This publication implements Air Force Manual (AFMAN) 48-105, *Surveillance, Prevention, and Control of Disease and Conditions of Public Health or Military Significance.* Refer recommended changes and questions about this publication to the OPR listed above using the AF Form 847, *Recommendation for Change of Publication*; route AF Forms 847 from the field through the appropriate chain of command. The authorities to waive wing/unit level requirements in this publication are identified with a Tier ("T-0, T-1, T-2, T-3") number following the compliance statement. See AFI 33-360, *Publications and Forms Management*, submit requests for waivers through the chain of command to the appropriate Tier waiver approval authority, or alternately, to the Publication OPR for non-tiered compliance items. Ensure that all records created as a result of processes prescribed in this publication are maintained in accordance with Air Force Manual (AFMAN) 33-363, Management of Records, and disposed of in accordance with the Air Force Records Disposition Schedule (RDS) located in Air Force Records Information Management System (AFRIMS): **https://www.my.af.mil/gcss-af61a/afrims/afrims/rims.cfm**. The use of the name or mark of any specific manufacturer, commercial product, commodity, or service in this publication does not imply endorsement by the Air Force.

SUMMARY OF CHANGES

This re-write of THULEABI 48-105, *Prevention and Control of Communicable Disease of Animals*, has been revised and needs to be completely reviewed. Major changes include: Reorganization of roles and responsibilities; Zoonosis Disease Prevention and Control Policy; updated Points of Contact (POC).

1. Overview

1.1. This instruction implements AFMAN 48-105, *Surveillance, Prevention, and Control of Disease and Conditions of Public Health or Military Significance.* It applies to all personnel at Thule Air Base (TAB). Effective prevention and control of rabies and other zoonosis (diseases transmissible from animals to humans) is essential to assure the safety, health, and welfare of personnel at this installation. Ensure that all records created as a result of processes prescribed in this publication are maintained IAW Air Force Manual (AFI) 33-322, *Management of Records*, and disposed of IAW Air Force Records Information Management System (AFRIMS) Records Disposition Schedule (RDS). Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using the Air Force (AF) Form 847, *Recommendation for Change of Publication*; route AF Forms 847 from the field through the appropriate functional chain of command. This publication may not be supplemented. See **Attachment 1** for a glossary of references and supporting information used in this instruction.

2. Roles and Responsibilities

2.1. The Base Health Services Director (BHSD) Base Maintenance Contract (BMC/SG) shall:

2.1.1. Informing the Installation Commander or other responsible personnel about any incidences of Animal-Borne Diseases (ABD).

2.1.2. Advising the Installation Commander, 821 SPTS/SG (Public Health Quality Assurance Evaluator), and other applicable personnel concerning ABD and procedures for their management.

2.1.3. Maintaining liaison with the local district physical and chief public health physician for Greenland on all matters associated with rabies control in the Thule Defense Area. All ABD control actions will be coordinated through the Danish Police Inspector (DPI). The BHSD must maintain communications through 821 SPTS/SG to assure ABD information is reported to 21 OMRS/SGPM (Peterson SFB Public Health Office).

2.1.4. Monitoring food service facilities and programs to ensure adequate procedures and implemented to prevent animals from obtaining access to food and garbage.

2.1.5. Monitoring the proper processing and shipment of animals suspected of having ABD to an appropriate laboratory for analysis.

2.2. The Danish Police Inspector (DPI) shall:

2.2.1. Taking all measures deemed necessary to control the animal population to TAB and eliminating those suspected of ABD to control its spread.

2.2.2. Ensuring that the remains of all animals found dead or killed on-base are immediately reported to 821 SPTS/SG and the BHSD, with the location, date discovered and animal description. The BHSD will then determine disposition of the carcasses.

2.2.3. Capturing or destroying stray animals on-base and consulting the BHSD for disposition instructions. Extermination of stray-sled dogs may be required.

2.2.4. Processing and shipment of animals suspected of having ABD to an appropriate laboratory for ABD analysis.

2.3. The Base Defense Operations Center (BDOC) shall:

2.3.1. Notifying the DPI of human-animal incidents.

2.3.2. Taking any necessary emergency actions deemed necessary to quickly terminate threats to humans from any animal attacks in the TAB area.

2.3.3. Documenting human-animal incidents via the 821 Security Forces Blotter.

2.4. The Base Civil Engineering (BMC/CE) shall:

2.4.1. Establishing and enforcing procedures denying animal's access to food and garbage.

2.4.2. Reporting to BDOC any animals found congregating around food service facilities or abnormally congregating frequently in specific locations.

2.5. The Unit Commanders and contractor supervisors will ensure that all personnel shall:

2.5.1. Directed not to feed stray animals.

2.5.2. Directed to avoid contact with, and to not allow any human body parts, within one meter of any animals encountered in the TAB area.

2.5.3. Directed to notify BDOC when remains of any dead animals are found.

2.5.4. Directed to notify BDOC of any animal acting peculiar (foaming or frothing at the mouth, scratching or attacking any individual) or any significant increase in congregating in small areas.

2.5.5. Instructed that people do not have to be bitten by an infected animal to receive an ABG. Any wound or scratch caused by an animal could results in an ABD infection. Saliva from an infected animal can also be unknowingly ingested by humans or transmitted through human skin cuts or scratches, causing an ABD infection.

2.5.6. Directed to report immediately to the medical clinic after having any encounter or physical contact with any type of animal in the TAB area.

2.5.7. Trained by briefings, pamphlets, or TAB television's American and Greenlandic information channels.

2.6. Individuals shall:

2.6.1. Individuals will not feed stray animals.

2.6.2. Avoid contact and to not allow any human body parts within one meter of any animals encountered in the TAB area.

2.6.3. Individuals having direct contact with any type of animal in the TAB area will report immediately to the medical clinic.

2.6.4. Notify BDOC when remains of any dead animals are found.

2.6.5. Notify BDOC of any animal acting peculiar (foaming or frothing at the mouth, scratching or attacking any individual) or any significant increase in congregating in small areas.

3. Zoonosis Disease Prevention and Control Policy

3.1. Pets of any kind will not be allowed to TAB without the permission of the Danish Ministry of State per Ministry of Greenland Journal Number 1085-03, dated April 1983.

3.1.1. DD Form 2209, *Veterinary Health Certificate*, must accompany and Military Working Dogs sent to TAB on official duty (Ref: Title 10, US Code 133 and 8012)>

3.1.2. Any animals found behaving peculiarly or attacking an individual must be exterminated by the DPI, in coordination with 821 SFS/CC, processed, and shipped for ABD lab analysis.

3.1.3. When necessary, programmed extermination of animals in the TAB area will be conducted by the DPI after coordination with 821 SFS/CC, 821 SPTS/SG, BHSB, Danish Liaison Officer (DLO) and the Installation Commander.

HEATHER L. MCGEE, Colonel, USSF
Commander
