial' term not widely used in the Civil Engineering Community; describes significant and permanent decline in service utility (useful life) of general property, plant, and equipment (G-PP&E) which permanently alters the manner and duration of use of asset. The determination of Impairment loss is a matter of professional judgement, such judgements may be based on (1) the relative costs of providing the service before and after the decline, (2) the percentage decline in service utility, or (3) other considerations.

Installation—In accordance with 10 U.S. Code § 2801(c) (4) a "military installation" is defined as a base, camp, post, station, yard, center, or other activity under the jurisdiction of the Secretary of a Military Department or, in the case of an activity in a foreign country, under the operational control of the Secretary of a military department or the Secretary of Defense, without regard to the duration of operational control. NexGen IT installation is an administrative record. An installation is composed of a collection of sites under a single installation commander. The sites under the installation are physical locations.

Installation Geospatial Information & Services—An OASD(S) lead Program governed by DoDI 8130.01 and supporting IG&S Governance Group (IGG). DAF Installation Geospatial Information and Services (IG&S) is a sub-set of the DAF GeoBase Program.

Interest—The type and extent of ownership of property or for the use of property, including an easement to pass over an adjacent parcel, mineral rights, outright title, or a possibility of acquiring title should a specified event occur. DoD real property interest types are defined in the RPIM.

Interim Facility Requirement—A short-term, normally 5 years or less, requirement for facilities due to transitory military missions, deployments, military contingency operations, disaster relief requirements, or temporary space requirements pending the construction or renovation of permanent facilities.

Land/Land Rights—A portion of the Earth's surface distinguishable by boundaries. Land must be accountable by parcel starting when the parcel was transferred into a military department or the WHS custody and control. Land rights to consist of air, water, mineral and deed restrictions.

Land Parcel—A real property asset identified as a specific area of land having a unique acquisition document and a legal description of its boundaries and whose perimeter is delineated by a cadastral survey, as recorded in the land records of the government entity having appropriate jurisdiction.

Linear Structure—A facility whose function requires that it traverse land (e.g., runway, road, rail line, pipeline, fence, pavement, electrical distribution line) or is otherwise managed or reported by a linear unit of measure at the CATCODE level.

Major Installation—(Primary/Parent Site): (Air Force Base, Space Force Base, Air Base, Air Guard Base, or Air Reserve Base): Self-supporting center of operations for actions of importance to Air Force combat, combat support, or training. Operated by an Active, ANG, or AFR unit of wing size or larger with all land, facilities and organic support needed to accomplish the unit mission. Must have real property accountability through ownership of all real estate and facilities. Agreements with foreign governments which give the Air Force jurisdiction over real property meet this requirement. Shared use agreements (as opposed to joint use agreements where the Air Force owns the runway) do not meet the criteria to be a major installation.

McKinney—Vento Homeless Assistance Act of 1987—A United States federal law that provides federal money for homeless shelter programs. It requires unutilized, underutilized, excess, and surplus property be reported quarterly to the United States Department for Housing and Urban Development for possible use by approved homeless care providers. References 42 USC § 11411 Use of Unutilized and Underutilized Public Buildings and Real Property to Assist the Homeless, and 24 CFR § 581, Housing and Urban Development – Use of Federal Property to Assist the Homeless and Public Law 101-645, Stewart B. McKinney Homeless Assistance Amendments Act of 1990, 29 November 1990.

Minor Installation—(Air Station, Space Force Station, Air Guard Station, or Air Reserve Station): Facility operated by Active, ANG, or AFRC unit of at least squadron size that does NOT otherwise satisfy all the criteria for a major installation/site. Examples of minor installations are ANG and AFRC flying operations that are located at civilian-owned airports.

Non-Air Force Property—Property occupied and used by the DAF in which another MILDEP or government agency has accountability. i.e., leases, license, easements, permits, ingrants, private Entity Agreements.

Organizational Equipment—Equipment maintained and sustained with organizational funds which does not meet the criteria to be considered real property installed equipment.

Other Activities—Annexes, minimally manned/unmanned installation/site with little or no real property, and leased office space. Examples are units that are located on installations belonging to other services radio relay sites, radio beacon sites, remote tracking sites, radar sites, and NAVAID sites. These types of installations are not listed in the Major/Minor Site report.

Outgrant—Leases, licenses, easements and permits which change the government's interest in or control of real property.

Outside the Continental United States—Outside the continental/contiguous 48 states of the United States and District of Columbia. Also called OCONUS.

Phase 1A Assets—Assets being utilized by the DAF, but not the financial reporting entity. This is required to allow DAF project programming for these facilities in accordance with the underlying agreement.

Placed-in-Service Date—The calendar date the real property asset is accepted for use by the DAF. On this date, an interim DD Form 1354, Transfer and Acceptance of DoD Real Property, is signed, title for asset listed on the acceptance form are transferred to the government, the government assumes liability and the warranties begin for the asset. The punch list of additional work and certificate of occupancy by local authorities are attached to the DD Form 1354. In the absence of a DD Form 1354 or similar official documentation in accordance with DoD 7000.14-R, FMR, Vol 4, Chapter 4, Annex 5, Table A4-3, placed-in-service dates may be determined using the alternate methodologies and documentation described in **Attachment 9**.

Places Without Bases—A term used to describe sites and associated assets for which the DAF has an interest and real property accountability and reporting requirement but are not yet in the APSR and do not have an identified parent installation. Also called PWOBs.

Predominant Current Use—The primary use of a real property asset is based on the largest quantity of usage for an activity or function as described by the appropriate DoD FAC Code or DAF CATCODE.

Primary Installation—A self-supporting installation, with or without an aircraft operating area that has facilities for administrative and operational activities to carry out a given mission. For recording and reporting real property, this is normally the parent or host installation.

Property Functional Council—An authoritative governance body supporting the OASD (Sustainment) in carrying out the functional responsibilities and authorities assigned to the Department in accordance with Title 10, United States Code and documented in both the Defense Installations Strategic Plan and the DASD (INF) Functional Business Strategy. This includes supporting roles and responsibilities of the OASD(S) at the Defense Business Council and Investment Review Board under the investment management processes established by the Deputy Chief Management Officer in accordance with 10, USC § 2222.

Property, Plant and Equipment—Tangible assets that (1) have an estimated useful life of 2 or more years, (2) are not intended for sale in the ordinary course of business and, (3) have been acquired or constructed with the intention of being used or being available for use by DoD. Complete accounting standards for general property, plant and equipment are included in FASAB Handbook, *Statement of Federal Financial Accounting Standards 6: Accounting for Property, Plant, and Equipment*.

Public Domain—Land originally acquired by the United States in fee simple that has never left United States ownership. The Department of the Interior (Bureau of Land Management) administers it. The DAF has full, absolute dominion over the property to sell or dispose of at will.

Real Estate Instrument—A legal document that transfers a type of real estate interest in property.

Real Property—Lands, buildings, structures, utilities systems, improvements, and appurtenances. Real property includes equipment attached to and made part of buildings and structures (e.g., heating systems); it does not include movable equipment (e.g., plant equipment).

Real Property Accountable Officer/Installation Management Organization Accountable Official—An individual (government employee) who, based on his or her training, knowledge and experience in real property management, accountability, and control procedures, is appointed by proper authority to be responsible for the establishment of records and maintenance of physical accountability for the real property charged to the accountable area, installation, or site.

Real Property Asset Interest Type Code—A code used to identify the type of legal interest the DoD holds in a real property asset.

Real Property Configuration Support Panel—A panel composed of representatives of the military departments and WHS. It is responsible for the evaluation of updates to real property accountability data and business rules.

Real Property Categorization System—A hierarchical scheme of real property types and functions that serves as the framework for identifying, categorizing, and analyzing DoD's inventory of land and facilities around the world. This scheme is comprised of a 5-tier structure represented by numerical codes, with 1-digit codes being the most general and 5 or 6-digit codes representing the most specific types of facilities.

Real Property Inventory—A detailed record (listing, system) of real property lands, buildings, structures, and linear structures.

Real Property Installed Equipment—An item of equipment that is affixed and built into a facility as an integral part of that facility. To qualify as real property installed equipment, the equipment must be necessary to make the facility complete, and if removed, it would destroy or severely reduce the designed usefulness and operation of the facility. The real property installed equipment costs are included as a funded initial construction or renovation cost. RPIE may be accounted for as a real property equipment asset record, but not as a separate facility record in the real property inventory. RPIE includes such items as control systems, heating, cooling, electrical, emergency lighting, etc.

Real Property Site Unique Identifier—A unique, non-intelligent code used to permanently identify real property sites. A real property site is a specific geographic location that has individual land parcels or facilities assigned to it.

Real Property Unique Identifier—A non-intelligent code used to permanently and uniquely identify a DoD real property asset. Every item with its own footprint should have its unique RPUID (i.e., sidewalks outside the footprint of the building should have its own RPUID).

Relocatable Facility—A habitable prefabricated structure that is designed and constructed to be readily moved (transportable over public roads), erected, disassembled, stored, and reused. Also included in the definition are tension fabric structures assembled from modular components and air supported domes, both of which can be easily disassembled, moved, and reused. For this Instruction, this definition excludes mobile military equipment such as communications vans, emergency management and command post trailers. Also excluded are tents, modular sheds less than 500 square feet, temporary contractor trailers and temporary government construction administration trailers that are located on or in the vicinity of a construction site.

Semi-permanent Contingency Location—A contingency location that provides support for a prolonged contingency operation and characterized by enhanced infrastructure and support services consistent with sustained operations.

SF18—Solicitation/Contract/Order for Commercial Products and Commercial Services. SF18 is prescribed for use in obtaining price, cost, delivery, and related information from suppliers.

Site—Physical (geographic) location that contains RPAs in which a MILDEP or WHS, on behalf of the United States, has a legal interest and maintains physical, legal, and financial accountability. Each site is assigned to a single installation. A site may exist in one of three forms: Land only, where there are no facilities present and where the land consists of either a single land parcel or two or more contiguous land parcels. Facility or facilities only, where the underlying land is neither owned nor controlled by the government. A stand-alone facility can be a site. Land, and all the facilities thereon, where the land consists of either a single land parcel or two or more contiguous land parcels.

Spatial Data Standards for Facilities, Infrastructure, and Environment (SDSFIE)—Spatial Data Standards for Facilities, Infrastructure, and Environment is a community standard, and recognized as the enterprise standard for geospatial data across the entire Department of Defense business mission area. It is a "family of standards" consisting of seven standards, one of which is the Spatial Data Standards for Facilities, Infrastructure, and Environment Vector standard. Spatial Data Standards for Facilities, Infrastructure, and Environment is managed by the IGG.

Sponsoring Entity—The military department, defense agency, DoD Field Operating Activity, or combatant command that sponsors the construction project. DoD agencies and combatant commands are not authorized to hold real property and as such these assets are under the jurisdiction of the accountable MILDEP APSR for the site where the asset is located.

Stewardship Land—Stewardship land is land and land rights owned by the Federal Government but not acquired for or in connection with items of general property, plant, and equipment. Examples of stewardship land include land used as forests and parks and land used for wildlife and grazing. All land provided to the DAF from the public domain, or at no cost, are classified as stewardship land, regardless of its use. Complete accounting standards for general property, plant and equipment are included in FASAB Handbook, *Statement of Federal Financial Accounting Standards 29: Heritage Assets and Stewardship Land*.

Structure—A facility, other than a building or linear structure that is constructed on, or in, the land.

Support Site—Air Station, Air Guard Station, Air Reserve Station, Space Force Station, or facility operated by Active, AFRC, or ANG unit that provides general support to the government mission and does not satisfy the criteria for a Major or Minor Site. Examples of support sites are AFRC and ANG installations supporting communications/engineering units, installations on standby, and installations with no flying operations which provide only base operations support to other units. These types of installations are not listed in the Major/Minor Site report.

Table of Allowance—An equipment allowance document that prescribes basic allowances of organizational equipment, and provides the control to develop, revise, or change equipment authorization inventory data.

Temporary Facility—See interim facility requirement definition.

Tenant—A military service, defense agency, field activity, or other entity that occupies or uses a real property asset where the accountable entity is a different military department. At a Joint Base, military departments are not tenants, they are either supporting or supported components.

Transfer—Real property action conveys the custody and control of real property, and its related real property installed equipment from one DAF activity to another, to another military department, or from a federal agency. A movement or shift of budgetary resources from one budget account to another.

United States—The several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, and the United States Virgin Islands, Wake Island, Midway Islands, Kingman Reef, Johnston Atoll, the Northern Mariana Islands, and any other territory or possession of the United States, and associated navigable waters, contiguous zones, and ocean waters of which the natural resources are under the exclusive management authority of the United States.

United States Property and Fiscal Officer—The Title 10 officer serving with a particular State's National Guard responsible for proper oversight and accounting of federal funds and property of the United States in the possession of the National Guard.

Useful Life—The normal operating life in terms of utility to the owner. See 'Estimated Useful Life' definition.

Utility—A distribution system, commodity source or commodity collection point that provides a common service or commodity to more than one building or structure.

Working Capital Fund—The DAF operates the Air Force Working Capital Fund to provide certain goods and services to a variety of customers, including the Army, the Navy, the DAF, non-DoD agencies, and foreign countries. Under the working capital fund concept, the DAF charges these customers for the anticipated full cost of these goods and services.

REAL PROPERTY ACCOUNTABILITY MEMORANDUMS

Table A2.1. Appointment Real Property Accountable Officer Letter Example.

APPOINTMENT OF REAL PROPERTY ACCOUNTABLE OFFICER

I hereby appoint (name, grade/rank, organization) as the Real Property Accountable Officer for this installation or site (insert sites names) and all sites on the attached list, effective (insert date).

Authority: DAFI 32-9005, *Real Property Accountability*
Signed _____Date_____ (Insert Installation Commander Signature Block)

Table A2.2. Accountability for Base Closure and Realignment Host Base Memorandum for Record Example.

Subject: Real Property Procedures and Responsibilities for _____Air Force Installation

We, the undersigned, agree and understand the following real property procedures and responsibilities will be used between the _____Air Force installation, Real Property Accountable Officer and the AFCEC site manager for _____ (Operating Location). These real property procedures and responsibilities are effective on the date the Air Force installation real property records officially become a detached installation or site of (accountable installation).

Table A2.3. Transfer of Accountability Certificate Example.

I certify that the accountable data shown on the RP accountable record, installation/site code _____(and those on the attached list) are true and correct to the best of my knowledge and belief and agree with a mutually acceptable inventory conducted by my successor and me before this transfer of accountability. The property has been transferred this date to my successor (name and grade/rank) as certified below.

Signed Title (relinquishing the duties) Date_____

I certify that I have this date received from my predecessor (name and grade/rank) all documentation pertaining to the RP accountable record, installation/site code (and those on the attached list) as shown by the last audit of the account and a mutually acceptable inventory taken by my predecessor and me, and I have this date assumed accountability for the property.

Signed Title (assuming the duties) Date_____

KEY SUPPORTING DOCUMENTATION CHECKLISTS

Table A4.1. DD Form 1354 Checklist.

Facility Number	Project Number

NOTE: All documents must be signed and dated.

Interim DD Form 1354

Evidence of Project Approval (UFC 1-300-08, Table 5-1)

☐	AF Form 332, Base Civil Engineer Work Request, NexGen Project, or DD Form 1391, Military Construction Project Data
☐	DAF Form 813, Request for Environmental Impact Analysis **(Required per DAFI 32-9005, Para 5.7, dated 14 Sep 22)** **NOTE:** *Include coordination pages of AF Form 332 if environmental is not required.*
☐	Generator Authorization Form (only if generator included on DD Form 1354)

Evidence of Obligation on Behalf of the Government (UFC 1-300-08, Table 5-1)

☐	Contract
☐	Contract Mods
☐	Statement of Work or Statement of Objectives
☐	Acceptance Letter

Printed Name		**Signature**

Final DD Form 1354

Evidence of Costs (UFC 1-300-08, Table 5-1)

☐	DD Form 250, Material Inspection and Receiving Report (CE Engineers)
☐	Obligations for Continuing Funded Contracts (USACE)
☐	Progress Payment History (USACE)

Evidence of Project Closeout (UFC 1-300-08, Table 5-1)

☐	AF IMT 3065, Contract Progress Report (must show 100% complete) (CE Engineers)
☐	As-builts (or copy of signed letter from Drafting confirming that as-builts were received)
☐	DD Form 1594, Contract Completion Statement

☐	Close-out Letter

Printed Name		Signature

APSR Verification

NOTE: Verify Information in APSR Matches Information on DD Form 1354.

☐	CATCODE
☐	Unit of Measure (UoM)
☐	Unit of Measure Quantity
☐	PISD
☐	Costs

Printed Name		Signature

New Facilities Only

NOTE: Documents that must be included in file.

☐	Facility Inventory (completed on Placed-in-Service Date & filed)
☐	Floor Plans
☐	Dated Picture of Facility with Facility Number
☐	GIS Maps
☐	Space Occupancy Info
☐	Real Estate Instrument Cross Reference Sheet (if applicable)
☐	Asset Review Documentation – Appraisals, etc. (if applicable)

Table A4.2. Changes in NexGen IT for CATCODE Checklist.

Facility Number				
KSD Checklist	**X**	**N/A**	**Date**	**Comment**
Is CATCODE accurate in NexGen IT?				
Is RPA Name/RPA Desc Text/Short Name/Description updated to new CATCODE?				
Is the comment tab updated and accurate?				
Are supporting docs uploaded into NexGen IT (Form 123, Facilities Board (FB) Minutes & Slide)?				
Are customer CATCODE page, FB minutes, FB slide & signed form 123 filed in facility folder?				
Is New Customer Assignment page printed/filed in folder with previous customer assignment pages attached?				
When checklist signed, file w/ 123 pkg in facility folder				
Signature			**Date**	

Table A4.3. Changes in NexGen IT for Customer Checklist.

Facility Number	Change From	Change To

KSD Checklist	X	N/A	Date	Comment
Change approved through FB or equivalent.				
FB Minutes signed.				
Go into NexGen IT system.				
Select Asset Record, then revise, then RPIM.				
Select Asset Allocation.				
Choose the appropriate line that needs change. Check to see that other allocations are changed if necessary.				
Select magnifying glass at Asset Allocation User Organization Code. Type in customer name. Select open circle at left of customer. Select Save and close.				
Change other allocations the same as previous step.				
Select Notes & Documents. Add a note that states, "change of assignment approved" with the FB date and "see supporting documents".				
Upload signed minutes and slides from meeting that approved the change. Select save and close.				
Print signed meeting minutes, briefing title slide and slide requesting changes.				
Print NexGen IT RPIM page showing new assignment. Write the date on the page. Select activate to complete NexGen IT changes.				
Once NexGen IT change is complete, contact Resource Management and customer to inform of the change in customer.				
File minutes, slides and NexGen IT customer page in facility file folder.				
Give folder to RP Specialist for verification.				

Signature		**Date**

KSD Checklist	X	N/A	Date	Comment
Is customer accurate in Asset Allocation in NexGen IT?				
Are notes and documents, correct?				
Are other allocations updated if needed?				
Are customer assignment page, SMC minutes and slides filed in the facility folder at the miscellaneous tab?				
Is New Customer Assignment page dated/printed/filed in folder with previous customer assignment pages attached?				
When checklist is completed and signed, file with above pages in facility folder.				

Signature		Date

Table A4.4. Change in Historical Status Checklist.

Facility Number

Checklist	
☐	RPA Historic Status Code in APSR matches historic status supporting documentation
☐	RPA Heritage Asset Indicator is correct
☐	Historical Register number entered in APSR
☐	Supporting documents are filed in Tab 5 of facility folder
☐	Multi use historical is checked (as applicable)

Printed Name		Signature

INSTRUCTIONS FOR COMPLETING AF FORM 123 – REQUEST FOR CHANGED USE OF REAL PROPERTY

Table A5.1. Instructions for Completing Af Form 123 – Request For Changed Use Of Real Property.

Installations use this form to document proposed changes and approvals for Category Code updates.

Instructions for Completing AF Form 123

- The current AF Form 123 may be found on the web at http://www.e-publishing.af.mil/.

  - **Date.** Date prepared.

  - **Name and Location of Installation/Site.** Installation/Site on which facility is located.

  - **Command**. Abbreviation of command concerned.

  - **Site Code.** Use eight-digit alphanumeric site code.

  - **Item 1. Proposed Change in Use:**

- Columns A through E contain present use. Enter data from the APSR when requesting changes. Enter Facility Number (Column A), CATCODE (Column B), CATCODE Name (Column C), Unit of Measure Code (Column D), and Other Unit of Measure Code if applicable (Column E).

- Columns F through I contain proposed use. CATCODE (Column F), CATCODE Name (Column G), Unit of Measure Code (Column H), Other Unit of Measure Code if applicable (Column I), and Facility Condition Index (Column J).

  - **Item 2. Facilities Requirements Data.** If this information is required for change it will be provided by funding organization.

- **Column A.** For installation use. If the proposed change does not exceed DAFMAN 32-1084 requirements and does not require higher HQ approval, entries in columns B through H may be omitted.

- **Column B**. Enter each category code shown in item 1, columns B and F.

- **Column C.** Enter total requirements.

- **Column D.** Enter current "Total All conditions" for each category code.

- **Column E.** Enter programmed changes, including construction (approved and funded) programmed for disposal during the ensuing fiscal year, or the difference between the two.

- **Column F.** Enter quantities to be added or deleted because of this change.

- **Columns G and H.** These columns are the difference between column C and the sums of columns D, E, and F.

  - **Item 3. Cost of Proposed Change in Use.** Enter all known or estimated costs associated with the change.

  - **Item 4**. **Justification.** Enter concise statements of all data supporting the proposed change, including reason why the facility is no longer required for current use. State if this action will change the condition code. NOTE: Additional justification is required for changes in housing and transient lodging facilities (appropriated fund and nonappropriated fund).

  - **Items 5.** Typed name and grade of Real Property Accountable Officer.

  - **Item 6.** Action by Installation Facilities Board. The checked box should be "recommend for approval" and the disapproved or approved boxes will be populated and signed by the Facilities Board recorder based on meeting outcome.

Note: Items 7 and 8 are required if "Change in Use" is outside of the installation's delegated authority.

  - **Item 7.** Action by command (AFCEC). The checked box should be "recommend for approval" and the disapproved or approved boxes will be populated and signed by the appropriate office see **3.1.8. Changing the Use/Category Code of Facility**, for exceptions.

Item 8. Action by HQ USAF (action by final approval authority)

Attachment 6

INSTRUCTIONS FOR COMPLETING DAF FORM 1192 – USAF INSTALLATIONS CHARACTERISTICS REPORT

Table A6.1. Instructions for Completing DAF Form 1192 – USAF Installations Characteristics Report.

Installations use this form to program, establish, and report changes to the characteristics of an Air Force installation/Site.

- For installations in two states, prepare an DAF Form 1192 for each state. After approval of this report, establish or update information in the installation APSR Header File.

- Do not add, update, or delete information in the base level Installation Header File until this report has been approved.

- HQ AF/CC approval is required for inter-command transfers. After approval, the gaining command prepares DAF Form 1192 and forwards to AFCEC/CIT AO if further processing is required.

Instructions for Completing DAF Form 1192

- The current DAF Form 1192 may be found on the web at http://www.e-publishing.af.mil/.

- The current RPIM Data Dictionary used for various codes is found here: Welcome to EI&E: Real Property Categorization System (osd.mil)

  - **TO**: HQ AF/A4CS

  - **FROM**: Enter the name and address of the Major Command.

  - **Block 1**. **Report Number**. Identify the initial report as number one. Thereafter, enter numbers in sequence for later reports.

  - **Block 2**. **Report Date**. The date the report is prepared.

  - **Block 3**. **Purpose of Report**. Enter to program, establish, or change the characteristics of an installation/site.

    - To program an installation/site check, the box in Block 3 next to this category and complete all applicable blocks on the form. HQ USAF/A4CS will complete blocks 25, 26 & 28.

    - To establish an installation/site, check the box in Block 3 next to this category. This indicates that a new real property installation/site has been acquired, or accountability has been accepted. Complete all applicable blocks for a new installation. HQ USAF/A4CS will complete block 26.

- To report a change or deletion of an installation/site, check the box next to this category. Complete Blocks 1-4, 10, and any block that has changed since the previous report.

- **Block 4**. **Installation/Site Name**. Enter the full name of the installation/site and installation/site kind.

- **Block 5**. **Former Names and Codes**. Enter all former installation/site names and installation/site codes. If more space is needed, use the reverse of the form.

- **Block 6**. **Abbreviated Installation/Site Name**. This is a 17-character field used in the HQ AF Installation/Site Header File. Enter the abbreviated name from Block 4 and the Installation/Site Kind Code from the Air Force RPIM Data Dictionary.

- **Block 7**. **State, Possession or Country Code**. Enter the abbreviated data item for state, possession, or country name and corresponding two-position code. If the installation/site is situated in more than one state, prepare a separate DAF Form 1192 for each state. Obtain codes from APSR or the Air Force RPIM Data Dictionary.

- **Block 8**: **Type of Installation/Site**: Check the block that indicates the type of installation/Site. See Glossary found in DAFI 32-9005 for definitions.

  - P = Primary
  - A = Auxiliary
  - O = Off-base
  - D = Detached, Other
  - L = Detached, Leased

- **Block 9**. **Major Command with RP Jurisdiction and Code**. Enter the alpha command code (e.g., ACC, AFSOC) and associated two-digit command organization code (e.g., 1C, 0V respectively) of the major command having real property jurisdiction over the installation/site. For industrial plants and ANG installations or sites, use codes 51 and 54, respectively. For AFRC installations or sites, use code 0M.
-

- **Block 10**. **Parent Installation and Code**. Enter the name and installation/site code of the parent installation to which assigned. Note: Primary, Detached and Detached Leased installations are their own parent installations and will have the same code as block 26 even though they may have a support installation to handle real property accountability. Leave blank for establishing a new primary, detached, or detached leased installations.

- **Block 11**. **Installation Furnishing RP Accountability**. Enter the name and Installation/Site code of the Installation/Site furnishing real property accountability. For non-industrial installations, enter the installation name and the four-alpha position

Installation/Site Code of the Installation/Site providing real property support. For industrial Installation/Sites, enter the contractor's name.

- **Block 12. Name of Nearest City**. Enter the name of the nearest city over 10,000 persons and the state or country code. Obtain codes from creation of the draft site in the APSR.

- **Block 13. Distance and Direction from Nearest City**. Enter distance and direction from nearest city. The direction should read the installation/site from the city (example: 8 miles NNW, 50 miles SW).

- **Block 14. Name of Nearest Town or City**. Enter the name of the nearest town or city. This could be the same as Block 12. Obtain codes from creation of the draft site in the APSR.

- **Block 15. Distance and Direction from Nearest Town or City Enter distance and direction from nearest town or city**. The direction should read the installation/site from the city (example: 3 miles NNW, 5 miles SW).

- **Block 16. Urban or Rural**. Check the proper block to show either rural or urban.

  - Urban - Land located in an unincorporated place of 2,500 or more inhabitants or in a densely settled fringe area around cities of 50,000 or more.

  - Rural - All other land.

- **Block 17. Street Address**. Enter the street address of the Installation/Site, if urban.

- **Block 18. County of Location and Code**. Enter the name of the major county of location and its code. Obtain codes from creation of the draft site in the APSR.

- **Block 19. Remarks.** For detached leased installations/sites, list the entire lease contract number. Where more than one lease is acquired, list the entire contract number of all leases. If disposing of the installation/site provide information on cancellation of the lease or deed information. List usable runways, individually by length and widths.

Enter the following information relating to the status of the runways on the Installation/Site:

Active - Flying activities are used to support the Air Force activity at the Installation/Site, or jointly with other than military flying facilities.

Inactive - Flying facilities are present but not used.

None - No flying facilities

Requirement - Approved requirement for flying activities

- **Block 20. Longitude and Latitude**. Give coordinates in degrees, minutes, and seconds on newly established installations/sites. **Exceptions:** Do not give coordinates on any newly acquired Installation/Site if the showing of coordinates would violate security. DAF Form 1192 must remain unclassified. If the giving of coordinates would result in the form being classified, enter "00 00 00."

- **Block 21. Military Establishment Date**. Enter the date (YYYY/MM/DD) the Installation/Site began functioning as a US military Installation/Site.

- **Block 22. AF Activation Date**. Enter the starting date (YYYY/MM/DD) of the Air Force major operation on the installation/site.
- **Block 23. Reactivation Date.** Enter the reactivation date (YYYY/MM/DD) only when the Installation/Site is a former Air Force installation/site.
- **Block 24. Inactivation Date.** Enter the inactivation date (YYYY/MM/DD) of an Air Force major operation.

Block 25. Function of Installation/Site and Code. Select from the following list. See Glossary found in AFI 32-9005 for definitions.

A = Airfield		J = Air Reserve
B = Non-airfield, Major		K = Hospital
C = Aircraft Warning Station		L = Industrial, Government Operated
D = Navigational Aid		M = Industrial, Contractor Operated
E = Communications		N = Non-industrial, Government Controlled
G = Depot		O = Field Test Station
H = Depot with Airfield		P = Missile
I = Air Force Range		Q = Miscellaneous

- **Block 26. Installation/Site Indicator**. Upon receipt of a report to establish an installation/site, HQ AF/A4CS assigns the installation/site indicator. On subsequent change reports, the initiating Installation/Site enters the code previously assigned.

Block 27. Status of Installation/Site. Show in the proper box the status of the installation/site. For reporting the disposal of an Installation/Site, include the disposal date.

A. Active		E. Industrial Standby
B. Inactive		F. Disposed
C. Excess		G. BRAC or partial BRAC
D. Under Construction		

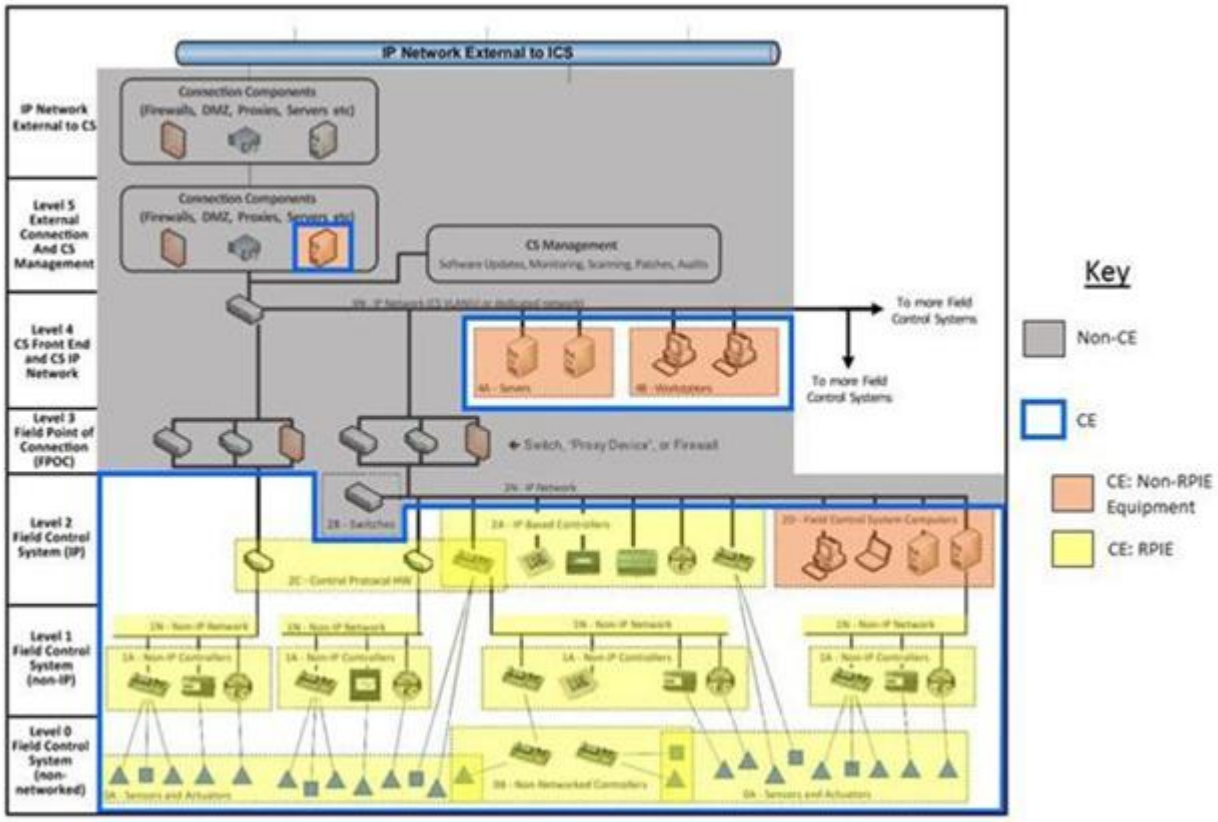

- **Block 28. Programmed Installation/Site Indicator**. AF/A4CS will fill in this block.

- **Block 29. Signature**. Authorized representative must sign the form. Normally signed at AFCEC for MAJCOM approval and HQ AF/A4CS for HQ DAF approval.

Attachment 7

REAL PROPERTY INSTALLED EQUIPMENT COMPONENTS OF CONTROL SYSTEMS

Figure A7.1. Real Property Installed Equipment (RPIE) Components of Control Systems.

A7.1. The components in Levels 0-2 are considered RPIE provided they are essential to the function of the facility and are not excluded by Chapter 12.

A7.2. In accordance with Chapter 12, Component 2B is not RPIE. Additionally, there are switches, like Component 2B, within Levels 0-2 that are dedicated to a control system. In this instance, these switches are owned by CE.

A7.3. The non-CE Equipment in Level 5 is only a CE responsibility when installed as part of a control systems enclave . (e. g., Community of Interest Network (COIN) or Virtual Local Area Network (VLAN).

Attachment 8

REAL PROPERTY DEPRECIATION SCHEDULE

Table A8.1. DoD Useful Lives for Depreciable Real Property Assets.

DoD Useful Lives for Depreciable Real Property Assets		
Real Property Classification	**Real Property Useful Lives (also applies to a full restoration & modernization action)**	**Capital Improvements* (if useful life is not provided by an Engineer Estimate)****
Buildings	45	20
Structures	35	15
Linear Structures	40	20
*Only applies if the capital improvement extends the useful life **Applies to go-forward only (after establishing the opening balance amount). Capital improvements will not be identified separately from the base asset for opening balances.		

Attachment 9

DOCUMENTATION FOR PLACED-IN-SERVICE DATE (PISD)

A9.1. These procedures will bring the DAF into compliance with the: Department of Defense Financial Management Regulation (DoD FMR 7000.14-R, Volume 4, Chapter 24, Annex 4, § A40106) for estimation of PISD when original, valid acquisition Key Supporting Documents (KSDs) are not available.

Table A9.1. Documentation for Placed-in-Service Date (PISD).

Documentation for Placed-in-Service Date (PISD)		
Documentation for PISD	**Description**	**Tier**
Tax Assessor Records	If adequate historical placed-in-service date is not available, a search of the county tax assessor's website for the asset and the purchase date should be used to determine a reasonable estimate for placed-in- service date.	1
Dedication Plaque	If adequate historical placed-in-service date is not available, a search of the asset should be conducted for a dedication plaque. Once the dedication plaque has been found, ensure that it references the DoD as owners. If DoD is listed as owners, obtain a photograph of the dedication plaque with an inscription indicating the dedication date. If DoD is not listed on the plaque, the date should not be used as an alternative for placed-in-service date.	2
Cornerstone	If adequate historical placed-in-service date is not available, search the asset for a cornerstone. If the cornerstone is found, obtain a photograph of the cornerstone. The cornerstone should be located on the outside of the building or structure with an inscription on the stone indicating the construction date. This date would be used for the placed-in-service date.	2
Earliest Site Plot of Asset	If adequate historical placed-in-service date is not available, search online in the Component database for the earliest site plot or asset drawing available. Once found, the date on the earliest plot or asset drawing may be used as a reasonable alternative for placed-in-service date.	2
Earliest Maintenance Record of Asset of Engineering Estimates (e.g., Engineering Form 3013)	IF adequate historical placed-in-service date is not available, search for work order or maintenance records from Department of Public Works, or RPAO, or local program office. Once found, the date of the earliest recorded work order or maintenance may be used as a reasonable alternative for placed-in-service date.	3
Placed-in-Service Date of	If adequate historical placed-in-service date is not available, research and obtain the actual or alternate placed-in-service date established from a major asset on the DoD site. A major asset can	3

Major Asset on Site	be defined as a significant asset that is critical to the primary function of the site. The major assets may vary based on the purpose of the site. For example, a tower would be a major asset at a communications station, a house would be a major asset at a housing site, and a lighthouse would be a major asset for a site that includes the lighthouse, housing units, as well as other assets such as driveways, fences, and storage buildings that were established to support the lighthouse. For other sites, such as air stations, units, or sectors that may have multiple functions, a major asset could be a building where many of the management and administrative activities occur. The major assets must be located within the same real property site. **(T-1)** Upon obtaining the placed-in- service date of the major asset, use the placed-in-service date of the major asset as the reasonable alternative for the placed-in-service date of the supporting assets in question. If more than one major asset has a reliable placed-in-service date on the site, and the placed-in-service date of the major assets are different, then use the placed-in-service date of the oldest asset on the site. Once found, the placed-in-service date of the oldest major asset may be used as a reasonable alternative for placed-in-service date.	
Construction Style	If adequate historical placed-in-service date is not available, a search for assets on the DoD site of a similar construction style or period. Once found, the placed-in-service date of the similar style asset may be used as a reasonable alternative for placed-in-service date. If only a range of years can be identified, then the midpoint of the range is an acceptable estimate of the placed-in-service date.	3

Table A9.2. Methods for Estimation of Placed in Service Date (PISD).

Methods for Estimation of PISD for Buildings, Structures, & Linear Structures		
Source for Data	**Description of Source**	**Documentation**
Cornerstone/ Dedication Plaque	Cornerstone, Dedication Plaque with construction date inscription, or Date-stamped concrete	Photo of the cornerstone, dedication plaque, or date stamp attached to the PISD Memorandum for Record (MFR) template (see A10.3.)
As-Built Drawing	Installation Civil Engineer Squadron As-Built Drawing Records Vault or digitized equivalent	Notation of As-Built Drawing location and date is made in the PISD MFR template
Site Plot or Aerial Photo (Including *Google Earth*)	Use dated site plot, Base plan drawings, or aerial photographs to determine the first available instance the asset is identified	For aerial photo, take a screenshot of the first instance where the asset is identified and a screenshot of the next oldest photo, and attach them to the PISD MFR template Use June 30th of the midpoint year between the two years of the dated photos to establish PISD
Environmental Permits	Installation Environmental Services records of initial environmental permits	Copy of environmental permit attached to the PISD MFR template
Fire Protection Water Riser	Locate the riser's initial inspection sticker in the facility's riser room	Photo of the riser's dated initial inspection attached to the PISD MFR template
Equipment nameplate	For stand-alone mechanical/electrical assets (e.g., generators, cooling towers) locate manufacturer nameplate for date information	Photo of the equipment nameplate or initial inspection attached to the PISD MFR template
Engineer Estimate to include earliest maintenance record or work order.	Installation Engineers will estimate PISD, to include using historical work orders, project files or journal vouchers associated with the asset.	Signed Engineering Estimate and attach all supporting documents, photos & records to the PISD MFR template
PISD of Major Asset on Site	The actual or alternate PISD established from a major asset on the same DoD site as the associated asset in question	Documentation supporting the PISD of the major asset attached to the PISD MFR template Documentation supporting the reasonableness of applying the major asset PISD to the asset in question (relationship between the two assets)
Installation Characteristic Report	Installations can estimate the PISD for aggregated linear structure assets and landfills as the date the military established the site.	Memorandum for Record estimating the PISD as the date on Block 21 of DAF Fm 1192. Attach a copy of the DAF Fm 1192 to the MFR.
