MEMORANDUM FOR DISTRIBUTION C
MAJCOMs/FLDCOMs/FOAs/DRUs

FROM: HQ USAF/A3
1670 Air Force Pentagon
Washington, DC 20330-14

SUBJECT: Air Force Guidance of Memorandum on the Transition Plan to 2026 AFMAN 11-202 Volume 2, *Standardization and Evaluation Program.*

By Order of the Secretary of the Air Force, this Air Force Guidance Memorandum (GM) immediately implements changes to the Air Force Manual (AFMAN) 11-202 Volume 2, *Standardization and Evaluation Program*. Compliance with this memorandum is mandatory. To the extent its directions are inconsistent with other Department of the Air Force publications, the information herein prevails, in accordance with Department of the Air Force Instruction (DAFI) 90-160, *Publications and Forms Management* and DAFMAN 90-161, *Publishing Processes and Procedures*. This guidance is applicable to the Regular Air Force, the Air Force Reserve, and the Air National Guard.

This Guidance Memorandum (GM) establishes the transition plan for the implementation of this manual. The purpose is to provide clear guidance during the interim period while supplements, automated systems, evaluation documentation and processes are updated to support the 2026 Stan/Eval program. The provisions of this GM apply to all MAJCOMs, subordinate units, and personnel administering or documenting evaluations under the authority of this manual.

MAJCOM Guidance Implementation. MAJCOM supplements to AFMAN 11-202V2 dated 30 August 2021 may continue to be used to administer and document evaluations unless directed otherwise by the member's MAJCOM. Supplements to this manual will be published as expeditiously as possible to reflect updated policy, but no later than 1 August 2027. Supplements should address specific evaluation program requirements, administration processes, and documentation procedures unique to the MAJCOM regarding the transition plan. Following publication of MAJCOM supplements to this manual, each Lead MAJCOM will publish an interim change (IC) or complete rewrite of their respective AFMAN 11-2MDSV2 publications, whichever will be most expeditious.

Software and Form Implementation. MAJCOMs will have until 1 August 2027 to complete required software updates. MAJCOMs may continue to use existing AF Forms (to include the AF Form 8 dated 20190626) until MAJCOM-directed software systems (e.g., GTIMS, PEX, COOL, Puck Board) have been updated to utilize the current AF Forms posted on the DAF E-Publishing website. MAJCOMs will coordinate with system program offices and vendors to ensure timely update and integration of updated AF Forms' functionality and requirements set forth in this manual. MAJCOMs will ensure Stan/Eval personnel and flight examiners are trained on the transition requirements, to include software and correct usage of the updated AF Forms.

Compliance and Reporting. MAJCOM Stan/Eval offices will monitor compliance with this transition plan and provide quarterly status updates to AFFSA/XOF. AFFSA/XOF will consolidate MAJCOM inputs and provide quarterly updates to AF/A34 until full transition is complete. The transition is considered complete once MAJCOM supplements, software updates, and AFMAN 11-2MDSV2 (and/or MAJCOM or crew position equivalent) rewrites have been published and implemented across all commands for that MDS or AFSPECWAR member.

Aircrew Transition to New Standards. Upon publication of updated MAJCOM 11-202V2 supplements and no later than 1 August 2027, all evaluations will be conducted and documented in accordance with this manual. In other words, no changes will be implemented before the MAJCOM supplement is published, but once published, an aircrew member's next scheduled evaluation will follow the new program guidance. Upon transition to the new Stan/Eval program, members will use the 2026 versions of AF Form 8 and AF Form 80. If MAJCOM-directed software is not updated to accommodate the 2026 versions of AF Form 8 and AF Form 80, members will obtain the forms from the DAF E-Publishing website. Aircrew evaluations accomplished prior to MAJCOM implementation of supplements remain valid until the expiration date. No re-accomplishment is required solely due to publication of this manual. Once MAJCOM supplements are updated, not later than 1 August 2027, and upon an aircrew becoming due for evaluation, all subsequent evaluations are to be administered and documented in accordance with this manual and applicable MAJCOM guidance. Commanders may direct an earlier transition to guidance within this manual but no earlier than publication of MAJCOM supplement.

This Memorandum becomes void after one year has elapsed from the date of this Memorandum, or upon incorporation by interim change to, or rewrite of AFMAN 11-202 V2, whichever is earlier.

CASE A. CUNNINGHAM, Lt Gen, USAF
Deputy Chief of Staff, Operations

Supersedes: AFMAN11-202V2, 30 August 2021

Pages: 127

This manual implements Air Force Instruction (AFI) 11-200, *Aircrew Training, Standardization/ Evaluation, and General Operations Structure* and must be used in conjunction with Department of the Air Force (DAF) Instruction (DAFI) 90-160, *Publications and Forms Management.* It establishes the Aircrew Standardization/Evaluation (STAN/EVAL) Program that supports Air Force (AF) objectives and provides guidance on how to structure and monitor an aircrew STAN/EVAL program. It is applicable to all units assigned to or gained by major commands (MAJCOMs) and applies to commanders, operations supervisors and aircrew personnel assigned or attached to all flying activities of these commands. This publication applies to the Regular Air Force (RegAF), the Air Force Reserve Command (AFRC), the Air National Guard (ANG), civilian employees of the United States Air Force and those with a contractual obligation to abide by the terms of AF issuances, except where otherwise noted, and to United States Air Force (USAF) aircrew personnel assigned to active flying in non-USAF aircraft and with non-USAF units. This publication does not apply to the United States Space Force, small unmanned aerial systems (sUAS), or unmanned aerial target drones. This Instruction requires the collection and or maintenance of information protected by the Privacy Act of 1974 authorized by Department of Defense Instruction 5400.11, DoD Privacy and Civil Liberties Programs. The applicable System of Record Notice (SORN) F011 AF XO A, Aviation Resource Tool Enterprise Mission Information System (ARTEMIS), is available at **http://dpclo.defense.gov/Privacy/SORNs.aspx**. Ensure all records generated as a result of processes prescribed in this publication adhere to Air Force Instruction 33-322, Records Management and Information Governance Program, and are disposed in accordance with the Air Force Records Disposition Schedule, which is located in the Air Force Records Information Management System. Submit suggested improvements to this manual on DAF Form 847, *Recommendation for Change of Publication,* through STAN/EVAL

channels, to Air Force Flight Standards Agency, Flight Directives (AFFSA/XOF). MAJCOMs, field operating agencies (FOAs) and Headquarters Air Force (HAF) direct reporting units (DRUs) will supplement this manual. MAJCOMs, FOAs and DRUs will coordinate their supplement to this manual with AFFSA/XOF prior to certification and approval for publishing. Units coordinate their supplement with the next higher Numbered Air Force (NAF)/MAJCOM, as applicable. Air Force Reserve Command (AFRC) and ANG units will provide a copy of their supplement to their gaining MAJCOM and the active-duty NAF with STAN/EVAL oversight responsibility. The authorities to waive MAJCOM, wing, or unit level requirements in this publication are identified with a tier ("T-0, T-1, T-2, T-3") number following the compliance statement; AF/A34 is the waiver authority for non-tiered items. Refer to DAF Manual (DAFMAN) 90-161, *Publishing Processes and Procedures,* for a description of the authorities associated with the tier numbers. Process waivers (from request/renewal to approval/denial to archival) through the chain of command IAW DAFMAN 90-161. The use of the name or mark of any specific manufacturer, commercial product, commodity, or service in this publication does not imply endorsement by the Department of the Air Force.

SUMMARY OF CHANGES

This document has been substantially revised and should be completely reviewed. Major changes include: organization OPR change (AF/ACTF to AFFSA/XOF); updated AF Form 8, *Certificate of Aircrew Qualification* and renamed the form to AF Form 8, *Record of Aircrew Evaluation*; removed AF Form 8A, *Certificate of Aircrew Qualification (Multiple Aircraft)*; added AF Form 80, *Multiple Qualification Request and Authorization;* updated form examples in the attachments; changed guidance for required qualification evaluations and subsequent periodic evaluation requirements; removed no-notice requirement; removed commander-directed downgrade and replaced it with commander directed remedial action (CDRA), clarified how additional flight examiners provide comments for evaluations; clarified pyramid evaluation process; clarified requalification (RQ) evaluation details; and added additional justification to extend aircrew evaluation expiration date.

Chapter 1

PURPOSE

1.1. General.

1.1.1. The purpose of the Aircrew Standardization and Evaluation (STAN/EVAL) program is to support a positive approach toward improving readiness and promoting safe operations by reinforcing procedural discipline, crew proficiency, and consistent application of standards. It provides a standardized, objective framework to verify individual aircrew qualifications and ensure compliance with governing directives.

1.1.2. The program also provides commanders with a documented means of tracking individual aircrew qualifications and contributes to the assessment of standardization across flying operations.

1.1.3. The program provides commanders with an objective tool to identify individual and systemic performance trends which can assist in strengthening standardization, improving aircrew performance, and enhancing overall unit effectiveness.

1.1.4. The program ensures aircrew possess the knowledge and skill consistent with the requirements of their assigned crew position and the ability to manage the risks of flight as an effective crew/flight member.

1.1.5. Aircrew includes the total complement of rated officers, career enlisted aviators (CEAs), non-CEA aircrew, and non-rated personnel whose duties directly contribute to the safe ground or flight operation of aircraft and onboard systems, or who perform airborne duties essential to mission accomplishment.

1.1.5.1. This includes members in initial formal training for direct assignment to an authorized operational flying position.

1.1.5.2. This program is not required for cadets participating in U.S. Air Force Academy (USAFA) airmanship programs.

1.2. Objectives.

1.2.1. Improve mission readiness, reduce aviation mishaps, and improve safety through the effective standardization of aircrew practices and procedures.

1.2.2. Assess aircrew knowledge and compliance with operating procedures, training, and administrative directives.

1.2.3. The evaluation assists commanders in maintaining a high level of flying proficiency in a unit.

1.2.4. Identify trends and recommend changes to training programs and directives.

1.3. Waiver Authority. Reference DAFMAN 90-161, *Publishing Processes and Procedures,* for a description of the tier waiver authority (i.e., T-0, T-1, T-2, T-3). Follow the *entire* waiver process outlined in DAFMAN 90-161, the AFI 11-200, *Aircrew Training, Standardization/ Evaluation, and General Operations Structure* and this manual. Route questions regarding content and waivers pertaining to this publication to the appropriate MAJCOM STAN/EVAL and then (as necessary) to AFFSA/XOF via email **hqaffsa.xof@us.af.mil**.

1.3.1. AF/A34 is the waiver authority on non-tiered items within this AFMAN.

1.3.2. MAJCOM/A3s are the waiver authority for individual aircrew requirements. MAJCOM/A3s may not approve blanket or group (two or more aircrew) waivers unless otherwise authorized by a higher waiver authority.

1.3.3. Request tiered waivers through applicable STAN/EVAL channels to the appropriate waiver approval authority. MAJCOM/A3s will forward Tier 0 waiver request(s) to AFFSA/XOF to evaluate, make formal recommendation, and staff to AF/A34 for submission consideration to non-DAF authority. MAJCOM/A3s will forward Tier 1 waiver request(s) to AFFSA/XOF to evaluate and staff to AF/A34 for consultation. Approved Tier 2 waivers are provided to AFFSA/XOF for tracking purposes.

1.3.4. Waiver authority for supplemental guidance will be as specified in the supplement and approved through higher level coordination authority.

1.4. Supplements and Local Procedures. Reference DAFMAN 90-161, *Publishing Processes and Procedures,* Headquarters Operating Instruction (HOI) 33-3, *Correspondence Preparation, Control, and Tracking*, and AFI 11-200, *Aircrew Training, Standardization/ Evaluation, and General Operations Structure*, for guidance on coordinating MAJCOM supplements to this manual (to include AFMAN 11-2MDSV2).

1.4.1. MAJCOM Supplement Coordination. MAJCOMs will coordinate supplements IAW **paragraph 1.4** and current HAF staffing processes with AFFSA/XOF included as a mandatory coordinator. Provide a final copy of MAJCOM supplements (to include AFMAN 11-2MDSV2) to AF/A34, with courtesy copy to AFFSA/XOF.

1.4.2. Local Supplement Coordination. Units send proposed local supplements to parent MAJCOM STAN/EVAL for coordination. When published, provide a final copy to applicable MAJCOM STAN/EVAL.

1.5. Terminology. For standardization purposes, the following terms are used throughout this manual.

1.5.1. References to AFMAN 11-2MDS V2 encompasses publications listed in **Table 1.1**. This is not an all-inclusive list.

Table 1.1. Types of Publications Covered when Referencing the AFMAN 11-2MDS V2.

No.	Publication Type	Example
1	Mission Design Series specific publications	AFMAN 11-2HC-130J V2
2	Aircrew specific publications	Aeromedical Evacuation (AE) series
3	Functionally specific publications	The Flight Test (FT) series
4	MAJCOM specific manuals	AETCMAN 11-2T7 V2

1.5.2. Unless specified otherwise, references to MAJCOM guidance encompasses supplements to this manual, AFMAN 11-2MDS three-volume set (see **paragraph 1.5.1**), and other MAJCOM documents (e.g., Ready Aircrew Program (RAP) tasking memorandum).

1.5.3. All references to “Commander” or “Approving Official” delineate an individual on G-series orders or as appropriately delegated (acting) IAW DAFI 51-509, *Appointment to and Assumption of Command*. Where only “commander” is listed, it is also referring to an “approving official”.

1.5.4. The term “squadron” is synonymous with a squadron-level “detachment” IAW MAJCOM organizational guidance.

1.5.5. The term “flight” includes both the use of an aircraft or aircrew training device (ATD), see **Attachment 1**, approved by the lead-MAJCOM for the accomplishment of evaluations.

1.5.6. References to operations group commander (OG/CC) encompasses equivalent positions such as training group commanders, fighter group commander, etc.

1.5.7. References to “DAFMAN 11-402 action” refers to guidance related to suspension, disqualification, revalidation, and requalification of aviation service of rated officers, career enlisted aviators, parachutists and civilian government employees and/or a Flying Evaluation Board (FEB) (i.e. **Chapter 6** and/or **Chapter 8**, respectively, of the publication dated as listed in **Attachment 1**)

Chapter 2

HIGHER HEADQUARTERS ROLES, RESPONSIBILITIES AND ORGANIZATION

2.1. Scope. For the purposes of this manual, Higher Headquarters (HHQ) includes HAF, MAJCOM and NAF STAN/EVAL functions.

2.2. HHQ Roles and Responsibilities.

2.2.1. **HAF Deputy Chief of Staff, Operations (AF/A3), through the Director, Training and Force Management (AF/A34).** Develops policy and guides the conduct and execution of the aircrew standardization and evaluation programs. Synchronize AF Standardization and Evaluation electronic records and software products compatible across the force that will meet requirements of this AFMAN.

2.2.2. The Air Force Flight Standards Agency (AFFSA).

2.2.2.1. **Flight Directives Branch (AFFSA/XOF).**

2.2.2.1.1. Is the office of primary responsibility (OPR) for the aircrew standardization and evaluation program at the Air Force level.

2.2.2.1.2. Manages the aircrew standardization and evaluation program.

2.2.2.1.3. Monitors and reviews MAJCOM programs to ensure policies, guidance, and supplements are adequate.

2.2.2.1.4. Reviews and coordinates MAJCOM, Lead Command, 11-2MDS, Volume 2, and aircrew specific supplements to this manual.

2.2.2.1.5. Maintains liaison with HAF organizations, MAJCOMs, and aircrew career-field functional managers.

2.2.2.1.6. Coordinates with HAF organizations and MAJCOM STAN/EVAL functions to ensure guidance related to aircrew standardization and evaluation conforms and complies with Air Force policy and guidance.

2.2.2.1.7. Develops and manages the AF-level aircrew STAN/EVAL Self-Assessment Checklists (SAC) and uploads the SAC in the Management Internal Control Toolset (MICT) as specified in DAFI 90-302, *The Inspection System of the Department of the Air Force*.

2.2.2.1.8. Hosts annual, or as required, conferences or working groups to assist in maintaining appropriate commonality among MAJCOM STAN/EVAL programs and to review or improve Air Force STAN/EVAL policies and procedures.

2.2.2.1.9. Provide staff assistance visits (SAV) when requested by MAJCOM commander or delegated authority.

2.2.2.1.10. Maintain information relevant to STAN/EVAL functions on the AFFSA/XOF SharePoint® page: **https://usaf.dps.mil/sites/affsa/SitePages/Flight-Directives.aspx**.

2.2.2.2. **Advanced Instrument School (AFFSA/XOT).** Maintains the HQ AFFSA Instrument Examination Secure Question Bank (SQB), which is used as part of Instrument (INSTM) Qualification Evaluation. AFFSA/XOT will notify MAJCOM STAN/EVAL offices whenever changes are made to the SQB.

2.2.2.3. **AFFSA Aircrew.** To improve HAF policies and promote standardization, AFFSA aircrew may fly with any USAF, USAFR, or ANG unit. Members may log appropriate time if qualified and certified in the aircraft, otherwise log "O" or "X" in accordance with (IAW) DAFMAN 11-401, *Aviation Management*.

2.2.3. **Air Force Special Warfare Division (AF/A34S).**

2.2.3.1. Is the OPR for Air Force Special Warfare (AFSPECWAR) requisites at the Air Force level.

2.2.3.2. Coordinates with AFFSA/XOF to ensure AFSPECWAR aircrew evaluations comply with basic guidance in this manual.

2.2.3.3. Ensures AFSPECWAR aircrew guidance in AFMAN 10-3500 series Volumes 1 and 2 fulfils the requirements of 11-2MDS Volumes 1 and 2 guidance contained in this publication.

2.2.3.4. AF/A34S, in coordination with AFFSA/XOF, determines policy and guidance precedence for AFSPECWAR-specific guidance. Guidance in other series publications will only be more restrictive than guidance contained in this AFMAN and applicable MAJCOM supplements.

2.2.4. **Air Force Medical Command (AFMEDCOM).**

2.2.4.1. Is the OPR for flight surgeon requisite at the Air Force level.

2.2.4.2. Coordinates with AFFSA/XOF to ensure flight surgeon evaluations comply with basic guidance in this manual, see **Chapter 11**.

2.2.4.3. AFMEDCOM/A3P Maintains an examination SQB for Flight Surgeons. The flight surgeon Qualification Exam (FSQE) is accessed via the USAF School of Aerospace Medicine training website (**https://usafsam.geniussis.com/Registration.aspx**).

2.2.5. **MAJCOM.**

2.2.5.1. **General.**

2.2.5.1.1. MAJCOM STAN/EVAL staff are responsible for providing oversight of STAN/EVAL programs and functions in subordinate units, including ANG or AFRC units that are in a Total Force Association, by establishing guidance and administrative processes specific to that MAJCOM. Coordination between lead and component MAJCOMs is mandatory IAW DAFMAN 90-161 and AFI 11-200.

2.2.5.1.2. DRUs and FOAs are considered MAJCOMs for purposes of this manual.

2.2.5.1.3. The ANG is considered a MAJCOM for the purposes of this manual. Through the establishment of a memorandum of agreement with a lead MAJCOM, the ANG may utilize an active-duty MAJCOM STAN/EVAL office to fulfill the STAN/EVAL function.

2.2.5.2. **MAJCOM will:**

2.2.5.2.1. Coordinate on general and aircraft/weapons system-specific operational procedures, evaluation criteria, and aircrew guidance for aircrew standardization. Coordinate conferences, planning teams, and working groups as necessary to collect inputs from tasked units.

2.2.5.2.2. Publish volume 2 publications which may be aircrew specific (such as the Aeromedical Evacuation (AE) series), functionally specific (such as the Flight Test (FT) series), or aircraft specific. See **paragraph 1.5.1**.

2.2.5.2.3. Determine policy and guidance precedence for AFSPECWAR and Mission Design Series (MDS)-specific guidance, in coordination with the other publication OPRs. Guidance in other series publications will only be more restrictive than guidance contained in this AFMAN and applicable MAJCOM supplements.

2.2.5.2.4. Establish flight examiner certification standards within the MAJCOM Supplement. AFRC and ANG will coordinate with lead MAJCOMs as appropriate.

2.2.5.2.5. Upon request, provide STAN/EVAL flight operations functional subject matter experts to:

2.2.5.2.5.1. Assist MAJCOM/Inspector General (IG) during formal inspections.

2.2.5.2.5.2. Assist unit SAVs when requested by a wing commander (WG/CC) or equivalent.

2.2.5.2.5.3. Assist safety offices and agencies in evaluation of aircraft mishaps.

2.2.5.2.6. Establish a supplemental evaluation program and conduct evaluations of subordinate units.

2.2.5.2.7. Provide staff coordination and control of all Flight Crew Information File (FCIF) items issued from the MAJCOM level to units, see **Chapter 18**. Maintain oversight of STAN/EVAL functions in gained ANG units.

2.2.5.2.8. Coordinate and process applicable DAF Forms 847, *Recommendation for Change of Publication*, and Enhanced Technical Information Management System (ETIMS) recommended changes for technical orders (TO) through STAN/EVAL channels IAW AFI 11-215, *Flight Manuals Program* and through DAFMAN 90-161 for publications.

2.2.5.2.9. Establish and provide guidance for an electronic flight bag (EFB) program (and electronic knee board (EKB) if applicable) IAW lead MAJCOM/NAF guidance.

2.2.5.2.10. Establish guidance for processes and procedures on use of MAJCOM-directed STAN/EVAL software that will meet requirements of this AFMAN. Coordinate with necessary parties (e.g., software program managers) on any changes to STAN/EVAL processes or evaluation criteria. Any MAJCOM-directed software will be capable of digital transferability of data (e.g. AF Forms 8, AF Forms 80, a member's entire Flight Evaluation Folders (FEF), memos entered into the member's FEF) between other MAJCOM-directed STAN/EVAL software; see **paragraph 17.10.4** for incompatible electronic FEF software.

2.2.5.2.11. Assist lead MAJCOM in review, update and distribution of aircraft-specific and/or aircrew-specific SQBs for open book exams and Master Question Files (MQF) for closed book exams, see **Chapter 14**.

2.2.6. **Lead MAJCOM.**

2.2.6.1. Lead MAJCOM STAN/EVAL staff are responsible for developing aircraft/weapons system STAN/EVAL products, procedures, standards, and supporting products. Coordination with lead, training and user MAJCOMs will be conducted IAW DAFMAN 90-161 and AFI 11-200.

2.2.6.2. **Lead MAJCOMs will:**

2.2.6.2.1. Develop and coordinate with user MAJCOMs to establish standardized aircraft/weapons systems qualification (QUAL), instrument (INSTM), mission (MSN) and instructor (INSTR) evaluation criteria in the appropriate AFMAN 11-2MDS V2. Establish graded areas and subareas, identify required and critical areas, and clearly define grading criteria for each evaluation, area, and subarea. Publish aircrew-specific AF Forms 3862*, Flight Evaluation Worksheet*, in the AFMAN 11-2MDS V2. Document in the AFMAN 11-2MDS V2 which, if any, ATDs can be used for the completion of required qualification evaluations listed in **Table 5.1**; at a minimum, this must specify crew position, applicable qualification evaluation(s), and associated ATDs.

2.2.6.2.2. Develop and coordinate general aircraft/weapons system operational procedures and guidance, including proposing and coordinating aircraft/weapons system-specific FCIF material to the training and user MAJCOMs.

2.2.6.2.3. Review, update and distribute aircraft-specific and/or aircrew-specific SQBs and MQFs, see **Chapter 14**.

2.2.6.2.4. Establish and maintain a trend program, see **Chapter 19**.

2.2.6.2.5. Facilitate and perform all-MAJCOM clearinghouse and processing functions for aircrew-related lead MAJCOM MDS DAF Forms 847 and ETIMS recommended changes to forward applicable change recommendations to:

2.2.6.2.5.1. Coordinate with the Air Force Lifecycle Management Center (AFLCMC) System Program Office (SPO) flight manual manager (FMM) to update TOs and/or TO checklists.

2.2.6.2.5.2. Assist in the revision and/or rewrite of applicable publications with the publication OPR.

2.2.6.2.6. Assess and validate stakeholder flying and policy standards (e.g. SAV, SPOT)

2.3. MAJCOM Organization.

2.3.1. The MAJCOM/A3 (or equivalent) is responsible for the overall organization and management of the MAJCOM STAN/EVAL program.

2.3.2. MAJCOMs ensure STAN/EVAL staff organization and personnel at all echelons comply with the standards in this manual.

2.3.3. MAJCOM STAN/EVAL staff not listed under **paragraph 2.3.6** consists of a chief, deputy, and one aircrew member per crew position per assigned aircraft/weapons system. **(T-1)**

2.3.4. The chief of the respective MAJCOM STAN/EVAL functions will designate and certify HHQ flight examiners in writing. **(T-2)** This includes temporary HHQ flight examiners assigned from lower echelons for the purpose of conducting limited assignments on behalf of the MAJCOM STAN/EVAL function.

2.3.5. STAN/EVAL will not be combined with other functional roles or responsibilities nor will individuals perform multiple staff functional roles (e.g., both STAN/EVAL and Safety). **(T-1)**

2.3.6. Institutional AF MAJCOM STAN/EVAL staffs:

2.3.6.1. Air Force Materiel Command (AFMC) STAN/EVAL consists of the division chief and representative personnel for predominant crew positions and aircraft. **(T-2)** AFMC STAN/EVAL appoints Command Chief Pilots (CCP) for all aircraft where there is no expertise resident within AFMC/A3V. CCPs serve as the MAJCOM experts in their designated aircraft and are responsible for the training, evaluation, operations and technical policy for their respective aircraft. See the AFMC Supplement for additional CCP responsibilities.

2.3.6.2. Air Education and Training Command (AETC) STAN/EVAL staff consists of a chief and one aircrew member per crew position per assigned aircraft/weapons system. **(T-2)**

2.3.7. MAJCOMs may use NAFs and/or subordinate members as augmentees to support STAN/EVAL functions IAW DAFI 38-101, *Manpower and Organization*. Augmentees from other MAJCOMs may be used with concurrence of owning MAJCOM STAN/EVALs. Augmentees will use the criteria of the MAJCOM they are augmenting.

Chapter 3

UNIT STAN/EVAL FUNCTIONS ROLES, RESPONSIBILITIES AND ORGANIZATION

3.1. Scope. For the purposes of this manual, "unit" includes levels of organization under HHQs required to establish a STAN/EVAL function. Most units are composed of an Operations Group (OG) or Wing with an A-Staff (Air Base Wing, Combat Wing, or Institutional Wing) and flying squadrons/detachments, **see paragraph 1.5** regarding terminology for squadron and detachment. Where there is no parent OG or Wing A-Staff, squadrons will assume the respective duties. In a total force arrangement, unit and squadron responsibilities are assigned to the sponsor organization (e.g., host unit) only.

3.2. Operations Group or Wing. The conduct of the unit level STAN/EVAL program is directed by the operations group commander (OG/CC) or WG/CC as executed through the wing staff, usually wing operations staff, or wing standardization and evaluation office (WGV). OG/CC encompasses equivalent positions such as Training Group Commander, Fighter Group Commander, etc.

3.2.1. **OG/CC or WG/CC Responsibilities.** The OG/CC or WG/CC will:

3.2.1.1. Provide the necessary personnel to the unit STAN/EVAL function to execute the duties directed by this AFMAN. Groups/Wings will not combine STAN/EVAL functional roles, nor will individual members perform multiple functional roles.

3.2.1.2. Designate and certify OG STAN/EVAL (OGV) or WGV flight examiners in writing.

3.2.1.3. Provide the means to procure the necessary materials for mission planning, pre-flight briefings, and flying supervision.

3.2.1.4. Provide a suitable STAN/EVAL testing area that allows easy monitoring of examinees by STAN/EVAL personnel.

3.2.1.5. Chair the Standardization and Evaluation Board (SEB) and report SEB minutes to MAJCOM.

3.2.1.6. Establish procedures to implement MAJCOM-mandated STAN/EVAL software.

3.2.2. **OGV/WGV Functions.** The OGV/WGV will:

3.2.2.1. Emphasize overall unit standardization at the OGV/WGV level. Under the direction of the Chief of OGV/WGV, flight examiners will ensure standardization throughout squadron STAN/EVAL (CCV) functions and squadron-assigned flight examiners. **(T-1)**

3.2.2.2. Establish procedures for review and quality control of FEFs and associated STAN/EVAL documentation (both hard copy and electronic, as applicable) listed in **Chapter 17**. **(T-1)** OGV/WGV will maintain unit FEFs, if not maintained by the squadron STAN/EVAL function. **(T-1)**

3.2.2.3. Establish procedures for requisite Aircrew Examinations, see **Chapter 14**. **(T-1)**

3.2.2.4. Establish and maintain a trend program, see **Chapter 19**. **(T-1)**

3.2.2.5. Conduct supplementary evaluations as directed by the OG/CC or WG/CC, see **Chapter 19**. **(T-1)**

3.2.2.6. Conduct periodic SEBs. **(T-1)**

3.2.2.7. Establish and maintain the unit FCIF program.

3.2.2.8. Establish procedures to manage the flight manual program IAW AFI 11-215 and TO 00-5-1, *Air Force Technical Order System*. **(T-1)**

3.2.2.9. Coordinate on and process applicable DAF Forms 847 through STAN/EVAL channels IAW AFI 11-215 for flight manual changes and DAFMAN 90-161 for publication changes. **(T-1)**

3.2.2.10. Accomplish and document annual airspace reviews for military training route(s) and aerial refueling tracks for which the unit is OPR IAW DAFMAN 13-201, *Airspace Management,* and FAA Order JO 7400.2, *Procedures for Handling Airspace Matters*. **(T-1)** Document status of reviews in the SEB minutes, see **Attachment 2**. **(T-1)** Refer to FAA Order JO 7610.14, *Non-Sensitive Procedures and Requirements for Special Operations*, for additional information and requirements.

3.2.2.11. Manage the Operations Supervision program as applicable IAW AFI 11-418, *Operations Supervision*. **(T-1)**

3.2.2.12. Establish and maintain unit EFB program (as required) IAW MAJCOM/NAF guidance, to include guidance for utilization and publication management tools. **(T-1)**

3.2.2.13. Coordinate with and support the Instrument Refresher Program (IRP) Administrator on the conduct of the local instrument refresher program IAW AFMAN 11-210*, Instrument Refresher Program*. **(T-1)**

3.2.3. **OGV/WGV Organization.**

3.2.3.1. OGV/WGV staff will consist of a Chief of STAN/EVAL, Deputy Chief of STAN/EVAL (optional for AFRC/ANG) and will include at least one flight examiner, per crew position, per aircraft/weapons system. **(T-1)** Additionally, the OGV/WGV Chief of STAN/EVAL will assign a primary and alternate FCIF library custodian from among the OGV/WGV flight examiners or assigned personnel. **(T-1) AFMC Only:** OG/CCs or WG/CCs determine personnel/workforce levels sufficient to complete the STAN/EVAL requirements but should consist of the Chief of STAN/EVAL and include one flight examiner per crew position per aircraft/weapons system.

3.2.3.2. The Chief of STAN/EVAL will be a certified flight examiner in a unit aircraft/weapons system. **(T-2)** For units undergoing conversion, the Chief of STAN/EVAL may be qualified in the aircraft/weapons system to which the unit is converting to, even if none are assigned.

3.2.3.3. The Chief of STAN/EVAL will report directly to, and be rated by, the OG/CC or WG/CC (as appropriate). **(T-1)** For units not collocated with the parent wing/group, the Chief of STAN/EVAL will report directly to and be rated by the unit commander, or as specified by MAJCOM supplement. **(T-1) Exception:** When the Chief of STAN/EVAL position is occupied by a member of another component under an approved Total Force Association, the member's rater is assigned within the member's administrative chain-of-command, unless otherwise agreed upon.

3.2.3.4. The OG/CC or WG/CC may designate STAN/EVAL Liaison Officers (SELO) to assist OGV/WGV in administrative duties.

3.3. Squadron. Any or all the following responsibilities may be assumed at a higher level in situations where a squadron STAN/EVAL function does not exist, as specified in MAJCOM and/or unit supplements to this manual.

3.3.1. **Squadron Commander (SQ/CC) Responsibilities.** The SQ/CC will:

3.3.1.1. Certify and designate squadron flight examiners, see **Chapter 4**.

3.3.1.2. Assign qualifications and designate aircrew upon successful completion of associated requirements.

3.3.1.3. Ensure that individuals whose evaluation expires within three months after their departure for a permanent change of station (PCS) to a flying assignment in the same aircraft/weapons system, or during an upcoming Temporary Duty (TDY) or deployment (flying or non-flying), complete the required evaluation(s) before departing. **Note:** Applies to an extended TDY or deployment that may preclude the member from completing a required evaluation within the prescribed period.

3.3.2. **CCV Functions.** The focus of the CCV program is standardization at the squadron level. When STAN/EVAL functions reside at the squadron level, the program is established by the SQ/CC and administered by flight examiners assigned to the squadron. The squadron STAN/EVAL function will:

3.3.2.1. Manage and conduct aircrew evaluations. **(T-2)**

3.3.2.2. Conduct supplementary evaluations as directed by the SQ/CC, see **Chapter 19**. **(T-2)**

3.3.2.3. Implement STAN/EVAL aircrew examination procedures. **(T-2)**

3.3.2.4. Implement OGV/WGV FEF maintenance and review guidance. **(T-3)**

3.3.2.5. Assist OGV/WGV in managing the STAN/EVAL trend program, see **Chapter 19**, to inform training and safety offices to improve readiness. **(T-2)**

3.3.2.6. Coordinate and process applicable DAF Forms 847 through STAN/EVAL channels and IAW AFI 11-215 and DAFMAN 90-161 for other publications. **(T-2)**

3.3.2.7. Assist OGV/WGV in implementing the flight manuals program IAW AFI 11-215 and TO 00-5-1 and ensure compliance with the OGV/WGV FCIF program. **(T-2)**

3.3.2.8. Ensure proper completion, routing, and filing of AF Forms 8. **(T-2)**

3.3.2.9. Inform squadron leadership of aircrew progression toward completion of aircrew evaluations and requisites. **(T-2)**

3.3.2.10. Implement OG/WG guidance on the usage of MAJCOM-directed STAN/EVAL software. **(T-2)**

3.3.2.11. Submit SEB data IAW **Chapter 19** and **Attachment 2**. **(T-2)**

3.3.2.12. For units undergoing conversion, the Chief of STAN/EVAL may be qualified in the aircraft to which the unit is converting to, even if none are assigned. **(T-2)**

3.3.3. **CCV Organization.**

3.3.3.1. The CCV consists of a Chief of STAN/EVAL and Deputy Chief of STAN/EVAL who are certified flight examiners; **(T-2)** the Deputy Chief of STAN/EVAL position is optional for AFRC/ANG. The CCV will include one examiner per crew position per assigned aircraft/weapons system at a minimum. **(T-2)**

3.3.3.1.1. **AFMC Only:** Due to limited personnel, Squadron/Unit commanders determine personnel/workforce levels sufficient to complete the STAN/EVAL requirements.

3.3.3.1.2. **AFMC Only:** When flight examiners within the flying unit are not available, attached or Total Force Integration (TFI) aircrew may be certified as flight examiners for the flying unit.

3.3.3.2. The CCV Chief of STAN/EVAL will report directly to, and is rated by, the SQ/CC. **(T-3) Exception:** When the CCV Chief of Stan/Eval position is occupied by a member of another component under an approved Total Force Association, the member's rater is assigned within the member's administrative chain-of-command, unless otherwise agreed upon.

3.3.3.3. If desired, utilize SELOs designated to assist in administrative STAN/EVAL duties.

Chapter 4

FLIGHT EXAMINERS

4.1. General. The aircrew evaluation portion of the Aircrew STAN/EVAL Program is administered by flight examiners at the HHQ and unit levels.

4.1.1. Flight Examiners (FE). FEs are certified using the AF Form 4348, *USAF Aircrew Certifications*. Commanders should limit the number of flight examiners to the minimum required to conduct evaluation requirements to fulfill operational requirements of **Chapter 3**.

4.1.2. Civil Service/Contract Flight and Simulator Instructors (CFSI). Civil service and aircrew, including simulator instructors, may be certified as FEs by the respective commander or HHQ STAN/EVAL function. If certified as flight examiners, CFSIs must meet all applicable evaluation requirements listed within this publication and will maintain a FEF. **(T-2)**

4.1.3. A HHQ FE is an FE assigned to a MAJCOM or NAF for the purpose of managing the HHQ's Aircrew STAN/EVAL Program, e.g. an A3V office, and administering necessary pyramid evaluations for subordinate units.

4.1.4. Senior Flight Examiner (SFE). Flying NAF/CCs, NAF/CDs, WG/CCs, WG/CDs, WG/A3s, OG/CCs, and MAJCOM or NAF chiefs of STAN/EVAL are eligible for SFE status. MAJCOM or NAF deputy chiefs of STAN/EVAL that are O-5 or above are eligible for SFE status. **(T-1)** OG/CDs that are O-5 or above who fly different aircraft/weapons systems from the OG/CC in multi-aircraft/weapons systems wings (or occupy a different crew position in the same aircraft/weapons system) may be designated as SFE at the OG/CC or WG/CC discretion. Additionally, senior enlisted leaders at the group or higher, as determined by the MAJCOM, are eligible for SFE status. SFE do not require, nor must they maintain instructor qualification, but must have completed flight examiner certification IAW MAJCOM standards. Refer to MAJCOM supplement for SFE standards and requirements.

4.2. Responsibilities. FEs will:

4.2.1. Conduct aircrew evaluations IAW this manual and MAJCOM guidance**.** Document IAW **Chapter 15** and **Chapter 16**.

4.2.2. Maintain qualification as an instructor and maintain flying proficiency. **(T-1)** This requirement is not applicable (N/A) for SFE and simulator instructors designated as FEs.

4.2.3. Conduct a thorough pre-mission briefing and post-mission debriefing for the examinee and applicable aircrew members on all aspects of the evaluation. **(T-1)**

4.2.4. Immediately correct breaches of flying safety or flight discipline during an evaluation (applicable to all crewmembers). **(T-1)**

4.2.5. As soon as possible, notify the examinee's SQ/CC (or available supervision if the SQ/CC cannot be reached) whenever an examinee receives an overall grade of Q2 or Q3. **(T-1)**

4.2.6. Advise aircraft commanders and crews, prior to all flight evaluations, that FEs witnessing significant deviations and/or unsafe airmanship in any crew position(s) must report the incident(s) to the unit commander. **(T-1)**

4.3. Flight Examiner (FE) Restrictions.

4.3.1. FEs will not administer evaluations to personnel who are responsible for writing or endorsing their performance report without formal approval from MAJCOM/NAF STAN/EVAL. **(T-2)** These instances will be coordinated with MAJCOM STAN/EVAL prior to the proposed evaluation. **(T-2)** When notified of this situation, MAJCOM STAN/EVAL will make every effort to find an alternative flight examiner. **(T-2)** If MAJCOM/NAF STAN/EVAL is unable to provide a flight examiner, document on the AF Form 8 Section VI (Remarks), with the date and name of approving official(s) from MAJCOM or delegate. Specify member(s) in the MAJCOM supplement.

4.3.2. FEs will administer aircrew evaluations only within their aircraft/weapons system/aircrew specialty and only evaluate those mission/skill sets in which they maintain qualification and/or certification. **Exceptions:**

4.3.2.1. When specifically authorized in weapon system/MDS-specific AFMAN 11-2MDS V2.

4.3.2.2. When conducting an objectivity evaluation.

4.3.2.3. In addition to their aircraft/weapons system of qualification, SFEs may accomplish a special purpose evaluation type (SPOT) evaluation on any aircrew. MAJCOMs define the scope of SFE-administered SPOT evaluations.

4.3.3. Examiners will not evaluate events, areas, or subareas for which they are non-current, unless authorized by the SQ/CC. FEs may regain currency on the events, areas or subareas to be evaluated in the same sortie for which they are conducting an evaluation, but this should be done prior to the evaluation of applicable events. Currency requirements do not apply to simulator instructors designated as FEs.

4.3.4. Examiners will not evaluate personnel on a syllabus evaluation if they were the instructor on the previous syllabus sortie (e.g. a “recommendation ride”) or where they have instructed more than fifty percent of training during either initial qualification or requalification (RQ). Exceptions may be authorized by the OG/CC or WG/CC.

4.4. Selection.

4.4.1. Select flight examiners from the most qualified and experienced instructors. Refer to **paragraph 4.1.4** for SFE. HHQ FE selection requirements are determined by the MAJCOM.

4.4.2. Commanders certify all unit FEs using AF Form 4348. MAJCOM/NAF chiefs of STAN/EVAL certify assigned HHQ FEs using AF Form 4348. Aircraft/weapons system FE and SFE certifications are distinct and, if both apply, should be annotated separately on the member’s AF Form 4348. Award flight examiners the “Q” AFSC prefix IAW DAFMAN 36-2100, *Military Classification, Technical Training, and Retraining* and Air Force Officer Classification Directory, *The Official Guide to the Air Force Officer Classification Codes*.

4.4.3. **For AFRC and ANG units:**

4.4.3.1. The USAF advisor is an active-duty officer assigned to AFRC advisor duties and may be certified as a flight examiner.

4.4.3.2. Mission Ready/Combat Mission Ready status does not affect FE selection or capabilities.

4.4.3.3. Air Technician (AT)/ Air Reserve Technician (ART)/ Active Guard and Reserve (AGR) personnel should occupy flight examiner positions. For all aircrew positions, when a non-technician/AGR fills a STAN/EVAL unit manning document position, units may assign a technician/AGR in that crew position to the STAN/EVAL division. In this case, the technician assumes the duties of the flight examiner for that crew position and may administer all evaluations.

4.4.4. **CFSI Standardization and Evaluation.**

4.4.4.1. OGV/WGV is responsible for recommending CFSIs who meet the standard for certification to the OG/CC or WG/CC.

4.4.4.2. The Contract Officer's Representative (COR) will be informed of any CFSI who performs to less than Q1 standards on an evaluation or when standardization concerns may require appropriate and/or contractual action. **(T-1)** OGV/WGV is responsible for tracking and documenting all CFSI evaluations, qualifications, and certifications.

4.4.4.3. Evaluations for CFSIs will be conducted by a OG, WG, or MAJCOM/NAF examiner. **(T-2)**

4.4.4.4. CFSIs designated as FEs who only conduct evaluations (areas/subareas or qualification evaluations authorized in the certified aircraft/weapons system simulator) in an ATD, are not required to be qualified or current in the actual aircraft but must meet applicable evaluation requirements within the ATD only. **(T-1)** CFSIs who conduct in-flight evaluations will comply with applicable guidance, aircrew requirements and will be fully compliant with this publication. **(T-1)**

4.5. Pyramid Evaluation Program. The pyramid evaluation program is a hierarchical structure that ensures FEs, to include SFEs (see **paragraph 4.1.4**), receive evaluations from a higher echelon of examiners within the STAN/EVAL structure (e.g., squadron examiner evaluated by the chief or deputy CCV. A squadron chief or deputy CCV evaluated by a group or wing examiner). Pyramid evaluations ensure standardization, oversight, and continuity across echelons of examiner authority. See **Table 4.1** and MAJCOM guidance for applicability of pyramid evaluations.

Table 4.1. Pyramid Evaluation Applicability.

No.	Evaluation Type or Situation	Required	Notes
1	Initial (INIT) evaluations	No	See MAJCOM guidance
2	Optional (SPOT) evaluations	No	See MAJCOM guidance
3	QUAL and INSTM periodic evaluations	Yes	Applies to all qualified examiners within the evaluation chain.
4	RQ evaluations that are not part of formal course	Yes	Treated the same as periodic evaluations.
5	INSTR evaluation but only if completed in combination with No. 3 or 4.	Yes	Treated the same as periodic evaluations.
6	INSTR evaluation other than No. 5. (e.g. MAJCOM approved instructor refresher course, see **paragraph 9.4**.)	No	See MAJCOM guidance
7	Multi-qualified aircrew	Yes	Applies only to the aircraft/weapons system for which member is certified as a FE.
8	Conversion/upgrade/RQ training graduate from formal schoolhouse	No	See MAJCOM or schoolhouse guidance
9	Aircrew undergoing aircraft conversion at home unit	No	Waived to accommodate conversion training timelines and resource availability.
10	No higher-echelon FE available	No, with coordination	Coordinate waiver IAW **paragraph 4.5.4** and document IAW **paragraph 16.6**.

4.5.1. MAJCOM or NAF examiners are the highest echelon FE in the pyramid for an aircraft/weapons system and will provide evaluations to appropriate lower echelon examiners within the evaluation pyramid when practicable, see **paragraph 4.5.4**. These examiners may receive evaluations from any appropriately qualified examiner who is not their supervisor (e.g. OG/CC would not receive an evaluation from the Chief of OGV but the Chief of OGV may receive an evaluation from the OG/CC).

4.5.2. MAJCOM STAN/EVAL (or equivalent) may perform a SAV in conjunction with pyramid evaluations when specifically requested by the unit.

4.5.3. Squadron or Detachment FEs may administer evaluations outside their unit, i.e., cross unit evaluations, with the approval of the examinee's SQ/CC to facilitate pyramid evaluations.

4.5.4. Pyramid evaluation is not required when no higher-echelon FE is available. The OGV/WGV in which the member is assigned/attached to for flying purposes is responsible for pyramid waiver coordination with the office that would have administered the evaluation. Document pyramid waivers on the AF Form 8 IAW **paragraph 16.6** and applicable MAJCOM guidance.

4.6. Cross-MAJCOM Evaluations.

4.6.1. Cross MAJCOM evaluations are authorized. The MAJCOM requesting support will do so IAW the guidance from the supporting MAJCOM unless otherwise coordinated. MAJCOM guidance may include formal or informal means of coordination. Document cross-command evaluations IAW **paragraph 16.6**.

4.6.2. MAJCOMs may establish procedures in their supplement for flight examiners to administer aircrew evaluations outside of their own MAJCOM.

4.6.3. Total Force associate flight examiners may evaluate aircrew counterparts in both their OG/WG and their associate OG/WG, as documented in the local TFI association plan or memorandum of agreement/understanding. Attached flight examiners from other MAJCOMs are treated as squadron-assigned aircrew for the purposes of conducting or receiving a flight evaluation.

Chapter 5

GENERAL AIRCREW EVALUATION GUIDANCE

5.1. General.

5.1.1. **Qualification.** A qualification identifies an aircrew member as having successfully completed a flight evaluation on specific flight duties (e.g., first pilot, mission pilot, instructor pilot, mission flight engineer, others listed in DAFMAN 11-401, Table A5.1) and are documented on AF Form 8 following the completion of an evaluation. Qualifications are limited to aircraft/weapons systems qualification (QUAL), instrument (INSTM), mission (MSN), and instructor (INSTR). See also 14 CFR § 61.73 Military pilots or former military pilots: Special rules.

5.1.2. **Certification.** Certifications are attained through methods other than evaluation and will be documented on AF Form 4348, see **paragraph 15.3**. **(T-1)** Certifications are not interchangeable with qualifications and are normally tied to unit mission requirements. See AFMAN 11-202, Volume 1 for additional guidance related to certifications. Lead MAJCOMs normally identify certifications in the AFMAN 11-2MDS, Volume 1.

5.1.3. **Evaluation Validity Period.** An initial or required periodic evaluation, see **Table 5.1**, is valid for 24 calendar months *from the completion of the evaluation flight*. An evaluation remains valid through the last day of the 24th month following the month of accomplishment. For example, if an evaluation is completed on 17 April 2025, it remains valid through 30 April 2027 and is expired on 1 May 2027. See **paragraph 16.2.2** regarding "Evaluation Complete" date and "Evaluation Expires" date on the AF Form 8.

5.1.3.1. A requalification (RQ) evaluation resulting from a failed periodic evaluation (i.e., a Q3) does not reestablish the evaluation validity period. The expiration date remains based upon the date established from the failed periodic evaluation. Using the previous example dates, if a member received a Q3 on 17 April 2025, then subsequently completed the RQ evaluation on 15 July 2025, the member's associated qualifications remain valid through 30 April 2027 and expires on 1 May 2027.

5.1.3.2. A RQ evaluation that requires completion of all evaluation requisites, see **Table 5.2**, establishes a new evaluation validity period.

5.2. Evaluations Overview.

5.2.1. **Evaluation Types.** Evaluations are an assessment of an individual's procedural understanding, airmanship, systems knowledge, situational awareness, and judgment. The evaluation also measures the degree of compliance and health of the unit's training and standardization programs. **Table 5.1** is a summary of required qualification evaluations. **Note:** See **Chapter 10** for a SPOT evaluation as it is not a required evaluation. See **Chapter 11** for Universal Qualifications.

Table 5.1. Required Qualification Evaluations.

Evaluation Type	Initial Evaluation	Periodic Evaluation	Quick Reference
QUAL	Required	Required	**Chapter 6**
INSTM (1)	Required	Required	**Chapter 7**
MSN	Required (2)	Not Required (2)	**Chapter 8**
INSTR	Required	Required (3)	**Chapter 9**

Notes:

1. Pilots only, see **paragraph 7.4** for the full list of exceptions (e.g., indoctrination flyers, certain flying training squadrons, pilots in MAJCOM-designated excepted aircraft).
2. Refer to MAJCOM guidance and/or AFMAN 11-2MDS V2.
3. See **paragraph 9.4** for exceptions. For initial cadre instructors, also see **paragraph 12.3**.

5.2.2. **Formal Course Evaluations.** Formal Training Units (FTU) administering USAF Formal School courses listed in the Air Force Education and Training Course Announcement database (**https://cs2.eis.af.mil/sites/app10-ETCA/SitePages/Home.aspx**) may use end-of-course examinations to fulfill the requirements of the open book, closed book and boldface/critical action procedures (CAP) (if applicable) requisite examinations.

5.2.3. **Aircrew Training Device (ATD) Policy.** Evaluations should be completed in an ATD approved by the lead-MAJCOM. For the purposes of this publication the term "flight" includes both the use of an aircraft or approved ATD appropriately certified IAW AFI 10-217, *Management of Air Force Operational Training and Undergraduate Aircrew Training Systems*. Use of ATDs is particularly encouraged for those simulated emergencies and/or scenarios that present significantly increased risk when performed in an aircraft.

5.2.4. **Number of Flights.** The number of flights required to complete a single evaluation should be kept to a minimum, normally one flight. See **paragraph 16.5** for documentation of multiple flights (to include when an emergency procedures evaluation (EPE) is conducted in the ATD, but other parts of the evaluation are completed in the aircraft). Multiple evaluations may be combined into a single flight. Follow guidance in applicable AFMAN 11-2MDS V2 for combined evaluations.

5.2.5. **Requisites.** Listed requisites, including any applicable examinations, are considered part of the evaluation. Evaluations will not be documented as complete, see **paragraph 16.2.2.1**, and a qualification level will not be assigned until all flights and requisites are complete. See **Chapter 14** for specific examination requirements. See **Chapter 11** for universal qualification requisites.

5.2.6. **Emergency Procedures Evaluation (EPE).** AFMAN 11-2MDS V2 will specify the general conduct of EPEs, areas to be evaluated, grading criteria, and whether EPEs may be done in-flight in the aircraft, in an ATD, or via a MAJCOM-approved alternate evaluation method. **(T-2)**

5.2.6.1. For a combined evaluation only one EPE event needs to be accomplished if the combined EPE is of a scope and duration to cover requirements. For example, for a combined QUAL/INSTM evaluation, all requirements from **paragraph 6.2.4** and

paragraph 7.2.2 (and applicable MAJCOM guidance) must be met. In the event of varied qualification levels, see **paragraph 5.5.4**, separate EPE events for the associated evaluations may be needed.

5.2.6.2. Only a grade of Q or U is allowable for an EPE. The examinee must perform emergency procedures in the correct sequence. A verbatim response is not necessary. Incorrect actions to the CAP and/or boldface portion of an EPE will result in a grade of U, and an overall qualification of Q3 for the evaluation.

5.2.7. **Crew Resource Management (CRM) & Threat and Error Management (TEM).** Flight examiners will evaluate crew resource management (CRM) & threat and error management (TEM) skills during all evaluations with guidance provided by AFMAN 11-290, *Cockpit/Crew Resource and Threat & Error Management Program*. This is a required (single) graded area for all evaluations. For AFSPECWAR aircrew, evaluations will also incorporate CRM principles outlined in the AFMAN 10-3500 series to ensure assessment of total team dynamics. See MAJCOM guidance for additional information and grading criteria. MAJCOMs will specify if this will be a critical graded area (i.e., Q or U only).

5.3. Prefixes. Use a prefix for anything other than a periodic evaluation. Document on the AF Form 8 IAW **paragraph 16.3.5** and MAJCOM guidance.

5.3.1. **Initial (INIT).** A prefix used to describe the first evaluation of a type (i.e., QUAL, INSTM, MSN, INSTR) to be administered to an aircrew member in a specific aircraft/weapons system/crew position.

5.3.2. **Requalification (RQ).** A prefix used to describe an evaluation administered to remedy a loss of qualification. Refer to **paragraph 13.9** for requirements specific to RQ. The RQ prefix is used due to one of the cases listed in **Table 5.2**.

Table 5.2. Cases for Using the RQ Prefix.

No.	Description
1 (1)	A failed evaluation other than an INIT evaluation.
2 (2)	CDRA that resulted in a Q3, see **paragraph 13.7.5.3.**
3 (2)	When regaining aircraft/weapons system qualification after the completion of a QUAL evaluation in a different aircraft/weapons system. **Exception:** Not applicable for maintaining multiple qualifications.
4 (2)	When regaining qualification due to reassignment, or extended period in staff or non-flying assignment.
5 (2)	Expiration of a required periodic evaluation (3) and the aircrew member is recommended to remain qualified upon completion of DAFMAN 11-402 action (or one of the exception in **paragraph 13.6.2** applies), the member will complete a RQ evaluation IAW the guidance for that periodic evaluation.
6	When required per AFMAN 11-202 V1, *Aircrew Training*, or AFMAN 11-2MDS V1.
7	Additional reasons as specified by the MAJCOM.

Notes:

1. See **paragraph 13.5** for failure to pass an INIT evaluation.
2. Requires completion of all evaluation requisites and full flight evaluation required for the applicable

qualification(s).

3. First reference **paragraph 13.6** and/or **paragraph 13.9** to determine if DAFMAN 11-402 action is required due to expiration of a required periodic evaluation.

5.3.3. **OTHER.** Use OTHER prefix for all SPOT evaluations (see **Chapter 10**) to include FE Objectivity evaluations (see **paragraph 10.5**), a Q2 or Q3 assigned due to Commander Directed Remedial Action (CDRA) (see **paragraph 13.7**), or Initial Cadre (see **paragraph 12.3** and **paragraph 16.10**.). MAJCOMS may use the OTHER prefix for anything requiring an evaluation that is not listed in this manual.

5.4. Grading.

5.4.1. An AF Form 3862, *Flight Evaluation Worksheet*, will be contained in the AFMAN 11-2MDS V2. **(T-2)** Examiners should use the form during evaluations to ensure all required areas are evaluated, to record aircrew member performance, and record trend information. File the completed AF Form 3862, or a draft copy of the AF Form 8, in the aircrew member's FEF immediately after the evaluation as a temporary record of the evaluation results. Maintain until the signed AF Form 8 is added to the FEF, then dispose of properly. See **paragraph 15.2** about requirements to be met for a member to fly prior to the AF Form 8 being completed.

5.4.2. Assign one of the following grades for each graded area/subarea: Qualified (Q), Marginally Qualified (Q-), or Unqualified (U). Document all areas graded less than Q in the examiner's remarks of the AF Form 8, see **paragraph 16.5.4**. **(T-2)** See **Table 5.3** for description of grades and associated FE actions.

5.4.3. **Required Areas.** The flight examiner must grade the areas/subareas listed as "required" in the general and specific evaluation sections of the applicable AFMAN 11-2MDS V2. **(T-1)**

5.4.4. The flight examiner may grade any non-required area/subarea that is observed during an evaluation and is listed in the graded areas for that type of evaluation IAW AFMAN 11-2MDS V2.

5.4.5. Grading criteria tolerances assume smooth air and stable aircraft conditions.

5.4.6. Momentary deviations are acceptable, provided the examinee applies corrective action and such deviations do not jeopardize flight safety. Consider cumulative deviations when determining the area/subarea grade.

5.4.7. **Commendable.** The flight examiner may further identify any area/subarea of an evaluation flight as "Commendable" if, in the examiner's determination, the aircrew member demonstrated exceptional skill and knowledge. Document IAW **Chapter 16**.

5.4.8. **Exceptionally Qualified (EQ).** The flight examiner may identify the member's performance as Exceptionally Qualified (EQ). This only applies to the aircrew evaluation qualification level. An EQ may be given only when the aircrew member received a Q in all graded areas of the evaluation and demonstrated exceptional skill and knowledge throughout the evaluation. Document IAW **Chapter 16**.

Table 5.3. Grading Description & FE Action.

Grade	Description	FE Action
Q [1]	Qualified. Demonstrated satisfactory knowledge and performance within AFMAN 11-2MDS V2 tolerances.	None.
Q-	Marginally Qualified. Qualified with discrepancies. Demonstrated limited knowledge and/or marginal performance within tolerances, without jeopardizing safety or discipline.	Must debrief discrepancy. [2] Document IAW **paragraph 16.5.4**. If required, assign additional training [3]
U [1]	Unqualified. Demonstrated insufficient knowledge and/or performance outside tolerances, or jeopardized safety or discipline.	Must debrief discrepancy. [2] Document IAW **paragraph 16.5.4**. Assign additional training. [3]

Notes:

1. Critical areas are graded as either Q or U, and include but are not limited to: Airmanship, Safety, and Flight Discipline. EPE is also graded as either Q or U, see **paragraph 5.2.6**.
2. **Debrief Discrepancy.** Remedial action accomplished during debrief of the evaluation wherein the flight examiner provides instruction concerning the discrepancy and determines that the examinee has gained the necessary knowledge or proficiency.
3. See **Chapter 13** regarding additional training and other remedial actions.

5.5. Qualification Levels. The qualification level, as annotated in Section II (Evaluation Information) Block 8 on the AF Form 8, will be either Q1, Q2 or Q3 and will not be modified. Qualification levels will not be combined (e.g., Q1/3 for a QUAL/INSTM combination evaluation); for varied qualification levels of combination evaluations see **paragraph 5.5.4**. Qualification levels will not be combined (e.g., Q2/1 or Q3/1 for a QUAL evaluation or CDRA) to document resolution of additional training. Qualification levels will only be given following completion of an evaluation or following completion of assigned additional training (i.e., after a Q2 was administered by an FE following an evaluation or following CDRA). The flight examiner completing the aircrew evaluation will assign the aircrew evaluation qualification level only after all aircrew evaluation requirements and requisites have been completed. Flight examiner judgment is the determining factor in deciding the aircrew evaluation qualification level.

5.5.1. **Q1.** The aircrew member demonstrated desired performance and knowledge of procedures, equipment and directives within tolerances specified in the criteria. The number of Q- grades awarded have no impact on qualification level if, in the judgment of the FE, none of the Q- grades preclude awarding of a Q1. Area/subarea discrepancies may be debriefed but the discrepancy must still be documented in Section V (Evaluations), see **paragraph 16.5.4** regarding Examiner Remarks. If a discrepancy (or discrepancies) warrant(s) additional training, then the qualification level assigned will be a Q2.

5.5.2. **Q2.** The aircrew member demonstrated the ability to perform duties safely; however, additional training is required for a discrepancy that cannot be remedied during the evaluation or the debrief, see **paragraph 13.1**. A Q2 is a temporary qualification because it signifies the

aircrew member has not yet met all Q1 standards. Successful completion of assigned additional training and validation of the standards to which it was completed is a mandatory step in the evaluation process. Failure to satisfactorily complete the required additional training by the due date may require DAFMAN 11-402 actions leading to potential revocation of qualifications as detailed **paragraph 13.6**. The member will be placed on supervised status,

see **paragraph 13.2**, until the aircrew member has demonstrated proficiency to Q1 standards and documented on an additional AF Form 8, see **paragraph 16.1.2.3** and **paragraph 16.11**. An examiner assigns this qualification level if a non-critical graded area/subarea grade of U was awarded or in the judgement of the flight examiner, additional training is required for any Q- grades that would preclude awarding of a Q1.

5.5.3. **Q3.** The aircrew member demonstrated an unacceptable level of safety, or fails to meet acceptable performance, or knowledge criteria. A RQ evaluation is required following additional training, see **Chapter 13**. The individual will be placed on supervised status until the individual has achieved a grade of Q1 or Q2. The FE may assign a Q3 based on one or several non-critical areas/subareas graded Q- or U. The FE will assign a Q3 if any critical area is graded U.

5.5.4. **Varied Qualification Levels for Combination Evaluations.** If the qualification level varies for each evaluation accomplished as part of a combination evaluation, (e.g., Q1 for the QUAL but Q2 for the INSTM), document the evaluations on separate AF Forms 8, see **paragraph 16.12**.

Chapter 6

AIRCRAFT QUALIFICATION (QUAL) EVALUATION

6.1. Purpose. To assess an aircrew member's ability to perform the basic duties of a particular crew position within the specified aircraft/weapons system. This evaluation is used to obtain and maintain Basic Aircraft Qualification.

6.2. Requisites.

6.2.1. Open Book Examination.

6.2.2. Closed Book Examination.

6.2.3. Boldface/CCAPs Examination (if applicable).

6.2.4. EPE. The EPE evaluates an aircrew member’s knowledge and skill associated with aircraft emergency procedures and systems.

6.2.5. Refer to MAJCOM guidance and/or AFMAN 11-2MDS V2 for additional QUAL requisites.

6.3. Implementation.

6.3.1. All USAF aircrew members (and other aircrew members assigned to flying duties with the USAF, e.g., joint and foreign exchange aircrew) will obtain and maintain a Basic Aircraft Qualification. **(T-1)**

6.3.2. FTUs will ensure aircrew members have successfully completed a QUAL evaluation for all aircraft/weapons system INIT or RQ courses. **(T-1)**

6.3.3. AFSPECWAR members will comply with AFMAN 10-3500 V2, *Air Force Special Warfare Standardization and Evaluation*.

6.3.4. Test pilot school students are not required to maintain a basic aircraft qualification and will comply with the requirements listed in the AFMAN 11-202 V2, AFMC Supplement.

6.4. Expiration/Renewal. Valid for 24 calendar months, see **paragraph 5.1.3**.

6.5. Evaluation. The evaluation will consist of all requisites, see **paragraph 6.2**, the flight evaluation, and requirements determined by MAJCOM and AFMAN 11-2MDS V2 guidance.

Chapter 7

INSTRUMENT (INSTM) QUALIFICATION EVALUATION

7.1. Purpose. To assess an aircrew member's ability to safely operate under Instrument Flight Rules (IFR). This includes but is not limited to: adherence to required procedures, effective application of discretionary techniques where appropriate (e.g., circling maneuvering), competence in IFR navigation, and, when applicable, sound judgment while operating in instrument meteorological conditions (IMC). This evaluation is required to obtain and maintain an Instrument Qualification. The INSTM qualification is "transferrable" to any aircraft unless restricted by MAJCOM guidance or AFMAN 11-2MDS three-volume set, see **paragraph 7.3.3**.

7.2. Requisites.

7.2.1. Open Book Instrument Examination, see **paragraph 14.4.3**.

7.2.2. EPE. The pilot will demonstrate the ability to cope with an emergency situation that might logically be expected to occur on an instrument flight. Examples of such are, but not limited to: instrumentation failures, avionics systems failures, or aircraft mechanical failures affecting instrument flight.

7.2.3. Refer to MAJCOM guidance for additional INSTM requisites.

7.3. Implementation.

7.3.1. All USAF pilots (and other pilots assigned to flying duties with the USAF, e.g., joint and foreign exchange pilots) who operate IFR will obtain/maintain Instrument Qualification. **(T-0)** Combat Systems Officers (CSOs) with direct access to flight controls will complete all (or portions of) the INSTM evaluation commensurate with flight operations they are permitted to accomplish while operating IFR IAW MAJCOM and/or AFMAN 11-2MDS guidance. **(T-1)** Lead MAJCOM will specify applicability for Combat Systems Officers (CSOs) and other non-pilot aircrew who have direct access to flight controls and instrument displays commensurate with flight operations that they are permitted to accomplish while operating IFR IAW MAJCOM and/or AFMAN 11-2MDS guidance..

7.3.2. A pilot entered into a RQ syllabus with an expired instrument qualification will not operate IFR without approval from the SQ/CC and only while under the direct supervision of an appropriately qualified instructor. **(T-1)**

7.3.3. The instrument qualification evaluation assesses core IFR competencies which are not inherently tied to a specific aircraft/weapons system. MAJCOMs should consider additional training when substantial differences in cockpit procedures exist between the aircraft/weapons system in which the INSTM qualification evaluation was last accomplished and the aircraft the pilot will be operating. Examples for providing additional training include but are not limited to: aircraft systems, model/series/block configurations, or when a pilot transitions between rotary-wing, RPA, and fixed-wing aircraft.

7.4. Exceptions to Implementation. Exceptions to implementation of the INSTM qualification evaluation, see **paragraph 7.3**, will only be made for the following.

7.4.1. Pilots who are indoctrination flyers who fly under the provisions of DAFMAN 11-401.

7.4.2. Pilots who fly aircraft assigned to the 94th Flying Training Squadron (FTS) and 557th FTS are not required to maintain an Instrument Qualification.

7.4.3. Pilots assigned to an excepted aircraft as defined by this manual are not required to accomplish an INSTM qualification evaluation. However, pilots assigned to an excepted aircraft that are also qualified in an aircraft that is not excepted (i.e., a non-excepted aircraft) must maintain an Instrument Qualification; these pilots will complete the INSTM qualification evaluation IAW this manual.

7.4.4. USAF aircrew flying in non-USAF aircraft or USAF aircrew flying with non-USAF units, see **paragraph 12.2**.

7.5. Expiration/Renewal. Valid for 24 calendar months, see **paragraph 5.1.3**.

7.6. Evaluation. The evaluation will consist of all requisites, see **paragraph 7.2**, the flight evaluation, and requirements determined by MAJCOM and AFMAN 11-2MDS V2 guidance. At a minimum, the flight evaluation will consist of the following:

7.6.1. Intercepting and tracking courses through the use of navigational systems.

7.6.2. Compliance with Air Traffic Control (ATC) clearance(s).

7.6.3. Execution of at least one of each instrument procedure listed in **Table 7.1**; individual procedures may be combined when appropriate. MAJCOMs will define alternate evaluation methods in AFMAN 11-2MDS V2. **(T-2)**

7.6.3.1. Holding and circling may be completed via MAJCOM-authorized alternate methods when the evaluation is conducted in the actual aircraft, and the event(s) could not be accomplished due to aircraft limitation/constraints (e.g., fuel), weather, or ATC. Holding and circling may also be completed in an ATD before or after an evaluation flight is conducted in the actual aircraft.

7.6.3.2. If a pilot cannot accomplish an instrument procedure listed in **Table 7.1** due to limitations listed in the aircraft technical order (e.g. aircraft prohibited from circling approaches due to maneuvering requirements), document the limitation in Section V (Evaluations) on the AF Form 8, see **paragraph 16.5**. **Note:** This *will not* result in a restricted AF Form 8.

7.6.3.3. If a pilot cannot accomplish an instrument procedure due to MAJCOM restrictions or AFMAN 11-2MDSV3 restrictions (that are not listed in the aircraft technical order), document such restriction in Section III (Special Conditions) on AF Form 8, see **paragraph 16.6**. **Note:** This *will* result in a restricted AF Form 8.

7.6.3.4. If a pilot cannot accomplish an instrument procedure because the aircraft is not appropriately equipped (e.g., aircraft does not have autopilot or CAT II/III ILS capability), no documentation on the AF Form 8 is needed. **Note:** This does *not* apply to aircraft components that are inoperative due to maintenance.

7.6.4. Additional areas as determined by the MAJCOM.

Table 7.1. Instrument Procedures.

No.	Procedure	Method of Accomplishment
1	Departure (1)	Aircraft or ATD
2	Approach with vertical guidance	Aircraft or ATD
3	Approach without vertical guidance	Aircraft or ATD
4	Approach with autopilot (2)	Aircraft or ATD
5	Approach without autopilot	Aircraft or ATD
6	Approach Category II/III ILS (2)	Aircraft or ATD
7	Holding	Aircraft, ATD or MAJCOM-authorized alternate method (5)
8	Circling	Aircraft, ATD or MAJCOM-authorized alternate method (5)
9	Landing	Aircraft or ATD
10	Missed Approach	Aircraft or ATD
11	Unusual Attitude Recovery (3)	Aircraft, ATD or MAJCOM-authorized alternate method

Notes:

1. Instrument departure method as listed in AFMAN 11-202 V3.
2. Required only if the aircraft is equipped and aircrew are trained.
3. If unable to accomplish Unusual Attitude Recovery in the aircraft due to restrictions or limitations listed in the aircraft technical order or AFMAN 11-2MDS V3, the maneuver must be evaluated in the ATD or MAJCOM-authorized alternate method.
4. Procedures may be combined when applicable. For example, execution of a Category II ILS with the autopilot in which the pilot landed from the approach would satisfy numbers 2, 4, 6 and 9.
5. MAJCOM-authorize alternate method only authorized IAW **paragraph 7.6.3.1**.

Chapter 8

MISSION (MSN) QUALIFICATION EVALUATION

8.1. Purpose. To assess an aircrew member's ability to employ the assigned aircraft/weapons system in accomplishing the unit's operational mission(s), or as specified by the MAJCOM. Successful completion of the MSN evaluation results in Mission Qualification.

8.2. Requisites. Refer to MAJCOM guidance.

8.3. Implementation. MSN evaluations will be completed for initial mission qualification. All MSN qualification evaluations will be IAW AFMAN 11-2MDS V2. **(T-1)** MAJCOMs will document in their respective supplements to this manual and/or AFMAN 11-2MDS Vol 2 the circumstances under which mission evaluations are *not* required for units with missions that do not perform a tactical or combat function.

8.4. Evaluation. The MSN qualification requirement is not required for aircrew who only maintain Basic Aircraft Qualification IAW AFMAN 11-2MDS V2 or whose primary duty assignment is unrelated to a flying unit's assigned mission such as Air Mobility Liaison Officers (AMLO), HAF Staff, HHQ Staff, etc. Such conditions will be documented by a Memorandum for Record (MFR) and will be maintained in the member's FEF. **(T-2)**

Chapter 9

INSTRUCTOR (INSTR) QUALIFICATION EVALUATIONS

9.1. Purpose. To assess the knowledge and instructing capabilities of an instructor in their aircraft/weapons system/crew position. This evaluation is required to obtain and maintain an Instructor Qualification. This qualification allows an aircrew member to provide ground and/or flight instruction with an associated qualification.

9.2. Requisites. Refer to MAJCOM guidance and AFMAN 11-2MDS V2.

9.3. Implementation.

9.3.1. Aircrew members obtaining instructor qualification in an aircraft/weapons system/crew position must complete an evaluation of instructional capability in that position. MAJCOM Supplements and/or AFMAN 11-2MDS V2 will specify guidance for specialized, universal, and/or multiple qualified aircrew.

9.3.2. For INIT INSTR or RQ INSTR evaluations, accomplish a flight evaluation (i.e. a MAJCOM-approved instructor qualification evaluation course may not be used).

9.3.3. Instructional capabilities should be evaluated based on instruction of another aircrew member (to include students) that is not the FE.

9.4. Expiration/Renewal. Valid for 24 calendar months, see **paragraph 5.1.3**. The renewal will be accomplished in combination with another periodic evaluation (as directed by this manual or MAJCOM guidance), separately as its own evaluation, or by completion of a MAJCOM-approved instructor qualification evaluation course. **(T-2)** Document completion of the MAJCOM-approved instructor qualification evaluation course on the AF Form 8. For initial cadre, the 24-month validity period begins once the initial cadre AF Form 8 is completed.

9.5. Evaluation. Instruction ability is a required graded area. Refer to MAJCOM guidance and AFMAN 11-2MDS V2.

Chapter 10

OPTIONAL SPECIAL PURPOSE OBSERVATION TYPE (SPOT) EVALUATION

10.1. Purpose. The SPOT evaluation is optional evaluation, and MAJCOMs can provide guidance on how to utilize it. A SPOT evaluation can consist of an aircrew evaluation, EPE, examination, or the evaluation of a specific event or requirement without intending to satisfy all the requirements of a QUAL, INSTM, MSN, INSTR, or RQ evaluation.

10.2. Requisites. A SPOT evaluation has no specific requisites, unless specified in MAJCOM supplements and/or AFMAN 11-2MDS V2.

10.3. Implementation.

10.3.1. A SPOT Evaluation may be used when an evaluation of an individual event is required IAW AFMAN 11-2MDS V1 or AFMAN 11-2MDS V2.

10.3.2. When the flight examiner administering a SPOT evaluation is not qualified in the aircraft/weapons system (e.g., a SFE), the evaluation may not be credited towards a periodic evaluation. SFEs may perform SPOT evaluations outside of their respective aircraft/weapons system specialty.

10.4. Evaluation. The commander or flight examiner responsible for directing the SPOT evaluation also directs the SPOT evaluation profile. For HHQ evaluations, the SFE determines the SPOT profile. Ensure all applicable requisites listed in **paragraph 10.2** are met.

10.5. FE Objectivity Evaluations. HHQ FEs, SFEs, OGV/WGV flight examiners, and commanders may conduct evaluations of the objectivity and skill of FEs by administering a SPOT evaluation. FE objectivity evaluations will not be the sole means used to certify new FEs (i.e., an FE is not certified through an evaluation, but an objectivity evaluation may be used as a component to certify a new flight examiner). Document IAW **Chapter 15** and **Chapter 16**.

10.5.1. FEs conducting objectivity evaluations will observe a typical evaluation profile. **(T-3)** The FE conducting the objectivity evaluation may simulate the role of a typical examinee or observe an actual evaluation. The examiner conducting the SPOT evaluation will use the grading criteria listed in AFMAN 11-2MDS V2. **(T-2)** Overall qualification level for this type of evaluation is either Q1 or Q3. **(T-2)**

10.5.2. A Q1 indicates a FE complied with HHQ and local STAN/EVAL directives, properly briefed and debriefed the examinee, correctly identified discrepancies, awarded the appropriate grade for each evaluated area, awarded the appropriate overall grade and, if required, assigned appropriate additional training.

10.5.3. A Q3 is awarded when, in the examiner's judgment, the FE failed to satisfy the requirements of **paragraph 10.5.2**, and additional guidance from the MAJCOM. **(T-2)** The OGV/WGV in consultation with the member's commander(s) will determine the FE certification status of the FE receiving an unqualified objectivity evaluation. **(T-3)** The commander will also assess whether the member's qualifications and/or certifications remain

valid and take appropriate action if deficiencies are identified. If qualification level downgrade or RQ is warranted, document using an AF Form 8. **(T-3)** If decertified as an FE, document the decertification on an AF Form 4348. **(T-2)** If decertified while administering an actual evaluation, the FE administering the objectivity evaluation becomes the examiner of record for both evaluations. **(T-3)**

Chapter 11

UNIVERSAL QUALIFICATION

11.1. General.

11.1.1. Universal Qualified aircrew members hold a singular qualification in a singular aircrew position for aircrew duties capable of operations across all *required* aircraft/weapons systems. Members who can hold this universal qualification are identified by Air Force Specialty Code (AFSC), MAJCOM guidance, and/or AFMAN 11-2MDS V2 and performing airborne duties in all USAF aircraft/weapons systems or airborne duties that require transferability to a group of aircraft/weapons systems. Rated aircrew, except for flight surgeons, are ineligible for universal qualification in aircraft/weapons systems. See **paragraph 12.1** regarding Multiple Qualifications.

11.1.2. Universal Qualification is a documented designation that allows flight surgeons, AFSPECWAR aircrew, non-rated aircrew, non-career enlisted aviator (CEA) aircrew, or other aircrew members (including CEAs) as specified by MAJCOM to operate on a broad range of aircraft. An examination is the minimum requirement to establish qualification.

11.1.3. The types of aircraft/weapons system eligible for Universal Qualified Aircrew to maintain Universal Qualification on will be identified in the MAJCOM supplement and/or aircrew specialty three volume set.

11.1.4. Crewmembers that will be universally qualified upon successful completion of a QUAL evaluation, will be identified IAW this Chapter, MAJCOM supplement, and/or aircrew specialty three volume set.

11.2. Evaluations.

11.2.1. Universal Qualification is attained/maintained by the successful completion of a QUAL evaluation or the successful completion of all requisites.

11.2.2. A QUAL evaluation for Universal Qualified Aircrew may be accomplished on any of the aircraft/weapons system in which the crewmember is either gaining or maintaining qualification.

11.2.3. Mission qualification will be per MAJCOM supplement and/or aircrew specialty three volume set

11.2.4. Failure of universally qualified aircrew members to pass a QUAL evaluation (or requisite if Qualification is attained by requisite only) results in loss of Universal Qualification, IAW MAJCOM supplement and/or aircrew specialty three volume set.

11.3. Documentation.

11.3.1. AF Form 8. Document a crewmember's QUAL evaluation on an AF Form 8. For universal qualifications that only require an examination (or multiple examinations), the proctor will send the results of the examination(s) to the STAN/EVAL for which the examinee is attached IAW MAJCOM or local guidance; any FE assigned to the attached OGV/WGV can sign the AF Form 8 validating the results of the examination. The AF Form 8 will be further completed IAW this manual and MAJCOM guidance.

11.3.2. AF Form 3862. File the worksheet or draft copy of the AF Form 8 in the aircrew member's FEF immediately after the flight evaluation as a temporary record of the evaluation results. Maintain until the finished AF Form 8 is added to the FEF, then discard. If physical FEFs are not utilized in the unit, store hard-copy worksheets IAW local guidance. Store digital worksheets or draft digital AF Form 8 IAW MAJCOM or unit guidance.

11.3.3. AF Form 1522, *ARMS Additional Training Accomplishment Report*. If the crewmember only requires an examination to maintain Universal Qualification, document the successful completion on an AF Form 1522 with currency tracked in the training module. The STAN/EVAL function of the unit to which Universal Qualified Aircrew are assigned/attached for flying will verify that ARTEMIS information is logged appropriately. **(T-1)**. MSN Evaluations, if required, will be documented in the same manner as QUAL evaluations.

11.3.4. AF Form 942 differences. Enter the first aircraft/weapons system/crew position as it appears in the aircraft/weapons system/Crew Position area under Examinee Identification of the subject AF Form 8.

11.4. Flight Surgeons.

11.4.1. Flight Surgeon initial and periodic Universal Qualification evaluations consist of a closed book examination. **(T-1)**

11.4.2. AFMEDCOM/A3P maintains a SQB. **(T-1)** Test questions are randomly generated from the SQB.

11.4.3. Upon successful completion of the examination, the flight surgeon is Universal Qualified in all USAF aircraft/weapons system unless restricted by the lead MAJCOM.

11.5. AFSPECWAR Aircrew.

11.5.1. AFSPECWAR Aircrew initial and periodic Universal Qualification evaluations will consist of a closed book examination. **(T-1)**

11.5.2. Test questions are randomly generated from a SQB maintained IAW AFMAN 10-3500 V2, *Air Force Special Warfare Standardization and Evaluation*. **(T-1)**

11.5.3. Upon successful completion of the examination, the AFSPECWAR Aircrew is Universal Qualified in all USAF aircraft.

11.5.4. Document IAW this manual and AFMAN 10-3500 V2.

11.6. Aerospace Physiology (AP) Personnel.

11.6.1. X-Prefixed Aerospace Physiology personnel (Officer and Enlisted) will complete an initial and periodic open book examination.

11.6.2. Test questions are randomly generated from a MQF maintained by the aircraft/weapons system lead command Aerospace Physiology Program manager. **(T-1)**

11.6.3. Upon successful completion of the examination, Aerospace Physiology personnel will receive a Universal Qualification in all USAF aircraft/weapons system unless restricted by the lead MAJCOM.

11.6.4. Record successful completion of the initial open book exam on an AF Form 4324 in Block 22 (Qualification/Certification).

11.6.4.1. For Officers, use the graduation date annotated on the AFSC awarding course certificate.

11.6.4.2. For Enlisted, use the date annotated on the DAF Form 2096, *Classification/On-The-Job Training Action*, that awards the 5 Skill level.

11.6.5. All periodic examinations will be recorded on the AF Form 1522. **(T-3)**

11.7. Other Non-rated Aircrew & Non-CEA Aircrew.

11.7.1. Initial and periodic evaluations consist of a minimum of an open or closed book examination. **(T-2)**

11.7.2. The Unit STAN/EVAL office maintains a SQB/MQF as appropriate. **(T-2)** Test questions are randomly generated from the SQB and MQF for the type of test being taken.

11.7.3. Upon successful completion of the examination, the crewmember is qualified in aircraft as designated in unit supplements or in the Section VI (Remarks) of the AF Form 8.

Chapter 12

SPECIAL CASES AND ROLES

12.1. Multiple Qualification. Applies to aircrew members who maintain qualifications in two or more aircrew positions or in two or more aircraft where separate qualifications are required by lead MAJCOM. For Universal Qualification see **Chapter 11**. Qualifications in multiple variants of the same MD family do not constitute a multiple qualification, unless restricted further by the MAJCOM.

12.1.1. The lead MAJCOM, in coordination with user MAJCOMs, will identify any aircraft or crew position which require separate qualification to include the type of training. For conversion or differences training refer to AFMAN 11-202 V1 or MAJCOM guidance.

12.1.2. Documentation. Document multiple qualifications, including a list of aircraft or aircrew positions in which qualifications are maintained, on AF Form 80, *Multiple Qualification Request and Authorization* IAW **paragraph 15.4**. See AFMAN 11-202 V1 and AFMAN 11-2MDS V1.

12.1.3. Annual Review. Complete annual reviews IAW **paragraph 15.4.6** and MAJCOM guidance.

12.1.4. Approval Authority. Verify approval authority IAW AFMAN 11-202 V1 and MAJCOM guidance.

12.1.5. Training. Do not begin qualification ground or flying training in an additional aircraft until the AF Form 80 has been approved. AF Form 80 approval does not negate or relieve any provisions of AFMAN 11-202 V1 concerning aircraft qualification training. Do not enter flying personnel into qualification or re-qualification training in more than one aircraft at the same time.

12.2. USAF Aircrew Flying in Non-USAF Aircraft or with Non-USAF Units. Aircrew authorized to perform duties in non-USAF aircraft IAW DAFMAN 11-401, or on duty with or attached to non-USAF units or activities for flying, abide by the operating activity, host service or host country guidance.

12.2.1. Aircrew flying with non-USAF units (e.g., USAF exchange aircrew) do not need to abide by USAF guidance, including this manual, MAJCOM guidance, or AFMAN 11-2MDS V2. Therefore, when individuals return to USAF units, the aircrew members must complete applicable requisites and be evaluated for any USAF evaluations that expired during the assigned tour. **(T-1)**

12.2.2. MAJCOM/A3s may approve exceptions to requirements for USAF aircrew returning from an exchange assignment to complete applicable requisites and expired USAF evaluations, if determined the non-USAF evaluations are equivalent to applicable AFMAN 11-2MDS V2 evaluations, document IAW **Chapter 16** and **Chapter 17**.

12.2.3. USAF units using non-USAF aircraft that do not have an established system program director to execute a USAF flying program will comply with current USAF guidance, unless otherwise authorized by proper authority. **(T-1)** See DAFMAN 11-401 for definitions of USAF and US Government aircraft.

12.3. Initial Cadre.

12.3.1. Aircrew members who are appointed by their MAJCOMs as initial cadre either for a new mission set requiring a mission qualification or for a new aircraft/weapons system where no instructors or flight examiner currently exists will comply with the intent of this manual. **(T-1)** See **paragraph 16.10** for guidance on AF Form 8 documentation. Initial cadre will not be used out of convenience. The primary method for training initial cadre will be a suitable instructor course. **(T-2)**

12.3.2. OG/CCs or WG/CC will designate a limited group of instructors and/or flight examiners as initial cadre and submit a MFR to MAJCOM/A3 for approval. At a minimum, the MFR will contain: name, rank, current qualification level(s), aircraft, designated new qualification level, total primary aircraft flight hours, total instructor hours (if applicable), and total examiner hours (if applicable). MAJCOM/Stan Evals will maintain the approved initial cadre letter.

12.3.3. MAJCOMs will indicate through memoranda for record which aircrew are appointed as initial cadre and include in the FEFs IAW **Chapter 17**. **(T-2)**

12.3.4. Aircrew appointed as initial cadre will have the initial AF Form 8 completed within 24 calendar months of the date on the initial cadre MFR, see **paragraph 16.10**., **Chapter 17**, and MAJCOM guidance.

12.3.5. Tailor recurring aircrew evaluations to program requirements and aircraft capabilities. ATDs may be used to satisfy recurring evaluation requirements.

12.3.5.1. When using a SPOT evaluation to establish the initial cadre's flight evaluations, a MAJCOM examiner (from any aircraft/weapons system) will evaluate one crew member (who has been designated as the initial examiner on the new aircraft/weapons system) from each MDS crew position. Those crew members, following squadron certification, will then conduct the INIT QUAL/MSN evaluations for the rest of the individuals on the initial cadre letter.

12.3.5.2. The MAJCOM STAN/EVAL determines the scope of the SPOT evaluation, which should be comprehensive enough to assess any new or nonstandard operating procedures. Complete all ground requisites prior to the flight phase of the SPOT evaluation.

12.3.5.3. If MAJCOM/A3 determines there is no requirement to conduct a MAJCOM SPOT evaluation, or for units undergoing full unit conversion, the initial cadre members designated as examiners will conduct the initial evaluations for all crew members. **(T-2)** This is to be completed after all new applicable guidance memoranda, operating instructions, checklists, or supplemental addenda have been approved by MAJCOM/A3 and the members have been certified by the SQ/CC.

12.3.5.4. Regardless of a SPOT evaluation requirement, any initial cadre crew member who fails to complete an evaluation by the end of the date on the MFR will lose the new aircraft/weapons system qualification and must complete an evaluation to regain aircraft qualification. **(T-2)** If no date is listed on the initial cadre MFR, initial cadre members must complete an evaluation within 12 months of the crewmember's first flight in the new aircraft/weapons system. **(T-1)**

12.3.5.5. Pilots in these programs will maintain their INSTM qualification (when required) IAW **Chapter 7**. The lead MAJCOM will provide guidance on how this will be accomplished if maintenance of the INSTM qualification is not practical due to the developing capabilities of the new mission set and/or aircraft/weapons system

Chapter 13

ADDITIONAL TRAINING & REMEDIAL ACTIONS

13.1. Additional Training. Any training recommended by the flight examiner to remedy a discrepancy identified during an evaluation that cannot be remedied during the evaluation or debrief. Additional Training will be accomplished no later than the end of the third calendar month following the evaluation. **(T-3)** Additional Training will be accomplished prior to the 24-calendar-month expiration period (see **paragraph 5.1.3**.). The flight examiner will document the *recommended* additional training in Section V (Evaluations) of the AF Form 8 and, if required, indicate if the additional training must be accomplished before the next flight. **(T-2)** Supervised status and/or restrictions may be required, see **paragraph 13.2** and/or **paragraph 13.3**.

13.1.1. Commander will designate the required completion date, not to exceed the 24-calendar-month expiration period (see **paragraph 5.1.3**), and document *assigned* additional training on the AF Form 8 in Section VI (Remarks) IAW **Chapter 16**.

13.1.2. Additional training may include, but is not limited to self-study, ground instruction, ATD, or flight in the aircraft.

13.1.3. Additional training must include demonstration of satisfactory knowledge or proficiency to a flight examiner, supervisor, or instructor (as stipulated in the Additional Training description) to qualify as completed. **(T-1)**

13.1.4. If an aircrew member receives a U in a specific area that originally required an event/task certification from the unit commander, the aircrew member will be decertified on that specific event. **(T-3)** Examiners will recommend corrective retraining and recertification action.

13.1.5. If an aircrew member exceeds the allotted time for completion of additional training, and the SQ/CC determines those circumstances were beyond the control of the individual, the SQ/CC may extend the required completion date an additional three calendar months, not to exceed a total of six calendar months. **(T-2)** However, the extension will not exceed the 24-calendar-month expiration period, see **paragraph 5.1.3**. Otherwise, comply with **paragraph 13.1.6**. Document the circumstances with a memorandum for record to be included with the AF Form 8, see **Chapter 16**.

13.1.6. If an aircrew member fails to successfully complete assigned additional training by the required date to required standards, see **paragraph 13.6**.

13.2. Supervised Status. Aircrew members with restrictions or placed into a RQ syllabus will be placed on supervisory status for those events/items until completion of additional training or RQ in those events/items. **(T-1)** If not specified in AFMAN 11-2MDS V1, the SQ/CC will specify the type of supervisor required (e.g., instructor or designated supervisor). **(T-1)**

13.3. Restrictions. As directed by this manual or deemed necessary in the judgment of the SQ/CC as recommended by the flight examiner, flight restrictions will be imposed on the examinee until the successful completion of assigned additional training and/or a RQ evaluation. **(T-1)**

13.3.1. Restrictions will address the specific phase of flight and/or operation that require(s) supervision and the criteria for removal of the restrictions. **(T-2)**

13.3.2. Document restrictions on the AF Form 8 Section III (Special Conditions) and Section VI (Remarks) IAW this manual and MAJCOM guidance.

13.3.3. If defined in AFMAN 11-2MDS V2 and/or AFMAN 11-2MDS V2, FTUs will include restrictions on the AF Form 8 for any core item not accomplished due to training limitations. **(T-2)** Under no circumstances will aircrew perform items in which they are not qualified/certified, unless under the direct supervision of an instructor.

13.3.4. QUAL Evaluation. Place the examinee on supervised status in the aircraft in which the evaluation was administered, unless, in the opinion of the examiner, the discrepancy is applicable to additional aircraft. Universal or multiple qualified aircrew may be placed in supervised status in all aircraft in which the individual maintains universal or multiple qualification.

13.3.5. INSTM Evaluation. Restrictions apply to all aircraft in which an instrument qualification would be required to operate the aircraft IFR. See **paragraph 7.6.3** regarding conditions that would (and would not) result in a restricted AF Form 8.

13.3.6. MSN Evaluation. The examinee may perform basic qualification/instrument tasks unless specifically restricted. Place the examinee on supervised status for mission tasks.

13.3.7. INSTR Evaluation. This includes any evaluation where instructor qualifications are being evaluated. The examinee will not perform instructor duties until a successful RQ evaluation has been completed. **(T-2)**

13.4. Failure to Pass an Aircrew Evaluation (Other than INIT).

13.4.1. If an aircrew member fails an evaluation (i.e., the qualification level administered is a Q3), a successful RQ evaluation must be completed. **(T-2)** See **paragraph 13.6** if the RQ evaluation is not completed prior the original 24-calendar-month expiration date from the AF Form 8 prior to the Q3 being assigned. Failure of any evaluation requirement, including requisites, results in an overall qualification level of Q3. A Q3 may require a change in mission ready status, see **paragraph 13.8**.

13.4.2. Successfully passed requisites for a failed aircrew evaluation remain valid and may be credited towards a RQ evaluation. Requisite testing periods still apply IAW **paragraph 14.3.4**. Assign requisites that were not passed, or requisites not accomplished, as part of the RQ evaluation.

13.4.3. A Q3 on an INSTM evaluation applies to all aircraft flown in which instrument qualification is required as specified by MAJCOM guidance or AFMAN 11-2MDS three-volume set.

13.4.4. Aircrew members authorized multiple qualifications. A Q3 on a QUAL or MSN evaluation applies only to the aircraft for which the evaluation was administered, unless, in the opinion of the examiner, the causal discrepancy is applicable to additional aircraft.

13.4.5. MAJCOMs will specify guidance for failed evaluations for aircrew members with a Universal Qualification.

13.4.6. **Failure of a single evaluation during a combination evaluation.**

13.4.6.1. If the qualification level varies for each evaluation accomplished, (e.g., Q1 for the QUAL but Q3 for the INSTM), document the evaluations on separate AF Forms 8. A RQ evaluation is only required for the evaluation that was failed.

13.4.6.2. INSTR. If an instructor only fails the INSTR portion, accomplish a RQ INSTR. If an instructor fails another evaluation (e.g., QUAL or INSTM), but does not fail the INSTR evaluation, then a RQ INSTR is not required. If an instructor fails a SPOT evaluation, a RQ is only required for the applicable area(s).

13.5. Failure to Pass an INIT Evaluation.

13.5.1. If an aircrew member fails an INIT evaluation, document the Q3 on an AF Form 8. A subsequent INIT evaluation attempt is required. **(T-2)** Failure of any evaluation requirement (including requisites), results in an overall qualification level of Q3. MAJCOMs or FTUs will specify guidance for a failure of a single evaluation during a combination evaluation (e.g., member accomplished a combination INIT QUAL/INSTM and receives a Q1 for the INIT QUAL but a Q3 for an INIT INSTM)**.**

13.5.2. The FE that administered the member an INIT evaluation that resulted in the Q3 will not administer subsequent INIT evaluation attempts for the same qualification evaluation. **(T-3)**

13.5.3. Subsequent INIT evaluation attempt(s) may not be successfully completed until the aircrew member completes re-training for each area graded U from the failed evaluation(s) and subsequently demonstrates performance during an evaluation to Q criteria (or Q- and debriefed) for each area graded U from the failed evaluation(s).

13.5.4. Successfully passed requisites for a failed INIT evaluation remain valid and may be credited towards subsequent INIT evaluation.

13.5.5. A Q3 on an INSTM evaluation applies to all aircraft flown in which instrument qualification is required as specified by MAJCOM guidance or AFMAN 11-2MDS three-volume set.

13.5.6. Aircrew members authorized multiple qualifications. A Q3 on a INIT QUAL or INIT MSN evaluation applies only to the aircraft for which the evaluation was administered, unless, in the opinion of the examiner, the causal discrepancy is applicable to additional aircraft.

13.5.7. MAJCOMs will specify guidance for failed INIT evaluations for aircrew members with a Universal Qualification.

13.6. Failure to Complete a Required Periodic Aircrew Evaluation.

13.6.1. Expiration of a qualification evaluation results in a member becoming unqualified for that qualification. See **paragraph 13.6.4** for extensions. Unless it is due to one of the exceptions in **Table 13.1**, initiate DAFMAN 11-402 action on the date the qualification expires.

13.6.1.1. Failure to complete a RQ evaluation constitutes failure to complete an aircrew evaluation only if the original 24-calendar-month expiration date from the AF Form 8 prior to the Q3 being assigned is exceeded.

13.6.1.2. Failure to complete additional training by the required due date following a Q2 from a periodic evaluation constitutes failure to complete an aircrew evaluation only if the original 24-calendar-month expiration date from the AF Form 8 prior to the Q2 being assigned is exceeded.

13.6.2. DAFMAN 11-402 actions do not apply for cases listed in **Table 13.1**. List the case on an MFR and include it in the FEF.

Table 13.1. Exceptions for DAFMAN 11-402 Action.

No.	Exception Description
1	Member is disqualified from flying duties by a medical authority ("Down" status). Upon return to flying status, the required evaluation must be completed within 30 days, or the member will be entered into RQ training IAW AFMAN 11-202 V1. **(T-2)**
2	Member is entered into or attending a formal flying course which results in a new qualification (e.g., changing aircraft/weapons systems or upgrading crew position).
3	Initial cadre training, see MAJCOM guidance.
4	Member has received permanent change of station (PCS)/permanent change of assignment (PCA) orders or member has been permanently assigned to a non-flying assignment (e.g., non-flying staff, formal PME school).
5	Member is within six months of retirement or separation. To remain MR, CMR, BMC, or in an unsupervised flying status, the member must complete the required evaluation(s) IAW this manual and training requirements IAW AFMAN 11-202 V1. **(T-2)** This applies only to QUAL, INSTM, and INSTR evaluations. Refer to MAJCOM guidance for MSN evaluations.
6	Member is permanently assigned to perform flight duties with a non-USAF unit, or, for instrument qualification, is excepted under **paragraph 12.2**.
7	If an extension was granted IAW paragraph 13.6.4.

13.6.3. If a member is reinstated for flight duties following DAFMAN 11-402 action following a loss of any qualification, the member will complete a RQ training syllabus and RQ evaluation for the lost qualification(s) IAW applicable guidance. **(T-1) Exception:** Unless the reinstatement occurred prior to INIT qualifications, in which case subsequent evaluations will be INIT.

13.6.4. Extensions. For QUAL, INSTM and INSTR qualification evaluation extension requests beyond the 24-calendar-months expiration date, see **paragraph 5.1.3**., MAJCOM/A3 will submit the request to AF/A34, via AFFSA/XOF, for decision and adjudication. Requests will not be granted for complacency, lack of oversight, or willful noncompliance with this publication. Requesting agency will submit the extension request no earlier than 90 days prior and no later than 30 days prior to the evaluation's 24-calendar-month expiration date. **(T-2)** See MAJCOM guidance for MAJCOM-directed expiration of a MSN Qualification. See MAJCOM guidance for a QUAL, INSTM, INSTR qualification evaluation that exceeds the

MAJCOM expiration date, see **paragraph 16.2.2**, but is still less than the 24-calendar-month expiration date.

13.7. Commander Directed Remedial Action (CDRA). If a member fails to (or demonstrates that they are unable to) comply with applicable directives, then a commander may take remedial action (e.g., removal of a certification, issuance of a Q2 or Q3). This is meant to be a rehabilitative tool for a commander to ensure standards are being maintained. In accordance with DAFI 51-202, *Nonjudicial Punishment*, commanders may not use CDRA as a method to punish an aircrew member or as a replacement for required DAFMAN 11-402 action. **(T-0)**

13.7.1. **General.** A Commander/Approving Official listed in **Table 16.4** may take CDRA if a breach of flying discipline occurs, safety concerns arise, or other risk-related factors are identified *outside the scope of an evaluation*. CDRA may also be taken if the situation involves a FE *inside the scope of an evaluation* and remedial action is required for the FE. See **paragraph 13.4** if a member fails to pass an aircrew evaluation (or **paragraph 13.5** for INIT evaluations). The same process outlined in **paragraph 16.8.4** should be used in resolving non-concurrence.

13.7.2. **Prohibitions.**

13.7.2.1. Data received by, or analysis generated from, the Aviation Safety Action Program (ASAP), the Military Flight Operations Quality Assurance (MFOQA) program, or any Line Operations Safety Audit (LOSA), will not be used to initiate or support decertification action, qualification level downgrade, monitor personnel performance, or any other adverse administrative action, unless the act involved an intentional disregard for safety or is otherwise excluded from proactive aviation safety protections in accordance with DAFI 91-225, *Aviation Safety Programs*. **(T-0)** See also DoDI 6055.19, *Aviation Hazard Identification and Risk Assessment Programs (AHIRAPs)*.

13.7.2.2. Commanders will refrain from using any safety report, to include electronic safety submissions provided to SAFEREP (**https://saferep.safety.af.mil**), to initiate or support CDRA unless the act involved clearly unacceptable behavior, such as a violation for personal gain, substance abuse, gross negligence, or reckless conduct (see **Attachment 1** for the latter two). The use of safety reports or submissions for other than these purposes could degrade an organization's safety culture and consequently undermine the organization's mishap prevention program. See DAFI 91-202, *The Department of the Air Force (DAF) Mishap Prevention Program*, for more information on just culture and the other sub-components of an informed safety culture.

13.7.2.3. Do not use CDRA in lieu of DAFMAN 11-402 action.

13.7.2.4. CDRA will not be used for non-flying-related cases *as a substitution for or in lieu of* administrative or judicial actions (e.g., Letter of Counseling, Article 15). **(T-0)** Such cases may ultimately result in a commander's loss of confidence in the member to perform aircrew duties, for which CDRA may be applicable, **see paragraph 13.7.3**. Consult with the supporting Staff Judge Advocate office for legal advice in these cases.

13.7.3. **Loss of Confidence.** CDRA may be taken in cases where such flying or non-flying-related incident(s) directly affect the commander's confidence in the aircrew member's ability to safely operate the aircraft and/or equipment (i.e., lapse in judgment significant enough to cast doubt on the member's decision-making abilities to perform their aircrew duties).

13.7.4. **Notification.** Incidents do not have to be directly observed by a FE but do require a recommendation from a FE. For attached aircrew members, the individual directing the CDRA must notify the member's SQ/CC (or equivalent) prior to documentation. The Commander/Approving Official will expeditiously notify the member receiving the CDRA.

13.7.5. **Administration and Documentation.** CDRA involves either decertation for cause or a qualification level downgrade. See **paragraph 5.1** regarding the difference between certifications and qualifications. CDRA may result in a change in mission ready status, see **paragraph 13.8**.

13.7.5.1. Decertification. In some cases, a qualification level downgrade may not be necessary and instead the commander may remove a single or multiple certifications. Document decertification with the AF Form 4348, see **paragraph 15.3.4**, and maintain the form IAW this manual, see **paragraph 17.5**. Refer to AFMAN 11-202 V1 and MAJCOM guidance if recertification is pursued; resolution will not be accomplished simply through a debrief.

13.7.5.2. Directed Q2. A Q2 should be used to remediate specific area(s) or subarea(s) of a qualification. Document with the AF Form 8 IAW **Chapter 16**, namely **paragraph 16.11**. Place the member on supervised status, see **paragraph 13.2**, until required additional training is accomplished and a qualification level of Q1 is assigned. Resolution will not be accomplished simply through a debrief.

13.7.5.3. Directed Q3. A Q3 should be used when the commander determines that the member is not safe to execute assigned aircrew duties for a qualification. It will only be issued to remove a qualification listed in **paragraph 5.1.1**. Document with the AF Form 8 IAW **Chapter 16**. Corrective action requires a RQ training syllabus and RQ evaluation IAW **paragraph 13.9.4**.

13.8. Mission Ready Status Adjustment.

13.8.1. If a mission ready (MR), combat mission ready (CMR), or basic mission capable (BMC) aircrew member receives a Q3 on an INSTM, QUAL, and/or MSN evaluation, the SQ/CC (or next higher CC) will adjust the examinee's training status to non-mission ready (NMR), non-combat mission ready (N-CMR), or non-basic mission capable(N-BMC) or as appropriate IAW AFMAN 11-2MDS V1 and/or MAJCOM guidance. **(T-2)**

13.8.2. If basic aircrew qualification (BAQ) aircrew members receive a Q3 on INSTM and/or QUAL evaluation, the SQ/CC (or next higher CC) will adjust the examinee's training status to non-basic aircraft qualified (N-BAQ) or as appropriate IAW AFMAN 11-2MDS V1. **(T-2)**

13.8.3. Document new qualification or change in qualification (e.g., MP to UP) on AF Form 4324, *Aircraft Assignment/Aircrew Qualification Worksheet*, or IAW MAJCOM guidance.

13.9. Requalification (RQ) Evaluation Requirements.

13.9.1. The FE that administered the periodic aircrew evaluation that resulted in the Q3 will not administer the RQ evaluation. **(T-3)**

13.9.2. Refer to MAJCOM guidance if a member receives a Q2 or Q3 on a RQ evaluation.

13.9.3. At a minimum, a RQ evaluation resulting from a failed periodic evaluation is required to address the deficiency (or deficiencies) that contributed to the Q3. Additional areas/subareas may be included as part of the RQ evaluation, as determined by the commander. During the RQ evaluation, the aircrew member must demonstrate performance to Q criteria (or Q- and debriefed) for each area/subarea previously graded U in the failed evaluation(s). The FE will assign a qualification level only after the aircrew member has successfully demonstrated Q performance for all deficient areas during the RQ evaluation. See **paragraph 5.1.3** regarding expiration dates and **paragraph 13.6** for failure to complete a RQ evaluation.

13.9.4. See **Table 5.2** for cases in which a RQ evaluation requires completion of all requisites and full flight evaluation associated with the qualification. See **paragraph 5.1.3.2** regarding expiration dates.

13.9.5. Aircrew members placed in a RQ syllabus IAW this manual or AFMAN 11-202 V1 are unqualified for the affected evaluation type (e.g., QUAL, INSTM, MSN, INSTR) until successfully requalified. This status does not, by itself, rescind other qualifications or crew-position certifications unless directed by AFMAN 11-202 V1, DAFMAN 11-402, or MAJCOM guidance. Refer to applicable guidance to determine RQ evaluation requirements; in absence of guidance, the Commander/Approving Official will determine requirements.

13.9.6. MAJCOMs will establish maximum time limits for the completion of a RQ evaluation. **(T-2)** For aircrew members who fail to requalify within the specified time limit, DAFMAN 11-402 action is initiated on the day a RQ period lapses.

Chapter 14

AIRCREW EXAMINATION PROGRAM

14.1. Purpose. To assess a crewmember's knowledge through the administration of examinations on information needed to support safe and effective flight operations.

14.2. Scope. This applies to any aircrew member required to complete qualification evaluations listed in **paragraph 5.2.1**. Required examinations are part of the whole evaluation.

14.3. Administrative Procedures.

14.3.1. **Program Documentation.** Units will document the unit-level aircrew examination program. **(T-3)**

14.3.2. **Computer-Based Examinations.** MAJCOM-directed software may be used to fulfill examination requirements. MAJCOMs will review computer-based examination SQBs and/or MQFs once every 24 calendar months and as soon as possible after any changes in source documents, to ensure correctness of examination material. **(T-2)** If a complete review was accomplished due to a source document change it may be annotated as and credited towards the 24-calendar-month review.

14.3.3. **Retention of Examination Records.** Retain graded examination answer sheets/computer records until completion of the AF Form 8, or DAF Form 803, *Report of Task Evaluations*, when required by DAFMAN 36-2689, *Training Program*.

14.3.4. **Conduct of Examinations.** Required examinations, see **Table 14.1**, will be completed no earlier than six calendar months prior to the evaluation expiration date. **(T-2)** For example, the evaluation expires on 31 October 2025, the soonest an exam may be completed is 1 May 2025. All evaluation requirements must be completed prior to the 24-calendar month expiration date.

14.3.4.1. For evaluations accomplished *prior to* the timeframe in **paragraph 14.3.4** (e.g. nine months prior to the evaluation expiration date due to a 365-day deployment), the required examinations may be completed *after the evaluation flight* IAW MAJCOM guidance but no later than 90 days following the date of the evaluation flight.

14.3.4.2. Closed book examinations will be conducted in a STAN/EVAL testing area; alternate locations may be authorized by OGV/WGV.

14.3.4.3. Units may authorize testing proctors who are not FEs to administer examinations. Any examination failure will be certified by a FE. **(T-3)** The certifying FE is responsible for processing the applicable AF Form 8, see **paragraph 14.9**.

Table 14.1. Required Examinations for Types of Evaluations.

Examination [1]	QUAL	INSTM	MSN	INSTR	SPOT
Open Book	Required				
Closed Book	Required				
Bold Face/CAPs [2]	Required				
Instrument Open Book Exam		Required			

Notes:

1. If "Required" is *not* listed, then no requirement exists at the HAF level; refer to MACJOM guidance.
2. Only one boldface/CAPs is required if a combined qualification evaluation is performed (e.g. QUAL/INSTM).

14.4. Examination Sources.

14.4.1. **Open Book Examinations.** Open book questions will come from official publications containing information pertinent to the operation of applicable aircraft and performance of the assigned mission. **(T-1)** See **paragraph 14.8** for grading.

14.4.1.1. The open book subject areas and the publications used to generate the examination will be made available to aircrew during testing. Electronic publications may be used as references for open book examinations.

14.4.1.2. To ensure a degree of standardization between units, lead MAJCOMs will prepare and maintain a SQB of questions and answers for use by individual units in preparing the written examination. **(T-1)**

14.4.1.2.1. Each unit will derive open book examinations from the SQB. **(T-1)** Follow lead MAJCOM guidance to add/remove questions to/from the SQB.

14.4.1.2.2. Do not distribute the SQB to unit crewmembers and safeguard IAW **paragraph 14.7**.

14.4.1.2.3. Lead MAJCOMs will review SQBs once every 24 calendar months or at any time a source publication change is made. **(T-1)** If a complete review was accomplished due to a source document change it may be annotated as and credited towards the 24-calendar-month review.

14.4.1.2.4. Lead MAJCOMs, in coordination with user MAJCOMs, may delegate SQB responsibilities to the unit level. Delegation of these responsibilities should be limited to cases that would make SQB management at the MAJCOM level unfeasible. Examples include but are not limited to operation of a limited number of aircraft/weapons systems, unique mission sets, or other unique circumstances.

14.4.1.3. OGV/WGV may prepare and maintain a supplemental SQB of local procedure questions and answers for use in written examinations. Review and document question banks once every 24 calendar months or at any time where source information has changed. **(T-2)**

14.4.2. **Closed Book Examinations.** Major emphasis of closed book examination questions will be on aircraft systems, AFMANs, Federal Aviation Administration guidance and regulations, International Civil Aviation guidance, and mission knowledge that aircrew must recall while airborne. **(T-1)**

14.4.2.1. Lead MAJCOMs will review MQFs once every 24 calendar months or at any time a source publication has changed. **(T-2)** Distribute changes to MQFs as necessary and ensure aircraft/weapons system or crew-specific MQFs are available to applicable user MAJCOMs.

14.4.2.2. The MQF will be readily available to all aircrew. MAJCOMs may use electronic means, such as mobile apps if they are up to date.

14.4.2.3. AFMEDCOM/A3P maintains an examination MQF to be used for flight surgeon exams; MAJCOMs should coordinate with AFMEDCOM/A3P for updates to the FS MQF.

14.4.3. **Instrument Examination.** The instrument examination provides pilots an extensive open book assessment of instrument procedures and other instrument-related subjects. The examination will be completed as one event and not broken up into multiple tests over time. **(T-2)** The examinee is not required to complete the exam in a single sitting. The examination is synchronized with the INSTM evaluation.

14.4.3.1. The instrument examination will contain a minimum of 50 questions, with a minimum of 40 questions taken from the HQ AFFSA Instrument Examination SQB and a minimum of 10 locally developed questions specific to the group/wing mission and/or aircraft type. **(T-1)** The test will be constructed as follows:

14.4.3.1.1. 25 questions (minimum) - AFMAN 11-202 V3, *Flight Operations* **(T-1)**

14.4.3.1.2. 10 questions (minimum) - Flight Information Publications (FLIP) **(T-1)**

14.4.3.1.3. 5 questions (minimum) – AFH 11-203 V1, *Weather for Aircrews*, and/or AFH 11-203 V2, *Weather for Aircrews-Products and Services*. **(T-1)**

14.4.3.1.4. 10 questions (minimum) - Locally developed. Questions must cover instrument-related areas. **(T-1)** Questions may be taken from MAJCOM flight directives, supplements, aircraft tech orders, and/or local flying directives. Questions should be changed periodically to support trend programs, see **paragraph 19.4**.

14.4.3.1.5. Additional questions (in excess of the 50 minimum) may be written by the unit IRP administrator, written by the MAJCOM, taken from the HQ AFFSA Instrument Examination SQB, or a combination of all three methods.

14.4.3.2. **Exam Maintenance and Changes.** AFFSA/XOT maintains the HQ AFFSA Instrument Examination SQB in electronic format. The SQB is available for download by MAJCOM STAN/EVAL designated personnel via a secure channel in the AIS – Blind Flight Teams®; contact AFFSA/XOT for access. The SQB will not be referenced during the instrument examination. Do not distribute the SQB to unit crew members. Safeguard SQBs IAW **paragraph 14.7**. The IRP administrator, with the assistance of IRP instructors and STAN/EVAL, will act as the unit conduit for deficiencies and updates to questions in the HQ AFFSA Instrument Examination SQB. **(T-1)**

14.4.3.2.1. Changes to individual questions in the HQ AFFSA Instrument Examination SQB are not authorized. Approved changes to questions will be posted on the AIS – Blind Flight Teams®.

14.4.3.2.2. Omit questions from testing if changes in source material render the question invalid.

14.4.3.2.3. MAJCOMs may omit questions that are not relevant to a specific aircraft/weapons systems operations due to incompatibility with aircraft equipment, precluded by supplemental guidance, etc. For example, aircrew who fly aircraft with no Performance-Based Navigation (PBN) capability should not be tested on such material. Likewise, aircrew not authorized or trained to perform a visual climb over the airfield (VCOA) departure procedure should not be tested on such material. Therefore, a group/wing with multiple aircraft/weapons systems may require multiple (different) versions of the instrument exam.

14.4.3.2.4. Reference publications used to generate the examination will be made available to aircrew during testing. Electronic publications may be used as references during examinations.

14.4.4. **Boldface/CAP Examinations.** Boldface/CAP Examinations will come from the aircraft/weapons system T.O. and will be identified in the AFMAN 11-2MDS V2.

14.5. End-of-Course Examinations. FTUs administering USAF Formal School courses listed in the Air Force Education and Training Course Announcement database (**https://usaf.dps.mil/teams/app10-etca/SitePages/Home.aspx**) may use end-of-course examinations to fulfill the requirements of the open book and closed book exams, and Boldface/CAPs (if applicable).

14.5.1. The MAJCOM or NAF STAN/EVAL offices will ensure the end of course examination meets the requirements of this manual and AFMAN 11-2MDS V2 before awarding credit for requisite completion. **(T-1)**

14.5.2. End of course examination questions do not need to incorporate aircraft/weapons system/crew position-specific SQBs or MQFs. All questions must reflect the latest changes to all systems and/or operational procedures and not conflict with any SQBs or MQFs.

14.5.3. All end of course exams that fulfill the requirements of requisite examinations will be graded according to **paragraph 14.8** and entered on the AF Form 8. **(T-1)**

14.6. Examination Management. Except for written Boldface/CAPs exams, units will either maintain prepared examinations for each crew position or generate a unique examination for each aircrew member. **(T-3)**

14.6.1. **Examination Question Review.** Lead MAJCOM and MAJCOM STAN/EVAL functions will review all aircraft/weapons system/crew position-specific SQBs, MQFs and prepared examinations (if used) for which they are responsible IAW **paragraph 14.4** once every 24 calendar months and as soon as possible following changes to source documents. **(T-2)** If a complete review was accomplished due to a source document change it may be annotated as and credited towards the 24-calendar-month review. MAJCOMs will document procedures for the examination reviews in their supplement to this manual. **(T-2)**

14.6.2. If prepared examinations are maintained for each crew position:

14.6.2.1. Units will develop and control a minimum of two examinations for each crew position. **(T-3)**

14.6.2.2. Units having ten or fewer crewmembers per crew position require only one examination.

14.6.2.3. When different aircrew positions are responsible for the same information, units are not required to maintain separate examinations for each aircrew position.

14.6.2.4. Change a minimum of 50 percent of the questions on each prepared examination once every 24 calendar months.

14.6.3. If a unique examination is generated for each aircrew member, examination databases should contain at least twice the number of questions required for each examination (e.g., if a 50-question examination is generated, there should be at least 100 questions in the examination database).

14.7. Examination Security. STAN/EVAL personnel will maintain positive control of all examinations, applicable answer sheets, and associated computer-based media.

14.8. Grading Examinations.

14.8.1. Boldface/CAPs . Written or computer-based Boldface/CAPs examinations will be graded as Q or U. Satisfactory performance requires writing the proper actions in the correct sequence. Emphasis is on correct actions not a verbatim response or proper spelling/punctuation/capitalization. The minimum passing grade is 100 percent.

14.8.2. Written or Computer-Based Examinations. Grade written or computer-based examinations as a percentage of correct answers prior to the member's next flight. The minimum passing grade is 80 percent. All questions missed should be reviewed immediately following the examination.

14.9. Failure to Pass an Examination.

14.9.1. Failure of a requisite examination or Boldface/CAPs results in an overall grade of Q3 for the associated evaluation. Refer to **paragraph 13.4** for failure to pass an aircrew evaluation (or **paragraph 13.5** for failure to pass an INIT evaluation).

14.9.2. Aircrew members who fail an examination should be afforded an adequate study period prior to re-examination. For other than Boldface/CAPs examination, the aircrew member will be given a different version of the examination. **(T-1)**

14.9.3. For aircrew members who maintain multiple qualifications, supervised status resulting from failure of either an open book, closed book or Boldface/CAP examination applies only to the aircraft for which the examination was administered. Failure of the instrument exam results in the examinee being placed in supervised status in all aircraft in which instrument qualification is required.

Chapter 15

DOCUMENTATION

15.1. General. Administration of the aircrew evaluation program requires accurate documentation. This chapter provides general documentation guidance and specific guidance for some of the forms used to establish or maintain a qualification.

15.1.1. In all instances of documentation, use of electronic forms is encouraged, to include use of electronic signatures and wholly electronic FEFs IAW MAJCOM supplement guidance. Computer-generated forms from STAN/EVAL software must mirror DAF and AF forms as published on the DAF E-Publishing website IAW DAFI 90-160. STAN/EVAL offices utilizing MAJCOM-directed software incapable of producing forms in compliance with this paragraph will use forms downloaded from the DAF E-Publishing website. **(T-1)**

15.1.2. All references to "Commander" or "Approving Official" delineate an individual on G-series orders or as appropriately delegated (acting) IAW DAFI 51-509, *Appointment to and Assumption of Command*.

15.1.3. For electronic forms, annotations such as an "X" and "√" are interchangeable. Selected symbology will be consistent throughout the form.

15.1.4. For date fields use the date formatted in the form. Complete date fields even if an associated digital signature includes a date. If manual entry is required, use a two-digit day, three-letter month and two-digit year format (e.g., 03 Jun 20).

15.1.5. Except where specifically noted otherwise (e.g., annotating the type of evaluation, "INSTR"), use upper and lower-case letters.

15.1.6. Enter names as depicted on the specific form being filled out. Do not put a comma between the first name and middle initial (e.g., Bullard, Eugene J.). Leave the middle initial blank if the member does not have one (e.g., Jemison, Mae). Use suffixes (e.g., Jr., III) when applicable and put the suffix after the middle initial (e.g., Brown, Charles Q. Jr.). Use hyphenated names and/or special symbols as appropriate for the member (e.g. Colón-López, Ramón).

15.1.7. Use the military grade for service members, to include an ART. Use CTR for contractor. Use CIV for government civilians or if the form allows, input the civilian pay grade (e.g., GS-13, WG-13, etc.).

15.2. Temporary Aircrew Evaluation Documentation. Following an INIT or RQ evaluation, a member may fly/operate with only a completed AF 3862 when all criteria outlined in **Table 15.1** are satisfied. For periodic evaluations, the member may fly/operate beyond the 24-calendar month expiration date with only a completed AF 3862 when all criteria outlined in **Table 15.2** are satisfied

Table 15.1. Flying/Operating with only a AF 3862 for INIT or RQ Evaluation.

No.	Requirement
1	All evaluation requirements are satisfactorily completed.
2	The result of the evaluation is Q1.
3	The AF Form 3862 is signed by the FE.
4	Verbal or written approval from the Commander/Approving Official; actual signature on the AF Form 3862 is not required.

Table 15.2. Flying with only a AF 3862 for Periodic Evaluation.

No.	Requirement
1	All evaluation requirements are satisfactorily completed.
2	The result of the evaluation is Q1.
3	The AF Form 3862 is signed by the FE and
4	The AF Form 3862 is signed by the Commander/Approving Official.

15.2.1. AF Form 3862, *Flight Evaluation Worksheet*. Use AF Form 3862 as temporary documentation of flight evaluations or MAJCOM-directed digital equivalent.

15.2.2. File temporary aircrew evaluation documentation in the crewmember's FEF (hard-copy or electronic) after the aircrew evaluation and all requisites are complete as a temporary record of the aircrew evaluation results.

15.2.3. The temporary aircrew evaluation documentation should include examinee, examiner, type evaluation, qualification level, requisites results, and date completed. List any discrepancies by area/subarea, any restrictions, any additional training and any additional training due dates.

15.2.4. The examiner completing the aircrew evaluation signs and dates the temporary aircrew evaluation documentation.

15.2.5. Remove temporary aircrew evaluation documentation when the permanent AF Form 8 is filed in the FEF.

15.2.6. File the completed AF Form 8 in the FEF no later than 90-days following the evaluation completion date of the new AF Form 8.

15.2.7. Further guidance concerning temporary aircrew evaluation documentation may be outlined in MAJCOM and unit supplement.

15.3. Air Force Form 4348, *USAF Aircrew Certifications*. See **Attachment 6** for sample AF Form 4348. Refer to AFMAN 11-202 V1 and AFMAN 11-2MDSV1 for further guidance regarding certifications, differences training, and other events that should be logged on AF Form 4348. If a conflict exists between this publication and the AFMAN 11-202 V1 (or any other publication regarding documentation and/or records management), follow guidance in the applicable publication. In absence of external guidance, adhere to guidance in this manual. Use

AF Form 4348 to document completion of AFMAN 11-202 V1 and AFMAN 11-2MDSV1 training in these aircraft when an AF Form 8 evaluation is not required.

15.3.1. **Purpose.** The AF Form 4348 provides a record of aircrew certification that will be kept in the FEF unless otherwise directed by the MAJCOM. **Exception:** Decertification for cause, see **paragraph 15.3.4**, must always be maintained in a member's FEF.

15.3.1.1. If the aircrew member's AF Form 4348 is kept in the FEF, maintain it in the FEF, Section I, under tab 1 documenting certifications by assigned flying unit and primary aircraft/weapons system. For aircrew members with aircraft certifications in multiple aircraft/weapons system aircraft which do not require qualification in each aircraft (e.g., F-16C and F-16CM), only one AF Form 4348 is required; specify the primary mission aircraft/weapons system designation.

15.3.1.2. Unit STAN/EVAL, or as otherwise assigned by MAJCOM guidance or SQ/CC, will document all initial certification, decertification, and re-certifications for aircrew assigned/attached to their flying unit to indicate a chronological history of aircrew certifications.

15.3.1.3. During the initial review of individual FEF, include a detailed review of previous AF Form 4348 (or electronic equivalent) aircrew certifications entries to determine applicable certifications of new assigned/attached aircrew member. **(T-2)** Document applicable aircrew certifications accepted by the gaining flying unit commander on AF Form 4348 or the electronic equivalent, if compatible electronic methods are used at both the losing and gaining unit. Alternatively, create a new electronic equivalent or paper AF Form 4348 to conform with the gaining unit aircrew certification documentation standards. **(T-3)**

15.3.1.4. The reviewer will sign a one-line entry below all other entries verifying that certification transcriptions are accurate. When utilizing digital FEFs, the certifying official may digitally sign new individual entries. If the procedures in **paragraph 15.3.1.3** are utilized for past certifications and a certifying official has signed all additional entries, then a final signature below all other entries is not required.

15.3.1.5. The AF Form 4348 is not required to be used to document one-time training/new equipment unless directed by MAJCOM.

15.3.1.6. Appropriate guidance that may require aircrew certification using AF Form 4348 entry include MAJCOM and/or supplement, AFMAN 11-2MDS V1, and AFMAN 11-2MDS V3.

15.3.2. **General Data Entry.**

15.3.2.1. Complete individual identification block with last name, first name, middle initial, any titles (e.g., Jr. or III), DoD ID number, unit aircraft/weapons system and unit (assigned/attached for flying) organization/location.

15.3.2.2. Use one line for each certification.

15.3.2.3. Enter each certification in chronological order based on the date the action is completed.

15.3.2.4. For date fields in the AF Form 4348, use a two-digit day, three-letter month and two-digit year format, or as required for electronic forms.

15.3.3. **Certification.**

15.3.3.1. Certified Event Title and Instructor. The first column of AF Form 4348 is subdivided into two rows, to identify the Certified Event and the Instructor.

15.3.3.1.1. Enter each certification title in the top block.

15.3.3.1.2. Instructor. Enter the instructor's rank, name and organization who completed applicable training for the certified event below the event title of the Certified Event block for the aircraft/weapons system under which the certification is given.

15.3.3.2. Date Certified. Enter the effective date of certification.

15.3.3.3. For certifications attained as part of a FTU, the date will match the date of the applicable AF Form 8 or enter the date of completion or graduation from FTU if no AF Form 8 is issued.

15.3.3.4. Certification Official/Organization. MAJCOM Supplement will specify AF Form 4348 certifying officials. The Certifying Official will digitally sign the designated block on AF Form 4348, certifying the event. If completing a hard copy AF Form 4348, the certifying official will sign the designated block above their typed or printed name, rank, organization and office symbol.

15.3.3.4.1. The Certifying Official is the person authorized by MAJCOM Supplement to approve or certify an aircrew member for a specific position or event.

15.3.3.4.2. If a certification is given with restrictions, state the restrictions on the AF Form 4348 in the Remarks block.

15.3.4. **Decertification.** Decertification events fall into two categories: Decertification for Cause (with prejudice) and Discretionary Decertification (without prejudice). In all cases of decertification, ensure the member is notified prior to the decertification documentation actions. **(T-2)**

15.3.4.1. Decertification for Cause. Used for substandard performance. To document Decertification for Cause, place an "X" in the appropriate box; enter date of decertification under Decertification Date block; enter name, rank, organization and office symbol and signature of the decertifying official under Decertifying Official/Organization block; see **Attachment 6** for example.

15.3.4.2. Discretionary Decertification. An administrative action not based on performance.

15.3.4.2.1. Such decertification is warranted when loss of currency or certification occurs that will not be regained IAW AFMAN 11-202 V1, when instructor-certified events become core mission events, or when a higher certification is obtained making the previous entry obsolete. Discretionary Decertification is also applicable for the decertification of flight examiners because of reasons other than substandard performance.

15.3.4.2.2. To document Discretionary Decertification, place an "X" in the appropriate box; enter date of decertification under Decertification Date block; enter name, rank, organization and office symbol and signature of the decertifying official under Decertifying Official/Organization block; see **Attachment 6**. For decertification due to loss of currency with no requirement for re-certification, the effective date of decertification will be the date of certification loss.

15.3.4.2.3. For events that have changed in name only (e.g., In-Flight Refueling to Air Refueling) no action is necessary. If desired for clarity: annotate "Renamed (new title)" under Remarks.

15.3.4.2.4. For members who change aircraft/weapons system while assigned/attached to the same STAN/EVAL organization, prepare a new AF Form 4348 indicating the new aircraft/weapons system and transcribe all events which apply to the new aircraft/weapons system.

15.3.5. **Unusual Circumstances.** When unusual circumstances require additional information for an AF Form 4348 entry, use additional lines as necessary or re-accomplish the AF Form 4348.

15.3.6. **Unit Supplement.** Describe unit AF Form 4348 procedures/program. Include a list of certifications applicable to the unit with appropriate source documents and designated certifying officials. Document procedures to ensure certifications reflected on AF Form 4348 are also included in ARTEMIS. Annotate if someone other than the Chief of OGV/WGV or unit CCV has been authorized by the SQ/CC to sign the last line of an AF Form 4348 to signify transcription accuracy.

15.4. AF Form 80, *Multiple Qualification Request and Authorization*. Submit the AF Form 80 through STAN/EVAL for coordination and staffing to approval authority, see AFMAN 11-202 V1. Document required information IAW **Table 15.3** and **paragraph 15.1**. See **Attachment 7** for an example.

15.4.1. Use the AF Form 80 to document military (e.g., rated, CEA, and non-rated aircrew member), government civilian and contractor aircrew members that fly in support of AF flight operations multiple qualification requests. See **Chapter 11** regarding documentation of universal qualifications.

15.4.2. Qualifications in multiple variants of the same MD family do not constitute a multiple qualification.

15.4.3. AF Form 80 will be maintained in Section I of the FEF.

15.4.4. Upon PCS of a multiple qualified aircrew, the AF Form 80 is re-accomplished by the gaining unit if multiple qualifications are still required.

15.4.5. The AF Form 80 will have a control number and expiration date (not to exceed 5 years).

15.4.6. **Annual Review.** Annually review and re-validate all multiple qualifications. Cancel those no longer required for mission accomplishment. Document this review with signature and date on each AF Form 80. A new AF Form 80 is required when aircraft qualification is changed. A new AF Form 80 is required after 5 years (four annual reviews documented). Changes in aircrew duty position do not require annotation. The OG/CC or WG/CC will review and re-validate multiple qualifications approved by the appropriate authority. **(T-2)** These blocks are optional for flying WG/CC with approved multiple qualifications.

Table 15.3. Completion Instructions for AF Form 80.

Block(s)	Field Title	Completion Instructions
1–6	Section I – Aircrew Member Identification	Include name, grade, DoD ID, unit, aeronautical rating, and duty AFSC.
7–13	Section II – Present Aircraft Qualifications	Include current aircraft MDS, crew position, experience, and number of evaluations. Further details may be provided in MAJCOM guidance.
14–20	Section III – Additional Qualification Requested	Include requested MDS, position, time in model, and justification for additional qualification. Refer to MAJCOM guidance for further detail.
21	Section IV --Justification	Provide a detailed explanation of the operational requirement justifying the request for additional qualification.
22	Action Officer	Enter the name, grade, title, and phone number of the requestor.
23–25	Requesting Group CC	Completed and signed by the OG/CC or equivalent. Includes date, name/rank, and signature.
26–28	Section V – Wing Commander	WG/CC or equivalent selects “Recommend Approval,” “Recommend Disapproval,” or “Approved” and completes all signature blocks.
29–31	Section VI – MAJCOM STAN/EVAL	Completed by MAJCOM or NAF STAN/EVAL personnel. Includes recommendation and control/expiration numbers IAW MAJCOM guidance.
32–34	MAJCOM STAN/EVAL Signature	Completed and signed by MAJCOM STAN/EVAL personnel or equivalent.
35	Section VII – Comments	Completed by MAJCOM/A3 or NAF/A3 with any additional remarks.
36–38	MAJCOM/A3 (or delegate) Signature	Select approval/disapproval. Enter date, name, and signature.
Right-hand side	Section VIII – Annual Reviews	Complete IAW **paragraph 15.4.4**. Annotate review date and signature in the next available row.

Chapter 16

AF FORM 8 DOCUMENTATION

16.1. Purpose & Section I (Examinee Identification).

16.1.1. **Purpose.** The AF Form 8 is the source document used to record the aircrew evaluation and verify the qualification of an aircrew member. An AF Form 8 is accomplished for each qualification. **Exception:** MAJCOM memoranda for record identifying initial cadre grants a qualification until it is established with an AF Form 8, see **paragraph 12.3** and **paragraph 16.10**.

16.1.1.1. AF Form 8 will be used to record all aircrew qualifications, including qualification in a single aircraft, qualification in multiple aircraft, initial cadre, and universal qualifications.

16.1.1.2. Do not document certifications on AF Form 8. Certifications are attained through methods other than evaluation and are documented on AF Form 4348 and/or IAW AFMAN 11-202V1.

16.1.1.3. An AF Form 8 is accomplished by the Flight Examiner, Commander/Approving Official, and the examinee. The Reviewer block in Section VIII (Endorsement) will be blank unless required by the member's MAJCOM or OGV/WGV.

16.1.2. **General Use of AF Form 8.** Reference **paragraph 15.1** for general guidance for data entry. See **Attachment 3** for a sample blank AF Form 8. See **Attachment 4** for an example of a completed AF Form 8. Additional examples of completed AF Forms 8 are available on the AFFSA/XOF SharePoint® page: **https://usaf.dps.mil/sites/affsa/SitePages/Flight-Directives.aspx**

16.1.2.1. If only one AF Form 8 is used for a complete evaluation, enter Form 1 of 1 in the upper right of the form.

16.1.2.2. When space provided meets all documentation requirements, use a single AF Form 8 for each evaluation (or combined evaluation). Include incomplete evaluations and/or changes in examiner on this AF Form 8. Each examiner will complete and sign the next available block in Section V (Evaluation); however, the AF Form 8 will only be final when endorsed on the reverse by the final examiner, Commander/Approving Official, and certified by the examinee. If additional space is needed to document completion of an evaluation (e.g., more than four evaluation events in Section V (Evaluations), more than eight requisites, more space is needed for comments/remarks), use an additional AF Form 8; annotate the form numbers as required per **paragraph 16.1.2.3**.

16.1.2.3. **AF Form 8 Continued/Additional AF Forms 8.** If more than one AF Form 8 is used for a single (or combined) evaluation, in the upper right of the form annotate each form in chronological sequence in the leftmost box (e.g., "FORM 1 OF X," "FORM 2 OF X,") as required. This is used when multiple AF Forms 8 are required to document an evaluation resulting in a Q2, see **paragraph 16.11**, and when additional space is needed to document the completion of an evaluation. When the evaluation is complete and ready for endorsement, complete the second block in the upper right of the form with the total number of AF Forms 8 used for the evaluation (e.g., "FORM 2 OF 3").

16.1.2.4. When completing multiple Forms 8, the first Form 8 will be completed in it is entirety to include all required signatures in Section VIII. On the additional AF Forms 8, the following will be completed: Form x of x is required, Section I is required, Section II through Section VII is completed as needed (otherwise leave blank), Section VIII completed in its entirety. This will result in the FE, Commander/Approving Official and Examinee signing all AF Forms 8 associated with the documentation of the evaluation.

16.1.2.5. **Entry of Name and Grade.** Enter name IAW **paragraph 15.1.6**. Use the dropdown to select the military grade for service members, CTR for contractors, or CIV for government civilians. An ART will select their military grade. If MAJCOM requires further details (e.g., GS-level for civilians), add that information in Section VI. Remarks.

16.1.3. **Section I (Examinee Identification).**

16.1.3.1. Blocks 1 and 2. **Name and Grade**. Enter the name of the examinee IAW **paragraph 15.1.6** and enter grade IAW **paragraph 16.1.2.5**.

16.1.3.2. Block 3. **Aircraft**. Enter the aircraft/weapons system/MDS in which the aircrew evaluation was conducted. If the evaluation is for a Universal Qualification enter "UNIV" even if the evaluation was conducted in a specific aircraft/weapons system.

16.1.3.3. Block 4. **Crew Position**. Enter the examinee's current highest qualification in the aircraft/weapons system for which the aircrew evaluation was conducted. **Note:** Examiner (e.g., EP, EF, EL) will only be used when the FE is receiving a SPOT FE Objectivity evaluation, see **paragraph 10.5**.

16.1.3.4. Block 5. **DoD ID**. Enter the examinee's DoD ID number, or Non-US Identity Code, as appropriate. If neither apply, leave blank and explain in Section VI (Remarks).

16.1.3.5. Block 6. **Organization and Location**. Enter the unit, base, and location (state/country) where the examinee is assigned/attached-to for flying purposes (e.g., 36th Airlift Squadron, Yokota AB, JP); see **paragraph 16.6** for additional documentation requirements for attached aircrew members. For formal training unit courses in which an evaluation is administered, the organization and location will be the formal training unit organization/location. (e.g., 373rd Training Squadron, Little Rock AFB, AR)

16.1.3.6. Block 7. **Current Qualifications**. Enter all qualifications for all aircraft/weapons systems currently held (e.g., a pilot with a paired trainer might have U-2: QUAL/MSN; T-38A: QUAL/INSTM/INSTR). This is a list of all the examinee's current qualifications, regardless of whether they are relevant to the evaluation being documented by this AF Form 8. For Universal Qualifications, see **paragraph 16.1.3.7**. For aircrew with multiple qualifications, follow MAJCOM guidance on how to enter aircraft/weapons systems (e.g. by mission design or mission design series). For aircrew with no current qualifications (e.g., a crewmember's first initial qualification), input "None." **Note:** For a majority of aircrew, a single aircraft/weapons system will be listed.

16.1.3.7. For Universal Qualifications, refer **Table 16.1** and MAJCOM guidance for the entry into Block 7 (Current Qualifications). Additionally, review AF 4348 for Difference Certifications acquired since last evaluation for inclusion in Block 7 (Current Qualifications) IAW MAJCOM guidance.

Table 16.1. Universal Qualification AF Form 8 Documentation.

No.	Situation	Entry into Block 7 (Current Qualifications) [1]
1	Specific Aircraft	List the exact aircraft/weapons systems/MDS the member is qualified to operate in (e.g., “RC-135, C-130H (all variants), U-28”).
2	General Aircraft Type	Describe the general category of aircraft for which the member is qualified (e.g., "All non-ejection seat aircraft" or “All C-coded aircraft”).
3	All MAJCOM (Assigned) Aircraft [2]	Enter “All MAJCOM Aircraft” only if the member is demonstrably qualified and authorized to operate in all aircraft in within the scope of a MAJCOM or Lead MAJCOM scope (e.g., “All ACC aircraft” or “All PACAF-assigned aircraft).
4	All Aircraft [2]	Enter "All aircraft” for Flight Surgeons and Aerospace Physiologists.
Notes: 1. Ensure the description is sufficiently clear to avoid ambiguity. 2. Only authorized for Flight Surgeons and Aerospace Physiologists, see **Chapter 11**.		

16.2. Section II (Evaluation Information).

16.2.1. Block 8. **Qualification Level.** See **paragraph 5.5** for a description of qualification levels. This block annotates the final result of the evaluation or assigned additional training, for the latter see **paragraph 13.1** and **paragraph 16.11**.

16.2.1.1. The FE will select the final qualification level (Q1, Q2, or Q3) for the evaluation when all requirements have been met (or when assigned additional training has been completed), prior to signing the AF Form 8. See **paragraph 16.12** for documentation of a combination evaluation that resulted in various qualification levels.

16.2.1.2. If the evaluation is incomplete (e.g., another flight is required to finish the requirements of the evaluation), the FE will select incomplete (INC), and the final examiner will change this to the final qualification level once completed. The FE who marked INC will still complete applicable sections of the AF Form 8 prior to signing in Section V (Evaluations). The INC designation will remain selected until the evaluation has been fully completed, and a qualification level is assigned. **Note:** This paragraph is not applicable if the same FE is used to complete the evaluation over multiple days.

16.2.2. Block 9. **Dates**. Input the appropriate completion and expiration dates. Evaluations will expire on the last day of a given month. Leave all dates blank if the evaluation is either INC or the qualification level of Q3 was assigned. When documenting completion of additional training following a Q2, use the dates from the original evaluation that resulted in additional training being assigned (i.e., dates from the evaluation that led to a Q2). If the evaluation is a one-time requirement and subsequent periodic evaluations are not required (e.g., MAJCOM does not specify an expiration date for a MSN evaluation), then leave dates blank for Evaluation Expires and 24-Month Expiration.

16.2.2.1. **Evaluation Complete.** Enter the latest date that coincides with *all portions of the evaluation being complete* (i.e., flights, requisites, EPE). Combined aircrew evaluations require only one completion date if all aircrew evaluation types were successfully completed.

16.2.2.2. **Evaluation Expires.** Enter the last day of the month on which the completed evaluation will expire, *based on the date of the flight*, IAW MAJCOM guidance. If no MAJCOM guidance is provided, enter the 24-month expiration date, see **paragraph 16.2.2.3**. Completion of the flight evaluation "resets the clock" for required periodic evaluations.

16.2.2.3. **24-Month Expiration.** Enter the last day of the 24th calendar month from the *completion of the flight*. The month after the flight evaluation is complete is month "one." Use the last day of the 24th month as the expiration date, see **paragraph 5.1.3**. For example, if an evaluation is completed on 17 April 2025, it remains valid through 30 April 2027 and is expired on 1 May 2027.

16.3. Section III (Special Conditions). Check all boxes that apply. Mandatory comments are required in Section VI (Remarks), for any boxes checked. Leave blank if the evaluation is either incomplete or the qualification level of Q3 was assigned.

16.3.1. Check the **Exceptionally Qualified** box if requirements of **paragraph 5.4.8** are met.

16.3.2. Check the **Commendable Area(s)** box if requirements of **paragraph 5.4.7** are met.

16.3.3. Check the **Restriction** box when required per **paragraph 13.3**. Do not check this box for a Q3 since restrictions are inherent to this qualification level.

16.3.4. Check the **Additional Training** box when a Q2 is assigned and input the Due Date assigned by the Commander/Approving Official, see **paragraph 13.1**. If more than one date or type of additional training is required, input the earliest date in this section and list other training and due dates in Section VI (Remarks). Do not check this box for a Q3.

16.3.5. Block 10. **Prefix**. Leave blank for routine periodic evaluations. For other evaluations, select the prefix (RQ, INIT, or OTHER) from the drop-down menu, as appropriate per **paragraph 5.3**. Only one prefix will be used. An evaluation cannot be both INIT and RQ. When the OTHER prefix is selected, a free-text box is unlocked; input a description IAW this manual and MAJCOM guidance (e.g., Initial Cadre, FE Objectivity, CDRA). **Note:** If the evaluation is a SPOT evaluation, that will be entered in Section V (Evaluations) Block d.

16.4. Section IV (Evaluation Requisites).

16.4.1. Block 11. **Requisite**. Enter evaluation requisite(s) in this column. See **paragraph 6.2** for QUAL, **paragraph 7.2** for INSTM, **paragraph 8.2** for MSN, **paragraph 9.2** for INSTR, **paragraph 10.2** for SPOT, and **Chapter 11** for UNIV. Leave blank for CDRA assigning a Q2 or Q3. See **Chapter 14** for failing an examination. If a requisite was not accomplished prior to a Q3 being assigned, document as such in Section VI (Remarks).

16.4.1.1. Make a separate entry for each requisite in Block 11, the associated date the requisite was completed in Block 12, and result in Block 13. The result is normally a percentage score, grade (Q, Q- or U), or as specified by the MAJCOM.

16.4.1.2. If additional space is needed, document remaining requisite(s) on an additional AF Form 8. Annotate the number of total pages on the top right front of the AF Form 8, see **paragraph 16.1.2.3**.

16.4.1.3. Annotate "Instrument Exam," "Closed Book Exam," and "Open Book Exam" for requisite examinations with the associated percentage score as the result. See MAJCOM guidance for annotation of MSN or aircrew specific examinations. **Note:** Do not input the "%" symbol following the numerical score.

16.4.1.4. Annotate "Boldface" or "CAPs" as required by the applicable AFMAN 11-2MDS V2 with a result of Q or U.

16.4.1.5. Annotate "EPE" with a result of Q or U. Additional documentation of the EPE is required in Section V (Evaluation) if the EPE resulted in a U and/or if the EPE was accomplished by a different FE other than the FE who conducted the flight evaluation; see **paragraph 16.5**. If a combined EPE is not completed but multiple evaluations are on the same AF Form 8 (e.g., combined QUAL/MSN), annotate the respective EPEs separately (e.g., "EPE (QUAL)" on one line and "EPE (MSN)" on another.)

16.5. Section V (Evaluations). This section is used to document the following: flight evaluations, EPE when required per **paragraph 16.4.1.5**, universal qualifications (**see paragraph 11.3.1**), or as directed by MAJCOM guidance. Four subsections (Blocks 14 through 17) are provided to document multiple flights (and/or EPE) if needed. For aircrew evaluations requiring more than one FE, use a new subsection in Section V (Evaluations) to document portions of the evaluation completed by each FE. Multiple flights by the same or different examiner(s) may be documented using a single AF Form 8. The examiner completes and digitally signs each subsection as the examinee accomplishes events. Leave blank for CDRA assigning a Q2 or Q3.

16.5.1. Block 14a-17a and 14b-17b. **Examiner Name and Grade** Enter the name of the FE IAW **paragraph 15.1.6** and enter grade IAW **paragraph 16.1.2.5**.

16.5.2. Blocks 14c-17c. **Method**. Use the dropdown to select either AIRCRAFT, ATD, EXAM ONLY, or ALTERNATE. Choose ALTERNATE for MAJCOM-authorized alternate method(s) and input a description of the alternate method (IAW MAJCOM guidance) in the free text block that is available when this is chosen. For universal qualifications that only require an examination, see **paragraph 11.3.1**, select EXAM ONLY from the dropdown

16.5.3. Blocks 14d-17d. **Evaluation**. Enter the evaluation(s) being performed (e.g., QUAL, INSTM, MSN, or SPOT). For combination evaluations that resulted in the same qualification level input as a single event and use a slash between evaluations (e.g., QUAL/INSTM, QUAL/INSTM/INSTR). See **paragraph 16.12** for varied qualification levels for combination evaluations. Enter EPE only if required, see **paragraph 16.4.1.5**.

16.5.4. Blocks 14e-17e. **Examiner Remarks**. Enter applicable mandatory comments in the order presented in **Figure 16.1** and **Table 16.2**. If a mandatory comment is not applicable, then do not input any information related to that comment. Leave a line break between remarks when space permits. These remarks will be locked when the FE digitally signs the signature block for this line. If more space is needed, continue remarks in another block in Section V (Evaluations) and complete all blocks and signatures accordingly. If required, use an additional AF Form 8, see **paragraph 16.1.2.3**.

16.5.4.1. Performance Report-type comments or comments comparing the examinee to other individuals are prohibited.

16.5.4.2. The absence of information indicates standard (IAW this manual or MAJCOM guidance). Only provide comments for non-standard situations (e.g. incomplete events, graded area evaluated via MAJCOM-authorized alternate method because it could not be accomplished in flight). It is not necessary to document that a discrepancy was debriefed as this is the standard.

16.5.4.3. Provide information needed for tracking purposes as directed by this manual (e.g., completion of CAT II/III ILS approach) or MAJCOM guidance (e.g., which seat an instructor occupied when the AFMAN 11-2MDS V2 for a crewed aircraft states that the instructor will alternate seats between evaluations).

16.5.4.4. If a combination evaluation was being conducted and one evaluation was completed but the other was not, then document evaluations in separate block number of Section V (Evaluations) if the evaluations are completed in the same calendar month. If the evaluations are completed over two separate calendar months, then document the results of the evaluations on separate AF Forms 8, see **paragraph 16.12**.

Figure 16.1. Priority Order for Mandatory Comments in Examiner Remarks.

Incomplete: (Document areas/subareas remaining and/or completed, whichever will most effectively communicate to the next examiner what remains in order to complete the qualification evaluation.)

Discrepancies: (Document only if area/subareas were graded as Q- or U. Do not state “debriefed” as that is the standard)

Recommendations: (Document recommended additional training only if Q2 is assigned.)

Mission Description: (Brief description of the profile. See MAJCOM guidance. Do not use verbiage such as “All required areas accomplished IAW AFMAN 11-2MDSV2” as that is the standard.)

Other FE Remarks: (Administrative details and/or as needed.)

Table 16.2. Mandatory Comments in Examiner Remarks.

No.	Topic	Detailed Description
Incomplete Area(s)		
1	Areas/Subareas Not Completed	Document areas/subareas remaining and/or completed, whichever will most effectively communicate to the next FE what remains in order to complete the qualification evaluation.
Discrepancies		
2	General Annotation of Discrepancy	Annotate the graded area (number), graded area title, grade and a short description of discrepancy. For example: Area51, Altitude Control, Q-: Pilot consistently maintained 100 ft high in level flight. It is not necessary to document that a discrepancy was debriefed as this is the standard.
3	Safety of Flight	Document breaches in safety of flight or performance resulting in overall grade of Q3.
4	Q2 from evaluation	Specify discrepancy (or discrepancies) that contributed to a Q2.
5	Q3 from evaluation	Specify discrepancy (or discrepancies) that contributed to a Q3.
Recommendations		
6	Q2 from evaluation	Describe recommended additional training to remedy discrepancies. Specify if recommended additional training must be completed before the next flight.
7	(Reserved)	(Reserved)
8	Q3 from evaluation	Describe recommendations for RQ syllabus and RQ evaluation. Indicate whether the entire evaluation must be re-accomplished or only specific areas. Identify any requisites not yet accomplished prior to Q3 being administered (e.g., scheduled EPE).
Mission Description		
9	Profile Description	Concise description of the evaluation mission to include the flight profile. If evaluation was conducted over multiple days with the same FE, input the applicable dates involved. Document only the information necessary to ensure compliance with this manual, MAJCOM guidance, and AFMAN 11-2MDS V2.
10	Weather	Include a concise description of the in-flight conditions (e.g. weather, illumination, ATC) which might have reasonably affected the outcome of the evaluation (e.g., discrepancies, Q2, Q3).
11	INSTR	Comment on instructional ability and what was instructed.

12	Instructor qualification evaluation course	Document completion of MAJCOM-approved instructor qualification evaluation course completed in lieu of an evaluation, see **paragraph 9.4**.
13	INSTM CAT II/III ILS	Annotate if CAT II/III ILS was evaluated or not for an appropriately equipped aircraft, see **paragraph 7.6.3**. If an aircraft is equipped but the member is not trained/certified, state as much. For example, "CAT II/III ILS not evaluated because member has not been trained/certified yet due to flight hours requirement."
14	INSTM Holding and/or Circling	Specify if holding and/or circling were *not* accomplished during the flight and reason why. State how it was accomplished. Should only apply when INSTM evaluation was conducted in the actual aircraft. See **paragraph 7.6.3.1**.
15	INSTM Aircraft Limitation	Annotate if a required instrument procedure, see paragraph 7.6, could not be accomplished due to limitations listed in the aircraft's technical order, see **paragraph 7.6.3.2**. For example: "Circling not required to be evaluated due to aircraft limitations. Reference TO Section 5, Prohibited Maneuvers.")
16	EPE during Flight	If an EPE was completed during the flight, document completion in this section. Result will be documented in Section IV (Evaluation Requisites). **Note:** If the same examiner conducted the EPE before or after the evaluation flight, no remark is needed.
17	Alternate Evaluation Method	If MAJCOM-approved alternate evaluation method is used, enter area number and title, and date it was accomplished. State reason not completed by normal method.
18	UNIV	Universal qualifications that consist of only an exam, document the proctor of the exam (Rank First M. Last) and the location in which it was accomplished.
19	UNIV	State aircraft in which evaluation was conducted, unit flown with, and location (base and state/country).
Other FE Remarks		
20	Combination Evaluations	If a combination evaluation was conducted but it resulted in varied qualification levels, see **paragraph 16.12**, annotate applicable information. For example, "The QUAL portion of the combined evaluation was satisfactorily completed and documented on a separate AF Form 8 dated 10 Sep 25."
21	Waivers/MFRs	Incorporate details from applicable memoranda for record (extensions, waivers, etc.). **Note:** Information related to pyramid evaluation waivers or cross-command evaluations are documented in Section VI (Remarks), see **paragraph 16.6** and **Table 16.3**.
22	RQ	Document the purpose of the RQ evaluation. For example, "RQ evaluation due to break in flying following non-flying staff tour."

		If due to a failed evaluation (other than INIT) list the date associated with the Q3 AF Form 8. For example:" RQ INSTM evaluation required due to Q3 on AF Form 8 dated 10 Sep 25."
23	Other Notes	Add comments not documented elsewhere.

16.5.4.5. **Incomplete.** See additional MAJCOM guidance as applicable.

16.5.4.6. **Discrepancies.** See additional MAJCOM guidance as applicable.

16.5.4.7. **Recommendations.** See additional MAJCOM guidance as applicable.

16.5.4.8. **Mission Description.** See additional MAJCOM guidance as applicable.

16.5.4.9. **Other FE Remarks.** See additional MAJCOM guidance as applicable.

16.5.5. Blocks 14f-17f. **Date**. Enter the date the evaluation *flight* (or EPE when required) was conducted. For INC evaluations, enter the date it was conducted. For an evaluation that spans multiple days, input the date the evaluation was completed and document the inclusive dates in Examiner Remarks as part of the Mission Description. If a combination evaluation was conducted over multiple days with more than one FE, separate entries in Section V (Evaluations) will be required, see **paragraph 16.1.2**.

16.5.6. Blocks 14h-17h. **Results**. Use the dropdown to select either INCOMPLETE or COMPLETE. Select COMPLETE if all requirements for the evaluation flight were accomplished IAW the examinee's AFMAN 11-2MDS V2. Select INCOMPLETE when an additional evaluation flight is required and document remaining areas/subareas in Examiner Remarks IAW **paragraph 16.5.4**.

16.5.7. Blocks 14g-17g. **Examiner Signature**. The FE administering the flight evaluation (or EPE) will digitally sign in the appropriate block (i.e., the first FE signs in 14g, second FE signs in 15g, etc.) The first digital signature in Section V (Evaluations) will lock Sections I of the form, as well as all the information in the corresponding line in Section V (Evaluations). Subsequent signatures in Section V (Evaluations) will only lock the corresponding line.

16.6. Section VI (Remarks). Document mandatory remarks IAW **Table 16.3** and MAJCOM guidance; the Commander/Approving Official must provide justification for items marked with a dagger (†) in the table. This section is primarily for information from Section III (Special Conditions), see **paragraph 16.3**., Commander/Approving Official remarks, and/or examinee remarks. Remarks on the AF Form 8 will not be modified without the concurrence of the individual who entered the original comments. If more space is needed, an additional AF Form 8 may be used to continue, see **paragraph 16.1.2.3**.

16.6.1. Examinee may enter remarks in Section VI (Remarks); however, this must be accomplished prior to the Commander/Approving Official digitally signing the AF Form 8 in Section VII (Endorsement) because their signature lock everything on the form except for Blocks 28-31. Comments will only be officially recorded if the examinee disagrees with any remarks or actions taken by an examiner, instructor, or the Commander/Approving Official.

16.6.2. If requested in writing (e.g., email or MFR) by the examinee, the Commander/Approving Official will remove their digital signature to facilitate examinee remarks.

Table 16.3. Mandatory Comments in Section VI (Remarks).

No.	Topic	Detailed Description
From the Flight Examiner Signing in Section VIII (Endorsement)		
1	Exceptionally Qualified	Document conditions that lead to this being awarded.
2	Commendable Areas	Document commendable item(s) using format: "Commendable (Evaluation, if applicable) Area #, Title (subarea if applicable), description." **Note:** For combination evaluations, specify the evaluation(s) for which the commendable is appliable prior to the Area #
3	Blank Block 5	Explain why Block 5 was left blank (i.e. member does not have a DoD ID number or Non-US Identify Code)
4	Attachment details	Give unit, base and location examinee is assigned-to if they are attached to the unit in which evaluation was conducted. **Note:** Section I, Block 6 lists the organization that the member is attached-to. (e.g., Attachment details: Member is attached to the 94 FW and assigned to the 3rd Surgical Technician Squadron (3 SGCS) at Hazelhurst Field.)
5	Pyramid Evaluation	When the required flight examiner is not available IAW **paragraph 4.5**, include the rank, name and office of the members who coordinated and approved the wavier, respectively. This satisfies the requirements of the pyramid evaluations. (Example: "Pyramid evaluation deviation was coordinated by Lt Col Jordans Mith, 432OG/OGV, and approved by MSgt Omar Joose, ACC/A3TV").
6	Cross-Command Evaluation	Document approved cross-command evaluations, see **paragraph 4.6**. At a minimum, include rank, name and office of the members involved and justification/purpose for cross-command evaluation.
From the Commander/Approving Official signing in Section VIII (Endorsement)		
7	Restriction(s)	Specify any restrictions assigned.
8	INSTM Restrictions	Specify any INSTM restrictions, see **paragraph 7.6.3**.
9	Additional Training Assigned	Specify assigned additional training following a Q2 based on FE recommendations in Section V (Evaluations) to include who will administer it (e.g. FE or instructor).
10	Additional Training	If more than one date or type of additional training is required,

	Timeline	the earliest date is listed in Section III (Special Conditions) and other due dates are listed here.
11	Decertification	Document if the assigned additional training requires decertification / recertification, see **paragraph 15.3.3**.
12	RQ syllabus and RQ evaluation requirements due to a Q3 evaluation (other than INIT and CDRA)	Specify requirements for RQ syllabus and RQ evaluation based on FE recommendations in Section V (Evaluations). Specify whether the entire evaluation must be re-accomplished or only specific requisites or areas.
13	(†) Q2 or Q3 from CDRA	Document/justify condition(s) and provide justification for a qualification level downgrade of Q2 or Q3 in lieu of decertifying the member for cause.
14	(†) Q2 from CDRA	Document/justify additional training necessary to address the condition(s) that resulted in the CDRA.
15	(†) Q3 from CDRA	Document/justify requirements of the RQ syllabus and minimum area(s) to be assessed in the RQ evaluation to address the condition(s) that resulted in the CDRA.
16	Loss of specific qualification.	Specify if there is a loss of a qualification listed in **Table 5.1**.
17	Downgraded to unqualified status (e.g. MP to UP)	If the individual is downgraded to an unqualified status, enter the crew position to which they will be requalified upon successful completion of either an RQ aircrew evaluation, EPE or Examination.
18	Resolution of Q2 & Additional Training	Document any non-standard information regarding the resolution of a Q2 and assigned additional training (e.g. extension of training dates initially assigned, see **paragraph 13.1.5**)
19	Initial Cadre Qualifications	Commander provides a brief description of the new qualification, and any training received. Reference Initial Cadre MFR when appropriate.
Note: (†) Items indicate those that require justification from the Commander/Approving Official, not just documentation.		

16.7. Section VII (Additional Training).

16.7.1. Block 18. **Instructor Remarks**. The instructor signing Section VII (Additional Training) will annotate the results of the assigned training. (e.g., Capt Smith has completed all academic and simulator additional training requirements within Q1 standards.). If additional space is needed for instructor remarks, use an additional AF Form 8, see **paragraph 16.1.2.3**.

16.7.2. Block 19 and Block 20. **Instructor Name and Grade**. Enter name of the instructor IAW **paragraph 15.1.6** and enter grade IAW **paragraph 16.1.2.5**. If more than one instructor was used to accomplish the additional training, the last instructor will complete this section.

16.7.3. Block 21. **Date Completed**. Enter the date the additional training was completed.

16.7.4. Block 22. **Instructor Signature**. The digital signature will lock information and remarks in Section VII (Additional Training) only, see **paragraph 16.8.1**.

16.8. Section VIII (Endorsement).

16.8.1. All signatures or endorsements should utilize a CAC digital certificate to the maximum extent possible. Units may use pen and ink signatures when digital signatures are not available or not practical.

16.8.2. **Flight Examiner.** The FE signing Section VIII (Endorsement) of the AF Form 8 is responsible for the content and accuracy of the AF Form 8. The FE should not sign Section VIII (Endorsement) until verifying all required items are documented complete, all information contained on the form is accurate and has assigned the overall qualification level in Section II (Evaluation Information) Block 8. The FE will sign the AF Form 8 prior to forwarding to the Commander/Approving Official.

16.8.3. **Reviewer.** Leave blank unless required per MAJCOM guidance.

16.8.4. **Commander/Approving Official.** See **Table 16.4** to determine the Commander/Approving Official responsible for signing the examinee's AF Form 8. The applicable Commander/Approving Official will review the AF Form 8 after the evaluation is complete or after additional training has been completed following a Q2. Evaluation results are final unless clearly erroneous or not in compliance with this instruction. The Commander/Approving Official indicates concurrence with the results of the evaluation, including any assigned additional training, by signing the AF Form 8. If the commander does

not concur with the evaluation results, they will provide written justification to the flight examiner outlining the reason(s) for non-concurrence (e.g., concerns with assigned qualification level or recommended additional training). If the issue cannot be resolved between the commander and examiner, it will be elevated to the next higher commander in the chain of command for adjudication. **(T-1)** Remarks on the AF Form 8 will not be modified without the concurrence of the individual who entered the original comments.

16.8.5. Block 23 and Block 24. **Name and Grade**. Enter the names IAW **paragraph 15.1.6** and enter grade IAW **paragraph 16.1.2.5**. For universal qualifications that only require an examination (or multiple examinations), any FE assigned to the attached OGV/WGV signs the AF Form 8 validating the results of the examination.

16.8.6. Block 25. **Organization**. Enter the unit/organization of the individual in the appropriate block. Entry of duty title and/or office symbol are not required.

16.8.7. Block 26 and Block 27. **Date and Signature**. Input the date the member is signing the form. Digitally sign the form in the appropriate block. If a digital signature is not possible, wet sign in the appropriate block. The signature of the Commander/Approving Official indicates concurrence with the results of the evaluation, any additional training assigned, or completion of additional training. If unable to digitally sign, then sign and date in the appropriate block with pen and ink (that is blue or black in color).

Table 16.4. AF Form 8 Commander/Approving Official Guidance.

If the examinee is…	Then the Commander/Approving Official is…
HHQ Examiner, WG/CC, NAF/CC	MAJCOM or NAF STAN/EVAL
WG/CV, WG/SE, OG/CC, Senior Staff Officers	WG/CC
SQ/CC (or Det), OGV/WGV Flight Examiners, NAF Examiner	OG/CC or WG/CC
SQ/DO, SQ Flight Examiner,	SQ/CC or equivalent
Other aircrew assigned and/or attached to Squadron	SQ/CC or equivalent
FTU Students	FTU SQ/CC
Note: If the examiner is the same as the approving official, the next higher commander will sign as the approving official.	

16.8.8. Block 28 and Block 29. **Examinee Name and Grade**. Enter the name of the examinee IAW **paragraph 15.1.6** and enter grade IAW **paragraph 16.1.2.5**.

16.8.9. Block 30 and Block 31. **Examinee Date and Signature**. Following the Commander/Approving Official's signature in Section VIII (Endorsement), the examinee will date and sign in Section VIII (Endorsement). See **paragraph 16.6** regarding examinee remarks and **paragraph 16.9** regarding indication of examinee's signature.

16.9. Examinee Signature/Remarks. Examinee may enter optional remarks in Section VI (Remarks) prior to signing, see **paragraph 16.6**. The examinee must be provided an opportunity to make any remarks in Section VI (Remarks) before the Commander/Approving Official digitally *signs* the AF Form 8 in Section VII (Endorsement). **(T-2)** Failure to do so would result in the Commander/Approving Official having to remove their digital signature from the document to facilitate the examinee's comments before re-signing the final AF Form 8. The examinee's signature acknowledges that they have been debriefed and understand the action(s) being taken, if any. The examinee's signature does not indicate their concurrence with the result of the evaluation.

16.10. Initial Cadre. Document the AF Form 8 IAW **Table 16.5** when the OTHER prefix is used for an Initial Cadre member who is listed on the MFR, see **paragraph 12.3.2**. Document the AF Form 8 IAW **Table 16.6** when electing to use a SPOT evaluation for an Initial Cadre, see **paragraph 12.3.5.1**. In either case, see **paragraph 12.3** and MAJCOM guidance for additional information.

Table 16.5. Initial Cadre AF Form 8 Documentation from MFR.

Section	Block	Initial Cadre Specific Guidance
0	All	Normally FORM 1 OF 1, see **paragraph 16.1.2.3**.
I	All	Document IAW **paragraph 16.1.3**. Block 3. Input the aircraft the member is being qualified into. Block 7. Input current qualification(s) in other aircraft as applicable.
II	8. Qualification Level	
	9. Evaluation Complete Date	Enter the effective date from the MAJCOM/A3 memorandum. The Evaluation Expires date is IAW MAJCOM guidance.
III	10. Prefix	Select OTHER from the dropdown box and enter "Initial Cadre" in the free text box.
IV	All	Document IAW **paragraph 16.4** and MAJCOM guidance
V	All	Leave blank because no evaluation has been completed (yet).
VI	Remarks	Commander/Approving Official provides a brief description of the new qualification, and any training received. Reference the MAJCOM/A3 MFR.
VII	Additional Training	Leave Blank
VIII	Flight Examiner	Leave blank.
	Reviewer	See MAJCOM guidance
	Commander / Approving Official.	Document IAW **paragraph 16.8** and MAJCOM guidance. OG/CC or WG/CC must be the Commander/Approving Official
	Examinee	Document IAW **paragraph 16.8**.

Table 16.6. Initial Cadre AF Form 8 Documentation Using a SPOT Evaluation.

Section	Block	Initial Cadre Specific Guidance
0	All	Normally FORM 1 OF 1, see **paragraph 16.1.2.3**.
I	FE	Document IAW **paragraph 16.1.3**. Block 3. Input the Aircraft the member is being qualified into.
II	8. Qualification Level	Document IAW this manual**.**
II	9. Dates	Document IAW **paragraph 16.2.2**.
III	Checkboxes	Document IAW this manual and MAJCOM guidance.
	10. Prefix	Select "OTHER" and enter "Initial Cadre" in the free text box.
IV	All	Document IAW **paragraph 16.4** and MAJCOM guidance
V	All	Document IAW **paragraph 16.5** and MAJCOM guidance. In block 14d (or as appropriate), input SPOT.
VI	Remarks	Commander/Approving Official provides a brief description of the new qualification, and any training received.
VII	Additional Training	Leave Blank.
VIII	All	Document IAW **paragraph 16.8** and MAJCOM guidance. OG/CC or WG/CC must be the Commander/Approving Official

16.11. Documentation and Reconciliation of a Q2. Reference **paragraph 5.5.2** for additional guidance for a Q2 and **paragraph 16.1.2.3** regrading documentation of an AF Form 8 continued (e.g., "FORM 1 OF X," "FORM 2 OF X,"). When a Q2 is assigned, required additional training is annotated in Section III (Special Conditions). This becomes the first AF Form 8 in the series. Normally only two forms would be required and the AF Form 8 that resulted in the Q2 is FORM 1 OF 2; however, it is possible that more than two forms would be required (e.g., multiple flights with multiple instructors end up being needed to complete the additional training). See **Figure 16.2** and complete the additional AF Form 8 IAW the following.

16.11.1. Complete Section I (Examinee Identification), see **paragraph 16.1.3**.

16.11.2. Complete Section VII (Additional Training). Document results of the additional training on an additional AF Form 8 (normally FORM 2 OF 2). The instructor who completed the additional training will complete and sign this section.

16.11.3. Complete Section II (Evaluation Information). An FE will assign a qualification level (Q1, Q2 or Q3) in Block 8 based on the recommendation of the instructor who completed the additional training and any other pertinent information. The FE who completed the evaluation that resulted in the Q2 should accomplish this whenever practical. In Block 9, use the dates from the evaluation that resulted in additional training being assigned.

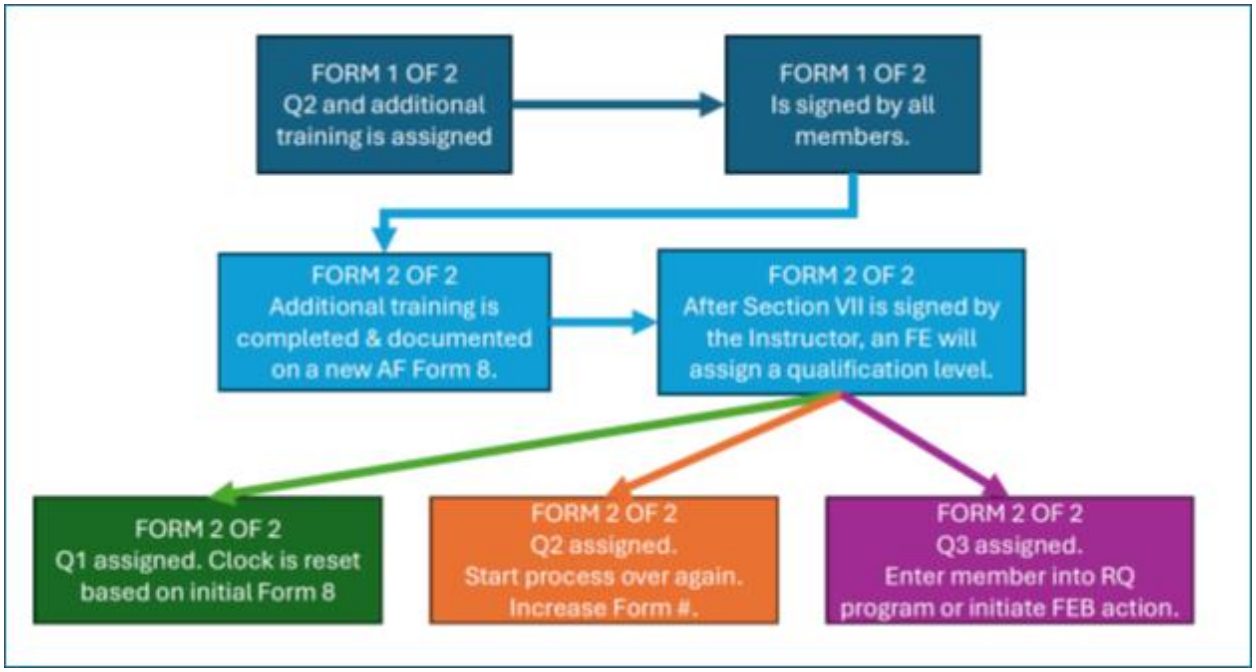

16.11.4. Complete Section III (Special Conditions) only if restrictions remain and/or if the additional training resulted in another Q2. Annotate the form numbers as required per **paragraph 16.1.2.3**.

16.11.5. Leave Section IV (Evaluation Requisites) blank unless needed. Leave Section V (Evaluations) blank.

16.11.6. Complete Section VI (Remarks) if necessary, see **paragraph 16.7** and **paragraph 16.9**.

16.11.7. Complete Section VIII (Endorsement), see **paragraph 16.8**. Annotate the form numbers as required per **paragraph 16.1.2.3**.

Figure 16.2. Flow Chart - General Documentation and Reconciliation of a Q2.

16.12. Documentation of Evaluations on Separate AF Forms 8. The following situations require the use of separate AF Forms 8 for documentation; this is not an all-inclusive list. Each form will be annotated as "FORM 1 OF 1" unless otherwise required, see **paragraph 16.1.2.3**.

16.12.1. Varied qualification levels for combination evaluations (e.g., Q1 for the QUAL but Q2 for the INSTM, or Q1 for INSTM/QUAL but Q2 for INSTR).

16.12.2. Failure of a single evaluation during a combination evaluation (e.g., Q1 for the QUAL but Q3 for the INSTM, or Q1 for INSTM/QUAL but Q3 for INSTR). See **paragraph 13.4** for evaluations other than INIT. See **paragraph 13.5** for INIT evaluations.

16.12.3. Combination evaluations that were finished in different months which would result in two different 24-calendar month expiration dates, see **paragraph 5.1.3** and **paragraph 16.2.2**.

16.12.4. Completion of a MAJCOM-approved instructor qualification evaluation course, see **paragraph 9.4**, that was not accomplished in the same month as another periodic evaluation.

16.12.5. Aircrew with multiple qualifications, see **paragraph 12.1**, will use a separate AF Form 8 for the qualification in each aircraft/weapons system. For example, aircrew member qualified in the C-130 and the C-12 would have an AF Form 8 for each aircraft. **Note:** Unless

restricted by the MAJCOM, a INSTM qualification evaluation would only need to be maintained in one aircraft as it is "transferrable" to the other aircraft, see **paragraph 7.1**.

16.12.6. Additional instances as determined by OGV/WGV Chief of STAN/EVAL when not specifically addressed in this manual or MAJCOM supplement.

16.13. Documentation of Requalification (RQ) Evaluations.

16.13.1. Document the results of the RQ evaluation on a separate AF Form 8 IAW **Table 16.7**.

16.13.2. Leave Section IV (Evaluation Requisites) blank unless one of the following situations apply. Document requisites accomplished as part of the RQ evaluation IAW **paragraph 16.4**.

16.13.2.1. Requisite(s) needed to be re-accomplished because aircrew member failed to meet standards during the evaluation that resulted in the Q3 being administered.

16.13.2.2. Requisite(s) needed to be accomplished as part of the RQ evaluation because it was *not* completed prior to the Q3 being administered.

16.13.2.3. Commander directs the re-accomplishment of requisites otherwise passed prior to the Q3 being administered.

16.13.2.4. Requisites need to be accomplished for an applicable RQ evaluation from **Table 5.2**.

16.13.3. Complete Section V (Evaluations) only when the RQ evaluation includes an event that is normally documented in this section, see **paragraph 16.5**; otherwise, leave blank.

Table 16.7. RQ Evaluation AF Form 8 Documentation Summary.

Section	Block	RQ Specific Guidance
0	All	Normally Form 1 of 1, see **paragraph 16.1.2.3**.
I	All	Standard, see **paragraph 16.1.3**.
II	8. Qualification level	Standard, see **paragraph 16.2**.
II	9. Dates Evaluation Complete	Input the date of the successful RQ evaluation for "EVALUATION COMPLETE" date in Block 9. If RQ was required due to failed requisites, then input the latest date of successful requisite re-accomplishment as annotated in Section IV (Evaluation Requisites) Block 12. If something other than failed requisite was accomplished as part of the RQ evaluations (e.g. flight in the aircraft or ATD, EPE per MAJCOM-approved alternate method), then input the date of successful event completion as annotated in Section V (Evaluations).
	9. Dates Evaluation Expires	For a full RQ that will require a (future) periodic evaluation, input date IAW **paragraph 16.2.2.2**.
	9. Dates 24-Month Expiration.	For a RQ that will require a (future) periodic evaluation, input date IAW **paragraph 16.2.2.3**.
III	Checkboxes	Check boxes as appropriate IAW **paragraph 16.3**.
	10. Prefix	Select "RQ" from the drop-down menu.
IV	All	Complete with updated requisite information, if applicable, otherwise leave blank. See **paragraph 16.13.1**.
V	14a – 14c	Complete IAW **paragraph 16.5** if applicable, otherwise leave blank. See **paragraph 16.13.1**.
	14d	Document appropriate qualification being reestablished (QUAL, INSTM, INSTR, MSN) IAW **paragraph 16.5** as required, otherwise leave blank. See **paragraph 16.13.1**.
	14e	Complete IAW **paragraph 16.5** if applicable, otherwise leave blank. See **paragraph 16.13.1**.
	14f – 14h	Complete IAW **paragraph 16.5** if applicable, otherwise leave blank. See **paragraph 16.13.1**.
VI	All	Complete IAW **paragraph 16.6**.

VII	N/A	Leave blank. Not used when documenting completion of a RQ evaluation.
VIII	All	Complete IAW **paragraph 16.8** and **paragraph 16.9**.

Chapter 17

FLIGHT EVALUATION FOLDER (FEF)

17.1. AF Form 942, *Record of Evaluation*. The AF Form 942 is an index providing pertinent information extracted from all the AF Forms 8 accomplished by the crewmember. See example at **Attachment 5**. Use the general data entry rules from **Table 17.1**.

Table 17.1. General Data Entry Rules for AF Form 942.

No.	Topic	Description
1	Capitalization	Except where specifically noted otherwise (e.g., Type of Evaluation: INSTR), use upper- and lower-case letters.
2	Formatting	Requirements for font, indentation, and justification (right, left or centered) of data are not specified. MAJCOM supplements may direct specific format standards as desired.
3	One-line entry	A one-line entry is normally used for all aircrew evaluations, including combined evaluations that result in the same qualification level. If space required exceeds space available, additional lines may be used for the same entry. Complete all blocks for each line used.
4	Multiple Q-levels	For combined aircrew evaluations in which different qualification levels are assigned for any of the evaluation types, a single line entry will be made for each different qualification level assigned indicating which portions of the combined evaluation received that qualification level. If space required exceeds space available, additional lines may be used for the same entry. Complete all blocks for each line used.
5	Form usage	Use one AF Form 942 until it is filled in. If closing out handwritten, hard-copy AF Forms 942, "Z" out any blocks that are unused or no-longer needed. Units are not required to "Z" unused blocks on the electronic AF Forms 942.

17.1.1. Aircraft/Crew Position. Enter aircraft type and crew position as it appears in the Aircraft/Crew Position area under Examinee Identification of the subject AF Form 8.

17.1.2. Type of Evaluation. Enter type of evaluation or combined evaluation as it appears on the AF Form 8. If different qualification levels were awarded to different types of a combined evaluation, list these individual types as separate entries.

17.1.3. Date Completed. Enter date from the Date Completed block of the subject AF Form 8.

17.1.4. Qualification Level. Enter the appropriate qualification level as it appears on the referenced AF Form 8.

17.1.5. MAJCOM Change. A one-line, undated entry containing MAJCOM title will be made for each change in the individual's MAJCOM for record based on a PCS/Permanent Change

of Assignment (PCA). Do not annotate a change of MAJCOM if the individual received an aircrew evaluation from a FE from a different MAJCOM, such as an approved cross-command evaluation situation, or when the individual is enrolled in a formal training program.

17.1.6. Computer Generated AF Form 942. A computer-generated AF Form 942 may be used as long as cumulative entries are retained. Electronic copies of the AF Form 942 will be forwarded with the FEF when the individual moves to a new squadron.

17.2. Flight Evaluation Folders (FEF). The FEF contains the source documents that constitute the history of all qualifications for an individual aircrew member over a career.

17.3. Maintenance of FEF.

17.3.1. Each crewmember who is on flying status must have a FEF that includes all AF Forms 8, AF Forms 942, AF Forms 80 (if applicable), and any additional MAJCOM and/or unit specified STAN/EVAL items.

17.3.2. Multiple qualified aircrews will have their FEFs maintained at one of the units the individual is assigned/attached for flying, but the other unit(s) with which the individual is assigned/attached to fly other MDS(s) will maintain a placeholder FEF which contains only a memorandum recording the location of the multiple qualified-individual's actual FEF. **(T-3)**

17.3.3. FEFs belonging to HHQ personnel on active flying status will be maintained by the STAN/EVAL function of their attached flying unit. **(T-3)**

17.3.4. For personnel on inactive flying status, the FEF will be maintained with their Flight Records Folder or IAW MAJCOM guidance. **(T-3)**

17.3.5. MAJCOMs determine method for archiving or otherwise maintaining FEFs for aircrew assigned or attached to other than USAF units for future use when the member returns to active USAF flying status. Member will be provided with a hard copy of their entire FEF prior to an assignment with a non-USAF unit.

17.3.6. FEFs of separated or retired members, and digital versions of historical records, are maintained IAW the Air Force Records Disposition Schedule.

17.4. Electronic FEF.

17.4.1. Electronic FEF systems must be able to produce hard copies of FEF products, when needed, consistent with the guidance in this AFMAN. Additionally, the electronic FEF must be transferable by either digital media or via a digital database between USAF units and other MAJCOMs.

17.4.2. STAN/EVAL Offices must employ a method to back up Electronic FEFs. **(T-1)** Examples include, but are not limited to, stand-alone electronic systems, separate servers, or paper copies and should be specified in unit supplements to this AFMAN.

17.4.3. Once an aircrew member's hard copy FEF is fully incorporated into the electronic FEF system, the hard copy historical information may be returned to the Aircrew Member or be used at unit discretion.

17.5. Contents of FEF. Divide the FEF into two sections:

17.5.1. **Section I (left side of paper copy).** Table 17.2 lists the required documents and placement instructions for Section I. Section I may contain two sub-sections.

Table 17.2. FEF Section I Contents.

Document	Placement Guidance
AF Forms 942	AF Forms 942 are placed on top in chronological order with the most recent on top.
FEF Review and Discrepancy Log	The FEF Review and Discrepancy Log is placed under the AF Forms 942.
AF Forms 4348 (if applicable for anything other than decertification for cause)	File all AF Forms 4348 below the FEF Review and Discrepancy Log. If the MAJCOM directs AF Forms 4348 to be filed outside the FEF, place a copy of that MAJCOM guidance in the FEF below any AF Forms 4348 documenting decertification for cause.
AF Forms 4348 (if applicable for decertification for cause)	If a member has an AF Form 4348 documenting decertification for cause, this must be maintained in the member's FEF on top of all other AF Forms 4348 or MAJCOM guidance memo on where other AF Forms 4348 are maintained.
MAJCOM/unit-directed items	Any additional STAN/EVAL information as directed by MAJCOM and/or unit supplement should be placed under the AF Form 942.
DD Form 2992 (if applicable)	If the FEF is not maintained at the same base with the individual's flight records folder, a copy of the most recent DD Form 2992, Medical Recommendation for Flying or Special Operational Duty, may be filed in this section behind any MAJCOM and/or unit directed items.

17.5.2. **Section II (right side of paper copy).** This section contains AF Forms 8 and any related memorandum for the record for all evaluations listed on the AF Form 942.

17.5.2.1. AF Forms 8. File AF Forms 8 in chronological order with the most recent on top. Individuals who maintain aircrew qualification in two or more aircraft/weapons systems or two or more crew positions in the same aircraft/weapon system, will file AF Forms 8 in chronological order without consideration of aircraft/weapon system or crew position. **(T-3)**

17.5.2.2. MFR documenting waivers, extensions, and/or unusual circumstances to potentially be included in an AF Form 8 are filed on top of, or adjacent to the affected AF Form 8.

17.5.2.2.1. If the MFR addresses an AF Form 8 that has not already been completed, incorporate the information contained in the memorandum onto the applicable AF Form 8 under Examiner Remarks when action is complete and remove the MFR.

17.5.2.2.2. If the MFR addresses an AF Form 8 that has already been completed, incorporate the information contained in the memorandum onto the next applicable AF Form 8 under Examiner Remarks when action is complete, and remove the MFR.

17.5.2.2.3. If the MFR addresses a major discrepancy or unusual circumstance not addressed or corrected by a later AF Form 8, and it does not affect any of the current aircrew qualifications, remove the MFR and add a summary of the MFR that describes the original discrepancy in the FEF Review and Discrepancy Log.

17.6. Hard-Copy Folders.

17.6.1. Folders must be letter size, able to separate contents into two sections and constructed of heavy stock (recommend press board folder or equivalent).

17.6.2. Standard 2 ¾-inch metal fasteners may be used.

17.6.3. Affix a label bearing the individual's name and DoD ID number or Non-US Identity Code to the inside back cover so that the folder may be identified when filed. Include additional information on the label if required by MAJCOM and/or unit supplement.

17.6.4. Folders must bear the "Controlled Unclassified Information" and Privacy Act statement label/stamp on both sides of the FEF.

17.7. Review of FEF.

17.7.1. **Initial FEF Review.** The flying unit will review the FEF for all newly assigned crewmembers to verify their aircrew qualification(s) (and certification(s) as appropriate) prior to their first flight. Document accomplishment with an "Initial Review" entry and date entry on the AF Form 942.

17.7.1.1. The gaining organization documents any major FEF and form(s) discrepancies from evaluations performed in previous organizations not already annotated in the discrepancy log. Following the initial review, the gaining unit is responsible only for documentation subsequently placed in the FEF.

17.7.1.2. If the FEF of HHQ personnel on active flying status is maintained by the STAN/EVAL function at the unit/squadron to which they are attached to fly, the STAN/EVAL function of that unit/squadron will also review the FEF prior to their first flight. **(T-3)**

17.7.2. **Posting Review.** The STAN/EVAL function will review each AF Form 8 when they are placed in the FEF to ensure accuracy and completeness. The AF Form 8 review will confirm the aircrew evaluation and aircrew qualification is documented correctly. Validate the items in **Table 17.3**. Units will maintain a discrepancy log IAW MAJCOM guidance.

Table 17.3. Posting Review Items.

No.	Review Requirement
1	All requirements were accomplished within the appropriate time period.
2	All requisites were accomplished (prior to the flight portion if required by the MAJCOM).
3	Qualification level is appropriately assigned.
4	Evaluation dates are documented IAW **Chapter 16**.
5	Proper evaluation type is annotated, as applicable.
6	Requisites and grades are reflected correctly.

7	Evaluation flight information is properly annotated.
8	Mandatory comments and Section VIII (Endorsement) are complete, as required.
9	Required additional training assigned or completed is properly annotated. For completion, verify comments reflect completion and appropriate signatures are complete.
10	Verify that all requisite signatures and initials are correct.

17.7.3. **Annual Review.**

17.7.3.1. The STAN/EVAL function reviews all applicable FEF to confirm aircrew qualification expiration dates used to track required aircrew evaluations are the same as those listed in the FEFs. Annual review of FEFs for personnel in inactive status is not required.

17.7.3.2. FEF reviews will be completed once per calendar year.

17.7.3.3. Document accomplishment with an "Annual Review" and date entry on the AF Form 942. The initial review entry suffices for the annual review requirement.

17.7.3.4. Historical information contained (AF Forms 8, AF Forms 942, and related qualification documents) in the FEF and related previous aircraft/weapon system(s) should be retained.

17.8. FEF Discrepancies.

17.8.1. Major discrepancies are discrepancies that affect the current qualification of the crewmember.

17.8.1.1. Major discrepancies are documented on a memorandum for the record and signed by the OGV/WGV or higher, filed in Section I or II immediately above or adjacent to the affected AF Forms 8.

17.8.1.2. Memoranda for record documenting similar major discrepancies found on multiple AF Forms 8 are filed on top of the latest affected AF Form 8.

17.8.2. Minor discrepancies are discrepancies that do not affect the aircrew qualification of the crewmember but affect the overall clarity of a current or previous AF Form 8. If a minor discrepancy cannot be corrected on the AF Form 8, they are documented on the FEF Review and Discrepancy Log. Typos, formatting, and misspellings that do not affect the overall clarity of the document are not considered minor discrepancies.

17.8.2.1. Units will maintain a log of minor discrepancies. **(T-2)**

17.8.2.2. The log will include the following as a minimum: specific document and section affected, date error discovered, description of discrepancy, corrected data, AFI/AFMAN reference for the discrepancy/correction, and reviewer identification data. **(T-2)**

17.9. Corrections to Discrepancies.

17.9.1. AF Form 8. As a source document, the AF Form 8 may be corrected by pen and ink alteration of the original document provided the flight examiner signing the corrected section of the form initials the correction. Every effort will be made to have the correction initialed by the original examiner. If the original flight examiner is not available, then document the discrepancy with statement "Examiner unavailable due to (separation, retirement, etc.)."

17.9.2. AF Form 942. As a non-source document, AF Forms 942 may be altered without restriction to reflect the member's assignment and the contents of the FEF.

17.9.3. Electronic Corrections. If the system used to store the record does not allow corrections to be made, document the discrepancy IAW **paragraph 17.5.2.2**.

17.10. Transfer of FEF.

17.10.1. STAN/EVAL offices are responsible for transferring and validating receipt of FEFs to a member's next unit following a PCS. Transfer of records may also be required following a PCA or similar change to a member's flying unit.

17.10.2. When forwarding an FEF or any of its contents, retain a copy (paper or electronic) for 90 days following confirmation of receipt by the gaining organization. Unit STAN/EVAL offices will document confirmation and completion of records transfer. **(T-2)**

17.10.3. Compatible electronic FEF software. If the gaining unit has a compatible electronic FEF software, the losing organization is responsible for coordinating the transfer of the FEF to the gaining unit once the individual leaves the organization. The losing organization will confirm receipt of all records by the gaining organization.

17.10.4. Incompatible electronic FEF software in use as of the date of this publication (e.g. GTIMS, PEX). If the gaining unit does not have a compatible electronic software, the losing organization provides the member either with an electronic copy (such as a .pdf file) or a hard-copy FEF. Both may be provided if desired. If a hard copy is provided, the crewmember will hand-carry a copy of their FEF to their gaining organization. The losing STAN/EVAL office will additionally forward either an electronic copy of the FEF via secure means or mail the paper FEF to the gaining unit via official mail. The losing organization will confirm receipt of all records by the gaining organization. **Note:** This paragraph is not applicable for future STAN/EVAL software systems.

17.10.5. The gaining unit is responsible for the accuracy of the FEF after the initial FEF review, see **paragraph 17.7**.

17.11. Disposition of FEF.

17.11.1. Dispose of the FEF according to the Air Force Records Disposition Schedule and Air Force guidance concerning the protection of Personally Identifiable Information.

17.11.2. Outdated certification documents, Aviation Resource Management System (ARMS) products and/or ARTEMIS products, medical recommendations and miscellaneous documentation identified during reviews will be returned to the aircrew member for disposal.

Chapter 18

FLIGHT CREW INFORMATION FILE (FCIF)

18.1. General. Units will establish and maintain a FCIF consisting of a current read file and publications library. The FCIF will consist of the items listed in **Table 18.1** and will be managed IAW DAFMAN 90-161, AFI 11-215, and TO 00-5-1 in either hardcopy or electronic format. **(T-1)** The FCIF is organized into volumes as shown in **Table 18.1** and **Table 18.2** or as MAJCOM directed for electronic libraries. If a unit establishes an electronic FCIF, the location will be readily accessible and easily navigable by all aircrew. **(T-2)**

18.1.1. Unit FCIF library custodians will ensure all parts of the FCIF are maintained and all information is current and accessible for concurrent viewing by multiple crewmembers. **(T-3)** This includes locally developed publications and procedures such as local Inflight Guides.

18.1.2. At a minimum, unit FCIF library custodians will maintain the required index and location of electronic files in a location easily accessible to all unit aircrew. **(T-3)**

18.1.3. Documents in the FCIF will be made available for deployments via either electronic or hardcopy means. **(T-1)** MAJCOMs will determine the applicability of FCIFs Volume I, Read Files to deployed or off-station aircrews (i.e. whether a deployed aircrew must immediately comply with newly issued read files, or whether a read file becomes effective upon the crew's return to home station). **(T-2)**

18.1.4. Use the AF Form 50, see **paragraph 18.6**, to generate FCIF read file messages in which pertinent information is published to units.

18.2. Required Volumes. If units choose hardcopy format and the contents of any volume exceed the capacity of its binder, use an additional binder and identify the first and subsequent binders by a letter of sequence (e.g., IIIA, IIIB). **(T-2)** Label binders on the spine indicating Volume and Title IAW **Table 18.1**. **(T-2)**

Table 18.1. Required Volumes.

VOLUME No.	TITLE
VOLUME I	Table of Contents/Current Read File
VOLUME II (1)	Publications—Air Force Directives MAJCOM Supplements
VOLUME III	Publications—MAJCOM/NAF/Local Directives
VOLUME IV	Flight Manuals/Checklists/Aircrew Aids/Technical Orders
VOLUME V (Optional)	Flight Safety Information
Note: See **Table 18.2** for list of mandatory publications.	

Table 18.2. Volume II Mandatory Publications.

PUBLICATION	TITLE
AFMAN 11-202 V1	*Aircrew Training*
AFMAN 11-2MDS V1	*Aircrew Training*
AFMAN 11-202 V2	*Aircrew Standardization Evaluation Program*
AFMAN 11-2MDS V2	*Aircrew Evaluation Criteria*
AFMAN 11-202 V3	*Flight Operations*
AFMAN 11-2MDS V3	*Aircrew Operational Procedures*
DAFMAN 11-401	*Aviation Management*

18.3. Volume I (Current Read File). Consists of a minimum of two parts to include an Index (Part A) and Current Read Files (Parts B and C (Part C is optional)). MAJCOMs may add additional components to Volume I as appropriate.

18.3.1. Part A is an index listing all material contained in FCIF Volumes I through V. MAJCOMs develop procedures for announcing changes to FCIF Part A Publications, TOs, and any other publications to their unit personnel. MAJCOMs may issue a Part A FCIF Publications Notice on an AF Form 50 announcing the publication of a new version of a TO or permanent publication.

18.3.2. Part B is the Current Read File of FCIF read file messages.

18.3.2.1. FCIF messages contain information that is temporary in nature, directly pertinent to the safe conduct of flight, and must be read before flight. **(T-2)**

18.3.2.1.1. FCIF Read File messages may be issued/rescinded from the MAJCOM, NAF or unit level. Only the office that originally issued the FCIF may rescind it.

18.3.2.1.2. FCIF Read File are not to be used for permanent guidance, or for non-flying related information.

18.3.2.1.3. FCIF Read File messages will be issued with an expiration date no later than 1 year from the date of issue. If present on the AF Form 50, do not check the box "POST UNTIL FUTHER NOTICE." Prior to the expiration of an FCIF Read File message, the issuing authority will determine its disposition. FCIF Read File messages that are no longer relevant or that have been incorporated into permanent TO or policy guidance will be rescinded. FCIF Read File messages that remain relevant but unincorporated into permanent TO or policy guidance prior to the expiration date, require a re-issued FCIF Read File message with a new expiration date. **(T-2)** FCIF Read File message-issuing authorities must carefully consider all TO and publications change options, including TO Rapid Action Changes in coordination with the SPO and FMM, publications Guidance Memorandums (GM), publications supplements, or local unique commander's policy documentation which might improve the effectiveness in meeting the intent of the Read File message.

18.3.2.1.4. FCIF Read File message-issuing authorities should, upon release of a Read File message, concurrently determine appropriate avenues to permanently incorporate the message data into TO or other guidance.

18.3.2.1.5. FCIF Read File messages that expire without a disposition determination IAW **paragraph 18.3.2.1.3** will be rescinded and, if still necessary, re-issued. **(T-2)**

18.3.2.2. Lead MAJCOMs will coordinate FCIF Read File messages which affect aircraft/weapons system operations with user MAJCOM STAN/EVAL office prior to release, or alternatively, lead MAJCOMs will notify user MAJCOM STAN/EVAL office of any aircraft/weapons system FCIF Read File messages and allow the user MAJCOM to determine applicability prior to user MAJCOM release of the information. **(T-1)** In no case may a lead MAJCOM issue an FCIF to another MAJCOM unit without coordination. **(T-2)** The FCIF Read File message process is not an appropriate communication tool for a lead MAJCOM to execute Aircraft Grounding notification(s) as described in DAFMAN 11-401, in lieu of Operations Reporting (OPREP) IAW AFMAN 10-206, *Operational Reporting*.

18.3.2.3. FCIF messages that contain aircraft/weapons system/MDS data will be controlled IAW the applicable distribution statement in the governing TO. **(T-1)**

18.3.3. Part C is the Current Read File that contains information that is temporary in nature but not related to the safe conduct of flight and not required to be read before flight. Part C FCIF Read File messages are not to be used for permanent guidance, non-flying related information, or announcing the publishing and release of a new version of a TO or permanent publications.

18.4. Volumes II through IV (Publications Library). These Volumes consist of an FCIF Functional Publications Library. MAJCOMS will establish processes and procedures for OGV/WGV FCIF library custodians to maintain unit FCIF libraries IAW the Functional Publications Requirements listed in DAFMAN 90-161, *Publishing Processes and Procedures*. Mandatory publications for Volume II are listed in **Table 18.2**.

18.4.1. All publications in the library will be current and complete. **(T-1)** MAJCOMs may authorize units to withhold posting of publication library information that does not apply based on aircraft configuration or units' missions.

18.4.2. Units establish and maintain a table of contents for the publication library containing, as a minimum, a listing of basic publications numbers and short titles. **(T-2)** Publication dates, supplements and changes are not required.

18.4.3. MAJCOMS may waive Volumes II-V requirements for special training units as defined by the MAJCOM (e.g., Red Flag).

18.4.4. Publications that are maintained and available through the USAF e-publishing website, may be referenced by a link in lieu of maintaining a copy of the publication on a unit SharePoint®.

18.4.5. Volume V (optional): Flight safety information.

18.5. Flight Related Special Interest Item (SII). Flight-Related SIIs are items of emphasis relating to existing procedure(s) designed to mitigate or eliminate specific risks or trends.

18.5.1. Flight-Related SIIs are generated on AF Forms 50, see **paragraph 18.6**. **(T-2)**

18.5.1.1. SIIs do not add to or amend established procedure; see guidance on issuing FCIF messages in **paragraph 18.3.2.1.3**.

18.5.1.2. SIIs are based on analysis of risks and trends from a variety of sources to include Safety Investigation Board findings/recommendations, safety related incidents, safety or maintenance or flight evaluation trend analysis, deployed area operations specifics, geo-strategic considerations, environmental factors and potential problems with equipment/procedures.

18.5.2. SII(s) are issued through the same process used to release other FCIF read file messages with the elements listed in **Table 18.3**.

Table 18.3. Required Elements for Special Interest Items (SII).

No.	Element Topic	Description
1	Specific aircraft/weapons system applicability	Identify the aircraft, weapons system, or crew position(s) to which the SII applies.
2	Applicable dates	State when the SII becomes effective and rescind date.
3	References	Include supporting directives, safety reports, or related documentation.
4	Risk factors and trend details	Summarize the risks or trends that triggered the SII, including analysis sources such as SIBs, trend reports, or operational data.
5	Specific emphasis actions	List the mitigation or corrective actions required to reduce or eliminate the identified risk or trend.
6	Subject Matter Expert/POC for further information	Provide contact information for the subject matter expert or point of contact responsible for the SII content.

18.5.3. SII(s) will be of limited duration (generally not to exceed 90 days). **(T-1)**

18.5.4. SII(s) may be issued/rescinded from the HAF, MAJCOM, NAF or unit level. If issued from agencies outside the MAJCOMs (e.g., HAF, HQ AFFSA, but not subordinate NAFs or units), the lead MAJCOM STAN/EVAL function will coordinate the intent and verbiage of the SII with other MAJCOM STAN/EVAL functions to determine the level of applicability within the individual MAJCOMs prior to release.

18.5.5. Units will place SIIs into the FCIF, Current Read File, Part B, for dissemination to aircrew. **(T-2)**

18.5.6. All current aircraft/weapons system-Specific and Cockpit/Crew Resource Management/Operational Risk Management related SII(s) will be briefed during flight briefings for the duration of the SII(s). Mission-specific SII(s) need only be briefed on those missions for which the SII is relevant. **(T-1)**

18.6. AF Form 50, *Flight Crew Information File*.

18.6.1. The AF Form 50 will be used to generate FCIF or SII messages in which pertinent information is published to units. MAJCOMs may tailor the AF Form 50 to reflect aircraft/weapons system information as necessary.

18.6.2. MAJCOMs will establish guidance for issuing messages to subordinate units.

Chapter 19

ADDITIONAL STAN/EVAL PROGRAMS

19.1. Go/No-Go Procedures. Units will establish a positive control system that ensures aircrew members are current, qualified, and UP for flight. **(T-1)** As a minimum, the Go/No-Go system will monitor:

19.1.1. Qualifications and certifications using AF Form 8, AF Form 4348 and/or AF Form 4324. **(T-1)** Identify restrictions for a member with a Q2 qualification level. **(T-1)**

19.1.2. ARTEMIS products and/or letter of Xs, as appropriate. **(T-1)**

19.1.3. Currency on all FCIF (Volume 1, Part B) messages. **(T-1)**

19.1.4. Up/Down status (as it relates to flying duties determined by a medical authority). **(T-1)**

19.1.5. Ground and flight currency items required for flight in accordance with AFMAN 11-202 V1, AFMAN 11-2MDS V1, MAJCOM guidance (see **paragraph 1.5.2**), and AFMAN 11-421, *Aviation Resource Management*. **(T-1)**

19.2. Supplementary Evaluations.

19.2.1. Purpose. Supplementary evaluations are optional administrative tools used by a commander to ensure standardization of operations and to identify and/or evaluate implemented solutions to unit problems, such as negative evaluation trends. The form and content of a supplementary evaluation is at the discretion of the commander.

19.2.2. Supplementary evaluations may be administered in conjunction with aircrew evaluations (which are fully documented on AF Forms 8 for the individual aircrew). Alternatively, supplementary evaluations may not include any aircrew evaluations that will affect the qualification level for any individual aircrew, and which will not be documented on an AF Form 8.

19.2.3. The commander directing the supplementary evaluation determines the areas to be evaluated. The STAN/EVAL function directly under the commander will determine the method of evaluation and is responsible for administrative management of data collection. Once complete, the STAN/EVAL function reports results to the commander. **(T-3)**

19.2.4. Commanders may appoint anyone to conduct supplementary evaluations and may request supplementary evaluation assistance from other units or higher echelon STAN/EVAL offices.

19.2.5. The supplementary evaluation informs but does not replace the unit self-assessment or commander's inspection program requirements IAW DAFI 90-302.

19.3. Standardization/Evaluation Boards (SEB). The SEB provides a recurring forum to review standardization and evaluation issues, analyze aircrew performance trends, monitor the effectiveness of corrective actions, and ensure compliance with governing directives. The SEB also validates the administration of the unit's STAN/EVAL program, to include FCIF management, software tools, and flight evaluation documentation. The SEB will accomplish the actions in **Table 19.1**. **(T-3)**

Table 19.1. Required SEB Actions.

No.	Required Action
1	Review all completed flight evaluations since the last SEB.
2	Analyze and document trends in evaluation discrepancies.
3	Recommend corrective actions, assign Offices of Primary Responsibility (OPR), and establish methods to verify closure.
4	Review the status of trend programs, including Military Flight Operations Quality Assurance (MFOQA) data, if applicable.
5	Validate the administration of supplementary evaluations, including rationale, scope, and results.
6	Document the status of STAN/EVAL review programs such as FCIF audits, publications currency, and software compliance.
7	Record the status of Air Traffic Control (ATC) review programs, when applicable. Refer to FAA JO 7610.14 for additional requirements.

19.3.1. Units will convene an SEB at least semi-annually. The OG/CC or equivalent chairs the board. Attendees will include, at a minimum, squadron commanders, unit examiners, the Chief of OGV/WGV, and other applicable representatives. MAJCOM or unit supplements may define additional attendees or frequency requirements.

19.3.2. Units will record SEB minutes using the *format* (not content) in **Attachment 2**. **(T-3)** Minutes must include a summary of discussions, trend analyses, corrective actions, and the status of assigned tasks. **(T-3)** Units will submit SEB minutes IAW **Chapter 3**.

19.3.3. Results of supplementary evaluations conducted IAW **paragraph 19.2.3** will be documented in SEB minutes. **(T-3)** These evaluations do not affect aircrew qualification levels but are used to assess trends, validate procedures, or monitor corrective actions.

19.4. Trend Program. The STAN/EVAL trend program identifies recurring evaluation discrepancies (from the flight evaluation itself and all associated requisites) that may indicate a degradation in aircrew standardization, procedural compliance, or systems understanding. The program supports commanders in maintaining readiness and reinforcing standards. It is not intended to replace or duplicate the functions of training or safety programs. Trend inputs may be included but are not limited to those listed in **Table 19.2**. **Note:** There is no minimum datapoint threshold to identify a trend.

Table 19.2. STAN/EVAL Trend Inputs.

Input Source	Description
Flight Evaluations	Includes Q-/U subarea ratings, CDRA, and examiner narrative comments.
MFOQA Data	Applicable and releasable Military Flight Operations Quality Assurance data. Use only if safety privilege can be preserved IAW governing directives.
Standardization Board Findings	Observations or recommendations identified during unit standardization boards.

Training Reports	Syllabus trends, after action reports from exercises, currency trends.
Other Unit-Level Reports	Any other local tracking mechanism or discrepancy reporting tool related to evaluations.

19.4.1. Trend analysis must remain within the scope of the STAN/EVAL function. It will not include mishap investigation data, safety-privileged information, or individual training performance records that are not directly linked to evaluations. STAN/EVAL personnel will coordinate with training and safety organizations to report combined trend information from STAN/EVAL, training, and safety on the SEB minutes to include lessons learned.

19.4.2. For units with multiple aircraft/weapons systems or aircrew positions, combine discrepancies common to all systems or positions to determine unit-wide trends (e.g., instrument procedures, checklist usage). Maintain separation of platform-specific data when appropriate.

19.4.3. FTUs and Combat Crew Training Squadrons will maintain separate trend data for students and instructors to enable analysis of instructional quality and student performance.

19.4.4. When a trend is identified, OGV/WGV will take the actions outlined in **Table 19.3**.

19.4.5. STAN/EVAL offices will maintain trend documentation and review it (at a minimum) during the SEB. Commanders and STAN/EVAL Chiefs will close trends only when sufficient objective evidence confirms the issue is resolved and standardization is restored.

Table 19.3. Actions for Trend Management.

No.	Action
1	Validate the trend using available data and operational context.
2	Recommend an Office of Primary Responsibility (OPR) and, if applicable, Offices of Collateral Responsibility (OCRs).
3	Recommend corrective actions appropriate to the scope of the trend (e.g., local guidance clarification, focused SPOT evaluations, commander emphasis items).
4	Coordinate with the OPR/OCR to establish verification methods and trend closure criteria.
5	Track and report trend status to the OG/CC or WG/CC during the STAN/EVAL Board (SEB) until closure, see **Attachment 2**.

CASE A. CUNNINGHAM, Lt Gen, USAF
Deputy Chief of Staff. Operations

Terms

Active Guard Reserve (AGR)—Members of a Reserve component on orders under Title 10 United States Code (U.S.C.), 14 U.S.C., or full-time National Guard duty under 32 U.S.C. Section 502(f) for a period of 180 consecutive days or more. The tour purpose is organizing, administering, recruiting, instructing or training the Reserve components according to 10 U.S.C. subsection 101(d)(6).

Additional Training—Any training recommended by the flight examiner to remedy a discrepancy identified during an evaluation that cannot be remedied during the evaluation debrief.

Aircrew—Any personnel responsible for the safe ground and flight operation of the aircraft and onboard systems, or for airborne duties essential to accomplishment of the aircraft's or major weapons system's mission. See DAFPD 11-4, *Aviation Service*.

Aircrew Evaluation—An assessment of individual aircrew capability to accomplish assigned flying duties.

Aircrew Evaluation Types—The Types of aircrew evaluations are INSTM, MSN, QUAL, INSTR, and SPOT

Aircrew Qualification—Qualifications identify an aircrew member as having the capability to accomplish specific flight duties and are documented on AF Form 8. These are attained through the completion of an evaluation and are based on demonstration of proficiency in a specific skill set. When all qualification requirements are completed, the aircrew member is granted the respective qualification. Qualifications are limited to Basic Aircraft Qualification, Instrument Qualification, Mission Qualification, and Instructor Qualification.

Aircrew Qualification Expiration Date—The date an Aircrew Member loses an aircrew qualification due to exceeding the periodic evaluation time requirement.

Aircrew Training Device (ATD)—A training device approved by the lead-MAJCOM for use in conducting evaluations. Aircrew training devices include, but are not limited to: simulators, cockpit familiarization trainers, cockpit procedures trainers, operational flight trainers, part-task trainers, fuselage trainers, boom-operator weapon system trainers, and weapon system trainers. See AFI 10-217, *Management of Air Force Operational Training and Undergraduate Aircrew Training Systems*. See also: Simulator.

Air Force Special Warfare (AFSPECWAR)—Air Force personnel who specialize in multi-domain operations in hostile, denied, and politically sensitive environments. AFSPECWAR Airmen comprise the Guardian Angel, Tactical Air Control Party, and Special Tactics weapon systems, a subset of which are aircrew for the purposes of this manual. See DAFPD 10-35, *Air Force Special Warfare.*

Alternate Evaluation Method—A MAJCOM-approved method of accomplishing some or all components of evaluation when not conducted in an aircraft/weapons system or an ATD.

Area—Major phases of an evaluation that include but are not limited to preflight, flight, or post-flight.

Basic Aircraft Qualification—A documented designation allowing an aircrew member to perform the basic duties of a particular crew position in the specified weapons system.

Blanket Waiver—A type of waiver that broadly applies to aircrew over a specified period, without listing the names of the affected individuals. It exempts the entire group (e.g., pilots, flight engineers, USAFE-assigned aircrew) from certain requirements uniformly.

Career Enlisted Aviator (CEA)—Enlisted aircrew with AFSCs as outlined in DAFMAN 11-402

Certification—Procedure used to document competency in a particular task that is preponderantly tied to unit mission requirements. Not interchangeable with qualification, which require AF Form 8 documentation. Certifications are attained through methods other than evaluation and are documented on AF Form 4348.

Combat Crew Training Squadron/Formal Training Unit (FTU)—A unit with a primary mission to train aircrew personnel according to approved syllabi.

Combination Evaluation—Two or more qualification evaluations completed on the same flight and documented together on a single line on the AF Form 8 (e.g., QUAL/INSTM, QUAL/INSTM/MSN/INSTR). Also referred to as a "combined evaluation."

Combined Evaluation—see "Combination Evaluation."

Contract Flight/Simulator Instructor (CFSI)—Civil service and Contract aircrew, including simulator instructors may also be designated as FEs by the respective OG/CC, WG/CC or headquarters.

Critical Area/Critical Subarea—Any area or subarea that covers items of significant importance to the overall operational requirements or the marginal performance that would jeopardize safe conduct of the flight. Critical areas are graded either "Q" (Qualified) or "U" (Unqualified).

DAFMAN 11-402 Action—Umbrella term that refers to guidance in **Chapter 6** and **Chapter 8** of the publication dated in this manual as it relates to suspension, disqualification, revalidation, and requalification of aviation service of rated officers, career enlisted aviators, parachutists and civilian government employees and/or a Flying Evaluation Board (FEB).

Debriefed Discrepancy—Remedial action taken by a flight examiner to remedy a discrepancy noted during an aircrew evaluation or EPE. This action is accomplished during debrief of the evaluation wherein the flight examiner provides instruction concerning the discrepancy and then determines that the examinee has gained the necessary knowledge or proficiency to remedy the discrepancy.

Deployment—For the purposes of this manual, the term deployment will include operational temporary duty assignments (TDY).

Discrepancy—Substandard performance in a Graded Area/Subarea; see also Downgrade.

Digital Transferability—The capability of a software system to export a member's complete, official records in a standardized, non-proprietary digital format. This format must allow the data to be seamlessly and completely imported by a different software system, ensuring all original information, metadata, and document integrity are preserved. For the purposes of this manual, this includes the entirety of a member's Flight Evaluation Folder (FEF), such as AF Forms 8 and 80, official memos, and all other associated evaluation documents. The process must enable the immediate and continued usability of the records in the gaining system without the need for manual data reentry or remediation.

Downgrade—A reduction in Qualification Level; see also Discrepancy.

Emergency Procedures Evaluation (EPE)—An evaluation of an aircrew member's knowledge and skill related to emergencies. The term refers to the evaluation event itself, not the number or type of emergencies covered.

Evaluation—An assessment of an aircrew member's procedural understanding, airmanship, systems knowledge, situational awareness, and judgement with regards to an aircraft/weapons system/crew position. An evaluation also measures the degree of compliance and health of a unit's training and standardization programs.

Examination—A method of measuring an aircrew member's knowledge of normal/emergency procedures, threats, and other information essential for the safe and effective operation of their assigned aircraft/weapon system/crew position through the administration of written or computer-based examinations.

Excepted Aircraft—Aircraft, as determined by the lead MAJCOM, that is not approved/certified for instrument flight operations (e.g., in IMC or under IFR).

Expiration—The date at which a qualification expires, and an aircrew member becomes unqualified.

Flight Crew Information File (FCIF)—A collection of publications and material determined by the MAJCOM and unit as necessary for day-to-day operations.

Flight Crew Information File (FCIF) Message—HHQ Guidance that contains information temporary in nature, directly pertinent to the safe conduct of flight, and must be read before flight. FCIF messages that contain aircraft-related information will be coordinated with all using MAJCOMs.

Flight Evaluation Folder (FEF)—A two-part folder containing the source documents that constitute the history of flying qualifications of each aircrew member.

Flight Examiner (FE)—An aircrew member designated to perform evaluation duties as specified by this manual.

Formal Training Unit (FTU)—Units with a primary training focus to award graduates with a qualification in an aircraft/weapons system/MDS.

Grade—A characterization of examinee performance in a graded area or graded subarea. Grades are Q, Q-, or U.

Graded Area/Subarea—A specific evaluated ability or skill set within an aircrew evaluation.

Gross Negligence—An action (or inaction) which exhibits the lack of flight diligence or care, or a conscious act, a voluntary act, or omission in reckless disregard of a legal duty and/or of the consequences to others.

Group Waiver—A waiver issued collectively for two or more aircrew members from certain requirements uniformly. A group waiver will list specific names of aircrew members or units in which individual names can be immediately ascertained (e.g., aircrew assigned/attached to the 36th Airlift Squadron)

Initial (INIT) Aircrew Evaluation—The first aircrew evaluation of any type for an aircraft/weapons system (e.g., INIT QUAL/ INSTM, INIT MSN, INIT INSTR).

Initial Cadre—Aircrew members who are appointed by their MAJCOMs where no instructors or flight examiner currently exists or for which there are no established formal training programs or standardized evaluation criteria. Normally used for a new mission set (requiring a mission qualification) or for a new aircraft/weapons system.

Instructor (INSTR) Evaluation—A means to assess an aircrew member's instructional ability in an aircraft/weapon system or crew position and to obtain/maintain instructor qualification. This evaluation initially establishes or re-establishes instructor qualification of the examinee in an aircraft/weapons system (e.g., INIT INSTR and RQ INSTR) as directed in AFMAN 11-2MDS V1.

Instructor Qualification—A documented designation allowing an aircrew member to instruct airborne or ground events or provide supervision of aircrew members.

Instrument (INSTM) Evaluation—The means to assess an aircrew member's ability to operate under Instrument Flight Rules (IFR)

Instrument Qualification—A documented designation allowing an aircrew member to operate under Instrument Flight Rules (IFR).

Lead Command—The Air Force MAJCOM or agency possessing an MDS that is designated by DAFPD 10-9 as responsible for the coordination of MDS-Specific activities.

Master Question File (MQF)—Question bank used to construct closed book exams. Aircrew members have access to MQFs.

Mission (MSN) Evaluation—A means to assess an aircrew member's ability to employ the assigned aircraft/weapon system in accomplishing the unit’s operational mission. Requires AF Form 8 documentation.

Mission Qualification—A documented designation allowing an aircrew to employ the assigned aircraft/weapon system in accomplishing the unit’s operational mission.

Non-rated Aircrew Member—Includes non-rated officer aircrew member and non-CEA aircrew. Personnel who are required to perform mission essential inflight duties and are within the authorized crew complement (IAW AFI 65-503) for the aircraft or are necessary for the mission.

Office of Collateral Responsibility (OCR)—Any headquarters, agency, or activity having coordinating functional interest in, and responsibility for, a specific action, project, plan, program or problem.

Office of Primary Responsibility (OPR)—Any headquarters, agency, or activity having the primary functional interest in, and responsibility for, a specific action, project, plan, program or problem.

Periodic Evaluation—An evaluation of an individual aircrew member which assesses existing and current qualifications. A periodic evaluation does not award any new qualifications nor re-instate any expired or revoked qualifications.

Pyramid Evaluation—An evaluation administered to a flight examiner by a higher-echelon examiner within the STAN/EVAL structure (e.g., squadron examiner evaluated by group or wing examiner).

Qualification—A means to identify an aircrew member's ability to perform specific flight duties in an assigned aircraft/weapon system. Attained through evaluations and documented on the AF Form 8.

Qualification (QUAL) Evaluation—An evaluation of an individual aircrew member, consisting at a minimum of an open book examination and/or a closed book examination, and an evaluation flight (aircraft or ATD).

Qualification Level—The overall characterization of examinee performance based on the compilation of requisite results and the aircrew evaluation Graded Areas/Subareas. The Qualification Level will be Q1, Q2, Q3.

Ready Aircrew Program (RAP)—The continuation-training program designed to focus training on capabilities needed to accomplish a unit’s core mission.

Reckless Conduct—Behavior that consciously disregards a substantial and unjustified risk; an extreme departure from the care a reasonable person would exercise in similar circumstances

Renewal—A flight evaluation conducted to maintain the qualification.

Requalification (RQ)—An aircrew evaluation administered to remedy a loss of qualification due to expiration of a required periodic evaluation, loss of currency (as specified in applicable AFMAN 11-2MDS V1), an aircrew qualification following a failed aircrew evaluation.

Required Area—Graded areas/subareas that must be evaluated for an aircrew evaluation to be considered complete.

Requisites—Requirements that include examinations, EPEs, Boldface/CAPs or other items identified by a MAJCOM. Requisites must be successfully accomplished as part of an aircrew evaluation and are documented on AF Form 8.

Restrictions—A statement on the AF Form 8 that places limitations on the duties that may be performed by an aircrew in the exercise of the qualification.

Secure Question Bank (SQB)—Questions used to construct open book examinations. Aircrew members will not have access to the SQB at any point unless required for official STAN/EVAL or IRP related duties, as appropriate.

Simulator—A specific type of aircrew training device that enables the development and practice of skills necessary to accomplish tasks to a prescribed standard of competency in a specific aircraft, weapon system, and/or duty position. Simulators provide high-fidelity representations of operational environments and systems. Refer to AFI 10-217, *Management of Air Force Operational Training and Undergraduate Aircrew Training Systems*. See also: Aircrew Training Device (ATD)

Special Interest Item (SII)—Items of emphasis relating to existing procedure(s) designed to mitigate or eliminate specific risks or trends

Special Purpose Observation Type (SPOT) Evaluation—An aircrew evaluation, EPE, Examination or the evaluation of a specific event that does not intend to satisfy the requirements of an initial (INIT), periodic or requalification (RQ) evaluation. Requires AF Form 8 documentation.

Squadron Supervisor—Any of the following: SQ/CC, operations officer, assistant operations officer, flight commander or person specifically designated by the SQ/CC.

STAN/EVAL Function—An organization at appropriate echelons of command that accomplishes the objectives of this manual.

STAN/EVAL Liaison Officer (SELO)—An individual (officer, enlisted, government civilian, contractor, etc.) tasked to perform squadron STAN/EVAL administrative duties.

Student Aircrew Member—An aircrew member enrolled in a formal course or training under a MAJCOM-approved syllabus.

Subarea—A performance subdivision within an area that is observed and evaluated during an evaluation flight**.**

Supervised Status—The status of an aircrew member who must fly under the supervision of either an instructor or a designated supervisor (as specified in the applicable AFMAN 11-2MDS V1) qualified in that specific aircrew position. The flight examiner determines when supervision is required. The type of supervisor, e.g., instructor or designated supervisor, is as specified in the applicable AFMAN 11-2MDS V1, or as determined by the SQ/CC.

Supplementary Evaluation Program—Administrative tools used by a commander to ensure standardization of flight operations, and to identify and/or evaluate implemented solutions to unit problems.

Trend Program—Analysis designed to identify areas requiring attention, monitoring or correction.

Unit—A level of organization under HHQs (HAF, MAJCOM and/or NAF) required to establish a STAN/EVAL function (normally this is an operations group and consists of both the group and flying squadrons).

Universal Qualification—A documented designation that allows flight surgeons, AFSPECWAR aircrew, non-rated aircrew, non-career enlisted aviator (CEA) aircrew, or other aircrew members (including CEAs) as specified by MAJCOM to operate across all USAF aircraft/weapons systems or to perform airborne duties requiring transferability to a group or broad range of aircraft/weapons systems. With eligibility the aircrew member requires, at a minimum, only an examination to establish qualification.

User Command—Any Air Force MAJCOM/agency, other than the lead command, that possess an aircraft/weapons system/MDS.

Weapon System—A combination of one or more weapons with all related equipment, materials, services, personnel, and means of delivery and deployment (if applicable) required for self-sufficiency.

Attachment 2

STAN/EVAL BOARD (SEB) MINUTES

A2.1. The information in Figure A2.1 is an example of the minimum information a board should address.

Figure A2.1. Sample STAN/EVAL Board (SEB) Minutes.

MEMORANDUM FOR (SEE DISTRIBUTION)

FROM: (UNIT'S COMPLETE ADDRESS)

SUBJECT: STAN/EVAL BOARD MINUTES

1. List any required attendee that was not present.
2. List all current flight examiners, including attached HHQ and/or attached squadron flight examiners. Include any OG/CC (or WG/CC) designated additional OGV (or WGV) flight examiners.
3. Attach current waivers.
4. Report all Q- debriefs and/or attach equivalent report output from MAJCOM-directed software.
5. Report all Q2s with corrective action(s) and/or attach equivalent report output from MAJCOM-directed software.
6. Report all Q3s with corrective action(s) and/or attach equivalent report output from MAJCOM-directed software.
7. Report supplementary Evaluations. Report the results of evaluations conducted at both the OGV (or WGV) at the squadron level
8. Trend Input. Identify new, continuing, and resolved trends based on evaluations results and MFOQA. Where necessary, report corrective action as OPEN/CLOSED, the OPR(s), and suspense date.
9. Corrective Actions: List possible corrective actions to be taken in other offices (e.g., Training, Safety) for potential action.
10. Lessons Learned. Document lessons learned from: trend inputs, results from corrective actions (including but not limited to training data), and effectiveness of recommendations made to Training, Safety and other offices.
11. Other: This is an optional paragraph that can be used as necessary.
12. Problems Requiring HHQ Assistance.

Attachment 3

SAMPLE AF FORM 8, *RECORD OF AIRCREW EVALUATION.*

A3.1. General. Use the AF Form 8 from the AF e-Publishing website. Examples are provided in **Attachment 4** and on the AFFSA/XOF SharePoint® (**https://usaf.dps.mil/sites/affsa/SitePages/Flight-Directives.aspx**) to illustrate intent regarding content and formatting. In those instances where an example may not directly apply or conflicts with published guidance, published guidance has priority; refer to **Chapter 16** for further documentation guidance.

Attachment 4

EXAMPLE AF FORM 8

A4.1. Completed Periodic Evaluation with Q1. The example in Figure A4.1 and Figure A4.2 shows a periodic evaluation (a QUAL/INSTM/INSTR evaluation with Q1 with no discrepancies). The examinee has completed all requisites and completed all flight areas of the evaluation in the ATD with a single examiner. The examinee accomplished the EPE in the ATD during the evaluation flight, and this is documented via a remark in Section V (Evaluations).

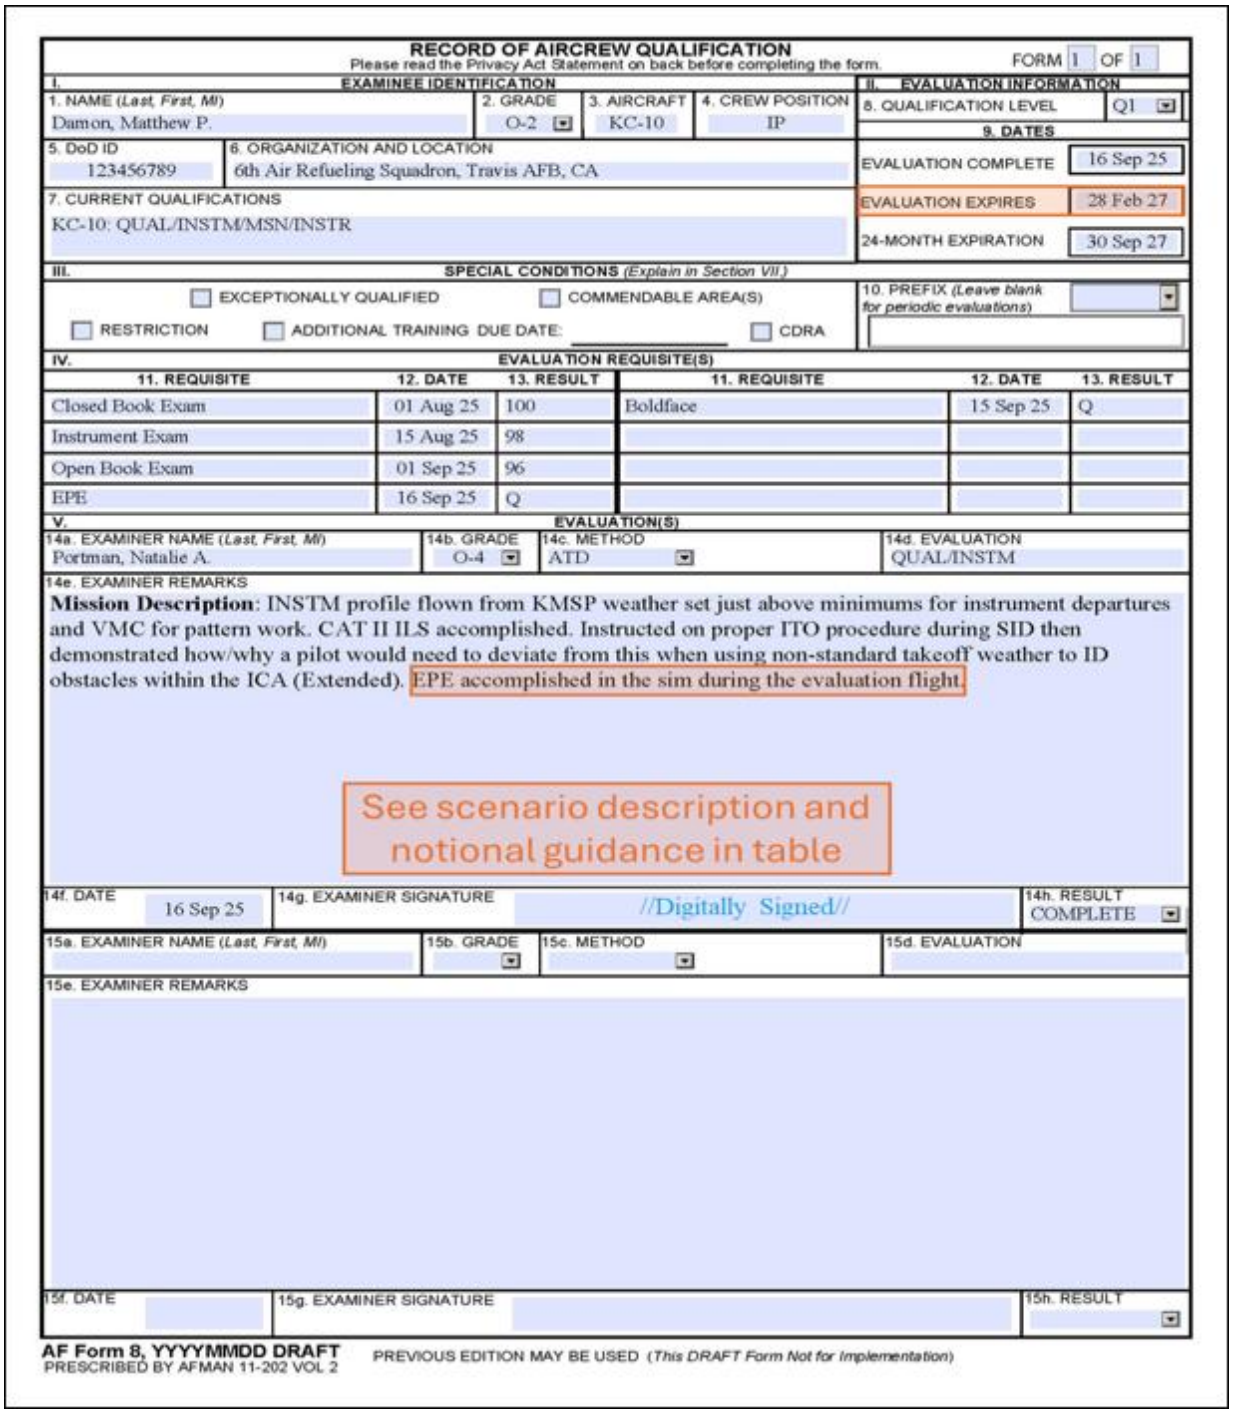

Table A4.1. Summary of AF Form 8 Completion for Periodic Evaluation with Q1.

Notional guidance for the scenario (*not to be construed as actual or required guidance*):

- MAJCOM uses a 17-month expiration date.

Section	Completed By	Notes
0	FE	Input number of forms used, see **paragraph 16.1.2.3**. [i.e., Form 1 of 1]
I	FE	Examinee information IAW **paragraph 16.1.3**.
II	FE	Block 8: Select qualification level. [In this example, Q1.] Block 9: Complete dates IAW **paragraph 16.2.2**. [See notional guidance above.]
III	FE	Check boxes as required and complete additional steps IAW **Chapter 16**. [N/A for this example.] Block 10: Blank for a periodic evaluation.
IV	FE	Requisites accomplished & scores/grades (e.g., exams, boldface).
V	FE	See **paragraph 16.5** and **Table 16.2**. Mission description contains minimum required information. Absence of information implies that all requirements were successfully accomplished. [In this example, the comment about the EPE is included IAW **Table 16.2**.]
VI	N/A	Comments IAW **paragraph 16.6** and **Table 16.3**. [N/A for this example.]
VII	N/A	Blank for Q1.
VIII	All	Sign in listed order: FE, Reviewer (if required), Commander/Approving Official, and Examinee IAW **paragraph 16.8**.

14e. EXAMINER REMARKS

Mission Description: INSTM profile flown from KMSP weather set just above minimums for instrument departures and VMC for pattern work. CAT II ILS accomplished. Instructed on proper ITO procedure during SID then demonstrated how/why a pilot would need to deviate from this when using non-standard takeoff weather to ID obstacles within the ICA (Extended). EPE accomplished in the sim during the evaluation flight.

AF FORM 80, YYYYMMDD **DRAFT - NOT FOR USE**
Prescribed By AFMAN 11-202V2

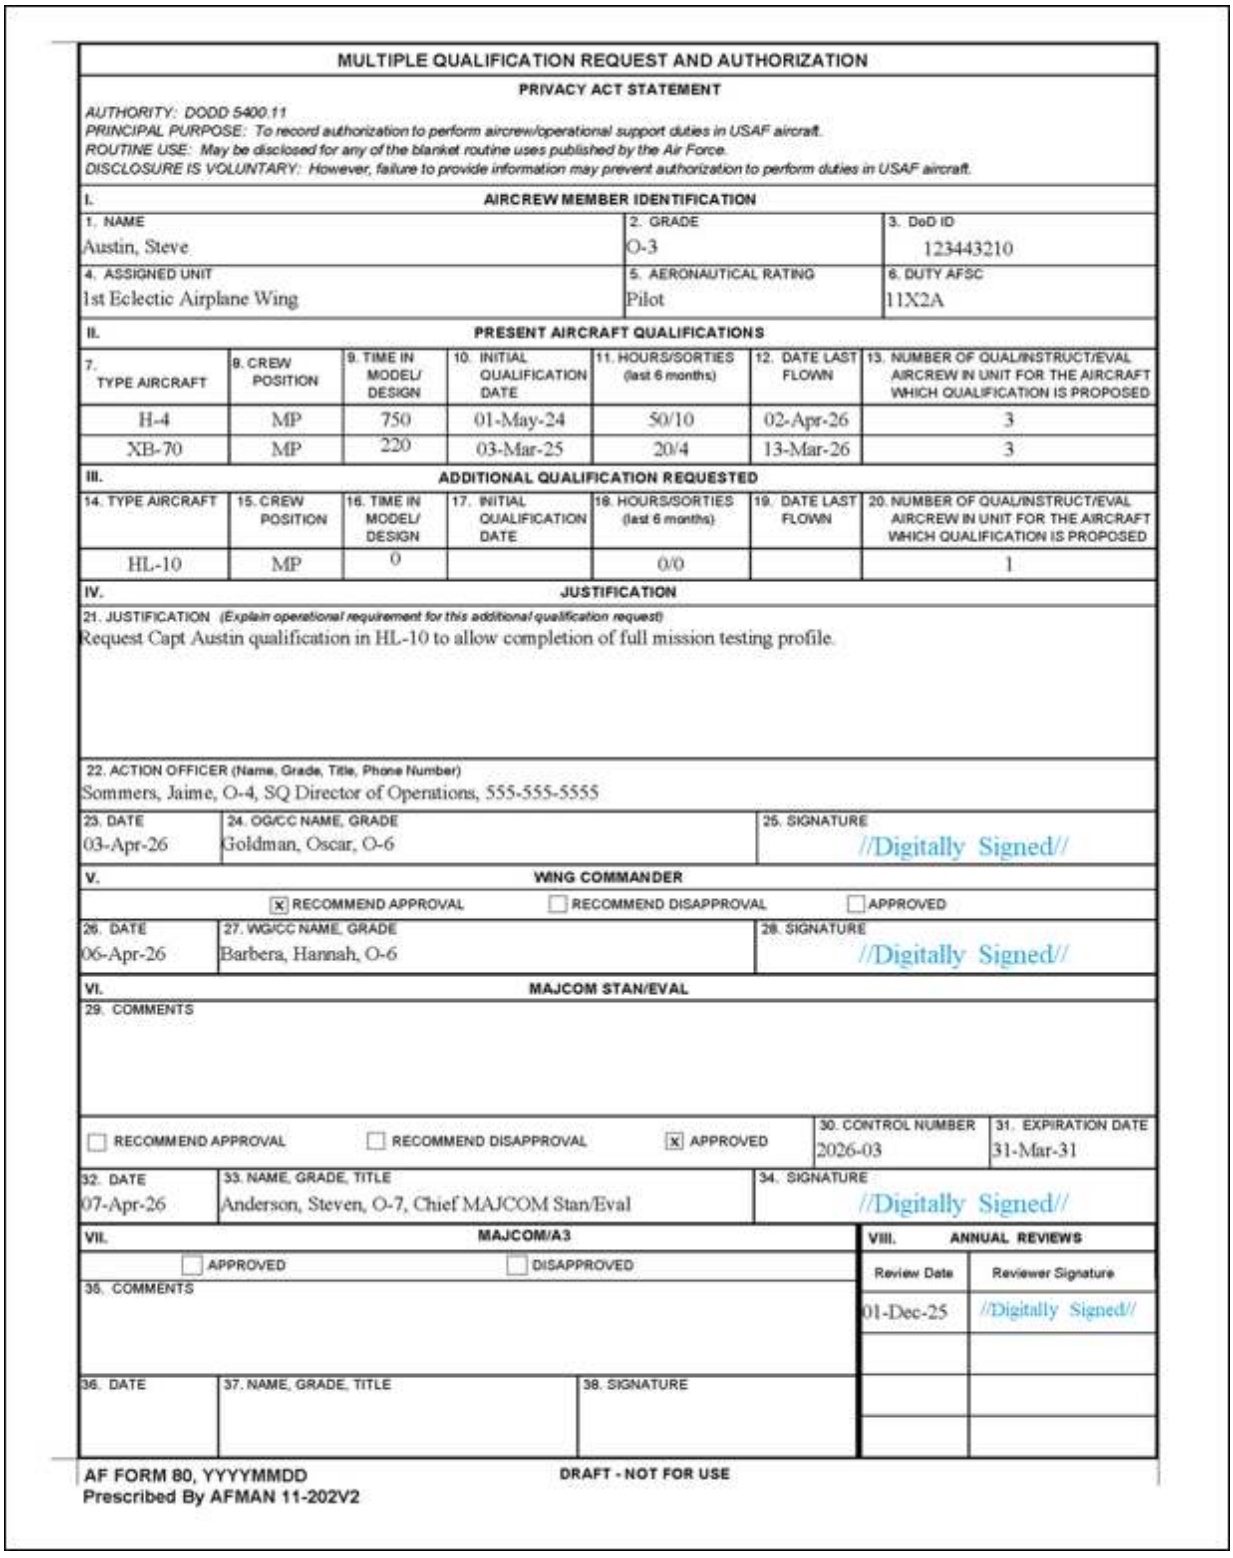

A7.2. Form 80 Example. The example requests an additional qualification for the member in the HL-10. The member is currently qualified in the H-4 and XB-70 but has not yet started training for the HL-10. Notional MAJCOM guidance requires MAJCOM Stan/Eval approval for all multiple qualifications. MAJCOM/A3 indorsement is not required. **Figure A7.1** shows the example AF Form 8.

Table A7.1. Summary of AF Form 80.

Notional guidance for the scenario (*not to be construed as actual or required guidance*): • MAJCOM does not require an expiration date other than the 5-year expiration date. • MAJCOM requires MAJCOM Stan/Eval approval for all additional qualifications..		
Block(s)	**Field Title**	**Completion Instructions**
1–6	Section I – Aircrew Member Identification	Include name, grade, DoD ID, unit, aeronautical rating, and duty AFSC.
7–13	Section II – Present Aircraft Qualifications	Include current aircraft MDS, crew position, experience, and number of unit aircrew currently qualified in the aircraft. Further details may be provided in MAJCOM guidance. In this example, member is currently qualified in the H-4 and XB-70.
14–20	Section III – Additional Qualification Requested	Include requested MDS, position, time in model, dates, and number of unit aircrew currently qualified in the aircraft. Refer to MAJCOM guidance for further detail. In this example, the unit requests the member obtain an additional qualification in the HL-10, in which he has no previous experience.
21	Section IV --Justification	Provide a detailed explanation of the operational requirement justifying the request for additional qualification.
22	Action Officer	Enter the name, grade, title, and phone number of the requestor.
23–25	Requesting Group CC	Completed and signed by the OG/CC or equivalent. Includes date, name/rank, and signature.
26–28	Section V – Wing Commander	WG/CC or equivalent selects “Recommend Approval,” “Recommend Disapproval,” or “Approved” as dictated by MAJCOM guidance and completes all signature blocks.
29–31	Section VI – MAJCOM STAN/EVAL	See MAJCOM guidance for applicability. Completed by MAJCOM or NAF STAN/EVAL personnel. Includes recommendation and control number/expiration date IAW MAJCOM guidance. The expiration date may not exceed 5 years. In this example MAJCOM guidance does not specify a shorter expiration date so 5 years is used.

32–34	MAJCOM STAN/EVAL Signature	See MAJCOM guidance for applicability. If Blocks 29-31 are required, Blocks 32-23 are completed and signed by MAJCOM STAN/EVAL personnel or equivalent.
35	Section VII – Comments	See MAJCOM guidance for applicability. If required, Block 35 is completed by MAJCOM/A3 or NAF/A3 with any additional remarks. In this example, MAJCOM guidance does not require MAJCOM/A3 inputs, so this block is blank.
36–38	MAJCOM/A3 (or delegate) Signature	See MAJCOM guidance for applicability. If required, MAJCOM/A3 or delegate select approval/disapproval. Enter date, name, and signature. In this example, MAJCOM guidance does not require MAJCOM/A3 inputs, so this block is blank.
Right-hand side	Section VIII – Annual Reviews	Complete IAW **paragraph 15.4.4**. Annotate review date and signature in the next available row.

Figure A7.2. Form 80 Example.
