CAREER FIELD EDUCATION AND TRAINING PLAN (CFETP)

ACCESSIBILITY: Publications and forms are available on the e-publishing website at www.e-publishing.af.mil for downloading or ordering.

RELEASABILITY: There are no releasability restrictions on this publication.

Transportation Badge Heraldry

Basic Badge

Senior Badge

Master Badge

The falcon at the center of the badge is derived from the Triforium Termination Stone Carving dedicated on 10 May 1970 to the United States Air Force Logistics Personnel at the National Cathedral in Washington D.C.

*The **Falcon** represents the dedication and devotion to duty of transportation personnel who aid in the generation and employment of defense forces across the spectrum of warfare.*

*The **Field** of the badge is without obstruction and depicts free skies.*

*The **Olive Branch** surrounding the badge symbolizes the peace aerospace forces engender through professional transportation.*

In its talons, the falcon grasps a globe which represents earth as seen from space and represents the span of our systems around the world and into space. Encircling the globe are three arrows running parallel to each other to symbolize teamwork between all modes of transportation: Land, Sea, and Air.

The globe and the arrows together, symbolize the Air Force Transportation Vision Statement: Building the world's most effective movement systems to provide global reach for America.

Personnel can find specific guidance for the wear of the Transportation badge in AFI 36-2903, Aeronautical, Duty, and Occupational Badges. Enlisted Vehicle Management personnel are awarded the basic badge after completing initial 3-level training, the senior badge is awarded after award of the 7 skill level, and the master badge is awarded to Master Sergeant or above with 5 years in the specialty from award of the 7 skill level.

VEHICLE MANAGEMENT SPECIALTIES
AFSC 2T3X1 CFETP

PART I

1.0 *PREFACE.* The CFETP is a comprehensive education and training document that identifies life-cycle education/training requirements, training support resources and minimum core task requirements for this specialty. The CFETP will provide vehicle management personnel a clear career path to success and will instill rigor in all aspects of career field training.

***Note*:** Civilians occupying associated positions may use Part II to support duty position qualification training. Air Force Reserve Command (AFRC) and Air National Guard (ANG) career paths will differ from the career paths depicted in this document. They may develop career paths that more accurately describe the life cycle of reserve and guard personnel.

1.1. The CFETP consists of two parts; both parts of the plan are used by supervisors to plan, manage, and control training within the career field.

1.1.1. Part I provides information necessary for overall management of the specialty. Section A explains how individuals will use the plan; **Section B** identifies career field progression information, duties and responsibilities, training strategies, and career field path; **Section C** associates each level with specialty qualifications (knowledge, education, experience, training, and other); and **Section D** indicates resource constraints. Some examples are funds, manpower, equipment, facilities; **Section E** identifies transition training guide requirements for E-5 through E-7

1.1.2. Part II includes the following: **Section A**: identifies the STS and includes duties, tasks, Technical References to support training, AETC conducted training, wartime course and core task and correspondence course requirements. **Section B**: contains the course objective list and training standards supervisors use to determine if service members satisfied training requirements. **Section C**: identifies available support materials. An example is a qualification training package, which may be developed to support proficiency training; **Section D** identifies a training course index supervisors can use to determine resources available to support training. Included here are both mandatory and optional courses; **Section E** identifies MAJCOM unique training requirements supervisors can use to determine additional training required for the associated qualification needs.

1.1.3. Using CFETP guidance ensures individuals in this specialty receive effective and efficient training at the appropriate points in their career. This plan enables us to train today's work force for tomorrow's job.

ABBREVIATIONS/TERMS EXPLAINED

Advanced Training (AT). Formal course which provides individuals who are qualified in one or more positions of their Air Force Specialty (AFS) with additional skills/knowledge to enhance their expertise in the career field. Training is for selected career Airmen at the advanced level of the AFS.

AETC Training Manager (AETC-TM). AETC-TM acts as a link between the customer, AFIMSCs and the training providers (schoolhouse). Collectively we refer to the training squadrons, courses, instructors, and curriculum developers, as the schoolhouse. The AETC-TM moderates the long term, visionary training goals of the career field with the real time ability of the schoolhouse to meet those training goals.

AETC Training Pipeline Manager (AETC-TPM). Co-chairs with the Air Force Career Field Manager (AFCFM), Utilization and Training Workshops (U&TWs) and AFS planning meetings. Responsible for the oversight, development, and execution of all formal training to include money, manpower and machines to bring new training on-line. Acts as liaison between AFCFM and training community.

AFIMSC MAJCOM Functional Manager (MFM). An individual who is the POC responsible for AFIMSC management of an AFS. MFM responsibilities include coordination with the AFCFM, policy development, training, skills management, and career progression at the AFIMSC-level.

Air Force Career Development Academy (AFCDA). Provides career development resources and specialized courses in support of enlisted upgrade training and the Weighted Airman Promotion System (WAPS).

Air Force Career Field Manager (AFCFM). An individual who is the single Point of Contact (POC) responsible for overall management of an AFS. AFCFM responsibilities include policy development, training, skills management, and career progression.

Air Force Enlisted Classification Directory (AFECD). This guide establishes the occupational structure of the Air Force enlisted force. The occupational structure is flexible to permit enlisted personnel to specialize and develop their skills and abilities while allowing the Air Force to meet changing mission requirements and can be found via the Air Force Portal (At the home page, search AFECD in the search field.)

Air Force-Input Tool (AF-IT). The AFFORGEN reporting tool on SIPRNET that provides timely and accurate readiness.

Air Force Specialty (AFS). A group of positions (with the same title and code) that require common qualifications.

Air Force Job Qualification Standard/Command Job Qualification Standard (AFJQS/CJQS). A comprehensive task list common to all persons serving in the duty position, which describes a particular job type or duty position. They are used by supervisors to document task qualifications. The tasks on AFJQS/CJQS are common to all persons serving in the described duty position.

Allocation Curves. The relation of hours of training in different training settings to the degree of proficiency which can be achieved on specified performance requirements.

Basing and Logistics Analytics Data Environment (BLADE). BLADE brings together information from more than 300 Air Force and broader Defense Department data sources, using a Pentagon analytics platform called Advana to make the broad swaths of information more accessible, in one place.

Bridge Course. A formal or informal course of training which allows the individual to expand his/her knowledge in another area of expertise.

Career Field Education and Training Plan (CFETP). A comprehensive core training document that identifies: Life-cycle education and training requirements, training support resources and the minimum core task requirements for a specialty. The CFETP aims to give personnel a clear career path and instills a sense of industry in career field training.

Career Training Guide (CTG). A document that uses Task Modules (TMs) in lieu of tasks to define performance and training requirements for a career field.

Certification. A formal indication of an individual's ability to perform a task to required standards.

Certification Official. A person whom the supervisor assigns to determine an individual's ability to perform a task to required standards.

Continuation Training. Additional training exceeding requirements with emphasis on present or future duty assignments.

Core Task. Tasks the AFCFM identify as minimum qualification requirements within an AFSC, regardless of duty position. Core tasks may be specified for a particular skill level or in general across the AFSC. Guidance for using core tasks can be found in the applicable CFETP narrative.

Course Objective List (COL). A publication, derived from initial/advanced skills course training standard, identifying the tasks and knowledge requirements, and respective standards provided to achieve a 3- or 7-skill level in this career field. Supervisors use the COL to assist in conducting graduate evaluations in accordance with Air Force Instruction DAFMAN 36-2689, *Training Program.*

Defense Property Accountability System (DPAS). The DoD-directed Fleet Management Information System for Maintenance, Utilization and Warehouse functions and the Accountable Property System of Record for Air Force accountable vehicle assets.

Duty Position Task. The tasks assigned to an individual for the position currently held. These include as a minimum all core tasks that correspond to the duty position, and tasks assigned by the supervisor.

Education and Training Course Announcements (ETCA). The primary tool used for information on education and training courses, such as available courses, prerequisites, reporting instructions etc. ETCA is accessed via the World Wide Web (WWW) at ETCA Courses.

Enlisted Specialty Training (EST). A mix of formal training (technical school) and informal training (on-the-job) to qualify and upgrade Airmen in each skill level of a specialty.

Electronic Point of Sale (EPoS). EPoS system is DLA Energy's front-line customer and business partner-facing system. EPoS is used to capture real-time military fleet management fuel retail transactions at unattended military service stations, mobile ground fuel transactions, and aviation fuel transactions for mobile airfield/flight line operations.

Exportable Course. Instructional packages that personnel design for use in the field. The course may include printed, computer-based, or other audiovisual materials.

Exportable Training. Additional training via computer assisted, paper text, interactive video, or other necessary means to supplement training.

Field Technical Training (Type 7). Special or regular on-site training conducted by a Field Training Detachment (FTD) or by a mobile training team.

Financial Improvement & Audit Readiness (FIAR). FIAR is to improve the Department's financial management operations, helping provide America's Service men and women with the resources they need to carry out their mission and improving our stewardship of the resources entrusted to us by the taxpayers.

Fleet Management Information System (FMIS). FMIS refers to the approved system of record for Maintenance, Utilization and Warehouse functions and the Accountable Property System of Record for Air Force accountable vehicle assets. Currently, the FMIS is DPAS.

Government Purchase Card (GPC): Known as a SmartPay card, is a centrally billed, government charge card used to pay for goods and services in support of official government business, streamlining the purchasing process and reducing paperwork.

Initial Skills Training. Formal school courses that result in an AFSC 3-skill level award for enlisted or mandatory training for upgrade to qualify for officers.

Instructional System Development (ISD). A deliberate and orderly, but flexible process for planning, developing, implementing, and managing instructional systems. It ensures personnel are taught the knowledge, skills, and attitudes essential for successful job performance in a cost-efficient way.

Interservice Training Review Organization (ITRO). The ITRO was established in 1972 in response to concern expressed by the Government Accounting Office that the Services were not accomplishing significant consolidations of training courses as required by the 1964 Joint Chiefs of Staff Memorandum of Policy 148.

Integrated Logistics System -Supply (ILS-S). ILS-S is a modern Logistics Information Technology Defense Business System capability that supports Department of the Air Force active-duty, Air National Guard and Air Force Reserve operations, as well as the other military services and their missions depending on where they are located.

Joint Deficiency Reporting System (JDRS). JDRS provides a common, seamless solution for deficiency reporting and resolution management across the Aeronautical Enterprise. JDRS is a cross-service web enabled automated tracking system designed to initiate, process and track deficiency reports from the Warfighter through the investigation process.

Mobile Training Team (MTT). Technical training conducted at operational locations by a resident course instructor using the facilities and equipment at those locations.

MyLearning. MyLearning is worldwide accessible, web-enabled Learning Management System (LMS) that provides delivery, tracking and on-demand reporting of training with no client software required to access the system. MyLearning is a centralized training platform that houses: Air Force MyTraining, Air Force Career Development Academy, Total Force Awareness Training, and Ready Airman Training MyLearning location is at https://lms-jets.cce.af.mil/

MyTraining. A Web-Based application providing Air Force War fighters with global, real-time visibility into the technical qualifications, certifications and training status of logistics, communications, and information professionals Air Force wide. MyTraining supports base, wing and work center level training management activities by automating training management business processes. MyTraiing links ins on MyLearning platform or https://tftr.josce.mil/.

Occupational Analysis Report (OAR). A detailed report showing the results of an occupational survey of tasks performed within a particular AFS.

On-the-Job Training (OJT). Hands-on, "over-the-shoulder training" that a duty location uses to train personnel in both upgrade (skill level award) and job qualification (duty position certification) training.

Optimal Training. The ideal combination of training settings resulting in the highest levels of proficiency on specified performance requirements within the minimum time possible.

Position Qualification Training. Training designed to qualify an Airman in a specific position.

Proficiency Training. Additional training, either in-residence or exportable advanced training courses, or OJT, provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade.

Program Objective Memorandum (POM). Developed by individual services to set objectives for their forces, weapon systems and logistical support within the fiscal limits assigned to them by the Secretary of Defense for future programming.

Qualification Training (QT). Hands-on performance training designed to qualify an Airman in a specific duty position. This training occurs during and after the upgrade training to maintain up-to- date qualifications. It is designed to provide the performance skills required to do the job.

Qualification Training Package (QTP). An instructional package designed for use at the unit to qualify or aid qualification in a duty position or program or on a piece of equipment. It may be printed, computer-based or in other audiovisual media.

Resource Constraints. Resource deficiencies, such as funds, facilities, time, manpower and equipment that preclude desired training from being delivered.

Skills Training. A formal course which results in the award of a skill level.

Special Experience Identifier (SEI). Identifies any special skills or advanced training associated to the workload requirement.

Specialty Training. The total training process (life cycle) used to qualify Airmen in their assigned specialty.

Specialty Training Standard (STS). An Air Force publication that describes skills and knowledge that an Airman in a particular AFS needs on the job. It further serves as a contract between the AETC and the user to show the overall training requirements for an AFSC that the formal schools teach.

Standard. An exact value, a physical entity, or an abstract concept, established and defined by authority, custom, or common consent to serve as a reference, model, or rule in measuring quantities or qualities, establishing practices or procedures, or evaluating results. A fixed quantity or quality.

Subject Matter Expert (SME). Highly motivated and experienced individual who is an effective communicator and has a thorough understanding of career field issues. The AFCFM and training personnel call on SMEs for specialty related issues such as attending U&TWs and for writing Specialty Knowledge Tests (SKTs) for Weighted Airman Promotion System (WAPS) testing.

Task Module (TM). A group of tasks performed within an AFS that are performed together and that require common knowledge, skills, and abilities. TMs are identified by an identification code and a statement.

Test, Measurement and Diagnostic Equipment (TMDE). Those devices used to maintain, evaluate, measure, calibrate, test, inspect, diagnose, or otherwise examine materials, supplies, equipment, and systems to identify or isolate actual or potential malfunctions, or decide if they meet operational specifications established in technical documents.

Total Force. All collective components (active, reserve, guard, and civilian elements) of the United States Air Force.

Trainer. A trained and qualified person who teaches personnel to perform specific tasks through OJT methods. Also, equipment that the trainer uses to teach personnel specified tasks.

Training Capability. The ability of a unit or base to provide training. Authorities consider the availability of equipment, qualified trainers, study reference materials, and so on in determining a unit's training capability.

Training Centers. The principle AETC location where training is conducted and/or managed. Vehicle Management has two career field alternate locations.

Training Planning Team (TPT). Comprised of the same personnel as a U&TW; however, TPTs are more intimately involved in training development and the range of issues are greater than is normal in the U&TW forum.

Training Requirements Analysis. A detailed analysis of tasks for a particular AFS to be included in the training decision process.

Training Setting. The type of forum in which training is provided (formal resident school, OJT, field training, mobile training team, self-study, etc.).

Training Session. Training conducted by trainers based on technical data for a maintenance task that existing courses could not support.

Ultra-High Pressure (UHP) system. UHP delivers more and smaller droplets of water and provides much better heat absorption than the high volumes of larger water droplets that are provided by conventional low-pressure technology.

Upgrade Training (UGT). Mandatory training which leads to attainment of higher level of proficiency.

Utilization and Training Pattern. A depiction of training provided to, and the jobs performed by, personnel throughout their tenure within a career field or AFS. There are two types of patterns: 1) Current pattern, which is based on the training provided to incumbents and the jobs to which they have been and are assigned; and 2) Alternate pattern, which considers proposed changes in manpower, personnel and training policies.

Utilization and Training Workshop (U&TW). A forum of AFIMSC AFSC functional managers, SMEs and AETC training personnel that determines career ladder training requirements.

Vehicle Support Chain Operations Squadron (VSCOS). As the Air Force authority, the 441 VSCOS provides assistance with tasks and processes associated with establishing and enforcing centralized enterprise Vehicle Management programs, goals, and objectives to meet Air Force operational mission requirements.

Wartime Tasks. Those tasks that must be taught when courses are accelerated in a wartime environment. In response to a wartime scenario, these tasks will be taught in the 3-skill level course in a streamlined training environment. These tasks are only for those career fields that still need them applied to their schoolhouse tasks.

Web-Based Training. See MyLearning.

SECTION A: GENERAL INFORMATION

2.0 **Purpose.** The CFETP provides information necessary for AFCFM, MFMs, commanders, training managers, supervisors, and trainers to plan, develop, manage, and conduct effective career field training programs. This plan outlines the training individuals in these AFSs should receive in order to develop and progress throughout their career. This plan identifies initial skills, upgrade, qualification, advanced and proficiency training. Initial skills training is the AFS specific training an individual receives upon entry into the Air Force or upon retraining into this specialty for award of the 3-skill level. Normally, this training is conducted by AETC at one of the technical training centers. UGT identifies the mandatory courses, task qualification requirements and correspondence course completion requirements for award of the 3-, 5-, 7- and 9- skill levels. Qualification training (QT) is actual hands-on task performance training designed to qualify an Airman in a specific duty position. This training program occurs during and after the UGT process. It is designed to provide the performance skills and knowledge required to do the job. Advanced training is formal specialty training for selected Airmen. Proficiency training is additional training, either in- residence or exportable advanced training courses or OJT. It is provided to personnel to increase their skills and knowledge beyond the minimum required for upgrade.

2.1.The CFETP has several purposes to include:

2.1.1. Serves as a management tool to plan, manage, conduct, and evaluate a career field training program. Also, it is used to help supervisors identify training at the appropriate point in an individual's career.

2.1.2. Identifies task and knowledge training requirements for each skill level in the specialty and recommends education/training throughout each phase of an individual's career.

2.1.3. Lists training courses available in the specialty. Identifies sources of training and the training delivery method.

2.1.4. Identifies major resource constraints which impact full implementation of the desired career field training process.

2.2.**Use.** The plan will be used by MFMs and supervisors at all levels to ensure comprehensive and cohesive training programs are available for each Airman in the specialty.

2.2.1. AETC training personnel will develop/revise formal resident, non-resident, field, and exportable training based on requirements established by the users and documented in Part II of the CFETP. They will also work with the AFCFM to develop acquisition strategies for obtaining resources needed to provide the identified training.

2.2.2. AFIMSC will ensure their training allocation program compliment the CFETP mandatory upgrade and proficiency requirements. Identified requirements can be satisfied by OJT, resident training, contract training or exportable courses.

2.2.3. Airmen will complete the mandatory training requirements specified in this plan. The list of courses in Part II will be used as a reference to support training.

2.3.**Coordination and Approval.** The AFCFM is the approval authority. AFIMSC representatives and AETC training personnel will identify and coordinate the career field training requirements. The AETC training manager for 2T3X1 specialties will initiate an annual review of this document by AETC and MFM to ensure currency and accuracy. Using the list of courses in Part II, they will eliminate duplicate training.

SECTION B: CAREER PROGRESSION AND INFORMATION

Specialty Descriptions. Typically, specialty descriptions provide a summary of the specialty, insight into duties and responsibilities associated to the specialty, and qualifications for entry or progression within the specialty. Descriptions for each of the specialties in the vehicle management career field follow:

MISSION GENERATION VEHICULAR MANAGEMENT: AFSC: 2T3X1: Craftsman 2T371: Journeyman 2T351: Apprentice 2T331: Trainee 2T311: Ref: AFECD

3.0 **Specialty Summary.** Supervises and performs vehicle management activities on military and commercial design general and special purpose, base maintenance, aircraft, and equipment towing vehicles, fire fighting vehicles or Material Handling Equipment (MHE) and vehicular equipment. Activities include inspection, diagnostics, repair, rebuild of components and assemblies, fabrications of parts, weld metals, and repair vehicle glass. Ensures compliances with vehicle maintenance policies, directives, and procedures. Related DoD Occupational Subgroup: 161000 & 195000.

3.1. **Duties and Responsibilities**:

3.1.1. Plans and schedules vehicle and equipment maintenance activities. Plans and controls work methods, production schedules, operating procedures, and performance standards. Monitors established maintenance priorities, tire, and battery shop operations, and determines mission requirements. Ensures vehicles, equipment, tools, parts, and manpower are available to support mission requirements. Ensures maintenance and supply documentation is complete and accurate. Provides input to and reviews the Air Force-Input Tool (AFIT) Determines the overall mechanical condition of vehicles and equipment, diagnoses component malfunction and initiates repair actions. Systematically analyzes malfunctions by visual and auditory examination or using test equipment. Troubleshoot, repairs, adjusts, overhauls, or replaces major assemblies or sub-assemblies such as power and drive trains, electrical, air conditioning, active and passive restraint systems, fuel, emission, steering assemblies, tracks, brake, hydraulic system components and vehicular equipment attachments. Removes, disassembles, and repairs gasoline or diesel engines and components. Diagnoses, isolates malfunctions, and repairs vehicle electrical, emissions, gasoline, diesel, and alternative fuel systems. Removes and installs electrical components to facilitate repairs. Repairs components by replacing worn or damaged parts with new or reconditioned parts, grinding, fitting, balancing, or arranging for welding or machining. Reassembles, adjusts and tests repaired units for proper operation. Repairs, adjusts, and replaces locks, latches, remote controls, window regulators and other associated body components. Designs and manufactures mounted equipment such as seats, pintle hook mounts and towing connections. Cuts, grinds, bevels, and smooths the edges of laminated automotive glass/Plexiglas and installs. Replaces curved glass with factory replacements. Cleans, tests, and repairs vehicle radiators and associated parts. Tests for leaks and blockage using tanks and flow testers. Selects the proper equipment for set up and prepares metal for welding. Welds, cuts, and repairs vehicle parts and accessories using oxyacetylene, gas-shielded and arc welding.

3.1.2. Inspects and evaluates vehicles, equipment, and body maintenance functions. Diagnoses malfunctions of major assemblies and subassemblies to determine the extent of repair or replacement or recommend disposition of vehicles and equipment. Diagnoses, isolates malfunctions, and repairs vehicle electrical, emissions, gasoline, diesel, and alternative fuel systems. Inspects repaired or rebuilt parts and equipment to ensure work conforms to standards. Inspects equipment for required modification and installation of safety devices. Ensures shop equipment is inspected and serviced at required intervals and that unserviceable tools and equipment are removed from service and their condition tagged. Identifies and initiates materiel deficiency reports at work center level. Calibrates and adjusts pumps, meters, safety unit proportioning devices, and limiting devices to ensure proper operation. Synchronizes remote or manual electrical and hydraulic controls. Adjusts power boosters, clutches, drive chains, and tension devices. Aligns bearing loads, gear tooth contact, and backlash to manufacturer specifications. Adjusts valve mechanisms, governors, oil systems, control linkages, clutches, traction units and other systems unique to this type of equipment. Times injection pumps and accessory shaft gear trains. Accomplishes tire and battery shop operations in a safe and

efficient manner.

3.1.3. Performs maintenance on vehicles with internal combustion engines and electrical vehicles, equipment, and vehicle body maintenance functions. Solves complex maintenance problems by interpreting layout drawings, specifications, schematics, diagrams, and operating characteristics of vehicles and components. Uses technical orders, commercial manuals, or automated systems to determine maintenance procedures and research parts. Troubleshoots, adjusts, repairs, and tests vehicles: alternate fuel, diesel, and gasoline engines; fuel, exhaust, and electrical systems; clutches; torque converters; transmissions; transfer cases; power takeoffs; drive lines; axles; frames; steering, suspension, dispensing, brake, air, and hydraulic systems; tracks; winches; emission control, heating and air-conditioning systems, active/passive restraint systems and other mounted or special equipment. Performs preventive maintenance and special inspections. Uses technical publications or automated systems in maintaining vehicles to prescribed manufacturers' maintenance schedules and for researching parts. Ensures special inspections and maintenance on vehicles are performed correctly such as: corrosion control, winterization, storage, and shipment. Properly annotates all maintenance performed on prescribed forms for data collection purposes.

3.1.4. Practices and ensures compliance with all established safety policies and standards. Implements hazardous waste management policies and procedures ensuring collection, control, disposition, and proper procedures for handling of hazardous and toxic waste material accumulations.

3.1.5. Supervises and performs and fleet management functions. Manages vehicle leasing program. Inputs data to the Defense Property Accountability System (DPAS) and Standard Base Supply System (SBSS) computer systems and verifies data accuracy. Prepares, reviews and corrects DPAS system products. Develops base vehicle priority buy program, vehicle minimum essential levels, vehicle priority recall listing and vehicle rotation plan. Performs fleet maintenance, operations analysis, and vehicle control program. Develops local retrievals to obtain specific data and analyzes this data for specific trends. Coordinates with work center supervisors and using organizations to ensure a timely repair of assigned vehicles. Monitors contract and warranty repairs, status, and funding. Develops and administers long and short-range plans and programs for completion of preventative maintenance and inspections, special inspections and projects. Programs vehicles for depot maintenance on a five-year maintenance plan. Controls and administers the delayed maintenance and accident and abuse programs. Operates computers and calculators. Maintains and files vehicle historical data and records jackets. Analyzes data for deviations from specific performance indicators and helps to develop corrective actions. Performs vehicle management data reporting/transfer as required. Uses Basing and Logistics Analytics Data Environment (BLADE). Collects data for mandated reporting requirements such as Resource Conservation and Recovery Act (RCRA), etc. Assembles specific vehicular information by extracting and tabulating maintenance data in a logical presentation sequence using automated and manual methods. Prepares data for presentation in tabular, chart, graphic and summary form. Gives written and narrative summaries to meet management needs. Manages Air Force equipment management system program for vehicle fleet. Develops alternative sources of support for operational vehicle shortfalls. Manages vehicle custodial account and vehicle authorization and utilization program, prepares and defends base level submission for central appropriated funds procurement of motor vehicles and other budgetary accounts. Reviews and coordinates on statements of work and performance requirements documents requiring government vehicles. Monitors and coordinates on military construction projects. Inputs routine and Mission Capable (MICAP) requisitions in SBSS, monitors Due-In From Maintenance (DIFM) Program and processes SBSS inquiries.

3.1.6. **Specialty Qualifications:**

3.1.6.1. **Knowledge**. Knowledge is mandatory of heavy equipment vehicle theory, vehicle and equipment theory, principles and repair relating to internal combustion engines, electrical, mechanical, and hydraulic systems applying to the repair of vehicles and vehicular equipment; methods of hoisting and handling heavy mechanisms; using lubricants, tools, and publications; supply procedures and computers; metal composition and metal working methods; using oxyacetylene, gas shielded, and electric welding equipment. Vehicle fleet management and analysis; maintenance responsibilities; maintenance data collection and reporting procedures; BLADE; and small computer operation.

3.1.6.2. **Education**. For entry into this specialty, completion of high school or general education development equivalency is mandatory.

3.1.6.3. **Training.** Completion of the following training is mandatory for the award of the AFSC indicated:

3.1.6.3.1. 2T331 Completion of the Interservice Training Review Organization apprentice course.

3.1.6.3.2. 2T331, Mission Generation Vehicular Management apprentice course.

3.1.6.3.3. Shop Supervisor Course. (Staff Sergeant Select and above)

3.1.6.3.4. Vehicle Management Flight Leadership course. (For Master Sergeant selects and above)

3.1.6.4. **Experience**.

3.1.6.4.1. For award of AFSC 2T371, qualification in and possession of applicable core tasks is mandatory. Also, supervisory experience in functions such as inspecting, repairing, modifying, or troubleshooting vehicular and equipment systems, automotive body repair and surface refinishing, welding operations, glass work and fleet management & analysis functions.

3.1.6.5. **Other**.

3.1.6.5.1. The following is mandatory for entry into this specialty:

3.1.6.5.2. Normal color vision according to DAFMAN 48-123, *Medical Examinations and Standards*.

3.1.6.5.3. The following are mandatory for award and retention in this specialty:

3.1.6.5.4. Qualification to operate government vehicles according to AFI 24-301, *Ground Transportation.*

3.1.6.5.5. The ability to obtain a valid state driver's license to operate GMVs for "Maintenance Purposes Only" in accordance with AFI 24-301.

3.1.6.5.6. Must maintain local network access IAW AFMANs 33-152, *User Responsibilities and Guidance for Information Systems* and 33-282, *Computer Security.*

VEHICLE MANAGEMENT:
AFSC 2T300/2T390, Vehicle Management Flight Chief or Vehicle Management Superintendent Ref: AFECD

3.2. **Specialty Summary**. Manages the vehicle fleet. Activities include the management of vehicle authorization listings, vehicle buy and vehicle control programs and associated maintenance requirements such as inspection, diagnostics, repair, modification, refinishing, and data collection for the vehicle and equipment fleet. Programs include maintenance and fleet management analysis, quality assurance, training, and material control. Related DoD Occupational Subgroup: 170400.

3.2.1. **Duties and Responsibilities**:

3.2.2. Plans, organizes, and directs vehicle management activities. Ensures adequate manpower authorizations, personnel, tools, equipment, spare parts, and workspace are available. Establishes production goals, quality controls, operating procedures, annual budgets, and self-inspection programs. Maintains liaison with users and supply organizations regarding spare parts requirements. Promotes customer satisfaction. Initiates action for interservice and intra-service vehicle maintenance support requests from other DoD agencies. Oversees fleet management and analysis, as well as maintenance activities responsible for vehicle repair, analysis, training, parts procurement, and contingency planning to ensure effective use of maintenance resources. Coordinates on and assists using organizations with processing procedures for vehicle authorization changes. Reviews and coordinates on vehicle abuse, accident, and incident cases. Provides input to and reviews the AF-IT.

3.2.3. Ensures accountability for vehicle fleet, tools, equipment, space, supplies, and facilities. Monitors and validates vehicle authorizations, new vehicle requests, annual vehicle buy program, limited technical inspections, vehicle depot-level repair requirements, vehicle add-on equipment request, reimbursement and refundable actions, vehicle utilization, vehicle minimum essential levels, vehicle priority recall list, vehicle and part warranties, manpower changes, requirements, and facility upgrades. Monitors parts procurement programs to ensure compliance with all applicable guidance. Monitors related contracts and identifies

problems to the contract administrator. Supervises programs affecting depot level repairs, shipment of vehicles, maintenance priorities, record keeping, material deficiency reporting, preventative maintenance and inspections, special inspections, fleet management, registered equipment management and analysis to ensure regulatory compliance. Oversees the collection, control and disposition of hazardous and toxic waste material accumulations, vehicle lease program and vehicle control program. Ensures compliance with developed safety practices, policies, and standards. Reviews and approves vehicle lesson plans for compliance with technical data and safety standards. Reviews vehicle/equipment modification request for safety and compliance with technical data, forwards request to approval authority if valid.

3.2.4. Periodically inspects maintenance, repair sections, fleet management and analysis and material control. Determines operational status and solves complex maintenance, fleet management, supply, and personnel problems. Analyzes maintenance reports, past and current performance, and inspection reports to ensure cost effective operations, timely preventive maintenance, repairs, and rebuilding of vehicular equipment. Identifies unfavorable trends as they occur. Initiates corrective actions and revises procedures to improve effectiveness and eliminate deficiencies. Monitors and coordinates on military construction projects affecting vehicle management areas.

3.3. **Specialty Qualifications**:

3.3.1. Knowledge. Maintenance and fleet management policies and procedures; maintenance analysis activities; contract administration and evaluation; supply and inventory management; publications; technical order and deficiency reporting systems; FMIS; materiel management procedures and allowance standards; training requirements and programs; Air Force manpower standards and their application; facility requirements.

3.3.2. Safety and environmental standards

3.3.3. **Education.** Associate degree.

3.3.4. **Training.** Not used.

3.3.5. **Experience.** Qualification in and possession of AFSC 2T371. Also, experience is mandatory managing functions such as vehicle maintenance and fleet management and analysis activities.

3.3.6. **Other**: The following are mandatory for award and retention in this specialty.

3.3.7. For award and retention of these AFSCs, must maintain local network access IAW AFMANs 33-152, *User Responsibilities and Guidance for Information Systems* and 33-282, *Computer Security.*

4.0 **Competencies**. The Air Force defines competencies a combination of knowledge, skills, abilities, and other characteristics that manifest in observable and measurable pattern of behaviors required for mission success. The Vehicle Management community has rebuilt the entire training platform by using competencies to identify the behaviors that are needed to be successful on the job. This has been accomplished by identifying and integrating the 2T3X1, Vehicle Management, occupational competencies and leveraging the Air Force's foundational competencies in a manner that provides all Airmen with transparent and unbiased pathways towards their own successful development.

4.1. Airmen's Foundational Competencies figure 1. The foundational competencies are a set of accepted and valued competencies, which enable success across a wide array of DAF missions, roles, functions, and duties. These competencies are the core of Airmen development and enable Airmen with tools, pathways, and capabilities to improve their performance in any job, specialty, or situation. The foundational competencies are grouped into different categories of Developing Self, Developing Others, Developing Ideas, and Developing Organization. Airmen can go to MyVector (accessible via AF Portal) to complete a self-assessment, which will have them evaluate themselves on the 24 Airmen's foundational competencies or a 360-degree assessment, where subordinates, peers, and leaders can also provide feedback. The assessment tools will provide Airmen with immediate feedback on personal strengths and areas for improvement. Additionally, a personal improvement plan with targeted resources (videos, reading content, developmental opportunities) are provided for continued self-development.

	Competency	Definition
Developing Self	Accountability	Demonstrates reliability and honesty; takes responsibility for the actions and behaviors of self and team
	Perseverance	Displays grit in accomplishment of difficult long-term goals. Works strenuously toward challenges; maintains effort and interest over years despite failure, adversity, and plateaus in progress.
	Communication	Effectively presents, promotes, and prioritizes varied ideas and issues both verbally and non-verbally through active listening, clear messaging, and by tailoring information to the appropriate audience
	Decision Making	Makes well-informed, effective, and timely decisions that weigh situational constraints, risks, and benefits
	Information Seeking	Demonstrates an underlying curiosity; desires to know more about things, people, oneself, the mission or issues; an eager, aggressive learner
	Flexibility	Adapts to and works with a variety of situations, individuals, or groups effectively
	Resilience	Negotiates, manages, and adapts to significant sources of stress or trauma
	Initiative	Does more than is required or expected to improve job results; takes action appropriately without prompting
	Self-Control	Keeps emotions under control and restrains negative actions when under stress
Developing Others	Teamwork	Collaborates effectively with others to achieve a common goal or complete a mission task
	Develops People	Invests in others to maximize their contributions to the mission by inspiring and providing an environment of continual feedback and learning opportunities
	Service Mindset	Desires to help or serve others to meet their needs; makes and focuses efforts to discover and meet others' needs
	Leadership	Inspires builds, and sustains others' motivation and morale to accomplish the mission; organizes people and actions
Developing Ideas	Analytical Thinking	Identifies problems, evaluates alternative perspectives / solutions, makes effective recommendations, and identifies courses of action
	Digital Literacy	Uses technology to identify, critically evaluate and synthesize data and information; explore, create and manage digital content; and appropriately interact in a virtual environment
	Creative Thinking	Develops new insights into new situations; questions conventional approaches
	Fostering Innovation	Builds a culture of behaviors and business practices that encourages, champions, and rewards creativity and informed risk-taking; is open to change
	Influence	Intends to persuade, convince, or impress others to elicit their support to make specific impacts or achieve particular effects on others
Developing Organizations	Resource Management	Carefully and responsibly administrates resources placed under a member's control with the intent to maximize readiness and lethality and improve organizational performance
	Results Focused	Demonstrates concern for working well or for competing against a standard of excellence
	Change Management	Adapts, helps others adapt, or implements change with the goal of ensuring unit goals are properly aligned to the desired end state
	Strategic Thinking	Considers and organizes activities and resources to achieve a desired goal; thinks on a large and small scale, long- and short-term
	Precision	A concern for order, quality, and accuracy with an underlying drive to reduce uncertainty in the environment

Figure 1. Airmen's Foundational Competencies.

4.1.1. **Occupational Competency Model.** A career field's competencies can be viewed in a competency model, which is an organized collection of competencies pertinent to the career field. The occupational competency model provides a framework to effectively assess, maintain, and monitor the competencies required for mission success for Airmen within the Vehicle Management community. The occupational competency modeling process follows a distinct process with continued involvement from the career field and allows Airmen to see how their task lists, OJT, formal courses, and other training, education, and experiences are aligned to the career field's strategic objectives.

4.1.2. Career fields work with trained competency experts to identify and develop their competency model, which consists of the competencies, sub-competencies, and definitions. Occupational competency models will be different for each career field. The model focuses on integrating not just the technical components, but also leadership, management, combat, joint, all-domain, and social mastery competencies required for Airmen to succeed in their career field.

Competency	Sub-Competency	Sub-Competency Description
Mission Execution	Fleet Management	The process of managing vehicles and equipment throughout their lifecycle
	Troubleshooting	A systematic approach of solving an issue(s) by diagnosing a fault in various systems and subsystems
	Maintenance Actions	The steps taken to restore a vehicle or piece of equipment to safe and serviceable standards
	Maintenance Documentation	Documenting, tracking, and correcting maintenance actions
Total Force Development	Readiness	Training, preparing, and equipping personnel to mobilize resources for full spectrum military operations
	Training	Events or activities presented in a structured manner for the attainment of the knowledge, skills, and abilities required to meet job performance and mission requirements
	Leadership	The art and science of leading, mentoring, coaching, and directing personnel in the accomplishment of mission objectives
	Personnel Management	Developing personnel through a deliberate, career-long process of appraisals, feedback, high performance recognition, career-broadening, and enhancing opportunities
Resource Management	Resource Management	The practice of planning, scheduling, and allocating manpower, funding, and assets to a project or program to achieve mission objectives
Support Functions	Program Management	The navigation of applicable guidance to achieve all directed program objectives by utilizing time phased milestones and action items to monitor and control program execution
	Materiel Management	Managing inventory through responsible planning and execution of supply chains to meet vehicle management mission requirements
	Environmental	The proper acquisition, use, storage, and disposal of hazardous materials in accordance with federal, state, and local policies
	Safety	The assessment, measurement, and mitigation of risk to personnel, vehicles, and equipment

Figure 2. 2T3X1, Mission Generation Vehicular Management, Occupational Competency Model

4.1.3. Occupational Competency Rubric. After a model is developed, a team of subject matter experts begin building competency rubrics, which consists of the competency, a description of the competency, proficiency levels, and measurable and observable behaviors. The competency rubrics will help Airmen learn which behaviors are aligned to the career field's strategic direction, the professional developmental expectations, and the criteria for success. Figure 3 provides an example of a competency rubric for 2T3X1 career field.

Competency	Proficiency Levels	Observable Behaviors
Mission Execution	Expert Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency	- Leads teams in adverse conditions to accomplish maintenance tasks in support of mission accomplishment - Guides operations and streamlines use of available resources for maintenance activities - Coordinates with industry for innovative ways to improve operations and implement change to current processes
Sub-Competency Maintenance Actions	Advanced Consistency of Application: Sustained application of competency over time in complex situations	- Identifies trends and recommends corrective actions to improve maintenance practices - Prioritizes maintenance needs and production schedule to meet mission requirements - Repairs vehicle systems and subsystems with limited resources (e.g., fabrication, field expedient repairs, triage maintenance, etc.)
Description The steps taken to restore a vehicle or piece of equipment to safe and serviceable standards	Intermediate Consistency of Application: Sustained application of competency over time in a variety of situations	- Performs common vehicle and equipment inspections in accordance with Vehicle Management Enterprise regulations - Performs assigned maintenance on vehicle systems and subsystems in accordance with technical guidance - Uses specialized tools and equipment items to accomplish maintenance tasks
Supporting Competencies Analytical Thinking Decision Making Teamwork Flexibility	Basic Consistency of Application: Sustained application of competency over time	- Assists with assigned maintenance tasks to support vehicle management operations - Uses proper tools and equipment items to accomplish basic maintenance tasks

Figure 3. 2T3X1, Mission Generation Vehicular Management, Occupational Competency Rubric for Outbound Operations

4.1.4. To better understand how to read and utilize the competency rubric, a breakdown of each component is explained below in figure 4a-c.

Competency Mission Execution	←	The competency section states the competency group.
Sub-Competency Maintenance Actions	←	The sub-competency section states the narrower category that forms part of the competency group. **Note:** Some models may only consist of a competency and not include a sub-competency.
Description The steps taken to restore a vehicle or piece of equipment to safe and serviceable standards.	←	The description section provides a statement that gives details about the sub-competency, enabling career field members to better understand how sub-competency relates to the AFS.
Supporting Competencies Analytical Thinking Digital Literacy Flexibility Information Seeking	←	The supporting competencies section are supported-level competencies that are linked to the success of the sub-competency. These competencies lend themselves more toward areas like values, traits, and attitudes. These competencies were included as part of a larger survey that went out to the entire AFS; respondents were asked to rate the top supporting competencies they believe will attribute to higher successful performance within the sub-competency.

Figure 4a. Competency Rubric Section 1.

Proficiency Levels		
Expert **Consistency of Application:** Able to innovate and formulate strategies; able to model/guide/teach other the competency of how to apply the competency	←	The proficiency levels are broken into four parts: basic, intermediate, advanced, and expert. Under each proficiency level are predetermined criteria selected by a group of SMEs from your career field and validated by the career field. The criteria were used as the basis to develop the observable behaviors. These criteria provide concrete parameters for the behaviors, which are consistent but progressive in nature as a member moves up the scale from basic to expert. Some of the criteria (e.g., depth of knowledge, consistency of application/complexity, and thinking challenge) allows an individual to become an expert through the experience gained in a particular job and over a period of time. For example, the person can quickly move up different proficiency levels while they are serving as a technician at a flight; they move quickly because they are exposed to a variety of situations. While other criteria (e.g., scope, impact, and reach of influence) requires more of a hierarchical approach to gain the experience needed to progress through the competency levels. Moving through the proficiency levels may be difficult to do in certain jobs. For example, if scope at the expert level requires job integration with the AF-level, then the individual may have to be in a position where they can gain that experience (i.e., at HHQ, Wing, or an organization with far reaching capabilities).
Advanced **Consistency of Application:** Sustained application of competency over time in complex situations		
Intermediate **Consistency of Application:** Sustained application of competency over time in variety of situations		
Basic **Consistency of Application:** Sustained application of competency over time		

Figure 4b. Competency Rubric Section 2.

Observable Behaviors	←	The observable behaviors are statements of what can be observed from an individual manifesting the competency at the respective competency level. They provide objective evidence that the individual possesses the competency level and shows what effective performance looks like. The behaviors are written to be specific enough so they can be observable and lend themselves towards measurement.
– Leads teams in adverse conditions to accomplish maintenance tasks in support of mission accomplishment. – Guides operations and streamlines use of available resources for maintenance activities – Coordinates with industry for innovative ways to improve operations and implement change to current processes		
– Identifies trends and recommends corrective actions to improve maintenance practices. – Prioritizes maintenance needs and production schedule to meet mission requirements. – Repairs vehicle systems and subsystems with limited resources (e.g., fabrication, field expedient repairs, triage maintenance, etc.)		
– Performs common vehicle and equipment inspections in accordance with Vehicle Management Enterprise regulations. – Performs assigned maintenance on vehicle systems and subsystems in accordance with technical guidance. – Uses specialized tools and equipment items to accomplish maintenance tasks		
– Assists with assigned maintenance tasks to support vehicle management operations. – Uses proper tools and equipment items to accomplish basic maintenance tasks		

Figure 4c. Competency Section 3.

4.4.3. Another key component within the rubric is the supporting competencies section at the bottom left-hand corner. These are the top four supporting competencies that can help members excel and be successful in that sub-competency. Some of these supporting competencies are tied directly to the Airmen's Foundational Competencies, while others may be unique to the career field. Having these supporting competencies identified and linked to a career field's competency model can cultivate those underlying characteristics needed to succeed on the job. Leaders, supervisors, trainers, instructors, or mentors can now set members up for greater success by building these supporting competencies and placing their Airmen in situations where they can apply those strategies. All these elements come together to ensure we can develop Airmen who are better prepared, present, and future mission focused, and ready to succeed in any situation. Additionally, DAFH 36-2643, *Air Force Mentoring Program*, has information on how competencies can be used when an established mentoring strategy is put into effect to foster and develop Airmen.

4.4.4. Competency Development. The intent of moving towards a competency-based system is to sharpen our Airmen's tactical expertise, operational competence, strategic vision, and joint proficiency to lead and execute the full spectrum of USAF missions. This occurs not in a classroom but on the job by combining education, training, and experiences to provide Airmen with a better developmental pathway as they move along their careers. Airmen are still required to complete specific training courses, core tasks, and other training requirements in order to attain a 3-, 5-, and 7-skill levels. Competency development allows Airmen to move beyond the minimum career field requirements and begin addressing developmental gaps and strengthening their capabilities. The information included within the competency model will allow members within the Vehicle Management community to manage their professional growth and development by identifying their strengths and weaknesses against clear and objective behaviors within the competency model.

4.4.5. The following are the competency rubrics for 2T3X1, Mission Generation Vehicular Management:

Competency	Proficiency Levels	Observable Behaviors
Mission Execution	Expert Impact on… AF-level practices/within industry	- Analyzes mission demands, modernization plans, and budget requests for infrastructure and equipment in support of mission generation - Aligns vehicles, equipment, resources, and capabilities to meet strategic objectives - Recognizes long-term trends to anticipate future challenges associated with evolving fleet practices
Sub-Competency	Advanced Impact on… Management decisions	- Coordinates with outside agencies to support repairs and inspections - Prioritizes workflow to meet mission requirements utilizing maintenance information systems - Leverages appropriate data collection techniques to identify root causes and include all sources in the decision-making process
Fleet Management		
Description	Intermediate Impact on… Specific workplace projects	- Monitors and validates maintenance information systems inputs, corrects discrepancies, and documents equipment inspections, maintenance accountability, and serviceability - Reinforces proper usage and accountability of Fleet Management Information Systems - Researches and differentiates collected data in order to provide recommended courses of action and/or solutions
The process of managing vehicles and equipment throughout their lifecycle		
Supporting Competencies	Basic Impact on… Specific workplace tasks	- Communicates key concepts and principles to accomplish mission generation vehicle support - Navigates maintenance information systems pertaining to mission generation vehicle support - Performs basic tasks by adhering to technical data and higher headquarters processes
Communication Accountability Analytical Thinking Decision Making		

Competency	Proficiency Levels	Observable Behaviors
Mission Execution	Expert Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency	- Advises others and leads teams on advanced troubleshooting techniques - Solves rare anomalies and recommends appropriate revisions to diagnostic strategies - Confirms functionalities of innovative technologies to expedite troubleshooting procedures
Sub-Competency	Advanced Consistency of Application: Sustained application of competency over time in complex situations	- Utilizes schematics and wiring diagrams to diagnose uncommon issues - Consults with community experts or industry partners to resolve rare anomalies - Employs technical ability to utilize theory of operations, methods, and procedures to isolate and repair complex system or subsystem failures
Troubleshooting		
Description	Intermediate Consistency of Application: Sustained application of competency over time in a variety of situations	- Interprets maintenance deficiencies using applicable technical data to isolate faults - Utilizes test equipment to evaluate malfunctions and determine proper repair procedure(s) - Accurately determines discrepancies by using process of elimination techniques to resolve problems in various systems and subsystems
A systematic approach of solving an issue(s) by diagnosing a fault in various systems and subsystems		
Supporting Competencies	Basic Consistency of Application: Sustained application of competency over time	- Identifies system and subsystem components and functions of fleet assets - Identifies proper test equipment needed to troubleshoot systems - Performs applicable function checks on vehicle systems and subsystems
Analytical Thinking Creative Thinking Information Seeking Communication		

Competency	Proficiency Levels	Observable Behaviors
Mission Execution	Expert Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency	- Leads teams in adverse conditions to accomplish maintenance tasks in support of mission accomplishment - Guides operations and streamlines use of available resources for maintenance activities - Coordinates with industry for innovative ways to improve operations and implement change to current processes
Sub-Competency	Advanced Consistency of Application: Sustained application of competency over time in complex situations	- Identifies trends and recommends corrective actions to improve maintenance practices - Prioritizes maintenance needs and production schedule to meet mission requirements - Repairs vehicle systems and subsystems with limited resources (e.g., fabrication, field expedient repairs, triage maintenance, etc.)
Maintenance Actions		
Description	Intermediate Consistency of Application: Sustained application of competency over time in a variety of situations	- Performs common vehicle and equipment inspections in accordance with Vehicle Management Enterprise regulations - Performs assigned maintenance on vehicle systems and subsystems in accordance with technical guidance - Uses specialized tools and equipment items to accomplish maintenance tasks
The steps taken to restore a vehicle or piece of equipment to safe and serviceable standards		
Supporting Competencies	Basic Consistency of Application: Sustained application of competency over time	- Assists with assigned maintenance tasks to support vehicle management operations - Uses proper tools and equipment items to accomplish basic maintenance tasks
Analytical Thinking Decision Making Teamwork Flexibility		

Competency	Proficiency Levels	Observable Behaviors
Mission Execution	Expert Reach of Influence: Squadron	- Creates local guidance and disseminates information to ensure awareness of changes - Reviews and validates documentation and compares results with other units to resolve shared discrepancies
Sub-Competency	Advanced Reach of Influence: Flight	- Performs documentation reviews, validates recommendations, and initiates applicable changes - Analyzes common trends to remediate operational redundancies
Maintenance Documentation		
Description	Intermediate Reach of Influence: Section	- Oversees and provides guidance for basic documentation - Performs quality verification on completed documentation actions - Corrects discrepancies to ensure maintenance data integrity
Documenting, tracking, and correcting maintenance actions		
Supporting Competencies	Basic Reach of Influence: Individuals	- Documents assigned maintenance tasks according to local and Air Force guidance - Navigates Fleet Management Information Systems to capture clean maintenance data
Accountability Communication Digital Literacy Precision		

Competency	Proficiency Levels	Observable Behaviors
Total Force Development	Expert Reach of Influence: MAJCOM/AF-Level/Industry	- Identifies mission requirements and commits resources for world-wide mobilization based on analysis of unit readiness reporting - Plans and establishes UTC requirements based on current and future mission requirements - Coordinates UTC requirements across separate MAJCOMs
Sub-Competency	Advanced Reach of Influence: Wing/Institutional	- Manages equipment and personnel mobilization process to ensure all tasking requirements are met while maintaining home station capabilities - Scrutinizes unit personnel readiness requirements and identifies all deployers who can fulfill tasking needs - Interprets and executes strategic direction from leadership to make informed decisions
Readiness		
Description	Intermediate Reach of Influence: Unit/Groups	- Executes equipment mobilization process by ensuring all requirements are met - Ensures personnel are equipped with deployment supplies to support mission requirements - Utilizes all required information systems to meet all tasking requirements - Provides equipment status to ensure accurate readiness reporting (i.e., LOGMOD, DRRS)
Training, preparing, and equipping personnel to mobilize resources for full spectrum military operations		
Supporting Competencies	Basic Reach of Influence: Individuals	- Prepares equipment for mobilization within an assigned tasking while meeting established timelines - Maintains world-wide deployable status by maintaining readiness in all aspects to meet mission requirements - Establishes personal contingency plan for both short- and long-term absences that ensures family and individual readiness
Accountability Communication Flexibility Change Management		

Competency	Proficiency Levels	Observable Behaviors
Total Force Development	Expert Reach of Influence: MAJCOM/AF-Level/Industry	- Analyzes training shortfalls and ensures career field personnel are ready to meet strategic objectives - Develops and implements training strategy to align mission with strategic guidance - Validates training requirements to establish enlisted developmental criteria and formal training requirements and opportunities
Sub-Competency	Advanced Reach of Influence: Wing/Institutional	- Advocates and acquires training resources to ensure Airmen have sufficient knowledge and skills to execute the mission - Collaborates across the organization to identify trends and resolve education and training shortfalls - Tracks upgrade and proficiency training requirements and reports progress to senior leaders
Training		
Description	Intermediate Reach of Influence: Unit/Groups	- Provides hands-on training to accomplish vehicle management tasks - Analyzes performance gaps and seeks additional training to develop Multi-Capable Airmen - Establishes and documents work center training requirements to achieve short- and long-term mission objectives
Events or activities presented in a structured manner for the attainment of the knowledge, skills, and abilities required to meet job performance and mission requirements		
Supporting Competencies	Basic Reach of Influence: Individuals	- Applies and utilizes training resources to increase development of vehicle management competencies - Reviews personal training records to achieve training milestones
Communication Develops People Accountability Leadership		

Competency	Proficiency Levels	Observable Behaviors
Total Force Development	Expert Reach of Influence: MAJCOM/AF-Level/Industry	- Articulates vision to posture the force for future mission success - Promotes a culture of innovation across the enterprise.
Sub-Competency	Advanced Reach of Influence: Wing/Institutional	- Navigates ambiguous situations to find and implement constructive solutions to organizational problems - Creates effective teams that contribute to a professional climate and culture - Leverages personal experience and knowledge to effectively accomplish and advance the mission by fostering enduring team readiness for wartime actions and decisions
Leadership		
Description	Intermediate Reach of Influence: Unit/Groups	- Develops a professional climate by supporting, leading, and coaching personnel - Leads personnel by providing appropriate feedback, training, and opportunities for professional development - Encourages and facilitates a healthy climate to foster followership
The art and science of leading, mentoring, coaching, and directing personnel in the accomplishment of mission objectives		
Supporting Competencies	Basic Reach of Influence: Individuals	- Takes ownership of primary duties in support of mission accomplishment - Maintains individual accountability and encourages peer accountability to successfully execute all duties, instructions, and responsibilities - Contributes to a professional climate and culture by supporting leaders' decisions - Proactively seeks feedback for self-improvement
Accountability Communication Leadership Develops People		

Competency	Proficiency Levels	Observable Behaviors
Total Force Development	Expert Impact on… AF-level practices/within industry	- Determines proper authorizations, assignments, priorities, and projections to meet mission requirements - Engages with AFPC to address personnel and operational issues (e.g., humanitarian, assignment allocations, and Equal Plus advertisements) - Deliberately manages talent across the enterprise to support mission objectives
Sub-Competency	Advanced Impact on… Management decisions	- Utilizes UMD/UPMR to assign available personnel to fulfill required position numbers - Analyzes assigned positions and communicates readiness concerns to leaders - Determines qualifications and selects individuals for civilian job vacancies
Personnel Management		
Description	Intermediate Impact on… Specific workplace projects	- Selects team composition to execute mission requirements and advance professional development (e.g., shift breakdown, leave, TDYs, and duty limitations) - Identifies eligible personnel for special and additional duty positions - Proactively mitigates personnel operational concerns (e.g., qualification shortfalls, coverages, and staffing imbalances) - Proactively mitigates personal readiness concerns (e.g., medical, financial, good order and conduct, quality of life issues)
Developing personnel through a deliberate, career-long process of appraisals, feedback, high performance recognition, career-broadening, and enhancing opportunities		
Supporting Competencies	Basic Impact on… Specific workplace tasks	- Sets expectations in-line with commander's intent and enforces accountability - Utilizes evaluation systems to accomplish appraisals and performance feedbacks for personnel development - Identifies and recommends candidates deserving of personal recognition to award superior performance
Communication Accountability Develops People Leadership		

Competency	Proficiency Levels	Observable Behaviors
Resource Management	Expert Reach of Influence: MAJCOM/AF-Level/Industry	- Reviews and validates budget requirements to advocate for enterprise materials, equipment, and funding - Coordinates with Air Force manpower community to initiate manpower studies to address concerns and shortfalls
Sub-Competency	Advanced Reach of Influence: Wing/Institutional	- Analyzes data to posture resources at installation within command authority - Projects future budget requirements in response to recurring needs - Identifies and resolves resourcing and funding shortfalls
Resource Management		
Description	Intermediate Reach of Influence: Unit/Groups	- Prepares and analyzes resource utilization to justify future requirements - Collaborates with unit resource advisor to secure funding for maintenance operations - Executes approval authority for work center utilization and distribution
The practice of planning, scheduling, and allocating manpower, funding, and assets to a project or program to achieve mission objectives		
Supporting Competencies	Basic Reach of Influence: Individuals	- Identifies materials, equipment, and assets needed to execute mission requirements - Utilizes resources appropriately by adhering to applicable rules and regulations
Resource Management Accountability Communication Decision Making		

Competency	Proficiency Levels	Observable Behaviors
Support Functions	Expert Scope: Integration with AF-level/within industry	- Reviews programs and coordinates with agencies to assess impact to mission requirements - Develops and disseminates standardized inspection criterion to enable reliable assessments capabilities - Creates and publishes local program guidance and directives to meet organizational needs
Sub-Competency	Advanced Scope: Integration with organizational strategies	- Identifies trends and recommends courses of action to resolve challenges or discrepancies within a program - Establishes objectives and milestones to mitigate program shortfalls
Program Management		
Description	Intermediate Scope: Integration with concerned areas	- Evaluates and implements program policy and guidance to ensure alignment with mission requirements - Develops local checklists and guidance to streamline program implementation
The navigation of applicable guidance to achieve all directed program objectives by utilizing time phased milestones and action items to monitor and control program		
Supporting Competencies	Basic Scope: Specific Area	- Tracks, updates, distributes, and documents program inputs and outputs to ensure compliance in support of mission needs - Executes responsibilities and coordinates with key players of programs to ensure effective program management
Accountability Communication Analytical Thinking Initiative		

Competency	Proficiency Levels	Observable Behaviors
Support Functions	Expert Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the	- Partners with outside agencies or companies for materiel acquisition to maintain readiness - Collaborates with other bases for equipment requirements to mitigate shortfalls - Advises on workplace supply management practices to ensure policy adherence and optimize work center performance
Sub-Competency	Advanced Consistency of Application: Sustained application of competency over time in complex situations	- Evaluates processes and analyzes end-use input for materiel management improvement - Adjusts inventories and authorizations to meet projected mission changes - Develops workplace practices and policies to ensure proper supply chain management - Interprets supply data to provide inputs of allocations and movement of resources
Materiel Management		
Description	Intermediate Consistency of Application: Sustained application of competency over time in a variety of situations	- Oversees tool issue and return processes, inventory quantities, and inspection criteria for accountability - Identifies shortfalls with on-hand resources and takes corrective action to replenish inventories - Manages parts, tool, and equipment annual inventory levels to ensure proper materiel management utilization - Resolves supply chain utilization needs to ensure compliance
Managing inventory through responsible planning and execution of supply chains to meet vehicle management mission requirements		
Supporting Competencies	Basic Consistency of Application: Sustained application of competency over time	- Facilitates tool issue and return in support of vehicle maintenance activities - Examines tools for serviceability and replaces as necessary - Orders parts using local guidance to obtain resources while following supply chain discipline
Accountability Resource Management Communication Precision		

Competency	Proficiency Levels	Observable Behaviors
Support Functions	Expert Impact on… AF-level practices/within industry	- Audits hazardous material manufacturers for cost-benefit analysis - Recommends change requests to higher-level agencies in an effort to improve regulations - Develops and disseminates guidance to ensure personnel comply with regulations to mitigate health and environmental mishaps
Sub-Competency	Advanced Impact on… Management decisions	- Teams with end users to ensure hazardous materials guarantee maximum effectiveness - Compares like hazardous materials to track and establish improvement and efficiency - Monitors training to ensure personnel comply with regulations to mitigate health and environmental mishaps - Partners with outside agencies to coordinate further disposal
Environmental		
Description	Intermediate Impact on… Specific workplace projects	- Supports inspections with regard to expiration date, proper labeling, container damage, leaks and spills to ensure unnecessary exposures - Manages hazardous material storage to prevent fire and spills in accordance with all regulations - Develops hazardous material inventories and quantities for mission sustainment - Administers training to ensure personnel comply with regulations to mitigate health and environmental mishaps
The proper acquisition, use, storage, and disposal of hazardous materials in accordance with federal, state, and local policies		
Supporting Competencies	Basic Impact on… Specific workplace tasks	- Handles hazardous materials for use on specific tasks and equipment - Ensures disposal of hazardous materials comply with all local, state, and federal regulations
Accountability Resource Management Communication Decision Making		

Competency	Proficiency Levels	Observable Behaviors
Support Functions	Expert Impact on… AF-level practices/within industry	- Analyzes safety trends and mishaps to develop safety guidelines - Publishes and disseminates guidance to deter safety mishaps across the Vehicle Management enterprise
Sub-Competency Safety	Advanced Impact on… Management decisions	- Advises commanders, functional managers, supervisors, and employees on safety matters to safeguard personnel and equipment - Evaluates safety program to ensure compliance - Categorizes trends and elevates findings to higher-level personnel
Description The assessment, measurement, and mitigation of risk to personnel, vehicles, and equipment	Intermediate Impact on… Specific workplace projects	- Validates personnel are trained on unique safety risks and hazards prior to accomplishing assigned tasks - Initiates and reviews job hazard analysis or mishap reports to identify and mitigate risks - Evaluates work area and enforces occupational safety requirements for risk mitigation
Supporting Competencies Accountability Communication Decision Making Analytical Thinking	Basic Impact on… Specific workplace tasks	- Complies with all PPE requirements to ensure safe performance of assigned duties - Adheres to all safety standards to meet occupational safety and applicable guidance - Identifies and reports safety hazards, unsafe conditions, or mishaps to ensure a safe environment

5.0 **Skill/Career Progression.** Adequate training and timely progression from the apprentice to the superintendent skill level play an important role in the Air Force's ability to accomplish its mission. It is essential that everyone involved in training must do their part to plan, manage, and conduct an effective training program. The guidance provided in this part of the CFETP will ensure each Airman receives viable training at appropriate points in their career. The following narrative and AFSCs 2T3X1 Career Development Flow Charts identify career skill progression.

5.1. **Apprentice (3-skill level)**: Upon completion of initial skills training, trainees work with a trainer to enhance their knowledge and skills. Individuals will use a combination of OJT and advanced courses to progress in the career field. Education toward a CCAF degree should continue. Must have a minimum of 12 months of OJT for Journeyman consideration.

5.2. **Journeyman (5-skill level)**: Once upgraded to the 5-level, journeymen will enter into continuation training to broaden their experience base. Typical job positions for 5-levels include positions requiring supervisory skills such as OJT trainer, quality assurance inspector and materiel control or section supervisor. 5-levels will complete required available advanced courses, and MAJCOM specific training. Individuals will attend the Airman Leadership School (ALS) after completing 48 months in the Air Force, or upon selection for promotion to Staff Sergeant. Individuals will use appropriate reference materials to prepare for testing under the Weighted Airman's Promotions System (WAPS). Education toward a CCAF degree should continue.

5.3. **Craftsman** (7-skill level): Craftsmen can expect to fill various supervisory and management positions and may be assigned to higher headquarters staff positions and 2T3X1 formal training centers. Personnel are encouraged to take courses to obtain added knowledge on management of resources and personnel. Continue academic education through CCAF and higher degree programs. In addition, eligible individuals will complete Enlisted PME developmental courses.

5.4. **Superintendent (9-skill level)**: A 9-skill level is expected to fill leadership, supervisory and management positions such as vehicle management flight chief or vehicle management superintendent and may be assigned to headquarters staff positions. Additional training in the areas of budget, manpower, resource, and personnel management is necessary, and can be provided through continuing education. The 9-skill level is awarded upon sew-on of Senior Master Sergeant. Additional higher education and completion of courses and certifications both inside and outside the career AFSC are also recommended.

5.4.1. **Training Decisions.** The CFETP has undergone a considerable revision towards building a competency-based training and development platform for the Vehicle Management career field. A significant

change has been to shift the focus from task-based training to one that is more centered on outcomes-based learning. A task is a unit of work activity or operation which forms a significant part of a duty. These are singular in nature and are usually accomplished in one continuous action, which also can occur independently of other tasks. Conversely, outcomes are learning goals that typically consist of a multitude of tasks. These outcomes are actions and performances that embody and reflect the learner's competence in using content, information, ideas, and tools successfully. Focusing on learning outcomes allow organizations, leaders, supervisors, and trainers to incorporate foundational competencies and underlying characteristics (values, traits, attitudes) into learning, which is necessary for developing Airmen with the competencies needed for future challenges. The following decisions were made as a result of close coordination between HQ AETC, 2AF Technical Training, training center instructors and staff, field SMEs, functional managers and the AFCFM. The final training requirements are then approved by the Career Field Manager.

5.4.2. Specialty Training Requirements Team (STRT) was held from 12-16 June 2023 at Port Hueneme, CA. Members of the STRT sought to develop the learning outcomes. This was accomplished by reverse engineering the behaviors found in the Vehicle Management occupational competency model and then by asking what does an Airman need to able to know and do in order to master a specific behavior. The intent of the learning outcomes is to identify all factors needed to succeed in attaining the behavior. Formal training will be codified by using the behavioral statement coding system for the STS as opposed to the proficiency code key. As a result, each line item will consist of a verb and the coding system for formal training will only use P (performance), K (knowledge), and pk (performance-knowledge).

5.4.3. The CFETP uses a building block approach (simple to complex) to encompass the entire spectrum of training requirements for the Vehicle Management career field. The spectrum includes a strategy for when, where, and how to meet the training requirements. The strategy must be apparent and affordable to reduce duplication of training and eliminate a disjointed approach to training. The following decisions were made by a career field STRT held at Port Hueneme, CA.

5.4.4. The CFETP Part II identifies fourteen (14) sub-competencies. Each competency is further broken down into the following proficiency levels; basic, intermediate, advanced, and expert. The proficiency levels are not tied to a specific rank or position. Additionally, each occupational competency has supporting competencies tied to them. The supporting competencies can allow Airmen to intentionally develop those transferrable underlying characteristics that will translate to mission capabilities, mission readiness, and mission success for the agile, future thinking Airman. Airmen, supervisors, trainers, mentors, and leaders should look for opportunities to integrate the supporting competencies into every facet of an Airman's development as they seek to gain and increase proficiency within the Vehicle Management competencies.

5.4.5. **Initial Skills Training**. The initial skills courses were revised to provide the training needed to better prepare graduates for the tasks they will be facing in the field.

5.4.6. **Upgrade Training Requirements.** 2T351 and 2T371 Mission Generation Vehicular Management courses.

5.5. **Community College of the Air Force (CCAF).** Enrollment in CCAF occurs upon completion of basic military training. CCAF provides the opportunity to obtain an Associate in Applied Sciences Degree. In addition to its associate degree program, CCAF offers the following:

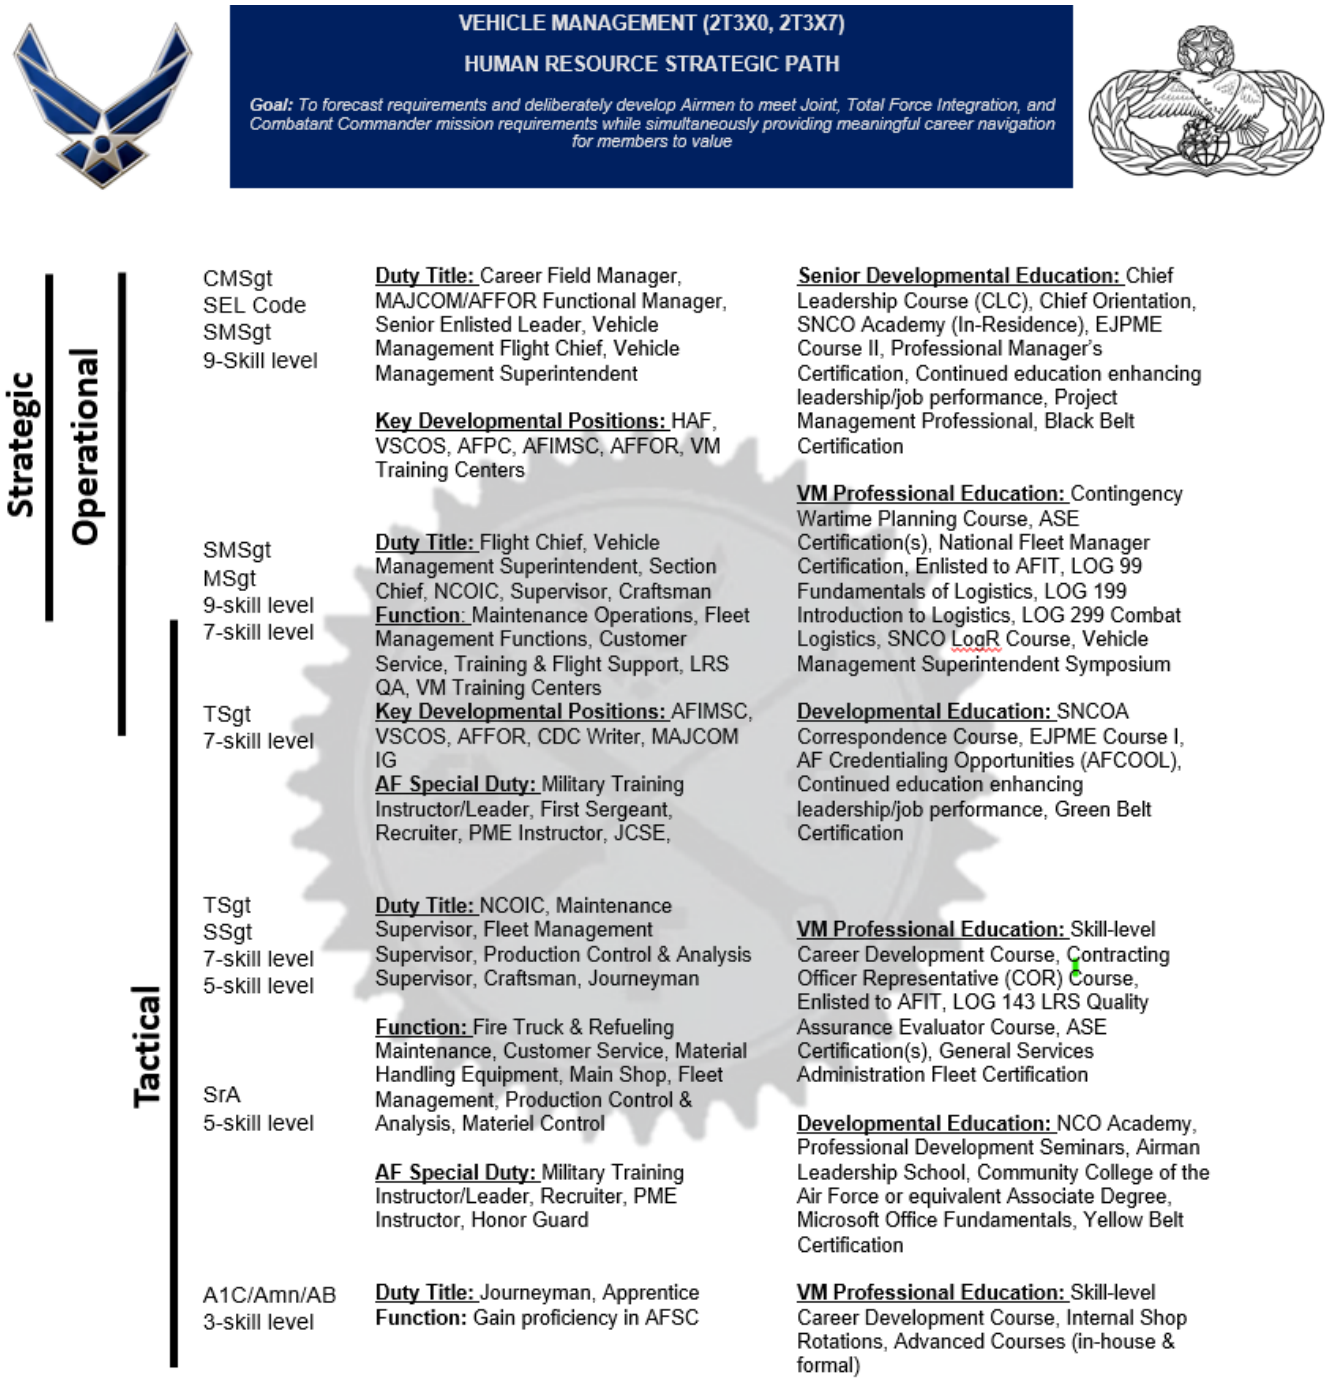

5.5.1. **CCAF Instructor Certification**. Upon completion of instructor qualification training, consisting of the instructor methods course and supervised practice teaching, CCAF instructors who possess an associate degree or higher may be nominated by their school commander/commandant for CCAF Instructor Certification.

5.5.2. **Applicability.** The Mission Generation Vehicular Management program applies to occupational 2T3X1 specialty.

5.5.3. **Degree Requirements.** All Airmen are automatically entered into the CCAF program. Prior to completing an associate degree, the 5-skill level must be awarded.

5.5.4. **NOTE:** CCAF is evaluating courses and degree credits for all AFSCs. Upon completion of evaluation, CFM will update CFETP.

Figure 1. Vehicle Management Human Resource Strategic Path

Vehicle Management Education and Training Path. Outlines training requirements for each skill level to include Professional Military Education and the functional training requirements within the Vehicle Management specialty.

Education & Training Requirements		GRADE REQUIREMENTS		
	Rank	Earliest Sew-On	2T3XX Promotion Averages *	High Year of Tenure (HYT) **
Basic Military Training School	AB			8 years
Apprentice Technical School (3-Skill Level)	Amn A1C	6 months 10 months		8 years
Upgrade to Journeyman (5-Skill Level) □ Minimum 12 months on-the-job □ Minimum 9 months on-the-job for retrainees □ Complete OJTs □ DPAS Beginner Course M&U Guidebook □ Qualified on 5-level core tasks	A1C SrA	16 months 28 months	3 years	8 years 10 years
Airman Leadership School (ALS) □ Must be SrA with 48 months' time in service or be SSgt Select to attend □ Must be SrA with 42 months' time in service to accomplish ALS by correspondence (ARC only) □ Resident graduation is prerequisite for SSgt sew- on (Active Duty only)	SrA	28 months	3 years	10 years
Upgrade to Craftsman (7-Skill Level) □ Minimum rank of SSgt □ Qualified on 7-level core tasks □ 12 months OJT □ 6 months OJT for retrainees □ Shop Supervisor course (Staff Select) □ DPAS Course 1 Leadership Metrics □ DPAS Course 2 Scheduled Maintenance Analytics □ DPAS Warehouse Course Over and Under	SSgt	3 years	4.6 years (X1) 4.7 years (A) 4.6 years (C) 4.9 years (X7)	20 years
Noncommissioned Officer Academy □ Must be TSgt or TSgt selectee to attend □ Resident graduation is prerequisite for MSgt sew-on (Active Duty only) □ Resident or correspondence graduation is a prerequisite for MSgt sew-on (ARC only)	TSgt	5 years	10.2 years (X1) 9.3 years (X7)	22 years
Senior NCO Academy □ Must be MSgt or SMSgt selectee to attend □ Resident graduation is prerequisite for SMSgt sew-on (Active Duty only) □ Resident or correspondence graduation is a prerequisite for SMSgt sew-on (ARC only) □ Flight Leadership course (Master select)	MSgt	8 years	14.6 years (X1) 14.8 years (X7)	24 years
Upgrade to Superintendent (9-Skill Level) □ Minimum rank of SMSgt	SMSgt	11 years	19.5 years	26 years
Senior Enlisted Leader (SEL) □ Minimum rank of CMSgt	CMSgt	14 years	22.6 years	30 years

* Note: Promotion averages are based on the 2023 Promotion Cycle.

**Note: High Year Tenure has been extended for 24 months per the FY24 High Year of Tenure (HYT) Extension Program through 30 September 2024.

SECTION C: SKILL LEVEL TRAINING REQUIREMENTS

6.0 **Purpose.** Skill level training requirements in this career field are defined in terms of tasks and knowledge requirements. This section outlines the specialty qualification requirements for each skill level in broad, general terms and establishes the mandatory requirements for entry, award and retention of each skill level. The specific task and knowledge training requirements are identified in the STS at Part II, Sections A and B of this CFETP.

6.1. **Specialty Qualification: N/A**

6.2. **Apprentice (3-skill level).**

6.2.1. **Qualifications and Knowledge.**

6.2.2. **AFSC 2T331.** An individual must understand basic system theory of operation and perform certain organizational level maintenance tasks under close supervision to perform duties at the 3-skill level. Additionally, a 3-skill level must be able to use technical data, common hand tools and special test equipment.

6.2.3. **Training Sources.** The initial skills courses will provide the required knowledge and qualifications.

6.2.4. **Implementation.** Upon graduation from Basic Military Training, Airmen are assigned to the training center for completion of technical training courses.

6.3. **Journeyman (5-skill level).**

6.3.1. **Qualification and Knowledge.**

6.3.2. **AFSC 2T350.** In addition to the 3-skill level qualifications, an individual must possess the knowledge and skills necessary to maintain equipment and conduct training classes.

6.3.3. **Training Sources.** Qualification training and OJT provides training and qualification on the core tasks identified in the STS.

6.3.4. **Implementation.** Training to the 5-skill level is performed at unit-level using STS line items. Upgrade to the 5-skill level requires completion of applicable STS and completion of all core tasks. Flight Chief has approval authority for training timeline completion.

6.4. **Craftsman (7-Level)**

6.4.1. **Qualification and Knowledge.**

6.4.2. **AFSC 2T371** In addition to the 5-skill level qualifications, individuals must possess advanced skills and knowledge of theory, concepts, principles, and application of vehicle systems. To be awarded a 7-skill level, individuals must be able to supervise and train personnel to maintain systems and to see that they are able to plan, schedule and organize maintenance to ensure effective use of available resources.

6.4.3. **Training Sources.** Training for 7-skill level upgrade will be conducted by qualified trainers using the STS. Develop and provide exportable courses for field units to help standardize OJT and enhance training.

6.4.4. **Implementation.** Upgrade to the 7-skill level will require completion of the applicable 7- skill and all core tasks. Flight Chief has approval authority for training timeline completion.

6.5. **Superintendent (9-skill level)**, AFSC 2T390 is a 9-skill level.

6.5.1. **Qualification and Knowledge.** In addition to 7-skill level qualifications, individuals must possess advanced skills and knowledge of concepts and principles in management. Personnel at the 9-skill level are

considered to be effective leaders who are able to forecast, budget and manage funding and other assigned resources.

6.5.2. **Training Sources.** None.

6.5.3. **Implementation.** Award the 9-skill level upon SMSgt sew-on.

SECTION D: RESOURCE CONSTRAINTS

7.0 **Purpose.** This section identifies known resource constraints which preclude optimal/desired training from being developed or conducted, including information such as cost and manpower. Narrative explanations of each resource constraint and an impact statement describing what effect each constraint has on training are included. Also included in this section are the actions required, OPR and target completion dates. Resource constraints will be, as a minimum, reviewed and updated annually.

7.1.**3-skill level Training:**

7.2.**Constraints.** Two Global deicers, initial/sustainment funds and +7 instructors.

7.3.**Action Required**. N/A

7.4.**OPR and Target Completion Date**. October 2025.

7.5.**5-skill level Training:**

7.6.**Constraints.** None.

7.7.**Resources Required**. N/A

7.8.**Action Required.** CFM select agency and medium platform to deliver STS learning outcomes.

7.9.**OPR and Target Completion Date.** CFM. TCD: CFETP Change -- October 2025.

7.10. **5-skill level Training:**

7.11. **Constraints.** None.

7.12. **Resources Required**. N/A

7.13. **Action Required.** CFM select agency

7.14. and medium platform to deliver STS learning outcomes.

7.15. **OPR and Target Completion Date.** CFM. TCD: CFETP Change -- October 2025.

SECTION E: TRANSITION TRAINING GUIDE

8.0 Prior to award of AFSC 2T371, all personnel will complete Vehicle Management On-The-Job (OJT) training and enter a work center rotation plan to gain experience. AFSCs 2T371 merge at the 9-skill level (2T390).

8.1. **Vehicle Management OJT**. The purpose of this mandated requirement is to provide temporary upgrade training during the AFSC 2T3X1/A/C merger into 2T3X1 Mission Generation Vehicular Management. Airmen must complete courses for 7-level upgrade. CFM will determine training implementation and discontinuation dates. Training requirements are the following:

8.1.1. **Hydraulic systems**

8.1.2. 2T351C are grandfathered for this course requirement

8.1.3. Complete all deployment (*) learning outcomes identified in STS

8.1.4. Development consists of cargo loaders and forklifts

8.2. **Pumping (Fuel and Water) systems**

8.2.1. 2T351A are grandfathered for these requirements

8.2.2. Complete all deployment (*) learning outcomes identified in STS

8.2.3. Development consists of refuelers and fire trucks

BY ORDER OF THE SECRETARY OF THE AIR FORCE

OFFICIAL

JEFFREY R. KING, Maj Gen, USAF
Director of Logistics
DCS/Logistics, Engineering & Force Protection

PART II

SECTION A: SPECIALTY TRAINING STANDARDS

9.0 **Implementation**. This STS for technical training provided by AETC applies to all classes entering after 1 October 2025. STS for technical training applies to all classes to be determined when identified resources constraints are no longer.

9.1. **Purpose**. As prescribed in this STS:

9.1.1. Lists the mandatory and general tasks, knowledge and Technical References (TRs) necessary for Airmen to perform duties at the 3-, 5- and 7-skill level AFSC 2T3X1 ladders of the Airman Vehicle Management Career Field.

9.1.2. Becomes an AFJQS for OJT when placed in an OJT record and used according DAFI 36-2689. Provides OJT certification columns in Part 2, Section A to record completion of task and knowledge training requirements.

9.1.3. Qualitative Requirements. Part II, Section A contains the proficiency code key used to indicate the level of training and knowledge provided by resident training and career development courses.

9.1.4. Shows formal training requirements. The 3- and 7-level course columns show the proficiency to be demonstrated on the job by the graduate as a result of training in skill-level ascension courses. It is a guide for development of promotion tests used in the WAPP. Individual responsibilities are in DAFI 36-2502, Airman Promotion/Demotion Programs. WAPS is only applicable to active-duty personnel.

9.2. **Documentation**. Supervisors, trainers and trainees must ensure all training documentation is contained within an Airman's Individual Training Plan (ITP) in system of record IAW DAFI 36-2689 and the current system of record Application User's Guide.

9.2.1. The 2T3X1 AFCFM has not identified any core tasks requiring third-party certification. However, AFIMSC may establish policy concerning third-party certification. Note: Required upgrade training "core task(s)" identified by local unit, as "not available for training" must be annotated in MyTraining. The 5- or 7-skill level can then be awarded when all other training and core tasks are complete.

9.2.2. Converting External Task into MyTraining (Transcription Procedures). This action allows supervisors to convert tasks from an external source (AF Form 623) into system of record. When this action is initiated, the tasks that are converted into system of record go into the Airman's archived task lists. At that point, the supervisor with authority over the Airman's record can then select which tasks should be un- archived and moved to an active status IAW the system of record Application User's Guide.

9.2.3. Documenting Career Knowledge. The trainee completes undergoes evaluation by the supervisor and receives ITP task completion in system of record.

9.3. **Decertification and Recertification of ITP Task.** When an Airman is found to be unqualified on an ITP task previously completed for their duty position in MyTraining, the supervisor will take action to decertify the task and complete Journal Entry IAW the system of record Application User's Guide, Decertify ITP Task instructions.

9.4. **Training Standard.** Tasks are trained and qualified to the "Go" level. "Go" means the individual can perform the task without assistance and meets local demands for accuracy, timeliness, and correct use of procedures ("Go" level equates to 3c in the Specialty Training Standard proficiency code key) IAW AFI 36-2689.

9.5. **Comments and Recommendations**: Are invited concerning quality of AETC training. Reference specific STS paragraphs and address correspondence regarding changes to 37 TRG/DOS, 1220 Truemper Street, Suite 1, JBSA Lackland, TX 78236-5568. Report inadequacies of this STS through command channels to HQ USAF/A4LR, referencing specific STS paragraphs. A 24-hour customer service information line (CSIL) has been installed for supervisors to conveniently identify over or under training of performance/knowledge items listed in the training standard. For a quick response to any training concern, call CSIL, DSN 473-2917 anytime (day or night) or contact us via email at 37TRG.DOS@us.af.mil.

Notes: Users are responsible for updating training references pending revision of this STS. Required upgrade training "core task(s)" identified by local unit, as "not available for training" must be annotated in system of record. Comments regarding training availability may also be annotated in system of record. The 5- or 7-skill level can then be awarded when all other training and core tasks are complete.

9.6. **STS Coding**:

9.6.1. Numbers in Core/Cert^ column indicate skill (5,7 or 9) level core training requirements.

9.6.2. ^ is not used. There is no certification requirement or program.

9.6.3. # with behavior proficiency code in 3-level column indicate wartime tasks.

9.6.4. * Identifies deployment required training.

9.6.5. + Identifies special experience indicator course requirements.

9.6.6. ~ Identifies CBRN training requirements.

9.7. **Qualitative requirements**: Table 1 identifies behavior statement STS coding system.

Behavioral Statement STS Coding System	
Definition	
K	Subject Knowledge Training - The verb selection identifies the individual's ability to identify facts, state principles, analyze or evaluate the subject.
P	Performance Training - Identifies that the individual has performed the task to the satisfaction of the course; however, the individual may not be capable of meeting the field requirements for speed and accuracy.
pk	Performance Knowledge Training - The verb selection identifies the individual's ability to relate simple facts, procedures, operating principles, and operational theory for the task.

SECTION B: OPTIONAL

10.0 This section is reserved.

SECTION C: SUPPORT MATERIAL

11.0 There are currently no support material requirements. This section is reserved.

SECTION D: TRAINING COURSE INDEX

12.0 See the following list of available courses for broadening and expanding career field knowledge. Refer to Education and Training Course Announcements (ETCA) at website https://etca.randolph.af.mil/ for information on all courses listed in this index.

AETC In Resident Courses: Port Hueneme, CA Vehicle Management Training Center (VMTC)

Course Number	Course Name	Location
L9AQN2T331 00AB	Interservice Mechanic Apprentice	VMTC
L9AQN2T331A00AA	Interservice Mechanic Apprentice --Firefighting & Refueling	VMTC
L9AQN2T331C00AA	Interservice Mechanic Apprentice--Material Handling Equipment	VMTC
LCABP2T331 00AB	Mission Generation Vehicular Equipment Maintenance Apprentice	VMTC
LCAZP2T351 00AA	Diesel Engine Maintenance	VMTC
LCAZP2T351 03AA	Chassis Steering and Airbag	VMTC
LCAZP2T351 05AA	Vehicle Powertrain Diagnostics	VMTC
LCAZP2T351 06AA	Vehicle Management Welding	VMTC
LCABP2T331A00AC	Fire Fighting & Refueling Vehicle & Equipment Maintenance	VMTC
LCABP2T331C00AC	Material Handling Equipment (MHE)/463L Maintenance	VMTC
LCAZP2T351A23PC	UHP Rosenbauer P-19 and P-23 Fire Truck Maintenance	VMTC
LCABR2T337 00AA	Fleet Management & Analysis	VMTC
J3AZR2T351A01AA	Refueler Maintenance	Sheppard AFB TX

AETC Mobile Training Team (MTT) Courses:

Course Number	Course Name
L7AZT2T351 00AA	Vehicle Air Conditioning Systems
L7AZT2T351 02AA	Global Deicer Maintenance
L7AZT2T351 03AA	Global Extended Reach Maintenance
L7AZT2T351A09SA	Striker Fire Truck Maintenance
L7AZT2T351A34PA	Rapid Intervention Vehicle (RIV) Fire Truck Maintenance
L7AZT2T351C25KA	FMC Halvorsen 25K Cargo Loader Maintenance
L7AZT2T351C60KB	60K Cargo Loader Maintenance

SECTION E: MAJCOM UNIQUE TRAINING COURSES

13.0 See the following list "AFIMSC Courses" of available courses for broadening and expanding career field knowledge within the specified AFIMSCs. Also, there is another list "Other General Courses" listed below.

AFIMSC Courses: PACAF Technical Training Center (PTTC)

Course Number	Course Title	Location
365PAC2T35X-007	Heating Ventilation and Air Conditioning	PTTC
365PAC2T35X-015	Vehicle Management Supervisor Course	PTTC
365PAC2T35X-017	Powerstroke Diesel Engine	PTTC
365PAC2T35X-018	H-Series Snow Blower Maintenance	PTTC
365PAC2T3X7-020	Fleet Management	PTTC
365PAC2T3X1-022	25K Cargo Loader Maintenance	PTTC
365PAC2T3X1-023	60K Cargo Loader Maintenance	PTTC
365PAC2T3X1-024	JLTV Maintenance	PTTC

AFIMSC Courses: Air Force Transportation Training Center-Europe

Course Number	Course Title	Location
3C5AFE2T35X 003	Automatic Transmissions Course	AFTTC-E
3C5AFE2T35X 006	Automotive Electrical System PRC	AFTTC-E
3C5AFE2T35X 007	Automotive Air Conditioning	AFTTC-E
3C5AFE2T35X 008	Diesel Engine Fuel Systems	AFTTC-E
3C5AFE2T35X 010	Vehicle Manager	AFTTC-E
3C5AFE2T35X 011	Automotive Diagnostics	AFTTC-E

Identify and inspect heater systems and components	1								-	P	-	-	-
Identify and inspect pneumatic systems and components	1								-	P#	-	-	-
Identify and inspect dispensing systems and components	1								-	P	-	-	-
Identify and inspect regenerative air systems and components	1								-	-	-	-	-
1.2.2. MAINTENANCE ACTIONS INTERMEDIATE **Required Behaviors:** 1) Performs common vehicle and equipment inspections in accordance with Vehicle Management Enterprise regulations. 2) Performs assigned maintenance on vehicle systems and subsystems in accordance with technical guidance. 3) Uses specialized tools and equipment items to accomplish maintenance tasks. **Criteria:** *(Consistency of Application: Sustained application of competency over time in a variety of situations)*													
General Vehicle Maintenance Responsibilities													
Perform Specialized Vehicle Inspections (e.g., Special, LTI, Summer Rebuild, Accidents, Abuses)	1	5							-	-	P	-	-
Prepare vehicle for storage and/or shipment	2	5							-	-	pk	-	-
Winterize vehicles	2	5							-	-	-	-	-
Body, Paint and Restraint Systems													
Inspect Frames for damage	1								-	-	pk	-	-
Perform Spot Corrosion Control	2	5							-	-	-	-	-
Repair and install body components	2	5							-	-	-	-	-
Electrical and Electronic Control Systems													
Repair and install lighting systems and components	1	5							-	-	-	-	-
Adjust headlights	2	5							-	-	pk	-	-
Repair and install instrumentation, wiper, horn systems and components.	2	5							-	-	-	-	-
Repair and install starting and charging system components	2	5							-	P#	-	-	-
Maintain, replace and/or restore computer control systems and functions	2	5							-	-	-	-	-
Gas and Diesel Engines	3												
Repair and install exhaust systems and components.	1	5							-	-	-	-	-
Repair and install external engine components. (e.g., mounts, manifold, dampers, flex plates etc.)	2	5							-	-	-	-	-
Repair and install internal engine components. (e.g., pumps, injectors, valves etc.)	2	5							-	-	-	-	-
Repair and install ignition system components	2	5							-	-	-	-	-
Repair and install fuel system components	2	5							-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Repair and install air system components	2	5							-	-	-	-	-
Repair and install emission system components	2	5							-	-	-	-	-
Verify and/or adjust engine timing (e.g., mechanical, electronic, fuel)	3	5							-	-	-	-	-
Cooling System													
Repair and install cooling system components (e.g., radiator, water pump, seals, fans, etc.)	3	5							-	-	-	-	-
Drivetrain and Axles													
Inspect, replace and/or align powertrain mounts	2	5							-	-	-	-	-
Repair transmission leaks (e.g., automatic, manual, CVT)	2								-	-	-	-	-
Remove and reinstall transmissions and/or transaxles.	2	5							-	-	-	-	-
Service transmissions and/or transaxles (e.g., flush, fill, filter change)	2	5							-	-	-	-	-
Check, adjust, and/or bleed clutch hydraulic system	2	5							-	-	-	-	-
Remove and reinstall transfer cases	2	5							-	-	-	-	-
Inspect, measure, repair and/or replace differentials and drive axle components (e.g., flanges, shift controls etc.)	3	5							-	-	-	-	-
Steering and Suspension													
Repair and install power steering system components	2	5							-	-	-	-	-
Repair and install steering system components	2	5							-	-	-	-	-
Repair and install suspension components	2	5							-	-	-	-	-
Preform a wheel alignment	2	5							-	-	-	-	-
Describe the function of electronically controlled suspension and steering systems and components, (i.e., active suspension and stability)	2								-	-	-	-	-
Identify indirect and direct tire pressure monitoring systems (TPMS) calibrate/relearn system; verify operation of instrument panel lamps.	2	5							-	-	-	-	-
Repair tire following tire manufacturer approved procedure.	3	5							-	-	-	-	-
Hydraulic and Air Brakes													
repair and install brake system components	1	5							-	-	-	-	-
repair and install parking brake system components	2	5							-	-	-	-	-
Bleed the electronic brake control system hydraulic circuits.	2	5							-	-	-	-	-
HVAC										-	-	-	-
Repair and install HVAC control systems and components	2	5							-	-	-	-	-
Specialty Vehicle Subsystems													
Inspect, adjust, and/or repair hydraulic systems and components	2	5							-	-	-	-	-
Inspect, adjust, and/or repair heater systems and components	2	5							-	-	-	-	-
Inspect, adjust, and/or repair pneumatic systems and components	2	5							-	-	-	-	-
Inspect, adjust, and/or repair dispensing systems and components	2	5							-	-	-	-	-
Inspect, adjust, and/or repair regenerative air systems and components	2	5							-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
1.2.3. MAINTENANCE ACTIONS ADVANCED **Required Behaviors:** 1) Identifies trends and recommends corrective actions to improve maintenance practices. 2) Prioritizes maintenance needs and production schedule to meet mission requirements. 3) Repairs vehicle systems and subsystems with limited resources (e.g., fabrication, field expedient repairs, triage maintenance, etc.) **Criteria:** *(Consistency of Application: Sustained application of competency over time in complex situations)*													
General Vehicle Maintenance Responsibilities													
Perform Quality Assurance inspections	1	5							-	-	-	P	-
Assign Maintenance based on priority levels	2	7							-	-	-	-	-
Coordinate maintenance with other work centers	2	7							-	-	-	-	-
Manufacturer components using CNC/special equipment	3								-	-	-	-	-
Body, Paint and Restraint Systems													
Battle Damage Assessment and Triage Maintenance	2	7	~						-	-	-	pk	-
Perform Complete Corrosion Control (e.g., blend, single stage, 2 stage)	3	7							-	-	-	-	-
Modify/fabricate body components (e.g., dents/shrink metal)	3								-	-	-	-	-
Repair frame damage	3								-	-	-	-	-
Cut/Fit and Repair Glass	3	5							-	-	-	-	-
Electrical and Electronic Control Systems													
Fabricate/modify wiring harness	3	5							-	-	-	-	-
Gas and Diesel Engines													
Remove and reinstall engine on a newer vehicle equipped with OBD	3	7							-	-	-	-	-
Rebuild gas and diesel engines	3	7							-	-	-	-	-
Machine engine components	3								-	-	-	-	-
Drivetrain and Axles													
Rebuild transmissions	3	7							-	-	-	-	-
Rebuild transaxles	3	7							-	-	-	-	-
Rebuild differentials and axles	3	7							-	-	-	-	-
Rebuild transferases	3	7							-	-	-	-	-
Hydraulic and Air Brakes													
Resurface brake components	3	5							-	-	-	-	-

1.2.4. MAINTENANCE ACTIONS EXPERT **Required Behaviors:** 1) Leads teams in adverse conditions to accomplish maintenance tasks in support of mission accomplishment. 2) Guides operations and streamlines use of available resources for maintenance activities 3) Coordinates with industry for innovative ways to improve operations and implement change to current processes. **Criteria:** *(Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency)*													
General Vehicle Maintenance Responsibilities													
Coordinate work with other bases	1	9							-	-	-	-	-
Identify resource factors	2	9							-	-	-	-	-
Joins strategic level discussions/working groups to update functional operations	3	9							-	-	-	-	-
1.3. TROUBLESHOOTING Description: A systematic approach of solving an issue(s) by diagnosing a fault in various systems and subsystems **Supporting Competencies:**													
1.3.1. TROUBLESHOOTING BASIC **Required Behaviors:** 1) Identifies system and subsystem components and functions of fleet assets. 2) Identifies proper test equipment needed to troubleshoot systems. 3) Performs applicable function checks on vehicle systems and subsystems. **Criteria:** *(Consistency of Application: Sustained application of competency over time)*													
Research vehicle service information	2	5							-	P	-	-	-
Identify, describe, demonstrate proper use of diagnostic tools	2	5							P#	-	-	-	-
Body, paint, restraint systems													
Identify supplemental restraint systems and components	1	5							-	K	-	-	-
Electrical and Electronic Control Systems													
Fundamentals of electrical and electronic principles	1								K	-	-	-	-
Fundamentals of electrical wiring repair	1								-	K	-	-	-
Fundamentals of computer control systems and components	1								K	-	-	-	-

Diagnose regenerative air systems and malfunctions; determine needed action	3	5							-	-	P	-	-
1.3.3. TROUBLESHOOTING ADVANCED Required Behaviors: 1) Utilizes schematics and wiring diagrams to diagnose uncommon issues. 2) Consults with community experts or industry partners to resolve rare anomalies. 3) Employs technical ability to utilize theory of operations, methods, and procedures to isolate and repair complex system or subsystem failures. Criteria: *(Consistency of Application: Sustained application of competency over time in complex situations)*													
General Vehicle Maintenance responsibilities													

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Identify missing/incorrect/outdated information in schematics/Technical Orders	1								-	-	-	-	-
Locate and utilize SharePoint and software programs to consult with peers	2	5							-	-	-	-	-
Establish lines of communication with peers, civilian counterparts, manufactures and technical experts	2	5							-	-	-	-	-
Deliver accurate diagnosis with limited resources	3	5							-	-	-	-	-
Apply theories and techniques across multiple systems to isolate malfunctions	3	5							-	-	-	-	-
Utilize advanced diagnostic equipment (e.g., oscilloscopes, radar, and radio adjustment)	3	5							-	-	-	-	-
1.3.4. TROUBLESHOOTING EXPERT **Required Behaviors:** 1) Advises others and leads teams on advanced troubleshooting techniques. 2) Solves rare anomalies and recommends appropriate revisions to diagnostic strategies. 3) Confirms functionalities of innovative technologies to expedite troubleshooting procedures. **Criteria:** *(Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency)*													
Teach/mentor others on advanced diagnostic techniques	1	7							-	-	-	-	-
Convey complex issues with clear and proper nomenclature to the command level	1	9							-	-	-	-	-
Joins enterprise level discussions/working groups to update diagnostic training procedures and capabilities	1	9							-	-	-	-	-
Identify diagnosis and seamless integrate previous findings into a correct diagnosis on existing issues and limitations of current diagnostic	1	9							-	-	-	-	-
Performs complex diagnostics and recommend updates to TOs, and procedures	2	7							-	-	-	-	-
Advises enterprise level leaders of possible fleet wide issues based on diagnostic findings	2	9							-	-	-	-	-
Prepares technical data for TCTOs and other fleet wide revisions	2	7							-	-	-	-	-
Identifies faulty/mis-manufactured/missing or otherwise substandard manufacture of OEM part failures	2	7							-	-	-	-	-
Attends industry events/conferences/ enterprise level conferences i.e. VTAG/VMAG to discuss future diagnostic strategies and emerging	3	9							-	-	-	-	-
Performs research/BETA tests and equips shops with innovative technology and diagnostic equipment	3	9							-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
1.4. MAINTENANCE DOCUMENTATION **Description:** Documenting, tracking, and correcting maintenance actions **Supporting Competencies:**													
1.4.1. MAINTENANCE DOCUMENTATION BASIC **Required Behaviors:** 1) Documents assigned maintenance tasks according to local and Air Force guidance. 2) Navigates Fleet Management Information Systems to capture clean maintenance data. **Criteria:** (*Reach of Influence-Individual)*													
Identify local guidance for processing workorders	1	5							-	-	-	-	-
Be able to navigate AFVM Neighborhood SharePoint (https://usaf.dps.mil/sites/AFVehicleFleetMgt)	1								-	-	-	-	-
Identify and understand language used on Air Force Vehicle Management Forms	1								-	-	-	-	-
Navigate E-Pubs and locate Vehicle Management forms	1								-	-	-	-	-
Use of correct DPAS codes/language on forms for accuracy in documentation	1								-	-	-	-	-
Identify information needed and the service requested on a repair order	1								-	-	-	-	-
Review vehicle service history	1								-	-	-	-	-
Locate DPAS M and U Guidebook	2								-	-	-	-	-
Locate DPAS Warehouse Guidebook	2								-	-	-	-	-
Locate Air Force Vehicle Management Bookshelf for easy access to all VM resources	2								-	-	-	-	-
1.4.2. MAINTENANCE DOCUMENTATION INTERMEDIATE **Required Behaviors:** 1) Oversees and provides guidance for basic documentation. 2) Performs quality verification on completed documentation actions. 3) Corrects discrepancies to ensure maintenance data integrity. **Criteria:** *(Reach of Influence-Section)*													
Instruct others on how to properly fill out forms	1	5							-	-	-	-	-
Engage with customers or original maintenance requests to ensure all needed maintained has been resolved	1	5							-	-	-	-	-
Validate fleet management practices and requirements	1	7							-	-	-	-	-
Ensure proper use of Air Force Vehicle Management forms	2	5							-	-	-	-	-
Compare all maintenance actions/ parts information to line items on vehicle management forms	2								-	-	-	-	-
Ensure proper use of Air Force Vehicle Management forms	2	5							-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Compare all maintenance actions/ parts information to line items on vehicle management forms	2	7							-	-	-	-	-
Correct any missing information from forms	3	7							-	-	-	-	-
1.4.3. MAINTENANCE DOCUMENTATION ADVANCED **Required Behaviors:** 1) - Performs documentation reviews, validates recommendations, and initiates applicable changes -2) Analyzes common trends to remediate operational redundancies. **Criteria:** *(Reach of Influence-Flight)*													
Review all documents to ensure mission requirements have been properly annotated	1	7							-	-	-	-	-
Validate any recommendation for changes in current documentation processes	1	7							-	-	-	-	-
Initiate plan of action to change future documentation processes	1	9							-	-	-	-	-
Validate fleet management practices and requirements	1	7							-	-	-	-	-
Identify common errors to elevate future documentation errors	2	7							-	-	-	-	-
Look for common trends amongst maintenance action to mitigate further downtime	2	7							-	-	-	-	-
1.4.4. MAINTENANCE DOCUMENTATION EXPERT **Required Behaviors:** 1) Creates local guidance and disseminates information to ensure awareness of changes. 2) Reviews and validates documentation and compares results with other units to resolve shared discrepancies. **Criteria:** *(Reach of Influence-Squadron)*													
Establish local guidance to ensure documentation meets mission requirements	1	9							-	-	-	-	-
Disseminate trainings and guides on how to properly maintain and annotate maintained actions	1	9							-	-	-	-	-
Advise VSCOS on possible changes to improve Vehicle Management documentation systems and forms	1	9							-	-	-	-	-
Advise personnel of updates to current policies, instructions, forms, etc.	1	9							-	-	-	-	-
Research and review current processes against other units to improve maintenance workflow	2	9							-	-	-	-	-
Gather and analyze common trends to improve documentation standards.	2	9							-	-	-	-	-
Utilize trend analysis to improve programs and inform decision-making process	2	9							-	-	-	-	-
Review and amend existing policy, procedures, and instruction to support future mission requirements	2	9							-	-	-	-	-
2.ORGANIZATIONAL MANAGEMENT													

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
2.1. READINESS **Description:** Training, preparing, and equipping personnel to mobilize resources for full spectrum military operations **Supporting Competencies:**													
2.1.1. READINESS BASIC **Required Behaviors:** 1) Prepares equipment for mobilization within an assigned tasking while meeting established timelines. 2) Maintains world-wide deployable status by maintaining readiness in all aspects to meet mission requirements. 3) Establishes personal contingency plan for both short- and long-term absences that ensures family and individual readiness. **Criteria:** (*Reach of Influence-Individual)*													
Prepare equipment for use IAW applicable guidance	1	5							-	-	-	-	-
Prepare equipment for shipment IAW applicable guidance	1	5							-	-	-	-	-
Prepare equipment for storage IAW applicable guidance	1	5							-	-	-	-	-
Describe components of the equipment mobilization process	2	7							-	-	-	-	-
Complete all required AF readiness items (e.g., CBTs, IMR, etc.)	2								-	-	-	-	-
Recognize components of personnel readiness (finance, legal, medical, etc.)	3								-	-	-	-	-
Identify and utilize local supporting agencies associated with readiness as required	3								-	-	-	-	-
2.1.2. READINESS INTERMEDIATE **Required Behaviors:** 1) Executes equipment mobilization process by ensuring all requirements are met. 2) Ensures personnel are equipped with deployment supplies to support mission requirements. 3) Utilizes all required information systems to meet all tasking requirements. 4) Provides equipment status to ensure accurate readiness reporting (i.e., LOGMOD, DRRS) **Criteria:** *(Reach of Influence-Unit/Groups)*													
Identify mobility prep team	1								-	-	-	-	-
Locate and interpret Air Transportability Test Loading Agency (ATTLA) requirements	1								-	-	-	-	-
Draft HAZDEC and applicable documentation	1								-	-	-	-	-
Coordinate with outside agencies for schedule of events	2								-	-	-	-	-
Identify the timelines specified within the deployment order	2								-	-	-	-	-
Equip team with necessary resources (e.g., tape, dunnage, chains, straps, scales, etc.)	2								-	-	-	-	-
Interpret reporting instructions to ensure member's requirements are fulfilled	2								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Collect data from systems of records regarding mission requirements to accomplish readiness reporting (i.e., LOGMOD, AEF Online)	3								-	-	-	-	-
Communicate equipment status to unit leadership for potential readiness impacts	4								-	-	-	-	-
2.1.3 READINESS ADVANCED **Required Behaviors:** 1) Manages equipment and personnel mobilization process to ensure all tasking requirements are met while maintaining home station capabilities. 2) Scrutinizes unit personnel readiness requirements and identifies all deployers who can fulfill tasking needs. 3) Interprets and executes strategic direction from leadership to make informed decisions. **Criteria:** *(Reach of Influence-Wing/Institutional)*													
Interpret UTC requirements and align resources	1	7							-	-	-	-	-
Provide inputs for UTC requirements	1	7							-	-	-	-	-
Monitor unit readiness of personnel (Planning)	1	7							-	-	-	-	-
Identify qualified personnel for mobilization (Execution)	1	7							-	-	-	-	-
Monitor team's abilities and highlight any deficiencies	2	7							-	-	-	-	-
Mitigate home station mission support shortfalls due to mobility requirements	2	7							-	-	-	-	-
Monitor appropriate use of B-coded assets	2	7							-	-	-	-	-
Monitor training requirements and line remarks as per reporting instructions	2	7							-	-	-	-	-
Utilize Major Graded Areas (MGAs) to optimize strategic alignment and create plans and goals	3	7							-	-	-	-	-
Provide feedback to establish proper posturing	3	7							-	-	-	-	-
2.1.4. READINESS EXPERT **Required Behaviors:** 1) Identifies mission requirements and commits resources for world- wide mobilization based on analysis of unit readiness reporting. 2) Plans and establishes UTC requirements based on current and future mission requirements. 3) Coordinates UTC requirements across separate MAJCOMs **Criteria:** *(Reach of Influence-MAJCOM/AF-Level/Industry)*													
Assess unit readiness to determine units that can meet taskings	1								-	-	-	-	-
Coordinate within MAJCOM to task appropriate unit	1								-	-	-	-	-
Review and coordinate on RECLAMAs	1								-	-	-	-	-
Directs pilot unit to develop UTC requirements	2								-	-	-	-	-
Identify relationships between pilot units and non-pilot units	2								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Perform UTC reviews	3								-	-	-	-	-
2.2. TRAINING **Description:** Events or activities presented in a structured manner for the attainment of the knowledge, skills, and abilities required to meet job performance and mission requirements **Supporting Competencies:**													
2.2.1. TRAINING BASIC **Required Behaviors:** 1) Applies and utilizes training resources to increase development of vehicle management competencies. 2) Reviews personal training records to achieve training milestones. **Criteria:** *(Reach of Influence: Individual)*													
Locate and utilize publications through ETIMS/commercial manual/online resources	1								-	-	-	-	-
Identify and explain purpose of 2T3 Career Field Education Training Plan (CFETP)	2	5							-	-	-	-	-
Identify personal training record and documentation to achieve training milestones	2	5							-	-	-	-	-
Identify specific upgrade training responsibilities (e.g., MyTraining, ITR, etc.)	2	5							-	-	-	-	-
2.2.2. TRAINING INTERMEDIATE **Required Behaviors:** 1) Provides hands-on training to accomplish vehicle management tasks. 2) Analyzes performance gaps and seeks additional training to develop Mission Ready Airmen 3) Establishes and documents work center training requirements to achieve short- and long-term mission objectives. **Criteria:** *(Reach of Influence: Unit/Group)*													
Conducts practical instruction to complete vehicle management objectives	1	5							-	-	-	-	-
Research, create, and perform training event opportunities (e.g., courses, seminars, brown bags, etc.)	1	5							-	-	-	-	-
Identify developmental deficits and establish plan to meet mission requirements	2	7							-	-	-	-	-
Evaluate and utilize trainee feedback to determine task proficiency/understanding	2	5							-	-	-	-	-
Developed short- and long-term individual training plans	3	7							-	-	-	-	-
Identify and document completed trainee task	3	5							-	-	-	-	-
Evaluate training reports and CFETP to ensure Airmen are meeting timelines	3	7							-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
2.2.3. TRAINING ADVANCED **Required Behaviors:** 1) Advocates and acquires training resources to ensure Airmen have sufficient knowledge and skills to execute the mission. 2) Collaborates across the organization to identify trends and resolve education and training shortfalls. 3) Tracks upgrade and proficiency training requirements and reports progress to senior leaders **Criteria:** *(Reach of Influence: Wing/Institutional)*													
Review annual MRT/advanced training opportunities	1								-	-	-	-	-
Collaborate with snr leadership to select best suited personnel for advanced training opportunities	1								-	-	-	-	-
Develop/research in house training opportunities	1	7							-	-	-	-	-
Communicate training deficiencies/shortfall trends to Major Command Functional Managers (MFMs)	2								-	-	-	-	-
Review flight training records to verify accurate data input	2	7							-	-	-	-	-
Generate monthly training status for senior leadership review	3								-	-	-	-	-
Communicate with lower-level trainers/supervisors to ensure training completion timelines	3	7							-	-	-	-	-
Develop and disseminate best practices to enhance training efficiencies	3								-	-	-	-	-
2.2.4. TRAINING EXPERT **Required Behaviors:** 1) Analyzes training shortfalls and ensures career field personnel are ready to meet strategic objectives. 2)Develops and implements training strategy to align mission with strategic guidance. 3) Validates training requirements to establish enlisted developmental criteria and formal training requirements and opportunities. **Criteria:** *(Reach of Influence: MAJCOM/AF-Level/Industry)*													
Interprets data to determine training effectiveness for strategic objectives (e.g., QA database, MICT, Commanders Self-Assessment, IGEMS)	1								-	-	-	-	-
Analyzes enterprise training shortcomings and creates /shares optimal techniques to improve overall effectiveness	1								-	-	-	-	-
Identify advances in technology to develop applicable training to meet new mission requirements	2								-	-	-	-	-
Collaborate with the automotive industry on innovative training techniques to assess/optimize current Air Force standards	2								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Interprets strategic objectives to incorporate into the design of a training program	2								-	-	-	-	-
Outlines 2T3 training requirements ensuring current training practices are up to date in industry standards	3								-	-	-	-	-
2.3. LEADERSHIP **Description:** The art and science of leading, mentoring, coaching and directing personnel in the accomplishment of mission objectives **Supporting Competencies:**													
2.3.1. LEADERSHIP BASIC **Required Behaviors:** 1) Takes ownership of primary duties in support of mission accomplishment 2) Maintains individual accountability and encourages peer accountability to successfully execute all duties, instructions, and responsibilities. 3) Contributes to a professional climate and culture by supporting leaders' decisions. 4) Proactively seeks feedback for self-improvement. **Criteria:** (*Reach of Influence-Individual)*													
Develop functional area knowledge to accomplish the mission	1								-	-	-	-	-
Apply Airmen skillset as outlined in the enlisted force structure	1								-	-	-	-	-
Builds network and partnerships to improve team effectiveness	2								-	-	-	-	-
Analyze and demonstrate the Profession of Arms	2								-	-	-	-	-
Utilize Air Force resources to maximize personal and peer readiness	2								-	-	-	-	-
Leverage peer to peer opportunities to cross talk and share information	2								-	-	-	-	-
Utilize career field progression tool for personal and peer development	2								-	-	-	-	-
Identify leadership and followership responsibilities	2								-	-	-	-	-
Compare and contrast total force integration roles	3								-	-	-	-	-
Provides direction, guidance, and clarity on leadership responsibilities	3								-	-	-	-	-
Willingly supports leadership decisions and direction	3								-	-	-	-	-
Utilize all forms of feedback to enhance professional and personal skill sets	4								-	-	-	-	-
2.3.2. LEADERSHIP INTERMEDIATE **Required Behaviors:** 1) Develops a professional climate by supporting leading, and coaching personnel. 2) Leads personnel by providing appropriate feedback, training, and opportunities for professional development. 3) Encourages and facilitates a healthy climate to foster followership. **Criteria:** *(Reach of Influence-Unit/Group)*													
Foster buy-in by communicating leadership vision and intent	1								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Identify and resolves issues within the work center	1								-	-	-	-	-
Professionally up channel issues outside the sphere of influence	1								-	-	-	-	-
Incorporate leadership vision into tasks, assignments, and execution	1								-	-	-	-	-
Proactively engage with team members to foster professional relationships	2								-	-	-	-	-
Takes multiple perspectives into account and evaluates feasibility and risks	2								-	-	-	-	-
Advocate for personnel development opportunities (e.g., exercise opportunities, education, deployments)	2								-	-	-	-	-
Incorporate morale events for networking and team opportunities	3								-	-	-	-	-
Actively pursues wellness checks on team members	3								-	-	-	-	-
Actively partakes in Comprehensive Airmen Fitness (CAF)	3								-	-	-	-	-
Promotes work center where members are empowered to communicate interpersonal issues	3								-	-	-	-	-
2.3.3 LEADERSHIP ADVANCED **Required Behaviors:** 1) Navigates ambiguous situations to find and implement constructive solutions to organizational problems. 2) Creates effective teams that contribute to a professional climate and culture. 3) Leverages personal experience and knowledge to effectively accomplish and advance the mission by fostering enduring team readiness for wartime actions and decisions. **Criteria:** *(Reach of Influence-Wing/Institutional)*													
Apply stress management techniques when confronted in challenging situations	1								-	-	-	-	-
Apply adaptive critical thinking skills to develop courses of action	1								-	-	-	-	-
Develop policy to support future mission and vision requirements	1								-	-	-	-	-
Make and support difficult or unpopular decisions	1								-	-	-	-	-
Apply process improvement concepts to drive innovation	1								-	-	-	-	-
Forecast impending changes and appropriately prepares team	2								-	-	-	-	-
Communicate rationale behind strategic decision making	2								-	-	-	-	-
Mentor team members to remain objectively focused when critical decisions have been made	2								-	-	-	-	-
Consider alternative courses of action based on prior experience	3								-	-	-	-	-
Evaluate personal and professional skills and abilities when assigning projects/tasks and creating teams	3								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
2.3.4. LEADERSHIP EXPERT **Required Behaviors:** 1) Articulates vision to posture the force for future mission success. 2) Promotes a culture of innovation across the enterprise. **Criteria:** *(Reach of Influence-MAJCOM-l/Eval)*													
Leverage current capabilities towards non-traditional career broadening	1								-	-	-	-	-
Assess and advises on educational and developmental products relevant to career broadening	1								-	-	-	-	-
Develop and distribute best practices to enhance work center efficiencies and personnel development	1								-				
Explore DSD options to enhance future career positions	1								-				
2.4. PERSONNEL MANAGEMENT **Description:** Developing personnel through a deliberate, career-long process of appraisals, feedback, high performance recognition, career- broadening, and enhancing opportunities **Supporting Competencies:**													
2.4.1. PERSONNEL MANAGEMENT BASIC **Required Behaviors:** 1) Sets expectations in-line with commander's intent and enforces accountability. 2) Utilizes evaluation systems to accomplish appraisals and performance feedbacks for personnel development. 3) Identifies and recommends candidates deserving of personal recognition to award superior performance. **Criteria:** *(Impact on: Specific workplace tasks)*													
Provides constructive feedback and expectations to supervisors	1								-	-	-	-	-
Makes decisions at lowest level and elevates issues through appropriate chain of command	1								-	-	-	-	-
Maintains personal readiness IAW with applicable directives	1								-	-	-	-	-
Describes purposes of feedback and evaluation forms	2								-	-	-	-	-
Identifies components of feedback and evaluations forms	2								-	-	-	-	-
Explains the purpose of the 2T3 CFETP	2								-	-	-	-	-
Explains the components of the 2T human capital strategic path	2								-	-	-	-	-
Recognizes components of personal deployment readiness (e.g., finances, legal, etc.)	2								-	-	-	-	-
Seeks constructive feedback and expectations from subordinates	2								-	-	-	-	-
Creates goals to adjust actions based on feedback suggestions/directions from subordinates, peers, and superiors	2								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Receives feedback/counseling and makes appropriate corrections to behavior	2								-	-	-	-	-
Conducts mentoring sessions	2								-	-	-	-	-
Describes current awards and recognition guidance	3								-	-	-	-	-
Seeks additional personal and professional developmental opportunities (e.g., professional organizations, education, and training)	3								-	-	-	-	-
Describe leadership and followership principles and theories	3								-	-	-	-	-
2.4.2. PERSONNEL MANAGEMENT INTERMEDIATE **Required Behaviors:** 1) Selects team composition to execute mission requirements and advance professional development (e.g., shift breakdown, leave, TDYs, and duty limitations) 2) Identifies eligible personnel for special and additional duty positions. 3) Proactively mitigates personnel operational concerns (e.g., qualification shortfalls, coverages, and staffing imbalances) 4) Proactively mitigates personal readiness concerns (e.g., medical, financial, good order and conduct, quality of life issues) **Criteria:** *(Impact on: Specific workplace projects)*													
Evaluates performance of team members	1								-	-	-	-	-
Leads personnel w/in a section; provides the appropriate feedback, internal training & development opportunities for subordinates	1								-	-	-	-	-
Encourages participation in professional organizations (e.g. internal/external)	1								-	-	-	-	-
Monitors team availability and highlights any readiness deficiencies	1								-	-	-	-	-
Coaches/leads others by providing tools needed to meet additional duty/special duty opportunities	2								-	-	-	-	-
Promotes personal and professional developmental opportunities (e.g. professional organizations, education, and training)	2								-	-	-	-	-
Develops supervisory and trainer roles and responsibilities	3								-	-	-	-	-
Evaluates and utilizes customer feedback to determine task proficiency	3								-	-	-	-	-
Seeks inputs and implements measures in support of innovation processes	3								-	-	-	-	-
Explains how to utilize the 2T3 CFETP	3	7							-	-	-	-	-
Monitors work/task proficiency and provides constructive feedback	3								-	-	-	-	-
Provides training to develop professional writing capabilities	3								-	-	-	-	-
Manages readiness of personnel to meet requirements	4								-	-	-	-	-
Incorporates morale shop events for networking and team opportunities (e.g., MWR, A&FRC)	4								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Conducts feedbacks and evaluations	4								-	-	-	-	-
2.4.3. PERSONNEL MANAGEMENT ADVANCED **Required Behaviors:** 1) Utilizes UMD/UPMR to assign available personnel to fulfill required position numbers. 2) Analyzes assigned positions and communicates readiness concerns to leaders. 3) Determines qualifications and selects individuals for civilian job vacancies. **Criteria:** *(Impact on: Management decisions)*													
Mentors and prepares supervisors to effectively lead and develop teams	1								-	-	-	-	-
Employs ready personnel to meet requirements	1								-	-	-	-	-
Identifies, advocates, and positions members for operational and professional growth opportunities	1								-	-	-	-	-
Educates shop/flight on the application of the logistics planners' human capital strategic path	1								-	-	-	-	-
Identifies concerns on human capital strategic pathways	2								-	-	-	-	-
Advocates for resources for personnel development	2								-	-	-	-	-
Provides personnel options to leadership in response to taskings (e.g. exercises, deployments, site surveys etc.)	2								-	-	-	-	-
Aligns personnel requirements into duty positions	3								-	-	-	-	-
Identifies personal and professional skills and abilities when assigning projects/tasks and creating teams	3								-	-	-	-	-
Identifies and explains the AF Enlisted Classification Directory	3								-	-	-	-	-
2.4.4. PERSONNEL MANAGEMENT EXPERT **Required Behaviors:** 1) Determines proper authorizations, assignments, priorities, and projections to meet mission requirements. 2) Engages with AFPC to address personnel and operational issues (e.g., humanitarian, assignment allocations, and Equal Plus advertisements) 3) Deliberately manages talent across the enterprise to support mission objectives. **Criteria:** *(Impact on: AF-level practices/within industry)*													
Advocates for members to attend non-traditional career broadening	1								-	-	-	-	-
Advocates for personnel developmental opportunities (e.g., exercises, deployments, site surveys)	1								-	-	-	-	-
Creates strategic goals across manpower enterprise to meet mission objectives	1								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Outlines training education and experience requirements for the most critical duty positions	2								-	-	-	-	-
Provides recommendations for best qualified SNCOs into key leadership and developmental positions at all levels	2								-	-	-	-	-
Creates opportunities for logistics Airmen to participate in experiential training courses IOT foster Mission Ready Airmen strategy	3								-	-	-	-	-
Vectors personnel for career broadening opportunities	3								-	-	-	-	-
Research and/or creates training event opportunities (e.g., courses, seminars)	3								-	-	-	-	-
Identifies innovative training technologies to inspire training across the enterprise. (e.g., virtual, online training courses, etc.)	3								-	-	-	-	-
Develops and/or disseminates best practices to enhance enterprise efficiencies	3								-	-	-	-	-
3. RESOURCE MANAGEMENT													
3.1. RESOURCE MANAGEMENT **Description:** The practice of planning, scheduling, and allocating manpower, funding, and assets to a project or program to achieve mission objectives. **Supporting Competencies:**													
1.1.1. RESOURCE MANAGEMENT BASIC **Required Behaviors:** 1) Identifies materials, equipment, and assets needed to execute mission requirements. 2) Utilizes resources appropriately by adhering to applicable rules and regulations. **Criteria:** (*Reach of Influence-Individual)*													
Develops work schedules to utilize manpower	1	7							-	-	-	-	-
Conducts inventories and inspections on assigned work center assets	1	5							-	-	-	-	-
Identifies work center resource deficiencies that hinder task accomplishment	1								-	-	-	-	-
Identifies specific manpower, materials, and equipment needed to execute tasks	1	7							-	-	-	-	-
Identifies and reviews applicable tech data for tools and equipment before utilization	2	5							-	-	-	-	-
Utilizes resources appropriately by adhering to pre-established standards	2								-	-	-	-	-
3.1.2.RESOURCE MANAGEMENT INTERMEDIATE **Required Behaviors:** 1) Prepares and analyzes resource utilization to justify future requirements. 2) Collaborates with unit resource advisor to secure funding for maintenance operations. 3) Executes approval authority for work center utilization and distribution. **Criteria:** *(Reach of Influence-Unit/Group)*													

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Identifies key components of UMD and UPMR documents	1	9							-	-	-	-	-
Projects for and requests additional support to mitigate personnel shortages	1	9							-	-	-	-	-
Prepares documents to justify requirements	1	9							-	-	-	-	-
Develops and submits unfunded requests to leadership	2	9							-	-	-	-	-
Assigns personnel to work center projects	3	9							-	-	-	-	-
Prioritizes resource allocations to address mission requirements	3	9							-	-	-	-	-
Identifies specific manpower requirements to accomplish projects	3	9							-	-	-	-	-
Manages available equipment, materials, and funding to accomplish projects	3	9							-	-	-	-	-
3.1.3 RESOURCE MANAGEMENT ADVANCED **Required Behaviors:** 1) Analyzes data to posture resources at installation within command authority. 2) Projects future budget requirements in response to recurring needs 3) Identifies and resolves resourcing and funding shortfalls. **Criteria:** *(Reach of Influence-Wing/Institutional)*													
Utilizes UMD and UPMR documents to align work center personnel	1	9							-	-	-	-	-
Projects impacts of personnel movements on the mission	1	9							-	-	-	-	-
Informs leadership of mission impact due to resource shortfalls	1	9							-	-	-	-	-
Receives and interprets budget requirements to facilitate mission execution	1	9							-	-	-	-	-
Forecasts changes on manpower/funding and advocates for resources to accomplish the mission	1	9							-	-	-	-	-
Obligates appropriated funds to facilitate work center projects	2	9							-	-	-	-	-
Projects budgetary requirements for work center personnel to avoid mission degradation (e.g., training, exercises, and conference, etc.)	2	9							-	-	-	-	-
Budgets and procures resources needed for operations	2	9							-	-	-	-	-
Advocates for resources outside of normal POM cycle (e.g., unfunded, fallout, and innovation)	3	9							-	-	-	-	-
Develops mitigation strategies to minimize impact of resource shortfalls	3	9							-	-	-	-	-
Operating in a fiscally constrained environment	3	9							-	-	-	-	-
Identifies and resolves manpower, materials, and funding shortfalls	3	9							-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
3.1.4. RESOURCE MANAGEMENT EXPERT **Required Behaviors:** 1) Reviews and validates budget requirements to advocate for enterprise materials, equipment, and funding. 2) Coordinates with Air Force manpower community to initiate manpower studies to address concerns and shortfalls. **Criteria:** *(Reach of Influence-MAJCOM/AF-Level/Industry)*													
Develops operational needs statement to request unfunded positions into the POM	1								-	-	-	-	-
Reviews and validates budget requirements to administer and advocate materials, equipment, and funding	1								-	-	-	-	-
Programs and develops performance management tools to determine efficient use of resources	1								-	-	-	-	-
Manages career field manning to balance fiscal constraints against mission demands	1								-	-	-	-	-
Coordinates with appropriate agency to continually evaluate manpower standard	2								-	-	-	-	-
Analyzes manning levels and impacts on total force capabilities within AF constraints (e.g., command level promotion rate, and retention rates)	2								-	-	-	-	-
Coordinates manpower studies to determine proper authorizations, assignments, priorities, and projections	2								-	-	-	-	-
4. SUPPORT FUNCTIONS													
4.1. PROGRAM MANAGEMENT Description: The navigation of applicable guidance to achieve all directed program objectives by utilizing time phased milestones and action items to monitor and control program execution **Supporting Competencies:**													
4.1.1. PROGRAM MANAGEMENT BASIC **Required Behaviors:** 1) Tracks, updates, distributes, and documents program inputs and outputs to ensure compliance in support of mission needs. 2) Executes responsibilities and coordinates with key players of programs to ensure effective program management. **Criteria:** *(Scope: Specific Area)*													
Tracks timelines and milestones to meet objectives	1								-	-	-	-	-
Adheres to program standardization process to ensure unit compliance	1								-	-	-	-	-
Identify basic functions of Materiel Control	1	5							-	-	-	-	-
Identifies and explains program management tools and software (e.g., tool accountability programs, CBTs, etc.)	1								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Performs follow up actions based on timeline and milestones	1								-	-	-	-	-
Collects, organizes, and drafts inputs/outputs and projected outcomes for meetings	1								-	-	-	-	-
Creates and manages user roles and accounts within assigned programs	1								-	-	-	-	-
Diagnoses system issues using established checklist/procedures	1								-	-	-	-	-
Manage project scope and distribute approved plans, schedules to meet mission objectives	2								-	-	-	-	-
Establish frequent meetings with stakeholders for effective communication	2								-	-	-	-	-
Conducts inspections and inventories (yard checks) for security, damage, accountability, and reports issues to FM&A	2	5							-	-	-	-	-
Locate Specific Information within maintenance publications in ETIMS	2								-	-	-	-	-
Identifies purpose, roles, and responsibilities for programs within maintenance support i.e., DPAS, OGMVC, Waiver Card, Accident	2								-	-	-	-	-
Identifies purpose, roles, and responsibilities for flight programs i.e. Equipment (CACRL), Facilities, Self-Assessment (MICT), Security,	2								-	-	-	-	-
4.1.2. PROGRAM MANAGEMENT INTERMEDIATE **Required Behaviors:** 1) Evaluates and implements program policy and guidance to ensure alignment with mission requirements. 2) Develops local checklists and guidance to streamline program implementation. ***Criteria:*** *(Scope: Integration with concerned areas)*													
Identify and adhere to support agreements (MOU, MOA)	1	9							-	-	-	-	-
Identify program management tools to standardize utilization	1								-	-	-	-	-
Develops local self-assessment checklist for IGEMS discrepancies	2	9							-	-	-	-	-
Utilizes trend analysis to provide resolution for frequent user errors/issues	2	9							-	-	-	-	-
Develops timelines and milestones to meet objectives	2	7							-	-	-	-	-
Interprets policy and guidance to assist w/ program development standardization	2								-	-	-	-	-
Approves and disseminates inputs/outputs and projected outcomes for meetings	2	9							-	-	-	-	-
Applies knowledge and application of program management methodology and techniques	2								-	-	-	-	-
Consolidates and submits program improvement recommendations to next higher level or appropriate office	2								-	-	-	-	-
Utilizes trend analysis to provide resolution for frequent user errors/issues	2								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
4.1.3. PROGRAM MANAGEMENT ADVANCED **Required Behaviors:** 1) Identifies trends and recommends courses of action to resolve challenges or discrepancies within a program. 2) Establishes objectives and milestones to mitigate program shortfalls. **Criteria:** *(Scope: Integration with organizational strategies)*													
Address identified gaps in cost, time, and scope of program	1								-	-	-	-	-
Identify clear goals to enhance mission accomplishment	1								-	-	-	-	-
Report timely Minimum Essential Level (MEL) shortfalls to VFM/VMS	1	7							-	-	-	-	-
Counsel managers and stakeholders for misuse of tools, shop equipment, accident & abuse, and air quality regulation violations	1								-	-	-	-	-
Analyzes standardized program processes to identify where local deviations are required	1								-	-	-	-	-
Execute program self-assessment to identify shortfalls	1								-	-	-	-	-
Develops local processes to align program with installation requirements and resources	2								-	-	-	-	-
Utilizes trend analysis to identify and improve programs and inform decision -making process	2	9							-	-	-	-	-
Leverages trend analysis to identify and mitigate program deficiency to ensure continual process improvement	2								-	-	-	-	-
4.1.4 PROGRAM MANAGEMENT EXPERT **Required Behaviors:** 1) - Reviews programs and coordinates with agencies to assess impact to mission requirements 2) Develops and disseminates standardized inspection criterion to enable reliable assessments capabilities. 3) Creates and publishes local program guidance and directives to meet organizational needs. **Criteria:** *(Scope: Integration with AF-level/within industry)*													
Coordinate with Vehicle Support Chain Operation Squadron (VSCOS) for vehicle telematics, Commercial Internet Service Provider, Fleet Card program discrepancies	1	7							-	-	-	-	-
Identifies purpose, roles, and responsibilities for programs within maintenance support i.e., Section 8D—Enterprise-Level Vehicle	1								-	-	-	-	-
Explains and disseminates strategic messaging to educate stakeholders to ensure compliance	1								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Analyzes historical trends and future requirements	1								-	-	-	-	-
Develop program milestones and plans of action	1								-	-	-	-	-
Collaborates with cross functional Subject Matter Experts (SMEs) to identify best practices and future projects	2								-	-	-	-	-
Research and advocates for industry technologies applicable to career field programs	2								-	-	-	-	-
Develops assessments to standardize programs	2								-	-	-	-	-
Research and advocates for industry technologies applicable to career field programs	2	7							-	-	-	-	-
Create Vehicle Management Operating Procedures to align organizations with strategic vision	3	7							-	-	-	-	-
4.2. MATERIEL MANAGEMENT Description: Managing inventory through responsible planning and execution of supply chains to meet vehicle management mission requirements **Supporting Competencies:**													
4.2.1. MATERIEL MANAGEMENT BASIC **Required Behaviors:** 1) Facilitates tool issue and return in support of vehicle maintenance activities. 2) Examines tools for serviceability and replaces as necessary. 3) Orders parts using local guidance to obtain resources while following supply chain discipline. **Criteria:** *(Consistency of Application: Sustained application of competency over time)*													
Learn tool accountability program in accordance to Department of Air Force Instruction, Technical Order, and Operating Instructions	1	5							-	-	-	-	-
Determine location of all government owned tools within Vehicle Management	1	5							-	-	-	-	-
Track calibration schedule for tools requiring servicing from the Precision Measurement Equipment Lab (PMEL)	1	5							-	-	-	-	-
Collect individual & combined toolbox kit daily sign-off sheets	1								-	-	-	-	-
Determine serviceability of tools in accordance with Technical Order and Manufacturer Specifications	2	5							-	-	-	-	-
Complete required training to obtain Government Purchase Card (GPC)	3								-	-	-	-	-
Track parts procurement in accordance with GPC rules and regulations	3								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
4.2.2. MATERIEL MANAGEMENT INTERMEDIATE **Required Behaviors:** 1) Oversees tool issue and return processes, inventory quantities, and inspection criteria for accountability. 2) Identifies shortfalls with on-hand resources and takes corrective action to replenish inventories. 3) Manages parts, tool, and equipment annual inventory levels to ensure proper materiel management utilization. 4) Resolves supply chain utilization needs to ensure compliance. **Criteria:** *(Consistency of Application: Sustained application of competency over time in a variety of situations)*													
Instruct and validate tool program compliance in accordance with Department of Air Force Instruction, Technical Order & Operating Instructions	1	5							-	-	-	-	-
Track/Store individual & combined toolbox kit daily sign-off sheets	1								-	-	-	-	-
Ensure tool serviceability standards are maintained	1	5							-	-	-	-	-
Check stock of low & high-cost bench stocks & place request for more as needed	2								-	-	-	-	-
Review residue parts quarterly & ensure parts are properly tagged	2								-	-	-	-	-
Compiled annual inventory levels in accordance with Department of Air Force Instruction & Operating Instructions	3								-	-	-	-	-
Identify methodology in identifying supply chain steps & be able to track location of required items	4								-	-	-	-	-
4.2.3. MATERIEL MANAGEMENT ADVANCED **Required Behaviors:** 1) Evaluates processes and analyzes end-use input for materiel management improvement. 2) Adjusts inventories and authorizations to meet projected mission changes. 3) Develops workplace practices and policies to ensure proper supply chain management. 4) Interprets supply data to provide inputs of allocations and movement of resources. **Criteria:** *(Consistency of Application: Sustained application of competency over time in complex situations)*													
Evaluate requirements for Individual Tool Kit	1								-	-	-	-	-
Evaluate requirements for Consolidated Tool Kit in coordination with section leads	1								-	-	-	-	-
Evaluate tool calibration schedule	1								-	-	-	-	-
Evaluate parts procurement processes for GPC & Supply	1								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Validate low & high-cost bench stock level (including required amount on-hand)	2								-	-	-	-	-
Develop parts procurement process from cradle to grave	3								-	-	-	-	-
Develop parts accountability tracker	3								-	-	-	-	-
Develop process to account for received parts required for in-shop assets	3								-	-	-	-	-
Develop process to account for received deferred parts	3								-	-	-	-	-
Build procurement status board	4								-	-	-	-	-
Develop & update estimated parts arrival	4								-	-	-	-	-
Brief leadership on parts status for critical assets	4								-	-	-	-	-
4.2.4. MATERIEL MANAGEMENT EXPERT **Required Behaviors:** 1) Partners with outside agencies or companies for materiel acquisition to maintain readiness. 2) Collaborates with other bases for equipment requirements to mitigate shortfalls. 3) Advises on workplace supply management practices to ensure policy adherence and optimize work center performance. **Criteria:** *(Consistency of Application: Able to innovate and formulate strategies; able to model/guide/teach others the competency of how to apply the competency)*													
Develop working relationship with Materiel Management Flight leadership	1								-	-	-	-	-
Develop working relationship with Contracting Flight leadership	1								-	-	-	-	-
Develop working relationship with frequently utilized local vendors	1								-	-	-	-	-
Build network with Vehicle Management's Materiel Management section at other installations	2								-	-	-	-	-
Update your installation's contact information on Vehicle Management Neighborhood	2								-	-	-	-	-
Advise Vehicle Management Leadership on fund status	3								-	-	-	-	-
Advise Vehicle Management Leadership on tool procurement	3								-	-	-	-	-
Advise Vehicle Management Leadership on unfunded request/requirements	3								-	-	-	-	-
Advise Vehicle Management Leadership on parts status	3								-	-	-	-	-
4.3. ENVIRONMENTAL Description: The proper acquisition, use, storage, and disposal of hazardous materials in accordance with federal, state, and local policies. **Supporting Competencies:**													

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
4.3.1. ENVIRONMENTAL BASIC **Required Behaviors:** 1) Handles hazardous materials for use on specific tasks and equipment. 2) Ensures disposal of hazardous materials comply with all local, state, and federal regulations. **Criteria:** *(Impact On: Specific Workplace Tasks)*													
Control hazardous material & waste	1	5							-	-	-	-	-
Store and dispose of hazardous waste IAW with local, state and federal guidance	2	5							-	-	-	-	-
4.3.2. ENVIRONMENTAL INTERMEDIATE **Required Behaviors:** 1) Supports inspections with regard to expiration date, proper labeling, container damage, leaks and spills to ensure unnecessary exposures. 2) Manages hazardous material storage to prevent fire and spills in accordance with all regulations. 3) Develops hazardous material inventories and quantities for mission sustainment. 4) Administers training to ensure personnel comply with regulations to mitigate health and environmental mishaps. ***Criteria:*** *(Impact On: Specific Workplace Projects)*													
Manage accumulation point	1	7							-	-	-	-	-
Refueling Special Inspections	1								-	-	-	-	-
Use and maintain refrigerant handling equipment according to equipment manufacturer's standards.	2								-	-	-	-	-
Manage Enterprise Environmental Safety Occupational Health Management Information System (EESOH-MIS) program	3								-	-	-	-	-
Demonstrate compliance with air quality requirements IAW with local, state, and federal regulations.	4								-	-	-	-	-
Implement hazardous communication program controls and procedures	4	7							-	-	-	-	-
4.3.3. ENVIRONMENTAL ADVANCED **Required Behaviors:** 1) Teams with end users to ensure hazardous materials guarantee maximum effectiveness. 2) Compares like hazardous materials to track and establish improvement and efficiency. 3) Monitors training to ensure personnel comply with regulations to mitigate health and environmental mishaps. 4) Partners with outside agencies to coordinate further disposal. **Criteria:** *(Impact On: Management Decisions)*													
Communicate with customers to ensure HAZMAT meets mission requirements	1								-	-	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
Ensure effective HAZMAT tracking is employed to maximize efficient operations	2								-	-	-	-	-
Perform self-inspection to mitigate environmental mishaps	3	7							-	-	-	-	-
Coordinate with appropriate agencies for HAZMAT disposal	4								-	-	-	-	-
4.3.4 ENVIRONMENTAL EXPERT **Required Behaviors:** 1) Audits hazardous material manufacturers for cost-benefit analysis 2) Recommends change requests to higher-level agencies in an effort to improve regulations. 3) Develops and disseminates guidance to ensure personnel comply with regulations to mitigate health and environmental mishaps. **Criteria:** *(Impact On: AF-Level Practices/Within Industry)*													
Evaluate environmental program	1								-	-	-	-	-
Conduct analysis for HAZMAT utilization	1								-	-	-	-	-
Disseminate guidance/policy to deter mishaps across Enterprise	2								-	-	-	-	-
Author and publishes guidance and policy	3								-	-	-	-	-
4.4. SAFETY Description: The assessment, measurement, and mitigation of risk to personnel, vehicles, and equipment. **Supporting Competencies:**													
4.4.1. SAFETY BASIC **Required Behaviors:** 1) Complies with all PPE requirements to ensure safe performance of assigned duties. 2) Adheres to all safety standards to meet occupational safety and applicable guidance. 3) Identifies and reports safety hazards, unsafe conditions, or mishaps to ensure a safe environment. **Criteria:** *(Impact on Specific workplace tasks)*													
Demonstrate proper use of PPE	1								P	-	-	-	-
Locate and interpret Job Safety Training Outline (JSTO)	2	5							-	-	-	-	-
Implement risk management into daily activities	2	5							-	P	-	-	-
Identify equipment serviceability	2	5							-	-	-	-	-
Identify Occupational Safety and Health Administration (OSHA) and applicable guidelines	2	5							-	-	K	-	-
Utilize safe procedures for handling of tools and equipment	2								P	-	-	-	-
Report unsafe working conditions	3	5							-	P	-	-	-

1. Tasks, Knowledge, and Technical References	Behavior Match	Core/Cert ^	Deployment * / SEI + CBRN ~	Tng Start	Tng Complete	Trainee Initials	Trainer Initials	Certifier Initials	3-lvl (I)	3-lvl (U)	5-lvl	7-lvl	9-lvl
4.4.2. SAFETY INTERMEDIATE **Required Behaviors:** 1) Validates personnel are trained on unique safety risks and hazards prior to accomplishing assigned tasks. 2) Initiates and reviews job hazard analysis or mishap reports to identify and mitigate risks. 3) Evaluates work area and enforces occupational safety requirements for risk mitigation. **Criteria:** *(Impact on Specific workplace job safety compliance)*													
Validate personnel have completed safety training	1	7							-	-	-	-	-
Initiate mishap safety reports	2	7							-	-	P	-	-
Enforce safety guidelines and regulations	2	5							-	-	-	-	-
Interpret OSHA applicable guidelines	3	5							-	-	-	-	-
4.4.3. SAFETY ADVANCED **Required Behaviors:** 1) Advises commanders, functional managers, supervisors, and employees on safety matters to safeguard personnel and equipment. 2) Evaluates safety program to ensure compliance. 3) Categorizes trends and elevates findings to higher-level personnel. **Criteria:** *(Impact on Management decisions)*													
Advise leadership and subordinates on safety concerns	1	7							-	-	pk	-	-
Manage safety program	2								-	-	K	-	-
Analyze safety trends	2								-	-	-	-	-
Report trends to appropriate channels	3								-	-	-	-	-
4.4.4. SAFETY EXPERT **Required Behaviors:** 1) Analyzes safety trends and mishaps to develop safety guidelines. 2) Publishes and disseminates guidance to deter safety mishaps across the Vehicle Management enterprise. **Criteria:** *(Impact on AF-level practices/within industry)*													
Analyze safety trends throughout the enterprise Department of Air Force (DAFI)	1								-	-	-	-	-
Disseminate guidance to deter safety mishaps across enterprise Department of Air Force (DAFI)	2								-	-	-	-	-
