HERALDRY

The elements of the Materiel Management badge represent our heritage, mission, and the global impact of logistics and sustainment.

FALCON

The falcon at the center of the badge symbolizes the United States Air Force and represents strength, dedication, and devotion to duty.

GLOBE

Represents the worldwide scope and global reach of materiel management operations.

LIGHTNING BOLT

Represents military strength and wartime readiness.

OLIVE BRANCH

Symbolizes peace achieved through strength and readiness.

CROSSED KEY & LIGHTNING BOLT

Demonstrates that mission readiness is only possible through effective logistics and materiel support.

KEY

Symbolizes security, control, and accountability of supplies, rooted in the Quartermaster tradition.

SKILL LEVEL BADGE PROGRESSION

BASIC BADGE

Awarded upon graduation from Technical School (3-level).

SENIOR BADGE

Authorized wear immediately upon the official award of the 7-skill level.

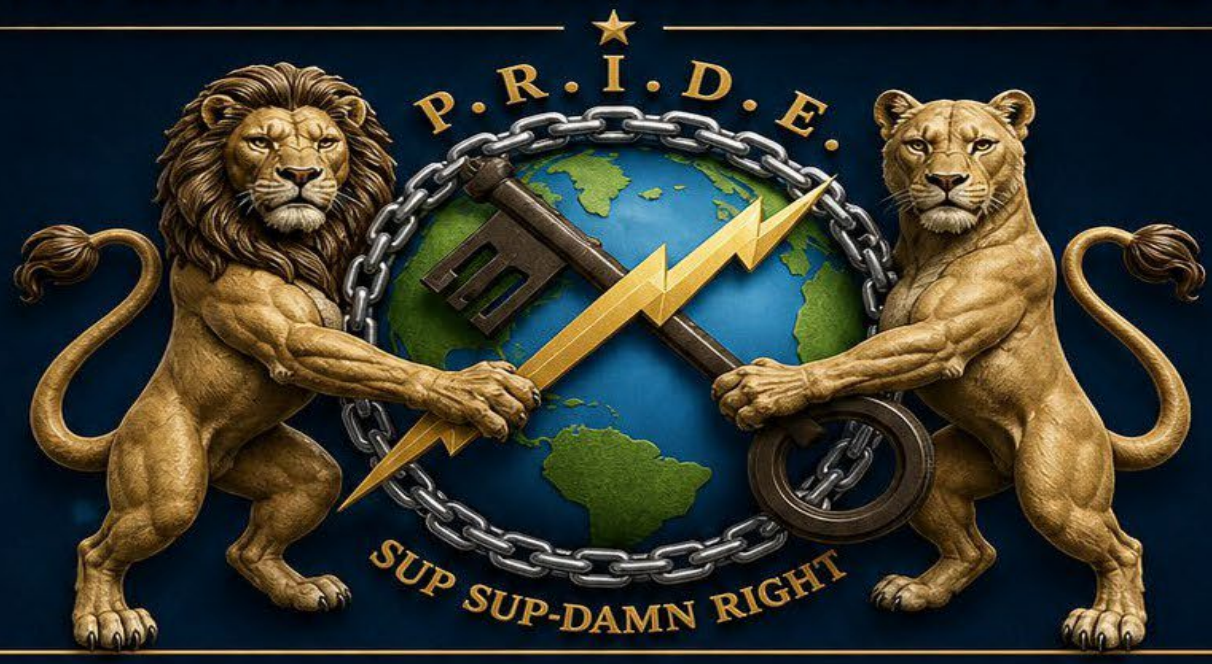

MASTER BADGE

Awarded upon attaining the 9-skill level. Master Sergeants may also be authorized to wear it after serving 5-years in the specialty from the date they were awarded the 7-skill level.

INTEGRITY ★ SERVICE ★ EXCELLENCE

MATERIEL MANAGEMENT LOGO

★ *The **Lions** represent the Materiel Managers all around the world that have the courage and strength to excel in any environment. The shape of their tails spell 2S. They are the pride that represents our mighty Materiel Management 2S0X1 family. The acronym for **P.R.I.D.E.** also represents the competences that we should embody and strive to exemplify as Airmen.*

- ***Perseverance*** *(Never give up on the mission despite the difficulty of the task.)*
- ***Resilience*** *(Foster the mental, physical, social and spiritual fitness to bounce back and thrive from any situation.)*
- ***Initiative*** *(Take ownership of your career, put great individual effort towards becoming a more knowledgeable and proficient Airman.)*
- ***Discipline*** *(Supply discipline must always be at the forefront of your Materiel Management actions. Follow and enforce policy.)*
- ***Efficiency*** *(The quality of our work dictates how effective we are. Be efficient with the stock, store, issue and inventory of materiel that you are accountable for.)*

★ *The **Chain and Globe** keeps us linked together and represents the highly effective, war ready supply chain management that we provide around the world.*

★ *The **Key** symbolizes the security, safekeeping, and control of supplies. The **Lightning Bolt** represents military strength and wartime readiness. The crossed key and lightning bolt indicates that military strength and wartime readiness can only be achieved through the synergy provided by Materiel Management Airmen at every level of the Air Force. One Team, One Fight!*

★ ***SUP SUP-DAMN RIGHT*** *is our historical Supply chant.*

CAREER FIELD EDUCATION AND
TRAINING PLAN

Part I

Preface

1. This Career Field Education and Training Plan (CFETP) is a comprehensive education and training document that identifies life-cycle education/training requirements, training support resources, and minimum core task requirements for AFSC 2S0XX. The CFETP provides personnel with a clear career path to success and instills rigor in all aspects of career field training. ***NOTE:*** Civilians occupying associated positions may use Part II of this document to support duty position qualification training.

2. This CFETP consists of two parts, both used by supervisors to plan, manage, and control training within the career field.

2.1. Part I provides information necessary for overall management of the specialty. Section A gives general information and explains the purpose and how to use the plan, Section B identifies career field progression information to include duties and responsibilities, specialty qualifications, skill level upgrade requirements, and Community College of the Air Force information; Section C outlines knowledge, education, training, and other qualifications required for entry, award and retention of each skill level; Section D indicates resource constraints; Section E identifies transition training guide requirements for SSgt through MSgt.

2.2. Part II includes the following:
Section A identifies the Specialty Training Standard (STS). Attachment one of Section A lists the proficiency codes used for each task. Attachment two lists all tasks, core tasks, proficiency codes and technical references to support Air Education and Training Command (AETC) and On-the-Job Training (OJT). Additionally, attachment three of Section A identifies mandatory training for Materiel Management Unit Type Codes (UTC). Supervisors and Unit Training Managers must use this attachment to certify 2S0XX Airmen for UTC-specific training prior to deployment for contingency operations.
Section B (Course Objective List) is not used.
Section C (Support Materials) identifies qualification training packages (QTP) and special experience identifiers (SEI).
Section D identifies a training course index that supervisors can use to determine resources available to support training. Included here are both mandatory and optional courses.
Section E (MAJCOM Unique Requirements) is not used.
Section F identifies training program points of contact.
Section G identifies training program regulations.

Section H describes Materiel Management Enlisted Career Broadening Program training objectives, program qualifications, and program administration.

3. Using the guidance provided in this CFETP will ensure individuals in 2S0XX career field receive effective and efficient training at the appropriate point in their career. At unit level, supervisors, trainers, and training managers use this CFETP to identify, plan, and conduct training commensurate with the overall goals of this plan. All OJT tasks identified by a dash (-) will be trained to the 3c level of proficiency. This plan will enable supervisors to train today's workforce for tomorrow's jobs.

Abbreviations/Terms Explained

Advanced Training (AT). Formal course that provides individuals who are qualified in one or more positions of their Air Force Specialty (AFS) with additional skills and knowledge to enhance their expertise in the career field. Training is for selected career airmen at the advanced level of the AFS.

Air Force Job Qualification Standard/Command Job Qualification Standard (AFJQS/CJQS). A comprehensive task list that describes a particular job type or duty position. They are used by supervisors to document task qualifications. The tasks on AFJQS/CJQS are common to all people serving in the described duty position.

Career Field Education and Training Plan (CFETP). CFETP is a comprehensive core training document that identifies life-cycle education and training requirements, training support resources, and minimum core task requirements for a specialty. The CFETP aims to give personnel a clear path and instill a sense of industry in career field training. It is the formal training contract between the AFCFM and AETC for formal accession and life-cycle skills training.

Certification. A formal indication of an individual's ability to perform a task to required standards.

Certification Official. A person whom the commander assigns to determine an individual's ability to perform a task to required standards.

Continuation Training. Additional advanced training exceeding the minimum upgrade training requirements with emphasis on present or future duty assignments.

Contract Training. Type 1 training that receives the same priority funding as Air Force-directed training. It supports initial groups of instructors and operators the Air Force requires for new or modified weapon systems.

Core Task. Tasks the AFCFM identify as minimum qualification requirements for everyone within an AFSC, regardless of duty position. Core tasks may be specified for a particular skill level or in general across the AFSC. Guidance for using core tasks can be found in the applicable CFETP narrative.

Course Objective List (COL). A publication derived from initial and advanced skills course training standard, identifying the tasks and knowledge requirements, and respective standards provided to achieve a 3- or 7-skill level in this career field. Supervisors use the COL to assist in conducting CFETP graduate evaluations in accordance with AFI 36-2651, *Basic Military and Technical Training.*

Course Training Standard (CTS). Training standard that identifies the training members will receive in a specific course.

Critical Task. A task that requires specific training and certification prioritized above other tasks. Tasks may be defined as critical either through AFI, Technical Orders, higher headquarters, or at any level in the unit.

Cross Utilization Training (CUT). Training is designed to qualify personnel to perform tasks that are not established requirements in their awarded AFSC.

Deployment Task. Deployment tasks are any tasks identified by higher headquarters for personnel to perform during deployments, contingencies, or wartime. Deployment tasks may be specified for a particular skill level or in general across the AFSC. Guidance for using core tasks can be found in the applicable CFETP narrative.

Duty Position Tasks. The tasks assigned to an individual for the position currently held. These include as a minimum all core tasks that correspond to the duty position, and tasks assigned by the supervisor

Enlisted Specialty Training (EST). A mix of formal training (technical school) and OJT to qualify and upgrade airmen in each skill level of a specialty.

Expeditionary Training. Training for tasks identified by higher headquarters for personnel to perform during contingencies or wartime. Training in these tasks may be provided through formal or on-the-job training.

Exportable Course. Instructional packages that personnel design for use in the field. The course may include printed, computer-based, or other audiovisual materials.

Exportable Training. Additional training via computer assistance, paper text, interactive video, or other necessary means to supplement training.

Functional Advisory Council (FAC). The FAC consists of the CFM and MAJCOM-level functional leadership as well as other key force development stakeholders. FACs prepare senior leaders with a comprehensive understanding of functional, cross-functional and institutional personnel requirements pertaining to a particular career field and advise on management strategies to sustain and improve capabilities. Additionally, the FAC validates the career progression roadmap by comparing career field needs (requirements) against career field capabilities (inventory), providing a summary of projected requirements (to include grade, AFSC, experience level, and number of valid personnel authorizations that must be filled).

Functional Area Managers (FAM). The individual is accountable for the management and oversight of all personnel and equipment within a specific functional area to support the operational planning and execution. Responsibilities include, but are not limited to, developing and reviewing policy; developing, managing, and maintaining UTCs; developing criteria for and monitoring readiness reporting; force posturing; and analysis. At each level of responsibility (Headquarters Air Force, MAJCOM, Air Component, FOA, DRU, and unit), the FAM should be the most highly knowledgeable and experienced person within the functional area and have the widest range of visibility over the functional area readiness and capability issues.

Functional Manager. Senior leaders, designated by the appropriate functional authority (FA) who provide day-to-day management responsibility over specific functional communities at the Air Force Installation and Mission Support Center (AFIMSC), MAJCOM, FOA, DRU, or ARC level. While they should maintain an institutional focus regarding resource development and distribution, FMs are responsible for ensuring their specialties are equipped, developed, and sustained to meet the functional community's mission as well as encourage force development opportunities to meet future needs of the total Air Force mission.

Go. The stage at which an individual has gained enough skill, knowledge, and experience to perform the tasks without supervision. Meeting the task standard.

Instructional System Development (ISD). A deliberate and orderly, but flexible process for planning, developing, implementing, and managing instructional systems. It ensures that personnel are taught in a cost-efficient way the knowledge, skills, and aptitudes that are essential for successful job performance.

Initial Skills Training. A formal school course that results in an AFSC 3-skill level award for enlisted or mandatory training for upgrade to the status of qualified for officers.

Master Task List (MTL). A comprehensive list (100%) of all tasks performed within a work center and consisting of the current CFETP or AFJQS and locally developed AF Forms 797 (as a minimum). Should include tasks required for deployment and/or UTC requirements.

Master Training Plan (MTP). Employs a strategy for ensuring the completion of all work center job requirements by using a Master task Listing and provides milestones for task, CDC completion, and prioritizes deployment/UTC, home station training tasks, upgrade, and qualification tasks.

Mission-Ready Airman. A technical training graduate certified in AFCFM-defined tasks that are required to be performed at the next duty station, following course completion.

No Go. Trainees have not gained enough skill, knowledge, and experience to perform tasks without supervision. Does not meet task standard.

Occupational Analysis Report (OAR). A detailed report showing the results of an occupational survey of tasks performed within a particular AFS.

On-the-Job Training (OJT). Hands-on, "over-the-shoulder" conducted to certify personnel in both upgrade (skill level award and job qualification) position certification training.

Optimal Training. The ideal combination of training settings results in the highest levels of proficiency on specified performance requirements within the minimum time possible.

Proficiency Training. Additional training, either in-residence or exportable advanced training

courses, or on-the-job training, provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade.

Qualification Training (QT). Hands-on performance training is designed to qualify personnel in a specific position. This training occurs both during and after upgrade training to maintain up-to-date qualifications.

Qualification Training Package (QTP). An instructional package designed for use at the unit to qualify, or aid qualification, in a duty position or program, or on a piece of equipment. It may be printed, computer-based, or in other audiovisual media.

Quota Type. A two-character code within AFTMS used to indicate the student's active-duty status (i.e., airman, officer, or civilian) and the travel funding status (i.e., AETC-funded, unit-funded, or non-TDY). (*NOTE*: The "N" funding status is usually used for NPS pipeline students, PCS-length schools 20 weeks or longer, or non-active-duty Air Force users). The codes are as follows:

1st Digit (Active-Duty Status	**2nd Digit** (Travel Funding Status)
A (airman)	**T** (AETC-funded)
O (officer)	**P** (unit-funded)
C (civilian)	**N** (non-TDY)

Resource Constraints. Resource deficiencies, such as money, facilities, time, manpower, and equipment that preclude desired training from being delivered.

Skills Training. A formal course that results in the award of a skill level.

Special Experience Indicator (SEI). A three-character code that identifies special experience and training not otherwise identified in the personnel data system. SEIs may permit rapid identification of individuals already experienced to meet assignment requirements. More importantly, they provide a means for identifying critical manning requirements during wartime or contingency operations when little lead time is available for training personnel in specific technical skills needed to support a weapon system or mission. SEIs are not substitutes for AFSCs, suffixes, prefixes, special duty identifiers, reporting identifiers, CEM codes, or professional specialty course codes. The AFOCD and AFECD list approved SEIs.

Specialty Training. The total training process used to qualify airmen in their assigned specialty.

Specialty Training Standard (STS). An Air Force publication (typically inserted as Part 2 of the CFETP) that describes an Air Force specialty in terms of tasks and knowledge that an airman in that specialty may be expected to perform or to know on the job. Also identifies the training provided to achieve a 3-, 5- or 7- skill level within an enlisted AFS. It further serves as a contract between AETC and the functional user to show which of the overall training requirements for an Air Force Specialty Code (AFSC) are taught in formal schools and correspondence courses.

Standard. Predetermined quality or quantity, against which performance skills and knowledge are measured. An exact value, a physical entity, or an abstract concept, the appropriate authority, custom, or common consent sets up and defines to serve as a reference, model, or rule in measuring quantities or qualities, developing practices or procedures or evaluating results. A fixed quantity or quality.

Task Certifier. See Certification Official.

Third Party Certification. It is an evaluation of completed training conducted by the task certifier and is only required when directed by the AFCFM.

Total Force. All collective Air Force components (active, reserve, guard, and civilian elements) of the United States Air Force.

Trainer. A trained and qualified person who teaches personnel to perform specific tasks through OJT methods. Also, equipment that the trainer uses to teach personnel specified tasks.

Training Capability. The ability of a unit or base to provide training. Authorities consider the availability of equipment, qualified trainers, study reference materials, and so on in determining a unit's training capability.

Training Session. Training that trainers conduct based on technical data for a maintenance task that existing courses could not support.

Training Setting. The type of forum in which training is provided (formal resident school, on-the-job, field training, mobile training team, self-study etc.).

Training Start Date. The date the member began receiving training.

Training Completion Date. Date trainer or task certifier completes task evaluations and determines trainee is qualified to perform the task.

Upgrade Training (UGT). Mandatory training which leads to attainment of higher level of proficiency.

Utilization and Training Workshop (U&TW). A forum of MAJCOM Air Force Specialty Code (AFSC) functional managers, Subject Matter Experts (SMEs), and AETC training personnel that determines career ladder training requirements.

Section A-General Information

1. Purpose. This CFETP provides information necessary for Air Force Career Field Managers (AFCFM), MAJCOM Functional CMSgts, MAJCOM Functional Managers (MFM), commanders, training managers, supervisors, trainers and certifiers to plan, develop, manage, and conduct an effective career field training program. This plan outlines the training individuals in AFSC 2S0XX should receive to develop and progress throughout their career. This plan identifies initial skills, upgrade, qualification, advanced, and proficiency training. In addition, the plan mandates specific functional contingency training required prior to deployment. Initial skills training is the AFS specific training an individual receives upon entry into the Air Force or upon retraining into this specialty for award of the 3-skill level. This training is conducted by AETC at Joint Base San Antonio (JBSA)-Lackland TX. Upgrade training identifies the mandatory courses, task qualification requirements, and correspondence course completion requirements for award of the 3, 5, 7, and 9-skill levels. Qualification training is actual hands-on task performance training designed to qualify an Airman in a specific duty position. This training program occurs both during and after the upgrade training process. It is designed to provide the performance skills/knowledge required

to do the job. Advanced training is formal specialty training used for selected Airmen. Proficiency training is additional training, either in-residence or exportable advanced training courses, or on-the-job training, provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade. Contingency training is a function of qualification training that readies Materiel Management Airmen to perform as prescribed by the unit type codes (UTC) and mission capability (MISCAP) statement. The CFETP has several purposes, some are:

1.1. Serves as a management tool to plan, manage, conduct, and evaluate a career field training program. In addition, it is used to help supervisors identify training at the appropriate point in an individual's career.

1.2. Identifies task and knowledge training requirements for each skill level in the specialty and recommends education/training throughout each phase of an individual's career.

1.3. Lists training courses available in the specialty, identifies sources of training, and the training delivery method.

1.4. Identifies major resource constraints that impact full implementation of the desired career field training process.

2. Use. The CFETP is used by the AFCFM, Materiel Management Functional Managers, CMSgts, and supervisors at all levels to ensure comprehensive and cohesive training programs are available for everyone in the Materiel Management specialty.

2.1. AETC training personnel will develop/revise formal resident, non-resident, field and exportable training based on requirements established by the users and documented in Part II of the CFETP. They will also work with the AFCFM to develop acquisition strategies for obtaining resources needed to provide the identified training.

2.2. Materiel Management Functional Managers will ensure their training programs complement the CFETP mandatory initial, upgrade, proficiency, and contingency requirements. Identified requirements can be satisfied by OJT, resident training, contract training, or exportable courses. MAJCOM-developed training to support this AFSC must be identified for inclusion into plan.

2.3. Everyone will complete the mandatory training requirements specified in this plan. The list of courses in Part II will be used as a reference to support training.

3. Coordination and Approval. HQ AF/A4LR as the AFCFM, is the approval authority. Functional Area Council (FAC) and AETC training personnel will identify and coordinate on the career field training requirements. The AFCFM will initiate an annual review of this document with the AETC Training Manager and the FAC to ensure currency and accuracy. The council will eliminate duplicate training using the list of courses in Part I

Section B-Career Field Progression Information

1. Specialty Description.

1.1. Directs materiel management activities involved in developing, operating, implementing and analyzing manual and automated integrated logistics systems. Manages item and monetary accounting, inventory control, financial planning and warehousing functions. Monitors and operates the Integrated Logistics Systems-Supply (ILS-S) and associated logistics system interfaces. When assigned to combat support or enabler organizations, they provide materiel management expertise as related to ILS-S processes, accountable officer, responsible officer, and responsible person obligations. Related DoD Occupational Subgroup: 155100.

2. Duties and Responsibilities:

2.1. Manages materiel management activities and systems involved in requirements determination, inventory control, storage and issues of supplies and equipment.

2.2. Computes requirements, determines allowance, and researches and identifies materiel requirements. Performs operations involved in storage, inspection, and identification of property.

2.3. Performs inventories and ensures timely correction of discrepancies. Inspects and evaluates inventory management activities.

2.4. Inspects and identifies property. Determines condition of property received. Performs shelf-life inspections of stock.

2.5. Develop methods and improve procedures for storing property. Plans for use of storage facilities. Stores, issues, ships, and transfers property. Controls issue of classified, sensitive, pilferable and controlled items.

2.6. Coordinates with maintenance activities on repairable component actions. Controls and issues bench stock property. Obtains material required for equipment modification, periodic component exchange and bills of material in support of maintenance. Accounts for all items contained in mobility readiness spares packages.

2.7. Provides materiel management expertise to combat support, enable organizations and responsible officers for the proper accounting and control of specified classes of supply. Reviews and validates requirements. When required, initiate follow-up actions on materiel requirements. Coordinates equipment transfers and deployment actions with the accountable officer. Serves as the base equipment review and authorization activity and manages base-level equipment items.

2.8. Plans and schedules for materiel storage and distribution activities.

2.9. Processes information retrievals using materiel management system databases. Manages materiel management related systems and hardware. Performs operator maintenance on materiel management related systems and hardware. Applies system security policy and procedures to prevent unauthorized changes to information. Distributes materiel management computer products.

2.10. Acts as subject matter expert to the commander on the operation of materiel management system and operations. Monitors Defense Data Network traffic through use of the Materiel Management Interface System. Ensures database integrity and makes necessary corrections.

2.11. Controls and operates the Remote Processing Station (RPS).

2.12. Monitors systems processing and corrects processing errors. Monitors materiel management traffic through use of Materiel Management Interface System and takes corrective action. Maintains liaison with the Standard Systems Group, MAJCOMs and the servicing Defense Mega centers, to identify and correct problems.

2.13. Develops database retrieval scripts for materiel management supply analysis.

2.14. Operates motor vehicles and assorted materiel handling equipment.

3. Competencies. The Air Force defines competencies as a combination of knowledge, skills, abilities, and other characteristics that manifest in observable and measurable patterns of behaviors required for mission success. The Materiel Management community has rebuilt the entire training platform by using competencies to identify the behaviors that are needed to be successful in the job. This has been accomplished by identifying and integrating the 2S0X1, Materiel Management Specialist occupational competencies and leveraging the Air Force's foundational competencies in a manner that provides all Airmen with transparent and unbiased pathways towards their own successful development.

3.1. Airmen's Foundational Competencies. The foundational competencies are a set of accepted and valued competencies, which enable success across a wide array of DAF missions, roles, functions, and duties. These competencies are the core of Airmen development and enable Airmen with tools, pathways, and capabilities to improve their performance in any job, specialty, or situation. The foundational competencies are grouped into different categories of Developing Self, Developing Others, Developing Ideas, and Developing Organization. Airmen can go to MyVector (accessible via AF Portal) to complete a self-assessment, which will have them evaluate themselves on the 23 Airmen's foundational competencies or a 360-degree assessment, where subordinates, peers, and leaders can also provide feedback. The assessment tools will provide Airmen with immediate feedback on personal strengths and areas for improvement. Additionally, a personal improvement plan with targeted resources (videos, reading content, developmental opportunities) are provided for continued self-development.

Figure 1. Airmen's Foundational Competencies.

3.2. Occupational Competencies. Occupational competencies are a set of competencies required of all Airmen within a specific workforce category. These competencies provide a framework that describes the knowledge, skills, abilities, and other characteristics needed to perform that function's mission successfully.

3.2.1. Occupational Competency Model. A career field's competencies can be viewed in a competency model, which is an organized collection of competencies pertinent to the career field. The occupational competency model provides a framework to effectively assess, maintain, and monitor the competencies required for mission success for Airmen within the Materiel Management community. The occupational competency modeling process follows a distinct process with continued involvement from the career field and allows Airmen to see how their task lists, OJT, formal courses, and other training, education, and experiences are aligned to the career field's strategic objectives.

3.2.2. Career fields work with trained competency experts to identify and develop their competency model, which consists of the competencies, sub-competencies, and definitions. Occupational competency models will be different for each career field. The model focuses on integrating not just the technical components, but also leadership, management, combat, joint, all-domain, and social mastery competencies required for Airmen to succeed in their career field.

Figure 2. 2S0X1, Materiel Management, Foundational Competencies

Competency	Sub-Competency	Sub-Competency Description
Compliance	Compliance	The evaluation and enforcement of policies and standards.
Organizational Management	Training	Acquiring, maintaining, and providing the skills and knowledge required for total force personnel to foster professional growth and organizational success.
	Personnel Management	The development and enhancement of capabilities in support of the assigned organization's mission.
	Resource Management	Provides responsible management of assigned resources, to include time, equipment, personnel, funds and/or facilities.
Materiel Management	Inventory	Procedures and processes that affect ordering, receiving, storing, tracking, and accounting for all goods in the applicable Department of Defense approved Accountable Property System of Record (APSR).
	Asset Management	Responsible for stocking, securing, inspecting, and issuing resources to ensure mission requirements are met.
Materiel Support	Maintenance Support	Acts as primary focal point providing materiel support to maintenance organizations.
	Customer Support	Provides supply support for base level organizations.
Supply Chain Operations	Supply Chain Operations	Provides enterprise level materiel support for warfighters around the globe.

3.2.3. Occupational Competency Rubric. After a model is developed, a team of subject matter experts begin building competency rubrics, which consists of the competency, a description of the competency, proficiency levels, and measurable and observable behaviors. The competency rubrics will help Airmen learn which behaviors are aligned to the career field's strategic direction, the professional developmental expectations, and the criteria for success. Figure 3 provides an example of a competency rubric for 2S0X1 career field.

Figure 3. 2S0X1, Materiel Management, Occupational Competency Rubric for Training

Competency	Proficiency Levels	Observable Behaviors
Organizational Management	***Expert*** Impact on: AF-level practices/within industry	- Creates life-cycle training requirements for career field development and enlisted career path - Advocates and coordinates across the enterprise and industry for developmental opportunities
Sub-Competency Training	***Advanced*** Impact on: Management decisions	- Advocates for advanced training resources, courses, and technology to increase capabilities to enhance mission execution - Develops new and/or modifies existing trainer and trainee guides to adhere to new policies and procedures
Description Acquiring, maintaining, and providing the skills and knowledge required for total force personnel to foster professional growth and organizational success.	***Intermediate*** Impact on: Specific workplace projects	- Assesses performance, acquires resources, and schedules time to enhance training in support of mission effectiveness - Utilizes individual training plans to conduct interviews and determine personnel training requirements - Develops, tracks, and reports local training tasks and deficiencies to meet requirements
Supporting Competencies Accountability Communication Develops People Leadership	***Basic*** Impact on: Specific workplace tasks	- Completes and applies formal and informal training to increase proficiencies - Updates system-of-record to document training and reflect individual proficiency level

3.2.4. To better understand how to read and utilize the competency rubric, a breakdown of each component is explained below in figure 4a-c.

Competency Organizational Management	←	The competency section states the competency group.
Sub-Competency Training	←	The sub-competency section states the narrower category that forms part of the competency group. **Note:** Some models may only consist of a competency and not include a sub-competency.
Description Acquiring, maintaining, and providing the skills and knowledge required for total force personnel to foster professional growth and organizational success.	←	The description section provides a statement that gives details about the sub-competency, enabling career field members to better understand how sub-competency relates to the AFS.
Supporting Competencies Accountability Communication Develops People Leadership	←	The supporting competencies section are supported-level competencies that are linked to the success of the sub-competency. These competencies lend themselves more toward areas like values, traits, and attitudes. These competencies were included as part of a larger survey that went out to the entire AFS; respondents were asked to rate the top supporting competencies they believe will attribute to higher successful performance within the sub-competency.

Figure 4a. Competency Rubric Section 1.

Proficiency Levels		
Expert Impact on: AF-level practices/within industry		The proficiency levels are broken into four parts: basic, intermediate, advanced, and expert. Under each proficiency level are predetermined criteria selected by a group of SMEs from your career field and validated by the career field. The criteria were used as the basis to develop observable behaviors. These criteria provide concrete parameters for the behaviors, which are consistent but progressive in nature as a member moves up the scale from basic to expert. Some of the criteria (e.g. depth of knowledge and consistency of application/complexity) allow an individual to become an expert through the experience gained in a particular job and over a period of time. For example, the person can quickly move up different proficiency levels while they are serving as a technician at a flight; they move quickly because they are exposed to a variety of situations. While other criteria (e.g. scope, impact, and reach of influence) require more of a hierarchical approach to gain the experience needed to progress through the competency levels. Moving through the proficiency levels may be difficult to do in certain jobs. For example, if scope at the expert level requires job integration with the AF-level, then the individual may have to be in a position where they can gain that experience (i.e. at HHQ, Wing, or an organization with far reaching capabilities).
Advanced Impact on: Management decisions		
Intermediate Impact on: Specific workplace projects		
Basic Impact on: Specific workplace tasks		

Figure 4b. Competency Rubric Section 2.

Observable Behaviors		
- Creates life-cycle training requirements for career field development and enlisted career path - Advocates and coordinates across the enterprise and industry for developmental opportunities		The observable behaviors are statements of what can be observed from an individual manifesting the competency at the respective competency level. They provide objective evidence that the individual possesses the competency level, and shows what effective performance looks like. The behaviors are written to be specific enough so they can be observable and lend themselves towards measurement.
- Advocates for advanced training resources, courses, and technology to increase capabilities to enhance mission execution - Develops new and/or modifies existing trainer and trainee guides to adhere to new policies and procedures		
- Assesses performance, acquires resources, and schedules time to enhance training in support of mission effectiveness - Utilizes individual training plans to conduct interviews and determine personnel training requirements - Develops, tracks, and reports local training tasks and deficiencies to meet requirements		
- Completes and applies formal and informal training to increase proficiencies - Updates system-of-record to document training and reflect individual proficiency level		

Figure 4c. Competency Rubric Section 3.

3.3. Another key component within the rubric is the supporting competencies section at the bottom left-hand corner. These are the top four supporting competencies that can help members excel and be successful in that particular sub-competency. Some of these supporting competencies are tied directly to the Airmen's Foundational Competencies, while others may be unique to the career field. Having these supporting competencies identified and linked to a career field's competency model can cultivate those underlying characteristics needed to succeed on the job. Leaders, supervisors, trainers, instructors, or mentors can now set members up for greater success by building these supporting competencies and placing their Airmen in situations where they can apply those strategies. All of these elements come together to ensure we can develop Airmen who are better prepared, present and future mission focused, and ready to succeed in any situation. Additionally, DAFMAN 36-2643, *Coaching and Mentoring Program*, has information on how competencies can be used when an established mentoring strategy is put into effect to foster and develop Airmen.

3.4. Competency Development. The intent of moving towards a competency-based system is to sharpen our Airmen's tactical expertise, operational competence, strategic vision, and joint proficiency to lead and execute the full spectrum of USAF missions. This occurs not in a classroom but on the job by combining education, training, and experiences to provide Airmen with a better developmental pathway as they move along their careers. Airmen are still required to complete specific training courses, core tasks, and other training requirements to attain a 3-, 5-, and 7-skill levels. Competency development allows Airmen to move beyond the minimum career field requirements and begin addressing developmental gaps and strengthening their capabilities. The information included within the competency model will allow members within the Avionics community to manage their professional growth and development by identifying their strengths and weaknesses against clear and objective behaviors within the competency model.

3.5. Below are the competency rubrics for the 2S0X1, Materiel Management Specialist, career field.

Figure 5a. 2S0X1, Materiel Management, Occupational Competency Rubric for Compliance.

Competency	Proficiency Levels	Observable Behaviors
Compliance	***Expert*** Depth of Knowledge: New practices/concepts and theories of all workplace elements; is a credible resource in this area	- Authors policy to standardize enterprise guidance - Integrates DoD and DAF policy into existing compliance-based programs and platforms - Develops and prioritizes inspection requirements to forecast evaluation schedules - Reviews evaluation data and deficiencies for trends, analysis, and reporting
Sub-Competency Compliance	***Advanced*** Depth of Knowledge: New practices of all workplace elements	- Tracks trends and develops courses of action to comply with prescribed guidance - Reviews inspection findings to assess organizational effectiveness
Description The evaluation and enforcement of policies and standards.	***Intermediate*** Depth of Knowledge: Established practices of all workplace elements	- Conducts inspections to ensure compliance with guidance - Documents inspection results and tracks findings to identify strengths or areas of improvement
Supporting Competencies Accountability Analytical Thinking Communication Develops People	***Basic*** Depth of Knowledge: Established practice with some workplace elements	- Interprets roles and responsibilities to comply with established guidance - Conducts self-inspections during operations to ensure compliance with guidance - Identifies and utilizes systems and processes (e.g., LEAP, DPAS, and ILS-S) to ensure mission success

Figure 5b. 2S0X1, Materiel Management, Occupational Competency Rubric for Training.

Competency	Proficiency Levels	Observable Behaviors
Organizational Management	***Expert*** Impact on: AF-level practices/within industry	- Creates life-cycle training requirements for career field development and enlisted career path - Advocates and coordinates across the enterprise and industry for developmental opportunities
Sub-Competency Training	***Advanced*** Impact on: Management decisions	- Advocates for advanced training resources, courses, and technology to increase capabilities to enhance mission execution - Develops new and/or modifies existing trainer and trainee guides to adhere to new policies and procedures
Description Acquiring, maintaining, and providing the skills and knowledge required for total force personnel to foster professional growth and organizational success.	***Intermediate*** Impact on: Specific workplace projects	- Assesses performance, acquires resources, and schedules time to enhance training in support of mission effectiveness - Utilizes individual training plans to conduct interviews and determine personnel training requirements - Develops, tracks, and reports local training tasks and deficiencies to meet requirements
Supporting Competencies Accountability Communication Develops People Leadership	***Basic*** Impact on: Specific workplace tasks	- Completes and applies formal and informal training to increase proficiencies - Updates system-of-record to document training and reflect individual proficiency level

Figure 5c. 2S0X1, Materiel Management, Occupational Competency Rubric for Personnel Management.

Competency	Proficiency Levels	Observable Behaviors
Organizational Management	***Expert*** Reach of Influence: MAJCOM/AF-Level/Industry	- Vectors personnel into key development and leadership positions to effectively manage the career field - Analyze talent pool-mission requirements to produce qualified personnel
Sub-Competency Personnel Management	***Advanced*** Reach of Influence: Wing/Institutional	- Encourages collaboration by fostering a culture of teamwork to generate new ideas for mission execution and process improvement - Develops and leverages opportunities for personal and professional advancement
Description The development and enhancement of capabilities in support of the assigned organization's mission.	***Intermediate*** Reach of Influence: Unit/Groups	- Evaluates performance of team members to achieve organizational success - Coaches personnel and provides tools to assist personal and professional development
Supporting Competencies Accountability Communication Decision Making Leadership	***Basic*** Reach of Influence: Individuals/workcenter	- Provides/receives feedback and/or counseling to improve individual performance - Conducts self and peer accountability to execute duties, instructions, and responsibilities - Makes decisions at the lowest level and elevates issues through the appropriate chain of command to maintain good order and discipline

Figure 5d. 2S0X1, Materiel Management, Occupational Competency Rubric for Resource Management.

Competency	Proficiency Levels	Observable Behaviors
Organizational Management	***Expert*** Impact on: AF-level practices/within industry	- Collaborates with internal and external agencies to determine proper authorizations, assignments, priorities, and projections - Guides innovation initiatives to develop logistics solutions - Develops end-strength and force development strategies while identifying risks to ensure health of the career field
Sub-Competency Resource Management	***Advanced*** Impact on: Management decisions	- Collaborates with multi-level leaders to resolve resource changes and shortfalls - Advocates for manpower, materials, and funding to mitigate mission deficiencies - Projects changes to the budget and petitions for resources to accomplish objectives
Description Provides responsible management of assigned resources, to include time, equipment, personnel, funds and/or facilities.	***Intermediate*** Impact on: Specific workplace projects	- Effectively manages assigned resources and coordinates with appropriate agencies to obtain mission essential resources - Elevates and provides justification to alleviate resource deficiencies
Supporting Competencies Analytical Thinking Communication Decision Making Resource Management	***Basic*** Impact on Specific workplace tasks	- Practices stewardship by responsibly managing resources - Utilize specific materials, equipment, personnel, and funding required to achieve objectives

Figure 5e. 2S0X1, Materiel Management, Occupational Competency Rubric for Inventory.

Competency	Proficiency Levels	Observable Behaviors
Materiel Management	***Expert*** Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency	- Brief Accountable Officer to inform on inventory health - Analyzes inventory metrics to determine enterprise trends
Sub-Competency Inventory	***Advanced*** Consistency of Application: Sustained application of competency over time in complex situations	- Reviews and evaluates Financial Improvement and Audit Readiness metrics by utilizing Accountable Property System of Record - Resolves floor-to-book/book-to-floor discrepancies to correct property records - Conducts root-cause analysis to enhance inventory accuracy
Description Procedures and processes that affect ordering, receiving, storing, tracking, and accounting for all goods in the applicable Department of Defense approved Accountable Property System of Record (APSR).	***Intermediate*** Consistency of Application: Sustained application of competency over time in a variety of situations	- Investigates and researches discrepancies to ensure proper accountability - Administers cyclic inventory schedules to prevent overdue item accountability
Supporting Competencies Accountability Analytical Thinking Communication Precision	***Basic*** Consistency of Application: Sustained application of competency over time	- Identifies and interprets cyclic inventories to update accountable systems (e.g., ILS-S, DPAS, ALIS) - Compiles inventory data using Accountable Property System of Record to be in compliance of DoD and enterprise policies

Figure 5f. 2S0X1, Materiel Management, Occupational Competency Rubric for Asset Management.

Competency	Proficiency Levels	Observable Behaviors
Materiel Management	***Expert*** Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency	- Teams with key partners and communicates readiness requirements to support taskings - Surveys innovative techniques to streamline continuous process improvement - Develops and implements guidance to support non-standard operations (e.g., crisis, contingency, or humanitarian operations)
Sub-Competency	***Advanced*** Consistency of Application: Sustained application of competency over time in complex situations	- Develops research methods to enforce proper corrective action procedures - Analyzes and requests authorization changes for assigned items affecting mission execution - Collaborates with organizations to streamline material movement to improve support
Asset Management		
Description	***Intermediate*** Consistency of Application: Sustained application of competency over time in a variety of situations	- Analyzes asset management reports and identify discrepancies to recommend corrective actions - Implements degraded operations procedures to prevent mission delays - Enforces prioritized movement and stockage procedures to meet order fulfillment objectives
Responsible for stocking, securing, inspecting, and issuing resources to ensure mission requirements are met.		
Supporting Competencies	***Basic*** Consistency of Application: Sustained application of competency over time	- Utilizes reports from applicable systems (e.g. ILS-S, BLADE) to perform job duties - Issues asset and fills customer orders to support mission requirements - Supports Care of Supply in Storage program to maintain asset and facility integrity - Inspects and operates materiel handling equipment in a safe and efficient manner to meet mission objectives
Accountability Analytical Thinking Communication Decision Making		

Figure 5g. 2S0X1, Materiel Management, Occupational Competency Rubric for Maintenance Support.

Competency	Proficiency Levels	Observable Behaviors
Materiel Support	***Expert*** Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency	- Analyzes data and trends to elevate limiting factors (e.g. RNEP, CPIs, etc.) - Develops guidance to foster standardization of maintenance support across the Air Force
Sub-Competency	***Advanced*** Consistency of Application: Sustained application of competency over time in complex situations	- Advises leadership of supply support problems to allow accurate scheduling of end-item downtime - Establishes program reconciliations (e.g., DIFM/RMA, Supply Points) to maintain compliance
Maintenance Support		
Description	***Intermediate*** Consistency of Application: Sustained application of competency over time in a variety of situations	- Monitors and updates reports and status codes to reflect real-time visibility on requisitions and repairable items - Oversees repair cycle program to ensure assets are returned to the supply chain
Acts as primary focal point providing materiel support to maintenance organizations.		
Supporting Competencies	***Basic*** Consistency of Application: Sustained application of competency over time	- Verifies physical property matches with corresponding documentation to prevent maintenance delays - Executes systematic functions within applicable automated data systems (e.g., ILS-S, ALIS, IMDS, G081) to ensure maintenance requests are processed - Monitors programs and conducts inventory on applicable stock locations (e.g., TNB/FOM, Bench Stock, PEB, TCTO/TCTD) to maintain asset accountability
Accountability Communication Decision Making Relationship Building		

Figure 5h. 2S0X1, Materiel Management, Occupational Competency Rubric for Customer Support.

Competency	Proficiency Levels	Observable Behaviors
Materiel Support	***Expert*** Impact on: AF-level practices/within industry	- Reviews and establishes organizational accounts for home station and temporarily-assigned units to accomplish mission requirements - Implements DoD and DAF equipment requirements by coordinating with MAJCOM Functional Managers and the Centralized Equipment Management Flight
Sub-Competency Customer Support	***Advanced*** Impact on: Management decisions	- Analyzes trends and implements courses of action to resolve challenges or discrepancies within a program - Develops and oversees degraded operations procedures to maintain mission objectives - Implements directives and manages program execution to support changes in equipment and asset requirements
Description Provides supply support for base level organizations.	***Intermediate*** Impact on: Specific workplace projects	- Manges supply accounts and liaises with Enterprise agencies to fulfill customer requirements - Audits installation customers and composes reports for Accountable Officer to ensure account integrity - Retains mandatory documentation for systems, programs, and appointments to comply with audit requirements
Supporting Competencies Analytical Thinking Communication Information Seeking Service Mindset	***Basic*** Impact on: Specific workplace tasks	- Monitors required reports and organizations accounts to sustain customer operations - Coordinates with customers to satisfy concerns - Processes transactions in applicable systems (e.g., DPAS, ILS-S) to meet customer needs

Figure 5i. 2S0X1, Materiel Management, Occupational Competency Rubric for Supply Chain Operations.

Competency	Proficiency Levels	Observable Behaviors
Supply Chain Operations	***Expert*** Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency	- Coordinates end-item sustainment for enterprise-level success based on holistic needs and constraints - Conceptualizes strategic-level goals for fleet sustainment and modernization to meet mission requirements - Establishes and implements system policies and procedures to maintain supply-chain integrity
Sub-Competency Supply Chain Operations	***Advanced*** Consistency of Application: Sustained application of competency over time in complex situations	- Analyzes data and identifies trends to forecast for future requirements - Briefs holistic constraints of the fleet to leadership to facilitate decision making - Reviews fleet constraints to facilitate crosstalk between organizations
Description Provides enterprise level materiel support for warfighters around the globe.	***Intermediate*** Consistency of Application: Sustained application of competency over time in a variety of situations	- Reviews and prioritizes customer objectives to balance day-to-day operations and urgent requirements - Research and relays information to stakeholders
Supporting Competencies Analytical Thinking Communication Decision Making Strategic Thinking	***Basic*** Consistency of Application: Sustained application of competency over time	- Manages and utilizes systems (e.g., ILS-S, DPAS) for fundamental transaction processing to meet user needs - Responds to warfighter requests by relaying requirements to the appropriate entity

4. Skill/Career Progression. Adequate training and timely progression from the apprentice to the superintendent skill level plays an important role in the Air Force's ability to accomplish its mission. It is essential that everyone involved in training do their part to plan, manage, and conduct an effective training program. The guidance provided in this part of the CFETP will ensure everyone receives viable training at appropriate points in their career.

4.1. Apprentice (3) Level. Initial skills training in this specialty consists of the tasks and knowledge training provided in the 3-skill level resident courses at JBSA -Lackland, TX. Upon completion of initial skills training, a trainee will work with a trainer to enhance their knowledge and skills. They will utilize the 5-level Career Development Course and Task Qualification to progress in the career field. During up-grade training to 5-skill level, 3-level assigned airmen should not be considered for deployment with limited exceptions. Once task certified, a trainee may perform the task unsupervised. Materiel Management trainees will be assigned to entry level Materiel Management positions. Knowledge gained while working in these entry level positions will provide for the basis of further growth in the Materiel Management career field.

4.2. Journeyman (5) Level. Journeymen are expected to build upon the skills learned as an apprentice through additional on-the-job training, completion of career development courses and certification on core tasks. Increased knowledge will prepare Journeymen to assume higher levels of responsibility within the Materiel Management career field.

4.3. Craftsman (7) Level. Craftsmen are expected to fill various supervisory and management positions such as shift NCOIC, supervisor, and task certifier. Craftsmen will be expected to analyze the various materiel management processes and employ problem-solving techniques to achieve resolution of problems. They must complete the appropriate career development courses and should pursue additional Supply Chain Management and leadership courses to obtain added knowledge on management of resources and personnel. Additionally, craftsmen must be certified on designated core tasks. Continued academic education through CCAF or associate's degrees and advanced training, is encouraged.

4.4. Superintendent (9) Level. Superintendents are expected to fill positions such as Superintendent, Section Chief, NCOIC and various NAF and MAJCOM staff positions. Additional training in the areas of budget, manpower, resources, and personnel management should be pursued through continuing education. The Logistics Readiness SNCO Course is highly recommended for 9-skill level award.

5. Training Decisions. The CFETP has undergone a considerable revision towards building a competency-based training and development platform for the Materiel Management career field. A significant change has been to shift the focus from task-based training to one that is more centered on outcomes-based learning. A task is a unit of work activity or operation which forms a significant part of a duty. These are singular in nature and are usually accomplished in one continuous action, which also can occur independently of other tasks. Conversely, outcomes are learning goals that typically consist of a multitude of tasks. These outcomes are actions and

performances that embody and reflect the learner's competence in using content, information, ideas, and tools successfully. Focusing on learning outcomes allow organizations, leaders, supervisors, and trainers to incorporate foundational competencies and underlying characteristics (values, traits, attitudes) into learning, which is necessary for developing Airmen with the competencies needed for future challenges. The following decisions were made because of close coordination between HQ AETC, Technical Training, schoolhouse instructors and staff, field SMEs, functional managers and the PW/STRT sought to develop the learning outcomes. This was accomplished by reverse engineering the behaviors found in the Avionics occupational competency model and then by asking what does an Airman need to able to know and do to master a specific behavior. The intent of the learning outcomes is to identify all factors needed to succeed in attaining the behavior. Formal training will be codified by using the behavioral statement coding system for the STS as opposed to the proficiency code key. As a result, each line item will consist of a verb and the coding system for formal training will only use P (performance), K (knowledge), and pk (performance-knowledge).

5.1. The CFETP uses a building block approach (simple to complex) to encompass the entire spectrum of training requirements for the Materiel Management career field. The spectrum includes a strategy for when, where, and how to meet the training requirements. The strategy must be apparent and affordable to reduce duplication of training and eliminate a disjointed approach to training. The following decisions were made by a career field STRT held at the AFSOC Conference Center, Fort Walton Beach, FL.

5.2. Initial Skills. Initial skills training provides 2S0XX trainees with knowledge and hands on experience in the entry level materiel management processes of storage, inventory, issue processing, research, MICAP, sourcing assets, repair cycle, deployment/contingency wartime support, stock control, equipment, document control, and turn-in processing. Additionally, trainees will receive training in reject management, interpreting inquiries, and basic computer processing techniques.

5.3. Five Level Upgrade Requirements. Upgrade to the 5-skill level will require completion of the 5-level CDCs and certification of all 5-level core tasks and supervisor recommendation. Core tasks are identified within this document and are the minimum number of tasks that an individual must be certified on for upgrade to a higher skill level. Core tasks are the foundational tasks all Materiel Management Airmen must be able to perform whether at home station or deployed. Supervisors may determine if additional tasks are required for upgrade training based on the Airmen's duty position. Do not delay individuals from upgrade to the next skill level when resources are a constraining factor, and the supervisor/commander correctly annotates the STS explaining the constraint. Contact the Force Support Squadron for skill-level upgrade waiver guidance and the proper procedures to document individual training records.

5.4. Seven Level Upgrade Requirements. Achieving a 7-level upgrade requires members to hold the rank of SSgt, completing CDCs, certification on 7-level core tasks, supervisor and commander recommendation. Airmen must also demonstrate practical knowledge, including detecting storage deficiencies, conducting surveillances, and enforcing shelf-life principles. Effective 1 September 2026, the Materiel Management Craftsman Course is a mandatory upgrade requirement. Overall, this training builds upon the 5-level foundation to develop highly capable Materiel Management Airmen ready for home station and deployed operations. **NOTE:** Skill-level waivers for the craftsman course will only be accepted on behalf of Air Force Reserve Command and

Air National Guard members unable to attend, no other skill level waivers will be accepted.

5.5. Nine Level Upgrade Requirements. 9-level upgrades require members to hold the rank of SMSgt.

5.6. Core Task Certification. All core tasks require third party certification. The certifier must be different than the trainer, attended DAF Training Course (DAFTC), be certified on the task being certified and possess a minimum of a 7-skill level.

6. Special Experience Identifiers (SEI):

SEI 009, Materiel Management Enlisted Career Broadening Program.

SEI 015, Special Technical Operations, requires completion of STO course and 6 months assigned to billet.

SEI 027, Remote Processing Systems Operations, is awarded upon completion and certification of specified Qualification Training Plan and 24 months of RPS experience.

SEI 126, Acquisition Logistics Level I, requires DAU Acquisition Logistics Level I certification.

SEI 127, Acquisition Logistics Level II, requires DAU Acquisition Logistics Level II certification.

SEI 128, Acquisition Logistics Level III, requires DAU Acquisition Logistics Level III certification.

SEI 326, Red Horse, requires 6 months of Red Horse experience and commander's recommendation.

SEI 359, Stock Fund Financial Management, requires completion of formal course and 6 months of experience.

SEI 839/863, Special Handling, requires (1) completion of Nuclear Weapons-Related Materiel (NWRM) training as identified by applicable Air Force Career Field Manager (AFCFM); (2) completion of other special handling training as identified by applicable AFCFM; (3) completion of duty position training as identified in individual training plan; (4) 6 months (120 duty days for ANG/AFRC) experience routinely (determined at commander's discretion) packaging, transporting, inspecting, and/or storing one or more of the following types of assets: NWRM, Classified (confidential, secret, and top secret), Communication Security (COMSEC), and weapons; (5) assignment to work centers who physically.

SEI 2BD, is used to identify airmen with F-35 JSF Autonomous Logistics Information System (ALIS)/Operational Data Integrated Network (ODIN) experience and is awarded

upon 5-skill level completion, six months of ALIS experience, and supervisor's recommendation.

SEI 2BU, is used to identify airmen with significant experience (expert) in F-35 JSF Autonomous Logistics Information System (ALIS)/Operational Data Integrated Network (ODIN) and is awarded upon completing the following: Required 2BD SEI (2) Certified as expert in F-35 JQS tasks (3) 18 months of consecutive F-35 experience (may include home-station, deployment, or mobilized time) (4) Supervisor recommendation, (5) Certifying Official/Commander or equivalent approval.

SEI Removal Criteria: Removal of an SEI requires MFM/CFM approval.

There are additional SEIs, but these are the primary codes used to identify key materiel management skill sets. To view all SEIs visit MyFSS.

7. Community College of the Air Force (CCAF).

7.1. The Air Force has always recognized the positive effects of education on Airmen and Guardians and continually established various programs to meet the needs of the Air Force, its personnel, and society. One of the most notable programs is the Community College of the Air Force (CCAF). The college is one of several federally chartered degree-granting institutions; however, it is the only 2-year institution exclusively serving enlisted personnel. The college awards the Associate of Applied Science (AAS) degree upon completing program of instruction within applicable discipline designed for an Air Force specialty. See the CCAF programs at https://www.airuniversity.af.edu/Barnes/CCAF/**.** CCAF is a part of Air University. Air University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award the associate, masters and doctoral degrees. The associate's degree from CCAF is awarded under the authority of Air University.

7.2. CCAF Degree Requirements. All enlisted airmen are automatically entered into the CCAF program. Prior to completing an associate degree, the 5-level must be awarded, and the following requirements must be met:

Table 7.1. CCAF Degree Requirements

Degree Programs

This section contains the CCAF's AAS degree program requirements. Degree programs are developed by Air and Space Force technical experts, civilian or military consultants and reviewed by the Dean of Academic Affairs, Associate Dean of Academic Programs, Commandant, Policy Council and Air University. CCAF AAS Degree Programs are developed for the *technical* disciplines of specific occupational specialties and designed to provide graduates with knowledge, skills and theoretical background for enhanced performance as technicians within the respective occupational specialty and noncommissioned officers.

Associate of Applied Science Degree

The Associate of Applied Science (AAS) degree is offered in the following broad career areas:

- Operations
- Logistics
- Medical
- Support

Degree Requirements

A student must complete all degree requirements before separating, retiring or becoming a commissioned officer.

The AAS degree consists of a minimum of 64 semester hours. Degree plan requirements are distributed as follows:

	Semester Hours
Technical Education	24
Leadership, Management & Military Studies	6
Physical Education	4
General Education	15
*Communication	6
*Written Communication	6
Or	
*Oral Communication	3
And	
*Written Communication	3
Mathematics	3
Social Science	3
Humanities	3
*Program Elective	15
Total	64

*Note: The Paralegal degree requires 18 semester hours of general education (addition of a 3-semester hour general education elective) and 12 semester hours of program elective. Oral Communication (Speech) is required.

*Note: Unless otherwise specified, students have the option to complete 6 semester hours of non-duplicative written communication or 3 semesters of written communication and 3 semester hours of oral communication.

Leadership, Management and Military Studies, Physical Education, General Education, and Program Elective requirements are standard for all programs. Exceptions may be required to satisfy specialized/programmatic accreditation or specific certification requirements.

Skill Level Requirement

A student must hold at least the Journeyman (5 skill- level) in the appropriate AFSC at time of degree completion. The exception to holding the Journeyman (5-skill level) level are students in a specialty that do not have the Journeyman (5-skill level) and Other Service faculty.

Institutional Credit Requirement (Residency)
(16 semester hours)

At least 25% of the credit hours required for the degree must be earned through formal instruction delivered by CCAF schools. Therefore, to graduate, the student must have at least 16 semester hours of CCAF institutional credit earned and applied. Note: Proficiency "P", Physical Education, Upgrade Training, Special Duty Qualification Training, and credentialing credit is not institutional credit.

Technical Education Requirement
(24 semester hours)

Twenty-four semester hours are required to fulfill the technical education requirement. Technical Core must be satisfied by institutional credit earned through formal instruction delivered by CCAF schools. At least nine semester hours of CCAF institutional credit must be applied in Technical Core. Technical Electives may be satisfied by CCAF credit or other sources in-transfer.

Table 7.2. Technical Education

Logistics
(1AMY)
CIP: 52.0203

Occupational Specialty 2F0X1, 2G0X1, 2S0X1, 4A1X1

Degree Requirements 64 semester hours. At least the Journeyman (5 skill-level) must be held at the time of graduation. A minimum of 16 semester hours of CCAF Institutional credit must be applied to graduate and can be fulfilled through technical education, LMMS, and/or Program Electives.

Technical Education (24 semester hours):
A minimum of nine (9) semester hours of CCAF institutional credit awarded from specialty-related formal training must be applied toward Technical Core subject requirements. Technical Electives may be satisfied by CCAF credit or other sources in-transfer.

Technical Core..... *Maximum Semester Hours*

Aerial Bulk Fuel Delivery	6
Airlift/Terminal Operations and Management	3
Automated Systems	6
Cryogenic Fundamentals	3
Deployment Planning & Procedures	3
Fuel Hydrant & Air Transport Systems	6
Fuels Analysis	3
Fuels Fundamentals	3
Fuels Systems Maintenance & Operations	6
Inventory Management	3
Liquid Oxygen Storage	3
Logistics Feasibility Analysis Capability	3
Logistics Maintenance Support	3
Logistics Management	3
Logistics Planning	8
Materiel Storage & Distribution	3
Medical Logistics Management	6
Medical Readiness	3
Operation of Fuel-Servicing Vehicles	3
Oxygen/Nitrogen Plant	3
Stock Control	3
Supply Management	3
War Reserve Material & Document Control	3

Technical Elective..... *Maximum Semester Hours*

Advanced Logistics Planning	3
CCAF Upgrade Training	15
College Algebra or Higher Math	3
Computer Science	6
Environmental Protection Procedures	3
General Chemistry	4
Hazardous Materials	3
Human Resource Certification Institute Certifications (HRCI)	6
Industrial Safety	3
Introduction to Petroleum Industry	3
Introduction to Transportation	3
Managerial Communications	3
Principles of Economics (Macro/Micro)	6
Project Management Institute Certifications	6
Quality Assurance	3
Principles of Accounting	6
Principles of Purchasing	3
Production/Operations Management	3
Specialty-Related Subjects In-Transfer	9

Leadership, Management & Military Studies
(6 semester hours): Professional military education, civilian management courses accepted in-transfer and/or by testing credit.

Physical Education (4 semester hours):

Program Elective (15 semester hours): Courses applying to technical education, LMMS or general education requirements; natural science courses meeting general education requirement application criteria; foreign language credit earned at Defense Language Institute; maximum 9 semester hours of CCAF degree-applicable technical course credit otherwise not applicable to program of registration.

General Education (15 semester hours): Applicable courses must meet the General Education Requirement (GER) subject criteria and in-transfer requirements.

Subjects/Courses..... Semester Hours

Communications	6
Written Communication (non-duplicative English Composition)	6
or	
Oral Communication (Speech)	3
and	
Written Communication (English Composition)	3
Mathematics	3
Social Science	3
Humanities	3

7.1. Air Force Credentialing Opportunities On-Line (AF COOL). AF COOL is a valuable resource for enlisted Airmen and Guardians. The AF COOL Program is managed by CCAF and provides a research tool designed to increase an enlisted Airman and Guardian's awareness of national professional credentialing and funding opportunities available for all Air Force enlisted

occupational specialties. AF COOL also provides information on specific occupational specialties, civilian occupational equivalencies, specialty-related national professional credentials, credentialing agencies, and professional organizations. AF COOL includes information such as:

7.1.1. Background information about civilian credentials, including eligibility requirements and resources to prepare for an exam.

7.1.2. Identify credentials relevant to an AFSC, Special Duty Identifier (SDI), and Reporting Identifier (RI).

7.1.3. Learn how to fill gaps between Air and Space Force training, experience, and civilian credentialing requirements.

7.1.4. Information on AF COOL funding opportunities to pay for credentialing coursework, textbooks, exams, associated fees, and recertification.

7.1.5. Resources available to enlisted Airmen and Guardians that can help them gain civilian job credentials. For information concerning national professional credentials applicable to specific occupational specialties, visit the AF COOL website at https://afvec.us.af.mil/afvec/af-cool. The AF COOL Program Office is the focal point for the AF COOL program and can be contacted at DSN 749-5115 or (334) 649-5115; or the AFVEC messenger application at https://afvec.us.af.mil/afvec/af-cool

7.2. CCAF Instructor Certification (CIC) Program. CCAF offers the CCAF Instructor Certification (CIC) Program for qualified faculty who teach CCAF collegiate-level credit-awarding courses at a CCAF off-campus instructional site. The CIC is a professional credential that recognizes the faculty member's extensive faculty development training, education, and qualification required to teach a CCAF course, and formally acknowledges the faculty member's practical teaching experience. The CIC Program is a three-level program consisting of three specific levels of achievement.

7.2.1. CIC-I: designed to formally recognize an individual as a qualified CCAF faculty and their professional accomplishment.

7.2.2. CIC-II: designed to formally recognize the faculty member’s advanced professional accomplishment beyond the CIC-I.

7.2.3. CIC-III: designed to formally recognize the faculty member’s advanced professional accomplishment beyond the CIC-II or Occupational Instructor Certification (OIC).

7.2.4. Eligibility: Qualified CCAF faculty who meet CIC Program requirements are eligible. Once faculty members leave CCAF faculty duty, they are no longer eligible for the CIC.

7.2.5. A qualified instructor is a CCAF faculty member who has completed the CCAF faculty development program and is assigned to a CCAF off-campus instructional site and teaching a CCAF course. The instructor may be an officer, enlisted, civil service, contractor, other-service, or foreign-service member.

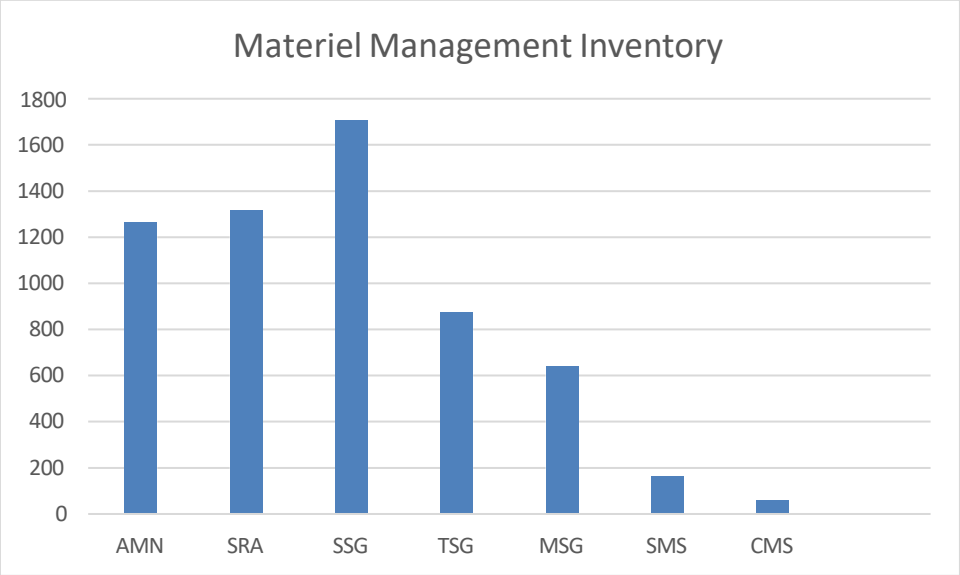

7.2.6. Instructor Assistants, Student Instructors, Guest Lecturers, Subject-Matter Experts, Speakers of Opportunity, approved EQILD instructors and instructors who do not teach a CCAF course are not eligible. The awarded CIC is recorded on the faculty member's official CCAF academic record and transcript.

7.2.7. The CIC Program replaced the CCAF Occupational Instructor Certification (OIC) Program, which officially closed on 1 January 2011. The CIC program is managed and administered by the CCAF Credentialing Programs Flight. To obtain more information and program procedures, refer to the CCAF Campus Affiliations Policies and Procedures Guidelines (PPG) or visit https://www.airuniversity.af.edu/barnes/ccaf or contact CCAF/DEAL at DSN 749-5020 / (334) 649-5020 or create a ticket at https://auservicedesk.af.edu/

7.3. CCAF Instructional Systems Development (ISD) Certification Program. CCAF offers the Instructional Systems Development (ISD) Certification for qualified course/curriculum developers, writers and managers who are formally assigned to an off-campus instructional site to develop/write and manage CCAF collegiate-level credit awarding courses. The ISD Certification is a professional credential that recognizes the course/curriculum developer/writer's or manager's extensive training, education, qualifications and experience required to develop/write and manage CCAF courses. The certification also recognizes the individual's ISD qualifications and experience in planning, developing, implementing and managing instructional systems. The program is designed to broaden faculty and professional development.

8. Career Field Path.

8.1. Control AFSC by Grade. The Materiel Management Inventory chart shown below illustrates the FY22 Enlisted Grade Allocation/Career Progression Group (CPG) for the specialty by grade.

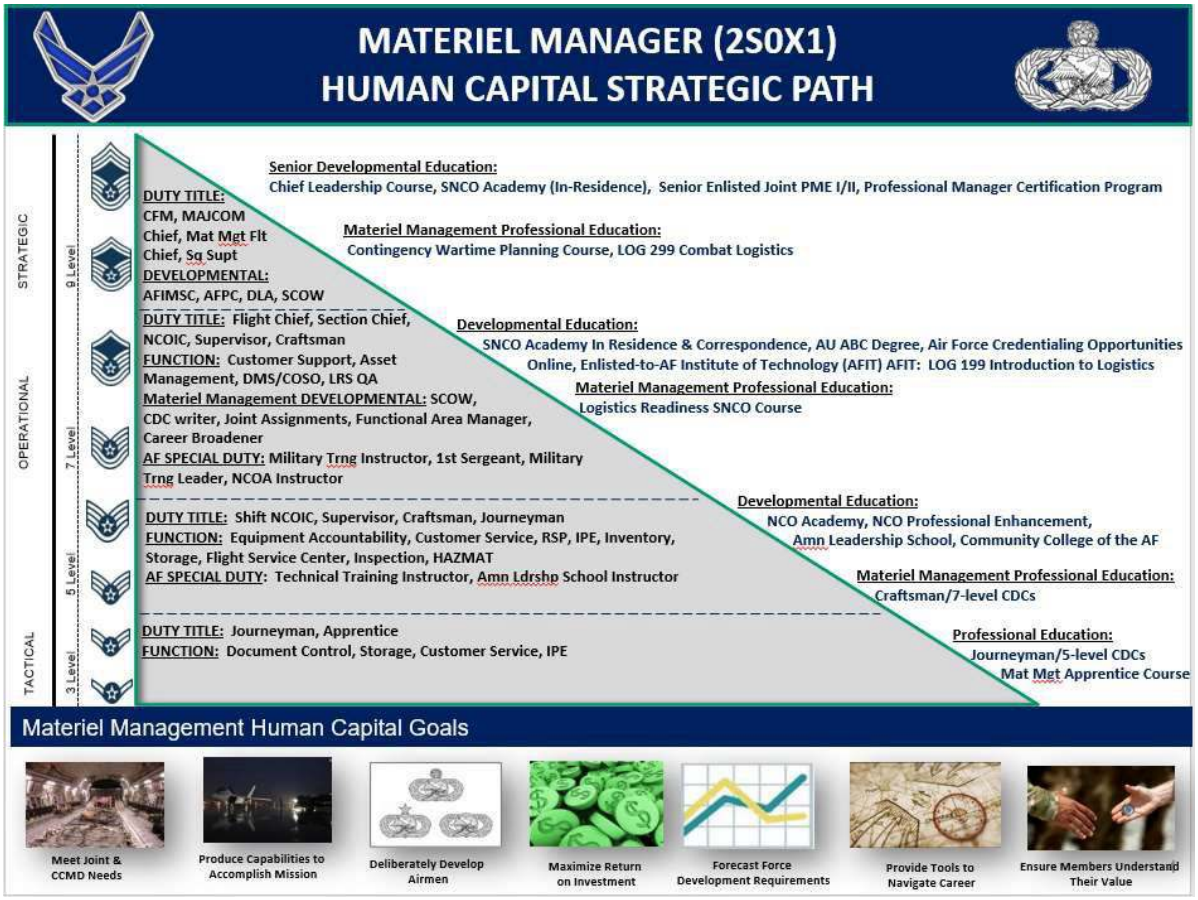

AMN	SRA	SSG	TSG	MSG	SMS	CMS	TOTAL
1263	1317	1704	875	641	162	58	6020

Chart 8.1. Control AFSC by Grade

8.2. Enlisted Career Path Pyramid. The enlisted Career Pyramid is a display of training education, and experience which enlisted Airmen will encounter throughout their career. It provides Airmen with an understanding of current and future opportunities for continuing development. For more detailed information log-on to the AF Portal and go to MyVector or by referencing AF Handbook 1.

Chart 8.2. Enlisted Career Path Pyramid

Section C-Skill Level Training Requirements

1. Purpose. Skill level training requirements in this career field are defined in terms of task and knowledge requirements. This section outlines the specialty qualification requirements for each skill level in broad, general terms and establishes the mandatory requirements for entry, award, and retention of each skill level. The specific task and knowledge training requirements are identified in the STS at Part II of this CFETP.

2. Specialty Qualification:

2.1. Apprentice Level Training: AFSC 2S031, Materiel Management Apprentice

2.1.1. **Knowledge.** Knowledge is mandatory of basic mathematics, materiel management policies and procedures, Air Force property accounting, stock and inventory control, accountability and responsibility, principles of property accounting through manual or automated data processing (ADP), storage methods, warehouse control (receipt, issue, and disposal), materiel handling techniques, methods of preparing and maintaining supply records, manual and automated supply accounting systems, logistics principles and interactions (supply, maintenance, transportation, and procurement), hazardous material and waste procedures; and deployment or contingency operations.

2.1.3. **Education.** For entry into this AFSC, completion of high is mandatory.

2.1.4. **Training.** For award of AFSC 2S031, completion of the basic Materiel Management Apprentice course is mandatory.

2.1.5. **Training Sources/Resources.** Completion of initial skills training, Materiel Management Apprentice course at JBSA Lackland, TX, satisfies the knowledge and training requirements specified in the Specialty Qualification section for award of the 3-skill level. The STS identifies all the knowledge and tasks, with their respective standards.

2.1.6. **Implementation.** The 3-skill level will be awarded upon successful completion of the Materiel Management Apprentice Course.

2.2. Journeyman Level Training: AFSC 2S051, Materiel Management Journeyman

2.2.1. **Knowledge.** Knowledge is mandatory of basic mathematics, materiel management policies and procedures, Air Force property accounting, stock and inventory control, accountability and responsibility, principles of property accounting through manual or automated data processing (ADP), storage methods, warehouse control (receipt, issue, and disposal), materiel handling techniques, methods of preparing and maintaining supply records, manual and automated supply accounting systems, logistics principles and interactions (supply, maintenance, transportation, and procurement), hazardous material and waste procedures; and deployment or contingency operations.

2.2.2. **Education.** For entry into this AFSC, completion of high school with a course in mathematics is mandatory.

2.2.3. **Training.** Completion of both 5-level CDCs and core tasks in the STS.

2.2.4. **Experience.** Qualification in and possession of AFSC 2S031. Experience is mandatory in functions such as preparing and maintaining documentation and records associated with inventory management actions; receipt, storage, and issue of property; conducting inventories; or configuration and operation of storage facilities.

2.2.5. **Training Sources/Resources.** CDC 2S051 provides the career knowledge training required. The current STS shows the tasks that are trained through CDC material. Continuation/qualification training and OJT are provided by qualified trainers.

2.2.6. **Implementation.** Entry into formal journeyman upgrade training is accomplished as soon as the individual is assigned to their first duty station.

2.3. Craftsman Level Training: AFSC 2S071, Materiel Management Craftsman

2.3.1. **Knowledge.** Knowledge is mandatory of basic mathematics, materiel management policies and procedures, Air Force property accounting, stock and inventory control, accountability and responsibility, principles of property accounting through manual or automated data processing (ADP), storage methods, warehouse control (receipt, issue, and disposal), materiel handling techniques, methods of preparing and maintaining supply records, manual and automated supply accounting systems, logistics principles and interactions (supply, maintenance, transportation, and procurement), hazardous material and waste procedures; and deployment or contingency operations.

2.3.2. **Education.** Continued education in logistics management is desirable.

2.3.3. **Training.** Completion of 7-level CDCs and core tasks in the STS.

2.3.4. **Experience.** Qualification in, and possession of AFSC 2S051. Experience is mandatory in performing or supervising functions such as establishing and maintaining reporting and management procedures for stock consumption, receipt, storage, and issue of property, conducting inventories, analyzing trends in stockage policy and customer support, and supervising storage facilities

2.3.5. **Training Sources/Resources.** The STS identifies all the core tasks required for qualifications. Continuation/qualification training and OJT are provided by qualified trainers.

2.3.6. **Implementation.** Entry into OJT is initiated on the first day of the promotion cycle upon being selected to the rank of SSgt. Individuals must also possess a 5-skill level. Trainees must be certified on all core tasks.

2.4. Superintendent Level Training: AFSC 2S091, Materiel Management Superintendent

2.4.1. **Knowledge.** Knowledge is mandatory of basic mathematics, materiel management policies and procedures, Air Force property accounting, stock and inventory control, accountability and responsibility, principles of property accounting through manual or automated data processing (ADP), storage methods, warehouse control (receipt, issue, and disposal), materiel handling techniques, methods of preparing and maintaining supply records, manual and automated supply accounting systems, logistics principles and interactions (supply, maintenance, transportation, and procurement), hazardous material and waste procedures; and deployment or contingency operations.

2.4.2. **Education.** Continued education in logistics management is desirable.

2.4.3. **Training.** SMSgts are awarded the 9-skill level upon promotion.

2.4.4. **Experience.** For award of AFSC 2S091, qualification in and possession of AFSC 2S071 is mandatory.

2.4.4.1. **Training Sources/Resources.** The Logistics Readiness SNCO Course will also provide increased knowledge of the entire Logistics Readiness enterprise, ensuring each Materiel Management SNCO is better prepared to serve in a superintendent or other strategic-level logistics readiness position.

2.4.5. **Implementation.** Entry into OJT is initiated when an individual possesses the 7-skill level and is a SMSgt selectee.

2.5. Education. For entry into this AFSC, completion of high school is mandatory with a course in mathematics is desirable.

2.5.1. **Training.** For the award of AFSC 2S031, completion of a basic materiel management course is mandatory.

2.5.2. **Experience.** The following experience is mandatory for award of the AFSC indicated:

2.5.3. **2S051.** Qualification in and possession of AFSC 2S031. Also, experience is mandatory in preparing and maintaining documentation and records associated with materiel management.

2.5.4. **2S071.** Qualification in and possession of AFSC 2S051. Also, experience is mandatory supervising storage facilities, analyzing trends in stockage policy and customer support, and operating contingency processing functions.

2.5.5. **2S091.** Qualification in and possession of AFSC 2S071. Also, experience is mandatory managing functions such as computing stock control levels, receiving, storing, and issuing property.

2.5.6. **Other.** The following are mandatory as indicated:

2.5.6.1. For award and retention of these AFSCs, members must maintain local network access IAW AFI 17- 130, Cybersecurity Program Management and DAFMAN 17-1301, Computer Security.

Section D-Resource Constraints

1. Purpose. This section identifies known resource constraints which preclude optimal/desired training from being developed or conducted, including information such as cost and manpower. Narrative explanations of each resource constraint and an impact statement describing what effect each constraint has on training are included. Also included in this section are actions required, office of primary responsibility, and target completion dates. Unit should utilize nearest AF/ANG/AFRES

installation to accomplish any training requirements that cannot be accomplished at home station. Resource constraints will be, as a minimum, reviewed and updated annually.

1.1 Apprentice Level Training. There are no known constraints.

1.2. Journeyman Level Training. There are no known constraints.

1.3. Craftsman-Level Training. There are no known constraints.

1.4. Superintendent-Level Training. There are no known constraints

Section E-Transitional Training Guide:

There are currently no transitional training requirements. This area is reserved.

2. Part II identifies nine (9) sub-competencies. Each competency is further broken down into the following proficiency levels; basic, intermediate, advanced, and expert. The proficiency levels are not tied to a specific rank or position. Additionally, each occupational competency has supporting competencies tied to them. The supporting competencies can allow Airmen to intentionally develop those transferrable underlying characteristics that will translate to mission capabilities, mission readiness, and mission success for the agile, future thinking Airmen. Airmen, supervisors, trainers, mentors, and leaders should look for opportunities to integrate the supporting competencies into every facet of an Airmen's development as they seek to gain and increase proficiency within the 2S0X1 competencies.

Part II

Section A-Specialty Training Standard

1. **Implementation.** The implementation of this STS for technical training will begin with the 2S031 course provided by Air Education and Training Command.

2. **Purpose**

2.1. Column 1 (Task, Knowledge and Technical References) the most common tasks, knowledge, and technical references (TR) necessary for airman to perform duties in the 3, 5, and 7-skill level. Columns 2 and 3 identifies the core tasks that must be certified for upgrade to the next higher skill level. These are the minimum core tasks; supervisors may assign additional core tasks, as deemed appropriate, that must be certified for upgrade to the next higher skill level. When resources (training expertise, equipment, etc.) are not available to certify an individual on a core task, the Commander will annotate the STS stating that resources are not available. Upgrade training will not be denied to individuals who, through lack of resources, cannot be core task certified. However, every attempt to obtain the training through contractors, ANG, AFRC, etc. must be exhausted before core task waiver requests are submitted for approval. (NO SKILL LEVEL WAIVERS WILL BE GIVEN FOR 7 SKILL LEVEL). Contact the Military Personnel Flight for guidance and the proper procedures to annotate the individuals training record when core task training cannot be accomplished. Materiel management personnel in outside units, i.e., maintenance, civil engineers, etc., will not use this document exclusively when they are supported by a materiel management account. Rather, the host LRS Training Section will be contacted for assistance. Columns 4-7 lists 3, 5, 7 skill level training proficiency codes. Column 8-11 are the administrative area for training start/stop dates, trainer, trainee and certifier initials.

2.2. Qualitative Requirements. Attachment 2 contains the proficiency code key used to indicate the level of training and knowledge provided by resident training, career development courses, and web-based training course, once developed/fielded.

2.3. Attachments 1-3 become a job qualification standard (JQS) for on-the-job training when placed in AF Form 623, On-The-Job Training Record, and IAW DAFMAN 36-2689. When used as a JQS, the following requirements apply:

2.4. Documentation. Document and certify completion of training. Identify duty position requirements by circling the subparagraph number next to the task statement. As a minimum, complete the following columns in Part 2 of the CFETP: Training start date, Training Completed date, Trainee Initials, Trainer Initials, and Certifier Initials. An AFJQS may be used in lieu of Part II of the CFETP only upon approval of the AFCFM.
NOTE: The AFCFM may supplement these minimum documentation procedures as needed or deemed necessary for their career field.

2.4.1. Converting from Old Document to CFETP. Use the new CFETP to identify and certify all past and current task qualifications. Transcribe qualifications in the following manner: For those tasks previously certified and required in the current duty position, evaluate current qualifications and, when verified, recertify using current date as completion date and enter trainee and supervisor's initials. When transcribing previous certification for tasks not required in the current duty position, carry forward only the previous completion date of certification (not the initials of another person). If and when transcribed tasks become duty position requirements, recertify using standard certification procedures. The person whose initials appear in the trainer or certifier block during the transcription process must meet the requirements of their respective roles. Upon completion of the transcription process, give the old CFETP to the member.

2.4.2. Documenting Career Knowledge. When a CDC is not available: the supervisor identifies STS training references that the trainee requires for career knowledge and ensures, as a minimum, that trainees cover the mandatory items in DAFECD. For two-time CDC course exam failures: supervisors identify all STS items corresponding to the areas covered by the CDC. The trainee completes a study of STS references, undergoes evaluation by the task certifier receives certification on the STS if approved by the applicable approval authority. ***NOTE:*** Career Knowledge must be documented prior to submitting a CDC waiver.

2.4.3. Decertification and Recertification. When an Airman is found to be unqualified on a task previously certified for his or her position, the supervisor lines through the previous certification or deletes previous certification when using automated systems. Appropriate remarks are entered on the AF Form 623A, On-The- Job Training Record Continuation Sheet, as to the reason for decertification. The individual is recertified (if required) by both erasing the old entries and writing in the new or by using correction fluid (if the entries were made in ink) over the previously certified entry.

2.5. Training Standard. Tasks are trained and qualified to the go/no go level. Go means the individual can perform the task without assistance, meet local demands for accuracy, timeliness, and correct use of procedures.

2.6. Application. This STS applies to the training of the Total Force. Unit Commanders of

non-LRS units with materiel management personnel assigned coordinate training needs through the host LRS Training Section or respective MAJCOM Functional Manager if there is no LRS on the base. This will ensure qualified trainers/certifiers are available and training is accomplished on all core tasks. Waiver authority for core task certification is the AFCFM.

2.7. Training Business Area 2.0 (TBA 2.0)/Total Force Training Record (TFTR) is the preferred method for tracking and documenting training for the Materiel Management career field.

2.7.1. The CFETP is now formatted for TBA 2.0 to track training for new enrollments. Members completing training under the 16 June 2023 CFETP should use manual documentation or TBA 2.0.

2.7.2. Paper copies of the CFETP in combination with DAF Form 623A may be used if access to TBA 2.0 is an issue for units and should not prevent mandated training from occurring.

2.8. The Training Standard is a guide for development of promotion tests used in the Weighted Airman Promotion System (WAPS). Specialty Knowledge Tests (SKTs) are developed at the Airman Advancement Division by senior NCOs with extensive practical experience in their career fields. The tests sample knowledge of STS subject matter areas judged by test development team members as most appropriate for promotion to higher grades. Questions are based upon study references listed in the WAPS catalog. WAPS is not applicable to the Air National Guard or the Air Force Reserve.

3. Recommendations. Comments and recommendations are invited concerning quality of AETC training. Reference specific STS paragraphs and address correspondence regarding changes to 37 TRG/DOS, 1220 Truemper Street, Suite 1, JBSA-Lackland, TX 78236-5568. A customer service information line has been installed for the supervisor's convenience to identify graduates who may have received over or under training on task/knowledge items listed in this specialty training standard. For quick responses to problems, call our customer service information line, DSN 473-2917 any time day or night.

BY ORDER OF THE SECRETARY OF THE AIR FORCE OFFICIAL

ELIZABETH E. ARLEDGE, Maj Gen, USAF
Director of Logistics DCS/Logistics, Engineering & Force Protection

QUALITATIVE REQUIREMENTS	
Behavioral Statement STS Coding System	
Code	**Definition**
K	Subject Knowledge Training - The verb selection identifies the individual's ability to identify facts, state principles, analyze or evaluate the subject.
P	Performance Training - Identifies that the individual has performed the task to the satisfaction of the course; however, the individual may not be capable of meeting the field requirements for speed and accuracy.
pk	Performance Knowledge Training - The verb selection identifies the individual's ability to relate simple facts, procedures, operating principles, and operational theory for the task.
-	No training provided in the course or CDC.
X	Training is required but not provided due to limitations in resources.

Explanations

The asterisk symbol (*) is used in column 4 to indicate a deployment and CBRN requirement.

The plus symbol (+) is used in column 4 to indicate a SEI requirement.

NOTES:

- The Behavior Matches are listed in Column 2. The behavior match connects each training requirement to specific behaviors from the occupational competency model.
- All learning outcome items shown with a behavioral code are trained during war time.
- Column 2 lists Core tasks, when this includes the numbers 5 or 7 this task/outcome is a requirement for 5-skill level or 7-skill level upgrades, respectively.

1. COMPLIANCE												
1.1. COMPLIANCE **Description:** The evaluation and enforcement of policies and standards. **Supporting Competencies:** *Accountability, Analytical Thinking, Communication, Develops People* **Training Reference (TR):** *DoDI 4140.01, DoDM 4140.70, DoDM 4140.27, DoDM 4140.65, DoDI 5000.64, DAFMAN 23-300*												
1.1.1. COMPLIANCE (Basic) **Required Behaviors:** 1. Interprets roles and responsibilities to comply with established guidance 2. Conducts self-inspections during operations to ensure compliance with guidance 3. Identifies and utilizes systems and processes (e.g., LEAP, ELMS, EESOH-MIS, BLADE, and ILS-S) to ensure mission success **Criteria:** *Depth of Knowledge: Established practice with some workplace elements*												
1.1.1.1. Interpret and use Materiel Management guide/regulations	1	5							pk			pk
1.1.1.2. Identify work tasks from regulations	1											
1.1.1.3. Identify, classify, process, and store Health Hazard Items, Petroleum, Oil, and Lubricants (POL), and compressed gas cylinders.	1								P			
1.1.1.4. Locate, interpret, and accurately apply guidance from Safety Data Sheets (SDS)	1								P			
1.1.1.5. Use prescribed tasks to perform self-inspections	2											
1.1.1.6. Correct deficiencies according to regulations	2								P			
1.1.1.7. Communicate issues/discrepancies with supervision	3											
1.1.1.8. Utilize appropriate system to execute processes IAW regulation	3								P			
1.1.2. COMPLIANCE (Intermediate) **Required Behaviors:** 1. Conducts inspections to ensure compliance with guidance 2. Documents inspection results and tracks findings to identify strengths or areas of improvement **Criteria:** *Depth of Knowledge: Established practices of all workplace elements*												
1.1.2.1. Utilize guidance/regulations to execute inspections	1	5								K		
1.1.2.2. Analyze performance trends	1											
1.1.2.3. Utilize tracking tool to manage findings (e.g. MICT, IGEMS)	2											
1.1.2.4. Create local checklist	2											
1.1.2.5. Identify requirements for supplemental guidance	2											
1.1.3. COMPLIANCE (Advanced) **Required Behaviors:** 1. Tracks trends and develops courses of action to comply with prescribed guidance 2. Reviews inspection findings to assess organizational effectiveness **Criteria:** *Depth of Knowledge: New practices of all workplace elements*												
1.1.3.1. Assign program managers	1											
1.1.3.2. Resolve and/or elevate discrepancies	1											
1.1.3.3. Correct negative trends	2											
1.1.3.4. Identify best practices	2											
1.1.3.5. Review checklist for accuracy	2											
1.1.4. COMPLIANCE (Expert) **Required Behaviors:** 1. Authors policy to standardize enterprise guidance 2. Integrates DoD and DAF policy into existing compliance-based programs and platforms 3. Develops and prioritizes inspection requirements to forecast evaluation schedules 4. Reviews and evaluates data and deficiencies for trends, analysis, and reporting **Criteria:** *Depth of Knowledge: New practices/concepts and theories of all workplace elements; is a credible resource in this area*												
.1.4.1. Develop new lines of effort according to trends and analysis	1											
1.1.4.2. Perform policy adjudication	1											
1.1.4.3. Establish supplemental guidance to current policies	2											
1.1.4.4. Communicate trends and analysis to applicable staff agencies	2										P	pk
1.1.4.5. Create enterprise checklist items	3											
1.1.4.6. Publish evaluation schedule	3											
1.1.4.7. Approve and coordinate CAP	4											K
1.1.4.8. Uses inspection systems to analyze metrics (e.g., LEAP, IGEMS, MICT)	4											

		2. Tasks		3. Certification For OJT					4. Behavioral Codes Used to Indicate Formal Training/Information Provided via ICW and/or course			
1. Competencies, Behaviors, Outcomes, and Technical References (TRs)	**Behavior Match**	**Core/Cert ^**	**Deployment * / SEI + CBRN ~**	**Tng Start**	**Tng Complete**	**Trainee Initials**	**Trainer Initials**	**Certifier Initials**	**3-lvl**	**5-lvl CDC**	**7-lvl Course**	**7-lvl CDC**
2. ORGANIZATIONAL MANAGEMENT												
2.1. TRAINING **Description:** Acquiring, maintaining, and providing the skills and knowledge required for total force personnel to foster professional growth and organizational success. **Supporting Competencies:** *Communication, Relationship Building, Decision Making, Initiative* **Training Reference (TR):** *DoDI 4140.01, DoDM 4140.70, DoDM 4140.27, DoDM 4140.65, DoDI 5000.64, DAFMAN 23-300*												
2.1.1. TRAINING (Basic) **Required Behaviors:** 1. Completes and applies formal and informal training to increase proficiencies 2. Updates system-of-record to document training and reflect individual proficiency level **Criteria:** *Impact on: Specific workplace tasks*												
2.1.1.1. Complete upgrade and on the job training	1											
2.1.1.2. Interpret Individual Training Plans (ITPs) detailing required training and timelines.	1											
2.1.1.3. Demonstrate proficiency in core tasks	1											
2.1.1.4. Document training progress	2											
2.1.1.5. Attend job specific training required to perform duties. (i.e., vehicle training, pallet buildup, material handling equipment training)	2											
2.1.2. TRAINING (Intermediate) **Required Behaviors:** 1. Assesses performance, acquires resources, and schedules time to enhance training in support of mission effectiveness 2. Utilizes individual training plans to conduct interviews and determine personnel training requirements 3. Develops, tracks, and reports local training tasks and deficiencies to meet requirements **Criteria:** *Impact on: Specific workplace projects*												
2.1.2.1. Determine the resources required for training needs	1											
2.1.2.2. Secure funding through appropriate channels	1											
2.1.2.3. Teach proper communications etiquette (e.g., phone, email, etc.) to enhance customer interactions	1											
2.1.2.4. Develop and maintain ITPs	2											
2.1.2.5. Utilize feedback from supervisors, peers, and self-assessments	2											
2.1.2.6. Validate training records	3											
2.1.2.7. Develop scenario based training to address deficiencies	3											
2.1.3. TRAINING (Advanced) **Required Behaviors:** 1. Advocates for (Advanced) training resources, courses, and technology to increase capabilities to enhance mission execution 2. Develops new and/or modifies existing trainer and trainee guides to adhere to new policies and procedures **Criteria:** *Impact on: Management decisions*												
2.1.3.1. Identify training gaps	1											
2.1.3.2. Request funding for specialized training	1											
2.1.3.3. Conduct comprehensive self assessments	2											
2.1.3.4. Anticipate future mission needs and emerging technologies	2											
2.1.3.5. Analyze the impact of new policies and procedures	2											
2.1.4. TRAINING (Expert) **Required Behaviors:** 1. Creates life-cycle training requirements for career field development and enlisted career path 2. Advocates and coordinates across the enterprise and industry for developmental opportunities **Criteria:** *Impact on: AF-level practices/within industry*												
2.1.4.1. Conduct training needs assessment	1											
2.1.4.2. Identify key skills, knowledge areas, and competencies required incorporating feedback from the career field.	1											
2.1.4.3. Establish partnerships with educational institutions, industry experts, and services	2											
2.1.4.4. Allocate resources for developmental opportunities	2											
2.1.4.5. Establish feedback mechanism with operational units and training institutions	2											

		2. Tasks		3. Certification For OJT					4. Behavioral Codes Used to Indicate Formal Training/Information Provided via ICW and/or course			
1. Competencies, Behaviors, Outcomes, and Technical References (TRs)	**Behavior Match**	**Core/Cert ^**	**Deployment * / SEI + CBRN ~**	**Trng Start**	**Trng Complete**	**Trainee Initials**	**Trainer Initials**	**Certifier Initials**	**3-lvl**	**5-lvl CDC**	**7-lvl Course**	**7-lvl CDC**
2.2. PERSONNEL MANAGEMENT **Description:** The development and enhancement of capabilities in support of the assigned organization's mission. **Supporting Competencies:** *Accountability, Communication, Decision Making, Leadership* **Training Reference (TR):** *DoDI 4140.01, DoDM 4140.70, DoDM 4140.27, DoDM 4140.65, DoDI 5000.64, DAFMAN 23-300*												
2.2.1. PERSONNEL MANAGEMENT (Basic) **Required Behaviors:** 1. Provides/receives feedback and/or counseling to improve individual performance 2. Conducts self and peer accountability to execute duties, instructions, and responsibilities 3. Makes decisions at the lowest level and elevates issues through the appropriate chain of command to maintain good order and discipline. Demonstrate the ability to make informed decisions within the scope of one's role and responsibilities **Criteria: Impact on:** *Reach of Influence: Individuals/work center*												
2.2.1.1. Execute counseling and feedback	1											
2.2.1.2. Encourage team members to engage in peer feedback	1											
2.2.1.3. Develop interpersonal skills	1											
2.2.1.4. Comply with instructions, handbooks, or manuals	2								K	K		
2.2.1.5. Identify and execute Enlisted Force Structure	2											
2.2.1.6. Identify and execute A Profession of Arms: Our Core Values	2											
2.2.1.7. Identify and execute The Joint Team	2											
2.2.1.8. Report any significant issues or challenges to supervisors	3											
2.2.2. PERSONNEL MANAGEMENT (Intermediate) **Required Behaviors:** 1. Evaluates performance of team members to achieve organizational success 2. Coaches personnel and provides tools to assist personal and professional development **Criteria:** *Reach of Influence: Unit/Groups*												
2.2.2.1. Maintain and execute performance reporting cycle	1											
2.2.2.2. Defines duty requirements and sets performance expectations	1											
2.2.2.3. Align unit performance goals with the strategic objectives	1											
2.2.2.4. Identify unit readiness assessments and reporting	1										K	K
2.2.2.5. Provide leadership opportunities	2											
2.2.2.6. Identify and communicate special development opportunities	2											
2.2.3. PERSONNEL MANAGEMENT (Advanced) **Required Behaviors:** 1. Encourages collaboration by fostering a culture of teamwork to generate new ideas for mission execution and process improvement 2. Develops and leverages opportunities for personal and professional advancement **Criteria:** *Reach of Influence: Wing/Institutional*												
2.2.3.1. Design and implement strategies to foster a culture of teamwork and innovation	1											
2.2.3.2. Assess unit effectiveness	1											
2.2.3.3. Innovates and refines programs	1											
2.2.3.4. Recommend members for vectoring opportunities	2											
2.2.3.5. Utilize talent management process	2											
2.2.3.6. Provide developmental feedback	2											
2.2.4. PERSONNEL MANAGEMENT (Expert) **Required Behaviors:** 1. Vectors personnel into key development and leadership positions to effectively manage the career field 2. Analyze talent pool-mission requirements to produce qualified personnel **Criteria:** *Reach of Influence: MAJCOM/AF-Level/Industry*												
2.2.4.1. Establish career development pathways for advancement	1											
2.2.4.2. Provide EDT board feedback	1											
2.2.4.3. Manage Career Broadening Program	1											
2.2.4.4. Approve career field releases	1											
2.2.4.5. Analyze manpower authorizations	1											
2.2.4.6. Provide training opportunities to satisfy emerging requirements	2											
2.2.4.7. Chair/participate in enterprise working groups	2											

		2. Tasks		3. Certification For OJT					4. Behavioral Codes Used to Indicate Formal Training/Information Provided via ICW and/or course			
1. Competencies, Behaviors, Outcomes, and Technical References (TRs)	**Behavior Match**	**Core/Cert ^**	**Deployment * / SEI + CBRN~**	**Trg Start**	**Trg Complete**	**Trainee Initials**	**Trainer Initials**	**Certifier Initials**	**3-lvl**	**5-lvl CDC**	**7-lvl Course**	**7-lvl CDC**
2.3.1. RESOURCE MANAGEMENT **Description:** Provides responsible management of assigned resources, to include time, equipment, personnel, funds and/or facilities. **Supporting Competencies:** *Analytical Thinking, Communication, Decision Making, Resource Management* **Training Reference (TR):** *DoDI 4140.01, DoDM 4140.70, DoDM 4140.27, DoDM 4140.65, DoDI 5000.64, DAFMAN 23-300*												
2.3.1. RESOURCE MANAGEMENT (Basic) **Required Behaviors:** 1. Practices stewardship by responsibly managing resources 2. Utilize specific materials, equipment, personnel, and funding required to achieve objectives **Criteria:** *Impact on: Specific workplace tasks*												
2.3.1.1. Maintain work center(s) and equipment utilized	1											
2.3.1.2. Adhere to all safety requirements	1								K	K		
2.3.1.3. Complete all assigned tasks within defined timeframe(s)	1											
2.3.1.4. Communicate work center needs	2											
2.3.1.5. Utilize assigned Materiel Handling Equipment (MHE)	2	5	*						K			
2.3.2. RESOURCE MANAGEMENT (Intermediate) **Required Behaviors:** 1. Effectively manages assigned resources and coordinates with appropriate agencies to obtain mission essential resources 2. Elevates and provides justification to alleviate resource deficiencies **Criteria:** *Impact on: Specific workplace projects*												
2.3.2.1. Advocate for Unfunded Request (UFR)	1											
2.3.2.2. Propose shift worker schedule	1											
2.3.2.3. Identify facility issues/upgrades	1											
2.3.2.4. Communicate manning constraints	2											pk
2.3.2.5. Forecast budget needs	2											
2.3.3. RESOURCE MANAGEMENT (Advanced) **Required Behaviors:** 1. Collaborates with multi-level leaders to resolve resource changes and shortfalls 2. Advocates for manpower, materials, and funding to mitigate mission deficiencies 3. Projects changes to the budget and petitions for resources to accomplish objectives **Criteria:** *Impact on: Management decisions*												
2.3.3.1. Prioritize resource requirements	1											
2.3.3.2. Negotiate with internal and external agencies to address funding shortfalls	1											
2.3.3.3. Validate manning documents	2											
2.3.3.4. Advise leadership on resource needs	2											
2.3.3.5. Develop and execute annual spend plan	3											
2.3.3.6. Advocate for HHQ funding	3											
2.3.3.7. Review historical data to determine future budget	3											
2.3.4. RESOURCE MANAGEMENT (Expert) **Required Behaviors:** 1. Collaborates with internal and external agencies to determine proper authorizations, assignments, priorities, and projections 2. Guides innovation initiatives to develop logistics solutions 3. Develops end-strength and force development strategies while identifying risks to ensure health of the career field **Criteria:** *Impact on: AF-level practices/within industry*												
2.3.4.1. Conduct studies on impacts of resource shortfalls	1											
2.3.4.2. Coordinates manpower studies	1											
2.3.4.3. Create career field priority plan	1											
2.3.4.4. Advocate for resource requirements	2											
2.3.4.5. Provide input for Program Objective Memorandum (POM) submission	2											
2.3.4.6. Implement CPI to refine processes and procedures	2											
2.3.4.7. Forecast mobility requirements	2											
2.3.4.8. Draft and coordinate policy and procedures	3											
2.3.4.9. Solicit and analyze AFS-wide requirements to conduct PPB&E	3											
2.3.4.10. Participate in PPB&E steps and processes for equipment requirements	3											

		2. Tasks		3. Certification For OJT					4. Behavioral Codes Used to Indicate Formal Training/Information Provided via ICW and/or course			
1. Competencies, Behaviors, Outcomes, and Technical References (TRs)	**Behavior Match**	**Core/Cert ^**	**Deployment * / SEI + CBRN ~**	**Trg Start**	**Trg Complete**	**Trainee Initials**	**Trainer Initials**	**Certifier Initials**	**3-lvl**	**5-lvl CDC**	**7-lvl Course**	**7-lvl CDC**
3. MATERIAL MANAGEMENT												
3.1. INVENTORY **Description:** Procedures and processes that affect ordering, receiving, storing, tracking, and accounting for all goods in the applicable Department of Defense approved Accountable Property System of Record (APSR). **Supporting Competencies:** *Accountability, Analytical Thinking, Communication, Precision* **Training Reference (TR):** DoDI 4140.01, DoDM 4140.70, DoDM 4140.27, DoDM 4140.65, DoDI 5000.64, DAFMAN 23-300												
3.1.1. INVENTORY (Basic) **Required Behaviors:** 1. Identifies and interprets cyclic inventories to update accountable systems (e.g., ILS-S, ELMS, ALIS) 2. Compiles inventory data using Accountable Property System of Record to comply with DoD and enterprise policies **Criteria:** Consistency of Application: Sustained application of competency over time												
3.1.1.1. Research guidance/regulations in accordance with Inventory procedures	1								P	pk		
3.1.1.2. Perform inventory	1	5							P			
3.1.1.3. Submit Inventory parameters according to schedule	1	7							P			
3.1.1.4. Document inventory discrepancies	2	5							pk			
3.1.1.5. Aid in research for inventory recounts	2											
3.1.2. INVENTORY (Intermediate) **Required Behaviors:** 1. Investigates and researches discrepancies to ensure proper accountability 2. Administers cyclic inventory schedules to prevent overdue item accountability **Criteria:** *Consistency of Application: Sustained application of competency over time in a variety of situations*												
3.1.2.1. Conduct physical research on discrepancies	1	5								pk		
3.1.2.2. Use APSR to research discrepancies	1	5								pk		
3.1.2.3. Establish Inventory schedule and coordinate with customers	2											pk
3.1.2.4. Process inventory counts	2	5										
3.1.3. INVENTORY (Advanced) **Required Behaviors:** 1. Reviews and evaluates Financial Improvement and Audit Readiness metrics by utilizing Accountable Property System of Record 2. Resolves floor-to-book/book-to-floor discrepancies to correct property records 3. Conducts root-cause analysis to enhance inventory accuracy **Criteria:** *Consistency of Application: Sustained application of competency over time in complex situations*												
3.1.3.1. Analyze financial accountability	1											pk
3.1.3.2. Analyze reports from APSR (e.g., M10, M32 etc.)	1											pk
3.1.3.3. Communicate corrective actions taken with customers	2											
3.1.3.4. Correct inventory discrepancies (e.g., Forms 12, 13 etc.)	2										P	pk
3.1.3.5. Research/analyze inventory records	3											pk
3.1.3.6. Recommend corrective actions	3											pk
3.1.3.7. Highlight best practices	3											
3.1.4. INVENTORY (Expert) **Required Behaviors:** 1. Brief Accountable Officer to inform on inventory health 2. Analyzes inventory metrics to determine enterprise trends **Criteria:** *Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency*												
3.1.4.1. Formulate strategies to collect and analyze data	1											
3.1.4.2. Communicate metrics/data	1											
3.1.4.3. Interpret reports to identify inventory trends	2											
3.1.4.4. Report discrepancies for Intensely Managed and Tracked Items	2											
3.2. ASSET MANAGEMENT **Description:** Responsible for stocking, securing, inspecting, and issuing resources to ensure mission requirements are met. **Supporting Competencies:** *Accountability, Analytical Thinking, Communication, Decision Making* **Training Reference (TR):** DoDI 4140.01, DoDM 4140.70, DoDM 4140.27, DoDM 4140.65, DoDI 5000.64, DAFMAN 23-300												

		2. Tasks		3. Certification For OJT					4. Behavioral Codes Used to Indicate Formal Training/Information Provided via ICW and/or course			
1. Competencies, Behaviors, Outcomes, and Technical References (TRs)	**Behavior Match**	**Core/Cert ^**	**Deployment * / SEI + CBRN ~**	**Trng Start**	**Trng Complete**	**Trainee Initials**	**Trainer Initials**	**Certifier Initials**	**3-lvl**	**5-lvl CDC**	**7-lvl Course**	**7-lvl CDC**
3.2.1. ASSET MANAGEMENT (Basic) **Required Behaviors:** 1. Utilizes reports from applicable systems (e.g. ILS-S, BLADE) to perform job duties 2. Issues asset and fills customer orders to support mission requirements 3. Supports Care of Supply in Storage program to maintain asset and facility integrity 4. Inspects and operates materiel handling equipment in a safe and efficient manner to meet mission objectives **Criteria:** *Consistency of Application: Sustained application of competency over time*												
3.2.1.1. Validate and update customer contact information	1											
3.2.1.2. Leverage daily reports to inform customers	1											
3.2.1.3. Process pulls, put aways, and deliver assets in the applicable system	2	5	*						P			
3.2.1.4. Physically pull, put away, and deliver assets	2	5	*						P			
3.2.1.5. Utilize condition tags or depot label to validate asset identity	3								P			
3.2.1.6. Perform limited inspector duties (e.g., Shelf Life, ESD, Pilferable, etc.)	3								P			
3.2.1.7. Utilize effective storage techniques to maintain asset serviceability	3									pk		
3.2.1.8. Perform warehouse validation	3	5							P			
3.2.1.9. Perform gas mask management procedures	3											
3.2.1.10. Identify gas mask management procedures	3	5							K			
3.2.1.11. Utilize spotters to safely operate Materiel Handling Equipment (MHE)	4											
3.2.1.12. Operate Mechanized Material Handling Systems (MMHS)	4											
3.2.1.13. Perform inspections to safely operate Materiel Handling Equipment (MHE)	4											
3.2.2. ASSET MANAGEMENT (Intermediate) **Required Behaviors:** 1. Analyzes asset management reports and identify discrepancies to recommend corrective actions 2. Implements degraded operations procedures to prevent mission delays 3. Enforces prioritized movement and stockage procedures to meet order fulfillment objectives **Criteria:** *Consistency of Application: Sustained application of competency over time in a variety of situations*												
3.2.2.1. Manage asset listings and reports	1	7								pk	P	pk
3.2.2.2. Research discrepancies and recommend corrective actions	1									pk	P	pk
3.2.2.3. Utilize stock number user directory	2											pk
3.2.2.4. Manage degraded operations procedures	2	7								pk		pk
3.2.2.5. Perform recovery and accountability transactions	2	7										pk
3.2.2.6. Coordinate movement of high priority assets	3											
3.2.2.7. Optimize space utilization for asset storage and issue	3											
3.2.3. ASSET MANAGEMENT (Advanced) **Required Behaviors:** 1. Develops research methods to enforce proper corrective action procedures 2. Analyzes and requests authorization changes for assigned items affecting mission execution 3. Collaborates with organizations to streamline material movement to improve support **Criteria:** *Consistency of Application: Sustained application of competency over time in complex situations*												
3.2.3.1. Develop standard operating procedures	1											
3.2.3.2. Implement change management strategies	1											
3.2.3.3. Request authorization and demand level changes	2											pk
3.2.3.4. Conduct Base Level Reviews (BLRs) with maintenance Subject Matter Experts (SMEs)	2											pk
3.2.3.5. Communicate with Supply Chain Operations Squadrons (SCOS) to identify high priority needs	3											
3.2.3.6. Collaborate with internal/external agencies to coordinate Readiness Spares Package (RSP) movement	3										pk	pk
3.2.4. ASSET MANAGEMENT (Expert) **Required Behaviors:** 1. Teams with key partners and communicates readiness requirements to support taskings 2. Surveys innovative techniques to streamline continuous process improvement 3. Develops and implements guidance to support non-standard operations (e.g., crisis, contingency, or humanitarian operations) **Criteria:** *Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency*												
3.2.4.1. Coordinates Unit Type Code (UTC) requests	1											
3.2.4.2. Conduct file maintenance/requirements computation and chairs "face-to- face"	1											
3.2.4.3. Conduct research on industry best practices and innovative solutions	2											
3.2.4.4. Perform warehouse utilization projects	2											
3.2.4.5. Establish logistics sustainment support for contingency operations	3											
3.2.4.6. Respond to operation orders	3											

		2. Tasks		3. Certification For OJT					4. Behavioral Codes Used to Indicate Formal Training/Information Provided via ICW and/or course			
1. Competencies, Behaviors, Outcomes, and Technical References (TRs)	**Behavior Match**	**Core/Cert ^**	**Deployment * / SEI + CBRN~**	**Trg Start**	**Trg Complete**	**Trainee Initials**	**Trainer Initials**	**Certifier Initials**	**3-lvl**	**5-lvl CDC**	**7-lvl Course**	**7-lvl CDC**
4. MATERIAL SUPPORT												
4.1. MAINTENANCE SUPPORT **Description:** Acts as primary focal point providing materiel support to maintenance organizations. **Supporting Competencies:** *Accountability, Communication, Decision Making, Relationship Building* **Training Reference (TR):** DoDI 4140.01, DoDM 4140.70, DoDM 4140.27, DoDM 4140.65, DoDI 5000.64, DAFMAN 23-300												
4.1.1. MAINTENANCE SUPPORT (Basic) **Required Behaviors:** 1. Verifies physical property matches with corresponding documentation to prevent maintenance delays 2. Executes systematic functions within applicable automated data systems (e.g., ILS-S, ALIS, IMDS, G081) to ensure maintenance requests are processed 3. Monitors programs and conducts inventory on applicable stock locations (e.g., TNB/FOM, Bench Stock, PEB, TCTO/TCTD) to maintain asset accountability **Criteria:** *Consistency of Application: Sustained application of competency over time*												
4.1.1.1. Utilize limited inspector concepts to match property to the documentation	1	5								pk		
4.1.1.2. Verify deficiency report for misidentified or unserviceable assets (e.g., PQDR, SDR, etc.)	1											
4.1.1.3. Utilize IT systems to process, log, and track maintenance requests	2	5								pk		pk
4.1.1.4. Pull and utilize system reports	2	5										pk
4.1.1.5. Track and monitor materiel movement	2	7							P			pk
4.1.1.6. Verify the accuracy of information entered into automated data systems (e.g., ILS-S, ALIS, IMDS, D081)	2											
4.1.1.7. Perform established procedures for accountability of applicable stock locations	3											pk
4.1.1.8. Perform inventory	3											
4.1.1.9. Perform aircraft folder review	3											
4.1.1.10. Notify leadership when discrepancies are identified	3											
4.1.2. MAINTENANCE SUPPORT (Intermediate) **Required Behaviors:** 1. Monitors and updates reports and status codes to reflect real-time visibility on requisitions and repairable items 2. Oversees repair cycle program to ensure assets are returned to the supply chain **Criteria:** *Consistency of Application: Sustained application of competency over time in a variety of situations*												
4.1.2.1. Distribute reports and update location/status codes	1	5								pk		
4.1.2.2. Identify trends from reports and status codes	1											K
4.1.2.3. Perform reconciliation (e.g., DIFM, RMA, supply point etc.)	2	7								pk		
4.1.2.4. Manage unserviceable storage	2									pk		
4.1.2.5. Coordinate with document cargo	2											
4.1.3. MAINTENANCE SUPPORT (Advanced) **Required Behaviors:** 1. Advises leadership of supply support problems to allow accurate scheduling of end-item downtime 2. Establishes program reconciliations (e.g., DIFM/RMA, Supply Points) to maintain compliance **Criteria:** *Consistency of Application: Sustained application of competency over time in complex situations*												
4.1.3.1. Collaborates with maintenance personnel on aircraft availability	1	7									P	pk
4.1.3.2. Prepare and present reports on supply problems (HoF, RNEP, etc.)	1	7									P	pk
4.1.3.3. Identify custodians and provide training on reconciliation programs	2											
4.1.3.4. Establish and maintain reconciliation programs	2											
4.1.3.5. Rectify discrepancies to maintain compliance	2											
4.1.4. MAINTENANCE SUPPORT (Expert) **Required Behaviors:** 1. Analyzes data and trends to elevate limiting factors (e.g. RNEP, CPIs, etc.) 2. Develops guidance to foster standardization of maintenance support across the Air Force **Criteria:** *Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency*												
4.1.4.1. Collect and analyze data	1											pk
4.1.4.2. Identify and articulate findings and trends	1											pk
4.1.4.3. Identify gaps between materiel management and maintenance policies	2											
4.1.4.4. Update guidance based on feedback, best practices, and evolving operational needs	2											
4.1.4.5. Engage with stakeholders for maintenance support standardization initiatives	2											

		2. Tasks		3. Certification For OJT					4. Behavioral Codes Used to Indicate Formal Training/Information Provided via ICW and/or course			
1. Competencies, Behaviors, Outcomes, and Technical References (TRs)	**Behavior Match**	**Core/Cert ^**	**Deployment * / SEI + CBRN ~**	**Trg Start**	**Trg Complete**	**Trainee Initials**	**Trainer Initials**	**Certifier Initials**	**3-lvl**	**5-lvl CDC**	**7-lvl Course**	**7-lvl CDC**
4.2. CUSTOMER SUPPORT **Description:** Provides supply support for base level organizations. **Supporting Competencies:** *Analytical Thinking, Communication, Information Seeking, Service Mindset* **Training Reference (TR):** *DoDI 4140.01, DoDM 4140.70, DoDM 4140.27, DoDM 4140.65, DoDI 5000.64, DAFMAN 23-300*												
4.2.1. CUSTOMER SUPPORT (Basic) **Required Behaviors:** 1. Monitors required reports and organizations accounts to sustain customer operations 2. Coordinates with customers to satisfy concerns 3. Processes transactions in applicable systems (e.g., ELMS, ILS-S) to meet customer needs **Criteria:** *Impact on: Specific workplace tasks*												
4.2.1.1. Monitor and track customer requests	1	5								pk		
4.2.1.2. Adhere to records management program	1											
4.2.1.3. Follow procedural/functional checklists	1											
4.2.1.4. Assist with maintaining supply accounts	1											pk
4.2.1.5. Interact with Enterprise partners on backorder status	2									pk		
4.2.1.6. Identify and demonstrate proper communications etiquette (e.g., phone, email, etc.)	2								P	pk		
4.2.1.7. Attend program meetings	2											
4.2.1.8. Provide status on customer orders	2	5							P	pk		
4.2.1.9. Create, modify, and delete supply orders	3	7							P	pk		
4.2.1.10. Familiarize and determine capabilities of utilized IT systems	3	5							K	K		
4.2.2. CUSTOMER SUPPORT (Intermediate) **Required Behaviors:** 1. Manages supply accounts and liaises with Enterprise agencies to fulfill customer requirements 2. Audits installation customers and composes reports for Accountable Officer to ensure account integrity 3. Retains mandatory documentation for systems, programs, and appointments to comply with audit requirements **Criteria:** *Impact on: Specific workplace projects*												
4.2.2.1. Identify part shortages/mal-position to help right-size requirements	1									K		
4.2.2.2. Establish and/or modify supply accounts in applicable system	1	7									P	pk
4.2.2.3. Conduct organizational visits	2	5								pk		
4.2.2.4. Conduct supply training for base customers	2											
4.2.2.5. Distribute listings/reports	2											
4.2.2.6. Conduct records management meetings	3											
4.2.2.7. Provide program management checklist	3											
4.2.3. CUSTOMER SUPPORT (Advanced) **Required Behaviors:** 1. Analyzes trends and implements courses of action to resolve challenges or discrepancies within a program 2. Develops and oversees degraded operations procedures to maintain mission objectives 3. Implements directives and manages program execution to support changes in equipment and asset requirements **Criteria:** *Impact on: Management decisions*												
4.2.3.1. Conduct organizational visit out brief	1											
4.2.3.2. Utilize supply system performance data and metrics	1											pk
4.2.3.3. Provide support during degraded operations	2	5									P	pk
4.2.3.4. Assist with degraded operations recovery	2	5									P	pk
4.2.3.5. Establish organizational visit schedule	3											
4.2.3.6. Monitor Record Reversal Correction program	3											
4.2.4. CUSTOMER SUPPORT (Expert) **Required Behaviors:** 1. Reviews and establishes organizational accounts for home station and temporarily assigned units to accomplish mission requirements 2. Implements DoD and DAF equipment requirements by coordinating with MAJCOM Functional Managers and the Centralized Equipment Management Flight **Criteria:** *Impact on: AF-level practices/within industry*												
4.2.4.1. Review, validate, and approve special mission requirements and/or changes	1											
4.2.4.2. Coordinate special mission requirements	1											
4.2.4.3. Develop Financial Improvement and Audit Readiness Correction Action Plan (CAP)	2											
4.2.4.4. Provide detailed instructions for executing specific tasks or processes	2											

1. Competencies, Behaviors, Outcomes, and Technical References (TRs)	Behavior Match	2. Tasks: Core/Cert ^	2. Tasks: Deployment */SEI+ CBRN~	3. Certification For OJT: Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	4. Behavioral Codes Used to Indicate Formal Training/Information Provided via ICW and/or course: 3-lvl	5-lvl CDC	7-lvl Course	7-lvl CDC
5. SUPPLY CHAIN												
5.1. SUPPLY CHAIN **Description:** Provides enterprise level materiel support for warfighters around the globe. **Supporting Competencies:** *Analytical Thinking, Communication, Decision Making, Strategic Thinking* **Training Reference (TR):** DoDI 4140.01, DoDM 4140.70, DoDM 4140.27, DoDM 4140.65, DoDI 5000.64, DAFMAN 23-300												
5.1.1. SUPPLY CHAIN (Basic) **Required Behaviors:** 1. Manages and utilizes systems (e.g., ILS-S, ELMS) for fundamental transaction processing to meet user needs 2. Responds to warfighter requests by relaying requirements to the appropriate entity **Criteria:** *Consistency of Application: Sustained application of competency over time*												
5.1.1.1. Utilize systems to process transactions and source available assets	1	5							P	pk		
5.1.1.2. Process transactions to posture stock levels	1									pk		
5.1.1.3. Ensure that all stakeholders have access to up-to-date information	1											
5.1.1.4. Provide accurate and timely information	2								P			
5.1.1.5. Up channel issues that arise within the supply chain	2											
5.1.2. SUPPLY CHAIN (Intermediate) **Required Behaviors:** 1. Reviews and prioritizes customer objectives to balance day-to-day operations and urgent requirements 2. Researches and relays information to stakeholders **Criteria:** *Consistency of Application: Sustained application of competency over time in a variety of situations*												
5.1.2.1. Review and communicate priorities based on customer needs	1											
5.1.2.2. Verify requirements are managed effectively	1											
5.1.2.3. Manage working capital fund requirements (e.g., CSAG, GSD, etc.)	1											
5.1.2.4. Works with enterprise level partners to provide insight on repair/procurement status	2										pk	pk
5.1.2.5. Answer or elevate base level concerns on complex issues	2											
5.1.2.6. Interpret Problem Identifications (IPID) to assist customers with decision making	2	7								pk		pk
5.1.3. SUPPLY CHAIN (Advanced) **Required Behaviors:** 1. Analyzes data and identifies trends to forecast for future requirements 2. Briefs holistic constraints of the fleet to leadership to facilitate decision making 3. Reviews fleet constraints to facilitate crosstalk between organizations **Criteria:** *Consistency of Application: Sustained application of competency over time in complex situations*												
5.1.3.1. Oversee and manage support equipment authorizations in ELMS to maintain Financial Improvement Audit and Remediation (FIAR) compliance.	1	7										pk
5.1.3.2. Develop enterprise studies for weapon system constraints	1											
5.1.3.3. Review demand rates and recommend/process stock level adjustments	1										pk	pk
5.1.3.4. Advocate for nontraditional support (e.g., CANN, AMARG etc.)	2									pk		
5.1.3.5. Synthesize complex information for future planning	2											
5.1.3.6. Engage with key stakeholders on fleet constraints	3										pk	pk
5.1.3.7. Establish working group battle rhythm to resolve enterprise concerns	3											
5.1.4. SUPPLY CHAIN (Expert) **Required Behaviors:** 1. Coordinates end-item sustainment for enterprise-level success based on holistic needs and constraints 2. Conceptualizes strategic-level goals for fleet sustainment and modernization to meet mission requirements 3. Establishes and implements system policies and procedures to maintain supply-chain integrity **Criteria:** *Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency*												
5.1.4.1. Analyze fleet top drivers to determine enterprise get well plans	1											pk
5.1.4.2. Analyze consumption data to determine future requirements	1											
5.1.4.3. Manage equipment forecasting and authorizations	1											
5.1.4.4. Collaborate with applicable source of supply on current and future mission needs	2											
5.1.4.5. Execute Program Office directions to modernize and sustain activities	2											
5.1.4.6. Audit applicable systems of record (e.g. ILS-S, ELMS, ALIS etc.)	3											
5.1.4.7. Provide directions for sustainment processes	3											

ATTACHMENT 4, CONTINGENCY/EXPEDITIONARY TRAINING REQUIREMENTS

Commanders and supervisors, at all levels, should establish an effective contingency/expeditionary training program that considers the normal AEF battle rhythm. The following tables prescribe the minimum essential training tasks Airmen require training and certification on to meet the stated capability of the Unit Type Code (UTC). As the minimum training requirements, commanders should use completion of training associated with assigned UTCs as the determination of capability readiness in the AEF Reporting Tool (ART).

Ideally, Airmen/teams should begin the specified training 4-6 months before their AEF deployment. Flight superintendents/certifying officials will assess an Airmen's ability to perform the task to the "Go," "No-Go" level. A copy of the applicable training table, indicating completed training, should be placed in the Airman's AF Form 623, On-the-Job Training Record, and maintained until return from deployment.

UTCs/capabilities requiring training/certifying on specialized materiel handling (i.e., all-terrain forklift) tasks require a minimum of 50 percent of personnel assigned against UTC being certified on those tasks.

All appropriate core tasks in addition to UTC requirements must be met.

The MAJCOM Functional Manager is the waiver authority for required training

UTC: JFBHM (SUP HAZMAT MANAGEMENT)				
STS Reference/Training Task	**Trng Start**	**Trng Complete**	**Trainee Initials**	**Trainer Initials**
1.1.1.1. Interpret and use Materiel Management guide/regulations				
1.1.1.4. Correct deficiencies according to regulations				
1.1.1.6. Utilize appropriate system to execute processes IAW regulations				
1.1.1.7. Locate, interpret, and accurately apply guidance from Safety Data Sheets (SDS)				
1.1.1.8. Identify, classify, process, and store Health Hazard Items, Petroleum, Oil, and Lubricants (POL), and compressed gas cylinders.				
1.1.2.1. Utilize guidance/regulations to execute inspections				
2.3.1.2. Adhere to all safety requirements				
2.3.4.5. Utilize assigned Materiel Handling Equipment (MHE)				
3.1.2.1. Conduct physical research on discrepancies				
3.2.1.5. Utilize condition tags or depot label to validate asset identity				
3.2.1.6. Perform limited inspector duties (e.g., Shelf Life, ESD, Pilferable, etc.)				
3.2.1.7. Utilize effective storage techniques to maintain asset serviceability				

UTC: JFBMS (SUP MATERIEL STORAGE ACTIVITY)				
STS Reference/Training Task	**Trng Start**	**Trng Complete**	**Trainee Initials**	**Trainer Initials**
3.2.1.2. Leverage daily reports to inform customers				
3.2.1.3. Process pulls, put aways, and deliver assets in the applicable system				
3.2.1.4. Physically pull, put away, and deliver assets				
3.2.1.5. Utilize condition tags or depot label to validate asset identity				
3.2.1.6. Perform limited inspector duties (e.g., Shelf Life, ESD, Pilferable, etc.)				
3.2.1.7. Utilize effective storage techniques to maintain asset serviceability				
3.2.1.8. Performs warehouse validation				
3.2.1.11. Utilize spotters to safely operate Materiel Handling Equipment (MHE)				
3.2.1.12. Operate Mechanized Material Handling Systems (MMHS)				
3.2.1.13. Perform inspections to safely operate Materiel Handling Equipment (MHE)				
3.2.2.1. Manage asset management listings and reports				
3.2.2.2. Research discrepancies and recommend corrective actions				
3.2.2.4. Manage degraded operations procedures				
3.2.2.5. Perform recovery and accountability transactions				
3.2.2.6. Coordinate movement of high priority assets				
3.2.2.7. Optimize space utilization for asset storage and issue				
3.2.3.1. Develop standard operating procedures				
3.2.3.2. Implement change management strategies				
3.2.3.3. Request authorization and demand level changes				
4.1.1.1. Utilize limited inspector concepts to match property to the documentation				
4.1.1.2. Verify deficiency report for misidentified or unserviceable assets (e.g., PQDR, SDR, etc.)				
4.1.1.3. Utilize IT systems to process, log and track maintenance requests				
4.1.1.4. Pull and utilize system reports				
4.1.1.6. Verify the accuracy of information entered in automated data systems (e.g., ILS-S, ALIS, IMDS, G081)				
4.1.1.7. Perform established procedures for accountability of applicable stock locations				
4.1.1.8. Perform inventory				
4.1.2.1. Distribute reports and update location/status codes				
4.1.2.2. Identify trends from reports and status codes				
4.1.2.4. Manage unserviceable storage				
4.1.2.5. Coordinate with document cargo				
4.1.3.4. Establish and maintain reconciliation programs				
4.1.3.5. Rectify discrepancies to maintain compliance				
4.2.1.1. Monitor and track customer requests				
4.2.1.2. Adhere to records management program				
4.2.1.3. Follow procedural/functional checklists				
4.2.3.4. Assist with degraded operations recovery				

UTC: JFBCW (SUP MOBILITY SUPPORT)				
STS Reference/Training Task	**Trng Start**	**Trng Complete**	**Trainee Initials**	**Trainer Initials**
3.2.1.2. Leverage daily reports to inform customers				
3.2.1.3. Process pulls, put aways, and deliver assets in the applicable system				
3.2.1.4. Physically pull, put away, and deliver assets				
3.2.1.5. Utilize condition tags or depot label to validate asset identity				
3.2.1.6. Perform limited inspector duties (e.g., Shelf Life, ESD, Pilferable, etc.)				
3.2.1.7. Utilize effective storage techniques to maintain asset serviceability				
3.2.1.8. Performs warehouse validation				
3.2.1.9. Perform gas mask management				
3.2.1.10. Identify gas mask management				
3.2.1.11. Utilize spotters to safely operate Materiel Handling Equipment (MHE)				
3.2.1.12. Operate Mechanized Material Handling Systems (MMHS)				
3.2.1.13. Perform inspections to safely operate Materiel Handling Equipment (MHE)				
3.2.2.1. Manage asset management listings and reports				
3.2.2.2 Research discrepancies and recommend corrective actions				
3.2.2.4. Manage degraded operations procedures				
3.2.2.5. Perform recovery and accountability transactions				
3.2.2.6. Coordinate movement of high priority assets				
3.2.2.7. Optimize space utilization for asset storage and issue				
3.2.3.1. Develop standard operating procedures				
3.2.3.2. Implement change management strategies				
3.2.3.3. Request authorization and demand level changes				
4.1.1.1. Utilize limited inspector concepts to match property to the documentation				
4.1.1.2. Verify deficiency report for misidentified or unserviceable assets (e.g., PQDR, SDR, etc.)				
4.1.1.3. Utilize IT systems to process, log and track maintenance requests				
4.1.1.4. Pull and utilize system reports				
4.1.1.6. Verify the accuracy of information entered in automated data systems (e.g., ILS-S, ALIS, IMDS, G081)				
4.1.1.7. Perform established procedures for accountability of applicable stock locations				
4.1.1.8. Perform inventory				
4.1.2.1. Distribute reports and update location/status codes

2.3.3.4. Advise leadership on resource needs				
2.3.3.5. Develop and execute annual spend plan				
2.3.3.6. Advocate for HHQ funding				
2.3.3.7. Review historical data to determine future budget				
4.2.1.1. Monitor and track customer requests				
4.2.1.5. Interact with Enterprise partners on backorder status				
4.2.1.6. Identify and demonstrate proper communications etiquette (e.g., phone, email, etc.)				
4.2.1.7. Attend program meetings				
4.2.1.8. Provide status on customer orders				
4.2.2.2. Establish and/or modify supply accounts in applicable system				
5.1.1. Utilize systems to process transactions and source available assets				
5.1.2. Process transactions to posture stock levels				
5.1.3. Ensure that all stakeholders have access to up-to-date information				
5.1.4. Provide accurate and timely information				
5.1.5. Up channel issues that arise within the supply chain				
5.1.2.1. Review and communicate priorities based on customer needs				
5.1.2.2. Verify requirements are managed effectively				
5.1.2.3. Manage working capital fund requirements (e.g., CSAG, GSD, etc.)				
5.1.2.4. Works with enterprise level partners to provide insight on repair/procurement status				
5.1.2.5. Answer or elevate base level concerns on complex issues				
5.1.2.6. Interpret Problem Identifications (IPID) to assist customers with decision making				
5.1.4.1. Analyze fleet top drivers to determine enterprise get well plans				
5.1.4.2. Analyze consumption data to determine future requirements				
5.1.4.3. Manage equipment forecasting and authorizations				
5.1.4.4. Collaborates with applicable source of supply on current and future mission needs				
5.1.4.5. Execute Program Office directions to modernize and sustain activities				

UTC: JFBCT (SUP CUSTOMER SUPPORT PACKAGE) UTC: JFBCU (SUP CONTINGENCY SUSTAINMENT)				
STS Reference/Training Task	**Trng Start**	**Trng Complete**	**Trainee Initials**	**Trainer Initials**
3.1.3.1. Analyze financial accountability				
3.1.3.2. Analyze reports from APSR (e.g., M10, M32 etc.)				
3.1.3.3. Communicate corrective actions taken with customers				
3.1.3.4. Correct inventory discrepancies (e.g., form 12, 13 etc.)				
3.1.3.6. Recommend corrective actions				
3.1.4.2. Communicate metrics/data				
3.1.4.3. Interpret reports to identify inventory trends				
3.1.4.4. Report discrepancies for Intensely Managed and Tracked Items				
3.2.3.4. Conduct Base Level Reviews (BLRs) with maintenance Subject Matter Experts (SMEs)				
3.2.3.5. Communicate with Supply Chain Operations Squadrons (SCOS) to identify high priority needs				
3.2.3.6. Collaborate with internal/external agencies to coordinate Readiness Spares Package (RSP) movement				
4.2.1.1. Monitor and track customer requests				
4.2.1.2. Adhere to records management program				
4.2.1.3. Follow procedural/functional checklists				
4.2.1.4. Assist with maintaining supply accounts				
4.2.1.5. Interact with Enterprise partners on backorder status				
4.2.1.6. Identify and demonstrate proper communications etiquette (e.g., phone, email, etc.)				
4.2.1.7. Attend program meetings				
4.2.1.8. Provide status on customer orders				
4.2.1.9. Create, modify, and delete supply orders				
4.2.1.10. Familiarize and determine capabilities of utilized IT systems				
4.2.2.1. Identify part shortages/mal-position to help right-size requirements				
4.2.2.2. Establish and/or modify supply accounts in applicable system				
4.2.2.3. Conduct organizational visits				
4.2.2.4. Conduct supply training for base customers				
4.2.2.5. Distribute listings/reports				
4.2.2.6. Conduct records management meetings				
4.2.2.7. Provide program management checklist				
4.2.3.1. Conduct organizational visit out brief				
4.2.3.2. Utilize supply system performance data and metrics				
4.2.3.3. Provide support during degraded operations				
4.2.3.4. Assist with degraded operations recovery				
4.2.3.5. Establish organizational visit schedule				
4.2.3.6. Monitor Record Reversal Correction program				
4.2.4.1. Review, validate, and approve special mission requirements and/or changes				
4.2.4.2. Coordinate special mission requirements				
4.2.4.3. Develop Financial Improvement and Audit Readiness Correction Action Plan (CAP)				
4.2.4.4. Provide detailed instructions for executing specific tasks or processes				
5.1.2. Process transactions to posture stock levels				
5.1.3. Ensure that all stakeholders have access to up-to-date information				
5.1.4. Provide accurate and timely information				
5.1.5. Up channel issues that arise within the supply chain				
5.1.2.1. Review and communicate priorities based on customer needs				
5.1.2.2. Verify requirements are managed effectively				

Section B-Course Objective List

This section not used.

Section C-Support Material

Materiel Management Computer Operations Qualification Training Package (QTP) provides supplemental training for award of the Computer Operations Special Experience Identifier (SEI) 027. Training requirements are taken directly from the 2S0XX CFETP Part II, Sections 25 and 26. Airmen are expected to perform at the journeyman level and work in Computer Operation Section for at least 2 years to obtain the SEI 027 regardless of your current skill level. Daily tasks are set at "3c" proficiency, while less common tasks are set at "2b" proficiency.

Section H-Materiel Management Enlisted Career Broadening Program

5. Training Objectives

This program provides the full spectrum of training, knowledge, experience, and perspectives to promote a better understanding of the entire supply chain for materiel management noncommissioned officers. This program introduces Supply Chain Management/Acquisition related processes that include functional interfaces, item and system program management, requirements or item processing, and provisioning, procuring, budgeting, and funding processes at an Air Force Materiel Command (AFMC) or Defense Logistics Agency (DLA) center. Additional information may be found in the Materiel Management Enlisted Career Broadening Program guidance.
