DESR6055.09_AFMAN 91-201, *Explosives Safety Standards,* is supplemented as follows: This manual applies to all Regular Air Force, Air Force Reserve, and Air National Guard units that are tenants on Whiteman Air Force Bases. Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using the AF Form 847, *Recommendation for Change of Publication*; route AF Forms 847 from the field through the appropriate functional chain of command. Ensure that all records created as a result of processes prescribed in this publication are maintained IAW Air Force Manual (AFMAN) 33-363, *Management of Records*, and disposed of IAW Air Force Records Information Management System (AFRIMS) Records Disposition Schedule (RDS): **https://www.my.af.mil/gcss-af61a/afrims/afrims/rims.cfm**.

SUMMARY OF CHANGES

(WhitemanAFB) This document has been revised and must be completely reviewed. Changes include the revision explosive operation during lightning within 10 miles. This change clarifies when explosive operation may continue in facilities with an LPS and updates the A-10 “hot gun” location to the new barricade located on the north ramp.

V1.E3.1. **(Whiteman AFB)** All deviation requests will be coordinated through the weapons safety office for review and concurrence prior to commander's approval.

V1.E3.1.7. **(WhitemanAFB)** Include copies of operating instructions that will be used to manage deviations.

V1.E3.2. **(WhitemanAFB)** All waiver requests will be coordinated through the weapons safety office for review and concurrence prior to commander's approval.

V1.E3.3. **(WhitemanAFB)** All exemption requests will be coordinated through the weapons safety office for review and concurrence prior to commander's approval.

V1.E5.2.1.12.1. **(WhitemanAFB)** The base planner is responsible for ensuring the new/revised site location will not affect future projects. The 509 CES/CEPT is responsible for the initial and final mapping of the area required. The 509 BW/SEW is responsible for the final coordination, calculations, and submission of the explosive site plan.

V1.E5.2.1.12.4. **(WhitemanAFB)** All explosive site plan requirements will be initiated by the using organization, routed through the base planning office, 509 CES/CEPT, and then to the 509 BW/SEW.

V1.E3.5.17. **(WhitemanAFB)** Include copies of operating instructions that will be used to manage any waiver or exemption.

V1.E6.14.4. **(WhitemanAFB)** Unit Additional Duty Weapons Safety Representatives (ADWSR) are responsible for monitoring personnel (supervisory and non-supervisory) within their organization who operate, handle, transport, maintain, load, or dispose of missiles or explosives to ensure that they are properly trained and comply with the provisions of this manual.

V1.E6.15.1. **(WhitemanAFB)** Squadron supervision will approve all explosive operations that will not use the buddy system and be conducted by only one person.

V1.E6.25.3. **(WhitemanAFB)** Organizations contracting for fireworks displays are responsible for coordinating the contract, along with diagrams of exact location where the display will be held, with the weapons safety office. Storage of contractor fireworks is not allowed on Whiteman AFB. Fireworks will arrive no sooner than the day of the scheduled display, and all residue and unused items must be removed from the installation immediately following the completion of the fireworks display.

V1.E6.25.7. **(WhitemanAFB)** Organizations contracting fireworks or airshow PYRO displays will complete the contract 60 days prior to the event.

V1.E6.27.2. **(WhitemanAFB)** Documented in memorandum format and provided to the 509th Bomb Wing Weapons Safety (509 BW/SEW) prior to exercise start.

V1.E6.28.1. **(WhitemanAFB)** Approved training sites will be documented in 509 SFS Operating Instruction 31-219 *Military Working Dog MWD (MWD) Program.* These sites will not be deviated from or changed without written coordination with 509 BW/SEW.

V1.E6.42.11. **(WhitemanAFB)** Deviations from established haul routes must be approved by 509 BW/SEW.

V1.E6.42.14. **(WhitemanAFB)** The designated inspection area is Gate 14. Munitions shipments, except authorized commercial mail carriers, will be received at this area for initial inspection and acceptance on base.

V1.E6.42.14.4. **(WhitemanAFB)** The designated "suspect vehicle" site is Calibration Hardstand (Compass Rose). Coordinate with base operations prior to use. Vehicles placed on compass rose will be positioned on the east side of the pad to avoid encroachment into the runway 1,000' clear zones. Seven copies of the DD Form 626, *Motor Vehicle Inspection* will be completed on vehicles with unsatisfactory conditions. The original and five copies will be forwarded to the traffic management office and one copy will be maintained by the inspector.

V1.E6.42.15.1. **(WhitemanAFB)** Outgoing shipments: Sufficient copies of DD Form 626, *Motor Vehicle Inspection* will be completed. The original will be given to the vehicle operator, with one copy retained by the inspector.

V1.E6.42.17. **(WhitemanAFB)** The designated holding yards are the Hot Cargo Pad and Compass Rose. Reference the Site Plan Summary provided by the weapons safety office for maximum Net Explosive Weight authorizations. When munitions are held in any of these yards, personnel will be evacuated to PTR distance when electrical storms are in the area. Munitions should only remain in these locations for the minimum amount of time necessary. Munitions transfer procedures are allowed in the holding yards provided all safety criteria can be met. Coordinate Hot Cargo Pad and Compass Rose requirements with base operations prior to use.

V1.E6.42.27.1. **(WhitemanAFB)** During extremely cold weather, the 509 MUNS commander may omit the use of parking brakes on MHE trailers (MHU-110, and MHU-141), in writing. However, parking brakes will be set and chocked during all loading and unloading operations.

V1.E6.42.27.4.2. **(WhitemanAFB)** Vehicles engines will not be left running for exercise purposes.

V1.E6.42.27.4.3. **(WhitemanAFB)** Vehicles with diesel-powered will not be left running during loading or unloading of explosives.

V1.E10.3.2.3.3. **(WhitemanAFB)** The use of a magnetic back plate, behind the non-combustible material are authorized. These placards will increase the ease with which symbols may be removed during periods when explosives are not present.

V1.E10.3.2.3.4.1. **(WhitemanAFB)** The 509th Maintenance Group Maintenance Operations Center and 442d Maintenance Operations Flight Maintenance Operations Center will be notified, as required, of fire symbol and chemical warning sign changes affecting their respective aircraft parking locations. The applicable MOC will, in-turn notify the fire department and applicable agencies of fire symbol changes. On B-2 hardstands and docks the fire symbols will be posted and notifications made immediately upon the delivery of munitions.

V1.E10.3.2.3.4.2. **(WhitemanAFB)** The 509th Munitions Squadron Munitions Control and 442d Munitions Squadron Munitions Control will be notified, as required, of fire symbol and chemical warning sign changes affecting their respective storage areas. The applicable munitions controls will, in-turn, notify the fire department and appropriate agencies as required. Units with licensed facilities are responsible for notifying the fire department of fire symbol changes.

V1.E10.3.2.3.6.3. **(WhitemanAFB)** Posting of exterior fire symbols is only required on exterior doors to rooms containing AE. All other exterior posting of fire symbols may be omitted.

V1.E10.3.4.7. **(WhitemanAFB)** Designated area is defined as an area that provides a boundary such as a resource protection level boundary.

V1.E10.5.2.3. **(WhitemanAFB)** Fire Department Emergency Communications Center will maintain a copy of T.O. 11N-20-11, *General Fire Fighting Guidance* and know how to use it.

V1.E10.6.6. **(WhitemanAFB)** 509th Munitions Squadron Control function will schedule Weapons Storage Area fire drills with the 509 CES/CEFP (Fire Prevention), 509 SFS/SFMQ (Stan-Eval), 509 MXG, Munitions Quality Assurance inspector and 509 BW/SEW (Weapons Safety). Quality Assurance, with coordination of the fire department, and will create exercise scenarios based on requirements outlined in this manual, as applicable. The 442nd Munitions Squadron Munitions Control will schedule fire drills for the 442d Munitions Squadron Munitions Storage Area and will coordinate with the Fire Chief and 442 FW/SE. Control functions should schedule the day for fire drills to be conducted. Fire drill exercise initiation should be based on scenario timelines. Munitions control will maintain the documentation with corrective actions as required. Corrective actions will be provided to the 509 BW/SEW for review.

V1.E10.6.7. **(WhitemanAFB)** Heat sources for composite curing will not be used on or around explosive loaded aircraft unless specifically authorized by Technical Order 11A-1-33, *Handling and Maintenance of Explosives Loaded Aircraft*.

V1.E10.6.8.2. **(WhitemanAFB)** Vegetation inside the WSA will be maintained at maximum height of 8” for security requirements. Vegetation outside of WSA will be maintained at maximum height of 14” for BASH program requirements. These heights meet the requirements of fire breaks IAW **para V6**E3.6.1.4.15.5.

V1.E10.6.10. **(WhitemanAFB)** 509th Operations Support Squadron Base Operations will develop and coordinate plans for controlled burning of the airfields.

V2.E3.4.11.3. **(WhitemanAFB)** Personnel working with electrically initiated devices (EID) will not put on or remove garment while engaged in explosive operations. If outer garments must be removed, step out of the immediate area of the operation, remove the garment, ground yourself, then re-enter the operation.

V2.E4.6.2.1. **(WhitemanAFB)** Once a lightning watch has been issued by Base Weather, MOC will notify all explosive operations on the flight line and MUNS Control. MUNS Control will notify all explosive operations under their span of responsibility. Supervisors/Crew Chiefs will begin to cease explosive operations that involve EIDs, regardless of location and provide LPS protection, if possible, to all explosives. (See **paragraph V2**E4.6.2.2.3. for explosives locations that do not have LPS protection.)

V2.E4.6.2.2.2. **(WhitemanAFB)** Mission essential explosive operations involving EIDs in a HERO Safe configuration may continue inside facilities with an LPS, with loading personnel gaining WWM approval and MUNS personnel gaining MXW approval. Explosive operations involving EIDs in any configuration other than HERO Safe will be stopped, and maintenance bay evacuated.

V2.E4.6.3.1. **(Added) (WhitemanAFB)** All nuclear operations will reach a lightning safe configuration and stop when lightning has been observed within 10 miles. Coordination/approval is not necessary if continued nuclear operation is necessary to reach a lightning safe configuration IAW weapons specific manual. Nuclear operations may resume when indication of electrical storms have moved beyond 10 miles or 30 minutes after the last indication of lightning within 5 miles. Loading and maintenance operations involving EIDs in a HERO Safe configuration may continue inside facilities with an LPS, with loading personnel gaining WWM approval and MUNS personnel gaining MXW approval.

V3.E3.1.1.4.1. **(WhitemanAFB)** Weapons Storage Area security patrol roads, south/east gravel roads and portions of perimeter road east of runway and do not meet PTR separation requirements. Use of these roads by personnel not directly related to explosive operations is prohibited. Access to prime-beef/military unique training sites and communications sites 94, 3317, 4070 will be via north runway perimeter road.

V4.E3.1.3.1. **(WhitemanAFB)** See **Volume 8** for Whiteman AFB aircraft parking guidance. Fire Symbol change notifications and postings will be completed when munitions are delivered to aircraft parking locations.

V4.E3.1.3.4. **(WhitemanAFB)** B-2 Aircraft Arm/De-arm procedures will be conducted in parking locations. A-10 Aircraft Arm/De-arm procedures will be conducted on the north hammerhead pointed south or the south hammerhead pointed south. A-10 aircraft will not taxi to any parking area with armed ordnance or unsafe guns. A-10 Aircraft landing with a “hot-gun” will be parked on the designated “hot-gun” area (North Ramp Barricade) while de-arming and safing procedures are accomplished. All other hung forward firing ordnance will be safed at the south hammerhead. After weapons are safed, aircraft may proceed to the main ramp. When parked on the main ramp, aircraft with forward firing munitions will be pointed south. A-10 hot-gun safing may be conducted on south arm/de-arm parking spots 1. B-2 with live hung ordnance will be pinned safe at the hot cargo pad before proceeding to the main ramp. (See WHITEMANAFBI 91-102 for further guidance)

V4.E3.1.4. **(WhitemanAFB)** See **Volume 8** for Whiteman AFB aircraft parking guidance.

V4.E3.5.1. **(WhitemanAFB)** See **Volume 8** for Whiteman AFB aircraft parking guidance.

V4.E3.5.2. **(WhitemanAFB)** 442 FW will coordinate with the 509 MXG for use of B-2 maintenance facilities to hanger A-10s. The 442nd will also inform the facility supervision, post the required fire symbols, and notify the fire department ECC if the aircraft is explosive loaded.

V4.E5.16.2.1. **(WhitemanAFB)** All temporary contractors and construction workers will be briefed on the potential hazards of their working environments during the pre-construction briefing. Any personnel who does not attend the pre-construction briefing will be briefed by their respective supervisor, on the potential hazards of their working environments, prior to entering a hazardous area. Full time maintenance personnel will be briefed on the potential hazards of their working environments annually as part of their job safety training.

V4.E5.16.2.4.6. **(WhitemanAFB)** All Hot Work Permits for facilities in the Weapons Storage Area or Munitions Storage Area, regardless of explosive status will be coordinated with 509 BW Weapons Safety prior to performing any hot work being performed.

V5.E3.2.10.6.2.2. **(WhitemanAFB)** 509th Civil Engineer Squadron Explosive Ordnance Disposal (509 CES/CED) are the only personnel authorized to conduct required initial/annual training. Prior to requesting training, units will ensure individuals have completed initial and/or are current on annual explosive safety training requirements. If individuals have not received initial/recurring explosive safety training, 509 CES/CED will not train the individual on use of simulators.

V5.E3.2.10.7.1. **(WhitemanAFB)** Exercise and training plans that involve explosive and pyrotechnic items will be coordinated through 509 BW/SEW using the AF Form 1768, *Staff Summary Sheet*. Plans will include area maps which identify the locations that munitions items will be used. Also include a type and quantity list of munitions items to be used to aid in accountability when the exercise is terminated.

V6.E3.6.1.4.5.6.3. **(WhitemanAFB)** Fire Protection and 509 BW/SEW have evaluated all licensed locations. The parking of POV, AGE and GOV is authorized at 50 feet for all licensed locations.

V6.E3.6.1.4.6. **(WhitemanAFB)** Units requiring explosive facility licenses will coordinate through their unit weapons safety representatives for completion of AF Form 2047.

KEITH J. BUTLER, Col, USAF
Commander

Volume 8 (Whiteman AFB)

WHITEMAN FLIGHTLINE EXPLOSIVES SAFETY GUIDE

V8.E1.1. This is the 509 BW/SEW Flightline Explosive Safety Guide. Note: Conventional loaded aircraft will be separated from nuclear loaded aircraft by 850' (two B-2 docks or parking spaces) unless separated by significant barricades (such as massive modular blocks) to prevent free-field fragment impact to nuclear weapon(s).

Table V8.E1.T1. Fire Withdrawal Distances.
Note: For drop or collision of conventional munitions without fire, evacuate 300 feet.

Type Munitions Exposed to Fire	Withdrawal Distance
Hazard Class/Division 1.1	4,000 feet
Hazard Class/Division 1.2.X	2,500 feet
Hazard Class/Division 1.3	600 feet
Hazard Class/Division 1.4	300 feet
Special Weapons	2,500 feet upwind

Table V8.E2.T1. B-2 Parking NEW and Quantity Distance Quick Reference.

V8.E3.1. B-2 aircraft undergoing heavy maintenance must be separated from explosive loaded aircraft by greater distances than is available between B-2 parking spots. Aircraft are restricted from being loaded in docks adjacent to aircraft under heavy maintenance, structural maintenance, and aircraft modifications. Examples of tasks considered major maintenance are phase work, engine/APU change, tasks that place aircraft on jacks, radar replacement, fuel system work, removal of control surfaces and tasks that prevent emergency extraction of aircraft. **Note:** Adjacent aircraft restrictions do not apply when explosive loaded aircraft has less than 1,000 pounds NEW, inert weapons or is loaded with nuclear weapons.

Table V8.E3.T1. Maintenance in B-2 Docks and Impact on Aircraft Parking.

Location of Aircraft Maintenance	Location Restricted for Explosive Loaded Aircraft
Dock 1	Dock 2 and Hardstand 1
Dock 2	Docks 1, 3 and Hardstand 2
Dock 3	Docks 2, 4 and Hardstand 3
Dock 4	Docks 3, 5 and Hardstand 4
Dock 5	Docks 4, 6 and Hardstand 5
Dock 6	Docks 5, Hardstand 6 and Romeo 1
Dock 7	Dock 8 and Romeo 2
Dock 8	Docks 7 and 9
Dock 9	Docks 8 and 10

Dock 10	Docks 9 and 11
Dock 11	Docks 10 and 12
Dock 12	Docks 11 and 13
Dock 13	Docks 12 and 14
Dock 14	Dock 13
Romeo 1	Dock 6 and Romeo 2
Romeo 2	Dock 7 and Romeo 1
Hardstand 1	Hardstand 2, Docks 1 and 2
Hardstand 2	Hardstands 1, 3 and Docks 1, 2 and 3
Hardstand 3	Hardstands 2, 4 and Docks 2, 3 and 4
Hardstand 4	Hardstands 3, 5 and Docks 3, 4 and 5
Hardstand 5	Hardstands 4, 6 and Docks 4, 5 and 6
Hardstand 6	Hardstand 5 and Docks 5 and 6

V8.E3.2 Combat and non-combat aircraft must be separated from B-2's loaded with HC/D 1.1 munitions. Non-combat aircraft must be separated from explosive loaded aircraft by a minimum of 750 feet. Compliance with these rules impact how we park aircraft on the entire airfield.

V8.E3.2.1 Combat aircraft are defined as aircraft that can carry combat-configured explosives or are identified by MAJCOM. For explosive quantity distance separation requirements, all AFGSC owned rotary wing and fixed wing aircraft are consider combat aircraft. (See AFGSC supplement, V3.E3.T17., Note 20) (See Whiteman supplement, V8.E3.1. for B-2 aircraft undergoing heavy maintenance.) B-2 possession code is not relevant to distance separation requirements. Contact 509 BW/SEW if parking requirements are in question.

Table V8.E3.T2. Impact of Explosive Loaded B-2's on Combat and Non-combat Aircraft Parking.

B-2 Loaded with HC/D 1.1 Munitions	Non-Combat Aircraft
Dock 1	Docks 2, 3, Hardstands 1, 2, 3
Dock 2	Docks 1, 3, 4, Hardstands 1, 2, and 3
Dock 3	Docks 1, 2, 4, 5, Hardstands 1, 2, 3, 4, 5
Dock 4	Docks 2, 3, 5, 6, Hardstands 2, 3, 4, 5, 6
Dock 5	Docks 3, 4, 6, Romeo 1, Hardstands 3, 4, 5, 6
Dock 6	Docks 4, 5, Romeo 1, 2, Hardstands 4, 5, 6
Romeo 1	Docks 5, 6, 7, Romeo 2, Hardstands 5, 6
Romeo 2	Docks 6, 7, 8, Romeo 1, Hardstand 6
Dock 7	Docks 8, 9, Romeo 1,2
Dock 8	Docks 7, 9, 10, Romeo 2, DV 3
Dock 9	Docks 7, 8, 10, 11, DV 3
Dock 10	Docks 8, 9, 11, 12, DV 3
Dock 11	Docks 9, 10, 12, 13, DV 3
Dock 12	Docks 10, 11, 13, 14
Dock 13	Docks 11, 12, 14
Dock 14	Docks 12, 13

Hardstand 1	Docks 1, 2, 3, Hardstands 2, 3
Hardstand 2	Docks 1, 2, 3, 4, Hardstands 1, 3, 4
Hardstand 3	Docks 1, 2, 3, 4, 5, Hardstands 1, 2, 4,5
