Pages: 22

This publication supplements AFPAM 10-243 *Augmentation Duty* which dictates policy, procedures, and responsibilities for the Augmentation Duty Program (ADP) at Davis-Monthan Air Force Base. This publication applies to all officer and enlisted personnel assigned to the installation. This publication does not apply to Air Force Reserve Command (AFRC) and Air National Guard (ANG) units. Ensure that all records created as a result of processes prescribed in this publication are maintained IAW Air Force Manual (AFMAN) 33-363, Management of Records, and disposed of IAW Air Force Records Information Management System (AFRIMS) Records Disposition Schedule (RDS). Contact supporting records managers as required. Refer recommended changes and questions about this publication to the Office of Primary Responsibility (OPR) using the AF Form 847, *Recommendation for Change of Publication*; route AF Form 847s from the field through the appropriate functional chain of command.

SUMMARY OF CHANGES

This document has been revised. This re-write includes changes approved by the Augmentation Duty Program (ADP) Review Board held November 2016, which includes approval of updated ADP AFSC/Function exemptions.

1. General. The ADP is designed to identify, train, and place a pool of personnel to temporarily augment units which require a surge amount of manpower during exercises, contingencies, wartime, emergency situations and major installation events. This program is not intended to

remedy unit manning shortages that arise during normal, routine work schedules. Additionally, it is not used to manage activities designated as normal base details (i.e., Green Machine, Lightning Strikes, Moulage, Honor Guard, Baggage Teams, etc.). The Augmentation Duty Program Review Board (ARB) will validate and approve requirements and decide where they will be sourced from as outlined in the "Fair-Share with Exemptions" calculation method demonstrated in Attachment 4**.**

2. Responsibilities. The 355th Fighter Wing and all Air Force tenant units will participate in the Davis-Monthan ADP Program. They will provide augmentees in accordance with this instruction and as specified by the ARB. The key participants and their respective responsibilities of the ADP are:

2.1. **(Added)** The ARB Chairperson:

2.1.1. Is the 355th Fighter Wing Vice-Commander (355 FW/CV) who owns the management processes of the Davis-Monthan ADP. The ARB Chairperson will approve/sign the minutes of each ARB.

2.2. **(Added)** The ADP Director:

2.2.1. Is the 355th Force Support Squadron Commander (355 FSS/CC) who is the central point-of-contact for the ADP Function or Team Chiefs (those supported by the augmentees) and Group Superintendents. When ADP requirement and tasking issues arise, the ADP Function or Team Chiefs (those supported by the augmentees) and Group Superintendents will elevate them to the ADP Director for resolution.

2.2.2. Forwards requests for exemptions (current exemptions at Attachment 5) and/or additional taskings to the Augmentation Duty Program Working Group (AWG) for recommendation/non-recommendation and ARB for approval/disapproval.

2.2.3. Addresses all requests with the AWG prior to presenting them to the ARB.

2.2.4. Ensures all unresolved items from the AWG and previous ARBs are brought before the ARB for resolution.

2.2.5. Facilitates AWG and ARB meetings.

2.2.6. Ensures ADP Function or Team Chiefs (those supported by the augmentees) are offering timely and appropriate training to augmentees.

2.3. **(Added)** ARB Membership:

2.3.1. Are the 355 FW/CV (Chairperson), 355 CPTS/CC, 355 MSG/CC, 355 OG/CC, 355 MXG/CC, 355 MDG/CC, 563 RQG/CC, 923 AMXS/CC (representing the 23d Maintenance Group Commander at Moody AFB, Georgia), 55 ECG/CC, 25 OWS/CC (representing the 1st Weather Group Commander at Offutt AFB, Nebraska), and a 12 AF/CC representative (12 AF/DS) who are the designated voting members. Advisors (non-voting members) to the ARB include the 355 FW Command Chief, 355 FW/XP, 355 FSS/CC (ADP Director), 355 FSS/FSM Flight Commander, and 355 FSS/FSMP/FSMM Section Chiefs. In the event of a tie, the Chairperson will carry the vote. The ARB approves and prioritizes ADP requirements/taskings and is facilitated by the ADP Director or ADP Resource Manager. The ARB will meet at least once a year, or as needed, to review requirements, approve any new requirements and/or

exemptions, allocate/reallocate taskings to fill augmentation requirements and resolve any issues requiring attention. The ARB Chair will approve/sign the minutes of each ARB.

2.4. **(Added)** AWG Membership:

2.4.1. Is chaired by the ADP Director (355 FSS/CC) and composed of the 12 AF/CCC, 355 FW/CCC and Group Superintendents (including the 355 FW STF/CPTS Superintendent) who are the designated voting members (the 923 AMXS Superintendent will represent the 23d Maintenance Group Superintendent at Moody AFB, Georgia and the 25 OWS Superintendent will represent the 1st Weather Group Superintendent at Offutt AFB, Nebraska). In the event of a tie, the ADP Director will carry the vote. Advisors (non-voting members) to the AWG include the supported ADP Function or Team Chiefs (those supported by the augmentees), 355 FSS/FSM Flight Commander and 355 FSS/FSMP/FSMM Section Chiefs. The AWG is facilitated by the ADP Resource Manager and will meet at least once every six months, or as needed; to review requirements, recommend to the ARB new requirements and/or exemptions, allocation/re-allocation of taskings to fill augmentation requirements, and to forward to the ARB any issues requiring higher level attention. The ADP Director will approve/sign the minutes of each AWG.

2.5. **(Added)** ADP Resource Managers will:

2.5.1. Work directly for the ADP Director (355 FSS/CC) in all matters concerning the ADP. The ADP Resource Manager is assigned to the 355 FSS within the Manpower and Personnel Flight (FSM) and is appointed by the ADP Director.

2.5.2. Ensure ADP Functions or Teams (those supported by the augmentees) maintain current augmentee team rosters.

2.5.3. Report ADP Function or Team statistical data on a quarterly basis or when requested.

2.5.4. Keep on file current ADP Function or Team Chief (those supported by the augmentees) and Group Superintendent appointment letters and a continuity binder.

2.5.5. Review this instruction annually and coordinate appropriate changes.

2.5.6. Coordinate annual review of ADP Function or Team requirements and group tasking allocations.

2.5.7. Schedule meetings and produce ADP agendas and meeting minutes.

2.5.8. Update and maintain a central ADP database and provide metrics upon request.

2.5.9. Track qualification levels for all ADP augmentees using the central ADP database.

2.5.10. Record and publish AWG and ARB meeting minutes.

2.5.11. Post current ADP manning documents, AWG and ARB meeting minutes, and a copy of this instruction on the SharePoint ADP site.

2.5.12. Send a list of all augmentees to the ADP Director every month. The ADP Director will distribute it to all Squadron Commanders for verification of people assigned to ADP billets. The Squadron Commanders will replace anyone who is due to have Permanent Change of Station (PCS) in the next 120 days with a new augmentee.

2.6. **(Added)** ADP Function or Team Chiefs (those supported by the augmentees) will:

2.6.1. Coordinate ADP augmentee events in their respective functions i.e. Security Forces Team, etc.).

2.6.2. Schedule, conduct, and document augmentee training.

2.6.3. Provide a quarterly (or as needed) ADP training schedule to appropriate tasked Unit Commanders.

2.6.4. Document all augmentee training manually or electronically, making it available to the Installation ADP Manager or Group or Unit ADP Monitors upon request.

2.6.5. Provide a list of augmentee training no-shows to respective Unit ADP Monitors, tasked Squadron Commanders, Group Superintendents, and the ADP Director Not Later Than (NLT) 24 hours after augmentees are declared no-shows for training.

2.6.6. Maintain an ADP Training Folder or automated training database on each assigned augmentee and track augmentee participation in the ADP program. Function/Team Chiefs will be responsible for initial set-up of each folder or database record and for documentation of ADP training and participation.

2.6.7. Provide training reports to the ADP Resource Manager on a monthly or as needed basis, identifying all assigned augmentees and their qualification status. The report should address augmentee usage, any upcoming scheduled training, and any no-shows for duty or training. Highlight any unit not meeting their ADP training requirements.

2.6.8. Work with 355 FSS/FSMM to validate augmentee requirements. Requirements are validated using Air Force-approved management engineering methods; after validation, all new determined requirements or reductions to requirements must be vetted through the ADP Working Group and approved by the ADP Review Board prior to implementation and activation.

2.6.9. Ensure all augmentees have received the equipment necessary to perform their augmentee duties. The augmentee's assigned unit will fund and issue conventional purpose, personal wear clothing items (i.e., steel-toed boots, work gloves, parkas, rain gear, personal reflective belts, non-industrial hats, etc.) for performance of augmentee duties. See Attachment 7 for an ADP function-specific listing of clothing and equipment that will be funded-for and purchased by the tasked unit. All special purpose and professional-type clothing and equipment ("pro equipment") such as reflective vests, industrial hats, special purpose boots and gloves, tools or toolboxes, aprons, coveralls, non-prescription eye protection, etc. will be provided by the ADP Function or Team Chief (those supported by the augmentees) for common-use by augmentees.

2.6.10. Maintain an up-to-date listing of all augmentees assigned to their teams and coordinate augmentee taskings with the appropriate Group Superintendents.

2.6.11. Report no-shows, vacancies, and augmentee problems to the ADP Director, ADP Resource Manager and tasked Group Superintendents for appropriate action.

2.6.12. Activate ADP augmentees using a standard Control Center Directive (CCD) that is tailored to define the specific manpower requirement for the activation's scenario. The ADP Function or Team Chief (those supported by the augmentees) will staff the CCD completely through the augmented unit, supported Group Commander and the 355 FW/CC for final approval and release. The activation CCD staffing process must begin a minimum of 7 working days in advance of the planned activation date (unless for emergency or contingency-related activations) to ensure maximum augmentee availability and participation. An advance copy of the draft CCD

and Staff Summary Sheet (SSS) will be provided to the 355 FSS/CC (ADP Director) and 355 FSS/FSMM (ADP Resource Manager) to ensure augmentees can be identified in a timely manner for planned activation.

2.7. **(Added)** Group Superintendents will:

2.7.1. Represent their Group Commanders by providing management oversight of the ADP taskings within their groups.

2.7.2. Be voting members of the AWG and will attend all AWG meetings. They represent their Group Commander at AWG functions and serve as the central point-of-contact for their Unit ADP Monitors. Group Superintendents will forward augmentee issues to the ADP Director and ADP Resource Manager for resolution.

2.7.3. Be responsible for cross-filling ADP taskings when a specific unit within their group cannot fill its ADP tasking. This may include substituting members of another unit within their group. When no member of the group can fill an ADP tasking, the Group Superintendent will prepare a Group Commander-signed ADP tasking reclama letter addressed to the 355 FW/CC, 355 FW/CV, 355 FSS/CC (ADP Director) and 355 FSS/FSMM (ADP Resource Manager).

2.8. **(Added)** The 355 FSS/FSMM will:

2.8.1. Validate all manpower requirements for each ADP Function or Team (Attachment 2) during both exercise and real-world operations. This will be accomplished using a combination of Work Sampling, Post Manning Requirements, Technical Estimate, Staffing Pattern, and Good Operator Timing.

2.8.1.1. Work Sampling is the measurement of work by taking small, statistically representative samples of a larger body of work in order to determine the proportion and quantity of time spent by personnel on specific activities. Sufficient samples drawn will enable determination of a manpower requirement amount for a given level of work within a certain period of time.

2.8.1.2. A Post Manning Requirement is the measurement of work by determining the manpower requirement for a specific post as required by its hours/days of coverage, crew size, training requirement, etc. and then adding each individual post's result together to arrive at a total requirement. Post manning is most effective for security posts, which require manning on a productive work and also a standby basis. A function within the ADP such as the Security Forces Team is typically manned using a post manning requirement.

2.8.1.3. Technical Estimating is an interview-based estimation of a workload's accomplishment time and/or frequency, versus an actual stopwatch measurement. It can be useful when work is irregular, difficult to measure, or when no historical data exists. Technical estimates are most accurate if taken from different personnel interviews, ranging from expert, competent, and novice with the final result averaged. Technical estimating can be used in conjunction with work sampling or by itself.

2.8.1.4. Staffing Patterns are not actually a work measurement-based technique per se; they are predicated on the historical or one-deep staffing levels of certain functions, usually small in number but the minimum required to accomplish a mission. A good example of a staffing pattern in an Air Force manpower context is the squadron leadership model, where the pattern is a Squadron Commander and a first sergeant. Another example would be a large workcenter which

has an NCOIC and an assistant NCOIC. Very small functions within the ADP with one-deep duty position requirements are typically manned using a staffing pattern.

2.8.1.5. Good operator timing is the stopwatch measurement of work to determine a manpower requirement, using the average worker performing at least at the "competent" level. Measuring more workers and averaging their results will greatly increase the accuracy of this type of measurement. Good operator timing can be used in conjunction with work sampling or by itself.

2.8.2. Ensure all ADP requirements are distributed to the respective groups by using the "Fair-Share with Exemptions" method (Attachment 4).

2.8.3. Review all exemption requests and process them through to the AWG and ARB for approval/disapproval.

2.8.4. Revalidate all requirements, exemptions, and allocations on an annual or as-requested basis.

2.9. **(Added)** Squadron Commanders will:

2.9.1. Appoint in writing, an ADP Function or Team Chief (those supported by the augmentees) for each ADP Function or Team assigned to their squadron (if applicable); refer to Attachment 2 for a listing of ADP Function or Teams. Provide copies of appointment letters to the ADP Director, 355 FSS/FSMM, and the Group Superintendent.

2.9.2. Appoint in writing, a Unit ADP Monitor to administer personnel assigned to ADP position taskings and communicate projected changes in augmentee availability. Provide copies of appointment letters to the ADP Director, ADP Resource Manager, and the Group Superintendent.

2.9.3. Appoint augmentees in writing to the ADP Functions or Teams and ensure they are able to serve a minimum of 1 year after becoming fully qualified. Security Force Team (SFT) augmentees must have no history of Lautenberg Amendment (misdemeanor domestic violence) violations.

2.9.4. Ensure their unit has an adequate number of alternate ADP augmentees that are qualified and able to replace primary augmentees.

2.9.5. Release augmentees for scheduled ADP training. ADP training is essential for augmentees to attain and maintain position qualification. ADP training appointments are mandatory appointments. All no-shows will be documented and briefed to Davis-Monthan AFB senior leadership and tasked Unit Commanders.

2.9.6. Release augmentees for ADP duty when tasked by 355 FW/CC.

2.9.7. Ensure the Unit ADP Monitor complies with procedures outlined in this instruction.

2.9.8. Inform the Group Superintendent and Group Commander when unable to fill ADP taskings via a signed ADP shortfall letter. The intent of beginning the shortfall process at the squadron level is to ensure accountability for the ADP taskings assigned by the Group Commander to each squadron. It also facilitates an orderly validation means and record trail when a Group Superintendent cross-fills taskings from other squadrons within the Group.

2.10. Unit ADP Monitors will:

2.10.1. Ensure augmentees are identified and selected to fulfill tasked ADP commitments.

2.10.2. Ensure the ADP selectee receives the ADP appointment letter of notification sent by the ADP Director or Resource Manager.

2.10.3. Schedule augmentees for, and track/document training to ensure they attain and maintain full position qualification (task performance, equipment operation, weapons currency, etc.).

2.10.4. Identify ADP replacements as soon as incumbents are projected for PCS, separation, or retirement. Unit ADP Monitors should ensure replacement personnel are trained before the incumbent departs. If an augmentee receives a profile or notice for extended Temporary Duty (TDY), the Unit ADP Monitors will work with their respective Group Superintendent to provide a permanent replacement.

2.10.5. Contact supervisors to verify release of augmentees for training, exercises, and contingencies. Immediately elevate availability problems to the Squadron Commander. Unit ADP Monitors will replace members when they are no longer available for duty, however, if an individual's unavailability will be of a temporary nature, Unit ADP Monitors are encouraged to put the member in an alternate position, effectively "banking" the augmentee until his/her return to service. This procedure will preclude multiple submissions of replacement/appointment letters, as the augmentee will remain 'in the system'. Upon tasking activation, when no member of the unit can fill an ADP tasking, the Unit ADP Monitor will prepare a Unit Commander-signed ADP tasking shortfall letter addressed to their Group Commander, Group Superintendent, 355 FSS/CC (ADP Director) and 355 FSS/FSMM (ADP Resource Manager). The intent of beginning the shortfall process at the squadron level is to ensure accountability for the ADP taskings assigned by the Group Commander to each squadron. It also facilitates an orderly validation means and record trail when a Group Superintendent cross-fills taskings from other squadrons within the Group.

2.10.6. Review an individual's status on the ADP program with the Squadron Commander prior to their assignment to fill Unit-Type Code (UTC) or TDY requirements. If the member will be TDY or on leave for more than 30 days, send an ADP Appointment/Replacement Memorandum to the ADP Function or Team Chief (those supported by the augmentees), ADP Director, and ADP Resource Manager or place the augmentee in an alternate ADP position by notifying the ADP Resource Manager.

2.10.7. If an individual assigned to an ADP Function or Team moves to a new unit, the losing unit must continue to fill the ADP tasking, as the tasking is allocated to the group or unit and not to a specific person. The ADP tasking does not move with the individual when he/she is reassigned.

2.10.8. The augmentee's assigned unit will fund and issue conventional purpose, personal wear clothing items (i.e., steel-toed boots, work gloves, parkas, rain gear, personal reflective belts, non-industrial hats, etc.) for performance of augmentee duties. See Attachment 7 for an ADP function-specific listing of clothing and equipment that will be funded-for and purchased by the tasked unit. All special purpose and professional-type clothing and equipment ("pro equipment") such as reflective vests, industrial hats, special purpose boots and gloves, tools or toolboxes, aprons, coveralls, non-prescription eye protection, etc. will be provided by the ADP Function or Team Chief (those supported by the augmentees) for common-use by augmentees.

2.11. **(Added)** Unit Deployment Managers (UDMs) will:

2.11.1. Work with Unit ADP Monitors to ensure appropriate ADP Function or Team Chiefs (those supported by the augmentees) are notified prior to ADP augmentees going on TDYs more than 30 days.

2.11.2. Relay information received from Concept Briefings pertinent to ADP augmentees. The UDMs may also serve as the point-of-contact for augmentee notification for ADP training recalls in those situations where the Unit ADP Monitor is not used as that point-of-contact.

2.11.3. Monitor their unit's Aerospace Expeditionary Force (AEF) tasking profile and work with the Unit ADP Monitor to de-conflict augmentee position manning and deployment tasking personnel requirements.

2.12. **(Added)** ADP Augmentees will:

2.12.1. Perform ADP duties IAW this instruction. Once appointed, augmentees are obligated to serve a minimum of 1 year after becoming fully qualified.

2.12.2. Coordinate with their Unit ADP Monitor and ADP Function or Team Chief (those supported by the augmentees) for all leaves, TDYs, or other situations rendering them unavailable to perform planned ADP augmentee duties. Advise the Unit ADP Monitor of a needed replacement action ASAP if selected for PCS, extended TDY, or separation/retirement. **Note:** Should a mission-related scheduling conflict arise between the tasked squadron and ADP Function or Team Chief (those supported by the augmentees) regarding augmentee duties, attempts will be made to resolve such conflicts at the lowest level of authority. The concerned Group Superintendent, representing his/her Group Commander, is the final decision authority in these cases. Personnel assigned to Honor Guard duty will not be appointed to ADP positions.

8. (Added) Activating augmentees for operational purposes. Only the 355 FW/CC has authority to approve augmentee call-ups for base-wide exercises, contingencies, emergencies, and wartime conditions. ADP Team or Function exercise and real-world activations will be accomplished using a CCD which will be routed to the 355 FW/CC by the ADP Function or Team Chief (those supported by the augmentees) requesting the augmentees via the Installation ADP Manager. ADP Function or Team Chiefs (those supported by the augmentees) will thoroughly justify and document all recalls.

8.1. Full recall: Augmentees will report to their units for accountability after release of the activation CCD originated and staffed by ADP Function or Team Chiefs (those supported by the augmentees). Immediately after sign-in, augmentees report to their ADP Function or Team Chiefs (those supported by the augmentees) if they are designated to perform ADP duties. Supported ADP Function and Team Chiefs will contact the augmentee's Unit ADP Monitor during the initial mustering process and will not contact the augmentees directly unless responding to an emergency or urgent activation. If they are unable to contact the Unit ADP Monitors, the ADP Function/Team Chiefs will contact the Installation ADP Manager for assistance. Direct contact of augmentees by the ADP Function/Team Chiefs is permitted after initial mustering for transmitting information related to reporting times, places, equipment requirements, etc.

8.2. Limited recall: Augmentees will report to their units for accountability after release of the activation CCD originated and staffed by ADP Function or Team Chiefs (those supported by the augmentees). Immediately after sign-in, augmentees will standby for ADP activation and reporting instructions from their Unit ADP Monitor. Supported ADP Function and Team Chiefs

will contact the augmentee's Unit ADP Monitor during the initial mustering process and will not contact the augmentees directly unless responding to an emergency or urgent activation. If they are unable to contact the Unit ADP Monitors, the ADP Function/Team Chiefs will contact the Installation ADP Manager for assistance. Direct contact of augmentees by the ADP Function/Team Chiefs is permitted after initial mustering for transmitting information related to reporting times, places, equipment requirements, etc.

8.3. ADP call-up without recall: ADP Function or Teams may be notified to report for their particular duties via a CCD without initiating a wing recall. Under these circumstances, the affected ADP Function or Team Chiefs (those supported by the augmentees) will obtain approval from the 355 FW/CC to call-up ADP augmentees through the ADP Director. Once approved, the ADP Function or Team Chiefs (those supported by the augmentees) will initiate and route a CCD to activate their team. After CCD release, they will contact the augmentee's Unit ADP Monitor, who will in turn, notify the augmentee to report for ADP duties. Upon notification, augmentees will report to their respective ADP Function or Team Chiefs (those supported by the augmentees) and notify their normal workcenter of their status, unless otherwise directed. Supported ADP Function and Team Chiefs will contact the augmentee's Unit ADP Monitor during the initial mustering process and will not contact the augmentees directly unless responding to an emergency or urgent activation. If they are unable to contact the Unit ADP Monitors, the ADP Function/Team Chiefs will contact the Installation ADP Manager for assistance. Direct contact of augmentees by the ADP Function/Team Chiefs is permitted after initial mustering for transmitting information related to reporting times, places, equipment requirements, etc.

8.4 Scheduled exercise/inspection activation: Augmentees working in exercise (Phase I/II, etc.) functions for scheduled exercises and inspections will be activated by a CCD originated and staffed by ADP Function or Team Chiefs (those supported by the augmentees) that is tailored to define the specific manpower requirement for that activation's scenario. At the installation commander's discretion, however, a single exercise/inspection initiation CCD will activate a function and then allow a full-strength recall of that function's manpower requirement. Exercise function augmentees will also be expected to attend ADP function musters in preparation for exercise-related activations. Supported ADP Function and Team Chiefs will contact the augmentee's Unit ADP Monitor during the initial mustering process and will not contact the augmentees directly unless responding to an emergency or urgent activation. If they are unable to contact the Unit ADP Monitors, the ADP Function/Team Chiefs will contact the Installation ADP Manager for assistance. Direct contact of augmentees by the ADP Function/Team Chiefs is permitted after initial mustering for transmitting information related to reporting times, places, equipment requirements, etc.

8.5. Security Forces Team (SFT) augmentee activations: Security Forces (SF) augmentees will be activated by a CCD originated and staffed by ADP Function or Team Chiefs (those supported by the augmentees) that is tailored to define the specific manpower requirement for that activation's scenario. At the installation commander's discretion, however, a single FPCON change CCD will activate the SF augmentee function(s) and then allow a full-strength recall of that function's manpower requirement. In all cases, a 'Security Forces Augmentee Activation Notice' will be released by the 355 SFS ADP Coordinators or 355 FSS ADP Resource Managers indicating the CCD from which the activation authority is derived, augmentee reporting instructions, and the allocation of activated SF augmentee taskings to each group and squadron.

SF ADP Coordinators will contact the augmentee's Unit ADP Monitor during the initial mustering process and will not contact the augmentees directly unless responding to an emergency or urgent activation. If they are unable to contact the Unit ADP Monitors, the SF ADP Coordinators will contact the Installation ADP Manager for assistance. Direct contact of augmentees by the SF ADP Coordinators is permitted after initial mustering for transmitting information related to reporting times, places, equipment requirements, etc.

9. (Added) Activating augmentees for training purposes. Recalling augmentees for mass training purposes must have approval from the 355 FW/CC via the 355 MSG/CC and ADP Director. The Unit ADP Monitor/UDM will be the point-of-contact for augmentee notification of training-related recalls. Supported ADP Function and Team Chiefs will contact the augmentee's Unit ADP Monitor during the initial mustering process and will not contact the augmentees directly unless responding to an emergency or urgent activation. If they are unable to contact the Unit ADP Monitors, the ADP Function/Team Chiefs will contact the Installation ADP Manager for assistance. Direct contact of augmentees by the ADP Function/Team Chiefs is permitted after initial mustering for transmitting information related to reporting times, places, equipment requirements, etc.

10. (Added) Relief from taskings. ADP activations take precedence over ordinary leave and should be strictly considered before an individual is released from an ADP tasking. If for some validated reason, an ADP augmentee cannot perform their duties, then he or she must obtain an excusal letter signed by their Squadron Commander addressed to the ADP Director. If a Squadron Commander excuses the member, the commander will provide an alternate; if the commander does not have an alternate, then the commander will elevate it to the Group Superintendent to provide the alternate from another unit within the group. Accordingly, ADP Function or Team Chiefs (those supported by the augmentees) will closely monitor activation or training attendance and report no-shows.

SCOTT C. CAMPBELL, Colonel, USAF
Commander, 355th Fighter Wing

ADP FUNCTION AND TEAM DESCRIPTIONS

A3.1. Crisis Action Team. Performs CAT entry/exit control, validates names against the Entry Authorization List (EAL), and ensures accountability of CAT personnel at all times. Maintains Self-Aid Buddy Care currency and functions as CAT Self-Aid Buddy Care POC. Maintains proficiency/currency as a member of the Crisis Action Team. Performs administrative duties as required within the CAT. Serves as an CAT Runner and PAR (Post-Attack Reconnaissance) member; delivers Control Center Directives (CCDs) and other information to the Personnel Accountability Transition Points (PATPs) and other locations as needed. Provides "Comm-Out" capability for information dissemination

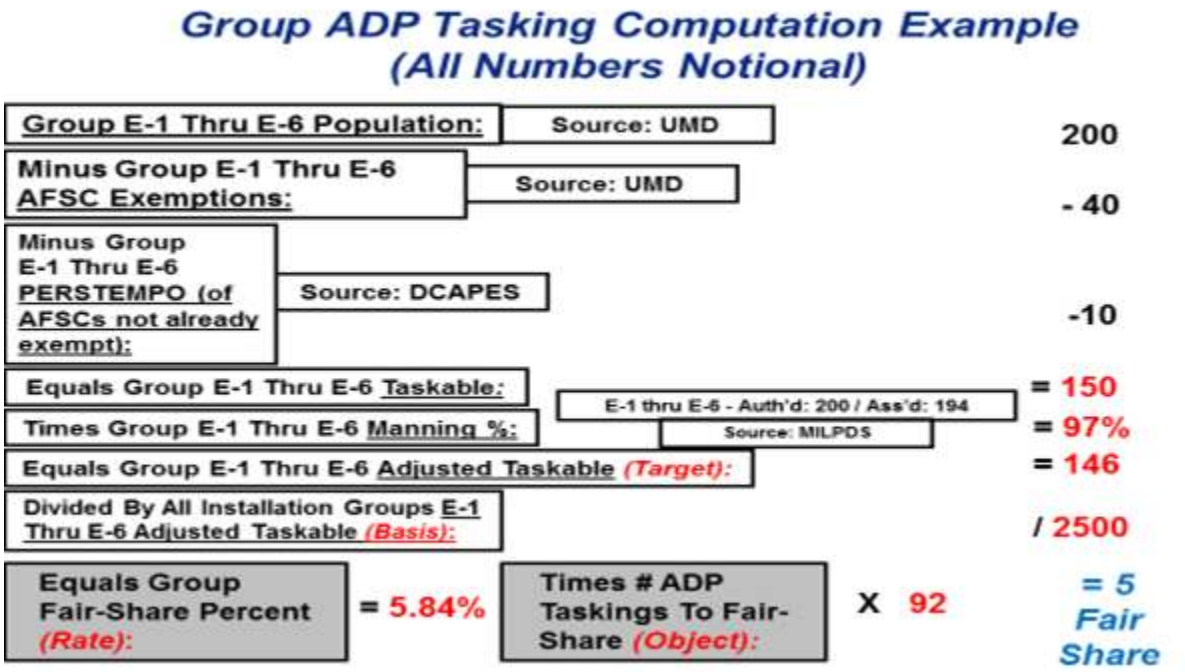

A3.2. Security Forces Team (SFT). May perform duties as an Installation Patrol Member, Internal and External Security Response Team Member, Fire Team Member, and Installation Entry Controller. Maintains the capability to tactically respond; neutralizing threats against Protection Level (PL) assets. Provides immediate armed response for any suspicious activities originating in or around any restricted areas. Responds to in-flight and ground emergencies involving aircraft with mechanical malfunctions or munitions mishaps. Provides traffic control and cordon duties, allowing a clear route of travel for emergency responders. Monitors personnel entering and exiting the installation daily, ensures the smooth flow of motorists and pedestrians ensuring compliance with established base instructions. Assist with random vehicle inspections to search for illegal drugs, weapons, and stolen government property.

ADP ALLOCATION PROCESS

A4.1. Allocation Method. ADP augmentees are allocated using the "Fair-Share with Exemptions" method. Calculations are re-run annually or at the direction of the ADP Review Board utilizing Unit Manpower Document (UMD) authorizations, manning percentages, Air Force Specialty Code (AFSC) exemptions, and Personnel Tempo (PERSTEMPO) man-day data obtained from Air Force Personnel Center (AFPC). ADP PERSTEMPO is calculated as follows: **PERSTEMPO = (Number of Unit Man-Days Deployed / Number of Months Reported Over) / 30.44**. The result is the number of *full-time equivalent (FTE) personnel that are deployed steady-state for the time period sampled (usually 48 months)*. The factor of 30.44 used in the formula represents the number of days in an average calendar month. While the intent of this allocation process is to determine an *amount* of augmentees to be distributed to groups, it is not a substitute for negotiations that will determine the *composition* of an organization's taskings. The ADP Working Group and ADP Review Board should use these results as a starting point for any decisions made. Each organization tasked will have a different mission profile that will drive what type of taskings it is capable of supporting. The current group allocations are maintained at the 355 FSS/FSMM and are also available on the ADP SharePoint site. The following steps below show how a group "Fair-Share with Exemption" allocation is obtained using a fictional scenario example:

Figure A4.1. ADP Allocation.

Attachment 5

ADP EXEMPTIONS

A5.1. ADP Exemption Process. All ADP exemption requests are forwarded to the AWG by the affected unit's commander. If the exemption request is recommended by the AWG, the request is referred to the ARB for approval/disapproval.

ADP FUNCTION QUALIFICATION LEVEL COLOR-CODING

A6.1. Training Performance Color-Code Indicators: The following "percent qualified" color-coding scheme will indicate the training health of the ADP functions. The percentage includes the qualification of primary and alternate augmentee personnel against the function's primary augmentation requirement.

Figure A6.1. Security Forces Team:

100% Benchmark

Rationale: Complete primary augmentee requirement qualification is necessary in order to respond effectively to the most-stringent FPCON (Delta) scenario.

Figure A6.2. Crisis Action Team:

100%	Green
75% to 99.9%	Yellow
Less than 75%	Red

Rationale: This 4 member augmentee team that can operate 2 shifts with 3 people qualified if needed, but, operations are heavily degraded with only 1 qualified per shift.

Attachment 7

A7.1. ADP FUNCTION CLOTHING/EQUIPMENT FUNDED-FOR AND PURCHASED BY THE TASKED UNIT

A7.1.1. Crisis Action Team (CAT): Gas mask, Chemical Warfare Defense Ensemble (CWDE), reflective belt, and leather work gloves. *Gas mask and CWDE are issued by 355 LRS Mobility Supply prior to CAT activation for the Phase II portion of exercises or when requested by the CAT Director.*

A7.1.2. Security Forces Team (SFT): Reflective belt and leather work gloves.
