CAREER FIELD EDUCATION AND TRAINING PLAN

ACCESSIBILITY: Publications and forms are available on the e-Publishing website at https://www.e-publishing.af.mil/Product-Index for downloading or ordering.

RELEASABILITY: There are no releasability restrictions on this publication.

SUMMARY OF CHANGES

This publication was changed to embrace Air Force Foundational Competencies and Air Transportation Competencies to map deliberate development. The Special Training Standard was substantially revised and must be completely reviewed

MASTER

SENIOR

BASIC

The falcon at the center of the badge symbolizes the Air Force. It also symbolizes American military strength, dedication, and devotion to duty of transporters who support the generation and employment of aerospace forces across the full spectrum of warfare. In its talons, the falcon is holding the globe with three encircling arrows, symbolic of the extensive range of our logistics support mission and capability to sustain our forces by land, sea, or air. The olive branch surrounding the badge symbolizes the peace aerospace forces provide through a professional transportation community.

Basic: May be worn upon award of 3-skill level
Senior: May be worn upon award of 7-skill level
Master: May be worn when member is a Master Sergeant or above with 5 years in the specialty from award of the 7-skill level and when all 9-level tasks are complete

AIR TRANSPORTATION SPECIALTY
AFSC 2T2X1
CAREER FIELD EDUCATION AND TRAINING PLAN

PART 1

PREFACE

1. This Career Field Education and Training Plan (CFETP) is a comprehensive education and training document that identifies life cycle education and training requirements, training support resources, and minimum core task requirements for this specialty. The CFETP provides personnel a clear career path to success and instills rigor in all aspects of career field training.

Note: Civilians occupying associated positions use Part 2 to support duty position qualification training.

2. The CFETP consists of two parts. Supervisors plan, manage, and control training within the specialty using both parts of the plan.

2.1. Part 1 provides information necessary for overall management of the specialty. Section A explains how individuals will use the plan; section B identifies career field progression information, duties and responsibilities, training strategies, and career field path; section C associates each level with specialty qualifications (knowledge, education, experience, training, and other); and section D indicates resource constraints. Some examples are funds, manpower, equipment, facilities; section E identifies transition training guide requirements for E-5 through E-7.

2.2. Part 2 includes the following: Section A: identifies the STS and includes duties, tasks, Technical References to support training, AETC conducted training, wartime course and core task and correspondence course requirements. Section B: contains the course objective list and training standards supervisors use to determine if service members have satisfied training requirements. Section C: identifies available support materials. An example is a qualification training package, which may be developed to support proficiency training; section D identifies a training course index supervisors can use to determine resources available to support training. Included here are both mandatory and optional courses; section E identifies MAJCOM unique training requirements supervisors can use to determine additional training required for the associated qualification needs. At unit level, supervisors and trainers use Part 2 to identify, plan, and conduct training commensurate with the overall goals of this plan.

3. Using CFETP guidance ensures individuals in this specialty receive effective and efficient training at the appropriate points in their career. This plan enables us to train today's workforce for tomorrow's jobs.

ABBREVIATIONS/TERMS EXPLAINED

Advanced Training (AT). Formal course that provides individuals who are qualified in one or more positions of their Air Force specialty with additional skills and knowledge to enhance their expertise in the career field. Training is for selected career Airmen at the advanced level of the Air Force specialty.

Aerial Port Expediter (APEX). An AMC/A4T aircraft cargo loading program that allows APEX designated squadrons to load and unload C-17/C-5 aircraft in the absence of a loadmaster. The APEX Program gives squadrons the capability to maneuver workload to mitigate aircraft scheduling issues and/or to meet launch and recovery timelines in accordance with prescribed instructions.

Air Force Career Field Manager (AFCFM). Representative appointed by the respective HQ USAF Deputy Chief of Staff or Under Secretariat, to ensure assigned AF specialties are trained and utilized to support AF mission requirements. AF Career Functional Manager is the OPR; however, works in concert with MAJCOM Functional Managers as required.

Department of the Air Force Enlisted Classification Directory (DAFECD). The directories contain the official specialty descriptions for all military classification codes and identifiers which are used to identify each Air Force job (valid requirement) and describe the minimum mandatory qualifications for personnel to fill these jobs. These standards are used to procure, classify, and employ personnel; to develop career programs for initial training, retraining, and skill upgrade; and to structure unit manpower document (UMD) positions.

Air Force Force Generation (AFFORGEN). AFFORGEN is the Air Force's sustainable, capacity-driven model for presenting forces to Joint Force Commanders (JFCs). AFFORGEN's intent is to enable operational preparedness and readiness recovery to compete with peer competitors, while clearly focusing USAF efforts on a predictable and sustainable force offering.

Air Force Installation and Mission Support Center (AFIMSC). A single intermediate-level staff performing major command-level installation and mission support activities. Parent organization for several field operating agencies to include the Air Force Security Forces Center, Air Force Civil Engineer Center, Air Force Installation Contracting Agency, the services directorate of the Air Force Personnel Center and other FOAs providing installation support capabilities.

Air Force Job Qualification Standard (AFJQS). Training documents approved by the Air Transportation Career Field Manager for a particular job type or duty position. Provides a comprehensive task list that is common to all persons serving in a specific duty position. They are used by supervisors to document task qualifications.

Air Force Specialty (AFS). A group of positions (with the same title and code) that require common qualifications. Each AFS is assigned an AFS Code (AFSC) to identify a specific career field and qualification level for Air Force enlisted personnel. The first two digits of an AFSC (2T) identify the career field and the first three digits of an AFSC identify the AFS (2T2). A full AFSC identifies a specific duty position with an AFS.

Air Reserve Component (ARC). The combination of the Air National Guard and the Air Force Reserve; together they are called the Air Reserve Component. Air Force Policy Directive 10-3, Operation Utilization of the Air Reserve Component Forces, establishes policy to fully integrate the Air National Guard, Air Force Reserve, and RegAF into a single Total Force.

Air Transportation Distance Learning (DL). Computer-based instruction in areas directly related to items found in the 2T2X1 STS.

Air Transportation Information Systems (ATIS). Systems utilized by the air transportation career field to process passengers and cargo into the airlift system to include systems utilized to achieve in transit visibility.

Annual Tour (AT). Total Force Airmen that go through a mandatory period of active duty for training, typically 12 to 15 days per fiscal year as required to maintain readiness and fulfill their military obligations.

Behavior. An activity performed to achieve objectives of the job. Involves observable (physical) components and unobservable (mental) components. Behaviors consist of the performance of one or more tasks.

Career Field Education and Training Plan (CFETP). A CFETP is a comprehensive core training document that identifies life-cycle education and training requirements; training support resources; and minimum core task requirements for a specialty. The CFETP aims to give personnel a clear path and instill a sense of industry in career field training.

Coaching. Relationship where an uncertified or certified professional coach provides technical support focusing on development of mentees based on their identified performance need.

Competencies. Observable, measurable pattern of knowledge, skills, abilities, behaviors, and other characteristics needed to perform institutional or occupational functions successfully.

Competency Model. A collection of competencies that together defines successful performance in a particular work setting. Competency models are the foundation for important human resource functions such as recruitment and hiring, training and development, and retention. Competency models may be developed for specific jobs, job groups, organizations, occupations, or missions. Some competency models include information about the levels of competence, mastery, or proficiency required at different occupational levels.

Computer Based Training (CBT). The use of computers to aid in the delivery and management of instruction.

Continuation Training. Additional training exceeding requirements with emphasis on present or future duty assignments.

Core Task. Tasks the AF Career Field Manager identify as minimum qualification requirements for everyone within an AFSC, regardless of duty position. Core tasks may be specified for a particular skill level or in general across the AFSC. Guidance for using core tasks can be found in the applicable CFETP narrative.

Education and Training Course Announcement (ETCA). Contains specific MAJCOM procedures, fund cite instructions, reporting instructions, and listings for those formal courses conducted or managed by the MAJCOMs or field operating agencies (FOAs). The Education and Training Course Announcement contains courses conducted or administered by the AF and reserve forces and serves as a reference for the AF, DoD, other military services, government agencies, and security assistance programs.

Exportable Training. Additional training via computer assisted, paper text, interactive video, or other necessary means to supplement training.

Field Training. Technical, operator, and other training either a training detachment or mobile training team conducts at operational locations on specific systems and associated direct-support equipment for maintenance and aircrew personnel.

Foundational Competencies. A set of accepted and valued competencies (e.g., Airman's Foundational Competencies), which enable success across a wide-array of DAF missions, roles, functions, and duties. Taken from AFH 36-2647, Competency Modeling.

Global Air Transportation Execution System (GATES). A web-based information system used to manage and track the global transportation of passengers and cargo through the military's airlift network.

Initial Skills Training. An overarching term for enlisted initial skills and (non-rated line) officer initial skills technical training. For enlisted, it refers to a formal school pipeline, comprised of one or more courses, that results in the award of the 3-skill-level in an Air Force specialty. For officers, it refers to a formal school pipeline comprised of one or more courses of mandatory training needed to become qualified in their Air Force specialty.

Instructional System Development (ISD). A deliberate and orderly, but flexible process for planning, developing, implementing, and managing instructional systems.

In Transit Visibility (ITV). The ability to track the identity, status, and location of DoD unit and non-unit cargo and passengers, patients, and personal property from origin to consignee or destination during peace, contingencies, and war.

Line Operations Safety Audit (LOSA). A proactive safety management tool used to collect operational performance during normal operations. The program aims to enhance safety by identifying systemic risks and best practices.

MAJCOM Functional Manager (MFM). An individual who is the POC responsible for MAJCOM management of an Air Force Specialty. MFM responsibilities include coordination with the AFCFM, policy development, training, skills management and career progression at the MAJCOM level. There are four MFMs within the 2T2 AFSC each overseeing a specific population of the career field: The MFMs are located at AFIMSC, AFRC, AMC, and ANG.

Master Task Listing (MTL). A comprehensive list (100%) of all tasks performed within a work center and consisting of the current CFETP or AF Job Qualification Standard and locally developed AF Forms 797 (as a minimum). Should include tasks required for deployment and/or unit type code requirements.

Master Training Plan (MTP). Employs a strategy for ensuring the completion of all work center job requirements by using a master task listing and provides milestones for task and prioritizes deployment/unit type code, home station training tasks, upgrade, and qualification tasks.

Mission Ready Airmen (MRA). A mission ready 2T2XX will be trained, certified and proficient in the tasks identified in this CFETP corresponding to their assigned UTC and skill level, to include completion of TQT requirements and CBRNE defense course. Mission Ready Airmen are responsible for maintaining individual medical readiness (IMR) and all auxiliary training as applicable to their assigned UTC.

Nuclear Weapons Related Material (NWRM). Classified or unclassified assemblies and subassemblies (containing no fissionable or fusionable materiel) identified by the Military Departments that comprise or could comprise a standardized war reserve nuclear weapon

(including equivalent training devices) as it would exist once separated/removed from its intended delivery vehicle.

Occupational Analysis (OA). Collecting and analyzing factual data on the tasks and/or knowledge performed by AF career fields. This data is used to provide personnel and training decision-makers with factual and objective job information which enables them to justify and/or change personnel utilization policies and programs, refine and maintain occupational structures, and establish, validate, and adjust testing and training programs. A detailed report showing the results of an occupational survey of tasks performed within a particular AFS.

Occupational Competencies. A set of competencies required of all Airmen within a specific workforce category (a group of functions requiring similar work, i.e., Engineering). They describe technical/functional skills, knowledge, abilities, behaviors, and other characteristics needed to perform that function's mission successfully.

On-the-Job Training (OJT). Hands-on, "over-the-shoulder" training or evaluation conducted to certify personnel in both upgrade (skill level award) and job qualification (position certification training).

Port Dawg. A common title for personnel within the Air Transportation career field. The term affectionately acknowledges their critical role in managing cargo, passengers, and all logistical functions to provide those capabilities worldwide.

Proficiency Training. Additional training, either in-residence, exportable advanced training courses, or on-the-job training, provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade.

Qualification Training (QT). Performance training designed to qualify an Airman who has transferred from one base or position to another specific position. The supervisor performs an initial evaluation that includes a review of all previously certified tasks checked against the newly assigned position's required tasks. Any tasks not previously completed are now required and this identifies that the member requires qualification training for the newly assigned duty position.

Qualification Training Package (QTP). An instructional package designed for use at the unit to qualify or aid qualification in a duty position, program, or on a piece of equipment. It may be printed, computer-based, or in other audiovisual media.

Resource Constraints. Resource deficiencies, such as money, facilities, time, manpower, and equipment that preclude desired training from being delivered.

Special Experience Identifier (SEI). SEIs may be used when specific experience or training is critical to the job and no other means is appropriate or available.

Specialty Training. Training process used to qualify Airmen in their assigned specialty.

Specialty Training Requirements Team (STRT). Air Force career field managers use this forum and quality control tool to determine and manage career field education and training requirements. For the Air Transportation career field, the STRT includes representation from Regular Air Force, Air National Guard, and the Air Force Reserve, to provide a Total Force perspective on career field decisions and future direction.

Specialty Training Standard (STS). An AF publication that describes an AF Specialty in terms of tasks and knowledge an Airman in that specialty may be expected to perform or to know on the

job. Also identifies the training provided to achieve a 3-, 5-,7-, or 9-skill level within an enlisted AF Specialty. It further serves as a contract between AETC and the functional user to show which of the overall training requirements for an AFSC are taught in formal schools and correspondence courses.

Standard. An exact value, a physical entity, or an abstract concept, the appropriate authority, custom, or common consent sets up and defines to serve as a reference, model, or rule in measuring quantities or qualities, developing practices or procedures, or evaluating results. A fixed quantity or quality.

Task Qualification Training (TQT). Training conducted after Chemical, Biological, Radiological, Nuclear, and High-Yield Explosive defense classroom training in which individuals perform wartime mission essential tasks in a simulated wartime environment while wearing full ground crew individual protective equipment or aircrew individual protective equipment. Headquarters AF, MAJCOM and local Functional Area Managers identify wartime mission essential tasks. For additional information/requirements, see DAFI 10-2501, *Emergency Management Program* and DAFI 10-2503, *Chemical, Biological, Radiological, Nuclear CBRN Defense Program*.

Task Training Guide (TTG). Standardized unit-level training and evaluation source documents used throughout the air transportation community and will be completed prior to signing off associated tasks.

Total Force. Organizations, units, and individuals that comprise the Air Force's resources for meeting its mission. This includes RegAF, Air National Guard, and Air Force Reserve military personnel, and civilian personnel.

Transportation Proficiency Center (TPC). Located at Dobbins ARB, GA, the Air Force Reserve Command TPC provides 2T2X1 AFSC training to Active Duty, Guard and Reserve personnel. The TPC offers training for Air Transportation initial, supplemental, and advanced training requirements through in-residence courses, distance learning, and mobile training teams (MTT). The TPC also provides additional specialized transportation training for DoD Total Force personnel and partner agencies.

Upgrade Training (UGT). Mandatory training that leads to attainment of a higher level of proficiency.

Utilization and Training Workshop (U&TW). Career field managers use the utilization and training workshop process to develop and review training programs within an Air Force specialty or civilian occupational series. The goal of the utilization and training workshop process is to develop the architecture for effective life-cycle training to be provided at appropriate points throughout a career path and to ensure that personnel within the specialty or series are properly employed. For the Air Transportation career field, the U&TW includes representation from Regular Air Force, Air National Guard, and the Air Force Reserve, to provide a Total Force perspective on career field decisions and future direction.

Wartime Tasks. Those tasks that must be taught when courses are accelerated in a wartime environment. In response to a wartime scenario, these tasks will be taught in the 3-level course in a streamlined training environment. These tasks are only for those career fields that still need them applied to their schoolhouse tasks.

SECTION A – GENERAL INFORMATION

PURPOSE OF THE CFETP

1. This CFETP provides the information necessary for CFMs, MFMs, commanders, Unit Training Managers (UTM), supervisors and trainers to plan, develop, manage, and conduct an effective and efficient career field training program. The plan outlines the training individuals in this Air Force specialty should receive to develop and progress throughout their career. This plan identifies initial skills, upgrade, qualification, advanced and proficiency training. Initial skills training is the Air Force specialty specific training an individual receives upon entry into the Air Force or upon retraining into this specialty for award of the 3-skill level. Normally, this training is conducted by AETC at one of the technical training centers. Upgrade training identifies the mandatory courses, task qualification requirements, and correspondence course completion requirements for award of the 3-, 5-, 7-, 9-skill level. Qualification training is actual hands-on task performance training designed to qualify a member in a specific duty position. This training program occurs both during and after the upgrade training process. It is designed to provide the performance skills and knowledge required to do the job. Advanced training is formal specialty training used for selected service members. Proficiency training is additional training, either in-residence or exportable advanced training courses, or OJT provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade. The CFETP has several purposes—some are:

1.1. Serves as a management tool to plan, manage, conduct, and evaluate a career field's training program. Also, it is used to help supervisors identify training at the appropriate point in an individual's career.

1.2. Identifies task and knowledge training requirements for each skill-level in the specialty and recommends education and training throughout each phase of an individual's career.

1.3. Lists training courses available in the specialty, identifies sources of training, and the training delivery method.

1.4. Identifies major resource constraints that impact full implementation of the desired career field training process.

USES OF THE CFETP

2. The plan is used by MFMs and supervisors at all levels to ensure comprehensive and cohesive training programs are available for everyone in the specialty.

2.1. AETC training personnel develop or revise formal resident, nonresident, field, and exportable training based upon requirements established by the users and documented in Part 2 of the CFETP. They also work with the CFM to develop acquisition strategies for obtaining resources needed to provide the identified training.

2.2. MFMs ensure their training programs complement the CFETP mandatory initial, upgrade, and competency requirements. OJT Training, resident training, and contract training or exportable courses can satisfy identified requirements. Ensure MAJCOM-developed training to support this AFSC is identified for inclusion into the plan.

2.3. Each individual completes the mandatory training requirements specified in this plan. The list of courses in Part 2 is used as a reference to support training

COORDINATION AND APPROVAL

3. The CFM is the approval authority. Also, the CFM will initiate an annual review of this document to ensure currency and accuracy. (T-1) MAJCOM representatives and AETC training personnel will identify and coordinate on the career field training requirements. (T-2) Using the list of courses in Part 2, ensures elimination of duplicate training.

SECTION B – CAREER PROGRESSION AND INFORMATION

SPECIALTY SUMMARY

1. Performs and manages air transportation activities. Plans, schedules and processes eligible passengers and cargo for air movement. Loads and unloads passengers, cargo, and baggage moved on military and commercial-contract aircraft. Prepares and maintains air movement records and reports. Performs aircraft cleaning services and delivers meals and comfort item supplies to aircraft. Operates forklifts and aircraft loading equipment. Uses computer systems to provide in-transit visibility over passenger and cargo movement operations. Related DoD Occupational Subgroup: 155300.

DUTIES AND RESPONSIBILITIES

2. Supports the Department of Defense's capability to move passengers and air cargo worldwide. Plans, organizes, directs, coordinates, and controls air transportation activities. Determines and justify personnel, equipment, and facilities required to accomplish air transportation functions. Supplements policies, directs personnel, and establishes procedures to process, load, document, and report passengers and cargo transported by air. Inspects airlift activities for compliance and recommends corrective action. Conducts personnel and equipment management surveys, and provides technical assistance as required. Enforces safety, quality control, and security measures.

2.1. Offers customer information on flight schedules, routes, air movement requirements, baggage limitations, and specifics on local facilities. Performs procedures to check in, process, schedule, transport, and escort passengers to and from aircraft. Ensures all passenger border clearance requirements have been met. Operates terminal security equipment and conducts passenger and baggage security inspections. Reviews passenger travel authorizations for validity and accuracy. Applies tariff rates, collects fares, and accounts for documents and monies. Use automated systems to provide in-transit visibility and to document passenger movement operations. Develops procedures for handling special category passengers.

2.2. Verifies eligibility of cargo offered for airlift. Ensures all cargo documentation, packaging, labeling, and marking requirements, and border clearance requirements have been met. Determines quantity and type of cargo to be loaded according to aircraft allowable cabin load. Selects, assembles, palletizes, and transports cargo loads to and from aircraft and storage areas. Checks cargo against manifests and annotates shipment overages, shortages, or damages. Secures cargo with appropriate restraint equipment. Uses automated systems to provide in-transit visibility and to document cargo movement operations. Determines and implements necessary safety and security precautions for handling and storing hazardous materials, special cargo, mail, and baggage

2.3. Performs air terminal operations and fleet service functions. Prepares, completes, and maintains air movement records, documents, and reports. Selects load, prepares load plans,

and computes aircraft center of balance. Plans and manages fleet service activities to provide cleaning, lavatory servicing, and meal delivery on aircraft. Completes actions to requisition, store, and issue expendable and nonexpendable items for use on aircraft.

COMPETENCIES

3. The Air Force defines competencies as a combination of knowledge, skills, abilities, and other characteristics that manifest in observable and measurable pattern of behaviors required for mission success. The Air Transportation community has rebuilt the entire training platform by using competencies to identify the behaviors that are needed to be successful on the job. This has been accomplished by identifying and integrating the 2T2X1, Air Transportation, occupational competencies and leveraging the Air Force's foundational competencies in a manner that provides all Airmen with transparent and unbiased pathways towards their own successful development.

3.1. Airmen's Foundational Competencies. The foundational competencies are a set of accepted and valued competencies, which enable success across a wide array of DAF missions, roles, functions, and duties. These competencies are the core of Airmen development and enable Airmen with tools, pathways, and capabilities to improve their performance in any job, specialty, or situation. The foundational competencies are grouped into different categories of Developing Self, Developing Others, Developing Ideas, and Developing Organization. Airmen can go to myVector (search DAF Competencies/Skills) to complete a self-assessment, which will have them evaluate themselves on the 23 Airmen's foundational competencies or a 360-degree assessment, where subordinates, peers, and leaders can also provide feedback. The assessment tools will provide Airmen with immediate feedback on personal strengths and areas for improvement. Additionally, a personal improvement plan with targeted resources (videos, reading content, developmental opportunities) are provided for continued self-development.

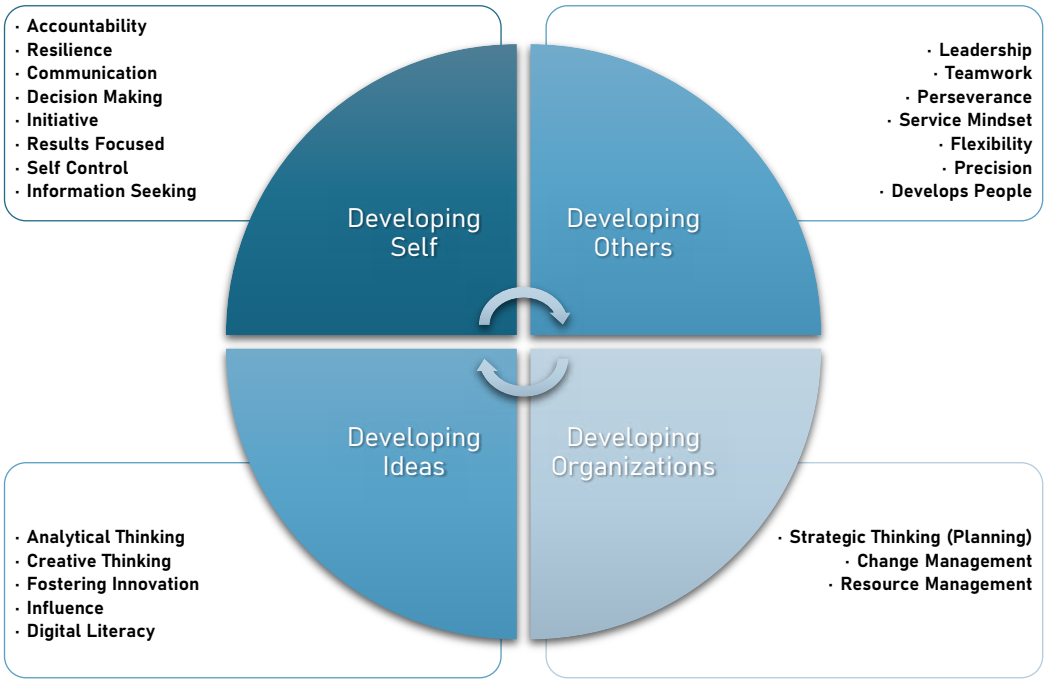

FIGURE 1. AIRMAN'S FOUNDATIONAL COMPETENCIES

3.2. Occupational Competencies. Occupational competencies are a set of competencies required of all Airmen within a specific workforce category. These competencies provide a

framework that describes the knowledge, skills, abilities, and other characteristics needed to perform that function's mission successfully.

3.2.1. Occupational Competency Model. A career field's competencies can be viewed in a competency model, which is an organized collection of competencies pertinent to the career field. The occupational competency model provides a framework to effectively assess, maintain, and monitor the competencies required for mission success for Airmen within the Air Transportation community. The occupational competency modeling follows a distinct process with continued involvement from the career field and allows Port Dawgs to see how their task lists, OJT, formal courses, and other training, education, and experiences are aligned to the career field's strategic objectives.

3.2.2. Career fields work with trained competency experts to identify and develop their competency model, which consists of the competencies, sub-competencies, and definitions. Occupational competency models will be different for each career field. The model focuses on integrating not just the technical components, but also leadership, management, combat, joint, all-domain, and social mastery competencies required for Airmen to succeed in their career field. Figure 2 provides an example of a competency model for the 2T2X1 career field.

Competency	Sub-Competency	Sub-Competency Description
Communication	Communication	The successful conveyance of ideas and expectations for the purpose of achieving desired priorities, initiatives, objectives, and goals
Management and Development	Program Management	The navigation of applicable guidance to achieve all directed program objectives required for mission effectiveness
	Resource Management	The planning, scheduling, and allocation of funding, equipment, weapons systems, facilities, and partnerships to ensure mission effectiveness and meet operational requirements
	Personnel Development	The process of maximizing talent and deliberately developing Port Dawgs to be multi-capable leaders across the logistics enterprise
Port Operations	Air Terminal Operations	Aerial Port Command and Control (C2) functions to include gathering, processing, and disseminating information
	Freight Operations	The performance of all aspects of cargo movement aboard aircraft
	Pax Operations	The performance of all aspects of passenger movement aboard aircraft
	System Operations	Utilizing the network of integrated information systems that enable in-transit visibility and real-time decision-making
Aerial Delivery Operations	Aerial Delivery Operations	The process in which cargo is prepared for and loaded onto aircraft for air drop
Fleet Operations	Fleet Operations	The performance of all aspects of fleet operations aboard aircraft

FIGURE 2. AIRMAN'S FOUNDATIONAL COMPETENCIES

3.2.3. Occupational Competency Rubric. After a model is developed, a team of subject matter experts begin building competency rubrics, which consists of the competency, a description of the competency, proficiency levels, and measurable and observable behaviors. The competency rubrics will help Airmen learn which behaviors are aligned to the career field's strategic direction, the professional developmental expectations, and the criteria for success. Figure 3 provides an example of a competency rubric for 2T2X1career field.

Competency	Proficiency Levels	Observable Behaviors
Port Operations	***Expert*** Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency	- Develops operating instructions/business rules to enable airlift to meet installation specific mission requirements - Advocates for regulatory guidance and policy review to recommend changes to freight operations
Sub-Competency **Freight Operations**	***Advanced*** Consistency of Application: Sustained application of competency over time in complex situations	- Leads teams to complete multiple freight requirements simultaneously - Conducts operations to certify cargo to enable airlift - Performs duties requiring advance capacity (e.g. Load Planning, Joint Inspection, Special Handling)
Description **The performance of all aspects of cargo movement aboard aircraft.**	***Intermediate*** Consistency of Application: Sustained application of competency over time in a variety of situations	- Guides teams in preparing and loading cargo for airlift - Leads team to complete singular freight tasks - Identifies and corrects freight discrepancies to sustain flow of operations
Supporting Competencies **Accountability** **Change Management** **Communication** **Creative Thinking**	***Basic*** Consistency of Application: Sustained application of competency over time	- Performs as load team member to enable cargo airlift - Completes cargo build and break processes to enable cargo airlift - Operates material handling equipment for safe transport of cargo

FIGURE 3. 2T2X1, AIR TRANSPORTATION, OCCUPATIONAL COMPETENCY RUBRIC FOR FREIGHT OPERATIONS

Competency	Proficiency Levels	Observable Behaviors
Port Operations		The competency section states the competency group.
Sub-Competency **Freight Operations**		The sub-competency section states the narrower category that forms part of the competency group. **Note:** Some models may only consist of a competency and not include a sub-competency.
Description **The performance of all aspects of cargo movement aboard aircraft.**		The description section provides a statement that gives details about the sub-competency, enabling career field members to better identifying and executing understand how sub-competency relates to the AFS.
Supporting Competencies **Accountability** **Change Management** **Communication** **Creative Thinking**		The supporting competencies section are supported level competencies that are linked to the success of the sub-competency. These competencies lend themselves more toward areas like values, traits, and attitudes. These competencies were included as part of a larger survey that went out to the entire AFS; respondents were asked to rate the top supporting competencies that believe will attribute to higher successful performance within the sub competency.

FIGURE 4A. COMPETENCY RUBRIC SECTION 1

Proficiency Levels	
Expert Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency	The Proficiency levels are broken into four parts: expert, advanced, intermediate, and basic. Under each proficiency level are predetermined criteria selected by a group of subject matter experts (SME) from the 2T2 career field and validated by the AFS. The criteria were used as the basic to develop the observable behaviors. These criteria provide parameters for the behaviors, which are consistent but progressive in nature as a member moves up the scale from basic to expert. Some of the criteria (e.g. depth of knowledge, consistency of application/complexity, and thinking challenge) allows an individual to become an expert through the experience gained in a particular job and over a period of time. For example, the Port Dawg can quickly or slowly move up the different levels of proficiency in the same position at the flight: the move quickly because they are exposed to an abundance of situations. While other criteria (e.g. scope, impact, and reach of influence) requires more of a hierarchical approach to gain the experience needed to progress through the competency levels. Moving through the proficiency levels may be difficult to do at certain jobs. For example, if the scope at the expert level requires job integration with the DAF-level, then the individual ay have to be in a position where they can gain that experience (i.e. at Higher Headquarters (HHQ), wing, or an organization with far reaching capabilities).
Intermediate Consistency of Application: Sustained application of competency over time in a variety of situations	
Basic Consistency of Application: Sustained application of competency over time	

FIGURE 4B. COMPETENCY RUBRIC SECTION 2

Observable Behaviors	
-Develops operation instructions/business rules to enable airlift to meet installation specific mission requirements -Advocates for regulatory guidance and policy review to recommend changes to freight operations	The observable behaviors are statements of what can be observed from a Port Dawg manifesting competency at the respective competency level. They provide objective evidence that the Port Dawg possesses the competency level, and shows what effective performance looks like. The behaviors are written to be specific enough so they can be observable and lend themselves towards measurement.
-Leads teams to complete multiple freight requirements simultaneously -Conducts operations to certify cargo to enable airlift -Performs duties requiring advance capacity (e.g. LP, JI, SH)	
-Guides teams in preparing and loading cargo for airlift -Leads team to complete singular freight tasks -Identifies and corrects freight discrepancies to sustain flow of operations	
-Performs as load team member to enable cargo airlift -Completes cargo build and break processes to enable cargo airlift -Operates material handling equipment for safe transport of cargo	

FIGURE 4C. COMPETENCY RUBRIC SECTION 3

3.3. Another key component within the rubric is the supporting competencies section at the bottom left-hand corner. These are the top four supporting competencies that can help Port Dawgs excel and be successful in that particular sub-competency. Some of these supporting competencies are tied directly to the Port Dawg's Foundational Competencies, while others may be unique to the career field. Having these supporting competencies identified and linked to a career field's competency model can cultivate those underlying characteristics needed to succeed on the job. Leaders, supervisors, trainers, instructors, or mentors can now set members up for greater success by building these supporting competencies and placing their Port Dawgs in situations where they can apply those strategies. All these elements come together to ensure we can develop Port Dawgs who are better prepared, present, and future mission focused, and ready to succeed in any situation. Additionally, DAFMAN 36-2643, Coaching and Mentoring Program, has information on how competencies can be used when an established mentoring strategy is put into effect to foster and develop Port Dawg Airmen.

3.4. Competency Development. The intent of moving towards a competency-based system is to sharpen our Port Dawg's tactical expertise, operational competence, strategic vision, and joint proficiency to lead and execute the full spectrum of DAF missions. This occurs not in a classroom but on the job by combining education, training, and experiences to provide Airmen with a better developmental pathway as they move along their careers. Port Dawgs are still required to complete specific training courses, core tasks, and other training requirements in order to attain a 3, 5, and 7-skill levels. Competency development allows our Airmen to move beyond the minimum career field requirements and begin addressing developmental gaps and strengthening their capabilities. The information included within the competency model will allow members within the Air Transportation community to manage their professional growth and development by identifying their strengths and weaknesses against clear and objective behaviors within the competency model.

SKILL/CAREER PROGRESSION

4. Skill/Career Progression. Adequate training and timely progression from the apprentice to the superintendent skill-level play an important role in the Air Force's ability to accomplish its mission. Active training records must be maintained for SMSgts and below. It is essential that everyone involved in training do their part to plan, manage, and conduct an effective training program. The guidance provided in this part of the CFETP will ensure each individual receives viable training at appropriate points in their career.

4.1. Apprentice 3-Level. Upon completion of initial skills training by attending the Air Transportation Apprentice Course, trainees will work with a trainer to enhance their knowledge and skills. They will utilize the MTL for the assigned duty position, and other exportable courses to progress in the career field. Once qualified on a task ("signed off"), a trainee may perform the task unsupervised. **Note:** With 2T2 CFM approval, ARC MFMs will determine training requirements for award of 2T231 AFSC to prior service personnel. AFRC personnel with prior service may complete TPC Air Transportation Basic Course. **Note:** RegAF prior service personnel not authorized by AFPC to attend the Air Transportation Apprentice Course may coordinate with the TPC Superintendent to send members to the TPC Air Transportation Basic Course. Based on availability and approval, the course will be unit funded.

4.2. Journeyman 5-Level. Once upgraded to the 5-level, a journeyman will enter into continuation training to broaden their experience base. 5-levels may be assigned job positions such as information control, passenger service duties, fleet service duties, cargo and load team member, and various staff positions. For promotion testing purposes, individuals will use

material as designated in the Enlisted Promotions References and Requirements Catalog (EPRRC). Members are strongly encouraged to continue their education toward a CCAF degree.

4.3. Craftsman 7-Level. A craftsman can expect to fill various supervisory and management positions such as shift supervisor, section chief, and senior controller. They will also be assigned to work in staff positions. 7-levels should take courses or obtain added knowledge on management of resources and personnel. For award of the 7- level, all 7-level tasks must be signed off. Members are strongly encouraged to complete academic education through CCAF and higher degree programs.

4.4. Superintendent 9-Level. A 9-level can be expected to fill positions such as flight chief, NCOIC, superintendent, and various staff jobs. Experience and general knowledge of air transportation systems and mobility operations to include hub and spoke dynamics, air transportation organizational constructs, and passenger and cargo movement procedures through the defense transportation system. Additional training in the areas of budget, manpower, resources and personnel management should be pursued through continued education. Additional higher education and completion of courses outside of the career AFSC are also recommended. **Note:** ARC personnel must have a minimum of two years as a 2T271, proficient in all 7-level tasks, and capable of performing shift supervision roles conducive to assigned rank before award of the 9-skill level.

TRAINING DECISIONS

5. The CFETP has undergone a considerable revision towards building a competency-based training and development platform for the Air Transportation career field. A significant change has been to shift the focus from task-based training to one that is more centered on outcomes-based learning. A task is a unit of work activity or operation which forms a significant part of a duty. These are singular in nature and are usually accomplished in one continuous action, which also can occur independently of other tasks. Conversely, outcomes are learning goals that typically consist of a multitude of tasks. These outcomes are actions and performances that embody and reflect the learner's competence in using content, information, ideas, and tools successfully. Focusing on learning outcomes allows organizations, leaders, supervisors, and trainers to incorporate foundational competencies and underlying characteristics (values, traits, attitudes) into learning, which is necessary for developing Airmen with the competencies needed for future challenges. The following decisions were made as a result of close coordination between HQ AETC, 2AF Technical Training, schoolhouse instructors and staff, field SMEs, functional managers and the AFCFM. The final training requirements are then approved by the AFCFM.

5.1. The CFETP uses a building block approach (simple to complex) to encompass the entire spectrum of training requirements for the Air Transportation career field. The spectrum includes a strategy for when, where, and how to meet the training requirements. The strategy must be apparent and affordable to reduce duplication of training and eliminate a disjointed approach to training.

5.2. Initial Skills Training. The integration of the competencies and learning outcomes into the course projects a course length decrease from 23 academic days to 10 days. The number of tasks was reduced from 68 to 23. Additionally, overall class size (seats per course) will be limited to 15 students, allowing a renewed focus on competency-based learning. The course will see a significant shift in the amount of hands-on training compared to the previous course.

5.3. 5-Level Upgrade Training Requirements. 5-level upgrade will be accomplished through completion of OJT training and core tasks. The core tasks are the minimum number of tasks an individual must be certified on to be upgraded to the next skill level.

5.4. 7-Level Upgrade Training Requirements. 7-level upgrade will be accomplished through completion of OJT training and core tasks. The core tasks are the minimum number of tasks an individual must be certified on to be upgraded to the next skill level.

5.5. 9-Level Upgrade Training Requirements. 9-level upgrade will be accomplished through completion of OJT training and core tasks. The core tasks are the minimum number of tasks an individual must be certified.

SPECIAL EXPERIENCE IDENTIFIERS (SEI)

6. SEI "3AJ" is awarded to Airmen who have completed Hazardous Material Inspection (Initial) and Joint Inspection training, and who have accumulated at least 12 months of experience in those duties. **SEI "4AD"** is awarded to Airmen who have completed the Parachute Rigging Course (Phase 1) and have been actively rigging for 12 or more consecutive months. Refer to the Department of the Air Force Enlisted Classification Directory (DAFECD) Web page

COMMUNITY COLLEGE OF THE AIR FORCE

7. Enrollment in the CCAF of the Air Force occurs upon completion of BMT. CCAF provides the opportunity to obtain an associate of applied sciences degree. In addition to its associate degree program, CCAF offers a number of certifications that can be found in their CCAF general catalog.

7.1. Professional Certification. CCAF offers multiple professional certifications based on specific education, experience and qualification requirements. For additional information on these and other certifications, visit the CCAF web site: https://www.my.af.mil/gcss-af/USAF/content/CERT

7.2. CCAF Instructor Certification (CIC). The CIC program replaced the Occupational Instructor Certification (OIC) on 1 January 2011. The purpose of the CIC is to recognize the instructor's extensive faculty development training, education and qualification required to teach a CCAF course and formally acknowledge the instructor's practical teaching experience. For more information on this certification, visit: https://www.my.af.mil/gcss-af/USAF/AFP40/d/s6925EC13447C0FB5E044080020E329A9/Publications/Certifications/CIC_Brochure.pdf

7.3. Air Force Credentialing Opportunities On-Line (AF COOL). Air Force COOL is a pathway for enlisted Airmen to earn industry recognized professional certifications, licenses to enhance their active-duty work, and to prepare them as they transition to the civilian job market. To view certification opportunities, visit AF COOL at: https://afvec.us.af.mil/afvec/af-cool/welcome

7.4. Degree Requirements. All service members are automatically entered into the CCAF program. Prior to completing an associate degree, the 5 level must be awarded and the following requirements must be met: (T-1) **Note:** Refer to the CCAF general catalog for a listing of all degree requirements as they are subject to change and some AFSCs may fall under additional degree programs.

Degree Requirements	Semester Hours
Technical Education	**24**
Leadership, Management, and Military Studies	**6**
General Education	**15**
Program Elective	**15**
Total	**60**

7.4.1. Technical Education (24 semester hours). A minimum of 9 semester hours of technical Core subjects and courses must be applied, and the remaining semester hours applied from technical core or technical elective subjects and courses. (T-1) (Identify any additional areas).

7.4.2. Leadership, Management, and Military Studies (6 semester hours). Professional military education and/or civilian management courses.

7.4.3. General Education (15 Semester Hours). Applicable courses must meet the criteria for application of courses to the general education requirements and agree with the definitions of applicable general education subject and/or courses as provided in the CCAF general catalog. (T-1)

7.4.4. Program Elective (15 Semester Hours). Satisfied with applicable technical education; leadership, management, and military studies; or general education subjects and courses, including natural science courses meeting general education requirements application criteria. Maximum 9 semester hours of CCAF degree applicable technical credit otherwise not applicable to this program may be applied. See the CCAF general catalog for details regarding the associates of applied sciences degree for this specialty.

7.4.5. Off-Duty Education. Additional off-duty education is a personal choice encouraged for all Airmen. Individuals desiring to become an AETC instructor should be actively pursuing an associate degree. A degreed faculty is necessary to maintain accreditation through the Southern Association of Colleges and Schools Commission on Colleges.

ENLISTED CAREER PATH

8. Refer to DAFI 36-2685, Total Force Enlisted Development Education to view the Enlisted Career Path. The Enlisted Career Path provides education and training requirements, AF average promotion sew on times, high year tenures, etc.

FIGURE 5. FUNCTIONAL, CAREER BROADENING, DEVELOPMENTAL SPECIAL DUTY AND LEADERSHIP PATHS (ENLISTED)

CAREER DEVELOPMENT PATH

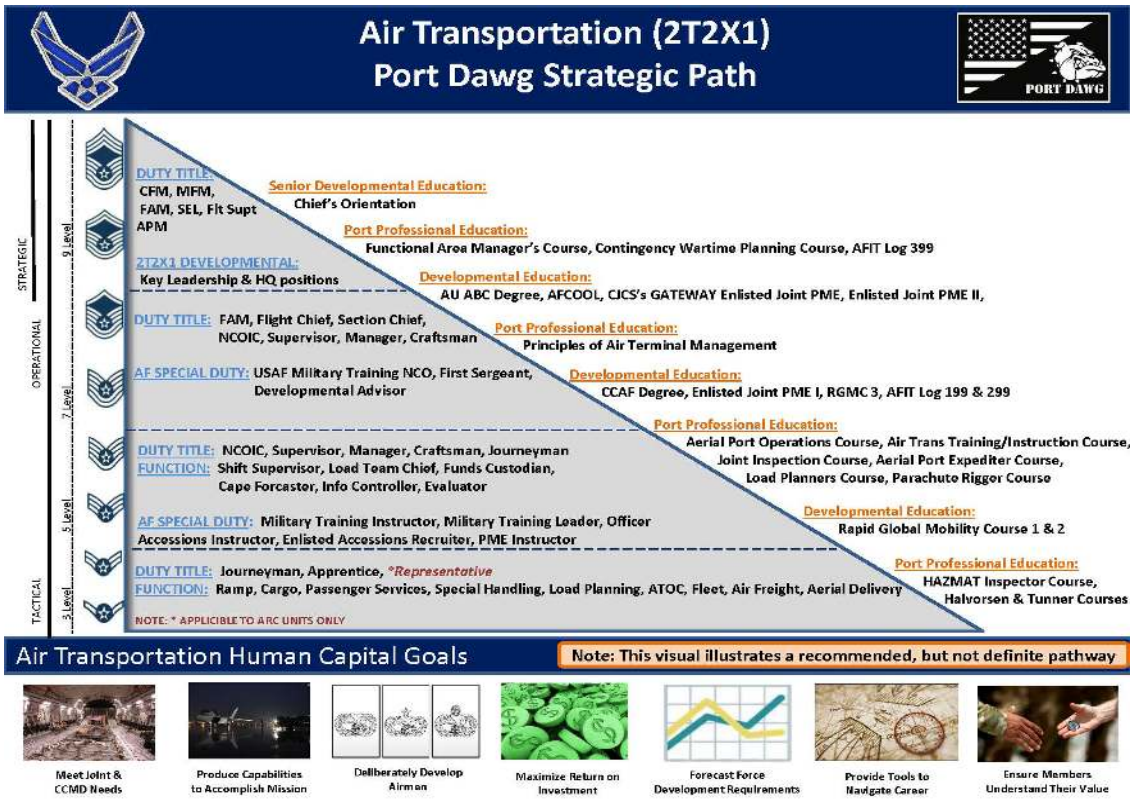

FIGURE 6. CAREER DEVELOPMENTAL PATHS (ENLISTED)

9. The 2T2X1 Career Development Path depicts the timeline an Airman needs to demonstrate competency to perform duties within the Air Transportation career field, while illustrating recommended AFSC-specific training for personal development. The graph serves as a "roadmap" to provide consistency in how we rotate our Airmen. For example, an Airman should be competent in "Foundational Competencies" before progressing to Command, Control and Evaluation (C2E) Competencies (i.e. proficient in passenger and cargo ops before working ATOC). Following this roadmap ensures consistency, more proficient Airman serving in C2E and management sections, and coincides with our deployment requirements. Leadership must make every effort to rotate Airman throughout the available foundational competencies before moving them to C2E competencies and eventually management positions.

SECTION C – SKILL LEVEL TRAINING REQUIREMENTS

PURPOSE

1. Skill-level training requirements in this specialty are defined in terms of tasks and knowledge requirements. This section outlines the specialty qualification requirements for each skill-level in broad, general terms and establishes the mandatory requirements for entry, award, and retention of each skill-level. The specific task and knowledge training requirements are identified in the STS at Part 2, Section A and B of this CFETP.

SPECIALTY QUALIFICATIONS

2. Apprentice 3-Level Training:

2.1. Specialty Qualification.

2.1.1. Knowledge. Passengers and cargo movement functions to include transport aircraft types, capabilities, and configurations; weight and balance factors; airlift transportation directives and documentation; cargo securing techniques; border clearance requirements; operation of material handling and other types of loading equipment or devices, fleet service functions; automated data processing equipment and its application in airlift activities; passenger service functions, and customer relations principles; and unilateral aircrew training (UAT) methods and equipment.

2.1.2. Education. For entry into this specialty, completion of high school or a general educational development equivalency with courses in English, Computer Operation, and Mathematics is desirable.

2.1.3. Training. For award of 2T231 AFSC, completion of the basic air transportation course is mandatory. **Note:** ARC personnel with prior service may complete TPC Air Transportation Basic Course. In addition, these personnel must complete knowledge training on all tasks taught in the initial skills course combined with additional mandatory requirements identified by the AFRC MFM and approved by the 2T2 CFM. Only after completing mandated OJT are prior service personnel awarded a 3-skill level.

2.1.4. Experience. After arrival at first duty station, (1) orient the trainee and conduct initial evaluations, (2) evaluate and provide performance-based training on the tasks taught in technical school, and (3) identify and start training in additional tasks required to fully utilize trainee in their duty position.

2.1.5. Training Sources. The 2T2X1 AFSC STS provides the knowledge and task requirements for upgrade to the 3-skill level.

2.1.6. Implementation. Entry into training occurs upon completion of basic training. 2T231 AFSC is awarded following successful completion of the Air Transportation Apprentice Course or meeting prior service requirements in paragraph 2.1.3.

3. Journeyman 5-Level Training:

3.1. Specialty Qualification.

3.1.1. Knowledge. Passengers and cargo movement functions to include transport aircraft types, capabilities, and configurations; weight and balance factors; airlift transportation directives and documentation; cargo securing techniques; border clearance requirements; operation of material handling and other types of loading equipment or devices, fleet service functions; automated data processing equipment and its application in airlift activities; passenger service functions, and customer relations principles; and UAT techniques and equipment. This is not all inclusive, refer to the CFETP part II for mandatory core tasks.

3.1.2. Training. Upgrade training to the 5-skill level in this specialty consists of the completion of all 3- and 5- level core tasks identified in the STS. Once tasks are completed members are eligible for skill level upgrade. There is no minimum time in training requirement. The maximum time in training requirement is 24 months for active-duty personnel and 36 months for reserve and guard personnel.

3.1.3. Experience. Qualification in and possession of 2T231 AFSC. In addition, experience in functions such as loading and unloading aircraft; operating automated or manual materials handling and other loading equipment and processing, scheduling, and maintaining records related to passenger and cargo movement.

3.1.4. Training Sources and Resources. The STS identifies mandatory core task items required for upgrade.

3.1.5. Implementation. Enter personnel into 5-skill level upgrade training as of the date arrived station (DAS). Successful completion of all 3- and 5- level core tasks identified in the STS is required for upgrade to the 5-skill level.

4. Craftsman 7-Level Training:

4.1. Specialty Qualification.

4.1.1. Knowledge. Passengers and cargo movement functions to include transport aircraft types, capabilities, and configurations; weight and balance factors; airlift transportation directives and documentation; cargo securing techniques; border clearance requirements; operation of material handling and other types of loading equipment or devices, fleet service functions; automated data processing equipment and its application in airlift activities; passenger service functions, and customer relations principles; and UAT techniques and equipment. This is not all inclusive, refer to the CFETP part II for mandatory core tasks

4.1.2. Training. Upgrade training to the 7-skill level in this specialty consists of the completion of all 3-, 5-, and 7-level core task items identified in the STS. Once tasks are completed members are eligible for skill level upgrade. There is no minimum time in training requirement.

The maximum time in training requirement is 24 months for active-duty personnel and 36 months for reserve and guard personnel.

4.1.3. Experience. Qualification in and possession of 2T251 AFSC. In addition, experience supervising functions such as preparing aircraft load plans; loading and unloading aircraft; operating automated and manual materials handling equipment, processing, scheduling, and maintaining records on passenger movement by airlift.

4.1.4. Training Sources and Resources. Successful completion of 7-level core task items satisfies the knowledge and task requirements specific for the 7-level.

4.1.5. Implementation. Personnel selected for promotion to SSgt enter 7-level upgrade training the first day of the promotion cycle (RegAF: 01 September each year). Stripes for Exceptional Performers (STEP) promotes and ARC personnel are entered into 7-level upgrade training upon promotion to SSgt. Retrainees are entered into 7-level upgrade training upon completion of 5-level if already a SSgt. 7-level is awarded upon completion of all 5 and 7-level core tasks and all duty position tasks. Attendance in the Principles of Air Transportation Management (PATM) course is highly encouraged upon award of the 7-skill level.

5. Superintendent 9-Level Training:

5.1. Specialty Qualification.

5.1.1. Knowledge. Mandatory knowledge includes: passengers and cargo movement functions to include transport aircraft types, capabilities, and configurations; weight and balance factors; airlift transportation directives and documentation; cargo securing techniques; border clearance requirements; operation of material handling and other types of loading equipment or devices, fleet service functions; automated data processing equipment and its application in airlift activities; passenger service functions, and customer relations principles; and UAT techniques and equipment.

5.1.2. Training. An individual must be a SMSgt, be trained and qualified to the task/subject knowledge level found in Attachment 2 and have completed all 3-, 5-,7-, and 9-level core tasks for the award of 2T291 skill-level.

5.1.3. Experience. Qualification in and possession of 2T271 AFSC. Also, experience and general knowledge of air transportation systems and mobility operations to include hub and spoke dynamics, air transportation organizational constructs and passenger and cargo movement procedures through the defense transportation system.

5.1.4. ARC Only. ARC personnel must have a minimum of two years as a 2T271, proficient in all seven-level tasks, as outlined in CFETP 2T2X1, and capable of performing shift supervision roles conducive to assigned rank before award of the 9-skill level.

5.1.5. Training Sources/Resources. Completion of all applicable QTPs and/or TTGs should satisfy knowledge and experience requirements listed above. In addition, the Logistics Readiness SNCO Course will provide increased knowledge on the entire Logistics Readiness enterprise so that Air Transportation SNCOs are better prepared to serve in LRS leadership, staff and/or key leadership positions.

6. Other. The following are mandatory as indicated:

6.1. See DAF Enlisted Classification Directory (DAFECD) via MyFSS for current entry requirements.

6.1.1. For entry, award, and retention of AFSCs 2T211/31/51, must possess a valid state driver's license to operate government motor vehicles (GMV) in accordance with DAFI 24-301, Ground Transportation, as well as the ability to speak distinctly and communicate well with others.

6.1.2. Specialty requires routine access to Secret material or similar environment. For award and retention of 2T2X1, completion of a current National Agency Check, Local Agency Checks and Credit (NACLC) according to DoDMAN 5200.02_DAFMAN16-1405, *Department of Air Force Personnel Security Program*, and maintain local network access IAW AFI 17-130, *Cybersecurity Program Management*, and DAFMAN17-1301, *Computer Security*. **Note:** Award of the 3-skill level without a completed NACLC is authorized provided an interim Secret security clearance has been granted according to DoDMAN 5200.02_DAFMAN16-1405.

6.1.3. Retraining into the 2T2XX career field within the Air Force Reserve or Air National Guard is restricted to the grades of E-6 and below with less than 12 years of Total Federal Military Service.

SECTION D – RESOURCE CONTRAINTS

PURPOSE

1. This section identifies known resource constraints which preclude optimal/desired training from being developed or conducted, including information such as cost and manpower. Narrative explanations of each resource constraint and an impact statement describing what effect each constraint has on training are included. Also included in this section are actions required, office of primary responsibility, and target completion dates. Resource constraints will be, as a minimum, reviewed and updated annually.

2. 3-Level Training:

2.1. Constraints. To meet the annual demand for new Air Transportation specialists, which currently exceeds the training capacity at Ft. Lee, an alternate 3-level technical training site will be established at Little Rock AFB, Arkansas. This initiative aims to close the gap on student limit at Ft. Lee and the total number of required graduates. A Proof of Principle (PoP) will be conducted to test the viability of this second location. This test will run concurrently with the 345th Training Squadron's transition to the new Occupational Competency Model.

3. 5-Level Training:

3.1. Constraints. In many cases, ARC personnel are not co-located with active flight line operations or active-duty Aerial Port Squadrons, limiting access and ability for hands-on training. ARC personnel are heavily reliant on the availability of Annual Tour and Accelerated Mission Readiness Training (AMRT) programs and participation at AMC locations to achieve the necessary knowledge and skillsets required for 5-level upgrade. Additionally, access to CCMD and other MAJCOM funded exercises provides ideal training environments for members gaining and exercising new core task capabilities.

4. 7-Level Training:

4.1. Constraints. In many cases, ARC personnel are not co-located with active flight line operations or active-duty Aerial Port Squadrons, limiting access and ability for hands-on supervisory training in high-tempo environments. ARC personnel are heavily reliant on the availability of Annual Tour and professional development courses to achieve the advanced technical and leadership skills required for 7-level upgrade. Additionally, access to CCMD and other MAJCOM-funded exercises provides ideal environments for members to develop and apply supervisory and management capabilities.

PART II

SECTION A – SPECIALTY TRAINING STANDARD (STS)

1. Implementation. This Specialty Training Standard is used for technical training provided by AETC for all classes beginning on or after (01 October 2025).

2. Purpose. As prescribed in DAFMAN 36-2689 and this STS:

2.1. Lists in column 1 (Task, Knowledge, and Technical References) spell out the most common competencies and learning outcomes, knowledge, and technical references (TR) necessary for Airmen to perform duties in the 3, 5, and 7-skill level. In addition, column 1 includes the "behavior match" as outlined in the competency header for required behaviors. **Note:** Task are grouped by competency, sub-competency, and proficiency levels to aid task selection and reduce duplication. Supervisors may select tasks from any attachment to accurately define work performed.

2.2. Column 2 identifies Core Tasks and specialty-wide training. The "*" is placed in the column corresponding to the 3-, 5-, 7-, 9- skill level to identify specialty-wide training requirements for that level. These tasks and knowledge items are based on an analysis of the duties and responsibilities contained in the Department of Air Force Enlisted Classification Directory (DAFECD), The Official Guide to the Air Force Enlisted Classification Codes. Core Task STS line items are mandatory and must be completed before the 5-, 7-, or 9- skill level can be awarded.

2.3. Column 3 provides certification for OJT and is used to record completion of tasks and knowledge training requirements. If available, utilize automated training management systems to document qualifications. Use the Master Task List for the current unit to circle the appropriate items. Tasks and knowledge items status documentation must show a start date, completion date, trainee/trainer and certifier initials (when required).

2.4. Column 4 identifies the proficiency to be demonstrated on the job by the formal AETC school graduate as a result of training on the task/knowledge and the career knowledge provided by the correspondence course.

2.5. Qualitative Requirements. Attachment 1 contains the behavioral statement coding used to indicate the level of training and knowledge provided by resident training.

2.6. The STS becomes a job qualification standard (JQS) for on-the-job training when automated or placed in DAF Form 623, Individual Training Record. Document and certify completion of training IAW DAFM 36-2689, Training Program. Active training records must be maintained for SMSgts and below. Tasks are trained and qualified to the "go/no go" level. "Go" means the individual can perform the task without assistance and meet local demands for accuracy, timeliness, and correct use of procedures.

2.7. The STS is a guide for development of promotion tests used in the Weighted Airman Promotion System. Specialty Knowledge Tests are developed at the AETC Airman Advancement Division, by Senior Noncommissioned Officers with extensive practical experience in their career fields. Specialty Knowledge Tests are developed by subject matter experts who authenticate Weighted Airman Promotion System material and reference DAF Specialty-specific occupational analysis data. Questions are based upon study references listed on https://www.studyguides.af.mil/ .

2.8. 2T2 AFCFM Policy Exception. Core tasks not applicable/available at home station are not required for upgrade (units are not required to send personnel temporary duty (TDY) for core task training). **Note:** ARC personnel have established mechanisms for sending personnel TDY for required upgrade training, due to limited resources for hands-on training at many home station locations. All available options for Annual Tour, AMRT, formal training, and exercise participation must be pursued for a minimum of 15 months before determining that a core task cannot be accomplished.

3. Additional Requirements. MAJCOMs will use QTPs or TTGs to train to their utmost capability based on available equipment or tasks performed at a specific location. Partial use of QTP or TTG training steps is authorized if not all required resources exist locally. It is not necessary to send people to off-station training to meet requirements created by QTP or TTG compliance. **Note:** ARC personnel have established mechanisms for sending personnel TDY for required upgrade training, due to limited resources for hands-on training at many home station locations. All available options for Annual Tour, AMRT, formal training, and exercise participation must be pursued for a minimum of 15 months before determining that training tasks outlined in a QTP and/or TTGs cannot be accomplished

4. Recommendations:

4.1. Unit Training. Managers, superintendents, and supervisors will ensure personnel are trained on all applicable STS items. Active-duty, Reserve, and Guard training records must be maintained for SMSgts and below.

4.2. Graduate Performance. Report unsatisfactory performance of course graduates and any inadequacies of this CFETP to the 345 TRS/TRR, 711 B Avenue, Ft Gregg-Adams, VA 23801-1798, or call Customer Service Information Line DSN 473-2917, reference specific STS paragraphs.

SECTION B – COURSE OBJECTIVE LIST

SECTION C – SUPPORT MATERIAL

SECTION D – TRAINING COURSE INDEX

PURPOSE

1. This section of the CFETP identifies training courses available for the specialty and how the courses are used by each MAJCOM in their career field training programs.

2. Air Force In-Residence Courses.

COURSE NUMBER	TITLE	LOCATION	USER
L8ABP2T231	Air Transportation Apprentice	Ft. Lee, VA	DoD
L8AZP2T051	Hazardous Material Preparer (Initial)	Ft. Lee, VA	DoD
L6AZW2T051	Hazardous Material Preparer (Initial)	Mobile/Virtual	DoD

LCAZP2T251	Hazardous Material Inspector (Initial)	Ft. Lee, VA	DoD
L6AZW2T251	Hazardous Material Inspector (Initial)	Instructor Led DL	DoD
L9AZA2T251	Parachute Rigger Course (PRC) Phase 1	Ft. Lee, VA	DoD
PATM	Principles of Air Transportation Mgmt	Location Determined by 423 TRS (EC/EOS)	DoD
AMC APO	Aerial Port Operations	Location Determined by 423 TRS (EC/EOS)	DoD
ATTIC	Air Transportation Training Instructor Course	Location Determined by 423 TRS (EC/EOS)	DoD
C-17 APEX	C-17 APEX Load Director	Location Determined by 423 TRS (EC/EOS)	AMC
C-5 APEX	C-5 APEX Load Director	Location Determined by 423 TRS (EC/EOS)	AMC
ATSEP FTC	ATSEP Formal Training Course	Instructor Led DL	AMC
4J3ABR2T2X1-001	Air Transportation Basic Course	Dobbins ARB, GA	ARC
4J5AAO2T251-003	Hazardous Material Inspector (Initial)	Dobbins ARB, GA	ARC
4J6AAO2T251-003	Hazardous Material Inspector (Initial)	Mobile/Virtual	ARC
4J3AAR2T2X1-002	ICODES Familiarization Course	Dobbins ARB, GA	ARC
TPC JIC	Joint Inspection Course	Dobbins ARB, GA	ARC
TPC JIC	Joint Inspection Course	Mobile	ARC
TPC TUN	60K Tunner Operator Course	Dobbins ARB, GA	ARC
TPC HAL	25K Halvorsen Operator Course	Dobbins ARB, GA	ARC
TPC ALPI	Air Load Planning Course (Initial)	Dobbins ARB, GA	ARC
TPC ALPI	Air Load Planning Course (Initial)	Mobile	ARC

3. Exportable Courses

COURSE NUMBER	TITLE	LOCATION	USER
L6ARW2T251	Hazardous Material Inspector (Refresher)	Ft. Lee, VA/ MyLearning	AF
L6ARW2T051	Hazardous Material Preparer (Refresher)	Ft. Lee, VA/ MyLearning	AF
L6AAW2XXXX	Log-R SNCO course	JBSA, TX / MyLearning	AF Log

4. Courses Under Development/Revision

COURSE	TITLE	LOCATION	USER
LCABP2T231	Air Transportation Apprentice	Ft. Lee, VA	DoD

SECTION E – MAJCOM UNIQUE REQUIREMENTS

1. Qualification Training Package (QTP)/Task Training Guide (TTG). QTPs/TTGs are standardized AF/unit-level training and evaluation source documents used throughout the air transportation community and will be completed prior to signing off associated tasks in myTraining. Air transportation personnel are directed to utilize AF-approved QTPs for vehicle/MHE training and AFSC-approved TTGs for duty position qualification and upgrade training. Air transportation personnel will use QTPs and TTGs to train to the utmost capability based on available equipment or tasks performed at respective locations. Partial use of TTGs is authorized if not all required resources exist locally. It is not necessary to send people to off-station training to meet requirements created by TTG compliance. QTPs for vehicles are located on AF e-Publishing website and TTGs are located on the AMC/A4T SharePoint® website. The 2T2 AFCFM will manage TTG development to support air transportation CFETP line items. **Note:** ARC personnel have established mechanisms for sending personnel TDY for required upgrade training, due to limited resources for hands-on training at many home station locations. All available options for Annual Tour, AMRT, formal training, and exercise participation must be pursued for a minimum of 15 months before determining that training tasks outlined in a QTP and/or TTG cannot be accomplished.

2. Air Transportation Compliance Program (ATCP). Air transportation compliance program executed by commanders at the APS, AMS, 621 Contingency Response Wing (CRW), and AFIMSC units. This program provides commanders and MAJCOMs with assessments of a unit's ability to perform core air transportation procedures, ensuring standardized, repeatable, and technically compliant process execution. All Air Transportation personnel will follow guidance applicable to the entity they are assigned: DAFI 24-605V5, Chapter 4 for Air Mobility command (APS), AMS, and 621 CRW; Chapter 5 for AFIMSC Logistic Readiness Squadron (LRS), and other non-AMC 2T2 teams. Note: AFR and NGB are excluded from following ATCP guidance. AFR will follow DAFI 24-605V4 and NGB will follow DAFI 20-112 Logistics Readiness Quality Assurance Program (LR QA), for compliance.

3. Air Transportation Distant Learning (DL) courses. Completion of applicable courses as defined by the QTPs and/or TTGs is mandatory to be duty position qualified.

4. Hazardous Material Inspector or Preparer Training Eligibility.

4.1. Hazardous Material Inspector. Hazardous Material Inspector qualification is a requirement and a necessity for certain functional areas to safely and effectively execute mission responsibilities. Within the Air Transportation community, Hazardous Material Inspection qualification is required for members assigned to and fulfilling duties as Special Handlers and Joint Inspectors.

4.1.1. Initial Eligibility. Members who are currently assigned to a section or aligned to a UTC requiring Hazardous Material Inspector qualification or have been identified by their respective Functional Area Manager (FAM) or MFM as requiring Hazardous Material Inspector qualification to fulfill assigned tasking requirements. Full-Time Equivalents (FTEs), personnel assigned to a Logistics Readiness Squadron (LRS), and personnel assigned to an Air Transportation Function (ATF) are eligible to pursue Hazardous Material Inspector qualification regardless of grade or UTC alignment, if the qualification is required to perform assigned duties.

4.1.2. Refresher Eligibility. Members who are currently qualified as Hazardous Material Inspectors/Preparers but no longer meet the initial eligibility criteria listed in Section E,

paragraph 4.1.1, are permitted to maintain a Hazardous Material Inspector qualification and pursue refresher training through the web-based training found on myLearning. In-residence refresher for members no longer meeting initial eligibility criteria in Section E, paragraph 4.1.1 is not permitted as a primary option.

4.2. Hazardous Material Preparer. Authorizations for the Hazardous Material Preparer qualification are officially managed under the Traffic Management (2T0XX) career field. Members of the Air Transportation career field do not have an inherent responsibility to perform hazardous material preparation and should only do so under unique circumstances. Units should not exceed 15% of their authorized population for Hazardous Material Inspector qualifications with Hazardous Material Preparers unless approved by respective Air Transportation Functional Area Manager (FAM) or MFM. Only members who meet the initial eligibility for Hazardous Material Inspector as listed in Section E, paragraph 4.1.1, may pursue the Hazardous Material Preparer qualification. Members who currently hold a Preparer qualification may pursue web-based refresher training (WBT) and associated end-of-course (EOC) exam as either a Hazardous Material Inspector, as outlined in Section E, paragraph 4.1.2, or as a Hazardous Material Preparer, regardless of the unit's 15% authorization rule. However, members that choose to pursue Preparer refresher training must successfully pass the WBT/EoC exam and are NOT automatically eligible to reattend the 2-week Preparer Initial Course without applying the 15% authorization rule.

BY ORDER OF THE SECRETARY OF THE AIR FORCE OFFICIAL

ELIZABETH E. ARLEDGE, Maj Gen, USAF
Director of Logistics
DCS/Logistics, Engineering & Force Protection

ATTACHMENT 1 QUALITATIVE REQUIREMENTS (PROFICIENCY CODE KEY)

QUALITATIVE REQUIREMENTS

Behavioral Statement STS Coding System	
Code	Definition
K	Subject Knowledge Training - The verb selection identifies the individual's ability to identify facts, state principles, analyze or evaluate the subject.
P	Performance Training - Identifies that the individual has performed the task to the satisfaction of the course; however, the individual may not be capable of meeting the field requirements for speed and accuracy.
pk	Performance Knowledge Training - The verb selection identifies the individual's ability to relate simple facts, procedures, operating principles, and operational theory for the task.
-	No training provided in the course or CDC.
X	Training is required but not provided due to limitations in resources.

Explanations

The asterisk symbol (*) is used in column 4 to indicate a deployment and CBRN requirement.

The plus symbol (+) is used in column 4 to indicate a SEI requirement.

NOTES:

- The Behavior Matches are listed in Column 2. The behavior match connects each training requirement to specific behaviors from the occupational competency model.

- All learning outcome items shown with a behavioral code are trained during war time.

- Column 2 lists Core tasks, when this includes the numbers 5 or 7, this task/outcome is a requirement for 5-skill level or 7-skill level upgrades, respectively.

1. COMMUNICATION											
1.1 COMMUNICATION Description: The successful conveyance of ideas and expectations for the purpose of achieving desired priorities, initiatives, objectives, and goals Supporting Competencies: *Accountability, Influence, Relationship Building, Communication, Resource Management, Strategic Thinking* Training References: AFH: 33-337, 36-2647 AFI: 17-130 AFMAN: 17-1301, 33-326 DODM5400.07_AFMAN 33-302, Freedom of Information Act Program Public Law 93-579, Privacy Act 1974 MyVector Air Force Competencies (https://myvector.us.af.mil/MyCompetencies/ResourcesHome) Microsoft Office **(https://support.office.com)**											
1.1.1. Communication (Basic) Required Behaviors: 1. Recognizes and employs communication tools (e.g., Word, Power Point, Email, Teams, etc.) 2. Utilizes all five types of communication (e.g., Written, Visual, Verbal, Non-verbal, & Active Listening) Criteria: *Consistency of Application: Sustained application of competency over time*											
1.1.1.1. Utilize computer applications to analyze data and create presentations	1				-	-	-				
1.1.1.2. Apply general principles from Tongue and Quill	1	5			-	-	-				
1.1.1.3. Display proper email and social media etiquette	2				-	-	-	P			
1.1.1.4. Speak to an individual or audience in a clear manner	2	5			-	-	-				
1.1.1.5. Receive constructive feedback and takes appropriate actions	2							P			
1.1.1.6. Receive orders, guidance and messages in a professional manner	2										
1.1.1.7. Practice OPSEC through all forms of communication	2	5						P			
1.1.2. Communication (Intermediate) Required Behaviors: 1. Utilizes communication skills to integrate and foster information sharing 2. Tailors messaging and briefings to inform audience 3. Coordinates and facilitates meetings to communicate information Criteria: *Consistency of Application: Sustained application of competency over time in a variety of situations*											
1.1.2.1. Identify and select appropriate forms of communication to ensure successful messaging (e.g. oral, visual, and written, etc.)	1							P			

Tasks, Knowledge and Technical References	Behavior Match	Core/Cert	Deployment/SEI/CBRN	Training Start	Training Complete	Trainee Initials	Trainer Initials	Behavior code 3-lvl	Behavior Code 5-lvl	Behavior Code 7-lvl	Behavior Code 9-lvl
1.1.2.2. Applies approved technological systems to engage with and disseminate information	1	5									
1.1.2.3. Locate and disseminate relevant data within time constraints to communicate decisions	1	5									
1.1.2.4. Identify and apply conflict management resolution techniques based on the situation	2	5									
1.1.2.5. Evaluate situation to develop and communicate courses of action	2	7									
1.1.2.6. Summarize key points	2	7									
1.1.3. Communication (Advanced) Required Behaviors: 1. Conveys complex messaging concisely to ensure information integrity 2. Adjusts presentation to address audience reactions and/or concerns Criteria: *Consistency of Application: Sustained application of competency over time in complex situations*					-	-	-				
1.1.3.1. Interpret complex messages into actionable items	1				-	-	-				
1.1.3.2. Tailor complex information in a simplified manner (e.g. < 5 min, elevator speech)	1				-	-	-				
1.1.3.3. Deliver orders, guidance and messages in a professional manner	1	5			-	-	-				
1.1.3.4. Apply tactics to influence others in writing, speaking, and visual means	1				-	-	-				
1.1.3.5. Recognizes differences and similarities in target audience and adjusts delivery to ensure proper communication	2	5			-	-	-				
1.1.3.6. Adapt messaging approach to clearly communicate to intended audience	2				-	-	-				
1.1.3.7. Anticipate and adapt to technological constraints by creating alternate communication means	2				-	-	-				
1.1.3.8. Leverage emotional intelligence to overcome communication barriers (e.g., generational, cultural, socioeconomic)	2	7			-	-	-				
1.1.4. Communication (Expert) Required Behaviors: 1. Translates intent into operational guidance for application by the enterprise 2. Coaches, mentors, and guides others on communication techniques for mission execution 3. Delivers communication to produce a desired effect and foster relationships with mission partners Criteria: *Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency*											
1.1.4.1. Interpret strategic messaging into actionable objectives	1										
1.1.4.2. Disseminate guidance of strategic messaging	1				-	-	-				
1.1.4.3. Provide feedback to others on overcoming cognitive biases	2				-	-	-				
1.1.4.4. Review and critique communication	2				-	-	-				
1.1.4.5. Practice consensus collaboration	3				-	-	-				
1.1.4.6. Arrange cross-organizational forums	3

2. MANAGEMENT AND DEVELOPMENT											
2.1. PROGRAM MANAGEMENT Description: The navigation of applicable guidance to achieve all directed program objectives required for mission effectiveness Supporting Competencies: *Communication, Accountability, Organizational Awareness, Resource Management* Training References: AFI: 10-403, 10-201, 10-401, 10-2501, 25-101, 32-1023 AFMAN: 38-102 AFPD: 36-1 AFTTP 3-4 DAFI: 10-2503, 24-605, 32-1020, 36-2100, 38-101, 90-301, 90-302 DAFMAN: 32-1084 DOD 4500.9-R: Defense Transportation Regulation (DTR) Part III, Mobility JP 4-0 and 5-0 series MAJCOM 36-series Applicable System User's Manual											
2.1.1. Program Management (Basic) Required Behaviors: 1. Executes program requirements to ensure mission completion 2. Advocates for program by communicating mission needs, requirements & resolutions 3. Not Used Criteria: *Thinking Challenge: Within establish procedures or similar situations*											
2.1.1.1. Identify purpose, roles, and responsibilities for programs	1										
2.1.1.2. Adhere to timelines and milestones to meet objectives	1										
2.1.1.3. Identify and explain program management tools	1				-	-	-				
2.1.1.4. Adhere to program standardization process to ensure compliance	1				-	-	-				
2.1.1.5. Perform follow up actions	1				-	-	-				
2.1.1.6. Analyze data points to justify mission requirements	2				-	-	-	pk			
2.1.1.7. Prioritize programs to meet mission intent	2										
2.1.2. Program Management (Intermediate) Required Behaviors: 1. Maintains & evaluates compliance to ensure program integrity 2. Maintains schedules and coordinates requirements with inter/intra agencies to sustain program execution 3. Coordinates program execution with stakeholders to mitigate risks											

Tasks, Knowledge and Technical References	Behavior Match	Core/Cert	Deployment/SEI/CBRN	Training Start	Training Complete	Trainee Initials	Trainer Initials	Behavior code 3-lvl	Behavior Code 5-lvl	Behavior Code 7-lvl	Behavior Code 9-lvl
Criteria: *Thinking Challenge: A wide variety of situations*											
2.1.2.1. Interpret policy and guidance to assist w/ program development	1										
2.1.2.2. Correct program issues using established procedures	1										
2.1.2.3. Provide inputs and uphold support agreements (MOU, MOA)	2										
2.1.2.4. Develop timelines and milestones to meet objectives	2				-	-	-				
2.1.2.5. Recommend program improvements to approving official/office	3				-	-	-				
2.1.2.6. Provide feedback for quality control measures	3				-	-	-				
2.1.2.7. Establish and maintain standards for the work center IAW local procedures	3				-	-	-				
2.1.3. Program Management (Advanced) Required Behaviors: 1. Identifies trends and recommends course of action for informed decision making 2. Establishes objectives and milestones to forecast and mitigate challenges 3. Drafts program policy to ensure alignment with mission objectives Criteria: *Thinking Challenge: No established procedures*					-	-	-				
2.1.3.1. Utilize trend analysis to identify and improve programs and inform decision-making process	1				-	-	-				
2.1.3.2. Leverages trend analysis to identify and mitigate program deficiency to ensure continual process improvement	1				-	-	-				
2.1.3.3. Analyze standardized program processes to identify where local deviations are required	2				-	-	-				
2.1.3.4. Synchronize with multiple organizations to complete strategic goals	2										
2.1.3.5. Develop and relay processes to align program with requirements and resources	3										
2.1.4. Program Management (Expert) Required Behaviors: 1. Establishes program innovation avenues to attain competitive advantage Criteria: *Thinking Challenge: Requires developing imaginative procedures*					-	-	-				
2.1.4.1. Collaborate with cross functional SMEs to benchmark best practices and future projects	1				-	-	-				
2.1.4.2. Research and advocate for industry technologies applicable to career field programs	1										
2.1.4.3. Translate future mission needs to meet long-term enterprise mission objectives	1										
2.1.4.4. Relate strategic requirements to support NDS	1										
2.2. RESOURCE MANAGEMENT Description: The employment of personnel to maximize performance and achieve objectives Supporting Competencies: *Analytical Thinking, Change Management, Decision Making, Flexibility* Training References:

2.2.1. Resource Management (Basic) Required Behaviors: 1. Identifies manpower, materials, and equipment needed to execute tasks 2. Uses resources appropriately by adhering to established standards 3. Uses one's own time efficiently to accomplishes mission requirements Criteria: *Scope: Specific Area - Work Center*											
2.2.1.1. Identify work center resources	1	5									
2.2.1.2. Describe roles and responsibilities of key personnel	1										
2.2.1.3. Coordinate with appropriate functions to request resources and manpower	1	7									
2.2.1.4. Inspect, operate, & verify asset functionality	2	5									
2.2.1.5. Identify and document resource requirements	2	7			-	-	-				
2.2.1.6. Identify and report misuse of resources	2	5			-	-	-	pk			
2.2.2. Resource Management (Intermediate) Required Behaviors: 1. Utilizes manpower capabilities to accomplish the mission 2. Manages equipment, materials, and/or funding to accomplish the mission 3. Manages readiness of personnel to meet requirements Criteria: *Scope: Integration with concerned areas*					-	-	-				
2.2.2.1. Coordinate resource requirements to facilitate mission execution	1	7	*		-	-	-				
2.2.2.2. Balance manpower capabilities with authorized funded allocations	1	9			-	-	-				
2.2.2.3. Establish procedures to manage and utilize available resources	1	7	*		-	-	-				
2.2.2.4. Identify/minimize impact of resource shortfalls	2	7	*		-	-	-				
2.2.2.5. Collaborate with outside agencies to execute the mission	2	7	*		-	-	-				
2.2.2.6. Describe the concepts of contracting	2		*								
2.2.2.7. Generate funding requests to meet mission requirements	2		*		-	-	-				
2.2.2.8. Gather data for justifications	2	7	*								
2.2.2.9. Identify and communicate readiness gaps to leadership	3	7	*								
2.2.2.10. Utilize applicable documents to align work center personnel	3	7	*		-	-	-

2.2.3. Resource Management (Advanced) Required Behaviors: 1. Forecasts, identifies, and resolves manpower, material, and/or funding for proper resource utilization 2. Budgets and procures resources needed for operations Criteria: *Scope: Integration with organizational strategies*											
2.2.3.1. Review key components of manning documents	1	9	*								
2.2.3.2. Develop strategies to efficiently manage resources	1		*								
2.2.3.3. Forecast impacts of resource movements	1		*								
2.2.3.4. Establish prioritization plan	1		*		-	-	-				
2.2.3.5. Develop and manages funding and resources for budgets to execute mission requirements	2	9	*								
2.2.4. Resource Management (Expert) Required Behaviors: 1. Interacts with DOD agencies and/or allied mission partners to identify and act on the needs of the Port Dawg Community 2. Reviews and validates budget requirements to advocate for enterprise change, materials, equipment, and/or funding 3. Validates manpower studies to determine proper authorizations, assignments, priorities, and projections Criteria: *Scope: Integration with AF-level/within industry*											
2.2.4.1. Advocate for resources outside of normal POM cycle (e.g. unfunded, fallout, and innovation)	1				-	-	-				
2.2.4.2. Elevate and explain potential impacts to HHQ or DAF priorities	1		*								
2.2.4.3. Analyze manning levels and impacts on total force capabilities within AF constraints	2		*								
2.2.4.4. Optimize procedures to manage and utilize available resources	2		*								
2.2.4.5. Justify manpower movements to appropriate stakeholders	3		*								
2.2.4.6. Secure manpower capabilities with authorized allocations	3		*								
2.2.4.7. Mitigate resource constraints to meet current and future demands	3		*								
2.3. PERSONNEL DEVELOPMENT Description: The process of maximizing talent and deliberately developing Port Dawgs to be multi-capable leaders across the logistics enterprise. Supporting Competencies: *Develops People, Relationship Building, Communication, Fosters Inclusion* Training References: AFH 36-2647 AFI 51-110 AFI 38-401					-	-	-

T.O. 00-5-5, Command, Control, Communications, Computers and Intelligence Support Plan (C4ISP) from GATES											
3.1.1. Air Terminal Operations (Basic) Required Behaviors: 1. Interprets information from various sources to ensure mission success 2. Examines processes of all port functions to have complete understanding of unit's operations and capabilities 3. Disseminates information to various agencies to meet mission objectives TTG - Air Terminal Operations Center Function: Introduction -3.1.1.1/3.1.1.5./3.1.1.6. Function: Information Control - 3.1.1.2./3.1.1.4./3.1.1.7./3.1.1.8. Function: Cape Forecasting - 3.1.1.3. Function: Data Records - 3.1.1.9. Criteria: *Consistency of Application: Sustained application of competency over time*					-	-	-				
3.1.1.1. Locate and interpret technical information	1	5			-	-	-				
3.1.1.2. Gather & disseminate aircraft load information from available sources (e.g., user, Command Post, GDSS, SMS, GATES)	1	5	*		-	-	-				
3.1.1.3. Prepare mission schedules	1				-	-	-				
3.1.1.4. Prioritize mission requirements to effectively manage air transportation workload	2		*		-	-	-				
3.1.1.5. Access and review applicable governing directives	2				-	-	-				
3.1.1.6. Describe relationships and functions of air transportation operations	2				-	-	-				
3.1.1.7. Notify work centers on mission requirements	3										
3.1.1.8. Coordinate and track SOEs with various agencies (e.g.,, radio, phone, email)	3				-	-	-				
3.1.1.9. Maintain historical documentation	2				-	-	-				
3.1.2. Air Terminal Operations (Intermediate) Required Behaviors: 1. Consolidates information to provide detailed, mission specific data 2. Responds to queries from agencies to ensure required information is understood and disseminated 3. Advises work sections on mission requirements to streamline operations TTG Air Terminal Operations Center Function: Information Control - 3.1.2.1./3.1.2.2./3.1.2.4./3.1.2.5./3.1.2.6. Function: Ramp Controller - 3.1.2.3. Criteria: *Consistency of Application: Sustained application of competency over time in a variety of situations*					-	-	-				
3.1.2.1. Validate work center requirements	1	7			-	-	-				
3.1.2.2. Research & analyze source mission data to prioritize work center requirements	1				-	-	-				

Tasks, Knowledge and Technical References	Behavior Match	Core/Cert	Deployment/SEI/CBRN	Training Start	Training Complete	Trainee Initials	Trainer Initials	Behavior code 3-lvl	Behavior Code 5-lvl	Behavior Code 7-lvl	Behavior Code 9-lvl
3.1.2.3. Provide updates and takes action on mission requirements	2				-	-	-				
3.1.2.4. Communicate with various agencies to provide mission overview	2		*		-	-	-				
3.1.2.5. Develop and manage SOE	3				-	-	-				
3.1.2.6. Respond to unique work requirements	3				-	-	-				
3.1.3. Air terminal Operations (Advanced) Required Behaviors: 1. Inspects and files completed products for accuracy to ensure data integrity 2. Coordinates mission requirements with agencies to prepare and stage equipment and personnel 3. Generates mission schedules to inform stakeholders TTG Air Terminal Operations Center Function: Senior Controller – 3.1.3.3/3.1.3.4/3.1.3.5./3.1.3.7. Function: Cape Forecasting – 3.1.3.6. Function: Data Records – 3.1.3.1. Function: Information Control – 3.1.3.2. Criteria: *Consistency of Application: Sustained application of competency over time in complex situations*											
3.1.3.1. Provide quality control on flight documentation	1		*		-	-	-				
3.1.3.2. Scrutinize detailed mission data (e.g., Form 59) to extract requirements	1	7			-	-	-				
3.1.3.3. Establish standardization & accurate document control for effective file management	1				-	-	-				
3.1.3.4. Establish plans to efficiently execute mission requirements and avoid mission delays.	2				-	-	-				
3.1.3.5. Leverage and deconflict air transportation capabilities and requirements to address efficient mission generation / flow	2				-	-	-				
3.1.3.6. Leverage data systems and source documents to generate timely and accurate schedules	3										
3.1.3.7. Communicate critical logistics requirements for operational transparency and informed decisions making	3				-	-	-				
3.1.4. Air Terminal Operations (Expert) Required Behaviors: 1. Manages mission operations for mission success 2. Inspects aircraft operations to verify adherence to program directives TTG Air Terminal Operations Center Function: Information Control – 3.1.4.4./3.1.4.5. Function: Senior Controller – 3.1.4.2./3.1.4.3./3.1.4.6./3.1.4.7. Function: Cape Forecasting – 3.1.4.1. Criteria: *Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency*					-	-	-				
3.1.4.1. Monitor and provide all required coordination for airlift mission to include work unique requirements	1				-	-	-				

Tasks, Knowledge and Technical References	Behavior Match	Core/Cert	Deployment/SEI/CBRN	Training Start	Training Complete	Trainee Initials	Trainer Initials	Behavior code 3-lvl	Behavior Code 5-lvl	Behavior Code 7-lvl	Behavior Code 9-lvl
3.1.4.2. Resolve operational irregularities (e.g.,., mishaps, delays, crew disputes, MX, weather.)	1										
3.1.4.3. Provides risk analysis and executes operational control over mission	1										
3.1.4.4. Research and provide transportation delays to appropriate agencies	1										
3.1.4.5. Communicate with agencies to coordinate emerging operational requirements (e.g.,., QRCs, local procedures)	1				-	-	-				
3.1.4.6. Oversee compliance and enforces standardization within publications	2										
3.1.4.7 Deconflict guidance to meet operational intent	2										
3.2. FREIGHT OPERATIONS Description: The performance of all aspects of cargo movement aboard aircraft Supporting Competencies: *Accountability, Change Management, Communication, Creative Thinking* Training References: AF Enlisted Classification Directory AFI 10-403, 10-201, 10-1002, 10-2501, 32-2001, 25-101, 32-1023, AFMAN: 11-225, 24-306, 32-1067, 38-102, 91-201, 24-604 AFOSH: AFPAM 90-803 AFTO Form 1800 AFTTP 3-4 Applicable System User's Manual Appropriate aircraft -9 T.O.; Applicable 00, 35 and 36 series T.O./User's Manual CFETP 2T2X1 49 CFR DESR: 6055.09 DAFI 10-401, 10-2503, 24-301, 24-302, 24-602, 24-605, 91-207, 32-1020, 38-101, 90-301, 90-302 DAFMAN: 32-1084, 32-7002, 36-2100, 91-201, 91-202, 91-203, DAFPD: 24-6, 36-1, 36-28, DOD 4500.9-R: Defense Transportation Regulation (DTR) Part III, IATA ICAO Mobility JP 3-0, 4-0 and 5-0 series, MAJCOM 36-series 11-2C-XXX					-	-	-				
3.2.1. Freight Operations (Basic) Required Behaviors: 1. Performs as load team member to enable cargo airlift 2. Completes cargo build and break processes to enable cargo airlift 3. Operates material handling equipment for safe transport of cargo TTG Freight Operations Function: Introduction - 3.2.1.3./3.2.1.4./3.2.1.8/3.2.1.11. Function: Cargo Processing - 3.2.1.7./3.2.1.9. Function: Ramp/Aircraft Services - 3.2.1.2. TTG-1 Air Transportation

1. Selects appropriate information system to complete a given task 2. Utilizes information systems to accomplish tasks within the workcenter TTG Air Transportation 1 Line Item 1.11 Air Transportation Information System - 3.4.1.1. Criteria: *Thinking Challenge: Within establish procedures or similar situations*											
3.4.1.1. Identify and navigate applicable information system (e.g.,., GATES, GDSS, SMS)	1	5									
3.4.1.2. Identify system capabilities	1							K			
3.4.1.3. Gather relevant data for entry into information systems	2										
3.4.1.4. Generate reports to support data driven decision	2										
3.4.2. System Operations (Intermediate) Required Behaviors: 1. Extracts data points from various information systems to complete workcenter tasks 2. Manipulates and disseminates information systems to generate workflow analytics for decision-makers 3. Employs information systems to trouble-shoot problem sets within the workcenter Criteria: *Thinking Challenge: A wide variety of situations*											
3.4.2.1. Translate data to communicate and report results to appropriate agencies to assist w/ data-driven decisions	1										
3.4.2.2. Summarize key data points for readability	2										
3.4.2.3. Deliver key data to appropriate work centers via local procedures (e.g.,., GATES, email, TEAMS)	2										
3.4.2.4. Compare collected data against historical records to identify trends	3										
3.4.3. System Operations (Advanced) Required Behaviors: 1. Operates autonomously as informational node to accomplish tasks in operational environments 2. Accesses information across multiple domains to accomplish workcenter tasks 3. Scrutinizes information for inclusion in appropriate system applications Criteria: *Thinking Challenge: No established procedures*											
3.4.3.1. Demonstrate ability to establish an information system in a degraded communication environment	1										
3.4.3.2. Demonstrate usage of networks	2										
3.4.3.3. Describe interoperability between various information systems	2				-	-	-				
3.4.3.4. Identify relevant security classification status on consolidated data products	3				-	-	-

3.4.3.5. Conduct quality control to ensure entered data is accurate	3										
3.4.4. System Operations (Expert) Required Behaviors: 1. Serves as subject matter expert with the ability to field questions and provide actionable answers 2. Advocates for new technologies to stay current on industry trends 3. Develops products that leverage data points for analysis and/or provide calculated outcomes Criteria: *Thinking Challenge: Requires developing imaginative procedures*					-	-	-				
3.4.4.1. Apply expert knowledge to address problem areas and inform senior leaders decisions	1				-	-	-				
3.4.4.2. Justify procurement of cutting edge war fighting capabilities and advocates for funding	2				-	-	-				
3.4.4.3. Research and develop new capabilities	3				-	-	-				
3.5. FLEET OPERATIONS Description: The performance of all aspects of fleet operations aboard aircraft Supporting Competencies: *Communication, Flexibility, Resource Management, Communication, Precision, Teamwork* Training References: AFMAN 24-306 AFTO Form 1800 Applicable 00, 1C, 13B4, 35 and 36 series Applicable System User's Manual Appropriate aircraft -9 T.O. DAFI: 24-301, 24-302, 24-605, 91-207 DAFMAN: 91-203, T.O./User's Manual					-	-	-				
3.5.1. Fleet Operations (Basic) Required Behaviors: 1. Employs work center vehicles to accomplish individual service tasks 2. Performs as a team member to complete fleet servicing tasks TTG-1 Air Transportation Line-Item: 1.9 Vehicle Inspections – 3.5.1.1. TTG Fleet Operations Function: Introduction – 3.5.1.3. Function: Prepare Fleet Service Documents – 3.5.1.5. Function: Inventory & Documentation Expendable/non-expendable items – 3.5.1.6. Function: Load Expendables/Non-expendable items on aircraft – 3.5.1.7. Function: Clean Ovens and Galleys – 3.5.1.8./3.5.1.11. Function: Fill Freshwater Tanks and Containers – 3.5.1.9. Function: Deliver Passenger Meals – 3.5.1.10 Function: Service Aircraft Lavatory System and ATGLs (Dirty Fleet) – 3.5.1.8./3.5.1.12. Function: Remove/Dispose of Trash/Waste Material from Aircraft – 3.5.13.											

Tasks, Knowledge and Technical References	Behavior Match	Core/Cert	Deployment/SEI/CBRN	Training Start	Training Complete	Trainee Initials	Trainer Initials	Behavior code 3-lvl	Behavior Code 5-lvl	Behavior Code 7-lvl	Behavior Code 9-lvl
Criteria: *Consistency of Application: Sustained application of competency over time*											
3.5.1.1. Conducts vehicle/equipment inspections	1										
3.5.1.2. Operates applicable vehicles for mission requirements	1		*								
3.5.1.3. Locate and utilize governing directives	1										
3.5.1.4. Adhere to Safety Requirements	2										
3.5.1.5. Prepare fleet service documents	2		*								
3.5.1.6. Inventory expendable/non- expendable bench stock	2										
3.5.1.7. Load expendable/non- expendable items on aircraft	2										
3.5.1.8. Service/clean air transportable galley and lavatories (ATGLs)	1		*								
3.5.1.9. Fill fresh water tanks and containers	1		*								
3.5.1.10. Deliver passenger meals	2										
3.5.1.11. Clean ovens and galleys	2										
3.5.1.12. Service aircraft lavatory systems	1		*								
3.5.1.13. Remove/dispose of trash/waste materials from aircraft	2		*								
3.5.2. Fleet Operations (Intermediate) Required Behaviors: 1. Trains and inspects fleet responsibilities for aircraft servicing to meet mission requirements 2. Leads team to complete singular fleet tasks 3. Identifies and corrects fleet discrepancies to sustain mission generation TTG Fleet Operations Function: Inventory & Documentation Expendable/non-expendable Items – 3.5.2.6. Criteria: *Consistency of Application: Sustained application of competency over time in a variety of situations*											
3.5.2.1. Ensure compliance with governing directives	2										
3.5.2.2. Communicates with respective work centers on emerging mission changes and requirements	3										
3.5.2.3. Inspect documentation for servicing	1										
3.5.2.4. Identify fleet specific aircraft characteristics	1										
3.5.2.5. Oversee fleet operations	2										
3.5.2.6. Inventory and document expendable/non-expendable items	1										
3.5.2.7. Troubleshoot and resolve fleet operations discrepancies (e.g., benchstock, ATGL, aircrew deviations, etc.)	3										
3.5.2.8. Selects appropriate general purpose and specialized vehicles for mission execution	2										
3.5.3. Fleet Operations (Advanced) Required Behaviors: 1. Leads team to complete multiple fleet requirements simultaneously 2. Coordinates with all necessary agencies to sustain mission operations Criteria:											

Tasks, Knowledge and Technical References	Behavior Match	Core/Cert	Deployment/SEI/CBRN	Training Start	Training Complete	Trainee Initials	Trainer Initials	Behavior code 3-lvl	Behavior Code 5-lvl	Behavior Code 7-lvl	Behavior Code 9-lvl
Consistency of Application: Sustained application of competency over time in complex situations											
3.5.3.1. Ensure compliance with governing directives	1										
3.5.3.2. Communicates with respective work centers on emerging mission changes and requirements	1										
3.5.3.3. Inspect documentation for servicing	2										
3.5.3.4. Identify fleet specific aircraft characteristics	1										
3.5.4. Fleet Operations (Expert) Required Behaviors: 1. Develops operating instructions/business rules to enable airlift to meet installation-specific mission requirements 2. Advocates for regulatory guidance and policy review to recommend changes to fleet operations Criteria: *Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency*											
3.5.4.1. Network with agencies for compliance with mission requirements	1										
3.5.4.2. Refine local procedures while aligning with governing directives during operations (e.g., Base Support Plan, International Requirements)	2										
3.5.4.3. Address recommended changes to policy	2										
4. AERIAL DELIVERY OPERATIONS											
4.1. AERIAL DELIVERY OPERATIONS Description: The process in which cargo is prepared for and loaded onto aircraft for air drop Supporting Competencies: *Accountability, Communication, Precision, Teamwork* Training References: DAFI: 24-605, 91-203 Local CONOPS or Operational Instruction and TOs as applicable					-	-	-				
4.1.1. Aerial Delivery Operations (Basic) Required Behaviors: 1. Identifies different types of platforms, materials, and parachutes to rig equipment for airdrop 2. Prepares equipment for airdrop and recover Criteria: *Consistency of Application: Sustained application of competency over time*											
4.1.1.1. Demonstrate ability to recognize platforms	1				-	-	-				
4.1.1.2. Display proficiency in identifying material	1				-	-	-				
4.1.1.3. Identify various types of parachutes	1				-	-	-				
4.1.1.4. Adhere to general safety requirements	2										
4.1.1.5. Comply with local procedures for air drop recovery	2										
4.1.1.6. Demonstrate recovery processes	2										
4.1.2. Delivery Operations (Intermediate) Required Behaviors: 1. Executes airdrop and recovery of platforms, materials, and parachutes for reconstitution 2. Inspects all materials and processes for airdrop and recovery Criteria:											

Tasks, Knowledge and Technical References	Behavior Match	Core/Cert	Deployment/SEI/CBRN	Training Start	Training Complete	Trainee Initials	Trainer Initials	Behavior code 3-lvl	Behavior Code 5-lvl	Behavior Code 7-lvl	Behavior Code 9-lvl
Consistency of Application: Sustained application of competency over time in a variety of situations											
4.1.2.1. Complete required course(s) (e.g., PRC phase I)	1		+								
4.1.2.2. Oversee airdrop and recovery operations	1										
4.1.2.3. Selecting proper equipment for loading/transport	1										
4.1.2.4. Coordinate with appropriate agencies for requirements	1				-	-	-				
4.1.2.5. Maintain adequate inventory of required items	1										
4.1.2.6. Perform rigger checks	2										
4.1.2.7. Provide airdrop load details	2										
4.1.2.8. Inspect parachutes and platforms	2										
4.1.3. Aerial Delivery Operations (Advanced) Required Behaviors: 1. Performs advanced duties for Parachute Rigger Course (Phase 1) and provides guidance future parachute rigging techniques 2. Liaises at Malfunction Review Boards for Air Force specific inputs Criteria: *Consistency of Application: Sustained application of competency over time in complex situations*											
4.1.3.1. Coordinate with outside agencies (e.g.,, non-standard load)	1										
4.1.3.2. Oversees multiple requirements	1				-	-	-				
4.1.3.3. Liaise at malfunction review	2										
4.1.3.4. Establish and validate DZ recovery operations	2										
4.1.4. Aerial Delivery Operations (Expert) Required Behaviors: 1. Performs advanced duties for Parachute Rigger Course (Phase 1) and provides guidance future parachute rigging techniques 2. Liaises at Malfunction Review Boards for Air Force specific inputs Criteria: *Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency*											
4.1.4.1. Complete required applicable course	1										
4.1.4.1.1. --- BIC/ITC	1				-	-	-				
4.1.4.1.2. --- ALICC	1				-	-	-				
4.1.4.1.3. --- Cadre	1				-	-	-				
4.1.4.1.4. --- Phase 1	1										
4.1.4.1.5. --- Phase 2	1										
4.1.4.1.6. --- Phase 3	1										
4.1.4.1.7. --- Phase 4	1										
4.1.4.2. Conduct informative lectures and assessments on parachute rigging techniques/safety	1										
4.1.4.3. Organize practical sessions allowing students to practice parachute rigging.	1				-	-	-				
4.1.4.4. Provide feedback to other experts	1				-	-	-				
4.1.4.5. Actively engage in Malfunction Review Board meetings	2				-	-	-				
4.1.4.6. Identify patterns and recurring issues in Malfunction Review Board Results	2										

ATTACHMENT 3 CONTINGENCY/EXPEDITIONARY TRAINING REQUIREMENTS

Commanders and supervisors, at all levels, should establish an effective contingency/expeditionary training program taking into account the normal AFFORGEN battle rhythm. The following tables prescribe the minimum training/certification required for Airmen to meet the stated capability of the Unit Type Code (UTC). As the minimum training requirements, commanders should use completion of training associated with assigned UTCs as an indicator to determining capability readiness. Ideally, Airmen should begin the specified training once assigned to their respective UTC. Trainers will assess an Airman's ability to perform the required tasks to the "Go," "No-Go" standard. All appropriate core tasks, in addition to UTC requirements, must be met.

Mission Ready Airmen: A mission ready 2T2XX will be trained, certified and proficient in the tasks identified in this CFETP corresponding to their assigned UTC and skill level, to include performing each associated task in MOPP 4. Mission Ready Airmen are responsible for maintaining individual medical readiness (IMR) and all auxiliary training as applicable to their assigned UTC.

Crossflow Tasks: Items identified as "Crossflow Tasks" enable qualified Airmen to augment/assist other UTC/functional area capabilities in a minimal capacity, when not performing duties related to their assigned UTC.

ARC Specific Tasks: Tasks identified in Attachment 3 with an asterisk (*) are additional training requirements for ARC personnel only and should be included in ARC member training if the necessary resources are available.

The following are critical baseline tasks for ALL Air Transportation contingency/expeditionary capabilities and required for all 3, 5 and 7-level members	**3-level**	**5-level**	**7-level**
3.2.1.2. Perform Onload/Offload procedures	X	X	X
3.2.1.3. Locate and interpret governing directives	X	X	X
3.2.1.4. Demonstrate effective cargo tie down restraint	X	X	X
3.2.1.9. Inventory/select/build cargo for onward movement	X	X	X
3.2.1.1. Perform spotter/chocker duties	X	X	X
5.1.1.1. Conducts vehicle/equipment inspections	X	X	X
3.2.1.6. Identify ERO operations requirements/procedures	X	X	X
2.1.1.4. Adhere to program standardization process to ensure compliance	X	X	X
3.2.1.5. Adhere to Safety Requirements	X	X	X

UTC: UFBAT
AIR TERMINAL OPERATIONS CENTER (ATOC)
Capable of supporting 1 x aircraft per hour during 12-hour shift

Description: This UTC provides a two-person air terminal operations center (ATOC) capability; senior controller, information control, ramp control, in transit visibility (ITV), airlift forecasting and records keeping IAW applicable guidance or directives. ATOC is the operational focal point and exercises command and control of air transportation work centers. Coordinates unit move requirements, utilizes computer-based air transportation systems, briefs cargo and passenger information to departing aircrews and/or collects transportation documents on arriving aircraft.

STS Reference/Training Task	3-level	5-level	7-level
3.1.1.2. Gather & disseminate aircraft load information from available sources **(e.g., user, Command Post GDSS, SMS, GATES)**		X	X
3.1.1.4. Prioritize mission requirements to effectively manage air transportation workload		X	X
3.1.3.1. Provide quality control on flight documentation. (**Prepare consolidated flight package)**		X	X
3.1.2.4. Communicate with various agencies to provide mission overview **(Brief aircrew/troop commander on load information)**		X	X
3.1.2.4. Communicate with various agencies to provide mission overview **(Mission Load Report)**		X	X
3.1.3.6. Leverage data systems and source documents to generate timely and accurate schedules			X
3.1.4.1. Monitor and provide all required coordination for airlift mission to include work unique requirements **(coordinate mission requirements/Complete clearance requirements)**			X
3.1.3.1. Provide quality control on flight documentation		X	X

8

UTC: UFBBR
RAMP OPERATIONS
Capable of on or off loading 8 pallet position equivalents per hour during 12-hour shift

Description: This UTC provides a four-person ramp operations capability; Load Team Chief, aircraft on/off Load Team, Material Handling Equipment (MHE) operators and Engine Run On/Offload (ERO) IAW applicable guidance or directives. Able to on/off load organic and/or commercial aircraft with applicable MHE. Utilize aircraft load plans and computer-based air transportation systems. When not performing UFBBR function, can augment following UTCs for these specific tasks: UFBCP (aircraft pallet build/break) and/or UFBML (passenger on/off load, baggage on/off load and/or baggage pallet build/break).

STS Reference/Training Task	3-level	5-level	7-level
3.2.1.11 Operate applicable MHE for mission requirements **(10K Standard)**	X	X	X
3.2.1.11 Operate applicable MHE for mission requirements **(10K Adverse Terrain forklift)**	X	X	X
3.2.1.11 Operate applicable MHE for mission requirements **(Tow Vehicle)**		X	X
3.2.1.11 Operate applicable MHE for mission requirements **(Halvorsen Loader)**	X	X	X
3.2.2.9. Select appropriate MHE for mission execution	X	X	X
3.2.2.2. Sequence aircraft load	X	X	X
3.2.1.4. Demonstrate effective cargo tie-down restraint	X	X	X
3.2.2.3. Inspect cargo and documentation for loading/unloading	X	X	X
3.2.1.2. Perform Onload/Offload procedures	X	X	X
3.2.2.8. Calculate tie-down and shoring requirements		X	X
3.2.2.4. Conduct Load Team Chief Duties			X
Crossflow Tasks			
3.3.1.1. Load/unload passengers and baggage	X	X	X
Additional training tasks for ARC only			
3.2.1.11 Operate applicable MHE for mission requirements Tunner Loader **(NOTE: A minimum 50% of personnel assigned to UTC must be trained)**	*	*	*

9

UTC: UFBCP
AIR FREIGHT
Capable of building or breaking 1x pallet position equivalent every 3 hours during 12-hour shift

Description: This UTC provides a three-person air freight capability; receive/in-check general/hazardous /special handling cargo, pallet build-up, break bulk, in transit visibility (ITV) and forklift operator IAW applicable guidance or directives. Able to review cargo documentation, build aircraft pallets and/or provide break bulk support. Utilize computer-based air transportation systems. When not performing UFBCP function, can augment following UTCs for these specific tasks: UFBBR (aircraft on/off load) and/or UFBML (passenger on/off load, baggage on/off load and/or baggage pallet build/break).

STS Reference/Training Task	3-level	5-level	7-level
3.2.1.11 Operate applicable MHE for mission requirements **(10K Standard)**	X	X	X
3.2.1.11 Operate applicable MHE for mission requirements **(10K Adverse Terrain forklift)**	X	X	X
3.2.1.7. Process cargo/mail	X	X	X
3.2.3.4. Process Special Cargo –Expedited shipment **(AMC MICAP, VVIP, Green sheet, etc.)**		X	X
3.2.3.3. Validate cargo for onward movement	X	X	X
3.2.2.10. Identify and document cargo discrepancies	X		
3.2.2.11. Resolve cargo discrepancies		X	X
3.2.2.12. Process frustrated cargo	X	X	X
3.2.1.9. Inventory/Select/Build cargo for onward movement	X	X	X
3.2.1.9. Inventory/Select/Build cargo for onward movement **(Build multi-pallet train)**	X	X	X
3.2.2.7. Calculate cargo center of balance **(Compute centers-of-balance for rolling stock, outsized cargo, and multi- pallet trains)**	X	X	X
3.2.1.7. Process cargo/mail	X	X	X
3.2.3.5.1. Special Handling	X	X	X
Crossflow Tasks			
3.2.1.2. Perform Onload/Offload procedures	X	X	X
3.3.1.1. Load/unload passengers and baggage	X	X	X

10

UTC: UFBN2
FLEET SERVICES
Capable of servicing 2 aircraft latrine and potable water systems every 3 hours during 12-hour shift

Description: This UTC provides a four-person fleet service capability; aircraft latrine and potable water service vehicle operators IAW applicable guidance or directives. Able to service organic and/or commercial aircraft latrine systems, potable water systems, remove trash from aircraft IAW local guidance. Utilize computer-based air transportation systems. When not performing UFBN2 function, can augment following UTCs for these specific tasks: UFBBR (ramp operations - aircraft on/off load) and/or UFBCP (air freight - aircraft pallet build/break) and/or UFBML (passenger service - baggage pallet build/break).

STS Reference/Training Task	3-level	5-level	7-level
5.5.1.2. Operates applicable vehicles for mission requirements **(Latrine service truck/cart)**	X	X	X
5.5.1.5. Prepare fleet service documents	X	X	X
5.5.1.8. Service/clean Air Transportable Galley and Lavatories **(ATGLs)**	X	X	X
5.5.1.9. Fill freshwater tanks and containers	X	X	X
5.5.1.12. Service aircraft lavatory systems	X	X	X
5.5.1.13. Remove/dispose of trash/waste materials from aircraft	X	X	X
Crossflow Tasks			
3.2.1.2. Perform Onload/Offload procedures	X	X	X
3.3.1.1. Load/unload passengers and baggage	X	X	X

11

UTC: UFBML
PASSENGER SERVICE
Capable of on or offloading 23 passengers and associated baggage per hour during 12-hour shift or capable of on or off loading 150 passengers and associated baggage per hour during 12-hour shift during contingency ops

Description: This UTC provides a four-person passenger service capability; passenger processing, baggage pallet build/break, baggage on/off load, in transit visibility (ITV), staircase truck and material handling equipment (MHE) operator IAW applicable guidance or directives. Able to validate travel documentation, manifest, on/off load passengers, build/break baggage pallets and, with applicable MHE, on/off load baggage on organic and/or commercial aircraft. Utilize computer-based air transportation systems. When not performing UFBML function, can augment following UTCs for these specific tasks: UFBBR (aircraft on/off load) and/or air UFBCP (aircraft pallet build/break)..

STS Reference/Training Task	3-level	5-level	7-level
3.3.1.8. Operate applicable MHE for mission requirements **(10K Standard)**	X	X	X
3.3.1.8. Operate applicable MHE for mission requirements **(10K Adverse Terrain forklift)**	X	X	X
3.3.1.8. Operate applicable MHE for mission requirements **(Wide-body staircase)**	X	X	X
3.3.1.3. Gather & document passenger data documentation **(Determine/verify travel eligibility/priorities)**	X	X	X
3.3.3.1. Account for accurate passenger source **(Sign-up passengers)**	X	X	X
3.3.3.4. Ensure compliance with governing directives **(Special Category passengers)**	X	X	X
3.3.3.4. Ensure compliance with governing directives **(Brief passengers on flight information)**	X	X	X
3.3.1.4. Perform anti-hijacking procedures & basic security measures.	X	X	X
3.3.1.3. Gather & document passenger data documentation **(Select passengers)**	X	X	X
3.3.1.3. Gather & document passenger data documentation **(Check-in passengers and baggage)**	X	X	X
3.3.1.4. Perform anti-hijacking procedures & basic security measures. **(Gate passengers)**	X	X	X
3.3.1.1. Load/offload passenger and baggage	X	X	X
3.3.1.1. Load/offload passenger and baggage **(Build-up/breakdown baggage)**	X	X	X
3.3.3.3. Provide oversight of passenger operations and apply course of action **(Process mishandled baggage)**		X	X
3.3.2.1. Communicate with applicable work-centers on emerging mission changes and requirements. **(Dispatch -Set up flights)**		X	X
3.3.2.1. Communicate with applicable work-centers on emerging mission changes and requirements. **(Dispatch - Prepare passenger manifests)**		X	X
3.3.2.1. Communicate with applicable work-centers on emerging mission changes and requirements. **(Dispatch - Close out flights)**		X	X
Crossflow Tasks			
3.2.1.2. Perform Onload/Offload procedures	X	X	X

12

UTC: UFBJT
JOINT INSPECTION
Capable of inspecting 21 pallet position equivalents (PPE) every 3 hours during 12-hour shift

Description: This UTC provides a two-person joint inspection (JI) capability; inspect/verify airworthiness, validate load plan weights/dimensions and verify in transit visibility (ITV) IAW applicable guidance or directives. Able to JI unit move cargo and equipment compliance IAW defense transportation regulation (DTR) and air force manual (AFMAN) 24-604. Utilize computer-based air transportation systems. When not performing UFBJT function, can augment following UTCs for these specific tasks: UFBBR (ramp operations - aircraft on/off load) and/or UFBCP (air freight - aircraft pallet build/break) and/or UFBML (passenger service - baggage pallet build/break).

STS Reference/Training Task	3-level	5-level	7-level
3.2.2.5.3. Joint Inspection		X	X
Crossflow Tasks			
3.2.1.2. Perform Onload/Offload procedures		X	X
3.3.1.1. Load/unload passengers and baggage		X	X
Additional training tasks for ARC only			
3.2.1.7. Process cargo/mail		*	*
3.2.3.4. Process Special Cargo - **Expedited shipment (AMC MICAP, VVIP, Green sheet, etc.)**		*	*
3.2.3.3. Validate cargo for onward movement		*	*
3.2.2.12. Process frustrated cargo		*	*
3.2.1.9. Inventory/Select/Build cargo for onward movement		*	*
3.2.1.9. Inventory/Select/Build cargo for onward movement **(Build multi-pallet train)**		*	*
3.2.2.7. Calculate cargo center of balance **(Compute centers-of-balance for rolling stock, outsized cargo, and multi- pallet trains)**		*	*

13

UTC: UFBPL
LOAD PLANNING
Capable of completing 2 x aircraft load plans every 4 hours during 12-hour shift

Description: This UTC provides a two-person load planning capability; select cargo for air movement, verify air worthiness, calculate aircraft weight/balance and cargo manifesting IAW applicable guidance or directives. Able to build organic aircraft load plans IAW applicable aircraft technical orders (to) and air force manual (AFMAN) 24-604 hazardous material compatibility chart and coordinate load sequence with commercial aircraft representatives. Utilize computer-based air transportation systems. When not performing UFBPL function, can augment following UTCs for these specific tasks: air terminal operations center (UFBAT - information control, airlift forecasting, in transit visibility), and/or UFBBR (ramp operations - aircraft on/off load) and/or UFBCP (air freight - aircraft pallet build/break) and/or UFBML (passenger service - baggage pallet build/break).

STS Reference/Training Task	3-level	5-level	7-level
3.2.3.5.2. Load planning		X	X
Crossflow Tasks			
3.2.1.2. Perform Onload/Offload procedures		X	X
3.3.1.1. Load/unload passengers and baggage		X	X
3.1.1.2. Gather & disseminate aircraft load information from available sources **(e.g., user, Command Post GDSS, SMS, GATES)**		X	X
3.1.1.4. Prioritize mission requirements to effectively manage air transportation workload		X	X
3.1.3.1. Provide quality control on flight documentation. (**Prepare consolidated flight package)**		X	X
3.1.2.4. Communicate with various agencies to provide mission overview **(Brief aircrew/troop commander on load information)**		X	X
3.1.2.4. Communicate with various agencies to provide mission overview **(Mission Load Report)**		X	X

14

UTC: UFBXS
AIR TRANSPORTATION ADVISOR/TEAM LEAD
Capable of supporting joint staff, air staff, theater staff operations, serving as a mobility airlift advisor or supervising other combinations of air transportation UTCs.

Description: This UTC provides a one-person air transportation technical advisor capability; that possesses a wide general knowledge of air transportation systems and mobility operations to include hub and spoke dynamics, air transportation organizational constructs and passenger and cargo movement procedures thru defense transportation system. UTC will perform and/or supervise other UTCs performing air transportation functions IAW applicable guidance or directives. UTC must be filled by member with awarded 2T271 skill level. Rank requirement can be waived thru functional area manager (FAM).

STS Reference/Training Task	7-level
2.2.2.1. Coordinate resource requirements to facilitate mission execution	X
2.2.2.3. Establish procedures to manage and utilize available resources	X
2.2.2.4. Identify/minimize impact of resource shortfalls	X
2.2.2.5. Collaborate with outside agencies to execute the mission	X
2.2.2.6. Describe the concepts of contracting	X
2.2.2.7. Generate funding requests to meet mission requirements	X
2.2.2.8. Gather data for justifications	X
2.2.2.9. Identify and communicate readiness gaps to leadership	X
2.2.2.10. Utilize applicable documents to align work center personnel	X

15

UTC: UFBJE
AIR TRANSPORTATION SUPERVISION (E-8)
Capable of advising Joint Staff, Air Staff or serve as air transportation operations leader at all types of locations. UTC should be tasked when operations have at least 75+ air transportation personnel.

Description: This UTC provides a one-person air transportation senior enlisted leader capability; knowledgeable of sustainment and contingency air transportation capabilities IAW applicable guidance or directives. Capable of directing air transportation operations at all levels and serving as expeditionary squadron senior enlisted air transportation leader and/or advisor at either an ELRS, EAMS, or EAPS.

STS Reference/Training Task	9-level
2.2.3.1. Review key components of manning documents	X
2.2.3.2. Develop strategies to efficiently manage resources	X
2.2.3.3. Forecast impacts of resource movements	X
2.2.3.4. Establish prioritization plan	X
2.2.3.5. Develop and manages funding and resources for budgets to execute mission requirements	X
2.2.4.2. Elevate and explain potential impacts to HHQ or DAF priorities	X
2.2.4.3. Analyze manning levels and impacts on total force capabilities within AF constraints	X
2.2.4.4. Optimize procedures to manage and utilize available resources	X
2.2.4.5. Justify manpower movements to appropriate stakeholders	X
2.2.4.6. Secure manpower capabilities with authorized allocations	X
2.2.4.7. Mitigate resource constraints to meet current and future demands	X

16

UTC: UFBBS
APO AIR TRANSPORTATION FUNCTION
Capable of establishing Wing Operations with small air transportation function capabilities. Capable of operation at MOB, FOB, and FOS locations.

Description: This UTC provides a four-person air transportation function capability that possess a wide general knowledge of air transportation systems and mobility operations to include Wing deployments, aircraft loading/unloading, joint inspection, passenger service and load planning IAW applicable guidance and directives. This UTC will perform Wing operations and/or serve as liaison to the arriving Demand Force Teams (DFT) if required.

STS Reference/Training Task	3-level	5-level	7-level
3.2.3.5.2. Load planning			X
3.2.2.5.3. Joint Inspection		X	X
3.3.1.8. Operate applicable MHE for mission requirements **(10K Standard)**	X		
3.3.1.8. Operate applicable MHE for mission requirements **(10K Adverse Terrain forklift)**	X		
3.3.1.8. Operate applicable MHE for mission requirements **(Wide-body staircase)**	X		
3.3.1.3. Gather & document passenger data documentation **(Determine/verify travel eligibility/priorities)**	X		
3.3.3.1. Account for accurate passenger source **(Sign-up passengers)**	X		
3.3.3.4. Ensure compliance with governing directives **(Special Category passengers)**	X		
3.3.3.4. Ensure compliance with governing directives **(Brief passengers on flight information)**	X		
3.3.1.4. Perform anti-hijacking procedures & basic security measures.	X		
3.3.1.3. Gather & document passenger data documentation **(Select passengers)**	X		
3.3.1.3. Gather & document passenger data documentation **(Check-in passengers and baggage)**	X		
3.3.1.4. Perform anti-hijacking procedures & basic security measures. **(Gate passengers)**	X		
3.3.1.1. Load/offload passenger and baggage	X		
3.3.1.1. Load/offload passenger and baggage **(Build-up/breakdown baggage)**	X		
3.2.1.11 Operate applicable MHE for mission requirements **(10K Standard)**	X		
3.2.1.11 Operate applicable MHE for mission requirements **(10K Adverse Terrain forklift)**	X		
3.2.1.11 Operate applicable MHE for mission requirements **(Tow Vehicle)**	X		
3.2.1.11 Operate applicable MHE for mission requirements **(Halvorsen Loader)**	X		
3.2.2.9. Select appropriate MHE for mission execution	X		
3.2.2.2. Sequence aircraft load	X		
3.2.1.4. Demonstrate effective cargo tie-down restraint	X		
3.2.2.3. Inspect cargo and documentation for loading/unloading	X		
3.2.1.2. Perform Onload/Offload procedures	X		

17
