ACCESSIBILITY: Publications and forms are available on the e-publishing website located at www.e-publishing.af.mil for downloading or ordering.

RELEASABILITY: There are no releasability restrictions on this publication.

SUMMARY OF CHANGES

Changes include grammar and formatting, integration of AODMs documentation procedures, integration of Foundation Courses to professional development and career progression tables, addition of Specialty Training Standards (STS) for Counter-Unmanned Aircraft Systems (c-UAS) and Automatic Detection Surveillance-Broadcast (ADS-B), removal of STS for Landing Zone and Facility Bomb Threats, and adjustments to the 7-level Craftsman Course. Full change notes may be found on the HQ AFFSA SharePoint site.

AIR TRAFFIC CONTROL AFSC 1C1X1
CAREER FIELD EDUCATION AND TRAINING PLAN

PART I

Preface

1. This Career Field Education and Training Plan (CFETP) is a comprehensive education and training document that identifies life-cycle education and training requirements, training support resources, and minimum core task requirements for this specialty. The CFETP will provide personnel a clear career path to success and will educate Airmen in all aspects of career field training. The use of the name or mark of any specific manufacturer, commercial product, commodity, or service in this publication does not imply endorsement by the Air Force. This CFETP was constructed in accordance with (IAW) DAFMAN 36-2689, *Training Program*. **NOTE:** Department of Defense (DoD) civilians occupying associated positions will use Part II to support duty position qualification training.

2. The CFETP consists of two parts. Supervisors plan, manage and control training within the specialty using both parts of the plan.

2.1. Part I provides information necessary for overall management of the specialty. Section A explains how everyone will use the plan. Section B identifies career field progression information, duties and responsibilities, training strategies and career field path. Section C associates each level with specialty qualifications (i.e., knowledge, education, experience, training and other). Section D indicates resource constraints (i.e., funds, manpower, equipment, facilities). Section E identifies transition training guide requirements for Staff Sergeant (SSgt) through Master Sergeant (MSgt).

2.2. Part II provides information on tasks necessary for Airmen to perform duties in this AFS. Section A identifies the STS, and includes duties, tasks, technical references to support training, Air Education and Training Command (AETC) conducted training, wartime course and core tasks and correspondence course requirements. Section B contains the course objective list and training standards which supervisors will use to determine if Airmen satisfied training requirements. Section C identifies available support materials. Section D identifies a training course index supervisors may use to determine resources available to support training and includes both mandatory and optional courses. Section E identifies Major Command (MAJCOM) unique training requirements supervisors can use to determine additional training required for the associated qualification needs.

3. Using guidance provided in the CFETP will ensure individuals in this specialty receive effective and efficient training at the appropriate points in their career. This plan will enable us to train today's work force for tomorrow's jobs.

GLOSSARY OF ABBREVIATIONS/TERMS

Air Force Career Field Manager (AFCFM) - Representative appointed by the respective Headquarters (HQ) United States Air Force (USAF) Deputy Chief of Staff or Under Secretariat to ensure assigned Air Force specialties are trained and utilized to support AF mission requirements. AFCFM is the Office of Primary Responsibility (OPR) for the career field; however, works in concert with MAJCOM Functional Managers (MFMs) as required.

Air Force Forces Generation (AFFORGEN) - AFFORGEN is the Air Force's sustainable, capacity-driven model for presenting forces to Joint Force Commanders (JFCs). AFFORGEN's intent is to enable operational preparedness and readiness recovery to compete with peer competitors, while clearly focusing USAF efforts on a predictable and sustainable force offering.

Air Force Specialty (AFS) - A group of positions (with the same title and code) that require common qualifications.

Air Force Specialty Code (AFSC) - A five-digit alphanumeric code with potential prefixes and suffixes added to identify each career field within the Air Force.

Airman Leadership School (ALS) - ALS is a military educational institution charged to prepare Senior Airman (SrA)-SSgt selects for positions of greater responsibility by preparing them for supervisory and reporting official duties.

Air Traffic Control Training Course (ATCTC) - Career field specific Air Force Training Course which provides detailed information that encompasses the various aspects of the 1C1X1 career field. The course is one of the prerequisites to become an Air Traffic Control trainer.

Air Traffic Safety Oversight Service (AOV) - The DoD established system for the purpose of credentialing air traffic controllers performing duties in DoD facilities.

Airfield Operations Data Management System (AODMS) – A computer-based system that streamlines training management and records. It is the epicenter for AO data collection for trends and analysis, providing critical data that improves efficiency in many areas, and allows relevant decision making at all levels leading to safer operations.

Airfield Operations Systems Specialist (AOSS) - Individual(s) responsible for operating and monitoring airfield operations automated systems.

AOV Facility Rating – To achieve an AOV Facility Rating a controller must meet minimum position qualification for the designated facility in accordance with DAFMAN 13-204v3.

Assistant Chief Controller (ACCTLR) - Assists the Chief Controller (CCTLR) in managing the internal operation of the air traffic facility and performs duties as prescribed by the CCTLR.

Assistant Non-Commissioned Officer in Charge (NCOIC), Air Traffic Control Training (ANATCT) - Assists the NCOIC, Air Traffic Control Training (NATCT) in monitoring Air Traffic Control (ATC) facility training, coordinating monthly training schedules and training records inspections. The ANATCT also assists the NATCT in developing and managing the unit air traffic control simulator systems (radar or tower) and management of computer-based products.

Assistant NCOIC, Standardization and Evaluation (ANSE) - Assists the NCOIC Standardization and Evaluation (NSE) in administering the facility certification and rating program according to applicable USAF, Federal Aviation Administration (FAA), International Civil Aviation Organization (ICAO) and host nation requirements.

Assistant NCOIC, Training and Standardization (ATSN) - Assists the TSN in fulfilling the duties of the NATCT and NSE.

ATC Liaison - Provides technical advice to host nation, or applicable agency, in support of AF missions to include facilitation of aircraft movements, coordination assistance, and clarification of operational and procedural requests between air traffic controllers, agencies, and aircrews.

Basic Military Training (BMT) - BMT is the initial military training course for new enlisted Air Force members. The course provides the individual with a basic foundation and introduction to Air Force history, customs and courtesies, physical fitness and military bearing.

Career Field Education and Training Plan (CFETP) - A CFETP is a comprehensive core training document that identifies life-cycle education and training requirements, training support resources and minimum core task requirements for a specialty. The CFETP aims to give personnel a clear path and instill a sense of industry in career field training. It is the formal training contract between the AFCFM and AETC for accession and life-cycle skills training.

Chemical, Biological, Radiological and Nuclear (CBRN) Task Qualification Training (TQT) - Tasks the AFCFM identifies as requirements to train on in order to prepare individuals and teams to perform tasks in CBRN contaminated environments. The AFCFM requires all CBRN TQTs be trained, although tasks may not be immediately applicable to all bases/facilities.

Chief Controller (CCTLR) - Manages the internal operation of the air traffic facility to include direct supervision of personnel assigned, ensuring ATC services are provided that meet mission needs and effectively implementing the controller training program.

Chief Enlisted Manager (CEM) - An Air Force specialty coding identifying all Chief Master Sergeant (CMSgt) positions in the Airman Classification Structure. In many cases, CEM codes are made up of a series of existing superintendent specialties where the degree of supervisory and managerial task involvement permits expanded resource use.

Community College of the Air Force (CCAF) - Federally chartered degree-granting institution that awards an associate degree to active duty enlisted and Air Force Reserve component members. The associate in applied science degree is awarded for successful completion of a degree program specifically designed for an Air Force specialty.

Controller In Charge (CIC) -The civilian equivalent to the Watch Supervisor (WS) position.

Core Task – Tasks the AFCFM identifies as minimum qualification requirements for everyone within an AFSC, regardless of duty position. Core tasks may be specified for a particular skill level or in general across the AFSC. The AFCFM requires all core tasks be trained, although tasks may not be immediately applicable to all bases.

Course Training Standard (CTS) - Training standard that identifies the training members will receive in a specific course.

Credential - An endorsement issued from FAA AOV that identifies a person as a qualified air traffic control specialist through the listing of identifying information and professional qualifications in the form of facilities, ratings, and designations.

Crew Resource Management (CRM) - A process designed to aid in the prevention of aviation accidents and incidents by improving crew performance through a better understanding of human factor concepts.

Customer Service Information Line (CSIL) - A 24-hour telephone line for supervisors to call when questions arise about training received at any formal technical training school. This system allows HQ AETC (Keesler Technical Training School) to respond quickly to the concerns of field supervisors. Call CSIL at DSN 597-4566 or Comm 228-377-4566, or fax DSN 597-3790, or email at 81trg.tge@us.af.mil.

Department of the Air Force Enlisted Classification Directory (DAFECD) - The official directory for all military enlisted classification descriptions, codes, and identifiers. The specialty descriptions and codes will be used to identify each Air Force job (valid requirements) and to describe the minimum mandatory qualifications of personnel to fill these jobs. The updated DAFECD is available on the MyFSS website.

Department of the Air Force Officer Classification Directory (DAFOCD) - The official directory for all military officer descriptions, codes, and identifiers. The updated DAFOCD is available on the MyFSS website.

Education and Training Course Announcements (ETCA) - Contains specific MAJCOM procedures, fund citations, reporting instructions and listings for those formal courses conducted or managed by the MAJCOMs or field operating agencies. The ETCA website can be found on the Air Force Portal.

Functional Area Managers (FAM) - The individual accountable for the management and oversight of all personnel and equipment within a specific functional area to support the operational planning and execution. Responsibilities include, but are not limited to, developing and reviewing policy, developing, managing, and maintaining Unit Type Codes **(**UTCs), developing criteria for, and monitoring readiness reporting, force posturing, and analysis. At each level of responsibility (Headquarters Air Force (HAF), MAJCOM, Air Component, Field Operating Agencies (FOA), Direct Reporting Units (DRU) and Unit), the FAM should be the most knowledgeable and experienced person within the functional area and have the widest range of visibility over the functional area readiness and capability issues.

Functional Account Code (FAC) - Code used to identify work centers on the Unit Manpower Document (UMD), Unit Personnel Management Roster (UPMR) and related documents.

Ground Controlled Approach (GCA) - A fixed, mobile, or transportable facility that provides radar arrival and RFC services within airspace designated by an approach control facility.

Information Pamphlet (IP) - A publication maintained by HQ Air Force Flight Standards Agency (AFFSA) to provide enhanced guidance on a focused area of training. It is not intended to replace, substitute, or supersede official regulations, procedures, or directives.

Initial Skills Training - A formal school course that results in an AFSC 3-skill level award for enlisted or mandatory training for officers.

Landing Zone (LZ) - Any planned landing surface and movement area that has not been evaluated or does not meet defined airfield criteria. LZ may be unprepared, semi-prepared, or paved.

Landing Zone Controller (LZC) - Individual performing air traffic control duties during LZ operations.

Landing Zone Safety Officer (LZSO) - Qualified and certified personnel responsible for safe and efficient conduct of LZ operations. This individual is in charge of the LZ, supervises personnel on/around the LZ and ensures the LZ is usable for the planned operation.

Major Command (MAJCOM) - A major subdivision of the Air Force organized on a functional basis in the United States and on a geographical basis overseas. MAJCOMs are interrelated and complementary, providing offensive, defensive and support elements to operational commanders.

MAJCOM Functional Manager (MFM) - Senior Noncommissioned Officers who manage designated enlisted career fields and serve as the Major Command liaisons for their respective Air Force Career Field Managers. See *The Enlisted Force Structure,* for further details.

Mission Ready Airmen (MRA) - Mission Ready Airmen are multi-skilled vital members of small teams tasked with solving complex problems under challenging conditions.

myLearning - Online learning system that delivers computer-based training and tracks and reports certificates and progress.

NCOIC, Airfield Automation Management (NAAM) - Individual responsible for managing the internal operation and establishment of procedures for airfield operations automation.

NCOIC, Air Traffic Control Training (NATCT) - ATC individual responsible for developing and managing the unit ATC Training Program.

NCOIC, Air Traffic Control Standardization and Evaluation (NSE) - ATC individual responsible for administering the facility certification and rating program according to applicable USAF, FAA, ICAO, and host nation requirements.

NCOIC, Air Traffic Control Training and Standardization (TSN) - Fulfills the duties of the NATCT and NSE.

NCO Academy (NCOA) - A military educational institution charged to prepare Technical Sergeants (TSgt) and TSgt-selects for positions of greater responsibility by broadening their leadership and supervisory skills and expanding their perspective of the military profession.

Notice to Airmen/Air Missions (NOTAM) - A notice containing information concerning the establishment, condition or change in any component in the National Airspace System that is essential to personnel concerned with flight operations.

Numbered Air Force (NAF) - A level of command directly under a MAJCOM. NAFs are tactical echelons that provide operational leadership and supervision in specific geographic regions or theaters of operations.

Occupational Analysis (OA) - Collecting and analyzing factual data on the knowledge requirements and tasks performed by Air Force career fields. This data is used to provide personnel and training decision-makers with factual and objective job information, which enables them to justify and/or change personnel utilization policies and programs, refine and maintain occupational structures, and establish, validate, and adjust testing and training programs. Located at https://usaf.dps.mil/sites/aetc-hq/A9/SAS/OA/Occupational%20Analysis%20Reports%20OARs/Forms/AllItems.aspx?viewpath=%2Fsites%2Faetc%2Dhq%2FA9%2FSAS%2FOA%2FOccupational%20Analysis%20Reports%20OARs%2FForms%2FAllItems%2Easpx.

Occupational Survey Report (OSR) - A detailed report showing the results of an occupational survey of tasks performed within a particular AFS.

On-The-Job-Training (OJT) - Dual-track system of providing subject/task knowledge and hands-on over-the-shoulder training. OJT is conducted to certify personnel in both upgrade (skill level award) and job qualification (duty position certification) training.

Proficiency - Additional and/or periodic training and performance requirements, established by local facility managers, MAJCOMS, and/or HQ AFFSA to maintain personnel skills and knowledge standards for the local operational complexity.

Qualification Training - Hands-on performance training designed to qualify personnel in a specific position. This training occurs both during and after upgrade training to maintain up-to-date qualifications.

Qualification Training Package (QTP) - An instructional package designed for use at the unit to qualify, or aid qualification, in a duty position or program or specific equipment component. It may be printed, computer-based or contained in other audio/visual media.

Radar Approach Control (RAPCON) - A terminal ATC facility that uses radar and non-radar capabilities to provide control services to aircraft arriving, departing, or transiting airspace controlled by the facility.

Radar Final Control (RFC) - An ATC service that provides navigational guidance or approach monitoring during the final phase of flight. An RFC facility is defined as a fixed or deployable radar facility that provides RFC service.

Resource Constraints - Resource deficiencies, such as money, facilities, time, manpower and equipment that preclude desired training from being delivered.

Senior Controller (SC) - The individual responsible for the overall operation of an air traffic control facility during their shift and maintains general situational awareness of air traffic (see Watch Supervisor). A senior controller is also simultaneously responsible for duties at an operating position.

Senior Noncommissioned Officer Academy (SNCOA) - SNCOA is for MSgts, Senior Master Sergeant (SMSgt) selects, sister service SNCOs, and international SNCOs. The curriculum is designed to prepare SNCOs to lead in the employment of air, space and cyberspace power in support of national security objectives.

Senior Watch Supervisor (SWS) - Watch supervisors specifically appointed as crew lead. Only one member from each crew should hold the title.

Standardized Initial Task Evaluation (SITE) - Initial task evaluation for technical school graduates which contains a list of facets of military bearing and all tasks taught in the 1C131 formal course. The SITE form and instructions can be found on the HQ AFFSA SharePoint® website.

Skills Training - A formal course resulting in the award of a skill level.

Special Experience Identifier (SEI) - SEIs identify special experience and training not otherwise reflected in the classification system. SEIs are primarily used for contingency purposes. SEIs are awarded based on completion of formal training, OJT, a unique course, and experience performing specific duties. See the DAFECD and DAFOCD for more specifics.

053	GCA	365	Radar Final Controller (RFC)
054	GCA WS/SC	376	Airfield Automation Systems Specialist (AOSS)
055	Control Tower WS	900	Combat Airspace Management
056	Control Tower	901	Command and Control (C2), Air Operations Center (AOC)
090	Contingency Response Forces (CRF)	917	C2 AOC Air Mobility Division
350	Airspace Management	955	Tower Chief Controller
357	TERPS	956	RAPCON Chief Controller
362	RAPCON WS	957	GCA Chief Controller
363	ATC Radar Center	3LZ	Landing Zone
364	ATC RAPCON	166	Advanced Air Advisor
		164	Basic Air Advisor

Specialty Knowledge Test (SKT) - One of two tests in the Weighted Airman Promotion System (WAPS). The SKT is an examination that covers broad technical knowledge within a given AFSC.

Specialty Training Requirements Team (STRT) - Forum to determine education and training requirements by bringing together training experts to establish the most effective mix of formal and on-the-job training for each AFS skill level. The primary purpose of the STRT is for the AFCFM and functional leaders to determine and present training requirements to the AETC Training Pipeline Manager (TPM) and Training Manager (TM).

Specialty Training Standard (STS) - An Air Force publication (typically inserted as Part II of the CFETP) that describes an AFS in terms of tasks and knowledge that an Airman in that specialty may be expected to perform or to know on the job. Also identifies the training provided to achieve a 3-, 5- or 7-skill level within an enlisted AFS. It further serves as a contract between AETC and the functional user to show which of the overall training requirements for an AFSC are taught in formal schools and corresponding courses.

Standard - An exact value, a physical entity, or an abstract concept, established and defined by authority, custom or common consent sets up to serve as a reference, model or rule in measuring quantities or qualities, establishing practices or procedures or evaluating results. A fixed quantity or quality.

Terminal Instrument Procedures (TERPS) Specialist - The individual responsible for designing, reviewing, and updating instrument procedures and ATC charts to support flight operations. This includes, but is not limited to instrument approach procedures, ATC charts, aeronautic source and obstruction information, automation and non-radar support etc.

Total Force Integration (TFI) - All collective Air Force components (active, reserve, guard, and civilian elements) of the United States Air Force.

Unit Type Code (UTC) - A Joint Chiefs of Staff developed and assigned code, consisting of five characters that uniquely identify a "type unit" of the Armed Forces. Source: DoD Dictionary of Military Terms. AF ATC UTC Example: 7FVL5 (SEI 055, E-5 Min, Tower Watch Supervisor).

Upgrade Training (UGT) - Mandatory training that leads to obtaining a higher level of proficiency and award of a skill level.

Utilization and Training Workshop (U&TW) - This is an executive decision meeting. A forum of the AFCFM, AETC Training Pipeline Manager (TPM), MFMs, and AETC Training Manager. The AFCFM and AETC TPM will sign and publish minutes before adjourning workshop.

Wartime Course - Comprised of tasks that must be taught when courses are accelerated in a wartime environment. Wartime tasks are the tasks to be taught in the 3-level course when the wartime courses have been activated. In response to a wartime scenario, these tasks will be taught in the 3-level course in a streamlined training environment. These tasks only apply to those career fields that require instruction in conjunction with their schoolhouse tasks.

Wartime Tasks - Those tasks that must be taught when courses are accelerated in a wartime environment. In response to a wartime scenario, these tasks will be taught in the 3-level course in a streamlined training environment. These tasks are only for those career fields that still need them applied to their schoolhouse tasks.

Watch Supervisor (WS) - The individual responsible for the overall operation of an air traffic

control facility during their shift and maintains general situational awareness of air traffic.

Weighted Airman Promotion System (WAPS) - The Air Force promotion system for enlisted members. See AFI 36-2502, *Enlisted Airman Promotion and Demotion Programs*, for promotion information.

Section A - General Information

1. Purpose. This CFETP provides the information necessary for AFCFM, MFM, commanders, training managers, supervisors, and trainers to plan, develop, manage, and conduct an effective and efficient career field training program. The plan outlines the training that individuals in this AFS should receive to develop and progress throughout their career. This plan identifies initial skills, upgrade, qualification, advanced and proficiency training. Some purposes of the CFETP are to:

1.1. Serves as a management tool to plan, manage, conduct, and evaluate a career field training program. Also, it is used to help supervisors identify training at the appropriate point in an individual's career.

1.2. Identifies task and knowledge training requirements for each skill level in the specialty and recommends education and training throughout each phase of an individual's career.

1.3. Lists training courses available in the specialty, identifies sources of training and the training delivery method.

1.4. Identifies major resource constraints that impact full implementation of the desired career field training process.

2. Uses. This plan will be used by MFMs and supervisors at all levels to ensure comprehensive and cohesive training programs are available for each individual in the specialty.

2.1. AETC training personnel will develop or revise formal resident, nonresident, field, and exportable training, based upon requirements established by the users and documented in Part II of the CFETP. They will also work with the AFCFM to develop acquisition strategies for obtaining resources needed to provide the identified training.

2.2. MFMs will ensure their training programs complement the CFETP mandatory initial, upgrade and proficiency requirements. OJT, resident training, and contract training or exportable courses can satisfy identified requirements. MAJCOM-developed training to support this AFSC must be identified for inclusion into the plan.

2.3. All 1C1 personnel, to include GS-2152 and 13M personnel, will follow this guide for upgrade training. 13M trainees will complete Part II only during qualification/certification training, as necessary. The list of courses in Sections C and D will be used as a reference to support training.

3. Coordination and Approval. The AFCFM is the approval authority and will initiate an annual review of this document to ensure currency and accuracy. MAJCOM representatives and AETC training personnel will identify and coordinate on the career field training requirements. Using the list of courses in Part II, they will eliminate duplicate training.

Section B - Career Progression and Information

4. Specialty Description from the DAFECD.

4.1. Specialty Summary. Controls en route and terminal air traffic by use of visual, radar and non-radar means. Supervises and manages ATC facilities. Related DoD Occupational Subgroup: 122200.

4.2. Duties and Responsibilities. Controls and regulates en route and terminal air traffic. Initiates and issues ATC clearances, instructions, and advisories to ensure the safe, orderly, and expeditious flow of air traffic operating under instrument and visual flight rules. Plans, organizes, directs, inspects, and evaluates ATC activities. **NOTE:** This CFETP outlines career progression/training requirements for 1C1 AFS personnel to perform ATC in a terminal environment only. Additional MAJCOM-specific requirements/training plan need to be established for 1C1 AFS personnel to operate en route ATC facilities.

4.2.1. ATC Journeyman (5-Skill Level/GS-2152).

4.2.1.1. Controls terminal air traffic. Initiates and issues ATC clearances, instructions and advisories to air traffic operating under instrument and visual flight rules. Uses air or ground communications, aural, visual and radar systems to control and expedite air traffic. Uses flight plan data, position reports, visual observations, and radar-displayed data to determine aircraft positions. Issues advisories to pilots, ATC and other agencies concerning weather conditions, NOTAM information, traffic flow control measures, wake turbulence and additional services. Provides flight assistance and emergency service to pilots. Conducts intra-facility and inter-facility coordination of clearances, instructions, advisories, and aircraft movement information. Maintains operating position forms and records. Performs equipment activation/operations and alignment functions.

4.2.1.2. Operates radar facilities (RAPCON, GCA and RFC). Uses non-radar and radar procedures to separate and control arriving, departing and en route aircraft within designated airspace. Radar monitors departing aircraft and aircraft making instrument approaches using other navigational aids. Releases and/or accepts aircraft to and/or from other en route or terminal ATC facilities.

4.2.1.3. Operates control tower facilities. Uses visual, radar and non-radar procedures to separate and control aircraft operating in the vicinity of an airport and on the movement area. Issues control instructions to provide separation between aircraft and vehicular traffic operating on the aerodrome. Operates field lighting controls, visual signaling devices, aircraft arresting barrier position controls and primary crash alarm system. Releases and/or accepts aircraft to and/or from other terminal ATC facilities. Conducts tower visibility observations.

4.2.1.4. Operates non-radar approach control tower facilities. Uses visual, radar and non-radar procedures to separate and control aircraft operating in the vicinity of an airport and on the movement area. Issues control instructions to provide separation between aircraft and vehicular traffic operating on the aerodrome. Operates field lighting controls, visual signaling devices, and aircraft arresting systems. Discusses inspection findings with supervisory personnel and recommends action to correct deficiencies. Combines conventional tower and non-radar procedures to separate and control arriving, departing and en route aircraft within designated

airspace for departing aircraft and aircraft making instrument approaches using navigational aids. Releases and/or accepts aircraft to and/or from other en route or other terminal ATC facilities.

4.2.1.5. Maintains continual surveillance of assigned airspace and aircraft movement area.

4.2.1.6. Performs as upgrade/qualification OJT trainer. OJT trainers must be qualified IAW DAFMAN 36-2689, DAFMAN 13-204v3, *Air Traffic Control,* complete the ATCTC, and Trainer QTP. Local trainer requirements will be provided to newly assigned controllers who are already trainer certified.

4.2.2. ATC Craftsman (7-Skill Level/GS-2152).

4.2.2.1. Supervises ATC functions. Ensures the facility operates in a safe, efficient, and professional manner. Effects coordination within the facility and between other facilities or agencies. Exercises general supervision over ATC personnel. Identifies training requirements, ensures training is conducted and certifies training. Ensures pre-duty familiarization and equipment checks are conducted and appropriate agencies are notified of equipment deficiencies. Directs actions of controllers in handling aircraft mishaps, emergencies, bomb threats, fire, and similar emergency situations. Implements emergency operational plans and procedures.

4.2.2.2. Controls terminal air traffic. Initiates and issues ATC clearances, instructions, and advisories to ensure safe, orderly, and expeditious flow of air traffic operating under instrument and visual flight rules. Employs air and ground communications, aural, visual and radar systems to control and expedite movement of air traffic. Releases and/or accepts aircraft to and/or from other en route or terminal ATC facilities. Coordinates the status of other ATC facilities.

4.2.2.3. Performs as upgrade/qualification OJT trainer. OJT trainers for ATC management training (CCTLR, NATCT, NSE, and ATCTC Instructor Certification) must: be certified on tasks to be trained, possess the appropriate SEI, complete ATCTC, complete Trainer QTP and respective management QTPs, must be position certified and/or facility rated and be recommended by their supervisor. Initial requirements only pertain to first time trainer qualifications. Local trainer requirements will be provided to new arrivals that are trainer certified.

4.2.3. ATC Superintendent (9-Skill Level/GS-2152).

4.2.3.1. Plans and organizes ATC activities. Provides for use and control of space, equipment, time, supplies, and personnel allotted to ATC activities. Analyzes traffic data from ATC facilities. Requisitions and accounts for equipment, space, supplies, and other resources required for efficient operation. Designs organizational chart to show lines of authority and to identify specific responsibilities for performing ATC functions.

4.2.3.2. Directs ATC activities. Establishes procedures and performance standards in ATC facilities. Recommends installing, maintaining, and removing ATC equipment and facilities.

4.2.3.3. Inspects and evaluates ATC activities. Conducts periodic inspection of ATC activities to determine operational readiness and to provide assistance in solving operation, maintenance, supply and personnel problems. Discusses inspection findings with supervisory personnel and recommends action to correct deficiencies.

4.2.3.4. Advises supervisor on status, maintenance and adequacy of equipment, supplies, training, and operational efficiency. Interprets ATC policies for operational community.

4.2.3.5. Controls terminal air traffic in order to maintain operational awareness and proficiency.

4.2.4. Chief Enlisted Manager (0-Skill Level/GS-2152).

4.2.4.1. Plans and organizes RAPCON ATC activities.

4.2.4.2. Directs ATC activities. Establishes procedures and performance standards in ATC Radar facilities. Recommends installing, maintaining, and removing ATC equipment and facilities.

4.2.4.3. Inspects and evaluates ATC activities. Conducts periodic inspection of ATC activities to determine operational readiness and to aid in solving operation, maintenance, supply, and personnel problems. Discusses inspection findings with supervisory personnel and recommends action to correct deficiencies.

4.2.4.4. Controls terminal air traffic in order to maintain operational awareness and proficiency.

4.2.4.5. Serves in MAJCOM or Air Force ATC Staff positions.

5. Skill and Career Progression. Adequate training and timely progression from the apprentice to the superintendent level play an important role in the Air Force's ability to accomplish its mission. It is essential that everyone involved in training do their part to plan, manage, and conduct an effective training program. The guidance provided (Table 5.1) in this part of the CFETP will ensure each individual receives viable training at appropriate points in their career.

Table 5.1 – Skill/Career Progression

Education and Training Requirements	**Grade Requirements**		
	Rank	**Average Time for Promotion**	**Earliest Sew-On**
Basic Military Training School			
Apprentice Technical School (3-Skill Level)	AB Amn A1C	 6 months 10 months	
Upgrade To Journeyman (5-Skill Level) - Fulfilled upon award of the 053, 056, or 364 SEI - There is no required minimum Time in Training for upgrade to 5-skill level	A1C SrA	10 months 3 years	 28 months

Junior Enlisted Foundations Course (JEFC300)	Priority 1: SrA with over 24 months time in grade (TIG), who have not attended ALS. Priority 2: SrA with 12-23 months TIG and pending assignment or deployment. Priority 3: SrA with at least 4 months TIG.		
Airman Leadership School - Must be a SSgt with approved waiver, SSgt-select, or SrA with 36 months time in service - Resident graduation is a prerequisite for SSgt sew-on (Active Duty Only)	**Trainer** Must be an A1C or above and be qualified and certified to perform the task to be trained. Must complete the ATCTC.		
Upgrade To Craftsman (7-Skill Level) - Minimum rank of SSgt-select - Complete 7 Level myLearning Craftsman course and associated projects - There is no required minimum Time in Training for upgrade to 7-skill level	SSgt	7.5 years	3 years
NCO Foundations Course (NCOFC500)	Priority 1: MSgts with approved waivers Priority 2: MSgt-selects Priority 3: TSgts by seniority (based on date of rank and total active federal military service date)		
Noncommissioned Officer Academy - Must be a TSgt or TSgt-select - Resident graduation is a prerequisite for MSgt sew-on (Active Duty Only)	TSgt MSgt	12.5 years 16 years	5 years 8 years
SNCO Foundations Course (SNCOFC700)	Priority 1: MSgts who have not attended SNCOA. Priority 2: MSgts with the most TIG and a pending assignment or deployment. Priority 3: MSgt Selects and MSgts with less than 7 months TIG.		
USAF Senior NCO Academy - Must be a MSgt or SMSgt-select - Resident graduation is a prerequisite for SMSgt sew-on (Active Duty Only)	MSgt SMSgt	16 years 19.2 years	8 years 11 years

Upgrade To Superintendent (9-Skill Level)	CMSgt	21.5 years	14 years
Chief Leadership Course (CLC) - Must be a CMSgt-select	**Chief Enlisted Manager** (0-Skill Level) - Must be a CMSgt		

5.1. Apprentice (3) Level.

5.1.1. Initial Skills Training. After basic military training, individuals will complete initial skills training at Keesler AFB, MS. The course content is recorded in the '3 Level' column, Part II of this CFETP. Personnel must complete a formal DoD or Department of Transportation (DoT) basic ATC Course to be awarded the AFSC.

5.1.2. Apprentice controllers must be assigned to PEC 35114P. Apprentice and retrainee controllers are not authorized to wear the ATC basic badge until requirements for the award of the RAPCON, Tower or GCA SEI are met. **NOTE:** Apprentice and retrainee controllers are authorized to wear the ATC duty identifier patch upon graduation of technical school.

5.1.3. Upon arrival, ensure the trainee has sufficient time to become familiar with their new surroundings and complete base/unit in-processing First Term Enlisted Course (FTEC) and orientation. Familiarize apprentice controllers with their organization and its mission. Units must develop a newcomer indoctrination program IAW DAFMAN 36-2689 and DAFMAN 13-204v3. Conduct an initial evaluation on all newly assigned controllers IAW DAFMAN 36-2689 and DAFMAN 13-204v3. Additionally, conduct the SITE on all newly assigned graduates of initial skills course IAW DAFMAN 13-204v3. Discuss training goals, responsibilities (trainee, trainer, supervisor and CCTLR), training time, training records, promotion, withdrawal procedures and crew policies, etc.

5.1.4. 3-skill level apprentice controllers may, with supervisor recommendation and CCTLR approval, begin training for the appropriate facility rating/SEI.

5.2. Journeyman (5) Level.

5.2.1. To be eligible for upgrade to the 5-skill level, individuals must complete requirements for the award of the 053, 056, or 364 SEI, all core tasks identified in Part II section A of 1C1X1 CFETP and all DAFMAN 13-204v3 requirements. Forward completed DAF Form 2096, *CLASSIFICATION/ON-THE-JOB-TRAINING ACTION* IAW local procedures. There is no required minimum Time in Training for upgrade to 5-skill level.

5.2.2. Following award of the 5-skill level and depending on experience, individuals may be considered for facility OJT trainer. Award of applicable Trainer Certification is not automatic and reserved for individuals who display the appropriate leadership qualities demanded by the responsibilities of performing trainer duties.

5.2.3. Qualified controllers should gain additional job experience and knowledge and obtain other

facility of assignment certifications after the position certifications are met for the award of the SEI. Forward completed DAF Form 2096 IAW local procedures.

5.2.4. Individuals will normally attend ALS after assuming the rank of SrA, upon first reenlistment or when selected for promotion to SSgt. The Air National Guard (ANG) may substitute this course with a non-resident ALS. Completion of ALS is mandatory prior to assuming the rank of SSgt. Once individuals assume the rank of SrA and complete ALS, they are authorized to supervise personnel.

5.3. Craftsman (7) Level.

5.3.1. Personnel are entered into 7-skill level upgrade training upon selection to SSgt (not earlier than the first day of the promotion cycle); or for retrainees, upon award of the 5-skill level if SSgt select or higher. Personnel selected for "out-of-cycle" promotion to SSgt will enter 7-skill level upgrade training the first day of the following month that AFPC announces the promotions. For controllers to be eligible for upgrade to the 7-skill level, individuals must satisfactorily complete all training requirements identified in the Craftsman portion of the Part II STS and the Craftsman myLearning Course. There is no required minimum Time in Training for upgrade to 7-skill level.

5.3.2. Award of the applicable WS SEI is not automatic and reserved for individuals who display the appropriate leadership qualities demanded by the responsibilities of performing WS duties. Individuals must meet requirements listed in the DAFECD and DAFMAN 13-204v3. After individuals meet all requirements for 7-skill level upgrade in accordance with DAFMAN 36-2689, the CCTLR may award the applicable WS SEI. Forward completed DAF Form 2096 IAW local procedures.

5.3.3. Prior to assuming the rank of TSgt (except retrainees), individuals must be awarded a 7-skill level. The primary function performed by an ATC Craftsman is watch supervisor. Qualified ATC Craftsman having earned a WS SEI are considered for management positions (e.g., NATCT, NSE, TSN, NAAM, TERPS, CCTLR) based on demonstrated leadership, skills, experience, rank and mission need for leadership roles IAW DAFMAN 13-204v3. Individuals must meet requirements listed in the DAFECD and DAFMAN 13-204v3 for award of the CCTLR SEI. It is imperative that controllers become dual-qualified before sewing on MSgt or career and assignment progression could be extremely limited.

5.4. Superintendent (9) Level.

5.4.1. The 9-skill level is awarded when individuals assume the rank of SMSgt. Air National Guard commanders may opt for SNCOs to complete the non-resident SNCOA course in lieu of attending the resident course.

5.4.2. The primary function performed by SMSgts in ATC is facility CCTLR.

5.5. The CEM.

5.5.1. 1C100 is awarded to individuals selected for CMSgt. Only CMSgts with an AOV Credential may fill ATC CEM positions.

5.5.2. The primary function performed by CMSgts in ATC is RAPCON CCTLR or selection to MAJCOM, FOA or Air Force Staff. Specific qualifications and responsibilities are outlined in the DAFECD.

5.6. The occupational badge reflects the degree of experience and training in the career field. Personnel will comply with the following dress and appearance criteria: Once awarded the 5-skill level, wear of the basic badge is authorized. Wear of the senior badge is authorized after award of the 7-skill level, and the master badge as a Master Sergeant, or above, with a minimum of 5 years in the specialty from award of the 7-skill level.

6. Training Decisions. The CFETP uses a building block approach (simple to complex) to encompass the entire spectrum of training requirements for the ATC career field. The spectrum includes a strategy for when, where and how to meet the training requirements. The strategy must be apparent and affordable to reduce duplication of training and eliminate a disjointed approach to training. The training decisions were made during the 1C1X1 STRT, held 9-13 December 2024. Copy of the minutes can be found on the HQ AFFSA SharePoint®.

6.1. Initial Skills Training. The initial skills course, E3ABR1C131, will be revised by 334 TRS at Keesler AFB, MS, per updates made to Part II of this CFETP.

6.2. 5-Skill level upgrade training see paragraph **5.2.1**.

6.3. 7-Skill level upgrade training see paragraph **5.3.1**.

6.4. Proficiency Training. In order to be proficient, a controller must perform air traffic control duties under normal workload conditions in each operating position they are certified in each month. Controllers must meet or exceed the monthly standards specified by the CCTLR to maintain proficiency.

Table 6.1 - 1C1 Career Field Development

						
 <28 Months TIS	 28 Months TIS	 4-6 TIS	 7-10 TIS	 11-14 TIS	 15-17 TIS	 18-20 TIS

7. Community College of the Air Force (CCAF). CCAF is one of several federally chartered degree-granting institutions; however, it is the only 2-year institution exclusively serving military enlisted personnel. The college is regionally accredited through Air University by the Commission on Colleges of the Southern Association of Colleges and Schools to award Associates of Applied Science degrees designed for specific Air Force occupational specialties and is the largest multi-campus community college in the world. Upon completion of basic military training and assignment to an AF career field, all enlisted personnel are registered in a CCAF degree program and are afforded the opportunity to obtain an Associate in Air Traffic Operations and Management degree. In order to be awarded, degree requirements must be successfully completed before the student separates from the Air Force, retires, or is commissioned as an officer. See the CCAF website for details regarding the Associates of Applied Science degree programs.

7.1. CCAF Degree Requirements. Prior to completing an associate degree, the 5-level must be awarded, and the following requirements must be met:

	Semester Hours
Technical Education	24
Leadership, Management, and Military Studies	6
General Education	15
Program Elective	15
Total:	60

7.1.1. Technical Education (24 Semester Hours): Completion of the career field apprentice course satisfies some semester hours of the technical education requirements. A minimum of 24 semester hours of Technical Core subjects/courses must be applied and the remaining semester hours applied from Technical Core/Technical Elective courses. Some academic degree programs have specific technical education requirements. Refer to the CCAF General Catalog for specific degree requirements for your specialty.

7.1.2. Leadership, Management, and Military Studies (6 Semester Hours): Enlisted Professional Military Education (EPME) and/or civilian management courses.

7.1.3. General Education (15 Semester Hours): Applicable courses must meet the criteria for application of courses to the General Education Requirements (GER) and be in agreement with the definitions of applicable General Education subjects/courses as provided in the CCAF General Catalog.

7.1.4. Program Elective (15 Semester Hours): Satisfied with applicable Technical Education; Leadership, Management, and Military Studies; or General Education subjects/courses, including natural science courses meeting GER application criteria. A maximum of nine semester hours of CCAF degree applicable technical credit otherwise not applicable to the program of enrollment may be applied. See the CCAF General Catalog for details regarding the Associates of Applied Science for this specialty.

7.2. Professional Certifications**.** Certifications assist the professional development of our Airmen by broadening their knowledge and skills. Additionally, specific certifications may be awarded collegiate credit by CCAF and civilian colleges, saving time and Air Force tuition assistance funds. It also helps Airmen to be better prepared for transition to civilian life. To learn more about professional certifications and certification programs offered by CCAF, visit the website via Air Force Portal. In addition to its associate degree program, CCAF offers the following certification programs and resources:

7.2.1. CCAF Instructor Certification (CIC) Program. CCAF offers the three-tiered CIC Program for qualified instructors teaching at CCAF affiliated schools who have demonstrated a high level of professional accomplishment. The CIC is a professional credential that recognizes the instructor's extensive faculty development training, education and qualification required to teach a CCAF course, and formally acknowledges the instructor's practical teaching experience.

7.2.2. CCAF Instructional Systems Development (ISD) Certification Program. CCAF offers the ISD Certification Program for qualified curriculum developers and managers who are formally assigned at CCAF affiliated schools to develop and manage CCAF collegiate courses. The ISD Certification is a professional credential that recognizes the curriculum developer's or manager's extensive training, education, qualifications, and experience required to develop and manage CCAF courses. The certification also recognizes the individual's ISD qualifications and experience in planning, developing, implementing, and managing instructional systems. Highly desired for NATCTs/ANATCTs to attend. Members should coordinate with the Unit Training Manager for class dates and enrollment.

7.3. Air Force Credentialing Opportunities On-Line (AF COOL). AF COOL replaced the CCAF Credentialing and Education Research Tool (CERT). The AF COOL Program is managed by CCAF and provides a research tool designed to increase an Airman's awareness of national professional credentialing and funding opportunities available for all Air Force occupational specialties. AF COOL also provides information on specific occupational specialties, civilian occupational equivalencies, AFSC-related national professional credentials, credentialing agencies, and professional organizations. AF COOL contains a variety of information about credentialing and licensing and can be used to:

- Get background information about civilian licensure and certification in general and specific information on individual credentials including eligibility requirements and resources to prepare for an exam.
- Identify licenses and certifications relevant to an AFSC.
- Learn how to fill gaps between Air Force training and experience and civilian credentialing requirements.
- Get information on funding opportunities to pay for credentialing exams and associated fees.
- Learn about resources available to Airmen that can help them gain civilian job credentials.

To learn more about AF COOL and funding processes, visit the Air Force Virtual Education Center (AFVEC) website.

7.4. Analysis, Design, Development, Implementation, and Evaluation Course. AETC offers the course which provides training for personnel charged with the responsibility of training program development and maintenance. The scope of training includes a systematic process used to analyze, design, develop, and evaluate training in the most effective and cost- efficient manner, all based around the process of continuous evaluation and improvement. The course offers two CCAF credit hours upon completion. Members should coordinate with the Unit Training Manager for class dates and enrollment.

Section C - Skill Level Training Requirements

8. Purpose. Skill level training requirements in ATC are defined in terms of task performance and knowledge-based criteria. This section outlines the specialty qualification requirements for each skill level in broad, general terms and establishes the mandatory requirements for entry, award, and retention of each skill level. The specific task and knowledge training requirements are identified in Part II, Section A (STS) of this CFETP.

9. Specialty Qualifications. This information can be found in the official specialty description in DAFECD, paragraph 3.

Section D - Resource Constraints

Purpose. This section identifies known resource constraints that preclude optimal and desired training from being developed or conducted, including information such as cost and manpower. Narrative explanations of each resource constraint and an impact statement describing what effect each constraint has on training are included. Also included in this section are actions required, OPR and target completion dates. Resource constraints will be, as a minimum, reviewed and updated annually. Contact your respective MAJCOM Functional Manager for the most updated information on resource constraints impacting Apprentice, Journeyman, or Craftsman level training.

Section E - Transitional Training Guide

10. There are currently no transitional training requirements. This area is reserved.

PART II

Section A - Air Traffic Control STS

1. Implementation. This STS will be used for technical training provided by AETC for the 3-skill level ATC apprentice course beginning 20250430.

2. Purpose. As prescribed in DAFMAN 36-2689 and DAFMAN 13-204v3, this STS provides information on the tasks necessary for Airmen to perform duties in the 3-skill level. STS includes training standards, specialty/general core tasks and technical references to conduct training. The STS identifies those common core knowledge/performance tasks required to obtain position certification/facility ratings.

2.1. Information in column 1 (Task, Knowledge, and Technical Reference) identifies common ATC tasks, knowledge, and Technical References (TR).

2.2. An asterisk (*) in column 2 (Core Tasks) identifies specialty-wide training requirements. All core tasks must be trained, although tasks may not be immediately applicable to all bases.

2.3. Column 3 is used to record completion of tasks and knowledge training requirements. Task certification, as a minimum, must show Training Start Date (TSD) (if applicable), Training Completion Date (TCD), Trainee and Trainer Initials.

2.4. Column 4 depicts formal training and the proficiency to be demonstrated on the job by 3-skill level individuals. Proficiency format coding system indicates the level of training and knowledge provided by the resident training courses. This coding system represents the contract between the AFCFM and the course providers.

3. Promotion Tests. The STS also serves as a guide for the development of promotion tests used in the WAPS for SSgt-TSgt. Specialty Knowledge Tests (SKTs) are developed at the USAF Occupational Measurement Squadron by SNCOs with extensive practical experience in their career fields. The test samples subject matter areas judged by test development members as most appropriate for promotion to higher grades. Questions are based upon study references listed in the WAPS catalog. WAPS is not applicable to the Air Reserve Component.

4. Recommendations. Comments and recommendations are invited concerning the quality of AETC training. A Customer Service Information Line (CSIL) has been installed for use by supervisory personnel. The purpose of this line is to report STS training deficiencies from technical school (i.e., trained incorrectly or not trained at all) not the Airmen's lack of knowledge retention. For a quick response to concerns, call CSIL at DSN 597-4566 or Comm 228-377-4566, or fax DSN 597-3790, or e-mail at, 81trg.tge.Workflow@us.af.mil. Reference this STS and identify the specific area of concern (paragraph, training standard element, etc.).

5. Wartime Task Requirements.

5.1. Gas Mask Usage. Training of all STS, to include CBRN TQTs, will be in accordance with DAFMAN 13-204v3 paragraph 8.1.

5.2. Landing Zone Operations (LZO). All controllers will be introduced to LZO basic terminology, definitions, and requirements via STS task item *11.1 ATC Combat Readiness Requirements*. The online portion of the 7-level course will build on knowledge standards by covering LZ personnel roles and responsibilities. See DAFMAN 13-217, *Drop Zone, Landing Zone, and Helicopter Landing Zone Operations*, section 4.9. for LZC certification procedures.

6. STS Documentation. Document STS in AODMS. Document STS in accordance with DAFMAN 13-204v3. For those with approved programs outside of AODMS, operating initials may not be used to sign any documents contained within the DAF Form 623, *Individual Training Record Folder*.

6.1. Appointed Trainers document the "Trainer" column of the STS when individuals meet or exceed the applicable standard. This is an automatic feature within AODMS when trainers certify items.

6.2. Qualification Standard/Certification Procedures: Trainers will train and qualify personnel to the "Go" standard established in the appropriate certification guide. "Go" means that the individual can perform the task without assistance, meets proficiency standards identified in Note 5 of the proficiency code key and local requirements for accuracy, timeliness, and correct use of procedures.

NOTE: Third-party certification and task certification are accomplished by the NSE/TSN, via the position certification process. The NSE must evaluate each task to the "Go" standard for each control and/or duty position. Ensure all control and duty position certifications are documented on AODMS Stan/Eval section. For those with approved programs outside of AODMS, document all control and duty position certifications on DAF Form 3622, *Air Traffic Control/Weather Certification and Rating Record*, or approved equivalent.

6.3. Supplements. MAJCOM and units may supplement this STS to add command and local requirements. Documentation of these tasks must be captured on AODMS as Job Qualification Standard/Continuation/Command (JQS) items within the local CFETP. For those with approved programs outside of AODMS, those tasks must be documented on DAF Form 797, *Job Qualification Standard/Continuation/Command (JQS)*, or approved equivalent, and included in the associated certification guide according to DAFMAN 13-204v3.

6.4. Printing Instruction. In an effort to reduce local CFETP printing costs for those with approved programs outside of AODMS, the following options are authorized: Keep at least one copy of the entire CFETP (part I and II) in each ATC facility for general access and master training plan development. The CCTLR may authorize placing only Part II; Section A of the CFETP, with the cover and the Trainer and Certifying Official Tracker, in individual's DAF Form 623.

6.5. Technical Reference (TR). The NATCT must identify all TRs for each knowledge/task contained in this STS and DAF Form 797. Enter all TRs into one Master Task and Technical

Reference (MTTR) and each associated certification guide. Unless using AODMS, the NATCT must maintain a copy of this CFETP in the Master Training Plan according to DAFMAN 13-204v3.

AIR TRAFFIC CONTROL QUALITATIVE REQUIREMENTS

Tasks, Knowledge and Proficiency Level

PROFICIENCY CODE KEY		
	SCALE VALUE	DEFINITION: The individual
TASK PERFORMANCE LEVELS	1	Can do simple parts of the task. Needs to be told or shown how to do most of the task. **(EXTREMELY LIMITED)**
	2	Can do most parts of the task. Needs help only on hardest parts. **(PARTIALLY PROFICIENT)**
	3	Can do all parts of the task. Needs only a spot check of completed work. **(COMPETENT)**
	4	Can do the complete task quickly and accurately. Can tell or show others how to do the task. **(HIGHLY PROFICIENT)**
TASK KNOWLEDGE LEVELS	a	Can name parts, tools and simple facts about the task. **(NOMENCLATURE)**
	b	Can determine step-by-step procedures for doing the task. **(PROCEDURES)**
	c	Can identify why and when the task must be done and why each step is needed. **(OPERATING PRINCIPLES)**
	d	Can predict, isolate, and resolve problems about the task. **(ADVANCED THEORY)**
SUBJECT KNOWLEDGE LEVELS	A	Can identify basic facts and terms about the subject. **(FACTS)**
	B	Can identify relationship of basic facts and state general principles about the subject. **(PRINCIPLES)**
	C	Can analyze facts and principles and draw conclusions about the subject. **(ANALYSIS)**
	D	Can evaluate conditions and make proper decisions about the subject. **(EVALUATION)**

NOTE 1: An asterisk sign (*) after the task, knowledge and technical reference indicates that the task is a CBRN TQT.
NOTE 2: An asterisk sign (*) in column 2 indicates a specialty/general core task.
NOTE 3: The Section 11 core task does not apply to GS-2152s unless deemed appropriate by the facility CCTLR.
NOTE 4: In the event a wartime course is activated, all apprentice course training tasks in this specialty training standard are designated as wartime tasks.
NOTE 5: All tasks contained in the ATC STS are trained to the 3c level when training for 5-level and above.
NOTE 6: All tasks in Section 7 of the ATC Craftsman 7-level STS do not apply to GS-2152s unless deemed appropriate by the facility CCTLR.

7.6. LZC/LZSO Personnel Roles and Responsibilities					B

Section B - Course Objective List

This area is reserved.

Section C – Support Materials

7. Support Documents:

Document	Duty Position	Developer
STS	Air Traffic Controller, Tower/Radar	HQ AFFSA

8. Training Publications. DAFMAN 13-204v3, outlines policies, procedures and responsibilities for training publications as OJT support materials. These support materials provide effective management devices for training and evaluation feedback of the entire training program.

Section D - Training Course Index

9. Training Course References. This section of the CFETP identifies training courses available for the specialties and shows how the courses are used by each MAJCOM in their career field training programs. Refer to ETCA website for further details.

Table 91. Required Courses

Course Number	Course Title	Location
E3ABR1C131	ATC Apprentice	Keesler AFB
AFTC 3F2X1 001	ATC Training Course	Duty Location
E6ACW1C171	ATC Craftsman (7-skill level)	Duty Location
E3ACR1C171	ATC Craftsman (7-skill level)	Keesler AFB
E3AZR1C191	ATC Chief Controller	Keesler AFB

Table 9.2. Recommended Courses

Course Number	Course Title	Location
E3OZR13M3	Military Airspace Management	Keesler AFB
E5AZG1C171	Introduction to US Air Force Flight Procedures	Oklahoma City
ACC AOCIQTASP	Air Operations Center Airspace Course	Hurlburt Field
E3AZR1C171	Airfield Operations Systems Specialist	Keesler AFB

10. Air University Courses. CDCs are not available for this AFSC.

Section E - MAJCOM Unique Requirements. MAJCOMS will identify MAJCOM specific requirements in the appropriate DAFMAN 13-204v3 supplement.

BY ORDER OF THE SECRETARY OF THE AIR FORCE

OFFICIAL

TERANCE D. GERNER II, CMSgt, USAF
1C1X1 Career Field Manager
